PARIS, Nov. 29—President Carnot held a conference with M. Loubet to-day. He has summoned M. Flouquet, President of the Chamber of Deputies, and Senator Leroyer to consult with him on the situation. It is reported that if M. Brisson declines to form and in favor of an equitable tax on all the people. A committee was appointed to en-gage counsel and raise a fund to have a test reported that if M. Brisson declines to form a Ministry, President Carnot will ask M. Tirard or M. Bourgeois, former Ministers, to undertake the task. It is certain that M. De Freycinet, M. Ribot and some other members of the Loubet Ministry will be in the new Cabinet. Later in the day President Carnot summoned M. Brisson and asked him to form a Ministry, retaining in the Cabinet M. Ribot and M. De Freycinet. M. Brisson promised to communicate his decision to President Carnot to-morrow, after conferring with his friends.

with his friends. The Figaro publishes an interview with M. Monchicourt, on the subject of the Lauterbach interview. M. Monchicourt says that the tenor of Lauterbach's statements, which imply that the Panama Railway will be prejudicial to interoceanic traffic on the Isthmus, is absurd. The rumor was probably due to the failure of the railway and the Pacific Mail Company to agree to a renewal of a contract. The Panama Railway will do all that is possible for the Pacific Mail under the conditions sible for the Pacific Mail under the conditions best for American and European commerce. At yesterday's sitting of the Academie des Sciences, Prof. Jansen, the astronomer, presented a model of the observatory which is to be erected on the top of Mount Blanc, at an altitude of 4,800 metres. The building was erected at Mendon last year, then taken to pieces and the rat-rial carried up by guides. One half is now at the Grand Mulets, at an altitude of 3,000 metres. The other half has been carried to an altitude of 4,500 metres and deposited at the foot of the rock which forms the summit. Prof. Jansen spoke in the highest terms of M. Eiffel, who spoke in the highest terms of M. Eiffel, who has been one of the largest donors to the fund for that purpose. He caused a sensation by praying that while so much Panama mud was being thrown, none of it would penetrate to the Academy. Experiments have proven that frozen snow, such as is found at the top of the mountain, is excellent building ground. Forters have already carried up more than 1,300 loads. The price of porterage is three 1,300 loads. The price of porterage is three francs per kilogramme. In consequence of this high tariff, Prof. James estimates that it was cheaper to make the cupola of aluminum than of steel as originally intended. When open the observatory will be accessible to the scientiats of every nation.

pointed at the Monetary Conference yester-day to consider the proposals of Mr. De Rothschild and Prof. Soelber, five members Rothschild and Prof. Soelber, five members are avowed bi-metallists, six are monometallists and one is doubtful. The Committee will sit twice each day. It is generally expected that Mr. De Rothschild's proposals will be accepted and then referred to the Conference with modifications suggested by the schemes of M. Levi and Prof. Soelber. One of the modifications will undoubtedly be that all gold coins below the value of 20 francs be withdrawn from circulation and he rethat all gold coins below the value of 20 francs be withdrawn from circulation and be re-placed by silver notes. The adhesion of the German delegates is now considered certain, the French representatives will also accept the plan of Prof. Soelber, with the prospect of an early agreement being attain-ed. Nobody talks of the failure of the Conerence. So rapidly has the optimistic feeling grown, that it is reported the Conference is ikely to conclude its labors next week. The likely to conclude its labors next week. The American delegates have strong reasons to be satisfied with the recognition of the advocates of mono-metallism, and the seriousness of the dangers arising from a further fall in silver. They are disposed to support Mr. De Rothschild's proposals. The American delegates believe that the continuous absorption of 30,000,000 ounces of silver by the European powers, would bring about artificially a con-

Alderman Thomson presided and many pro-minent citizens were in attendance, the Academy of Music, in which the meeting was held, being crowded. A number of strong speeches were made denouncing the Government's policy. Mayer McShane, who was present, said that Montreal would not stand being the milch cow of the Province any longer, a sentiment that was loudly applauded. Resolutions were passed calling upon the Government to pursue a policy of greater economy by abolishing the Legislative Council and cutting down the members' salaries, and in force of a council and cutting down the members' could be

THE TALK OF THE DAY.

From every part of Canada, Sir John THOMPSON'S accession to the Premiership, appears to give general satisfaction. The press views his promotion to first place in the Government, with high approval. We look in vain for hostile expressions. The people seem to have made up their minds that Sir John Thompson had no superior in Parliament, and that on him, and on him alone, should fall the mantle of power. Six years ago, he entered the House of Commons, an unknown man, so far as the representatives of the older Provinces are concerned. In his young days he was a concerned. In his young days he was a Liberal of the Howe and Archibald school. He was opposed to Confederation, and followed his old chief to the brink of the cliff, when he uttered the memorable words, "what then." When Howe changed his mind, and became Sir John Macdonald's Secretary of State, Mr.

