

THE EQUITY

No. 49, 61st Year

SHAWVILLE, PONTIAC COUNTY, QUE., THURSDAY, JUNE 7th, 1944

The Hospital Auxiliary will meet at the Hospital on Tuesday afternoon, June 13th, at two o'clock.

Shawville Women's Institute will meet at the home of Mrs. Robert Fairfield, on Monday evening, June 12th, at eight o'clock. Assisting hostesses, Mrs. N. A. Drummond and Mrs. Berta Stark.

Clarendon Women's Institute will meet at the home of Miss Minerva Corrigan, Friday afternoon June 16 at two o'clock. Program—Welfare and Health; convener, Mrs. J. A. Hobbs. Roll call—Table manners for children at home and in public.

Ladysmith Hen Produces Heavy Egg

Mr. Jas. Turcotte, of Ladysmith, dropped into this office the other day and left a White Leghorn hen's egg, which measured 6 1/2 inches around and 8 inches the long way. This is not the largest egg to be brought in but it is the heaviest, weighing a quarter of a pound.

Many Attend Prayer Service for Invasion Forces

Shawville citizens in large numbers observed the "D" day service in the Memorial Park on Tuesday afternoon between the hours of 2.30 and 4.00 o'clock.

Prayers were offered by Rev. F. O. Routley and Rev. P. R. Stote; scriptures were read by Rev. R. J. Robertson and Rev. H. Kieley. The hymns were led by Messrs. G. T. Paul and Glenn Hodgins.

Service began following the King's message, which was heard over the public address system, set up in the Park by Messrs. Willard Elliott and Melvin Kehoe.

Teachers and students of the High School attended in a body. The Rev. H. Kieley, president of the Clarendon Ministerial Association presided for the service.

Barn of W. A. Armitage, Onslow, Destroyed in Electric Storm

In the first electric storm of the year which visited this district on Wednesday night of last week, lightning struck the barns of Wm. A. Armitage, of North Onslow, and burned them to the ground. Mr. Armitage lost his home in a similar way last year, with a loss of about \$2,000, partly covered by insurance.

Several of the electric lines of this district were put out of commission. Power in the Norway Bay section was cut off until noon on Thursday.

Heavy rain fell in South Clarendon township, bringing relief to the newly sown crops that already had been damaged by drought. The rain also put out the forest fire burning in the Hodgins section of Thorne, where a strip more than a mile wide and of considerable length, had been destroyed with acres of good timber.

Chemicals Increase Flow of Resin

The labor shortage and the urgent need for production of more resin and turpentine for war uses focus attention on the discovery by the U. S. Forest Service that 40 per cent sulphuric acid solution or a 25 per cent solution of caustic soda (lye) will greatly increase the gum flow of both longleaf and slash pines. Research shows that the 40 per cent sulphuric acid solution applied to fresh streaks or faces will increase the average annual flow of gum by 25 per cent. Furthermore, experiments in 1942 with a large number of other chemicals show that a 2 per cent solution of caustic soda will increase yields as much as 75 per cent. A suitable spraying device for use with both chemicals is being developed by government silviculturists in co-operation with several machinery manufacturers.

Abundant Moisture Retards Germination of Cotton

The germination of cotton seed may be affected by weather damage in the field, by heating of the seed-cotton after it is put in the house, and by heating of the seed after the cotton is ginned.

Cotton in the field should be fluffy and fully matured to give seed with high germination. It should be picked when there is no dew on it and not too soon after a rainy period of weather.

Cotton should not be picked and carried directly to the gin under average conditions. The specialist suggests that it be put into the cotton house and turned for several days so as to be sure that it is thoroughly dry and does not have the opportunity of going through a heat.

When the cotton has been ginned, the seed should be immediately taken from the sacks and spread out in thin layers so that it may dry out. Too much moisture in the seed will cause it to heat and reduce the germinating qualities.

PERSONAL MENTION

Mrs. Margaret Fyfe, of Ottawa, was a week-end guest of Mrs. Andrew Hodgins.

Mrs. Ed. Manley, of Halifax, is visiting her sister, Mrs. C. H. MacLean, this week.

LAC. Clarence Dean, of Lachine, is visiting his parents, Mr. and Mrs. Jno. A. Dean, this week.

Mrs. A. F. Fokes is visiting at the home of her son, Mr. Brome Fokes, in Gananoque, Ont.

Miss Connie Williams, of Ottawa, was a week-end guest at the home of her sister Mrs. Asa Smart.

Mrs. Keith Corrigan and Brent, of Manotick, spent the week-end at the home of her mother, Mrs. Thos. Shore.

Mrs. Harold Walker has returned to town after a week's visit with her husband's parents at Harrington, Ont.

Miss Catherine Hodgins, R. N., of Pembroke, visited her parents Mr. and Mrs. Hilliard Hodgins, for the week-end.

Rev. A. Fokes, Rev. N. T. Holmes and Mr. Leslie Dean, are attending United Church Conference in Montreal this week.

Mr. and Mrs. Everett Moore, of Rupert, spent Sunday at the home of Mrs. Moore's parents, Mr. and Mrs. Robt. Tracy.

Staff Sgt. Ebert Horner and Mrs. Horner, of Ottawa, spent the week-end at the home of his parents, Mr. and Mrs. Jas. H. Horner.

Cpl. and Mrs. Manson Smith and family, of Ottawa, are spending a vacation at the home of his parents Mr. and Mrs. Herbert Smith.

Mrs. Geo. Helmer has returned to her home in South Porcupine, after spending a couple of weeks with relatives in this district.

Miss Gladys Stephens, of Ottawa, spent the week-end at the home of her parents, Mr. and Mrs. John L. Stephens, at Otter Lake, Que.

W. O. W. L. Glenn, of Carman, Man. recently returned from Overseas and now stationed at Rockliffe, visited his aunt Mrs. David T. Hodgins, over the week-end.

Miss Shirley Horner, nurse-in-training at Ottawa Civic Hospital is spending a vacation at the home of her parents, Mr. and Mrs. A. H. Horner, at Charteris.

Mrs. Sidney Tubman and little daughter, Patricia Sharpe, and Mrs. Mabel Kilsby and daughter, Donna, of Hamilton, are visiting at the home of Mr. and Mrs. Nathan Dagg, Spring Valley Farm, Charteris.

Lieut. (Dr.) and Mrs. Beach of Toronto, visited relatives in town on Friday last. Returning they were accompanied by Mrs. Beach's mother, Mrs. Arthur Wilson, who had been visiting here for several weeks.

W.O. Graham Smith, Mrs. Smith and daughter Mary Lou, have returned to Newfoundland after spending the past two weeks with the former's parents, Mr. and Mrs. Geo. M. Smith, Campbell's Bay, and friends in Eganville.

Clarendon Women's Institute

The regular monthly meeting of the Clarendon Women's Institute was held at the home of Mrs. Selisley Howard on Friday evening, May 12th. Mrs. Howard, the president, presided, assisted by the secretary, Miss Minerva Corrigan.

The meeting was opened with the regular exercises after which Mrs. Thomas Stephens read a paper on "How my Garden Grows". The roll call "My Favourite Flower" was answered by twelve members and one visitor.

An interesting part of the program was the annual sale of plants and shrubs. During the meeting the members sold sixty-five articles for the Pontiac Community Hospital.

The program closed by the singing of God Save the King, after which refreshments were served by the hostess.

Ship's Bells

The custom of ship's bells started, apparently, with the use of a half-hour glass. The man on watch would turn over the hour glass at the end of his first half-hour and ring the bell once. This was repeated at half-hour intervals, with an additional bell stroke each time, until he rang eight bells at the end of four hours, signaling the completion of his watch.

It is "eight bells" usually at the end of each of the six watches—ending at 12 midnight, 4 a. m., 8 a. m., 12 noon, 4 p. m. and 8 p. m.; "one bell" indicates a half-hour later, "two bells" one hour, etc. The hourglass has long since been out of date but bells still are used.

To complicate things, the hours of men on watch occasionally vary. There are two "dog watches" of two hours each between 4 and 8 p. m. and Scandinavian ships have a different breakdown of the time of the watch.

Leslie M. Smith Receives Commission as Pilot Officer

Mr. and Mrs. H. I. Smith, of Elmside, have received word that their son, Leslie M. Smith, has been promoted from the rank of Warrant Officer to Pilot Officer. Leslie went overseas in February 1942 and completed a tour of operations over North Africa in October 1943. He is now in service in England. Pilot Officer Smith, who is 23 years of age, received his early education in Elmside School, Shawville High School, and St. Patrick's College, Ottawa.

Another son, Pilot Officer Edgar Smith, who enlisted at the same time, was killed in air operations over Germany, and was buried at Lingen on Ems, Germany, on August 1st, 1942.

A third son, Kenneth Smith, is in training in the R.C.A.F. in Canada.

MARRIED

LAFRAMBOISE—WALLS

Charteris Anglican Church was the scene of a pretty wedding on Wednesday afternoon, May 31st, when Evelyn Susan, daughter of John Walls and the late Mrs. Walls, of Thorne township, became the bride of Joseph Thomas Alexander Laframboise, of Shawville, son of Mr. and Mrs. Fred Laframboise, of Cornwall, Ont. The officiating minister was Rev. P. R. Stote.

The bride wore a two-piece suit, with white hat and shoulder knot of white carnations. She was attended by the bridegroom's sister, Mrs. J. McGrath, of Shawville, as matron of-honour, while the best man was Howard Walls, of Thorne brother of the bride.

