QUEBEC, MAY 8, 1856.

☞ SEE FOURTH PAGE.

It is regarded, at last, as a settled fact, that the project of a North Shore Railway is to receive the aid and countenance of the Provincial Government. The Hon. Mr Cauchon has declared from his place in the Legislative Assembly, in reply to some very natural inquiries on the subject, that it was the intention of Government to aid the North Shore Railway from Quebec to Lake Huron, by a grant of lands through which the road would pass. We might have been acquainted ere this with some outline of the plan, but Mr. Cauchon did not succeed in getting his Bill read a first time for want of due notice. From private despatches we learn that four millions of acres will be granted for Railway purposes, out of which a million and a half will be allowed for the construction of the line between Quebec and Montreal. On this understanding the Ministerial proposals for the relief of the Grand Trunk will not encounter the threatened opposition from the promoters of the North Shore Railway and others, provided that the prolongation of the Grand Trunk line to Trois Pistoles be kept in view, together with some other subsidiary points. But on such minor details and rumored conditions we care not now to dwell, it is of so much more prominent importance to Quebec at length to learn that there is a probability of a North Shore Railway being forthwith constructed between this city and Montreal. Full credit should be given to the representatives of the people of these parts for their persevering determination to secure public aid in behalf of a work so eminently calculated to promote the public welfare of the whole Province; and still greater credit is due to those by whose prudence the exertions of all have been guided to so satisfactory a result. The nature of the proffered aid is not to be despised; the Illinois Central Railroad has been constructed on similar principles, and hitherto with very satisfactory progress, opening up also a valuable back-country on both sides, and connecting roads branching off in all directions. The grant forms a solid guarantee to stockholders from the very commencement; it is something tangible and solid to start with. We are not of the short-sighted opinion, that a line on the North Shore will injure the progressive success of that already constructed on the South; on the contrary, we maintain that the two lines will mutually promote the trade and traffic of each other. Without the North Shore Line Quebec during the greater part of the year, is still a cul-de-sac; and the portion of a railway leading to such, scarcely ever succeeds. Let a circuit be completed by having a line on both sides, embracing, of course, widely different and extensive districts, and one chief cause of stagnation will be removed. The good folks in this quarter have waited long and patiently, but their their patience has been at last exhausted; and yet they must not now imagine that their object is attained; there has only occurred a chance of undertaking the work with some hope of success. No Ministry, however, can in future look for assistance from the representatives of the people in this quarter without giving solid proof of their sincerity in forwarding the great favorite enterprise on the Northern Shore of the St. Lawrence; the people will no longer be balked by the fair words of their representatives nor the procrastinating promises of the Executive. Nor is it more than an act of the merest justice; other Railway projects have been favored with the aid and patronage of Government, and some of these have received every indulgence and attention sought for. When therefore they appeared, after all, still soliciting public assistance, it was indeed time that the claims of the North Shore should be efficiently maintained. Fair advantage was taken of the crisis, and the reasonableness of the demand was irresistible.

Arrival of the Steamship "North American."

FOUR DAYS LATER FROM EUROPE.

The Canadian Mail Steamer NORTH AMERICAN, with dates from Liverpool to the 23rd ult., arrived off this port about 6 o'clock yesterday evening. The news is four days later than was received by the PERSIA, so that by this arrival the Continent has been put in possession of the latest European intelligence,—via the St. Lawrence.

Yesterday morning, the telegraph announced that the NORTH AMERICAN had passed Kamouraska, and it was expected her advices would be transmitted immediately.—This expectation was, unfortunately, disappointed, no provision having been made by the steamer for landing a summary of the news either at Kamouraska or River du Loup,—although the B. A. Telegraph Company's operators had made every arrangement to receive and forward a report. We shall not however, for this, attribute remissness to any one connected with the NORTH AMERICAN. We are thankful to know that the Government has secured the services of a splendid line of steamers, which will hereafter furnish us fortnightly with the latest news from Europe, without any indebtedness to the Americans. Perhaps, had a wharf been built at Bic, this pioneer of the Canadian Mail Steamships would have stopped there, and thus given us her intelligence still earlier.

The steamboat "Brothers," chartered for that purpose by Messrs. G. B. Symes & Co., Agents in this city for the Montreal Ocean Steamship Company, proceeded some distance round the Point to meet the NORTH AMERICAN, and accompanied her into port. By this means the representatives of the Press, Telegraph Companies, and others, got on board the steamship and secured budgets of newspapers. The writer has to express his thanks to Messrs. Allan & Gillespie, owners of the vessel at Liverpool, for a packet of the latest London and Liverpool papers, and to Capt. Grange and the Purser for their courtesy in affording him every facility for obtaining necessary information.

We have compiled a summary of the principal items of news, which we give below.

The NORTH AMERICAN has made an excellent passage for the season. She left Liverpool at 11 30 A. M., on the 23rd April, and an hour after passed the U. S. Steamer Atlantic. On the 1st May she saw numerous ice bergs and field ice in lat. 45 40, long. 47 16. Passed the ship "Joseph Brown," of Liverpool, off Cape Ray, on the 5th inst., and exchanged signals with the CAMBRIA, at 11 25, on the 6th inst. Inside of St. Paul's she passed the ship "Joseph Rowan,"—the "Cambria," off the Magdalen Islands,—the "Caledonia," (supposed) off Green Island,—the "Toronto," off the Brandy Pots,—and a ship, the name of which was not made out, off Point des Monts.—Boisterous weather, encountered about the 1st instant, has somewhat protracted the NORTH AMERICAN's voyage; but when it is considered this, her first trip across the ocean, has been made at a season when vessels cannot take the shortest course, all must admit she has made a fast passage. The "Dumbarton Herald" thus describes this steamship:—

