SAFEG DRIVING ON HIGHWAY 8

As a consequence of recent editorials on the subject of Highway No. 8 the suggestion has been made by several people that we are not doing enough to keep the road safe. We reply to these that our efforts are in line with what is being done by others. The truth of the matter is that those who have been doing the work have been doing it with the best of intentions. And the question remains as to how much more can be done within the framework of the existing system.

The problem is not one that can be solved by any one agency or organization acting alone. It requires the cooperation of all who use the highway and those who are responsible for its maintenance. It is a complex problem that cannot be dealt with in a vacuum.

We have been hearing for years about ways to improve safety on Highway No. 8. But until now, there has been no concerted effort to implement these ideas. It is time that we take a fresh look at the problem and consider what can be done to make this highway safer for all who use it.

Let's work together to make Highway No. 8 a safer place to drive. With everyone's help, it can be done.

"Dirty Work At The Crossroads" 
Ably Presented by S. H. S.

The Shawville High School production of "Dirty Work At The Crossroads" provided two nights of entertaining fare for large audiences and should be required reading for a number of students who went "raw through". The scenery for the play was designed by Mr. Blair Brown, and it was not only excellent in itself but it became the most outstanding feature of the production. Bill Campbell and his crew did an excellent job with effects which, as the program states, were exceeded only to reappear in the performance. The pace was a "Little Nell" to be reckoned. It was by far the most challenging role and Sylvia to-1