The same evening a reception in their honor was given at the home of the brides father, and buffet lunch was served. The young couple are to make their home in Shawville.

MCWHIRTER—MCGILLIS

Gladys Evelyn Rose McGillis, daughter of Mr. and Mrs. Wallace McGillis, of Bristol township, was united in marriage on Thursday of last week, to Calvin Thomas McWhirter, of South Porcupine, son of the late Thomas H. McWhirter, and Mrs. McWhirter. The ceremony was performed at Shawville parsonage by Rev. A. F. Fokes, of Shawville United Church.

For the ceremony, the bride was becomingly gowned in a dress of pale blue crepe, with blue hat and matching accessories. The attendants were Mr. and Mrs. Jos. Penkovich, of Ottawa.

Later, supper was served to the bridal party and their friends at the home of the bride's parents. During the Summer the young couple are to reside in Bristol township, but are later making their permanent residence at South Porcupine.

Develop Petroleum

British interests have taken active part in developments since 1859 that have brought world petroleum production to two billion barrels annually. Refineries and ports have been built on the banks of the Thames and the Bristol Channel to receive crude oil from the United States, Venezuela, Trinidad, Iran, Iraq, Bahrein, Burma and the Netherlands Indies. Despite all these importations, oil production from shales has been continued and encouraged in Scotland. When shales yielding 80 gallons of oil to the ton could be found, distillation was profitable. Since 1923, however, production has been continued by aid of government subsidies from shales yielding as little as 20 gallons to a ton.

Fowl Paralysis

Long a scourge of laying flocks and the costliest of poultry diseases, fowl paralysis is indicated by a gray eye with an irregular pupil. That is, when a bird is affected with this form of disease, the iris or colored part of a normal eye is gray and the pupil is irregular in outline instead of being evenly oval or well rounded. In addition, the eye may be "fishy" or bulging.

Birds showing this eye condition should be removed from the flock. Lame birds that show no foot injuries to account for the lameness should be removed, too, as suspected carriers of fowl paralysis. Diseased birds may lay for a while, but they eventually lose weight and go out of production. If left in the flock, they endanger other birds.

GERMAN BACK-TALK IN ITALY

German caption on photo above, received in London from Stockholm, says picture shows German field piece in action against Allies on the southern Italian front.

WHAT SCIENCE IS DOING

Water Can Be Used To Start A Fire

Water is almost universally thought of as a primary fire extinguisher, writes W. P. Keasbey in the Christian Science Monitor. However, under certain special conditions, water also can start a fire.

Most of us have used a burning glass or have seen one used. A burning glass is merely a lens of magnifying glass ground in such a way that it brings to a sharp focus the rays of light which pass through it.

When used in bright sunlight it can concentrate all the rays that fall on its surface (say three inches in diameter) onto a tiny area not much bigger than a pinhead. This concentration of rays results in a corresponding concentration of heat, and when the sunlight falling on the burning glass is focused on dry paper, dry shavings, or other readily combustible material, the heat will soon cause the substance first to char, then to smoke, and finally to burst into flame.

Water has two properties in common with glass and these properties make it possible for water to start a fire. Clean water is transparent like glass. Also, like glass, water bends rays of light that pass through it at an angle. This bending of light rays by water is familiarly seen in the fact that a stick or a pencil, thrust into water at an angle, seems to bend where it enters the water's surface.

Since water lets light pass through and bends it as it passes, if water is placed in a clear glass container of the proper shape, it can act like a burning glass—it can concentrate rays of sunlight to such an extent that their focused heat can cause combustible material to burst into flame. Water in a goldfish bowl might produce such an effect.

Cicero, Roman orator, was aided in his work by a secretary who devised a shorthand system to record Cicero's speeches as he dictated them.

If you suffer MONTHLY FEMALE PAIN
 You who suffer cramps, headache, backache, and tired, nervous feelings—due to female functional disturbances—should try Lydia E. Pinkham's Vegetable Compound. It has a soothing effect on one of women's most important organs. Also a fine stomach tonic! Made in Canada. Worth trying.

Modern Etiquette

By Roberta Lee

1. What would be considered the two extremes in conversation?
2. Should a girl begin to put on her wraps when she has dined with a man, and is leaving the table?
3. Is it good form to make a lengthy call of condolence?
4. If one has received a wedding announcement, it is good manners to write a letter to the bride?
5. If one has to pass people who are seated in a theatre in order to reach one's seat, is an apology necessary?
6. Where is the proper place to seat a woman guest of honor at the dinner table?

Answers

1. One would be monopolizing the talk to the point where everyone is bored; the other, letting the conversation lapse every time it reaches you.
2. No; either the girl's escort or the waiter should assist her.
3. No; this call should be as brief as possible.
4. Yes; it would be nice to send best wishes, but it is not obligatory unless an invitation to the ceremony is received.
5. Yes; apologize quietly and then pass on as quickly as possible.
6. To the right of the host.

LEADS FRENCH

MECCA OINTMENT

War Bill Will Pass Trillion Dollar Mark

By the end of this year the cost of the war to all belligerent nations will be near the almost unimaginable total of a trillion dollars, says the Winnipeg Free Press. The bill will pass the trillion mark in 1945, according to figures compiled by the Tax Institute of New York. A trillion dollars is a million million or a thousand billion—a sum never used in human history before to reckon the cost of war or any other activity.

The Tax Institute calculates that the Axis so far has spent about the same amount on the war as the United Nations. But the balance of expenditures is now shifting rapidly and this year the United Nations will spend \$150 billions as against an estimated total Axis expenditure of \$50 billions. It must be remembered, of course, that a dollar will buy more in the Axis countries than in the Allied countries, where wages and living standards are higher.

Lend-Lease Trucks Aid Russian Drive

Nearly 250 planes, more than 230 tanks, and 7,000 other military motor vehicles a week were sent overseas from the United States to Allied nations during January and February under the Lend-Lease program, Leo T. Crowley, United States Foreign Economic Administrator, reported.

Mr. Crowley credited tens of thousands of Lend-Lease trucks with playing a vital role in the Soviet westward drive in the Ukraine and Crimea.

Furthermore, Soviet-produced tanks were augmented in the offensive drives by Lend-Lease General Sherman, Mr. Crowley added.

Since March 11, 1941, the United States has produced more than 165,000 planes, 59,000 tanks and 2,000,000 other military vehicles, Mr. Crowley reported, adding that the United States retained four-fifths of the planes and two-thirds of the other equipment.

SNAPPING A SAKE-HAPPY JAPPY

Capt. Stanley F. Peoveak of Santa Clara, Mich., snaps a picture of a Jap he captured at Hollandia, New Guinea. If Captain Peoveak's pal hadn't held him up, the prisoner would have fallen smack on his face—because he's one Nip who had been nipping too freely on a bottle of sake—the Jap equivalent of corn likker.

BABY CHICKS

GET TOP NOTCH CHICKS FOR a Top Notch Market. There'll be an active demand for every Top Notch chick. Also raise every egg your Top Notch pullets produce. And if they're as good as their blood-tested Government Approved breeders the broilers and roasters will have the weight and quality to do your heart good and the layers will be the kind that keeps the egg cases full. Write for 1944 catalogue and reduced May price list. Also started chicks, free range pullets 3 weeks of age and older. Top Notch Chickeries, Guelph, Ont.

REDUCED PRICES FOR CHICKS, Barred Rocks and Leghorns 11c, Lehigh pullets 22c, Barred Rock pullets 20c. Leghorns are Barron Strain. Rocks are O.B.S. breeding. All breeders are blood tested. One dollar books your order. J. D. Johnson, Fergus, Ont.

RIGHT NOW YOU WANT CHICKS in a hurry as the season is getting on. We can give prompt delivery on most of the popular pure breeds and hybrid crosses in non-sexed, pullet and cockerel chicks. Send for 1944 catalogue and circular and read what our 1943 and 1944 customers say about Twiddle Chicks. They liked them in 1943, they came back for more in 1944 and are satisfied with them again. That is why we are selling over 140,000 chicks every week. Reduced prices now in effect for June. Write for latest price list. Today's bargains in started chicks, older free range pullets, eight weeks and older. Twiddle Chick Hatcheries Limited, Fergus, Ontario.

STARTED HEAVY BREED PULLETS—for delivery middle June and later orders should be placed now. Also order June-July chicks now to avoid disappointment. Some chicks immediate delivery. Bray Hatchery, 130 John N., Hamilton, Ont.

REDUCED PRICES MAY & JUNE CHICKS FROM A REAL BREEDING FARM OF 600 BREEDERS. We can give prompt shipment in Day-old Chicks, also a limited number of Started Chicks and Day-old Cockerels. Have You Heard?

She was anxious to learn the latest news about her neighbor's accident, and turning toward her husband, who was immersed in the evening paper, she said:

"Henry, can you see anything in the paper about Mr. Jones running over his mother-in-law?"

"Not yet," replied Mr. Peck. "I haven't come to the sporting news!"

A little bird sat on a telegraph wire. And said to his mates, "I declare, If wireless telegraphy comes into vogue, We'll all have to sit on the air!"

"Why do you insist on keeping a parrot?"

"Because," answered the lonely man, "I like to hear it talk. The parrot is the only creature gifted with the power of speech that is content to repeat just what it hears without trying to make a good story."