Thompson became an ardent Control of the Club, Mr. Lamb, who took the utmost pains to present to his guests a most acceptance. servative. In his young days, and to be found in the market, as our readers

in his old days, he is the leader of the English Liberals. In his young days our Premier was a Liberal. In his old days,but they are not so very old, he is the eader of the Canadian Conservatives. Sir JOHN THOMPSON entered Parliament much against his will, for he was a Judge, in Nova Scotia, when the artful chieftain teased him to come down from the Bench. and take the portfolio of Justice in his Government. The moment that Sir John took his seat in the Commons, his fellow members saw in him their future chief. He made no effort to rule, but somehow or other, men instinctively turned to him for advice and counsel. He thought quickly and to the purpose always. He was dignified, and yet not unbending. He preferred to debate questions on a lofty plane, but when he had to emoloy phrases of a severe character in his speech, those phrases came, and fearful execution they accomplished, as witness his terrific onslaught on Sir RICHARD CARTWRIGHT, during the last ession of Parliament. Sir John Thompson takes matters cooly, He is never man. Beneath a calm exterior, a hot fire often burns. The papers are telling the 4 "Reminiscences of Scotland".....Godfrey Premier what he must do. He is advised even as to the composition of his Cabinet.

6 Valse—"Toujours ou Jamais"...Waldteufel. To these suggestions, which are all sixes and sevens, he will return a deaf ear. He

has telegraphed to his paper the following memoranda, which will be found enter-

On the following things let readers of the World assure themselves as facts: First. That Sir John Thompson has taken up the Premiership with a firm de-termination to discharge its duties, and with no intention of abandoning a political career or using politics as a step to the Chief Justiceship. He is into the game for all it is worth.

Next, he takes the Premiership unpledged, privately or publicly, in any way on the Manitoba school question. He is free in that respect.

Thirdly. Mr. Meredith is not to be of

Fourthly. That the minor Ministerial positions of Solicitor-General and Comptroller of Customs and Comptroller of Inland Revenue, and the Cabinet and Minis-

couraging home manufactures, of keeping our own work for our own people and of making Canada self-reliant.

Part of this policy involves a vigorous plan for the settlement of our country. On these two paramount questions, then, of our international relations, and of the development of our country, Sir John will take a strong Canadian and national stand. And now to come to a secondary matter,

but one which occupies a great deal of at-tention, "The Manitoba School Question." As was said above, Sir John approaches this question entirely unpledged. It is not a question that is likely to get into politics for some time to come, but, on the cou-trary, it will immediately get into the courts and have its settlement there. Manitoba, and the sympathizers of Manitoba in Ontario, need have no fears of that uestion. For the present separate schools for Manitoba are impossible, and Roman Catholics must accept it as such. This taken by Mr. D. J. Kennedy against Mr. B. really relieves Sir John Thompson and his really of a translation for \$25,000 damages has been taken by Mr. D. J. Kennedy against Mr. B. T. A. Bell, of the Mining Review, of Ottawa, party of a troublesome question and gives him a free hand.

The Liberals, and especially Mr. Laurier, will be forced by the facts to agree with this line of action. He cannot blame the Roman Catholics for claiming the right of intervention, if the Government possess it, and he cannot blame the Government for remitting the question to the Supreme Court for a determination whether the Government under the laws and constitution have the right.

Even Mr. McCarthy will have to suppor this action, or, at the most, all he can say is that the Government should throw up the petition of the Catholics for interven-tion, but it might not be good law if he said so. "Cabinet reconstruction." All this is as to Sir John Thompson's policy. As to the details of this Cabinet, little can be said other than that Sir John is to be Premier. Mr. Foster, Minister of Trade and Commerce, John Haggart, Minister of Railways and Canals, Mr. Quimet of Public Works, Mr. Tupper of Fisheries, and Mr. Daly of the Interior. For the others there may be a shifting around, the retirement of some present Minister and the introduction of the new blood. Clark Wallace, of West York, is likely

to come in as some of the new blood. Governor Angers will likely come in as leader of the Senate, with a portfolio, but he will not come in by the Commons, One of the present French Ministers will go to Spencer Wood. Mr. Ives will be the new English Minister from Quebec in Sir John Abbott's place. Costigan will likely remain in the Cabinet. But the exact composition of the Cabinet, other than these named will not be known for than these named, will not be known for

some days yet. A Dinner at the Garrison Club. Last evening, the first monthly dinner, under the new management, took place at the Garrison Club. Mr. W. F. McLean, editor of the Toronto World, is a member of the House of Commons, sitting for East York, Hon.

Alexander MacKenzie's old constituency. He had an interview with Sir John Thompson the other day, in Ottawa, and has talegraphed to his name the following.

God Save the Queen.

There were several speeches during the evening, including a graceful sentiment in behalf of the Queen, which was most enthusiastically received by the company. Mr. Story sang two songs with great acceptance, and Mr. Joseph Peters and Mr. Hussey also sang capital songs with choruses. Col. Duchesnay gave the "Brigadier" with a verye and spirit which captivated everybody. The dinner then broke up, and all present voted it one of the most delightful entertainments that has ever been held in Quebec.

Political Rumors.

Yesterday the report was current in town that His Honor Lieut. Governor Angers was about to be called to the Senate, and given a portfolio in the new Cabinet, and the rumor portfolio in the new Cabinet, and the rumor caused considerable satisfaction as bearing out the Chronicle's statement yesterday that the district of Quebec would gain influence by the pending changes at Ottawa. It was also reported that the Hon. Dr. Ross, President of the Senate, who was here yesterday, would succeed Mr. Angers as Lieut.-Governor, but Dr. Ross denies the truth of this.