The North American, as we formerly intimated, is 1760 tons register, and her engines (by Messrs. Tulloch & Denny) of 300 horse power nominal. In keel and forerake she measures 275 feet, but so finely is she proportioned in every respect, that her extraordinary length of deck excites even less wonder than the long rows of sleeping apartments beneath. She is fitted up to accommodate 78 first class, and 23 second class passengers, and as these berths all run from the stern forward, the half of them can be taken in at one view when standing in the larboard or starboard passage. The fittings up in both these classes are neat and commodious, and such as would make an Atlantic voyage comfortable to persons of even a nervously sensitive temperament. In the ladies sleeping saloons, especially, the result attained by the skill of the different craftsmen is elegant in the extreme, the places being more like some dwelling in fairy land than one of the compartments of such a common-place thing as a screw steamship. On deck there is a saloon that, for size, comfort, and elegance, surpasses anything of the kind ever attempted. The dining apartment alone measures 60 feet long, by 18 feet broad, and exclusive of these, there is also connected with the saloon a large wheelhouse, heated and lighted, a smoking apartment, a steward's room, furnished with every requisite necessary for such a functionary, and two rooms to be occupied by the chief officer and chief engineer, respectively. If the sleeping berths below are suggestive of coziness and quiet, the saloon above partakes in an equal degree of luxury combined with opportunities for enjoyment. Indeed it is hardly possible to say what one most admires in this sumptuous apartment, the North American sketches by Messrs. Ballantyne and Allan, Edinburgh, the general fittings up carried out under the watchful eye of Mr. P. Gregor, the foreman joiner, the upholstery work executed by Messrs. Wylie and Lockhead, Glasgow, the painting by Mr Ballardie, Dumbarton, and the grotesque carvings by Messrs. Kay and Shank's, being each in their own way unsurpassed. Proceeding forward we come upon the cooking-house, fitted up in a manner corresponding with the other portions of the vessel, and an ice-house, lined with lead charcoal, where ice, fish and vegetables can be kept in all seasons. Near to this is also a large patent filterer for transforming sea water into fresh, should the latter by any accident run short. Descending the hatch at this place, we come upon the apartment fitted up for third class passengers, and in which no less than 17[illegible] will be able to find good accommodation. In this quarter, but well portioned off, are the store rooms of the vessel, racks for any quantity of lemonade, shelves for groceries, bunkers for potatoes, and the rougher class of vegetables. In the fore-castle are the berths and mess rooms of the crew, both roomy and comfortable. As a further evidence how much the comfort of the passenger has been studied in the designing of the vessel, we may state that nearly the whole of the water-closets fitted up in her are of the description recently patented by Mr McGregor, and which, we have no doubt, will be soon generally adopted.

[LATEST TELEGRAPHIC INTELLIGENCE.]

RUSSIA.

The militia is disbanded. The Admiralty has ordered all the lighthouses to be lit, and all the buoys to be laid down in the Gulfs of Bothnia and of Finland and in the Baltic and White Seas.

FRANCE.

The army is being placed on a peace footing.

LONDON.

The Times has a leader on the grandeur of the naval review which takes place this day. There will be 240 steamers of various sizes, carrying 3,002 guns, propelled by 30,671 horse-power, and manned by 30,000 men.

COMMERCIAL.

Consols closed on Tuesday at 93 money, and 93¾ ¼ for May 8th. The final payment of the consol loan and exchequer bill funding, amounting together to one million and fifty thousand pounds, falls due on Thursday.

In Paris, on Tuesday, funds closed 74 30 money, and 74 35 for the end of the month, being nearly ¼ lower.

There is still no profit on the transmission of gold either way between England and the United States.

The Globe states that Lord Clarendon has declined the honor of a Marquisate, offered to him by her Majesty.

DESPATCHES FROM GENERAL CODRINGTON.

The *London Gazette* contains despatches from General Codrington, dated the 7th and 8th instant, with enclosures.

General Codrington forwards a letter from Prince Bebatoff, at Tiflis showing that General Williams had recovered, so that it was not necessary for Dr. M'Ilree to go to Tiflis; nor did the Russians seem to have wished that he should pass their lines. The armistice was established in Asia. General Codrington speaks in the highest terms of Dr. M'Ilree's services.

Dr. Hall reports the sanitary condition of the army of the week to the 7th as very satisfactory. The ratio of sick had not increased but the weather had been sometimes very severe.

TURKEY.

The Paris correspondent of the "Times" (second edition) writes:—"I omitted to mention yesterday that the treaty of peace with Russia contains a clause to the effect that the allies shall evacuate the Ottoman territory on the exchange of the ratifications. It is meant, no doubt, that the order shall be then formally given, and that the evacuation shall take place as soon after as possible."

A letter from Constantinople states that the army of Omar Pacha will be formed into moveable columns, commanded by Colonels. These will scour the country, and enforce the execution of the new laws. This measure appears to have been suggested by France.

THE PRINCIPALITIES.

A letter from Vienna, in the "Borsen Zeitung" of Berlin, says that the commission for the organisation of the Principalities will commence its labors in the course of this month, and that whilst Austria nominates to it Baron de Koller as diplomatic member, General Count Coronini will be the military one. It was believed at Vienna, adds the letter, that M. de Fonton, whose early arrival was expected, will represent Russia on the commission.

ENGLAND.

On Monday, in the House of Lords, the Earl of Albemarle presented a petition from the European, the Chinese, and other Asiatic merchants of Singapore, remonstrating against the introduction by the Government of India of a new system of currency.

The second reading of the Church Discipline Bill was moved by the Lord Chancellor, who said that the object of the measure was to improve the administration of the Ecclesiastical Courts. The Archbishop of Canterbury strongly objected to the bill as destructive of the independence of the church, and as uncalled for interference. After a discussion, in which the Bishops of Derry, Exeter, Bangor, Cashel, and Oxford took part, the Lord Chancellor replied and the House divided, when there appeared—For the second reading, 33; against, 41; majority against the Government, 8.

In the House of Commons, on Monday, a conversation took place on the subject of the peace rejoicings. Mr. Roebuck inquired who was to pay the expense of the contemplated exhibitions of fireworks in the parks? The Chancellor of the Exchequer replied that the whole of the expenses would come to within the sum of £8000.

