THE LEADING ADVERTISING MEDIUM OF THE DISTRICT OF BEAUHARNOIS

SIXTY-SEVENTH YEAR | HUNTINGDON, QUE, WEDNESDAY, AUGUST 6TH, 1930. | EIGHT PAGES

$165. RAISED AT LAWN SOCIAL AT W. G. GIBSON'S

Dr. J. C. Moore and Mr. John Lowe Numbered Amongst Guests of Honor.

The lawn social held at the home of W. G. Gibson on Wednesday evening was favored with fine weather, if a trifle cool, a large attendance, and the ladies have reason for gratification upon the success of the undertaking. The grounds were well lighted and decorated with colored lights which lent a gala appearance to an affair of this kind. The supper left nothing to be desired and program was of a high order, including piano duets by the Misses Walker of Huntingdon and Mr. and Mrs. Johnston of Montreal, songs by Miss Kilday and Mr. Shane of Valleyfield, Mrs. Cappiello of Athelstan, Mr. McFarlane of Riverfield, and Mr. Albiston of Montreal, recitations by Miss Blanche Wilson of Athelstan, Miss McCuaig of St. Louis and Mr. McClatchie of Huntingdon, violin duets by Mrs. Gibson and Miss Helen Ross.

Dr. J. C. Moore, M. P., in a short address expressed pleasure at being present and congratulated the ladies on the splendid success of the affair. Referring to the twenty-six years during which he had labored among the people of this community he said he knew of no place where a person in trouble would receive help more quickly than in Rockburn.

Mr. John Lowe of the Montreal Cotton Co., Valleyfield, being called upon said he always looked forward with pleasure to attending the social events in Rockburn. He spoke in the highest terms of the supper which had been served and of the splendid program to which he had listened, touching on the potential wealth and the wonderful possibilities of our country he expressed the hope that the present trade depression would be of short duration. Rev. Mr. Ross in his usual able manner presided and on behalf of the congregation thanked all who had contributed towards the success of the evening.

The proceeds amounted to $165.

STANDING CROP AWARDS MADE

Stephen Hadley Wins Largest Number Prizes With Four Firsts and Two Seconds.

Prizes awarded by the Agriculture Society Div. B. for standing crops in the Township of Hemmingford have been announced as follows:—

Best kept farm—1. R. T. Brownlee, 2. Stephen Hadley.

Ensilage—1. Richard Fisher, 2. Stephen Hadley, 3. Vernon Ellerton.

Ooats—1. Stephen Hadley, 2. Richard Fisher, 3. R. T. Brownlee.

Barley—1. Chas. Hadley.

Potatoes—1. Chas. Hadley, 2. R. T. Brownlee, 3. Vernon Ellerton.

Carrots—1. Stephen Hadley.

Turnips—1. Stephen Hadley, 2. R. A. Campbell.

Marigolds—1. Stephen Hadley, 2. R. A. Campbell, 3. Richard Fisher.

Judges: N. A. Dume, F. A. Erskine.

AUBREY-RIVERFIELD

The Riverfield "Y" Society and Howick United Y. P. S. held their annual drive on Friday, Aug. 1st, when about thirty-five young people enjoyed a trip to Chambly, visiting the buildings of note there. They also stopped at St. Hubert airport and saw the famous R-100.

Miss Winnie Marlin of Barrington, was the guest of Miss Marna McKell for a few days recently.

Mrs. A. A. Allen is spending a few days in Montreal.

Mr. and Mrs. Ray Reddick and family and Mr. W. Currie spent Sunday in Montreal the guests of Mr. and Mrs. E. Jackson.

Mr. and Mrs. Lawrence Cameron and family were week-end guests of Mr. and Mrs. Geo. Robb, Morris Robb returning with them for a weeks' visit in the city.

Mr. Donald Black spent the week-end in the city.

Mr. and Mrs. W. Rorison and Miss Lizzie Rorison spent Monday in Montreal.

Miss Hilda Bruce is spending a week with friends in the city.

