This is Lord Salisbury's suggesting the proposed. This is Lord Salisbury's suggesting the proposed of the second string to the seco tion. Some of his more timed colleague urged that when the Liberals returned to power, closure in this form would leave the Tories help'ess to resist the most radical measures. "True," replied Lord Salisbury, "but the change is inevitable if we do not establish closure by majority, instead of the present combrous and often unworkable system, the Liberals will. They will be eager for legisla tion, intolerant of obstruction, and far less considerate of minorities than ourselves. The country will never acquiesce in the permanent paralysis of Parliament by the Irish. Let us, therefore, recogn ze the inevitable. We may as well have the credit of a reform which both parties know to be necessary and the benefit of it while we are in power." These arguments prevailed. BRITISH COLUMBIA. VICTORIA, B.C., Jan. 24-Intelligence was wired from Wellington this morning that an explosion had occurred in No. 5 pit. Hon. Mr. Dunsmuir, owner of the mine, proceeded quickly by special train to the scene of the disaster. An eye-witness states that when about one hundred yards from the pit he heard a report like a large cannon, and there in-stantly shot far into the air a dense mass of black smoke and dust, which converted the snow covering the ground into inky blackness. This continued for five minutes and then subsided, leaving everything apparently as before, though a portion of the fan house was destroyed. Manager Bryden immediately proceeded to the shaft, and attention was first paid to repairing the fan house, which was quickly accomplished and the fan started again. The shaft timbers were destroyed and the cages could not be used, but pulleys and rope were immediately prepared. Meanwhile the first man to come out of the pit had climb-ed by means of the case wire cable through the shattered timbers to within a hundred feet of the top, when a rope was lowered him and he reached the surface in an exhausted condition. A second miner was also enabled to get up by this perilous method to the earth, but it is reported that when 50 feet from the top he loosed his hold and feel to certain death at the bottom of the shaft.

It will contain up certain epochs of Canadian history and describe them. His idea, evidently, was Fair Maids of Gotham ; Rev Mr. 1 to illustrate the co-operative plan of writing history, a method which has since been followed by Mr. JUSTIN WINSOR, of Cambridge, Mass., whose Narrative and Critical History of America is so worthy an example of what may be done in this way. Mr. Winson has improved on the suggestion of our ex-Governor, and has employed specialists to do the work. In this way, we shall, on the completion of the work, have the most notable contribution to the literature of the hisory of this continent that has ever been attempted by the scholars of this age. Major Prower on the Briton in English History.

The second lecture of the course of lectures Quebec, was delivered in the large room of the Society, last Tuesday evening by J. Elton Prower, Esq , on "The Briton in English History." The audience was very large and appreciative. Dr. George Stewart jr., F. R. G. S., President of the Society, occupied the chair. The lecturer, who was in good voice, closely held the attention of his audience for an hour and forty minutes.

The lecture opens with a slight historical sketch of the principal races in Europe of Indo-European origin, and goes on to de cribe the fine hypothesis connecting the Fines Burques and some remains of races still found in the west of Ireland with the old or aberi-ginal races of Europe. A slight sketch of the ginal races of Europe. A slight sketch of the early races of Briton is then given with particular reference to the Cymry or Welsh. An outline sketch is then given of the Roman conquest and domination, fallowed by some account of the origin of the Picts and Scots. After this the Saxons, Jules and Angles were introduced and their history is brought up to the invarion by the Danes. Then commences the argument to show that the Englishman is mainly a Briton, and that the Saxon instead a Briton, and that the Saxon instead of forming the main population of the sand and driving the Briton out, settled down amongst the conquered race and took a Brit-ish wife. That there are no reliable accounts or indeed accounts at all to show that the Saxone brought their women over in their open and densely crowded war vessels. A small chapter on the human skull is then read to show not only that the English skull is as a rule the Keltic skull, and not the German skull, but that the Saxons as far East as Kent a few generations after they landed are found possessed of skulls nearer to the Keltio then to the German type.

The latter part of the lecture is a short ac

count of the Norman conquest to show that William's army was not only mainly Kelt c but mainly British, and the summing up of the lecture is to the effect that the great foundation of our race as of our geological strata is Cambrian. The argument of Dr. Nicholas is briefly this : lst. That there is no write, that can be relied on, who describes the history of Britain between the departure of the Romans and

the conquests of the Saxons, and that modern writers have taken the history of the times from the Monk Gildus who was never in bec, some years ago, at a gathering of lite- Britain during these times, had no docu-

2nd. The Aberiginal Britons surpassed in number their Auglo-Saxon invaders.