An Interesting Point Decided. An interesting judgment was rendered by the Court of Appeal, on Saturday in the case of Campbell vs. Riendeau. The appellant had given acheque to a third party, on condi-tion that it should be applied towards the payment of a note. The cheque was trans-ferred to respondent, however, but, on preferred to respondent, however, but on pre-senting it at the bank he found that pay-ment was stopped. The question to decide was who should suffer the loss of the amount of the cheque. Both the Superior Court and the Court of Appeal held that the respondent who accepted the cheque in good faith could not be made to suffer the loss.

Better Late Than Never.

THE "CHRONICLE" SAID THE SAME THING
MORE THAN A WEEK AGO.

Official notification, though sure, is sometimes a little slow; and often anticipated by the newspapers. On Monday, the 21st institute Chronicle saluted the Crescent Football Team of the Province of Quebec, and they have ever since been so recognized, and were so entertained and complimented at Saturday night's banquet. But time was, of course, required before the Quebec Rugby Union of Montreal could meet and officially declare the fact, and yesterday the following letter was received here from the secretary of the Union, Mr. E. W. MacDougall:—

Montreal, November 28th, 1892. Montreal, November 28th, 1892.

E. J. C. CHAMBERS, Esq.,

Hon. Secretary C. A. A. A. DEAR SIR,—I beg to officially notify you that the Crescent Football Club, of Quebec, have been declared winners of the Intermediate Championship of 1892.

Yours truly,

E. W. MacDougall,

doubt at once required and if the business of the concern kept on increasing in the future as it had done in the past, it was only a question of comparatively short time when the whole amount would be essential. The proposal was then fully and thoroughly discussed by all the stockholders present; the financial statement of the Company was submitted and carefully analysed; the steady growth and expansion of the works from the very inception of the Company was commented upon, and finally the resolution proposing the increase was carried without one dissentient voice or vote. Hon. Secretary Q. R. U.

THE PROTESTANTS NEED NOT FEAR. In the course of an article praising the high nerits of Sir John Thompson, the Minerest refers to his religious faith, and says:—"The time has passed when the title of Catholic should prevent a British subject who has reached the first rank from loyally serving Her Majesty the Queen. Otherwise it would be as well to strike out the Act of Emancipation of the Catholic strike out the Act of Emancipations of the Catholic strike tion of the Catholics. If, in practice, the title of Catholic is a disqualification, it would be well to know it. Meanwhile, many men will be found with broad and generous views, who will repeat with the English poet:—

Shall I ask the brave soldier who fights by my side
In the cause of mankind, if our friends Shall I give up the friend I have valued and

If he kneels not before the same altar with

The Prime Minister has always been a The Frime Minister has always ocen a Protestant since 1867, and the Catholica, Conservative or Liberal, have supported them as faithfully as if they had belonged to their own religion. When did Sir John Macdonald lose a Catholic vote because his rival, Mr. Laurier, was a Catholic and a Frenchman? Laurier, was a Catholic and a Frenchman? We might say as much of Sir John Abbott. And in this Catholic Province of Quebec, have we ever denounced the old Prime Minister, Mr. Joly, because he was a Huguenot? Anyhow, what can the Protestants fear? Should Sir John Thompson wish to treat them unjustly—which no one has the right to suppose—he could not do so. He can govern only by rendering justice to all, by taking into account the rights, privileges and interests of the various groups of population. The Protestants have a majority everywhere, among the electors, in Parliament, in the Senate, in the Civil Service, on the Bench. The majority of the members of the Privy Council have always been and are still Protestants. They can at any moment hinder the action of the head of the Executive. Once more we repeat, what can they tive. Once more we repeat, what can they fear? The minority are rather those who

The managers are called greedy. I asked one of the ablest managers if there was any reasonable explanation for their action. In reply he took a book in which were tabulated statements of the business of most of the trunk lines of this country. He turned to one of the greater roads, selecting it by way of chance, for he said the story was the same with all of them. This one happened to be a Western trunk line which did a large business at the time of the Philadelphia Centennial. In 1875 the passenger earnings of this road were \$2,024,000. In 1876, Centennial year, the carnings were \$2,215,000. In 1877 the earnings were \$1,779,498.

one of the exceptions. He saw that there was a legitimate scope for the business and he set to work determinedly to make it a success. Bucked by an intelligent board of directors he has built up the manufactory to unexpectedly large dimensions, while the concern is, comparatively speaking, still in its infantile stages.

A new large kiln and an extension to the factory covering 40 x 210 feet are to be put up forthwith, while next spring a much more comprehensive enlargement will be effected. At present the Standard Drain Pipe Company give employment to over 100 artisans and laborers. There are no children about the establishment.—St. John's, P.Q., News. COAL HODS, VASES -AND-

"Away! Away! There is danger here!
A terrible phantom is bending near;
With no human look, with no human breath,
He stands beside thee, the haunter, Death!"
If there is one disease more than another that
comes like the unbidden guest at a banquet, it
is Catarrh. Insidiously it steals upon you,
"with no human breath" it gradually, like the
octopus, winds its coils about you and crushes
you. But there is a medicine, called Dr. Sage's
Catarrh Remedy, that can tear you away from
the monster, and turn the scythes' point of the
reaper. The makers of this wonderful remedy
offer, in good faith, a standing reward of \$500
for an incurable case of Catarrh in the Head. Go to "Au Bon Ton" for the cheapest, newest and prettiest Dress Goods. Blagdon & Paradis.