SUNDAY SCHOOL LESSON

PAUL PLEADS FOR A RUNAWAY SLAVE

PRINTED TEXT, Philemon 4-41
GOLDEN TEXT—Be ye kind one to another, tenderhearted, forgiving each other, even as God also in Christ forgave you. Ephesians 4:32.
Memory Verse: Be ye kind. Ephesians 4:32.
THE LESSON IN ITS SETTING
 Time.—This letter to Philemon was probably written about A.D. 63.

Place.—The Apostle Paul wrote this letter during his Roman imprisonment, and addressed it to Philemon who was living in Colossae, a city in what is now known as Asia Minor, then called the Province of Asia.

Philemon's Love and Faith
 "I thank my God always, making mention of thee in my prayers. Hearing of thy love, and of the faith which thou hast toward the Lord Jesus, and toward all the saints." Philemon was known among believers for his love to Christ and his brethren. His love and trust in Christ overflowed to all saints.

"That the fellowship of thy faith may become effectual, in the knowledge of every good thing which is in you, unto Christ." Philemon, comparatively wealthy, gave generously to his needy brethren, and Paul prays that his life of practical love may be effectual. This goodness is to be acknowledged as due to Christ.

Joy In Love
 "For I had much joy and comfort in thy love, because the hearts of the saints have been refreshed through thee, brother." We should feel great joy and encouragement when we see real love in some fellow believer.

"Wherefore, though I have all the boldness in Christ to enjoin thee that which is befitting, yet for love's sake I rather beseech, being such a one as Paul the aged, and now a prisoner also of Jesus Christ." Paul would rather that his request should be granted because of their personal affection than because of his Apostolic authority.

Paul's Plea For Onesimus
 "I beseech thee for my child, whom I have begotten in my bonds, Onesimus, who once was unprofitable to thee, but now is profitable to thee and me." Onesimus was an unprofitable bond-servant. But since his conversion he had become profitable to Paul by his devoted attention and service.

True Christian Courtesy
 "Whom I have sent back to thee in his own person, that is, my very heart: whom I fain would have kept with me, that in thy behalf he might minister unto me in the bonds of the gospel; but without thy mind I would do nothing; that thy goodness should not be as of necessity, but of free will." Paul sends back Onesimus because to retain him would be to get a benefit from Philemon whether willing or not, and Philemon's good had always been willingly given. Paul showed true Christian courtesy which is a combination of consideration, humility and love.

Paul's Request
 "For perhaps he was therefore parted from thee for a season, that thou shouldst have him forever." Paul reminds the master that his slave would be returning to him forever; forever on earth and then hereafter.

"No longer as a servant, a brother beloved, specially to me, but how much rather to thee, both in the flesh and in the Lord. If then thou countest me a partner, receive him as thyself." Onesimus was specially dear to Paul for he was his own son in the faith. Paul desires Philemon to receive and welcome Onesimus as though he were giving a welcome to himself. "But if he hath wronged thee at all, or oweth thee ought, put that to mine account: I Paul write it with mine own hand, I will repay it: that I say not unto thee that thou owest to me even thine own self besides."

What a fine spirit Paul shows; he is willing to meet the debt of a runaway slave. We are remind-

CHRONICLES of GINGER FARM

By Gwendoline P. Clarke

Well now, what shall we talk about today — shall it be that W. I. District Annual that I went to; or the day the paper-hanger came to do a couple of ceilings; or weeding the garden; or my own attempt at paper-hanging — or shall it be that trip we made to the bush to get ferns for the garden?

Did someone say — "that trip to the bush"? Well, that's fine, because it is the very thing I wanted to write about. You know how it is — when you enjoy something very much you just feel you want to share it with everybody else. Isn't that right?

It was a lovely day and as we had city visitors for the week-end I wanted them to get a real fill of good, clean, country air. So I mentioned that I was anxious to find ferns for a shady corner in the garden and would they like to go fern hunting too. The answer was exactly what I expected, so — away we went.

I wasn't too sure where to find the ferns even though I had seen hundreds of them last year while picking berries. However we headed straight for the mountain and on our way passed one of our loveliest beauty spots. Trees and rocks nearly all the way along the road and then suddenly, to one side of us, a clearing, and a marvellous view across the valley, the brown earth of newly worked fields accentuating the green of the trees and pasture fields, while a haze along the horizon told us we were looking straight towards the lake.

Presently we passed a gurgling little waterfall, which had somehow managed to catch the rays of the sun, making the water as it tumbled over the rocks appear to be in several shades of reddish purple. Then we turned at the first cross-road and travelled along the road with dense bush on either side. But we didn't get very far — we couldn't — for who could drive past stately ferns, marsh marigolds, violets — white, yellow and mauve — and trilliums by the hundreds? But, much as I hate to interrupt this saga of beauty, I must confess, there were also mosquitoes. However we wouldn't let even the mosquitoes stop our exploring, so we followed a wagon trail into the bush and many were the exclamations of surprise and delight. "Gwen, do come here and see these trilliums — they are absolutely perfect!" or from me — "Kay, I have found some of the grandest ferns — there is even a wild maidenhair among them!" And then from my nephew — "There really are an awful lot of mosquitoes in this bush, aren't there?"

After about a couple of hours we were back home again. At no time had we been more than five or six miles from home yet we had seen beauty spots equal to those which people probably travel hundreds of miles to see. Partner had stayed at home to get his much needed Sunday afternoon rest. But he had the kettle boiling and we found a cup of tea was exactly what we needed.

And then we planted the ferns. They were only a little wilted and after they had been replanted for about an hour they picked right up again. I do hope they grow because there is something very fresh and attractive about a clump of ferns in a garden.

Our work this week has been whatever the weatherman ordered. Partner got some more seeding done and was already to start in on his last field when it rained again. As for me I work in the garden when it is fit and in the house when it rains. Last night I went to bed saying to myself — "Now what shall I do

TICKLISH JOB

Screen songstress Lucille Ball doesn't ordinarily wear an ostrich-plumed hat to lunch. But it's a ticklish job to doff and don the huge topper seen in photo above, so she wears it constantly until day's work is done.

tomorrow — shall I wash, paper the dining-room, or work in the garden?" The weather again decided things for me, so, when I got through this little spiel I shall take to the papering again. And I wish I had your blessings on my job for in the room I am about to tackle there are six doors, four cupboards, two windows a fireplace, and the telephone. Figure that out for yourself and you will then be ready to believe me when I tell you there are only two strips of paper that don't have to be cut and measured.

'Dark of the Moon' Best Invasion Time

The Germans seem to have developed in recent days an "invasion fever", says the Christian Science Monitor. This is partly induced, they say, by a conviction that the "dark of the moon" affords the Allies the best time to approach the Continent unobserved. While it is idle to speculate on the precise timing of the invasion, we suspect that the date was set with something in thought more ponderable than phases of the moon. However, the fighter sweeps over Germany, the blasting of targets that now include relatively easily repaired railway junctions, and the mashing of Russian power along the still muddy central sector all add up to good cause for German nervousness. Once Hitler stood on the shores of the English Channel and advised the British to "keep their shirts on," that he was coming. Well, today the advice can be megaphoned back.

Spread Of Typhus Ordered By Nazis

The Soviet Atrocity Commission reported recently that the retreating Germans were trying to spread typhus epidemics among the civilian population and units of the Red Army in violation of the "rules and methods of warfare accepted by all civilized peoples," and called for severe punishment of the Hitlerite Government, Germany's Supreme Command and all guilty individual officers. Some of the officers were identified.

All the Moscow newspapers have published long reports of investigations conducted in three concentration camps near Ozarichi in Polesiya Province, White Russia, in which, it was stated, more than 33,000 persons were held, including 15,900 children under 18 years of age. In their midst, it was asserted thousands were infected with typhus.

According to the report, those with typhus were shifted from the camp to spread the disease.

There were originally seven typhus cases in the camp, according to the investigation, and these grew to about 4,000, of whom 2,370 were children under 13, by the time the Red Army arrived.

Garden Tip

A tip for Victory gardeners to remember is to avoid working among such plants as cabbages and beans when they are wet because there is a danger of spreading plant diseases.

BEHIND ROMMEL?

While the Nazis publicize dashing, bombastic Gen. Rommel as head of anti-invasion forces in western Europe, many authorities consider that real mastermind charged with repulsing Allies is cold, leather-faced, stiff-backed, aristocratic Gen. Karl Rudolf Gerd von Rundstedt above, 68-year-old veteran of the old German army.

Garden Notes

STILL TIME
 A great many plants do not make any real growth until weather and soil begin to warm up. There are some exceptions, of course, but vegetables like beans, cabbage, cucumbers, tomatoes, corn, etc., planted out in early June will often catch up to, and may even pass,

those put in weeks before, especially if May has been cold and wet. Even in those favored areas where first sowings were made weeks ago, there is still time for several more plantings of beans, beets, carrots, corn, lettuce, etc., to ensure a continuous, fresh supply through the late-summer. And as for the hot weather plants, things like melons, cucumbers, celery, peppers, squash and such, this is about the ideal time to plant or set outside in most parts of Canada.

CULTIVATION
 Killing weeds is only one function of cultivation. In the well-cared-for garden, where weeds never make much growth anyway, the main job is to improve the soil by maintaining moisture, letting in air and keeping soil fine. One or two thorough cultivations of vegetable or flower gardens after planting, and then a little stirring up lightly with a cultivator — preferably once a week until the middle of summer — and growth will come along almost regardless of dry weather.

