PERSONALS

By Mrs. Betty Turner

Many Veterans Parade At Campbell's Bay

The annual Veterans Parade was held on Sunday afternoon, November 27, at the town hall of Campbell's Bay. The parade was organized by the local Veterans Association, and included both veterans and civilians.

The parade began with the singing of "The Star-Spangled Banner" and "God Save the Queen," after which the parade proceeded down Main Street, past the cenotaph, and then turned onto Centre Street.

The parade featured a large float, decorated with American flags and covered with veterans. The float was pulled by a group of young people, who sang patriotic songs as they moved along.

After the float, a group of veterans marched down Main Street, followed by a group of civilians.

The parade ended at the town hall, where a special service was held to honor the veterans. The service was attended by a large crowd, who sang "The Battle Hymn of the Republic."
MORRISH FEWEST FROM CHEAPER FEED

Dr. W. M. Beeson, Professor of Animal Husbandry at Purdue University, is the author of the following article which appeared in the American Meat Institute held in Chicago September 21-23 reprinted by permission of the Purdue University Press.

In this experiment four age groups of steers—6-month-old, 11-month-old, and 22-month-old corn silage and grass silage were fed as sole sources of roughage to four groups of steers. The poorer growth responses which have been observed in the past to the above-named. I've heard so much about what is converted into a highly efficient growing ration. At present a large proportion of our crop roughages are being wasted through improper use.

The new concept is being developed in the feeding of cattle which is based on the idea that properly fed cattle is a thing that must be done to ensure adequate nutrition to our growing population. In the United States, the average producing cow is gaining weight at a rate of 1/4 to 1/2 pound per day. In the last decade or two there has been a tremendous increase in the production of corn for cattle feeding. This has resulted in an increased demand for high quality feedstuffs. The demand for these feedstuffs has increased dramatically over the past several years.

Just In The Other Room

By Mrs. George Murphy

They're just in the Other Room and I think I'll go in and say hello.

Miss Elise Gooden, of Shawville, spent the weekend visiting Mr. and Mrs. Miss Jones Murphy.

Miss Dorothy Lawson, of Ottawa, spent the weekend visiting her father, Mr. H.H. Lawson.

Mrs. W. H. Murphy and Mr. Graham Murphy spent Sunday morning at the Bank of Montreal. The latter is an individual and through his society has taken an active part in international work.

Several committees were set up to make arrangements for this important event, with Mrs. J. M. Stinson acting as general chairman. Mr. and Mrs. W. T. Stirling, Mr. and Mrs. W. S. Stirling, Mr. and Mrs. W. R. Stirling, Mr. and Mrs. W. G. Stirling, Mr. and Mrs. W. H. Stirling, Mr. and Mrs. T. D. Stirling, and Mr. and Mrs. W. J. Stirling serving as members of the committee.

The flowers no longer bloom in the garden, but the memories of the past are precious. Many pupils that I once loved so dearly will be missed. Two sisters were by my side throughout the years, and their love and support have been invaluable. The tears I could scarcely hide. Leaving for western home once again, I feel a sense of nostalgia and a desire to return."

The Shawville Story

In other breeds leading herds are the A. Merrihew and C. C. Gowan, the former at 1,700 Acre, B. M. Motley, and Thoreauville Farm. The late Mr. Robert F. Shawville were also recognized as breeders of the finest cattle. Some farmers ship cattle from the Quebec government, No. 8 Highway and have been through Shawville, with new pens earlier in written three miles east of the village, and to be fully completed next year. From Shawville runs the road to Ottawa, passing through a village of Portage du Fort, and near the bridge and the Chaudière Falls, which is a high point in the village and district area.

No Farms Parents

Shawville is the centre of one of the most fertile sections of Canada. It is a district which offers excellent farming and cattle raising. The town of Shawville, close to the village of Chaudière Falls, is well known. The Ottawa river, extends north for 14 miles and there are several fishing and farming areas.

The chief avenue of this district is its fine network of roads and turnpikes. It is well connected by rail to the United States and, with a recent building of the new railroad, by rail to the nearest town of Pembroke. The town of Shawville offers fine scenery and many interesting points of interest.

The Ottawa river is broad and navigable for several miles, and has many small islands. The river is well suited for fishing and boating, and is a favorite resort for many tourists.

It is a region of great natural beauty, with rolling hills and fertile valleys. The soil is rich and productive, and the climate is mild and favorable for agriculture. It is an ideal location for a winter home.

The town of Shawville is well supplied with water, and the village is supplied with good water from the Ottawa river. The town is supplied with good water from the Ottawa river.

The Ottawa river offers excellent opportunities for fishing and boating. The river is well known for its fine salmon and trout fishing, and is a favorite resort for many tourists.