3rd. The Britona did not suffer relatively a diminution in numbers. People say that the Aog'o Saxons must have

been as numerous as the Britons because they conquered them. We can only meet it by saying, the Normans, under William, must have been by parity of reasoning as numerous as the people of England, and the Northmen led by Rollo must have been as numerous as the people of Neustria—an hypothesis so absurd as to need no exposure. Wales, a very small country which now only contains a little more than a million of people, could not have be'd the great population of England which had only a short time before sent 60,000 warriors away in the Roman armies. Where did the great mass of the people go to. Some thousands of the young men died fighting, some thousands more perhaps crossed over to Brittany, some of the most resolute took the woods and carried on a guerilla warfare, white some thousands more joined their countrymen in literature, and it is agreeable to add that his method has a practical ring about it. | kaocked on the head by the Saxons, Is it likely?!!!! The older people may have His Honor is a good writer himself, and the ease and grace of his compositions tell us that had he adopted journalism and authorship instead of politics and law, the Eritish women became the mothers of the poet generation of Savens. If you want to ext generation of Saxons. If you w would have had a formidable pen engaged in its behalf, for Mr. Angers is nothing if not patriotic. However, like Waterloo or Paddington for Exter or mother eminent statesman, -Sir CHARLES Plymouth and then walk acros Davon, one of GAVAN DUFFY,—he may find authorship a see her nearly as pure bred as the Saxons did leasant recreation, before long. Some of the Saxons must have been in is at the end of their journey. His Honor offers through the Literary and Historical side of the German ocean. There is no Committee of the "Cercle Catholique" of proof whatever that the Sixons brought E. Tache, the Chairman, and the erudite of less, but the rank and file could not have afforded this luxury, and we may be sure that Gagnon, two handsome medals, one in there was room for little else then fighting silver and the other in bronze, for the best | men in the old Saxon war galleys. If you wil essay on Jacques Carrier, his life and go down to Murray Bay you will see the royages. The papers may be written in and although you will see and hear Highland Scotch names in every direction, you will look in vain for Sandy. On all sides you will one hundred pages of foolscap. They may thing down seems to have gone into partnership with Jenny Baptiste, and the result is, not the tall big boned Highlander, but the little dark habitant. The same thing, more or less, must have happened to the Saxons on their landing, although the upper class, sors of Woden probably kept their legitimate oif-

spring as pure as possible. My country in the heart of Wesser was considered a Welsh country in the reign of King Alfred, four hundred years after the landing of Hengist, and in the town of Malmesbury at the time of the great writer Wm. of Malmesbury, nearly two hundred years after the conquest, the majority of the people spoke the tongue of the Britons. The Turks bred from Tartar or Finnish stock have now become Indo-Europeans, at least the upper class, because the best looking wemen in the Slav market were Circassians. The Turks from horribly ugly Tartare have become with certainty a handsome race and you seldom see the low types except among the lower classes. Instance, Froude's Irelant. From reading a few pages on the subject of the skull in regard to race in the book by Dr. Nicholas, I have made a brief study on the subject and find it most interesting. How-

ever differing in details they all agree that the Indo European skull as seen from the top is oval or eliptical, and it has been divided into two forms, the long eval and the short oval. Now in carrie and chi burial places where the Britons are supposed to have been interred, the long oval greatly pre-John territory, which have proved very places of the Saxons and Scandinavians the short oval predominates. In Scandinavia and Germany of to-day the short oval is the principal type, while in Wales and the exploration of the country on the north Celto-English districts of Cumberland, Somerset, Devon and Cornwall the long aval is the prevalent feature. But Dr. Nicholas also says that throughout England generally the ong oval is the prevalent form. After quoting the principal English anthorities on the sub

oursion in Great Britain I was able to satisf myself anew that the long oval form is pre dominant in England, in Wales, in Scotland and in Ireland. Most of these long heads have bair black and are very similar to Ceits. In another place he (Retzius) calls the long oval skull of the Modern French and English the real Celtic and the shorter oval with pro valley, and to contain an area sufficient for tuberant sides which he observed the establishment of fifty new parishes. in the same countries Norman and nearly related to the German Normac, Mr. DuTREMBLAY also says that, in con- Dr. Nicholas says: "How have the descend-