A Narrow Escape—London, Nov 29—The passengers by the "Trave," who were landed at Southampton on Friday, report that the ship had a narrow escape from being dashed on the rocks on Thursday. They had passed the Lizard, and were proceeding through a thick fog under reduced speed, which caused the strong currents to carry the ship out of her course. Shortly after five o'clock the passengers were startled by the sudden stoppage of the engines, and on reaching the deck they saw the great rock known as the "Start Point" looming up before them, scarcely a hundred yards away. Manyof the passengers, especially the women, became hysterical, and a panic would have ensued but for the admirable behavior of the officers and crew, who soon succeeded in restoring confidence. The prompt response of the engines to the call to reverse was the only thing that saved the ship going on the rocks. The passengers express themselves as highly gratified with the good discipline displayed by those responsible for the ship's safety. The representative of the Associated Press has interviewed one of the passengers of the "Trave" who landed at Southampton. He confirmed the report that the steamer had a narrow escape from being wrecked. He said that a number of passengers were sitting in the smoking-room at five o'clock, when they all heard the bells ring for the engineer on watch to reverse the engine. This was quickly done. All the men in the smoking-room rushed out on deck in a state of semi-panic, not knowing what was about to happen. The shore could be seen through the heavy mist, not 50 feet distant from the steamer. The officers acted in a very efficient manner and quickly restored confidence among the passengers who had taken alarm at the close proximity of danger. The excitement lasted for only a few minutes. The steamer's officers admitted that the vessel was out of her course, and that she was going northesst instead of east.

FERRY SERVICE—Owing to a flaw

FERRY SERVICE—Owing to a flaw having been discovered in the crank shaft of the steamer "Polaris," this vessel was taken off the service yesterday morning to have a new shaft fitted by Carrier, Laine & co. Her place has been supplied by the first-class passenger steamer "Orleans," the property of the Messrs Beaulieu, of Levis.

GEO T HAY—Tug "McNaughton" arrived in port yesterday, and reports leaving the ship "Geo T Hay" off Bic, all well. RETURNED—The last steamship having passed down, for the season, the Government steamers "Alert" and "La Canadisone," which have been acting as lightships for some time past, returned to port yesterday, to go into winter

WRECKED-New York, Nov 29-The steam-ship "Alert," of the New Colombia Commer-cial Steamship Company, has been wrecked at cial Steamship Company, has been wrecked at the mouth of the Magdalena River, in the United States of Colombia. The vessel is in a bad position. The passengers and crew escaped to the shore. She left this port on October 30, with a heavy cargo of merchandise for Santa Maria and Cartagena. She had made her ports, discharged her cargo and picked up a large return cargo from various cities.

The Religious Communities, The Semaine Religieuse publishes another article on religious communities. After re-ferring to the new building of the Little Sis-ters of the Poor and the good work done by the Sisters, it asks if it would be fair and just to impose taxes upon them, and then

ontinues :- "However, the watch-word seems to be now given; the watch-word seems to be now given; equality, equality, they say, no privileges; taxes for all individuals, all congregations, all property. Good heavens! if things come to this, we cannot see what society will gain thereby; the communities will be under the law; their work will suffer the same the same transfer of the same transf thereby, the city will not be much richer, business will not be more prosperous, and more especially the people will not be hap-

In reply to the charge made that some of those institutions are too large, the writer says that as they are they car says that as they are they cannot meet the demands made upon them, and he adds;—
"As large as they are, are these houses a source of revenue for the heroic women who live therein? The contrary is well known, and it is known also that their maintenance costs large sums of money. Do the Sisters dream of riches and pleasure? We must do this justice to those who criticise them, that they never made this odious charge against them. No, they have freely chosen poverty and they wish to remain poor always, those and they wish to remain poor always, those servants of God, who could have had fortune servants of God, who could have had fortune and pleasure in the world Their dowry, if they get one from their family, the money which they beg, the grants given them by the Government, modest grants, asis known, the proceeds of their bazaars and charity dinners, everything goes to benevolent works, everything goes to the poor. The poor are very often better treated than themselves and don't suspect it, and when the proceeds of the collections is insufficient, when the resources are wanting, they set their wits to work, hy working, by sewing, by making their inmates work to help in creating the necessary income, and nevertheless it is sought to make it almost a crime for them to do so. This is not fair, and no account is taken of the difficulties encountered by our nuns in the accomplishment of their noble and benevolent mission. Surely, for no reason whatever would we authorize or defend injustice, and we would be the first to deplore any act hindering the progress of national any act hindering the progress of natio industry; but when we loyally, and with insulting any one, put down a thesis which seems to us to be founded on justice and truth, we have the right to ask for some other reply than the epithet of 'cynical' applied to our arguments."