Sir George Grey in reply to Lord J. Manners, said that notwithstanding the display of fireworks and other demonstrations it would still be open to Parliament to question the terms of peace and to impeach the Government, if it was thought necessary to do so. Mr. Thomas Duncombe deprecated the extreme folly of devoting three or four days to a show of fireworks. The public looked at such rejoicings with apathy and contempt, because they believed that, had proper precautions been taken, no war would have taken place; that the war had been commenced with insincerity, and prosecuted without vigour; that Russia had obtained better terms than she was entitled to, and that other objects which the people had at heart (the restoration of Poland and Hungary) were further off than ever. Mr. Bentick said that the rejoicings were premature. After some remarks from Mr. W. O. Stanley and other members, the subject dropped.

The Earl of Clarendon arrived at his residence, Grosvenor-crescent, about half-past seven o'clock on Monday evening from Paris. It is said that a step in the peerage has been most graciously offered by the Queen to the noble earl, and respectfully declined by his lordship.

The military inquiry in the Crimean Report was continued on Monday. The principal witness examined was Admiral Sir E. Lyons who stated that while in command of the Black Sea fleet, he was never applied to for canvass to shelter the horses, and he had never heard of such an appeal being made to the fleet until he entered that room. He could not admit it to be possible that Lord Raglan would ask for canvass to cover 2000 horses, as his lordship knew that the fleet, in addition to landing a large number of sailors, marines, and carpenters, had already supplied as much canvas as could be spared before the 14th November for the use of the naval brigade. He never had 15 line-of-battle ships under him. The average number was 7; and the greatest number at any one time 11. The fleet underwent very considerable dangers in the Black Sea, and could spare no more canvass than it did spare. Major Connolly was briefly examined, and this closed the evidence in Lord Lucan's case. The Court then adjourned till Friday.

ON DITS AT COURT.—It is said that the Earl of Elgin having refused the government of Victoria, the important appointment has been offered to Mr. Oliphant, who filled the office of private secretary to his lordship when Governor-General of Canada. Viscount Sydney is to succeed the late Earl Cowper as Lord Lieutenant of Kent.

Viscount Palmerston and Earl Fortescue are to have the vacant garters.

The "Court Journal" says that the entrance of the Guards into London will be made the occasion of the first distribution of the new Order of Valour—"The Victoria Cross"—with which it is likely her Majesty will, in person, decorate the soldiers of those regiments who may have been previously declared entitled to the honour.

CHANGES AT THE HORSE GUARDS.—It is confidently believed in military circles that Lord Panmure, the Secretary of State for War, and Field-Marshal Lord Hardinge, Commander-in-Chief, will resign their appointments soon after the breaking up of the Military Court of Inquiry.—(United Service Gazette)

THE EAST.

The last mail from the East states that the insurgents against the Porte in Arabia have suffered so much from cholera as almost to put down the insurrection. The reports affirm that 13,000 have died out of an insurgent tribe of 45,000.

Letters from the camp in the Crimea have been received to the 8th instant. The preparations for the departure of the army continue actively, and already several hundreds of the Army Water Corps have been shipped at Balaclava, and have gone on their way homewards. It is said that the Guards are to be the first to embark at Balaclava for England. The troops at Kinburn, Eupatoria, and Kertch will leave immediately. A system of passes has been organised to facilitate the communications between the Russian and the Allied armies. Large numbers of Russians visit the English camp, indulge, very freely in liquor, and are soon staggering about in all directions.

The correspondent of the *Morning Herald* says—

"Russians are now seen all over the camp of the Allies, riding along our roads, making purchases at Little Kamiesch, dining with us, and sleeping in our huts. The Commandant of Bilboquet breakfasted yesterday with the Zouaves, five of which corps had the day before paid a visit to that battery. The theatre at Kamiesch on Sunday was well attended by Russian officers. At head-quarters some "notables" have dined with General Codrington, one of whom is said to have been Luders himself. The French held a grand review the day before yesterday of the first and second divisions, near Traktir; and here again there was a large muster of Russian officers."

It is calculated that the Russians fired about 30,000 tons of iron at the armies of the Allies before Sebastopol. It is certain that we gave them about 11,000 tons in return, and possibly the French fired about 20,000 tons; so that between 60,000 and 70,000 tons weight of iron must be lying about on the plateau before Sebastopol.

By telegraphic despatches we learn that the King of Prussia ratified the Treaty of Peace on Friday last, and that the Turkish ratification left Constantinople on the 14th ult.

We learn from St. Petersburg that by an Imperial order the army is replaced on the peace footing. The troops in the Crimea are hereafter to form two armies—one under the command of General Gortschakoff, and the other under that of General Luders.

A despatch from General Pelissier, dated Sebastopol, April 18, is as follows:—"Yesterday I reviewed the entire army of the Crimea. General Luders, a considerable number of Russian officers, Generals Codrington and De la Marmora were present at this military *fête*. The epidemic has ceased in the Crimea."

The following details have been brought by the Danube:—

The *Presse d'Orient* affirms, that the Hatti-Humayoun relative to the Christians is not inserted in the treaty of peace. The Plenipotentiaries, says that journal, confine themselves to mentioning the importance of that act. It adds, that the cessation of occupation is formally stipulated.

Ten ships of the line and six frigates had been sent to Kamiesch.

The Russians were making large purchases at Kamiesch.

Arif Bey arrived at Constantinople on the 9th with the text of the treaty of peace. A Council of Ministers was held next day to proceed to the ratification. The son of Faud Effendi was to leave on the 14th, bearer of the ratified treaty.

More disturbances had taken place at Kutaya and Tokat, attributed to the newly introduced reforms.

To accelerate the evacuation, a portion of the English fleet originally intended for the Baltic was expected at Constantinople. The papers state that two regiments of English cavalry would leave in May for the East Indies, and that two divisions, under General Campbell, would be sent to Canada.

RUSSIA.

We have received the following telegraphic despatch from our Berlin correspondent:—

"BERLIN, Tuesday, April 22.—The Russian militia is disbanded.