I wish to add, that being at a friends house a few days ago, and carelessly turning over the leaves of an old journal, the Leisure Hour, of 1859, I came by accident upon an article on the bones in the crypt of the church at Hythe in the county of Kent. At this place a battle was fought between the Saxons or Britons, which ever you like to call them and the Danes. The latter had already suffered a defeat further inlend and were trying to embark when the native army came upon them and killed an immense quantity. In this crypt which contains overtonee thousand skeletons there are two types of heads, with a very the contains overtonee thousand skeletons there are two types of heads, with a very the contains of Mr. Heads and the programme, this scirce will be one of the most artistic ever organized by city amateurs.

FASHIONABLE WEDDING—Yesterday morning at 9 o'clock, St. Patrick's Church was the scene of a brilliant and interesting eremony, the occasion being the marriage of Mr. N. K. Connolly, of the well known contracting firm of Messre. Larkin, Connolly & Co., with Miss Bridget Carbray, sister-in-law of Mr. F. Carbray, of this city. The bride was attended by Mr. Felix Carbray, and the groom by his brother, Mr. M. Connolly. The sacred edities was beautifully decorated. Mr. Hebre, organist of St. John's church presided there are two types of heads, with a very strongly marked difference, the one short at the organ. the First Symptoms

Of all Lung Diseases are much the same Severishness, loss of appetite, sore throat, pains in the chest and back, neadache, etc. In a few days you may be well, or, on the other hand, you may be down with Pneumonia or "galloping Consumption." Run no risks, but begin immediately to take Ayer's Cherry Pectoral.

Several years ago, James Birchard, of Darien, Conn., was severely ill. The doctors said he was in Consumption, and that they could do nothing for him, but advised him, as a last resort, to try Aver's Cherry Pectoral. After taking this medicine two or three months, he was pronounced a well man, and has remained so to the present day.

J. S. Bradley, Malden, Mass., writes : "Three winters ago I took a severe cold, which rapidly developed into Bronchitis and Consumption. I was so weak that I could not sit up, was much emaciated, and coughed incessantly. I consulted several doctors, but they were powerless, and all agreed that I was in Consumption. At last, a friend brought me a bottle of Ayer's Cherry Pectoral. From the first dose, I found relief. Two bottles cured me, and my health has since been perfect."

Opening of the Ontario Legislature.

SPEECH OF THE LIEUTENANT. GOVERNOR.

(Per C. P. R. Line.) TORONTO, Ont., Jan. 25 .- The Ontario Legislature was opened to-day. The following is the Lieutenant-Governor's speech :-->

Gentlemen of the Legislative Assembly,-I have much pleasure in welcoming you t your annual duties as representative of the people for the first time since my appointment as Lieutenant-Governor. I should like ment as Lieutsdant-Governor. I should like to believe that my long experience in Canadian public life, may give me some special advantages for rendering in my new position useful service to the Province which has long been my home, and in whose progress and prosperity I take the deepest interest.

Since your last session, the Supreme Court of Canada has affirmed the judgments of the High Court and Court of Appeal in favour of the Provincial claim to the Crown Lands to

the Provincial claim to the Crown Lands to which the so-called Indian title had not been extinguished until after Confederation. The defendants have appealed from all these decisions to Her Majesty's Privy Council, and the appeal will probably be heard an decided during the present year. Meanwhile, in reliance on the decisions already obtained, patents have been issued by the Province to the claimants who have applied to my Gov-ernment for patents and have shewn their right to receive them, on like grounds and proofs as are recognized and acted on with respect to our other Provincial lands. There has been some correspondence with the Federal Government on the subject, which will be laid before you.

I am happy to inform you that the Federal
Government has recently intimated to me its

intention of concurring in the steps necessary for obtaining at the next session of the Imperial Parliament an action forming the western boundary of the Province. Agreeable to the order of Her Msjesty in Council made in August 1884, negotiations have commenced respecting our northern boundary also, so far as the same has not already been determined.