For months past the Mercier organs in Montreal and Quebec, and their Grit allies in he west have been writing as if the De Boucherville Government was tottering to its fall, and that dissension was the order of the fail, and that dissension was the order of the day throughout the rank and file. The members of the Administration, with the veteran Premier at their head, have been sitting in Montreal almost a week, and, knowing that they had met and interviewed every member from the Montreal district, where the disaffection was supposed to be located, an Empire from the Montreal district, where the disaf-fection was supposed to be located, an Empire correspondent called upon a very prominent member of the Government recently and plainly asked the honorable gentleman if there was any truth in the reports above re-ferred. "None in the least," was the ready reply of the Minister. "We have seen all of our supporters in this part of the province our supporters in this part of the province and the feeling between the deputation and the Government is one of mutual confidence and respect. It is true that this district has perhaps not received the personal attention that its importance demanded at the hands of the Ministers so pressing have our general duties been since the formation of the Government, but we find each and account. ernment, but we find each and every one ready to make sacrifices when the occasion requires," and the correspondent was given to understand that the Ministers were thoroughly extissed with the understand that the Ministers were thoroughly satisfied with the state of affairs here, both political and otherwise, and it is likely that Cabinet councils at the commercial capital will be more frequent than in the past. The correspondenct also interviewed a number of people who expressed no little satisfaction at Premier De Boucherville's statement as published in the CHRONICLE recently, and had no doubt that the wrongs contained in the Government tax bill would be righted in the near future.

St. Nicholas for Young Folks. JORN G. WHITTIER long ago wrote of St. Nicholas, "It is little to say of this magazine that it is the best children's periodical in the N ACCORDANCE WITH A RESOLU-tion of the Directors passed this day, that it is the best children's periodical in the world." Edward Eggleston, the author of "The Hoosier Schoolmaster," says of it, "There is not one of the numbers that does not stir the not one of the numbers that does not stir the curiosity, inform the memory, stimulate thought, and enlarge the range of the imagination." Founded in 1873, and from the first number edited by Mary Mapes Dodge, St. Nicholas is now entering upon its twentieth year. The most famous writers have contributed to its pages in the past, but never has its editor been able to offer a better program or a more distinguished list of contributors than for 1893.

There is to be a superior or still the curious contributors than the curious curious contributors than the curious curious curious curious curious contributors than the curious curio

for 1893.

There is to be a series of illustrated papers on "The Leading Cities of the United States,"—the story of each city told by a prominent resident. Edmund Clarence Stedman will write of New York; Thomas W. Higginson, of Boston; New Orleans will be described by George W. Cable, and Baltimore by President Gilman, of the Johns Hopkins University. Dr. Lyman Abbott will tell the story of Brooklyn, and other cities will be treated by other famous men. There will be articles on the World's Fair, and a number of pages of funny pictures and humorous yerses.

a number of pages of funny pictures and humorous verses.

Mrs. Kate Douglas Wiggin, the well-known author of "The Birds' Christmas Carol," etc., will contribute the leading serial for St. Nicholas during the coming year. The November number opens with a three-page peem by John G. Whittier, which has in it some of the most beautiful lines the good Quaker poet has ever written, describing the visit of a party of young girls to his home.

The School Journal says, "Place St. Nicholas in your household, and you need have no fears for the lessons taught your children." The magazine is the greatest aid that the teacher and the concientious parent can possibly have. It entertains, and at the same time educates and instructs. The subscription price is \$3 a year. Remittances may be made directly to the publishers, The Century Co., 33 East 17th Street, New York.

HERR LASKER.

This eminent young chess player, who may be justly considered one of the wonders of the chess world, arrived in this city on last Saturday morning, and was the guest of the Quebec Chess Club. He is an unassuming young gentleman of dark complexion, low sized, with dark hazel eyes and wearing eye-glasses set in gold.

DUNCAN ANDERSON, M.A.

Note.—As sheep-stealers in Scotland were, at a comparatively recent date, executed for this crime, the poet has scarcely availed himself of a poetical licence, when he suggests a kiss of the Maiden (the finisher of political treason in Scotland) as a suitable reward to everyone who differs in opinion or taste from himself with regard to sheep's head and trotters. Were his shibboleth rigidly applied under this roof-tree, it might be at least doubted whether many of the staff of the Morning Chronicle would survive the ordeal of St. Andrew's Day.—Ed. M. C. His first meeting with the members of our

His first meeting with the members of our local Club took piace on Saturday morning, when he played simultaneously against five of Quebec's strongest experts, namely, Messrs. C. P. Champion, E. Pope, N. Macleod, W. Chalk, all of whom suffered defeat at the hands of the young master.

The afternoon meeting was more exciting, each warrior contemplating whether he would be fortunate enough to win his game, or whether the young champion would defeat all comers. The hall was crowded with spectators, and quite a number of ladies were present and lent enchantment to the interesting seance. Shortly after 3 p.m., everything being ready and the players, who numbered sixteen, in their places, Herr Lasker entered the square formed by the tables and commenced his laborious task.