"The Admiralty has ordered all the lighthouses to be lighted and all the buoys to be laid down in the Gulfs of Bothnia and Finland, and in the Baltic and White Seas."

The "Independence Belge states positively that more discussions upon the Italian question have taken place in the Conferences. At the last sitting, Russia and Austria maintained that every Sovereign has a right to call in the aid of another power, and to retain that aid as long as he chooses, without consulting the wishes of other States. England and Piedmont maintained a contrary opinion, and so lively was the debate that Lord Clarendon, it is asserted, allowed an expression to escape him when speaking of Austrian policy, which is not likely to find a place in the *proces-verbal*. He described it as "an infernal policy."

By British and Submarine Telegraph.

St. Petersburg, April 21.—Count Orloff is appointed in the place of Prince Schernalscheff, President of the Council of State and of the Council of Ministers.

The government has authorised the exportation from Russia and Poland of sheep skins, meat, oxen, horses, pigs, brandy, spirits, ropes, tissue and hay.

IMPORTANT SPEECH OF THE CZAR.

The "Constitutionel" publishes a long letter from Moscow, dated 11th of April. We extract the following:—

The Emperor has arrived quite unexpectedly at our city, accompanied by the Grand Dukes Constantine, Michael, and Nicholas, and a numerous staff. Their reception was most enthusiastic. This morning the Emperor gave audience to Count Zakrewski, the military governor. Deputations from the nobles and from the civil and military authorities accompanied him. When all these persons had formed a circle round him, the Emperor addressed them as follows:—

"Gentlemen,—The war is over; for I ratified the treaty of peace which had been signed at Paris before I left St. Petersburg. I am happy to be able to announce the news to you officially, and to repeat to the nobility of Moscow the words which I addressed to my people in my last manifesto. Russia was able to defend herself for many years to come, and I believe that, no matter what forces were brought against her, she was invulnerable on her own territory. But I felt that it was my duty, in the real interests of the country, to lend an ear to proposals compatible with the national honour. War is an abnormal state, and the greatest successes obtained by it scarcely compensate for the evils it occasions. It had caused an interruption of the commercial relations of the empire with most of the States of Europe. I should certainly have carried it on had not the voice of neighbouring States pronounced itself against the policy of late years. My father, of imperishable memory, had his reasons for acting as he did. I know his views, and I adhere to them from my very soul; but the treaty of Paris has obtained the object which it was his ambition to obtain, and I prefer this means to war.

"Many of you, I am aware, regret that I should have so readily accepted the propositions made to me. It was my duty as a man, and as the head of a great empire either to reject or accept them frankly. I have honorably and conscientiously fulfilled that duty. I am sure that allowances will be made for the difficult position in which I was placed, and that shortly every devoted friend of Russia will render justice to my views and intentions for the welfare of the country.

"Supposing the fate of arms should have remained constantly favourable to us, as it has been in Asia, the empire would have exhausted its resources in keeping up large armies on different points, the soldiers of which would in a great measure be taken away from agriculture and labour. In the government of Moscow itself many manufactories have been compelled to close. I prefer the real prosperity of the arts of peace to the vain glory of combats.

"I have thrown open the ports of Russia to the commerce of the world, the frontiers to the free circulation of foreign produce. I wish, henceforth, that the greatest facility shall be afforded in our markets for the exchange of ware of every origin, and of the raw materials and manufactures of our soils. Various projects will shortly be communicated to you, the object of which will be to give an impulse to home industry, and in which, I trust, every nobleman will take a share."

The Emperor, who spoke at considerable length, and with some emotion, was listened to in religious silence. His Majesty omitted nothing—neither the plans for projected railways, nor for the river navigation, nor for the roads, nor for custom house reforms. The ministers of the interior and of finance have received formal orders from his Majesty to do away with all obstructions in the way of commerce. The frontier traffic is already open, and vessels are arriving at all our ports. The export of precious metals is alone still suspended, and this is explained by the scarcity of gold and silver in the public treasury.

The Emperor was everywhere received with the most profound respect. A grand review was held at Moscow. His Majesty visited various manufactories, and gave orders respecting his coronation, which will probably take place on the 30th of August next, the *fete* day of St. Alexander.

FRANCE.

PARIS, MONDAY EVENING.—Trade improving; accounts from Industrial districts favourable. In corn little variation, but general tendency downwards. In the provinces markets abundantly supplied with wheat. At Marseilles wheat tended upwards. At Berce, wine market unchanged.

In the sitting of the Corps Législatif, on Friday last, M. de Montalembert made a remarkable speech on the freedom of election in France. He denounced the Court of Cassation as an accomplice with the Government to render universal suffrage a mockery, and called for an alteration of the law on this momentous subject.

The French provincial journals speak of inundations which have been caused in many parts of the country by the late heavy rains.

The French papers copy from the London papers a quotation from the "Manchester Guardian," stating that the French Emperor has refused to accept an invitation sent him by the Queen of England to attend the grand naval review at Spithead.

FREE IMPORTS INTO FRANCE.—By a decree published in the *Moniteur* of yesterday, iron knees and other pieces of bent iron to unite timbers in shipbuilding, are added to the list of iron commodities which are admitted duty free into France, under the decree bearing date in the month of October last.

AUSTRIA.

VIENNA, April 18.—It is stated that one million hundred weight of rails and one hundred thousand hundred weight of axletrees, tiras, &c., can be manufactured in the iron-works of Austria annually.

THE DUCHY OF PARMA.—The Marquis of Clanricarde has given notice of his intention to submit a motion to the House of Lords for the production of papers and correspondence relative to the occupation of the territory and the assumption of the Executive government of the Duchy of Parma by the Austrian authorities.

LATEST COMMERCIAL NEWS.

TUESDAY EVENING.