There have been only about 2,500 half-grams of radium — less than three pounds — produced in the world since the 'Curies' experiments.

BOMBERS' 'BRAINS'

Credit for much of the success of the U. S. Air Forces' achievements in bomb-blasting the enemy on many fronts goes to Brig-Gen. Haywood Hansell, Jr., deputy chief of air staff, in charge of long-range bombing.

ed of Paul's Saviour who paid all the debt that was written against us, and set us free.

Paul's Confidence In Philemon
 "Yea, brother, let me have joy of thee in the Lord: refresh my heart in Christ. Having confidence in thine obedience I write unto thee, knowing that thou wilt do even beyond what I say."

Paul found joy and comfort in the conversion of souls, in outward signs of his converts' growth in grace. Obedience responds to the voice of love. Love begets love, and the love of Paul would call forth a corresponding love in the heart of Philemon. Paul had confidence that Philemon would not refuse this request from his own father in the faith.

HIS MAJESTY INSPECTS CANADIANS

POP—With a Little Sforzando!

By J. MILLAR WATT

THE EQUITY

Shawville, June 7th, 1944

Sun Operates to Give Life to Dead Plants

Black-out overseas radio and stuttering telegraph and teletype machines recently gave another demonstration of the long arm of the sun reaching across 93 million miles of space into man's everyday affairs. "Sun spots" were credited with the disturbances.

Such dramatic demonstrations of the sun's power come only now and then, sometimes unseen, sometimes along with the flashing colored lights of the aurora. But day in and day out, as everyone knows but often forgets, the sun has completely dominated the earth and its life for some hundreds of millions of years. It is the earth's lighting plant, its heating system, and its power source. It dishes up all weather. With its gravitational pull—as real as if it depended on gigantic steel cables—the sun holds the earth captive and swings it along its oval path, clocking off the years.

Most vital, and at the same time one of the most mysterious effects of the distant sun on the earth is the process by which sunlight is transformed into food. This is known as photosynthesis: "light-put-together." When sunlight shines on the green coloring matter in plant leaves and in the tiny floating algae of the sea it operates in some magic way to turn "dead" water and other chemical compounds into "living" food. Since all animals live on plants or on other plant-sustained animals, sunlight is literally manna from heaven which feeds all living things.

Army's Smoke Generator Throws Protecting Screen

The army's new smoke generator proved a lifesaver in the invasion of Sicily, according to a statement by Maj. Gen. William N. Porter, chief of the army chemical warfare service.

"Smoke is our greatest protective weapon," General Porter said. "It is the greatest lifesaver of our troops and was responsible for the small number of casualties in Sicily where it was used."

This is the second time that commendation has been given by the army to the smoke generator. When the American forces landed in North Africa, they were protected by a pall of dense white smoke that poured out of these wheeled machines, completely concealing their movements, yet of no discomfort to the troops.

In the early days of the war the chemical warfare service called on the national defense research committee for a smoke generator. It was not long before a smoke box was developed. Then a mobile unit was built. It was the successful tests of this unit in the Schoharie valley that led the army to adopting it as an essential protective machine for its troops.

Crickets Seek Indoors

As the cool nights of early September warn him of the approach of winter, the cricket leaves the Victory garden and begins to look for more protected quarters. For a while he may be satisfied with such shelter as your garden compost heap provides, but when crickets are very numerous, as they are this year, many often find their way into the house.

Both the common black field crickets and the gray European house cricket are harmful household pests. The gray cricket is not as common as the black cricket, being limited out-of-doors to garbage dumps. They differ somewhat in their general eating habits, but both will eat holes in woollens and linens as well as in starched articles. In addition, their incessant chirping at night soon becomes a distracting nuisance. Check your cellar doors and windows for possible points of entry.

Sicily Huge Fortress

Blocking Mediterranean

Sicily, poised at the toe of the Italian boot, is "the football of the Mediterranean"—throughout history it has been kicked around by more conquerors than most other areas of like size. A partial list of rulers of the island includes Greek tyrants, Roman Caesars, Byzantine emperors, Saracen rulers, Norman kings, and in modern times a dizzying succession of Spanish, French, Austrian, and British sovereigns before Garibaldi gathered it into Italy's arms in 1860.

Sicily's area of 9,926 square miles makes it the largest island in the Mediterranean; its situation has made it often the most important as well. This three-cornered mountainous chunk of earth, seething with volcanic unrest, almost plugs up the central bottleneck of the Mediterranean. Africa lies only 90 miles to the southwest across the sea's Sicilian Narrows. Europe lies only two miles to the east across the Strait of Messina. Traffic or tragedy originating in either half of the sea has paid toll or taken toll of Sicily as it passed, and scarcely an event of Mediterranean history has left this hub island untouched.

DALE'S TINSHOP

TINSMITHS and PLUMBERS

Bordeaux Busy Port, French Wine Center

Bordeaux, France's fourth city and third most important port, is best known to the outside world as a wine center, says the National Geographic society, but it is also important normally because of its heavy overseas commerce in various commodities and because of the prominent part it has played in French history.

Thousands of American doughboys of the first World War remember Bordeaux as their landing place. At Le Verdon, a port at the Atlantic end of the Gironde estuary which reaches 60 miles inland to Bordeaux, a monument commemorates the landing of the first American soldier in 1917. The monument also recalls the departure from this point of Lafayette to help the American Colonies win their independence in 1777.

Vineyards surround Bordeaux and each large vineyard surrounds the chateau of the owner. Wine cellars and "wine libraries" in some of these chateaux were open to the public in peacetime.

The flat triangle of land between the Atlantic and the Gironde estuary, the Medoc Peninsula, is the primary wine-producing area of the Bordeaux region. Its white and red wines strive more for quality than volume.

Government Units Plan Postwar Reconstruction

State and local governmental units are in position to move swiftly in preparing to meet postwar reconstruction and development problems as a result of planning legislation adopted by most of the 44 state legislatures meeting this year.

Review of this legislation indicates the great impetus the war has given efforts of public officials to determine what future problems are in store for them and to lay plans for solving the problems.

The legislation set up new state planning commissions or revitalized existing agencies, and charged them with the task of preparing for the future; appropriations were granted in many instances to help the commissions carry out their work. Local governments were given authority to set up postwar reserve funds, draw up master plans for long-term projects, operate agencies for special projects, and co-operate with other communities in joint planning enterprises.

Alabama, California, Georgia, Illinois, Indiana, Missouri and Utah created new postwar planning boards to take over duties and expand study of future problems formerly done by state planning commissions.

TENDERS FOR COAL AND COKE

Federal Bldgs.—Province of Quebec

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Coal, Province of Quebec", will be received until 3.00 p.m. (E.D.S.T.) Wednesday, June 14, 1944, for the supply of coal and coke for the Dominion Buildings in the Province of Quebec. EXCEPT MONTREAL, P. Q.

Forms of tender with specifications and conditions attached can be obtained from the Chief Purchasing Agent, Department of Public Works, Ottawa; from Mr. Roland Simard, Supervising Architect, 150 St. Paul St., West, Montreal; and from Mr. J. A. Drolet, Architect, Public Works Department, Customs Building, Quebec, P. Q.

Tenders should be made on the forms supplied by the Department and in accordance with the departmental specifications and conditions attached thereto. Coal dealers' license numbers must be given when tendering.

The Department reserves the right to demand from any successful tenderer, before awarding the order, a security deposit in the form of a certified cheque on a chartered bank in Canada, made payable to the order of the Honourable the Minister of Public Works, (equal to 10 per cent of the amount of the tender, or Bearer Bonds of the Dominion of Canada or of the Canadian National Railway Company and its constituent companies unconditionally guaranteed as to principal and interest by the Dominion of Canada, or the aforementioned bonds and a certified cheque, if required to make up an odd amount.

By order, J. M. SOMERVILLE, Secretary.

Department of Public Works, Ottawa, May 19, 1944.

Porterhouse Steak

A popular version of its name origin is that a cook named Ann Remick served at the Porter House in North Cambridge, Mass., after the close of the Civil war, and acquired such skill in the preparation of steaks that the cut she served became known to gourmets as "porterhouse steaks."

It would seem, however, that the name has an earlier origin since it appeared in the London Daily Telegraph in 1894 when George Augustus Sala, a correspondent, referred to the porterhouse steak of America as "infinitely superior to our much vaunted rumpsteak." One authority claims the name was given a cut of beef traditionally served in saloons where porters gathered and where the brew, porter, was a specialty.

Boy's Summer Togs That are Practical and Economical

FRASERS

A. FRASER & SON

Right Now THE NEED IS DESPERATE

20,000 TONS OF WASTE PAPER ARE REQUIRED EVERY MONTH TO MAKE ESSENTIAL CONTAINERS FOR MILITARY SUPPLIES

WHAT IS WANTED

You can remedy this critical paper shortage by saving every scrap of Waste Paper, namely: wrapping paper—store bags—cardboard—cartons—corrugated board—old magazines and books—envelopes and letters—newspapers. These represent the raw material for making vitally needed Paper containers.

HOW TO DO IT

Tie securely in separate bundles. (The little time you take will save thousands of man hours.) Then dispose of it through your local voluntary Salvage Committee or other War Voluntary Organization, or sell it through any known trade channels, your pedlar, dealers or others. The important thing is your Waste Paper moving to the mills.