Mr. Leslie Cameron and family visited friends in this locality Sunday.

Miss Elizabeth Armstrong returned home Monday after spending a week in the city visiting friends.

Mr. and Mrs. Arnold McKell and family spent Friday visiting friends in Montreal.

Mr. and Mrs. W. W. Orr and Mrs. John Currie attended the picnic held in the grove of Mr. E. Hooker, on Wednesday.

HUNTINGDON

Mrs. Ernest Lefebvre and Miss Rucie O'Hare spent Thursday in the city.

Mr. C. W. Thomas is enjoying a holiday at the home of his son in Manchester, N.H.

Mrs. Harold Kydd of Toronto is visiting at the home of her sister Mrs. Jas. Fortune, Jr.

A Timely Reminder.

Parents should remember that children who cannot show a certificate of vaccination since the last seven years will not be admitted to classes in any school.

This law should be complied with now that no inconvenience may be caused later on.

BEAUHARNOIS HAS MOVED BIG VOLUME

Dredge Output Creates World's Record During Month of July.

The Beauharnois Power Corporation has moved to date a total of more than 4,000,000 cubic yards—a volume larger than the great pyramid of Egypt. For the preliminary installation of 200,000 horsepower, some 20,000,000 cubic yards are to be excavated. About 50,000,000 cubic yards will be moved before the plant produces 500,000 horsepower.

Despite the volume of material moved in the first half of the current season, the construction schedule provides for an increase in the material to be handled during the next five months when the large scale excavating equipment will continue operating day and night.

Mass production excavating methods have been adopted by the corporation. The hydraulic dredge, the moveable steel tower excavators, handling 10 cubic yards at each shovelful, and the gasoline and electric shovels, moving as much as 8 cubic yards in each bucketful, were assembled during the winter and early spring. Since the beginning of large scale operations this spring, the efficiency of the equipment has been steadily increased and has proved that the estimated costs were determined on a conservative basis by the engineers. In July, the output of the hydraulic dredge created a new world's record—a feature of its operation which is the more significant as similar equipment elsewhere often operates on Sundays.

The power house excavations have reached the point where work is soon to begin on the foundations. A concrete mixing plant, over 100 feet high, has been completed near the power house site. The rock excavated for the power house moves to the crusher, and then into the mixing plant which will fill 10 cubic yard buckets on flat cars with cement.

Within the next ten days the wholly owned subsidiary, which is carrying out all the construction work, will begin pouring the concrete foundations of the plant.

Huntingdon Town Council

The Municipal Council met on August 4th. Mr. D. J. O'Connor absent the Pro-Mayor Ald. Hunter presiding. Councillors all present.

The following bills were presented for payment: Nichols Chemical Co. Ltd. $36.25; Canadian Industries Ltd. $15.09; John Smaill, $30.; Laberge Bros., $34.15; O'Connor Bros., $8.40; Bell Telephone Co. $7.60.

It was moved by Ald. Faubert and seconded by Ald. McCracken that the accounts as read be paid.

It was moved by Ald. O'Hare and seconded by Ald. McCracken that this council contribute a sum not exceeding $100. towards sending Fire Chief G. C. Stark to the annual convention of the Dominion Association of Fire Chiefs to be held at Port Arthur, Ont. on September 2, 3 4 and 5.

It was moved by Ald. Brown and seconded by Ald. Derochie that the Town of Huntingdon having accepted the formation of a sanitary unit is willing to be annexed to Chateauguay County until such time as Beauharnois County decides to enter and at that time to be joined with Beauharnois County.

The matter of Caulking the Fire Station was left in the hands of the Fire Committee.

A petition was received from Mrs. S. Davis and others asking that the proces-verbal ditch at the rear of their properties be cleaned out. The secretary was instructed to have the inspector in charge of this ditch visit the premises and have the work done if necessary.

The secretary was instructed to write to the Township of Hinchinbrooke asking that they have a representative at the next meeting for the purpose of coming to some understanding as to the building to the road between the municipalities.