In consequence of the advices from America by the Canada, the cotton market opened yesterday with increased animation, and a general advance of ⅛d per lb. was realised. Today the demand has been moderately active, with a sufficient supply, and prices firm at the advance of yesterday. The sales amount to 10,000 bales, including 3,000 on speculation and for export. Prices are as follows: 8,800 American, 5d to 7d; 200 Brazil, 6½d to 7¾d; and 1,000 Surat, 4¾d to 5¼d.

The decline on wheat ranges from 1s to 2s per quarter on fine qualities, and 2s to 4s per quarter on inferior qualities. At London, on Monday, the supply was moderate, prices being about the same as on the previous Monday. Flour declined 1s per sack and barrel. Messrs. Robert Makin and Sons, in their circular of today, say that "the trade here since Friday has shown little variation for wheat and flour, the value of which have been steadily maintained, while Indian corn, being more in request, has experienced a further improvement of 6d per quarter. Farmers' wheat, with a good supply from the growers, sold freely at 1d per 70 lbs over late prices. All good qualities of barrel flour were in demand, and acquired an improvement of 6d to 1s, while sack flour maintained previous rates. Oats, oatmeal, and barley moved off slowly without change in value. A good many buyers appearing for Indian corn, and very few samples being offered, the market opened at an advance of 6d, and closed firmly at 1s per quarter over the enhanced rates of Friday, being an improvement of 1s 6d on the week.

LIVERPOOL STOCK EXCHANGE.

LONDON PRODUCE MARKET.

(By Electric Telegraph.)

Tuesday, April 22.—The demand for sugar brisk; colonial and foreign 6d per cwt. above Friday; in refined, many sales; brown lumps at 52s, and grocery at 52s 6d to 53s. Coffee less firm, and the demand not so large; plantation Ceylon at 58s to 66s; and native at 51s. Tea dull; ordinary sound congou at 9d. Cotton rather dull; several buyers. Cochineal dull, and 1s lower. Tallow not cheaper, but flat.

Tuesday Evening.—On 'Change. Tallow dull, at 47s to 47s 3d on the spot, and 46s 9d last three months. Scotch pig iron at 75s. Spelter at £23 15s. Linseed oil at 29s 3d to 29s 6d. No sales reported in cotton, coffee, or rice. Sugar firm.

GLASGOW PIG IRON MARKER.

(By Electric Telegraph.)

Tuesday, April 22.—There was a very general desire to press iron upon the market. A fair business done at 75s cash, closing rather in favor of sellers. No. 1, G.M.B. at 76s, and No. 3 at 73s 6d. Gartsherrie at 80s.

MEETING OF THE BOARD OF TRADE.—The first Quarterly General Meeting of the Board of Trade was held yesterday, in the Exchange.—J. B. Forsyth, Esq., President, in the chair. The attendance of members was not large.

Messrs. P. V. Robin, W. Petry, Jr., R. P. Poitras, W. Herring, P. Patterson, Arthur Ritchie, and Henry McBlain were balloted for as Members of the Board, and all duly elected. The day of the Weekly meeting of the Council was changed from Tuesday to Wednesday.

Mr. M. H. Warren, seconded by Mr. Noad, moved, and it was Resolved,—

That the Council be requested to communicate with the Trinity House calling their attention to the dangerous state of the River St. Charles arising from the large stones and boulders obstructing the navigation.

Carried.

The President read a letter from the Chairman of the Select Committee of the Legislative Assembly, on the Flour and Meal Inspection Act, enclosing copy of the Act for examination, and any suggestions for the improvement of the Bill, whereupon

It was moved by Mr. Noad, seconded by Mr. Dean,—

That in the opinion of this Board the grades of "Fancy Superfine" and "Fine" in the new Inspection Bill of Flour, introduced into the Legislative Assembly by the Hon. Mr. Young, are superfluous, and that the Council be instructed to write Mr. Young recommending that the following grades be adopted:—Extra Superfine, Superfine No. 1, Superfine No. 2, Fine Middlings, Pollards.

Moved in amendment, by Mr. Joseph, seconded by Mr. Dunn,—

That the words "Superfine No. 2" in the original motion be erased, and the word "Fine" substituted.

Which amendment being put to the vote was adopted.

Moved by Mr. J. S. McCuaig, seconded by Mr. J. R. Young,—

That this Board being fully convinced that the Dock accommodation at the Port of Quebec is entirely inadequate to meet the requirements of its Transhipping Trade,—it is imperative on its Members, in connection with the citizens generally, to take such measures as may be thought advisable to secure extended accommodation, by the construction of suitable Piers and Warehouses thereon for the protection of property on its arrival at this Port, and to facilitate its reshipment on board of the Ocean Line of steamers now in operation.

In moving this Resolution, Mr. McCuaig stated that the present high rates of wharfage were very injurious to the trade of Quebec; and instanced some consignments of iron on which as much as 5s. to 6s. per ton were charged. He explained the project as one calculated to encourage trade and prevent imposition, and said that for £12,000 a warehouse 400 feet long, and piers might be constructed. A Charter could be obtained this Session, and all he wanted the Board to do was to recommend the granting of such charter. Property arriving here, without being consigned, was now at the mercy of the wharf proprietors, whose charges were greatly complained of by Upper Canada merchants; in fact Montreal was on this account preferred to Quebec, and mercantile men in the West had written home not to consign their goods to this port.

Several members present, while admitting the necessity for additional wharf accommodation, did not think the Board should take part in what seemed to be a private speculation.

The President said that had we Harbour Commissioners here, as in Montreal, they could carry out improvements of this nature, and so dispense with any interference of the Board. He thought the mover might allow the Resolution to remain on the table, as a suggestion to the Council.

Mr McCuaig was recommended to withdraw his Resolution, but refusing to do so, it was put to the meeting, and lost.

The meeting then adjourned.

THE MONTMORENCI BRIDGE.—We have been favored by the Proprietor of the "Journal de Quebec" with a copy of the following despatch received yesterday, by telegraph, from a friend at Toronto:—

"Government will institute an enquiry as to the cause of the destruction of the Suspension Bridge at Montmorenci Falls."

