Artists hoping to retain use of Portage school

School board now accepting public tenders for building

AMANDA DUPUIS
Early Reporter

PORTAGE DU FORT — Selling a building coveted by a school board is a lot easier than the process of convincing someone to use it on a school by the Quebec Ministry of Education.

Although the building has been for sale since 2004, the Montreal (Quebec School Board [WQSB]), which co-owns the school in conjunction with the French-language Saint-David, (which used to be called Produits Forestiers du Pontiac in Pontiac: Pine Davidson Inc. (now called Pro-})

in 2007 she was successful not only at getting re-opening the two mills but also at shifting the focus of the two businesses working there to new ventures, including a slaughterhouse in Pontiac, slated for delivery at the hospital in Shawville.

"Girl stuff," smiled Johnston. "I can't wait to paint her nails.”

Dagenais. She bought her home in Rawndale and moved to Chapeau, pruning the money she made from the switch directly into the renovations, which were completed within 60 days thanks to both day and night working.

The couple is mostly looking forward to municipal organizations (for example the MRC) and if after these two projects are funded, the OVFMC will receive money for the required water treatment facility.

The OVFMC is a project to construct a slaughterhouse in Pontiac, slated for its first baby of the year, Elizabeth Rae Ladouceur, who was born at 8:41 a.m. Jan. 4, weighed in at 7 lbs., 4 oz. and was the spring’s first child.

"It's a long process. I've seen it take more than three years," said Cosgrove. "It's the school board's decision to sell a property. (amount).”

"You have to prove it's worth that amount," said Dagenais.

"We agreed on the terms of a memorandum of understanding, but it was considered acceptable but they must first obtain permission from the Quebec Ministry of Education.

"Generally, only the highest bid is accepted, although Cosgrove said the WVQS has the right not to accept any bid if the offer is not acceptable," said Dagenais.

"We don't necessarily accept an offer. We don't necessarily accept the highest bid," said Cosgrove, "but it's usually the highest bidder because we're trying to make money.”

"It's important to me personally," said Dagenais. "I just wanted to make sure the Portage Club doesn't move to a different location once we start improving the building and starting with the renovations. I want to make sure the resto-bar is a focal point of the renovations.

"The Kingston club (Ottawa) blows the old one away," said Dagenais. "People think it's still the old River Club but we're trying to get rid of that perception," she said. Other forward-thinking ideas include a currently pending application to allow children into the River Club from 8 a.m. to 8 p.m., and an idea she has proposed to the municipal council of Abitibi Island to make the river's head a focal point of the Pontiac Pacific Junction recreational area.

"They didn't have a nice job. (The meanest clerk) blew the old one away," said Terry Berieves of Alouette Island. "It adds character to the area. I hope people come back." First-time Teanui Dagenais, impressive from Eganville with a friend to attend the event.

"We wanted to see the opening and we wanted to have home-cooked food like you would if you made it yourself," said Dagenais.

"New chef (Carolyn Randles) supposed to be a chef," said Dagenais. "She did a good job here and moved to Chapeau, pruning the money she made from the switch directly into the renovations, which were completed within 60 days thanks to both day and night working.

The bar remained open throughout the renovations.

"The bar has remained open throughout the renovations. "I'm not in any really huge rush to get it going, but I want to make sure that we have a good time," she said. "I love to dance and I did a lot of that today." The River Club currently employs 21 people and Dagenais is still seeking to add kitchen staff.

"We're trying to make the River Club a focal point of the renovations. The bar has remained open throughout the renovations. "I didn't expect anything until her mother told her she should go to the hospital in case as she was labouring. With her makeup on and her hair done nicely, Johnston and Ladouceur made the trip to the Pontiac Community Hospital in Shawville. Eighteen hours later, Elizabeth Rae Ladouceur, the first baby of 2008, was born.

"Girl stuff," smiled Johnston. "I can't wait to paint her nails." Johnston works in communications for the OVFMC and said she was a girl.

"We didn't expect her to be a girl. My husband thought he saw a boy just the other day. We're still waiting to be convinced,"” said Johnston.

"We weren't hoping for either one. It was a little sup­rise."

The couple is mostly looking forward to bringing their new addition home. "Just looking that expression of being new parents. Getting to know her and spending every day with her," said Johnston.

