Note : A negative entry indicates a financial requirement and a positive entry, a source of financing. The health and social services and education networks are consolidated line by line as of 2009-2010. Therefore, consolidated net financial requirements henceforth take into account the budgetary and non-budgetary transactions of the networks.

(1) Consolidated financial and budgetary transactions for 2008-2009 have not been restated to reflect the accounting changes relating to capital expenditures and investments in government enterprises. These restatements would have reduced the deficit by \$7 million.

(2) The net results of consolidated entities include consolidation adjustments.

(3) The *Balanced Budget Act* stipulates that the budgetary balance must take the impact of certain accounting changes into account.

(4) The budgetary balance within the meaning of the *Balanced Budget Act* after use of the stabilization reserve corresponds to the budgetary balance that takes into account the amounts allocated to and used from the stabilization reserve.

(5) Excluding investments made under public-private partnership that do not have an impact on net financial requirements because they were made and financed by private-sector partners.

(1) With line-by-line consolidation, the investments, loans and advances, capital expenditures and other accounts of the health and social services and education networks are taken into account as of 2009-2010.

(2) On May 1, 2010, the Fonds d'indemnisation du courtage immobilier was transferred without consideration to an entity not included in the government's reporting entity in accordance with the *Real Estate Brokerage Act* (S.Q., chapter C-73.2).

(3) Excluding investments made under public-private partnership that do not have an impact on net financial requirements because they were made and financed by private-sector partners.

(4) For 2008-2009, the net investments of the health and social services and education networks were established using the modified equity method.

(5) Actuarial value of retirement benefits credited during the fiscal year, calculated according to the actuarial projected benefit method prorated on service.

Note : As of 2009-2010, data take into account the line-by-line consolidation of the results of institutions in the health and social services and education networks with those of the government.

(1) A negative entry indicates a financial requirement and a positive entry, a source of financing. For the change in cash position, a negative entry indicates an increase and a positive entry, a decrease.

(2) This sinking fund receives amounts to be used to cover retirement benefits payable by the government under the public and parapublic sector retirement plans. The investment income of this fund is reinvested in it and applied against the interest on the actuarial obligation to obtain the interest charge on the retirement plans.

(3) Employee future benefits funds receive amounts used to cover employee future benefits (accumulated sick leave and survivor's pension) payable to government employees.

Note : A negative entry indicates a financial requirement and a positive entry, a source of financing.

(1) Consolidated entities include non-budget-funded bodies, special funds (excluding the Generations Fund) and the health and social services and education networks.

(2) As of 2009-2010, following the line-by-line consolidation of the health and social services and education networks, figures for budgetary transactions are shown separately for non-budget-funded bodies, special funds and the networks.

(3) Since the 2006-2007 accounting reform, pursuant to the *Balanced Budget Act* in effect since the reform, the amounts presented correspond to those published in the financial statements for the fiscal year concerned, without taking into account restatements for that year that may be effected in subsequent fiscal years.

(1) For consistency with the financial data presented in the public accounts for years prior to 2009-2010, the consolidated budgetary balance for those years does not take into account the changes made by Bill 40 (2009, chapter 38) to the mechanics of the reserve. As of 2009-2010, the data take the impact of Bill 40 into account.

(2) Shown on a cash basis until 2004-2005 and on an accrual basis thereafter.

(3) The budgetary balance within the meaning of the *Balanced Budget Act* after reserve corresponds to the budgetary balance that takes into account amounts allocated to and used from the stabilization reserve.

(4) Own-source revenue includes the extraordinary losses of the Société générale de financement du Québec, i.e. \$91 million in 2001-2002, \$339 million in 2002-2003 and \$358 million in 2003-2004.

(5) From 2006-2007 to 2008-2009, the net results of the health and social services and education networks were established using the modified equity method. As of 2009-2010, the revenue and expenditure of the networks are consolidated line-by-line, like those of non-budget-funded bodies and special funds.

(6) Including an accounting change of \$58 million.

Note : For the purposes of historical revenue and expenditure growth analysis, considering the change in accounting of budgetary and financial data for institutions in the health and social services and education networks, the growth rates shown above must be used.

(1) For consistency with the financial data presented in the public accounts for years prior to 2009-2010, the consolidated budgetary balance for those years does not take into account the changes made by Bill 40 (2009, chapter 38) to the mechanics of the reserve. As of 2009-2010, the data take the impact of Bill 40 into account.

(2) From 2006-2007 to 2008-2009, the net results of the health and social services and education networks were established using the modified equity method. As of 2009-2010, the revenue and expenditure of the networks are consolidated line-by-line, like those of non-budget-funded bodies and special funds.

(3) To facilitate the comparability of historical data and due to the amounts involved, we have presented two results for 2009-2010. The first is obtained using the modified equity basis of consolidation for network institutions and the second, using line-by-line consolidation method. The latter method is used as of this fiscal year.