The Messrs. Gilmores having kindly granted the use of their School Room, a Temperance Meeting will be held this evening (Thursday) at 7½ o'clock. Several speakers will address the meeting. A large attendance is expected.

LEGISLATIVE ASSEMBLY.

TORONTO, May 6.

On motion of Mr. Galt, it was resolved,—That it is the opinion of this House that the Commissioners of Crown Lands should submit to this House an annual report upon the department of Public Lands, made up to the 31st December of each year, to be presented on the 15th February following, if the House be then in session, or at the meeting of Parliament succeeding.

Mr. Powell moved that the House do now adjourn, which was negatived on a division.

The question being then put on Mr. Papin's proposed amendment, the House divided thereon—yeas 19, nays 78.

Hon. Mr. Spence moved in amendment to the first proposed amendment, that it is inexpedient to make any change in the existing Common School laws in U. C., so far as they relate to Separate Schools.

Mr. Powell moved that the House do now adjourn which was negatived on a division.

The question being again put on Mr. Spence's proposed amendment, and a debate arising.

Mr. Powell moved that the debate be adjourned till Thursday next, and do then return to the 1st order of the day. Yeas 31; Nays 56.

Mr. Murney moved that the House do now adjourn. Yeas 28; Nays 58.

Mr. Aikins moved that the House do now adjourn. Yeas 27; Nays 56.

Mr. Hartman moved that the debate be adjourned to Thursday next, and do then stand as the first order of the day. Yeas 29; Nays 52.

Mr. Scatcherd moved that the House do now adjourn. Yeas 21; Nays 53.

Mr. Murney moved that the debate be adjourned till Thursday next, and do then stand as the first order of the day. Yeas 21; Nays 56.

And the question being again put on Mr. Spence's proposed amendment,

Mr. Brown moved that the House do now adjourn. Yeas 21; Nays 55.

Mr. Scatcherd moved that the debate be adjourned till Thursday next.

MARITIME EXTRACTS.

The ship St. Lawrence, Wylie, arrived here about one o'clock, yesterday morning, in tow of the Princess Royal, and proceeded on to Montreal about three hours after, in tow of the Alliance.

Capt. Wylie reports having seen the ship Toronto off St. Peters, and the John Moore off Gaspé—thinks the latter must be close at hand.

The steamer Admiral, having towed down and placed the Light Ship in her place in the Traverse, returned from there yesterday morning. The buoys have, also, all been placed. The only inward bound vessel the Admiral saw, was the St. Lawrence, which has arrived.

The ship Fame and the barque Ant, which were both stranded on the same day, 30th November, 1854, the former at Little Matane, and the latter at Metis, on their way down the river, arrived here yesterday afternoon. They have both been sold for account of the underwriters. The Fame was purchased by Mr. Clapham, and the Ant by Messrs. Baldwin and Dinning. The vessels look well, considering the time they have been ashore—about 18 months.

THE WELL KNOWN SHIP BUILDING ESTABLISHMENT at "Patrick's Hole." This most convenient SHIP-BUILDING ESTABLISHMENT is situated on the Southern side of the Island of Orleans on the beach of the River St. Lawrence, an hour's steaming from Quebec. The Ship Yard has an area of 22 arpents 8 perches well sheltered, and there is besides 78 arpents of GOOD LAND above the cliff attached to it, with house and store.

As a COVE for the safe-keeping and Shipping of Timber, there is none superior to it in the vicinity of Quebec, it is the well known Harbor of Refuge in stormy weather, of all vessels navigating the River; and Ships could load there conveniently and in the most perfect safety.

THAT the Partnership hitherto existing between PATRICK McCLUSKEY & JOHN WM. GATES, as Plumbers, is hereby Dissolved.

J. W. GATES.

THE above line of Business will be CONTINUED by the undersigned, in the same premises, under the name and style of J. W. GATES & CO., PLUMBERS, who will endeavor to meet the views of the Public by furnishing the BEST of MATERIAL at the LOWEST POSSIBLE RATES, and at all times GUARANTEEING MATERIAL and WORKMANSHIP of the BEST DESCRIPTIONS, also binding themselves to keep the same in perfect order free of charge, for one year, should the work become deranged; thereby trusting to gain a share of the Public Patronage.

By calling you will become convinced that no Cheaper Plumbers Establishment exists in Quebec; not wishing to veil the eyes of the public by stating here a low list of prices for the best, and giving in return material far inferior to that required.

FIRE AND LIFE.

BOARD OF MANAGEMENT FOR CANADA EAST:
MONTREAL,
Honble. JAMES FERRIER, Chairman.
JOHN OSTELL, Esq.,
JAMES HUTTON, Esq.,
Manager,—W. S. MACFARLANE, Esq.

The Unity Association Consists of:

1.—The Unity Fire Insurance Association—Capital: £2,000,000 Sterling, divided into Two Million Shares of £1 each, and

2.—The Unity General Assurance Association—Capital: £500,000 Sterling, divided into Two hundred and fifty Thousand Shares of £2 each.

These Associations, though distinct in their origin, Deeds of Settlements, Stock Lists and Direction, are in a great measure combined in the Mother Country, and will be entirely so in the Provinces, where the Central Boards, Managers and Agents, will, in all cases, represent both.

Some brief account of the origin, progress and success, of these Institutions, will be expected by the enterprising and intelligent population of British America, among whom their Branches are about to be established.

The Unity Fire Insurance Association of London was founded, incorporated, and commenced business in 1852. It has, in the short space of three years, met with almost universal approbation and unprecedented success.

The Unity Fire is the youngest office but four whose operations are recorded in Hyde Clarke's "Statistics of Fire Insurance for 1854." In that year it had already outstripped 22 of the other offices (some of them established as early as 1696) in the amount of its business, insuring property to the extent of £10,232,000. Fourteen other offices, some of them established as early as 1710, stood in 1854 above the Unity in the aggregate amount of the property insured; but the popularity of the Unity, and the character of the competition to which the older offices are henceforth to be subjected, will be best understood by looking at the comparative returns of new business done in 1854. In that year the new business of the Unity Fire Associations exceeded that of the "Sun," the oldest office in England, by £1,516,000 and of all the other offices by £4,716,000.