DEPARTMENT OF NATIONAL WAR SERVICES

Belgium Congo Treasure House for Raw Material

Founded as a free state in 1885 by King Leopold II, the Belgian Congo has an area 75 times as large as the mother country. Congo census takers could count more than 10 million noses, about a fourth above the figure for Belgium.

Most significant feature of the land is the Congo river and its branches, broken with falls and rapids but navigable for nearly 4,000 miles. Dense, dark forests cover an area of the upper basin as big as West Virginia. Rim of the basin tops 1,600 feet. Highland temperatures average 70 degrees Fahrenheit; lowland, 80 degrees. Mean rainfall is about 43 inches.

Copper plated, diamond studded, the Congo is a veritable war chest of vital materials. In the Katanga district the copper-bearing belt is 250 miles long, from 25 miles to 50 miles wide. Production has run 20,000 tons a year.

June-

The Month of Brides!

We specialize in Wedding
and Anniversary Gifts

Looking back through the years, many homes in this beautiful country have some treasured gifts that now adorn their home, which had its origin here, and made some former bride happy.

Gift Suggestions for Prospective Brides

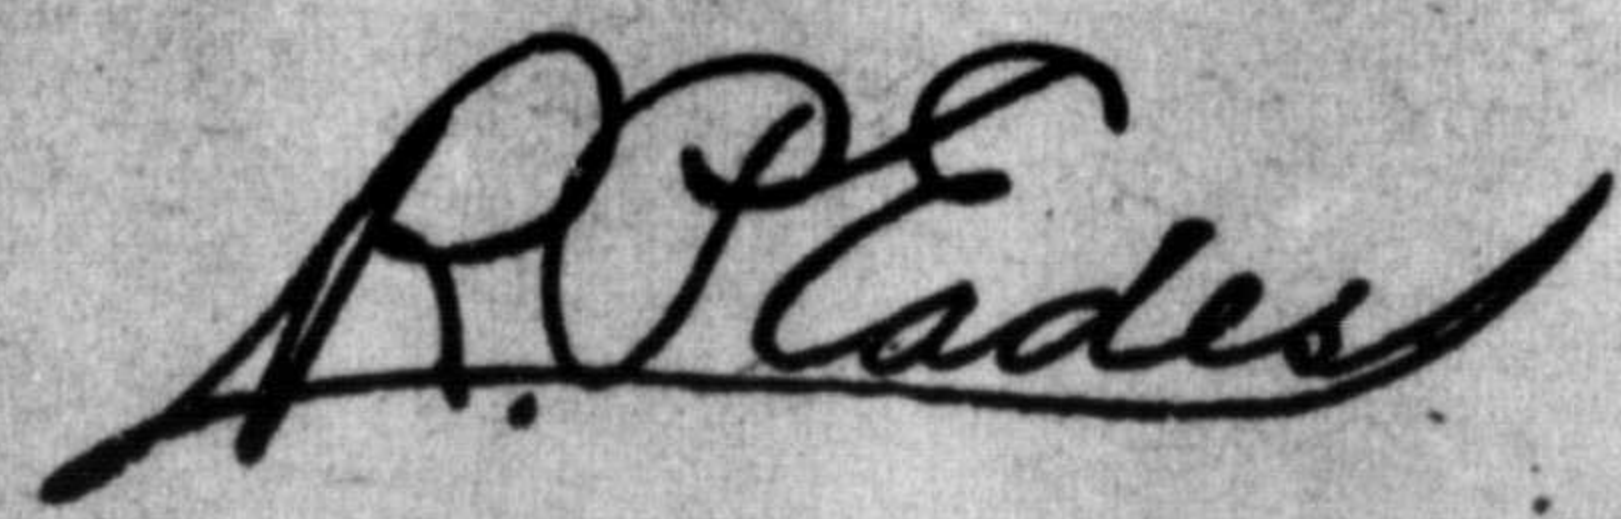

Livingroom Chairs, Coffee Tables, End Tables, Telephone Tables, Chesterfield Suites, Gate-leg Tables, Walnut Writing Desks, Breakfast Suites, Chesterfield Suites, Studio Couches, Royal Winton 36 piece hand painted set china, 26 piece Community Plate Silverwear, Bed Spreads, Blankets, Axminster Rugs, Smyrna Rugs, Congoleum Rugs, Dressing Tables, Napkins, Linen Table Covers.

SPECIAL

Seven-piece Knechtel Quality
Dining Room Suite
\$165.00

SPECIAL NOTICE

Beginning Wednesday, May 31st, this store will close every Wednesday at 12 o'clock, noon—until further notice.

It Pays to Feed the Best

Hogs fed on Chowmix Hog Starter, Grower Finisher will give you more profit per hog than those fed on so called cheap feed. These are balanced rations, developed through years of careful research and experimenting. We will be glad to show you facts and figures proving the soundness of feeding Hogs on these feeds.

For the flies we have Purina Livestock Spray; also Mosquito and Housefly Spray.

We have a limited number of Electric Fences, Sprayers and Chick Feeders.

Claim Nazi Flag Floats

On Highest European Peak

If the Nazi flag waves from Mt. Elbrus, as reported, it is a feather in the highest hat of Europe.

Twin-peaked, snow-covered and wind-swept, Elbrus rises 18,471 feet—more than 2,500 feet higher than the highest peak in the Alps. It is situated approximately 60 miles southwest of Pyatigorsk, a health resort in the northern Caucasus, and slightly farther northeast of the Black sea port town of Sukhumi.

Elbrus was one of the first of the Caucasus mountains to be mapped. Its summit was first reached by the famous English mountaineer, Douglas Freshfield, in 1868. A German scientific party explored the region in 1929, but since, the Russians, fearing espionage, have limited exploring to those holding official permits, and mountain climbing in the Caucasus has advanced very little. Many of the high peaks of the range, therefore, have never been scaled.

In peacetime the valleys and the slopes of the Elbrus were speckled with tents of Russian sports groups—students taking their training in first aid, map reading, and mountain warfare. Men in all walks of life from all parts of Russia took courses in mountain fighting in this region. Some of the defenders of the Caucasus may have had their training in the modern skiing schools and training camps in the Elbrus region.

TRAINMAN INVESTS IN VICTOR

Strength, in the driving wheels of a giant steam locomotive, and the strength of a man's faith in his country are illustrated in the above photo taken in the locomotive repair department at Canadian Pacific Railway Company's Angus Shops.

Charles E. Biron, in the repair pit, is pictured here as he paused in his work to sign an application exchanging his cash savings for \$2,500 in bonds of Sixth Victory Loan issue. Hugh Shea, instructor at Angus, is at left.

Mr. Biron has been an employee of the Canadian Pacific for 37 years, and has worked at Angus Shops since 1910. His skill at helping overhaul and condition Canadian Pacific locomotives has further helped the war effort on the transportation front.

Their minimum Sixth Loan objective placed at \$310,000, Canadian Pacific employees at Angus Shops were considerably "over the top" with \$327,850.

OTTAWA REPORTS

Nearly 60 Percent of Canadian Farm Families In Present Homes More Than 10 Years

Canadian farm families, generally speaking, stay put. Over a third of the Dominion's 703,000 farm households have occupied their present homes for more than 20 years, and nearly sixty percent for more than ten years. The Maritime provinces reflect the greatest stability with well over a third of the households having lived in present homes for over 30 years, and the average length of residence exceeding 20 years.

Nearly half of all farm homes in Canada are in Ontario and Quebec. A little over a tenth are in the Maritimes and approximately a half in the western provinces, according to figures of the last census just released by the Dominion Bureau of Statistics. Households average 4.7 persons for the whole of Canada, and except for Quebec number less than five. In Quebec fifty percent of the households number five persons or less and 98 percent include more than eight persons.

Hemlock bark, a primary need of the Canadian tanning industry, is now under a ceiling of \$14 a cord. This price includes cost of delivery unless when shipped by rail in which case the maximum price may be increased by the amount of actual railway charges.

Six additional types of new farm machinery and equipment which may be sold without permits are diamond, flexible and spring tooth harrow sections; cream separators; power sheep shearing machines and animal clippers, egg cleaners and brushes.

Canadians may now purchase

FOR SUMMER

THE WAR WEEK — Commentary on Current Events

Nazis Trying To Build And Man U-boats Faster Than They are Sunk

The Germans continue to make vague claims of U-boat successes and while the late Secretary of the U.S. Navy, Frank Knox, made the cautious statement that submarine attacks may be resumed, Admiral Ernest J. King makes the flat announcement that the German submarine fleet has been reduced from a menace to a problem.

The present fairly satisfactory state of affairs is in sharp contrast to conditions which existed two years ago, writes Capt. Frederick L. Oliver, in the Christian Science Monitor. At that time the U-boats insolently conducted raids in Atlantic coastal waters and sank ships within sight of the eastern seaboard.

German Theory

A mustering of hastily improvised antisubmarine measures aided by co-operation from British, Canadian, and Netherlands naval units, the Army Air Force, and planes from the Civil Air Patrol, succeeded in driving Nazi U-boats from the coastal waters and the Caribbean area by the fall of 1942.

Since that time the odds against the U-boat have steadily increased, and despite optimistic German propaganda, the plain unvarnished truth is that the German submarine campaign is, barring some now unforeseen development, doomed to failure.