The players were: Madame E. Joly de Lotbiniere, to whose table he first went, and with a slight bow made the first move, and Messrs. C. P. Champion, G. E. Dorion, L. Brunet, E. Pope, N. Macleod, A. Robertson, W. Chalk, L. F. Burroughs, A. J. Maxham, J. E. Walsh, E. Welch, H. S. Thomson, R. McLimont, Jas. Ferrie and G. E. A. Jones, As the games proceeded the spectators became more interested, and scanned each board attentively. After some twenty moves had been made by the lady player, the young Master, seeing the game about even, proposed a draw, which Madame Joly de Lotbiniere accepted. This made the second game finished. One by one the other warriors succumbed, until but two boards remained, those at which sat Messrs. Macleod and Chalk. After a stubborn end-game, the former won, and the latter drew his game; both were greeted. a stubborn end-game, the for the latter drew his game; both were greeted with applause. The score then stood: Herr Lasker 13 won, loosing to Mr. N. Macleod, and drawing with Madame Joly de Lotbiniere and Mr. W. Chalk. The 16 games were play. ed within three hours, due to the rapidity with which the Master made his moves at

After recess, about 8 p. m., Mr. F. H. An-After recess, about 8 p. m., Mr. F. H. Andrews engaged him over the board, but, after a stubborn battle, had to lower his flag. This was the only game played, as Herr Lasker had to leave by the 10.30 train to reach Baltimore on Monday evening, where he had an engagement with the Baltimore Chess Club. Ou the conclusion of his game with Mr. Andrews, he passed some time in conversation with those present, and was afterwards escotted to the C. P. R. depot by the President and other members of the Quebec Chess Club, who wished him un bon voyage.

Quite a numerous audience, including many of the fair sex, attended the evening performance.

We give the score of the game won by Mr.

Sr. Andrew's Day.—Let our readers not forget the fancy sale in Morrin College to-day, there will be a refreshment table laden with all sorts of good things and at five o'clock tea will be served. The "Scotch Supper" takes place in the Convocation Hall, and we can safely say all Sootchmen and their friends will be present in honor of St. Andrew's day, at the hour appointed. GAMS No. 641. BLACK. N. Macleod. Herr Lasker.

No BETTER.—Cyrille Perusse, the stone-cutter, injured by falling from the third story of the new hotel last week, is still in the same condition. Dr. Catellier believes that the poor fellow's neck is seriously in-jured and his body paralyzed from the upper part of the chest down and he is still deli-rious. His death is only a question of time. The only pain he suffers is in the head.

The object is one well worthy of support and we hope to see the hall filled on the occasion:

ST. PETER'S CHURCH FANOY SALE. - As an nounced in another column, this sale will be held on Friday, in the St. Matthew's Parish Room, D'Aiguillon street, when a number of useful articles and goods suitable for the holidays will be offered for sale. Donations both for the sale and for the refreshment table may be sent on Friday morning to the Room, in charge of any of the ladies of the Guild,

and will be thankfully received. A TARDY LETTER—Captain J. C. Rousseau, now of the ss. "Otter" while in command of the bark "Ocean Gem," was in Victoria, Vancouver Island, B.C., many years ago, to which place a letter was posted to him, in the Province of Quebec, on the 1st March, 1878, properly directed. The letter, apparently, never reached its destination, for on the 15th November, 1892, it was handed to the captain in this city, fourteen years after being posted. The letter contained interesting news for Captain Rousseau, namely, the birth of a son, and the infant referred to in it, is now a fine healthy boy of fourteen, well able to take care of himself. Although the news was late in arriving, the captain is glad to have received it.

THE DECEMBER COSMOPOLITAN. - In view

of the fact that Sir Edwin Arnold will very likely be the next poet-laureate, one turns with interest to his most entertaining article in the December Cosmopolitan on a "Japanese Watering Place." The same number conwatering Place." The same number contains an interesting and appreciative article on Lord Tennyson, largely personal and sympathetic, by Dr. George Stewart, F.R.S.C. The paper is beautifully illustrated, has no fewer than seven portraits of the poet, and views of his late home and surroundings. Mr. Thos. An Interview With One of the Directors of Quebec Seminary and Laval University on the legal advisers."
"But then your water supply may be stop-Subject of the Water Tax.

"Is there any truth in the rumor, now in circulation, that the Quebec Corporation has levied a water tax of \$4,000 on the Seminary and University?"

"In the beginning of October the "Procureur" of the Seminary received from the Corporation a bill for water amounting to \$4,062.50 for the fiscal year of 1892-93."

"What did the Seminary pay in former years?"

cannot be overlooked is that the city is in absolute need of tunds, and that rich com-munities should be the first to come to its

munities should be the first to come to its aid.

