Information concerning the adjustment columns (columns Y and Z)

Column Y

Since 2006, employees have, as a rule, been entitled to a deduction for employment income, which is included in table TP-1015.TI-V. However, if you are paying remuneration as a payer, the beneficiary is not entitled to that deduction.

Likewise, if you are paying remuneration to an employee whose remuneration consists of only the value of taxable benefits relating to a former office or employment, the employee is not entitled to the deduction. Such taxable benefits include, for example,

- contributions paid to a private health services plan;
- benefits relating to the exercise of a security option; and
- loans granted without interest or at an interest rate lower than the prescribed rate.

In these cases, to ensure that the beneficiary's or employee's source deductions are not too low, add the amount of income tax in adjustment column Y to the income tax you are required to withhold according to the deduction code of the beneficiary or employee.

Note

If, according to the deduction code of the beneficiary or employee, you are not required to withhold income tax from the remuneration you pay, disregard the income tax provided for in adjustment column Y. The amount in that column is to be taken into account only if you are required to withhold income tax.

Column Z

If the amount on line 10 of form TP-1015.3-V exceeds \$32,001, subtract, for each increment of \$500 (or portion thereof), the amount in column Z of table TP-1015.TI-V from the amount in column N.