The secretary was also instructed to write Mr. A. Longtin asking him to render his account on or before the 25th inst.

It was moved by Ald. Faubert and seconded by Ald. Brown that the meeting stand adjourned until Aug. 25th, 1930.

ST. AGNES

Mr. Emile Latulipe of Montreal spent last Sunday visiting his father Mr. Jos. Latulipe and other relatives here.

Mr. and Mrs. Jos. Ouimet and family of Worcester, Mass. are spending a few days with their parents, Mr. and Mrs. Ouimet.

Miss Rose Mainville is spending a few weeks with her parents, Mr. and Mrs. Israel Mainville.

Miss Beatrice Demers is spending a few days with Mr. and Mrs. Deliase Latreille in Fort Covington.

Misses Eveline Léger, Donaldine Quesnel, Blanche Alice Caza and Messrs. Edmond Leblanc, Albert Leger and Edmond spent the week end visiting friends and relatives in Cedars, Que.

Miss Cecile Collette of Montreal is spending a few days with her grandparents, Mr. and Mrs. Jos. Leblanc and family.

Miss Therese Latulipe spent a few days visiting relatives and friends in this vicinity.

Mr. Donat Leblanc and Mr. Léo Lauzon of Massena, N.Y. spent Sunday with relatives and friends here.

Miss Lina Mainville spent a week visiting with relatives in Massena.

Miss Therese Leblanc was a business caller in Montreal on Friday.

Mr. and Mrs. Alex. Leblanc were busines callers in Valleyfield Tuesday.

PLAY FOR ROBB SHIELD AT VAL'F'D

Valleyfield Entertains Huntingdon Bowlers to League Fixture.

The postponed bowling league fixture between Huntingdon and Valleyfield took place on the Valleyfield green on Monday evening. Although the Huntingdon teams never hoped to pull a win, they were delighted with the evening's enjoyment, on the ideal green of that place.

The league games are in competition for the Memorial Shield donated by Mrs. Robb in honor of her late husband, the Hon. J. A. Robb. The shield was on view at the Club Rooms on Monday and is a beautiful silver plaque suitably engraved.

The teams and scores were:

Huntingdon		Valleyfield
C. L. B. Wheeler		C. Webster
A. L. Sellar		C. Philbin
W. J. Goundry		J. McAlpine
J. W. Stark		J. N. Kinross
Skip	15	Skip 19
Dr. J. R. McEwen		D. Williamson
F. G. Braithwaite		J. Percival
G. C. Stark		J. Cluff
D. L. Kelly		J. McCann
Skip	9	Skip 21
W. A. Hunter		J. Presho
N. W. Sparrow		A. B. Ross
Dr. H. R. Clouston		W. Kirk
J. A. Lanktree		J. Taylor
Skip	11	Skip 27
B. W. Allen		P. Sugden
D. Walker		A. Seed
Harold Miller		J. Coates
F. I. Batcheller		H. Whitehead
Skip	14	Skip 28
Total	49	Total 90

Valleyfield won by 41 points.

Kenneth Maclure Wins High Honors

Although only 15 years old, Kenneth C. Maclure, of Beauharnois, a pupil of the Montreal High School, has won great distinction in his studies, for not only did he obtain his school leaving certificate this summer, but led the whole province in the examinations, the results of which were announced a few days ago.

Maclure has other interests besides his studies. He was a member of the school magazine board of Montreal High School, secretary of the Scientific Society, one of the leaders of the swimming corps and a member of the water polo team.

HUNTINGDON LADIES BOWLED AT ORMSTOWN

Friendlies were played on Wednesday by Ormstown and Huntingdon lady bowlers. After the games refreshments were served. The rinks and scores:—

Ormstown		Huntingdon
Mrs. M. Stalker		Miss H. Hall
Mrs. D. Gruer		Mrs. MacDonald
Mrs. M. Ross		Miss Olive Cluff
Miss C. Finn		Mrs. W. Goundrey
Skip	18	Skip 6

Skip	5	Skip 16
Mrs. J. Elder		Mrs. Lanktree
Mrs. E. McCartney		Miss O. Cluff
Mrs. F. Hunton		Mrs. D. Walker
Mrs. D. McIntyre		Mrs. J. Fortune
Skip	6	Skip 9

Huntingdon won by 2 shots.