Be it well understood, in the first place, that the Seminary has no objection whatever to pay for the water it uses; but it is convinced that it has already paid far mere than its value since the introduction of the aqueduct. What it objects to, is, that under pretence of furnishing it with water, the Corporation should attempt to levy taxes, from which, being an educational establishment, it is exempt by law. Secondly, people

"Well! why not oblige your students to pay higher, whether they belong to the grand or misor Seminary or to the Univers-ity!" And when we've pickt the juicy banes,
Till they be bare like chuckie stanes,
And cripples maist could stand their lanes,
Then up as ane,
And sing like mad, — Man, — Wife and
Weans.—

"The students in the Grand Seminary are, is is true, supposed to pay only \$120 a year, for board; well, this year, out of the whole number, only one was able to pay his first term in full and in cash. The students in the Minor Seminary pay \$100 for ten months' board; enquire of their parents, for the greater part residing in the country, if they could pay more. Ask the "Procureur" of the Seminary and he will tell you the very great trouble he has in collecting this small amount; although the Seminary distributes among those who cannot pay in full from \$4,000 to \$5,000 annually, a revenue derived from the bequests of generous benefactors to encourage education and enable deserving youths to prepare for the Church. Children of rich parents are very scarce among our papils. Then again, one must remember, that apart from their board, parents have to provide their children with clothing, books, &c., and meet many other expenses in connection with their studies. Ask the University students or their parents, if they are able to pay more than they do now; their number has already considerably decreased and were the Seminary desirous of seeing the remainder emigrate to Montreal, it would only have to raise the fees for lectures, &c. I would wish to draw your attention, in the meantime, to the fact that the course of studies in both the Grand and Minor Seminaries, has ever been given gratitionisty; which is likewise the case in all Colleges and Seminaries throughout the Province. The monthly fees paid by the day pupils of the Minor Seminary do not amount to one-quarter the cost of heating or lighting or even of the water tax."

"But could it not be possible, perhaps, to "The students in the Grand Seminary are,

of the water tax.

of the water tax.'

"But could it not be possible, perhaps, to retrench on the salaries of both clerical and lay professors?"

"You are quite at liberty to suggest how such retrenchments could be effected. Here then are the facts, judge for yourself: There are about thirty priests connected with the Seminary or University; they each receive for clothing, washing, travelling expenses, alms, &c., &c., a salary of \$120 a year; the Superior of the Seminary, who is at the same time Rector of the University, is not more THANKS.—The Committee of the Ladies' Protestant Home acknowledges, with thanks, the receipt of \$25 from the St. Andrew's Society towards the funds of the institution. ACKNOWLEDGMENT.—The Treasurer of Jeffery Hale's Hospital thankfully acknowledges the receipt of \$50 from St. Andrew's Society, being the amount voted at the last annual meeting of that Society. Superior of the Seminary, who is at the same time Rector of the University, is not more favored than the others. The Seminary is also obliged to employ a certain number of pupils from the Grand Seminary; they each receive in payment their board and \$50. Any suggestion as to what extent these salaries could be reduced would be thankfully received. The salaries paid the lay professors in the University are already se small that all thought of curtailing them would be out of the question. At all events, should you be acquainted with our zealous and learned professors in the faculties of Law and Medicine, it might be well to enquire of them if they would care to see their salaries reduced in order to benefit the Corporation." RECORDER'S COURT, YESTERDAY .- A servant girl, not in possession of all her mental faculties, was sent to jail for one month, so as to allow the doctors to study her case before sending her to Beauport Asylum. A man, drunk and disorderly, \$4 and costs. POLICE COURT, YESTERDAY.—A warrant has been issued for the arrest of a farmer of Chateau Richer, for refusing to provide for his wife and family. A woman, charged with selling liquor at Montmorency Falls without a license, was fined \$120 and costs.

CONCERT AND ENTERTAINMENT. - We would order to benefit the Corporation."

"You have just stated, I believe, that the University students are less numerous than formerly; one would be under the contrary draw the attention of the public and friends of the Society for the Prevention of Cruelty to Animals to the programme in another column for the concert which is to be held in the Church Hall, on the 6th December next.

"In 1889, the students in Law and Medicine, the only ones in fact who pay anything for their course of lectures, numbered 156; this year there are only 100; a falling off of more than a third. The fees received from the thore than a third. The fees received from them and the revenues derived from the granting of diplomas would not suffice to pay the salaries of half the lay professors. To this add the cost of maintaining the University, of heating and lighting it; the payment of insurances and employés' wages; the expenditure necessitated by the museums and libraries; the interest lost on the sunken capital, since the foundation of the institution to the present time, one can then easily tion to the present time, one can then easily realize that in taking on itself the founding and endowing of the University the Seminary did not, in a pecuniary point of view, make anything like a successful speculation."

"But you will admit that the University itself apart from the Grand and Minor

"But you will admit that the University itself, apart from the Grand and Minor Seminaries, is worth more than a million dellars, and that you would not part with it even at that figure."

"The University with its contents is certainly worth more than a million; it has even

cost the Seminary far more, the fruit of its cost the Seminary far more, the fruit of its own accumulated savings and endowments; and far from making any return even as interest on this immense capital, it has necessitat ed an additional annual outlay of from \$25,000 to \$30,000. Yes! the University is worth a million and more; well, the Seminary would willingly hand it over to the city any day, for a very small consideration. Whenever it for a very small consideration. Whenever it pleases, the Corporation can enter into possession as it now stands, with its museum session as it now stands, with its museums, library, picture gallery, etc., etc., on the sole condition of maintaining it and meeting the expenditure which now devolves upon the Seminary. The University would thus become the property of the city of Quebec, which is not overstocked with institutions of the kind. The opportunity to easily acquire museums, libraries, etc., of its own and for almost nothing is certainly an excellent one. This most nothing is certainly an excellent one. This is not the first time the offer is made, now do Is not the first time the offer is made, now doI think that the Corporation would even
accept it now, however advantageous the
conditions may be. The Seminary on the
other hand, in order to provide for municipal
taxation and give its clerical professors a
more suitable salary,—say one about equal to
that of a first or second year clerk in any
business office,—would only have to close the