I regret that no substantial progress has been made towards the fulfilment of the long pending accounts and other questions between the Dominion and the Province. The cor-respondence on these subjects will be sub-

mitted to you. As respects the unsettled matters between Ontario and Quebec, in which the Dominion has no juterest, including the claim of this Province on behalf of municipalities to the land improvement fund, in respect of collections from Grown lands before Confederation, an agreement has teen arrived at between the two Provincial Governments for settling these matters by friendly arbitration, in case the proposa

thall receive your approval.

The resolutions respecting Provincial matters, adopted unanimously at the inter-Provincial Conference at Quebec, will be submitted for your consideration, and bills are in preparation for hurrying into effect such of the resolutions as require present logislation on the part of this Province.

I regret exceedingly that the Province has experienced a considerable amount of agricultural depression by reason of the great drouth of last year and its unprecedented dura-tion. On the other hand I am glad to say that there has been more than the usual acti-

vity in the settlement of our Crown lands and in mining enterprise, and that the revenue from Crown lands (exclusive of timber sales has been greater than for several years previous. The Legislature has always given special attention to the development of the agricultural resources of the Province and to the improvement of the condition of these who follow agricultural pursuits; to further promote these important subjects, Government departments from year to year,
I recommend for your consideration the appointment of a minister to whose special at-

With the view of com pleting the fusion of the Courts contemplated pieting the Ission of the Courts contemplated by judicaturs act, and of promoting uniform-ity, certainty and simplicity in legal pro-cedings, the consolidated orders have been adopted under the authority given to the Judges for this purpose by statute, but they recommend that their work as executed, should receive legislative confirmation, and to this recommendation I also invite attention. I regret that I have not had occasion to call just force by preclamation, the set of last all into force by proclamation, the act of last s saion providing for the confederation of the other universities with the Provincial Univerity, but I hope to have the pleasure of doing so before the close of the present year. Meanwhile an efficient medical faculty has been added to the Provincial University and is now in soccessful operation. Negotiations have taken place for the establishment of a faculty of law also, and I hope that the legal profession, in common with all the learned rofessions, will soon share in the advantages Plans of the new buildings have been prepar-

> I have the pleasure of in orming you that very gratifying progress has been made during the past season in the erection of new Departmental and Parliament buildings, and that equally satisfactory progress is confi-dently expected to be made during the pre-

The much needed additions have been nade to the accommodation for the insane and idiots by the opening at the Hamilton asylum of the north wing of the new building there, affording rooms for which appropriahe Legislature, and which will accommodate two hundred patients. The south wing of the new building at Hamilton, which has the same capacity as the north wing, will, it is confidently hoped, be completed and ready for occupation during the coming summer. It has for some time been evident that it would Hand Lamps (with Burner and Chimney) for be practicable to continue occupying for the use of the Teronto asylum, the large tract of land within the city, heretofore used for farm purposes in connection with that instution. The growth of the city, and the value of property within its limits, render it desirable to limit future occupation to as small an area as may be consistent with the positive necesities of the institution, and to dispose of the remainder for asylum purposes, I therefore recommend to your attention the expediency of making immediate provision for the erection of asylum cottages on the land of the Province at Mimico, with a view to the removal theret; of patients who may derive benefit from farm work, and by others whose emoval to the same locality may be expedi-

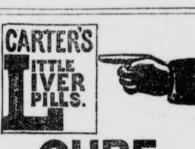

ent, the management to be in connection with the Toronto Asylum and by its officers. You will, I doubt not, concur with me in he opinion that the hours of daily labor for children and young girls in ordinary retail periods of the year as the in judgment of the municipal authorities the circumstance of the respective municipalities may make desirable. will be submitted for your consideration. Amongst the other measures intended to be laid before you are a bill respecting the franchise, a bill respecting friendly societies, a bill respecting alimony, and a bill for the separation of Parry Sound and Muskoka from the adjoining counties for certain purposes. In consequence of representations as to the necessity of important amendments in municipal laws affecting cities especially, but not exclusively, I issued a commission during the recess, to collect the experience of other coun-tries, states, and provinces, as well as of cur with the object of putting you in pos of materials which may to of service. In this department of Legislature I hope to receive in a few days the first report of the Commissioners. This report, when received, and all departmental and other usual reports will be laid before you for your information. Estimates for the current year will, at an early date, be submitted for your approval. They will be found to have been prepared with all the economy consistent with the effiiency of public service. I am glad to feel assured that your legis-

lative labors during the present session, will be characterized by the same carnest care and thoughtful attention, which have heretefore marked the work of the Legislative Assembly

TRADE WITH THE ARGENTINE REPUBLIC.