Godmanchester Council

Met on Monday, August 4th. Present, the Mayor W. J. Sherry, and Councillors Ernest Watterson, J. J. Tannahill, M. I. Rankin, Jas. Ruddock, Alfred Latulipe and Wm. Graham.

The following resolutions were adopted:

An extension of time was granted to Mr. A. W. Sullivan, C.E., and Special Superintendent over the Cowan Creek up to August 13th next.

Mr. J. A. Racicot, Road Dept. Engineer was requested to clean out the road ditch across the Jos. Tallon farm and the John Brady farm, along the 5th and 6th Range Road.

Resolved that Messrs. Jos. Fournier and James McPherson be notified to have the balance of their contract on Carr front road completed on or before the 1st day of September, 1930.

Resolved that the flooring of the Island Bridge near Dewittville be renewed as soon as possible, as it is in a very poor condition at present, and that this affair be left in the hands of the Mayor and Secretary-Treasurer.

The following bills were ordered paid: Frank Allard, $1.50; Jos. Brisebois, $900; Nap. Kieprrien, $700; Huntingdon Gleaner $3.86; Seignory Line road acct., $39.60; Eli Goyer, $40.

The meeting adjourned to Wednesday the 13th day of August, next, 1930, at 7 p.m.

A CORRECTION.

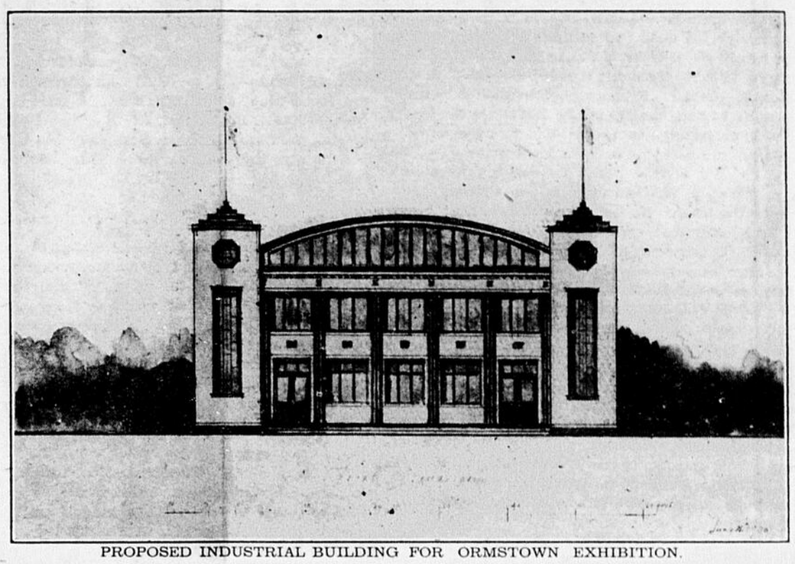
In the results of School Leaving Examinations given in last weeks' Gleaner we unintentionally omitted one of the students' name and marks. It will be noticed there was no number 6. This rank was secured by Miss Jessie Thompson with 689 marks to her credit.

ORMSTOWN

Many of our people were greatly disappointed last Wednesday to hear that the fight scheduled for that night, was cancelled.

The Gleaner brings the information that the Ormstown Bulletin has a new owner. Mr. Blackburn has sold out to Mr. Edward Hastings of Dunnville, Ont.

To Be Erected At Ormstown



PROPOSED INDUSTRIAL BUILDING FOR ORMSTOWN EXHIBITION.