The undersigned is prepared to grant Insurance against loss and damage by Fire.

Life Assurance Society

ESTABLISHED 1826.

President:
THE MOST NOBLE THE MARQUIS OF DALHOUSIE.

Vice-Presidents:
JOHN CAMPBELL COLQUHOUN, Esq., of Killermont,
His Grace The DUKE OF BUCCLEUGH,
His Grace The DUKE OF ATHOLL.

☞ THE PRESIDENT, VICE-PRESIDENTS and DIRECTORS ARE ALL INSURED IN THE SOCIETY.

1. CHARACTER and STANDING—The Noblemen and Gentlemen who form the Board of Direction of this Society attest their high opinion of its soundness and liberality and of the positive pecuniary advantages secured to its members by *insuring their own lives in the Society* and by presiding over the management of its affairs.

2. CERTAINTY OF FINAL PAYMENT.—Every consideration is made subordinate to the perfect security of the Assured. It is the paramount object of this Society that seventy or eighty years hence Policies shall be as promptly paid as they have been for the last thirty years of its existence, and the safe and satisfactory character of the investments will be found detailed in the 3rd Septennial "Investigation" Pamphlet, published and distributed by numerous agents of the Society, which is neither a secret nor a Proprietary Association.

3. IMPORTANT REDUCTION OF PREMIUMS.—From the pamphlet referred to information will be obtained as to the large profits of the Society, *all belonging to the assured*, from an application of which for the future, as fully explained in page 29, has been framed a Table of Premiums unprecedentedly low. For instance, (table A C) a person aged twenty may secure £100 at death by the annual payment of £1 8s. 6d.; were his age thirty, he should pay £1 16s. 7d; if forty, £2 9s. 7d.; if fifty, £3 10s. 9d.; if sixty, only £5 7s 2d., and proportionate premiums for intermediate ages. Under the table the £100 is insured if the additions declared during the currency of the Policy are greater than at the rate of 1¼ per Cent., or diminished if less. *The rate has never been less* and at the last *two* investigations *exceeded* 1¾ per Cent. A Life Insurance for one year will cost £1 5s. 6d. for £100 at age 40.

4. AMOUNT OF BUSINESS.—The outstanding Assurances exceed TWO MILLIONS and A-HALF STERLING. A number of the most respectable citizens of Quebec hold Policies, or are insured in the Society.

5 Proposals entertained for Assurance of *any contingency* depending on human Life. Various modes of payment of premiums to suit the Assured.

The "Equitable" Fire Office will, by a constant analysis of its own experience from time to time, adopt such rates of Premiums as the nature of the risk may justify.

With this view, an annual investigation will be made into each class of risk, and a return of one moiety—or fifty per cent.—of the nett excess will be made to all classes of Insurers, whose Policies have been in force for three years.

The engagements of the "*Equitable*" are guaranteed by a responsible proprietary, and an ample subscribed Capital. The insured are free from the liabilities of a *Mutual Insurance Society*, and entitled, according to the plan of the Company, to a return of half the profits.

LET US REASON TOGETHER.
HOLLOWAY'S PILLS

WHY ARE WE SICK?

It has been the lot of the human race to be weighed down by disease and suffering. HOLLOWAY'S PILLS are specially adapted to the relief of the WEAK, the NERVOUS, the DELICATE, and the INFIRM, of all claims, ages, sexes, and constitutions. Professor Holloway personally superintends the manufacture of his medicines, and offers them to a free and enlightened people, as the best remedy the world ever saw for the removal of disease.

THESE PILLS PURIFY THE BLOOD.

These famous Pills are expressly combined to operate on the stomach, the liver, the kidneys, the lungs, the skin, and the bowels, correcting any derangement in their functions, purifying the blood, the very fountain of life, and thus curing disease in all its forms.

DYSPEPSIA AND LIVER COMPLAINTS.

Nearly half the human race have taken these Pills. It has been proved in all parts of the world, that nothing has been found equal to them in cases of disorders of the liver, dyspepsia, and stomach complaints generally. They soon give a healthy tone to those organs, however much deranged, and when all other means have failed.

GENERAL DEBILITY—ILL HEALTH.

Many of the most despotic Governments have opened their Custom Houses to the introduction of these Pills, that they may become the medicine of the masses. Learned Colleges admit that this medicine is the best remedy ever known for persons of delicate health, or where the system has been impaired, as its invigorating properties never fail to afford relief.

FEMALE COMPLAINTS.

No Female, young or old, should be without this celebrated medicine. It corrects and regulates the monthly courses at all periods, acting in many cases like a charm. It is also the best and safest medicine that can be given to children of all ages, and for any complaint; consequently no family should be without it.

Holloway's Pills are the best remedy known in the world for the following Diseases:—

Ague,	Dropsy,
Asthma,	Dysentery,
Bilious Complaints,	Erysipelas,
Blotches on the Skin	Female Irregularities,
Bowel complaints,	Fever of all kinds,
Colics,	Ulcers,
Constipation of the Bowels,	Fits,
Consumption,	Gout,
Debility,	Head-ache,
Inflammation,	Indigestion,
Jaundice,	Sore Throats,
Liver complaints,	Stone and Gravel,
Piles,	Secondary Symptoms
Lumbago,	Tic Douloreux,
Rheumatism,	Tumours,
Retention of Urine,	Venereal Affections,
Scrofula, or King's Evil,	Worms of all kinds,
	Weakness from whatever cause, &c.

Sold at the Establishment of Professor HOLLOWAY, 244, Strand, (near Temple Bar) London, and 80, Maiden Lane, New York; also by all respectable Druggists, and Dealers in Medicines throughout the civilized world, and all over the Canadas, at the following prices—1s. 3d.,; 3s. 3d.; and 5s. each Box.

Carter's Spanish Mixture.

THE GREAT PURIFIER OF THE BLOOD

The Best Alternative Known!!