INTERVIEW WITH THE QUEBEC BOARD OF TRADE.

Mr. Simeon Jones, the Commissioner appointed by the Dominion Government to proeesd to the Argentine Republic with a view to the establishment of trade relations between Canada and South America had an nterview yesterday afternoon with the memers of the Quebec Board of Trade, at the Board Buildings in Lower Town. The President of the Board, T. LeDroit, Esq., occupied the chair, and there were also presnt, Messre, H. M. Price, Owen Murphy, M.P.P. In the construction of the above problem the author was limited to the use of K. Q. F. Billingsley, Gourdeau, J. B. Forsyth Verret, E. H. Duval, Andrews, Hon. G. Bresse, Woodley, Mayor Langelier, J. W.

The members of the Canadian Chess Henry and many others. Association are particularly requested to attend a meeting of this association which takes place this evening, at 8 p.m. sharp, at Mr. LeDroit introduced Mr. Jones in appriate terms. Mr. Jones, who was received with loud ap-plause, thanked the President of the Board the rooms of the Quebec Chess Club, for the election of officers for the ensuing year, the choosing of the next place of meeting and

or the kindness he had showed him in introfor the kindness he had showed him in intro-ducing him to the merchants of Quebec and for the opportunity afforded him of meeting so many of them under the auspices of the Quebec Board of Trade. He would first state why the Government had sent a commissioner to the Argentine Republic. The merchants of Toronto had petitioned the Government for better postal facilities with South America, expressing the confidence that a lucrative trade might be arranged with the Argentine Republic. There once had also been a petition addressed to the Government from the tion addressed to the Government from the Maritime Provinces to the same effect, and he thought one trade-promoting company of St. John had asked the Government to have a commissioner appointed to take charge of samples of goods manufactured in Canada. The Government had said "no, we will not take charge of any manufactured goods, but we will appoint a commissioner to go there and endeavor to cultivate trade, and to obtain information desired by Canadian manufacturars and producers. He said that the Argentine Republic had a population nearly equal to the business that may possibly come to it as a result of recent railway extensions and completions? Surely, if the rich men at the commercial capital of the country are satisfied that business is to flow in upon them they will make the necessary preparations. But we see with surprise that they are turning to Ottawa for help. No doubt this is the fashion of the time, and yet it is all very strange. The Government's chief function appears to be to raise money in one place to expend in another. Millions are raised by taxation out of the working man everywhere, and expended in the interests of a few pertine Republic had a population nearly equal to that of Canads. Its principal productions seemed to be cattle, wood, hides and tallow, but as he had not yet visited the country, he thought Mr. Maguire, who was present at the meeting, and who represented the Republic in Canada as Consul-General, could give more information than anybody else respecting it. He disclaimed having any personal interest in any vessels or steamers trading to South America, but had contemplated a pleasure trip to the Argentine Republic when he was requested to undertake the mission. He was not in a position to say if the Govern-That a problem composer should have been unwittingly the cause of this slight misunder-standing, is to be regretted, but this is of fre-

We had the pleasure of a visit, last week, from Mr. J. W. Of the imports there was \$595,000 worth of cheese, principally from England, and he thought Canada could take nost of this business, \$141 000 worth of dry and preserved vegetables, \$340,000 worth of preserved fruit, \$3,324,000 of refined sugar, \$19,000 000 worth of woollen goods and \$9. 500 000 worth of wooden ware. Leather and tanned goods amounted to \$1,515,000 and paper to \$2.139 000, and wire fencing to \$11,-

(To the Editor of the Morning Chronicle.) SIR, -A large portion of our city is built on very high rock, and we have no low or marshy lands, not only within the city limits, but even at a distance of many miles. Call, is also a musician of ability, and we have read some of his very interesting articles on music, which have appeared from time to time in the columns of the paper of which he Charles, having a large volume of water and a swift current, both of which are available for the discharge of our sewers.