The directorate of the Ormstown Exhibition have been holding meetings lately in regards to the proceeding with the proposed $16,000 Industrial Building. The proposed building is to be 60 x 100, have two floors and will be located where the agricultural implements have been regularly exhibited. The poultry building will be removed.

THE VISIT TO BEAUHARNOIS DEVELOPMENT

Board of Trade Members and Friends Asked to Make Known Their Intentions.

Lunch 12.30 at Beauharnois.

Guides to Accompany Party Over Entire Development Works.

As we go to press today, a letter is received from Beauharnois Power Corporation which in part will answer some of the questions that will arise from the editorial paragraph relating to the proposed visit to the Beauharnois Power Development works. The letter reads:

Montreal, Que.
August 5th., 1930.

Adam Sellar, Esq.,
The Huntingdon Gleaner,
Huntingdon, Que.

Dear Adam:—

I have spoken to Mr. F. H. Cothran, Vice-President and General Manager of the Beauharnois Construction Company about the luncheon for the Huntingdon Board of Trade members and their friends on Thursday, Aug. 14th.

Here are the arrangements that Mr. Cothran suggests—subject to the approval of the Board of Trade: Those attending will foregather at 12.30 standard time at the offices of the Beauharnois Construction Company. These offices are at the construction camp between Melocheville and Beauharnois.

After lunch, Mr. Cothran will supply guides who will take the party around the work under way at the site of the power house.

As the party will be supplied with cars, the guides will accompany them to St. Louis de Gonzague, then to the Larocque Road and finally to the work under way on the shores of Lake St. Francis. It will probably not be necessary to leave the cars either at St. Louis or at the Larocque Road.

Next Monday, would you please let this office know the approximate number of people who will be present.

Faithfully yours,
RIELLE THOMSON.

CHIEF STARK TO FIRE CHIEFS' CONVENTION

Dominion Ass'n. to Convene at Port Arthur Early in September.

Chief G. C. Stark will go to the Dominion Association of Fire Chiefs 22nd annual convention at Port Arthur, Ontario, which will be held from September 2nd to 5th.

This is an opportunity which we believe will be a big help to the Huntingdon Fire Brigade.

Where there is smoke there is sure to be a fire so the Huntingdon Town Council have decided to send the Chief this year and by so doing try to improve the Brigade.

This is a good trip as far as pleasure goes but we believe the Chief will bring us back some new ideas in regard to equipment and different ways of fighting the great enemy fire.

This will be one of the largest conventions of fire chiefs ever held in the Dominion, because the following week the International Fire Chiefs Convention will be held in Winnipeg where most of the members attending at Port Arthur will go on to Winnipeg.

Then next year if things work well at Port Arthur, the convention is expected to be held in Joliette, Que.

Mr. Robt. Harrington, Fire Chief of McColl-Frontenac Oil Co. and director of this Association is putting every effort to make this year's convention a success. It is also through his efforts the banquet in Huntingdon, May the 22nd was such a success.

McGILL SUMMER SCHOOL CLOSED

Two Students From Huntingdon Successful in French Examinations.

Among the names of those who passed the final examinations of the McGill French Summer School were two students from Huntingdon, Miss Sadie Milier and Mr. Clifton L. Hall.

In Course C, the highest course, Mr. Hall headed the list with the highest number of marks, but as he won the first prize in this course last year, he was classed as ineligible for the prize this year, which went to a lady student from New York City.

Miss Miller secured first class standing in Course B. (Intermediate.)

Majority for Dr. Moore 489.

A GOOD IDEA !

Mothers who have several children about the same age will find it a good plan to mark each child's stockings. Choose brightly coloured wools, and with a darning needle run two or three stitches of the wool (a different colour for each child) along the top of the hose. If this method is adopted much inconvenience may be avoided.

It is advisable to sprinkle a little castor sugar over sticky sweets intended for children. This prevents them from sticking together in a mass. The sweets should be stored in airtight tins or bottles.

Should there be any difficulty in giving powders to a child, cut a banana in two, scoop out a little of the fruit, then place the powder in the cavity and put the two pieces together. The probability is that the child will eat the banana without noticing the presence of the powder.