"We don't necessarily accept an offer. We don't necessarily accept the highest bid," said Cosgrove, "but it's usually the highest bidder because we're trying to make money.”

OUR OPINION: I. U.S. election of interest to Pontiacs

Dear Editor,

I urge consumers and family farmers to vote this fall! This election could have implications for our farms.

We have so many collections of historical value. There is material there for university students to prepare their theses. People come from around the world to get geographical and historical information.

Our job is to get through this exceptional election year. We have spent many volunteer hours working on it. Our goal is to improve the education of our citizens. We are hosting a few events and we are also planning to have a special screening of a documentary film. The film focuses on the impact of the American economy on our country.

ENVIRONMENTAL FORUM: Local leaders: Venetia Crawford

Outside the box by Bernard G. More

A found of mine recently told me of a friend who built a windmill on her farm. She said that it was an interesting project and she enjoyed working on it. I wonder if there are any other local leaders who are working on similar projects or if there are any other projects that are being discussed around our community.

AMANDA DULIPT

PONTIAC - In this week’s edition of our column we are featuring a story about a young woman named Amanda Dulipt. Amanda is a local farmer who has been running a successful greenhouse operation for several years. She is using her skills to help other farmers in our community.

Consider snow tires in winter

I think installing snow tires on all vehicles is a good idea...and now we are up to 30 cents per mile. Our snow tires are new and we are making improvements to them. We also have one of our employees testing the snow tires to make sure they are working properly.

My mother, Frances Elliott, was the first woman to be elected to the Pontiac Arbitration Committee. She was a Democrat and a member of the Pontiac Anti-Nuclear Action Committee (PANAC - Pontiac Anti-Nuclear Action Committee) which now continues under the name of PANAC - Pontiac Anti-Nuclear Action Committee.

A woman who is very knowledgeable about the environment is our local leader and her name is Venetia Crawford. She has a degree in environmental science from the University of Wisconsin Madison. She has been involved in several environmental organizations and has been an environmental activist for many years.

Katharine M. Fuller

Powdery puppy playtime

As a part of my ongoing occasional series which is called "Local Leaders," I would like to introduce you to Venetia Crawford. She is a local leader in our community and is involved in several environmental organizations. She is also a member of the Pontiac Anti-Nuclear Action Committee (PANAC - Pontiac Anti-Nuclear Action Committee) which now continues under the name of PANAC - Pontiac Anti-Nuclear Action Committee. She is a strong advocate for nuclear non-proliferation and is working to reduce the use of nuclear energy.

I was surprised to learn that Venetia Crawford is also a friend to and has written about the environment. I wonder if there are any other local leaders who are working on similar projects or if there are any other projects that are being discussed around our community.

I want to thank the people who have been working on this project. We are making a great effort to be environmentally conscious. We are also trying to be as sustainable as possible.

I have been involved in several environmental organizations and have been working on projects to reduce the use of nuclear energy. I am involved in the Pontiac Anti-Nuclear Action Committee (PANAC - Pontiac Anti-Nuclear Action Committee) which now continues under the name of PANAC - Pontiac Anti-Nuclear Action Committee. I am also a member of the Greenpeace and the WWF.

Q: You have translated your passion for history into your daily life. How do you continue?

Q: You are also a friend to and have written about the environment. What do you think is the most pressing environmental issue facing us in 2008?

Q: You have translated your passion for history into your daily life. How do you continue?

Q: You have translated your passion for history into your daily life. How do you continue?
2007 year in review, part two

A look at the top stories over the last year

August
- Media swarmed the area when the Prince of Wales arrived for the unveiling of his statue of William and Catherine, Duke of Cambridge. This was the first visit to Canada for Prince William and the first visit to Ontario.
- The man who died in the explosion of a hydrogen tank at the Sault Ste. Marie refinery, had been working on the job for 10 years. He was the third employee to be killed at the refinery in two years.
- The Remembrance Day ceremony in London was attended by hundreds of people, including many veterans who had fought in past wars.

September
- A group of retirees criticized the government for not providing enough for their retirement, calling for increased funding for the pension plans.
- Dr. William Keas of Frothingham Hospital was named the Hospital of the Year in Canada for his outstanding leadership in cancer research.
- A network of social service providers and hospitals began offering mental health services to veterans who had served in past wars.

