HENRY'S SHORTHAND SCHOOL
Ottawa, Ont.

To: Mrs. A. McDowell, 1028 Park Avenue, Ottawa.

From: D. D. Shorthand School

REGULAR CLASS.

We are pleased to announce the opening of our new regular class, which will commence on Monday, September 15th. The class will meet twice a week, from 10:00 a.m. to 12:00 noon.

We have a limited number of seats available, so please contact us as soon as possible to reserve your spot.

If you have any questions, please don't hesitate to ask.

Sincerely,

D. D. Shorthand School

ATTENTION: As per the terms of our agreement with the landlord, any noise disturbance after 10:00 p.m. will result in a fine of $100.00. We appreciate your cooperation in maintaining a peaceful environment for all our students.

PRICE LIST

10-week course: $50.00
20-week course: $90.00
30-week course: $120.00

Students enrolled in the 20-week course will receive a 10% discount. A 5% discount will be given to students enrolled in the 30-week course.

The deadline for registration is September 10th. Please call or email us to confirm your spot.

Thanks for your continued support.

The Making of a Lawn.

A good lawn is one of the first essentials in making a beautiful home. Many people will not take the time and trouble to do this important work because they think a lawn is too much trouble. But if you wish your home to be truly attractive, it must have a good lawn.

Many good lawns are made from the very beginning, but in the case of most of us, we must work to improve the one we have. If you do not already have a lawn, the time to begin is now. If you do have a lawn, the time to improve it is now.

The first thing to do is to get rid of any weeds or grasses that are growing in the area where you want to make your lawn. This can be done by hoeing or by using a herbicide. Then you can start planting the grass seed. This should be done in the spring, when the weather is warm and the soil is moist. The grass seed should be broadcast evenly over the area and then watered in well.

The next thing to do is to fertilize the lawn. This can be done with a lawn fertilizer, which is a mixture of nutrients that the grass needs to grow. The fertilizer should be applied according to the instructions on the package.

The third thing to do is to water the lawn. This is important because the grass needs water to grow. The lawn should be watered every day, or every other day, depending on the weather.

The fourth thing to do is to mow the lawn. This should be done regularly, at least once a week. The grass should be cut at a height of 2 to 3 inches. This will help the grass to grow stronger and healthier.

The fifth thing to do is to edge the lawn. This can be done with a edger, which is a tool that cuts the grass along the edges of the lawn.

The sixth thing to do is to remove the thatch. This is a layer of dead grass and organic matter that can build up in the soil. It can be removed with a thatch removal machine or by using a thatch removal chemical.

The seventh thing to do is to aerate the lawn. This can be done with an aerator, which is a machine that makes small holes in the soil. This helps the soil to drain better and the grass to grow stronger.

The eighth thing to do is to overseed the lawn. This can be done with grass seed, which is spread over the lawn in the fall. This will help to keep the lawn green all year round.

By following these steps, you can make a beautiful lawn that will enhance the beauty of your home. If you do not have the time or the energy to do this, you can hire a lawn care professional to do it for you.
The EQUITY.

Shawville, April 27, 1922.

The Roman Catholic hierarchy of this province has prosecuted against extending the franchise to women, and to protest against this we are resolved to settle the political power of the men here. We believe the political power of the men here is impaired by the right to vote for the extension of the franchise to women, and not in the interest of the franchise to women, and the relative equality of our women and their having equal rights with men. It is the wisest policy for all men and women and men to united to prevent it.

The establishment of the Canadian Wheat Board, as constituted before 1921, is no doubt to be desired and is expected by the present Government. The beaver of the C. W. B. have given the opinion that it is not within the jurisdiction of the Canadian Wheat Board. We do not believe that the Canadian Wheat Board has helped a strong public against it. The matter we may be decided in the Supreme Court. But Mr. Wood, the leader of the Labour party in the W—, we look for any relief from Ottawa under his hand and says it is up to the legislatures of the Western provinces to take the matter in hand. This would appear to be the logical course.

The Minister of Agriculture, speaking in the House a few days ago, held out some hope of the British embargo on Canadian cattle being removed at an earlier date. English consumers are agitating for its removal on the ground that this is done to the cost of people for many years fighting to win the war. If Canadian cattle were permitted to enter England under reasonable restrictions, it would be to the ultimate benefit of the United States, not only for this reason but because the Canadian cattle are of a higher grade and of greater independence which enables them to withstand the tests of exportation.

Motions—Carried.

The following resolution shall be carried—Carried.

The Pontiac Wool Growers' Association Shawville, Que.

We have moved into our new quarters where we will continue to carry a full stock of Flour, Feeds, etc. Our Grain and Clover Seeds are now in—all No. 1 Government standard.

A car of re-cleaned Western Oats expected daily.

Having taken over the agency for Deering Farm Machinery and International Repairs, intending buyers would do well to get our prices.

T. A. Draper, Sec'y and Mgr.

Shawville, Que.

Our Prices are the Lowest.

W. E. N. Hodgins.

Liquor Commission

Special Notice to Possible Buyers of Permits for the Sale of Beer and Wine

We beg to again call the attention of the public in general, and of the local Municipalities of the said area, that the permit holder cannot sell his establishment, but he shall at all times be prepared to make his application for a new permit.

Any permit holder can sell his establishment, but he must immediately return his certificate to the Commissioner.

The Law is clear in this point, and these are confirmed by having stability in the law for the prevention of the law.

Grape-Nuts makes a friend of the taste and an ally of the digestion by providing a well-rounded, complete meal in one easy-to-digest form.

Keep in mind:
- Grape-Nuts makes a delicious and wholesome breakfast, lunch, or dinner.
- Grape-Nuts are versatile and can be used in many recipes.
- Grape-Nuts are a great source of protein and fiber.
- Grape-Nuts are a good source of vitamins and minerals.
- Grape-Nuts are a great way to start your day off right.

Grape-Nuts are a great way to get the nutrients you need to stay healthy.

When Will There Be A Disarrayment of Dining Tables?

Suppose everybody would recognize the fact that there are a great many people who make the stupidest sacrifices to be handy and have the latest fads in eating.

Suppose the ancient aggravations of the table—stone and shutagin—were the insigniam of the body? Why should there be a separate diet for the body?

The saving would be beyond imagination.

Yet millions go on declaring war on the stomach and accepting the unhealthful stricken with a nervousness, barberry, unbalanced diet, and unwise food at breakfast or lunch — and wonder why there is a reaction. It is due to lack of early medical care.

There is a charm and satisfaction of the good things in life, in the perfect condition of wheat and malted barley—sweet, crisp, and wholesome. It digests quickly, and provides the necessary vitamins and minerals, including the vital mineral salt, body, nerve and constitution.

Order Grape-Nuts from your grocer today, and let us adjust our price along with to an enthusiastic diet and digestion.

Grape-Nuts—the Body Builder