Grand Admiral Karl Doenitz rode into power during January, 1943, on his theory that the Allies could be defeated by his plan of mass formations, commonly referred to as wolf packs, of submarines operating against the Atlantic supply routes.

New Allied Devices

For a time some measure of success attended the new German strategy, but the Allies brought into use new devices and methods of combating the U-boat, the most successful being airplanes from the escort carriers, better known as baby flat tops.

An occasional submarine foray will meet with success. There inevitably will be certain combinations of circumstances that will place a submarine in position to inflict damage, but the old days when a wolf pack ran wild up and down the flanks of or through a big convoy, are gone.

The Allied antisubmarine offensive which succeeded in disillusioning not only the German Navy but the Nazi Army as well, was a gem with many facets. The comprehensive scheme devised for preventing the U-boats from getting into position for attacking convoys extended over so wide an expanse of ocean, that submarines hundreds of miles from their quarry were attacked and forced under the surface.

In addition heavy airplane raids were directed at the facilities for building and basing U-boats. Not only were building yards devastated, but the inland plants where the manifold items entering into the construction of submarines were fabricated underwent sustained attacks.

Allied Ships Sunk

Furthermore, the sea areas which submarines must traverse in going to and from their bases are heavily patrolled by both surface ships and four-motored bombers which do not hesitate to attack both enemy U-boats and surface vessels.

There are no authoritative estimates of the number of submarines Germany has built, but the number has probably been in excess of the available well-trained crews. However, from time to time figures on ship and submarine sinkings have been released, more usually from British sources.

In March, 1944, the British Admiralty announced that U-boats in 1941 sank one ship out of every 181 clearing British ports and that in the last half of 1943 this ratio had fallen to one out of 1,000. A recent news release in the United States says that sinkings are only one half of 1 per cent, which is about the same as it was in 1918 after the then submarine menace had been mastered.

U-Boats Sunk

The British have stated that in 1943 200 U-boats carrying a personnel of some 9,000 were sunk.

Another authority puts the sinkings during the first four months of 1944 at 69 definite kills and 15 probables. If all 84 went down, the personnel involved would be about 4,200.

Information from reliable sources indicates that the heavy loss of U-boats has had an adverse effect on the morale of the German submarine service. If this report is correct, it means that the efficiency of their operation will be seriously affected, because in no other type of ship does successful functioning depend so completely on every member of the crew having absolute confidence in the other members.

Big Change in Situation

It is not so many months ago that the problem confronting the Allies was to build ships faster than the U-boats could sink them. Into this gloomy picture entered the enormous loss of valuable cargoes. Now the scene has shifted to the Germans trying to build and man U-boats faster than they are sunk.

Sugar Shortage Seen In 1945

Production Cut Everywhere, Writes Lawrence Sullivan In The Financial Post

A world sugar survey from one of the most reputable U. S. distributing houses indicates that Western Hemisphere supply next year probably will be shorter than during the current season, due to expanding lend-lease exports and smaller production in every area from which wartime supplies are obtained.

Shortage of manpower has curtailed production everywhere, and faltering U. S. beet production policies have resulted in a large decrease in prospective domestic sugar.

Only 54 Operate

Current figures disclose that the U. S. has 80 beet sugar mills, but that only 54 of them operated during the 1943 season.

In 1943 there was a curtailment of 25% in cane sugar production in Puerto Rico, closest sugar-producing area.

These two areas show a reduction of almost a million tons for the 1943 crop as compared with the previous year—and at a time when large cargoes are going abroad under lend-lease. Normally the U. S. does not export a pound of sugar. But under lend-lease it exported 208,000 tons in 1942. In 1943, exports were 471,000 tons. This year, says the Lamborn survey, they will reach 700,000 tons.

Must Boost Output

Sugar production in the United Nations area must be increased sharply next year if prevailing U. S. rations are to be maintained.

In pre-war years, roughly 40%

of the world's sugar came from areas now under Axis control. In 1938 world world sugar production was 29.5 million tons, of which 11.9 million tons came from Axis territories. Over vast sweeps of this area, particularly in the Pacific, cane plantations have been destroyed. The same applies to vast beet areas in Central Europe.

Water Buffaloes With Steel Hides Fight For Allies

Water Buffaloes are fighting on the side of the United Nations in the South Pacific, says the Christian Science Monitor.

They are not indigenous—but are an armor-plated breed credited as the hardest-hitting amphibious tank in the armed forces of the United States.

Shells fired from the 37-millimeter cannon carried in the revolving turret hit with an impact described by some observers as equivalent to the force of a 3-ton truck dropped from the height of a tall tree. They carry machine guns, too.

Of particular advantage is the Water Buffalo's versatility. It "swims" ashore from large boats, surmounting practically any barrier in its path, and knocking out Japanese installations, meanwhile protecting the troops that swarm in behind it.

On shore, the amphibians follow the infantry with supplies, ammunition, food, medical equipment, and water.

Sometimes Buffaloes are called into service as land tanks, and they make excellent substitutes for bulldozers.

Nazi Plane Quality Affected By Blitz

Effects of the Allied bombing on the quality of future German aircraft production may prove to be no less important than the effect on its quantity, according to a British Ministry of Economic Warfare spokesman.

The spokesman said so much damage had been inflicted on aircraft centers that the Germans probably had to abandon plans to manufacture improved types of aircraft in order to keep production at an adequate level.

A Forestry Quiz

For five or ten minutes of fun at your next get-together, try this "Forestry" game. Ask your guests to identify these trees:

- What tree is a fish?—Bass
- What tree is an animal?—Ewe.
- What tree is part of the hand — Palm.
- What tree is a covering for an animal?—Fir.
- What tree is a mineral used in building?—Lime.
- What tree is a handy container for shipping?—Box.
- What tree is a point of time?—Date.
- What tree is two of a kind?—Pear.
- What tree is a pestiferous insect?—Locust.
- What tree is a very ancient joke?—Chestnut.
- What tree is an officer in certain churches?—Elder.
- What tree's a Book of the Bible?—Joshua.
- What tree do you still have after you burn it?—Ash.

STEPPING UP?

Assistant Secretary of the Navy Ralph A. Bard, above, is considered a likely successor to James V. Forrestal, undersecretary recently nominated to be secretary of the Navy. Bard, former Chicago financier, at present has supervision over Navy shore establishments, labor relations and civilian personnel.

PRAYER BEFORE BATTLE

With dramatic effect, dawn breaks over the bow of a U. S. Coast Guard combat cutter protecting an Allied convoy as it enters the Atlantic war zone. Grouped in forecabin, under big guns, Coast Guardsmen pray and sing hymns in services conducted by the Navy chaplain.

Women Smoked In Gay 'Eighties'

"You'd be surprised," said a clerk in a James street cigar store, "at the number of girls, and more especially young girls, that come in here for cigarettes, yes, and cigars, too. I tell you what it is; there are more girls smoke in this town than you have any idea of. I don't see any harm in it myself; if girls want to smoke, for heaven's sake, let them—but they are so infernally sunning and secret about it that you'd think it was something real wicked they were doing. High-toned ladies do it. Of course, they don't come themselves; they either write or send their servants."
—"Sixty Years Ago" column in The Hamilton Spectator.

He Only Wanted Sweeties For Girl

It is comforting to know that the R.C.M.P. are right on the job, but occasionally they may be a bit too zealous. Take the recent case in a Western city. A Mountie entered a drug store and asked, "That soldier who was in here—was he after dope?" The druggist shook his head.
"Well," said the Mountie, "he's been in half a dozen drug stores along the street. He acts suspicious. That haggard, anxious look is a sign of wanting dope." The druggist laughed. "Sure the soldier is haggard and anxious," he said. "The poor fellow is afraid he will lose his girl if he can't sometime turn up with a box of chocolates, but no store along the street has any. This chocolate shortage is making things tough for young fellows engaged in wooing." — The Printed Word.

Berlin Must Be Occupied By Allies

The leaders of the British Commonwealth have agreed that Berlin must be occupied by Allied troops, reports Wilson Broadbent, political correspondent of the London Daily Mail. He says all plans for the invasion have been fully reviewed at the Dominions conference in London, and Allied scheme for the rehabilitation of Europe are now being examined.
One point the correspondent learns has been made absolutely clear: "In this second World War there will be no repetition of the great mistake made in the first. The Allied troops will march to Berlin and will occupy the German Capital."

A Favorite Meat Ball Recipe

Meat Balls are favorites with most families and it is the wise mother who has a special meat ball recipe tucked away to spring as a surprise. This particular recipe is almost sure to become a household favorite and bring calls for repeat orders. If you don't wish to serve the meat balls as the main course make them tiny and serve them as appetizers.

SWEDISH MEAT BALLS

- | | |
|----------------------------|------------------------------|
| 1 pound ground steak | 1 1/4 cups milk |
| 3 eggs | 4 cups Corn Flakes |
| 3 tablespoons minced onion | 3 tablespoons butter |
| 1 teaspoon salt | 1 cup milk |
| 3/4 teaspoon pepper | 1 tablespoon chopped parsley |
- Mix together meat, eggs, onion, seasonings, milk and corn flakes which have been rolled into fine crumbs. Form into balls. Fry slowly in butter about 30 minutes, turning only once.

SERIAL STORY

Murder on the Boardwalk

BY ELINORE COWAN STONE

Last week: Chanda warns Christine of her danger, but she rejects his advice. Later she meets Bill Yardley, coming up from the beach. She tells him the whole story. They return to her studio, find a crowd gathered there.