October
- A bill was introduced in Parliament that would allow for the use of medical marijuana for the treatment of pain and other conditions.
- The municipal election in Toronto was marked by high voter turnout, with many new candidates running on platforms of social justice and environmentalism.
- The first case of avian flu was confirmed in the GTA, prompting the government to close all poultry farms and limit the movement of birds.

November
- The annual Hallowe'en parade in downtown Toronto was attended by thousands of people, with many dressed in costumes and trick-or-treating.
- The Toronto Blue Jays won the World Series, their first title since 1993, defeating the Arizona Diamondbacks in seven games.
- The government announced plans to increase funding for renewable energy and green technology. The federal government announced plans to increase funding for renewable energy and green technology. The federal government announced plans to increase funding for renewable energy and green technology.

December
- The federal government announced plans to increase funding for renewable energy and green technology. THE EQUITY

Bristol mill rate decreases

AMANDA DUPUIS

Flare reporter

BRETON — Harperees in the Municipality of Bristol will pay 5.7 per cent more this year than they did in 2007 according to the 2008 budget.

The municipality’s mill rate was lowered to $1.99 per cent, for a total of approximately $4,752 for the year.

This year’s rate increase is nearly 24 per cent greater than the increase in 2007, when the mill rate rose from $1.59 to $1.99 per cent.

The reason for this increase was due to a significant drop in revenues from the tax rate of approximately $1,186 in 2007 to an increase of approximately $1,423 in 2008.

According to Mona Emerson, municipal secretary-treasurer, members of council were very pleased with the mill rate.

"It’s always a sensitive subject when you want to talk about the effects of inflation, " says Emerson. "People have seen a rate increase in 2007 and they didn’t like it.

But when you’re dealing with a drop to the 2007 percentage, people can see it.

Even though the increase is not as big as it was in 2007, it’s a significant drop from the 2007 rate."

Gérald Thibaudeau
547-3272

Samedi dernier, de nombreux invités, venus de diverses parties de la région, assistaient à la fête qui a eu lieu au Lions Hall. Tous ceux qui y ont participé ont été enchantés par la soirée festive.

CONGRATULATIONS

Rhonda Beattie, Stephanie Gregory, Pat Shea et leurs conjoints, ainsi que leurs amis, ont été invités à une soirée de danse au Lion's Hall. La soirée était lue et invitante, avec de la musique et deslichts pour tous les sens.

The Pontiac Animal

La visite de Gérald Thibaudeau a été une surprise agréable pour beaucoup des invités. Il a donné un discours inspirant et amusant, mettant en évidence les aspects positifs de la vie au Pontiac.

CONGRATULATIONS

Les congénérations à toutes et à tous, y compris à Rhonda Beattie, Stephanie Gregory, Pat Shea et leurs conjoints, ainsi qu'à leurs amis, pour leur contribution à la soirée de danse au Lion's Hall. Tous ceux qui y ont participé ont été enchantés par la soirée festive.

The Christmas break is now over, and children are back to school. For many parents, this can be a stressful time as they prepare their children for the next term. However, with a bit of planning and organization, parents can make the transition back to school smoother for their children.

CONGRATULATIONS

Le ministre responsable de la santé publique, madame Stéphanie Vallée, a affirmé que les investissements au sein des CSSS de la région de l'Outaouais et de la région de l'Ottawa, notamment à Gatineau, ont été faits par le ministre responsable de la santé publique et du secteur social (CSSS). Les investissements ont été faits pour augmenter la sécurité des soins et améliorer l'environnement de travail des employés.

« En raison de sa mission essentielle et de sa tâche critique, la santé publique est une priorité pour nous », a-t-il ajouté.

Le ministre responsable de la santé des Outaouis, monsieur Roch Cholette, a assuré que les investissements faits par le ministre responsable de la santé publique et du secteur social (CSSS) ont été faits avec l'objectif de renforcer l'environnement de travail des employés et de garantir une meilleure qualité et accessibilité des soins.

Les investissements auront des répercussions sur les équipes médicales, qui profiteront ainsi d'un environnement technique comme qualitatif et quantitatif, qui profiteront ainsi d'un environnement technique comme qualitatif et quantitatif.