So much for what nature has made for us Now, we have the largest supply of water of any city of its size in America, and that water is unsurpassed for its purity and its other qualities as drinking water. We have a more complete system of tubular drainage than any other city of Canada. Water and drainage have now been introduced into every street or lane of the city, however poor

We might then naturally suppose that Que bec is a very healthy place. Such also is the opinion of all our citizens and of the strangers who know anything of our city. I was, therefore, very much surprised when a gen tleman handed me a copy of the Star con taining a correspondence of Dr. Laroque which, if it is correct, would prove that Mon treal is far above Quebec in the matter of health. As Montreal, rightly or wrongly, does not enjoy the reputation of being a very healthy place, I must say that I was startled

at Dr. Lareque's statements.
But a few minutes examination of his so called statistics have been sufficient to con-viace me that, as far as Quebec is concerned According to the tabular statements contained in his correspondence, Dr. Lareque puts the death rates of Quebec and Montreal s follows per 1000 souls.

five years-Quebec, 20.28; Montreal, 16.93. Above five years-Quebec, 13.29; Montreal, 11.06. According to that statement our death rate would be very much higher than that of Mon-

But, unfortunately for Dr. Laroque's contention, he starts from a wrong basis: he takes the population of Quebec in 1881, whereas for Montreal he takes an assumed population for 1886. By the census of 1881 Montreal's population is 140,000 and Quebec's 63 000. Dr. Larcque assumed the population of Montreal to be now 186,000, and leaves that of Quebec at the figure of the ceasus of 1881. Where is his authority for giving to Mon-treal a population of 186,000, I cannot say, but every one must see at once how unreliab his comparison between the two cities is. He should either have taken the census of 1881 as a basis of his calculations for both, or, if he had some reliable means of ascertaining their present population, he should have applied it to Quebec as well as to Montreal.

As they are, his calculations and comparisons are entirely worthless and misleading, and I assert that our death rate is very much lower than that of Montreal.

Endorsed by the Church. Cardinal Taschereau Expresses his Ap

proval of the "Canada-Français." It will be remembered that it was recently decided by a committee composed of dis-tinguished professors of Laval University, re presenting both the Quebec and Montreal branches, to issue a periodical to be known as the Canada-Français, which would be de

as the Canada-Francais, which would be devoted to theological, philosophical, historical, literary, scientific, social and religious questions. Some interesting correspondence that passed between Rev. Mr. Hamel, the principal director of the review, and His Eminence Cardinal Taschereau is now published for the first time. Rev. Mr. Hamel, in a letter to His Eminence, informing him of the proposed publication of the him of the proposed publication of the new periodical, states that the review will be conducted in strict conformity with the doctrines of the Church, and that nothing will be published until after careful revision by a special committee. The letter, in con-clusion, asks for the new review the blessing and support of His Emicence. Cardinal Taschereau, in reply, expresses the great satisfaction he feels in seeing that such a review is about to be issued. His Eminence adds:
"Your review I havefull confidence will tend to give a more elevated, calm and serene direction to the current ideas in our Canadian society; it will tend to elevate the standard of public opinion; it will glorify the country and the church; it will furnish a response to the most ardent wishes of the supreme head of Catholicity by investigating with more care in Canada the vast domain of the good, the true and the beautiful, both in natural and supernatural affairs; in short, it will fulfil, if not absolutely—for the Canada Francais will not be an official publication of Laval University—at least virtually a desire often ex-pressed at Rome that Laval University should have a review to complete its work." His Emmence also endorses the principles of the review and says its programme will undonbtedly be favorably received by all Catholics at Rome as well as Canada. In conclusion His Eminence prays that Heaven may bless the enterprise, that it may grow and presper more and more for the greater glory of God, the honor of the church and the good of the

Matter.

In L'Etendard of to-day in an article signed by Hen F. X. A. Trudel, which states that on good Liberal authority the Conservative press, in general, are agreed that Hon. Mr. Mercier has gone to France for the purpose of enrolling the Province of Quebec amongst the apologists and justifiers of the French revolution. The most elementary justice would seem to demand that suck charges should not be made against a man who is absent. If he cannot clear himself when he returns, it will be time for all true French Canadian Cathollios to demand from him a severe account for the disgraceful proceeding attributed to him by the Liberal Rouge organs. In the meanwhile one must suppose him to have enough sense, if not principle, not foolishly and criminally to jeopardize his dignity as a French Canadian Cathollos to demand and an Cathollos by becoming a mere apologist of Gambetta and Ferry.