CHAPTER VI

Bill said, "Wait here. I'll run ahead and see—" "Wait nothing!" Christine objected. "Bill—" "But almost at once he was lost to sight in the crowd. From the Coast Guard tower a searchlight was swooping in great arcs over the water, picking out racing horses of foam, poising for a moment, then moving acquisitively on. Above Christine's head a motor snarled as a plane put out to sea.
An area of the walk had been roped off, and men in uniform were herding the crowd beyond the ropes—Bill among them. It did not occur to Christine that the ropes meant her, too; and no one seemed to pay any attention to her as she edged along the railing just behind powerful flashlights down into the two officers who were directing the excitement appeared to be below the level of the walk.

Suddenly a voice from the edge of the crowd called out, "There's that girl I was telling you about, Sergeant—right behind you. She was drawing pictures 'down there' this afternoon; and this evening I see her slip down again and come out reading a letter or something." Glancing toward the source of the voice, Christine saw that it was the flashily dressed proprietor of the shooting gallery across the Boardwalk.
"Stick around, Miss," the sergeant directed, turning upon her. "We'll want to talk to every one who works about here." Christine tried to make her voice crisply casual.
She peered down into the booth, but she could not see much at first except uniformed backs. Finally, as one of the policemen moved, she saw a man in a white coat bending over a figure on the concrete bench at the rear of the booth. Something unpleasantly rigid about the coat-sleeved arm and gloved hand at the edge of the bench convinced Christine that she didn't care to see any more.

An officer climbed into the booth from the beach below and reported to a man in plain clothes who seemed to be in charge, "There's the marks of two rowboats in the sand down there, Inspector Parsons—both made since high tide. One of the boats is there yet. No one seems to know anything about it."
"Any—signs in the boat?" "No, sir; but there's been a scuffle down there, and there's two sets of footprints coming up this way—only you lose 'em when they come to the dry sand... And the boys are bringing in one of them beachcombers. He tried to beat it when he seen us; and he tried to throw this away after we caught him."
A small object changed hands. "Well, Doc, what do you make of it?"
The inspector turned to the man in the white coat.
"Well," the doctor said, "the victim had been heavily and repeatedly drugged. There are marks of a hypodermic needle. But death was caused by a wound from a slender, pointed weapon... Found anything that answers that description?"
"We haven't found any weapon of any sort here."
The doctor said something that Christine missed; but which the inspector seemed to find of peculiar interest.

"How long ago?" he demanded sharply.
"I can't be entirely sure—but before rigor mortis set in. That might be two hours ago. Perhaps a little earlier."
Christine glanced at her watch. One-thirty. It had been almost 11:30 when she and Bill had come this way before.
At this moment Bill loomed at her side.
"Sorry," he murmured. "But breaking out of jail is easy compared with breaking in here... Say, this must be a Page One event! Half the Surf City police force seems to be here—not to speak of the press," he added as several flashlights went off near at hand.
"Hey—you!" The sergeant who had detained Christine turned beligerently. "Who told you you had any business in here?"
"My own chivalrous soul, officer," Bill answered smoothly. "This young lady is in my care. I'm taking her home."
"You are not. We want to talk to her."

At this moment several newcomers were admitted through the ropes: the man who had identified Christine, a newsboy, a waitress whom Christine had seen in the ice-cream stand next door, the resplendent doorman from the hotel across the Boardwalk, and finally—looking more than usually apologetic and helpless—Mr. Wilmet.
"My dear Miss Nevin!" Mr. Wilmet cried. "This is no place for you."
"It would be nice," Christine said, "if you could persuade the sergeant to take that view."
"Officer," Mr. Wilmet protested in his ineffectual way, "you surely don't need this young lady. I can tell you all about her. She is Miss Grace Nevin, a very accomplished artist who is in my employ."
Now he has ruined it, Christine thought. Because sooner or later they'll have to know my real name.
A deep, somnolent voice echoed in her memory: "You were very unwise to register under an assumed name... I see for you a very real danger."
"I own this concession," Mr. Wilmet was going on; "and I must say it's a terrible shock to have a thing like this happen here just as business was picking up."
"Well, now," the officer said with heavy sarcasm, "it's just too bad the poor lady couldn't have planned to get herself murdered somewhere else."
Lady! Christine thought blankly—and realized for the first time that the dark-clad figure she had glimpsed so sketchily might just as well have been a woman's as a man's.

It was at this point that a police ambulance rumbled down the Boardwalk and stopped. Men clambered down, lifted out a stretcher, and tramped down the ramp into the booth.
Inspector Parsons' head emerged above the railing.
"Now, Sergeant," he said, "before they move her, we'll find out whether any of these people know anything about her... Down here, please, all of you."
The newsboy was first to file by the stretcher; then, in order, went the doorman, the waitress, the man from the shooting gallery, Mr. Wilmet, and Christine—closely followed by Bill Yardley.
Christine kept her eyes averted from the stretcher until her own turn came. When at length she stood beside the body and glanced down, a violent fit of shivering wrenched her; and she turned abruptly away. One of the officers hastily opened the camp stool and eased her down upon it.
"Maybe I can help you, Inspector—" Bill Yardley spoke unexpectedly, his face paper white.

Quality counts most—for that rich, satisfying flavour which only a fine quality tea yields, use..

"SALADA" TEA

"This is Mrs. Emma Talbert, who owns a country home out Beachmont way."
"I was aware of that. We identified her by papers in her purse... Now," the inspector went on, glancing around, "how many of you were at your regular places of work between—say 11:15 and 1:30?"
The waitress had been, and the proprietor of the shooting gallery. Mr. Wilmet was nervously voluble about the fact that he had been attending a moving picture. Christine, shivering unbearably in spite of the warmth of the night air, shook her head mutely. The resplendent doorman had returned to duty at precisely 11:30.
Now he was staring at Christine with fascinated attention.
(Continued Next Week)

MOTHERCRAFT HEALTH NOTES

The Baby's Bed

It is of the utmost importance to make baby's bed properly, the aim being to exclude draughts and keep him warm, at the same time allowing freedom of movement.
A simple wicker cot, with or without stand, or a large clothes basket may be used. In winter time line head of cot with flannel or blanket. In summer, netting is used. Enveloping blanket or cotton sheet 70 inches by 44 inches should be placed over the empty cot. On top of this place a firm mattress with a bran mattress on top. The advantages of this place a firm mattress are: It makes a cool, hygienic mattress, easily renewed and the cotton cover boiled should it get soiled. It is inexpensive.
Cover mattresses with small blanket or cotton sheet, tucked in all around. Place a small piece of rubber sheeting across the middle—should measure 21 inches by 12 inches. Cover the rubber sheeting with a draw sheet 22 inches by 14 inches.
Place a small bran pillow in position, 10 inches—by 8 inches. Make a cosy hollow in the bran mattress and place the baby in this nest. Tuck his shawl or blanket around him well up at the back of his neck and around his feet; bring up one side of the enveloping blanket and tuck it in on the far side. Then bring up the other side of the blanket and complete the envelope by tucking in firmly all around. Slip your hand inside the envelope to make sure that baby has plenty of room to move around. An extra blanket or cover may be put on top. An excellent screen to use around the cot to avoid draughts is made from a clothes horse, trimmed with chintz.

TABLE TALKS

SADIE B. CHAMBERS

Request Recipes

For sometime request numbers have been accumulating, so I have decided to devote this week's column entirely to requests.

Seasonable Vegetable Loaf

- 1 cup whole wheat bread crumbs
 - 1 cup peanuts
 - 1/2 cup milk
 - 2 large boiled potatoes, chopped mealy (not mushy)
 - 4 good-sized carrots, grated
 - 2 medium-sized onions, chopped
 - 2 tablespoons parsley, chopped
 - 1 cup spinach, chopped
 - 1 cup celery, chopped
 - 3 eggs
- Add bread crumbs after soaking in milk to the mixed vegetables. Add seasoning of salt, pepper, 1/2 teaspoon sage, and slightly beaten eggs. Blend well and pack combined ingredients into a greased loaf pan. Bake in moderate oven (350 F) 1 1/2 hours or until loaf is firm and the top golden brown. Serve with tomato or mushroom sauce.

Sunday Pie

- Line pie plate with rich pastry.
Mix and sift:
1 cup sugar
1/2 teaspoon salt
1/2 teaspoon cinnamon
1/2 teaspoon nutmeg
Dash of cloves
Add 3 well-beaten egg yolks and 1 cup sour cream. Mix well. Sprinkle a little flour over 1 cup

of finely chopped raisins (seedless) and add to the mixture. Pour into pastry lined pie plate and bake in moderate oven until custard is set. Top with meringue made with the egg whites, adding a little cinnamon. Return to oven until meringue is delicately browned.

Meat Loaf

- 1 1/2 lbs. ground meat
 - 1/4 lb. veal
 - 1/4 lb. fat salt pork
 - 1 medium-sized onion
 - 1 green pepper
 - 1/2 teaspoon paprika
- Put the meat, veal and salt pork through the meat grinder together. Add onion and green pepper (finely chopped), egg (well beaten), bread crumbs, minced parsley and seasonings. Mix all together thoroughly. Then make into form of a loaf, place in greased pan and bake (400 F) for 45 minutes. Serve hot with gravy from juices in the pan. It is delicious cold.