Not a Particle of Mercury in it!

An infallible remedy for Scrofula, King's Evil, Rheumatism, Obstinate Cuteneous Eruptions, Pimples or Postules on the Face, Blotches, Boils, Ague and Fever, Chronic Sore Eyes, Ringworm, or Tetter, Scald-head, Enlargement and pain of the Bones and Joints.

Salt Rheum, Stubborn Ulcers, Syphilitic Disorders, and all diseases arising from an injudicious use of Mercury, Imprudence in Life, or Impurity of the Blood.

This great remedy, which has become so rapidly and so justly celebrated for its extraordinary efficacy in relieving and curing many of the most obstinate and terrible forms of disease with which mankind is afflicted, is now offered to the public, with the confident assurance that no Medical Discovery ever made has been so eminently successful in curing Scrofula, and all diseases of the Blood, as Carter's Spanish Mixture.

The proprietors are receiving by every mail most flattering and astonishing details of cures made in all parts of the country, and in most cases where the skill of the best Physicians had been tried in vain.

Its power over the Blood is truly remarkable, and all diseases arising from impurity of that great Seat of Life, have been relieved and cured without a single failure out of the thousands who have used it. Carter's Spanish Mixture contains no Mercury, Opium, Arsenic, or any dangerous drugs, but is composed of Roots and Herbs, combined with other ingredients of known virtue and may be given to the youngest infant or most debilitated invalid, without the least possible hesitation.

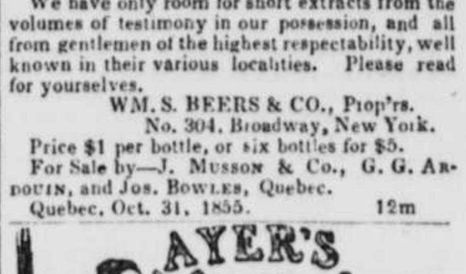

We have only room for short extracts from the volumes of testimony in our possession, and all from gentlemen of the highest respectability, well known in their various localities. Please read for yourselves.

CATHARTIC PILLS

OPERATE by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action. They remove the obstructions of the stomach, bowels, liver, and other organs of the body, and, by restoring their irregular action to health, correct, wherever they exist, such derangements as are the first causes of disease. An extensive trial of their virtues, by Professors, Physicians, and Patients, has shown cures of dangerous diseases almost beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth. Their certificates are published in my American Almanac, which the Agents below named are pleased to furnish free to all inquiring.

Annexed we give *Directions* for their use in the complaints which they have been found to cure.

FOR COSTIVENESS.—Take one or two Pills, or such quantity as to gently move the bowels. Costiveness is frequently the aggravating cause of PILES, and the cure of one complaint is the cure of both. No person can feel well while under a costive habit of body. Hence it should be, as it can be, promptly relieved.

FOR DYSPEPSIA, which is sometimes the cause of *Costiveness*, and always uncomfortable, take mild doses—from one to four—to stimulate the stomach and liver into healthy action. They will do it, and the *heartburn, bodyburn*, and *soulburn* of dyspepsia will rapidly disappear. When it has gone, don't forget what cured you.

FOR A FOUL STOMACH, or *Morbid Inaction of the Bowels*, which produces general depression of the spirits and bad health, take from four to eight Pills at first, and smaller doses afterwards, until activity and strength is restored to the system.

FOR NERVOUSNESS, SICK HEADACHE, NAUSEA, *Pain in the Stomach, Back, or Side*, take from four to eight pills on going to bed. If they do not operate sufficiently, take more the next day until they do. These complaints will be swept out from the system. Don't wear these and their kindred disorders because your stomach is foul.

FOR SCROFULA, ERYSIPELAS, *and all Diseases of the Skin*, take the Pills freely and frequently, to keep the bowels open. The eruptions will generally soon begin to diminish and disappear. Many dreadful ulcers and sores have been healed up by the purging and purifying effect of these Pills, and some disgusting diseases which seemed to saturate the whole system have completely yielded to their influence, leaving the sufferer in perfect health. Patients! your duty to society forbids that you should parade yourself around the world covered with pimples, blotches, ulcers, sores, and all or any of the unclean diseases of the skin, because your system wants cleansing.

TO PURIFY THE BLOOD, they are the best medicine ever discovered. They should be taken freely and frequently, and the impurities which sow the seeds of incurable diseases will be swept out of the system like chaff before the wind. By this property they do as much good in preventing sickness as by the remarkable cures which they are making every where.

LIVER COMPLAINT, JAUNDICE, *and all Bilious Affections* arise from some derangement—either torpidity, congestion, or obstructions of the Liver. Torpidity and congestion vitiate the bile and render it unfit for digestion. This is disastrous to the health, and the constitution is frequently undermined by no other cause. Indigestion is the symptom. Obstruction of the duct which empties the bile into the stomach causes the bile to overflow into the blood. This produces Jaundice, with a long and dangerous train of evils. Costiveness, or alternately costiveness and diarrhœa, prevails. Feverish symptoms, languor, low spirits, weariness, restlessness, and melancholy, with sometimes inability to sleep, and sometimes great drowsiness; sometimes there is severe pain in the side; the skin and the white of the eyes become a greenish yellow; the stomach acid; the bowels sore to the touch; the whole system irritable, with a tendency to fever, which may turn to bilious fever, bilious colic, bilious diarrhœa, dysentery, &c. A medium dose of three or four Pills taken at night, followed by two or three in the morning, and repeated a few days, will remove the cause of all these troubles. It is wicked to suffer such pains when you can cure them for 25 cents.

RHEUMATISM, GOUT, *and all Inflammatory Fevers* are rapidly cured by the purifying effects of these Pills upon the blood and the stimulus which they afford to the vital principle of Life. For these and all kindred complaints they should be taken in mild doses, to move the bowels gently, but freely.

AS A DINNER PILL, this is both agreeable and useful. No Pill can be made more pleasant to take, and certainly none has been made more effectual to the purpose for which a dinner pill is employed.