Latterly, on account of the establishment of a branch of the University in Montreal and a diminute of the University in Montreal and the University in Montrea tion in its revenues from various causes, the Seminary, backed by the whole Episcopacy, did, on two different occasions, petition the Legislature for a subsidy. The request was not entertained and in one instance, was re-

pay for what water we use, for several years we have even been paying at the rate of \$1,250, which is altogether out of proportion to what we have received. Since the agreement entered into is set aside, then let the "From 1860, when the aqueduct was first laid, to 1885, the Seminary paid annually \$600 for its water service. From 1885 to the present date, it paid \$1,250 a year and, now, without the least warning and in direct violation of an agreement entered into in 1885 by both parties, after its conditions had been discussed and accepted, the exorbitant claim of \$4.062 50 is being a consequence that would follow were the water supply cut off. How could you procure so indispensable an article?"

"I again repeat, that we do not think the Corporation will ever come to such extreme measures with a community, such as the Seminary which city give us meters and we are sure of econoviolation of an agreement entered into in 1885 by both parties, after its conditions had been discussed and accepted, the exorbitant claim of \$4.062.50 is being made. The former sum, \$1,250, was already out of all proportion to the amount of water used by the Seminary and University, whilst it cannot be denied that the water service is very defective, giving out very frequently, and leaving us three or four times a month in most embarrassing straits."

"It must be admitted that \$4,062.50 is rather an exorbitant charge; but then, a fact which cannot be overlooked is that the city is in absolute need of tunds, and that rieh sommunities should be the fifst to come to pass, well, strictly speaking we really think we could dispense with the city's water. We have a number of cisterns, seven or eight of them, quite sufficient for ordinary purposes, such as heating, closets, etc.; there only remains to provide drinking water. This could be bought by the barrel at the public hydrants. The antiquated water butts of bye-gone days might again be revived and pressed into active service. They would add yet another attraction to our historic city, re-calling memories vice. They would add yet another attraction to our historic city, re-calling memories of half a century ago, when they slowly meandered to and from the Cul-de-Sac. They must still be in existence somewhere, enjoying a well earned repose and supremely untonscious of the proud destiny in store for them, that of contributing in their own quiet way to the maintenance of a National University. But unfortunately for the antiquarian, we fear the revival of the good old days would not last long; the good common sense from which, being an educational establishment, it is exempt by law. Secondly, people labor under a very false impression, when they imagine that the Seminary is rich; they must surely have forgotten what it has done in the past, and the continued expenditure which it has still to meet from very limited resources."

"Perhaps so; but believe me, the Seminary may yet be obliged to do so, perhaps sooner than the public realizes. Already the boarders' wing is closed and the same may happen the University before long. CITY OF QUEBEC CITY HALL, QUEBEC, 19th November, 1892.

By-Law No. 312, to make compulsory the Sweeping of Chimneys.

A T A SPECIAL MEETING OF THE City Council of Quebec, held on FRIDAY, the 18th day of November, 1892, the following By Law was read for the first time: By-Law to Make Compulsory the Sweeping of

Chimneys. (Drawn up in the French language.) It is ordained and enacted by the City Council of Quebec, and the said Council doth hereby ordain and enact as follows:

1. Every chimney actually used in any house or building whatsoever in the city of Quebec, shall be swept by one or more licensed sweepers at least once a year from the date of

Quebec, shall be swept by one or more licensed sweepers at least once a year from the date of the present By-Law.

2. Every proprietor or occupant of a house or building whatsoever, wherein there shall exat one or more chimneys requiring to be swept, shall be bound to make a Jemand therefor by a requisition to that effect to the inspector of chimneys, stating the day and hour when he shall require the services of the chimney sweepers. If the inspector of chimneys cannot send the chimney sweepers at the day and hour appointed in the requisition of the proprietor or occupant of such house, he will himself appoint the time when the chimney sweepers shall proceed to the said work, with as short delay as possible.

3. Every proprietor or occupant of a house who shall wish to have his chimney sweeper a second or third time in the same year, shall be granted his request by sending a requisition as provided in the preceding section.

4. The Mayor of the city shall issue and grant every year, on the first of May, or at any other time after the said date, for the balance of the year, licenses for sweeping chimneys in all parts of the city, to as many persons as he will deem necessary, and he will have the power of cancelling and withdrawing the said licenses whenever and as of an as he will think fit, for whatever reason he shall deem to be sufficient.

5. All the licensed chimney sweepers of the

sufficient.

5. All the licensed chimney sweepers of the said city shall be under the direction of the inspector of chimneys, and it shall be their duty to obey all the orders and instructions of the said inspector in all matters relating to chimney sweeping.

6. Every proprietor or occupant of a house shall see that the chimneys are kept in order, and without any obstruction so that they may be easily swept.

9. All other By Laws, or portions of By-Laws incompatable with the dispositions of the present By-Law are hereby repealed. PUBLIC NOTICE