Miss Chambers welcomes personal letters from interested readers. She is pleased to receive suggestions on topics for her column, and is always ready to listen to your "pet peeves." Requests for recipes or special menus are in order. Address your letters to Sadie B. Chambers, 73 West Adelaide St., Toronto. Send stamped self-addressed envelope if you wish a reply.

Young, individual detail gives a vivacious air to Pattern 4618, a frock you'll run up in jiffy time... to wear smartly now, and with its coming coolness when the sun takes its duties seriously. Ideal style for cotton or linen as well as firm rayon sports fabrics.
Pattern 4618 is available in misses' and women's sizes 10, 12, 14, 16, 18, 20, 30, 32, 34, 36, 38, 40, 42. Size 36 takes 3 yards, 35-inch. Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern, to Room 421, 73 Adelaide St. West, Toronto. Write plainly size, name, address, style number.

STEADY NERVES ARE A BIG HELP TO GOOD LOOKS

How in the world can a woman have charm and poise if she feels "all wound up" with nervous tension? On the other hand... calm, strong nerves actually give a woman poise and quiet nerves take the hand, tense look from her facial muscles. If nerves bother, treat them with rest, wholesome food, fewer activities, plenty of sunshine and fresh air. In the meantime take a nerve sedative... Dr. Miles Nervine. Nervine has helped scores of women who suffered from overtaxed nerves. Take Nervine according to directions to help relieve general nervousness, sleeplessness, nervous fears and nervous headache. Effervescent Nervine Tablets are 35c and 75c. Nervine Liquid: 25c and \$1.00.

IT'S WORTH A PATCH

The material around a tear is often so thin that a patch is better economy than a darn. Cut the fabric to a square or oblong with the thread and trim off the weak part. Clip the corners so they may be turned under. Pin the patch material under the opening, matching the grain both lengthwise or crosswise. Turn under the raw edges of the hole and hem to the patch. Now turn on the wrong side, turn the edges of this patch under and sew it down to the garment.

NOW - VITAMIC RUBBER

FIRESTONE'S GREATEST CONTRIBUTION TO LONG TIRE LIFE AND MILEAGE

Firestone, pioneers of the balloon and high-speed tires, now make another contribution to advanced motoring... VITAMIC RUBBER... for longer tire life and mileage.

It is a well-known fact that adding small amounts of metals, such as chromium and tungsten, to steel greatly increases the strength and durability of the alloy produced.

In a similar manner, it has been found by Firestone research that the intimate mixing with rubber of small amounts of a new scientific discovery, "Vitalin," imparts long-sought properties to the rubber. As in the alloy steel, the new rubber compound... VITAMIC RUBBER... is greatly improved in strength, wear-ability, and resistance to heat and aging.

All Firestone tires are now made with Vitamic Rubber. This added extra value, together with Gum-Dipping and Safety Locked Cords, is all the more reason why you should insist on Firestone tires when you obtain a Tire Ration Permit.

VITAMIC RUBBER is produced by adding Vitalin to the rubber compound. It gives extra protection against weather checking and wear, thus keeping the rubber tough and lively.

Firestone Gum-Dipped TIRES

SALVAGE EVERY SCRAP AND LET HITLER TAKE THE WRAP

20,000 TONS OF WASTE PAPER ARE REQUIRED EVERY MONTH FOR VITAL WAR NEEDS

NOTICE

As we are not responsible for loss of garments through fire or theft. All goods left with us for dry cleaning must be called for within one week after returning from dry cleaners.

BRYSON NEWS

Mr. and Mrs. Vernon Matthews and son, and Mrs. Hubert Hall and children, of Gananoque, Ont., spent the week-end at the home of their sister, Mrs. Wilfred Riebetz, of Bryson, and on their return were accompanied by their mother, Mrs. A. Stanley, who will spend the Summer in Gananoque.

Mr. and Mrs. Lawson Stanley, of Kinburn, Ont., spent the week-end at the home of his sister, Mrs. W. Riebetz and mother, Mrs. A. Stanley.

IN MEMORIAM

HODGINS—In fond and loving memory of a dear husband and father, James Davis Hodgins, who passed away June 7th, 1938.

Time takes away the edge of grief; But memory turns back every leaf.
Wife and Family

HODGINS—In loving memory of Mr. E. Samuel Hodgins, who passed away June 4, 1942.

A silent thought, a silent tear, Keeps his memory ever dear.
Sadly missed by
The Family

RUSSELL—In loving memory of dear mother, Esther M. Russell, who passed away June 9, 1942.

God knew that she was suffering That hills were hard to climb, So he closed her weary eyelids, And whispered, peace be thine. Away in the beautiful hills of God, By the valley of rest so fair, Sometime, someday, we know not when, We will meet our loved one there. Sadly missed and ever remembered by
The Family.

CARDS OF THANKS

We desire to thank our neighbours and friends for their many acts of kindness and words of sympathy to us in our recent sad bereavement.

Mr. and Mrs. Hartley McMillan
Parents,
Mr. and Mrs. Gordon Smith,
Grandparents.

Indians Developed Sign Language for Talking

The great treeless expanse stretching westward from the Missouri river to the Rockies and southward from the Fraser river to the Rio Grande provided a spacious stage for the development of free-arm signaling between Indians. Tribes of many stocks roamed the broad flat lands, waged wars, spread over new territory. A universal means of inter-communication was needed.

For inter-tribal messages the hand served the need better than the tongue. Sign language enabled Indians even at the geographic extremes of the region to talk with one another. A Sioux and a Comanche could discuss their affairs with the greatest of ease. Kiowas, Cheyennes and Crows were most adept, made their silent meetings occasions of grace as well as greeting.

Signs were made with one hand or both. Originally they required close reference to the shape, habit or purpose of the subject matter. In time they advanced from the picture idea to fixed symbolism. The "vocabulary" was enriched with local variations of its basic gestures until it was equal to the making of a treaty, the recital of myths and legends, and the telling of hunting exploits and brave deeds.

Are You Making a Will?

If so, and it is your wish to identify your name with some charitable institution out of a desire to benefit others, you could not do better than remember THE PONTIAC COMMUNITY HOSPITAL when making your bequests.

NOTICE

Hayes' Beauty Parlour will close Monday evening; all day Wednesday and Friday evening, of each week until the last of September.

Symptoms of Tick

Tick fever has a usual incubation period of from four to eight days, the extremes being two to twelve. The initial manifestations of the disease resemble those of any fever illness, there being discomfort, headache, loss of appetite and chilly sensations. These vary in degree, lasting an average of two or three days. The disease usually has an abrupt onset, initial symptoms often appearing in the late afternoon or early evening. There is a definite chill, pronounced frontal headache and severe aches and pains in the muscles, bones and joints, the latter being more pronounced in the back and lower extremities.

I had a nightmare...

I dreamed that I paid \$5.00 for a haircut and \$50.00 for a pair of cardboard shoes. I dreamed that we had no wartime controls on prices, profits or wages, and that we hadn't had the sense to organize the distribution of supplies all the way down the line...

I dreamed that because everyone was making more money and spending it, prices were skyrocketing.

all the stores looked like "fire" sales... with people scrambling to buy before prices went still higher...

panicky people were buying things they didn't need, and hoarding everything they could get their hands on...

I dreamed that everybody had to fight to get more money... and that in this mad race, wages and salaries were falling behind.

I dreamed the hand of everyone was against his neighbour, with each of us blaming the other fellow for his troubles.

with everybody for himself... no matter what it cost in the long run... and no matter how it hurt the war effort.

THEN... THANK GOODNESS - I WOKE UP!

to realize with relief that I live in a country where things are sane and stable... where the cost of living has been kept within bounds.

to realize that prices and wages—production costs and selling prices—are inseparably linked together.

to realize that without the safeguards that have headed off inflation, my nightmare might have become a reality!

to remind myself that the danger is still pressing and that we must continue to hold firm... and that means everybody must play fair and do his part by not trying to get some temporary, fancied advantage at the expense of his fellow-Canadians.

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing further increases in the cost of living now and deflation later.

Tenders to be in the hands of the Secretary-Treasurer not later than ten days after date of this notice. Certified cheque of 10 per cent. to accompany tender. Lowest or any tender not necessarily accepted.

HILLIS HAMILTON,
Secretary-Treasurer
Quyon, Que.

Confucius Advocated Spectacles

Confucius, who is reputed by the Chinese to have been the inventor of spectacles, is said to have taken a pair of shoes to a cobbler for resoling (just as American men now take their shoes for tapping after giving their ration coupons to their wives). When Confucius called a few days later the shoes were unfinished. The cobbler and his wife had quarreled and she had thrown red pepper into his face, which had so inflamed his eyes that he could not do his work. Confucius gave the cobbler a pair of spectacles to wear, the legend goes. These not only overcame the effects of the red pepper, but they also cured him of a squint he previously had.

SAVE YOUR TIRES
DUNLOP Cable Cord **TIRES**
Lord

WITH THEIR FAMOUS PRE-WAR TREAD DESIGNS, ARE NOW OBTAINABLE IN SYNTHETIC RUBBER BUT ONLY FOR ESSENTIAL WARTIME SERVICE.

© All the best and newest developments in synthetic rubber are incorporated in Dunlop S3 Cable Cord Tires. But remember, tires will not be plentiful in 1944. So keep driving inside the prescribed speed limit... cross-switch your tires occasionally... keep them properly inflated... and, above all, have your tires regularly checked by a Dunlop dealer.