CONVICT MADE GETAWAY FROM PENITENTIARY

St. Chrysostome Bank Hold-up Man Escaped. But Was Later Recaptured.

Great activity and agitation prevailed over the usually quiet Ile Jesus Friday afternoon and night, when it was learned that for the first time in three years a prisoner had escaped from St. Vincent de Paul penitentiary. The escaped convict was Jules Lagace, alias Joseph Borgias, the leader of a youthful hold-up gang, sentenced to receive twelve strokes of the lash and to serve ten years in the penitentiary, by Judge Gustave Marin on December 4, 1929.

Lagace was found guilty of the $2,500 bank hold-up at St. Chrysostome on November 20, 1929, and he as the leader of the hold-up trio received the stiffest sentence of all. He was sentenced to receive six strokes of the lash at the beginning of his ten-year term and six others directly before his discharge. His two companions, arrested with him shortly after the hold-up and now serving their sentences at the penitentiary, L. Guillotte and Paul Savory, were given sentences of five years in jail and six strokes of the lash each.

In passing these sentences the judge then remarked that armed hold-up was one of the worst possible crimes to be perpetrated as it was not a far cry between it and murder.

The disappearance of the escaped convict was discovered at 3.30 o'clock Friday afternoon. The alarm was then sounded and all day and night guards were called on duty. Armed guards were scattered over all the entrances of all bridges and ferries, while squads of others were searching all bushes and hidden spots on the large island. Motor cars and other vehicles were examined by the busy guards before crossing bridges and ferries leading to Montreal and other localities.

It was learned that during the last ten years only four prisoners had escaped the vigilance of their guards and they were all captured in a brief delay. One of these four escaping convicts was fatally shot, because he refused to surrender.

Convict Captured.

The convict was captured early Monday afternoon resting amidst a litter of windows and doors in a small barn at L'Abord-a-Plouffe, less than a hundred feet from the Riviere des Prairies and what Lagace hoped was the way to freedom. The capture was effected by Colonel Pinze, warden of the penitentiary, and three of his guards, after a search which lasted three days and three nights and involved the efforts of the bulk of the prison personnel.

Franklin Council

Met August 4th. 1930. Members all present except Couns. Dumas and Vaillancourt.

Rev. Mr. Duncan came before the board asking for the use of the Hall for a meeting-place for the young men of the community once a week.

Moved by Coun. Faille, seconded by Coun. Rowe that they have the use of the Hall by paying $1.00 per meeting and to replace anything that is broken and that this board reserves the right to cancel this motion at any time.

Moved by Coun. Lamb, seconded by Coun. Blair that the following bills be paid: Dr. Deguire, disinfection, R. Moise, $12; C. Johnston, $28.35; J. Schinck, $11.; F. Meehan, $1.80.

Coun. Blair gave notice that at the next regular meeting of Council he would introduce a by-law to defray the expenses of administration, pay interest on bonds and general expenses.

Coun. Lamb gave notice that at the next regular meeting he would introduce a by-law to change the date of election for Mayor and Councillors from January to May.

ALEX. HOLMES HAS SKULL FRACTURED

Plane Landed on English's Farm Partially Damaged.

Ormstown, Que., Aug. 5.—A serious accident occurred on the Caughnawaga-Malone Highway Saturday afternoon about 4, when Mr. Alex. Holmes of Howick was the victim. There were no eye-witnesses to the accident, as far as is yet known, but it has been learned that Alex. was travelling towards Howick. Going in the same direction was a Pontiac, which passed Alex. just outside of Ste. Martine. When the first spectators arrived at the spot near Ste. Martine, it was in their opinion about 10 seconds after the accident took place, the motor of Mr. Holme's bike was running furiously and Mr. Holmes was lying about four feet from it. He was unconscious when lifted, and was taken by the driver of Pontiac to Doctor at Ste. Martine and later to Howick. Since then we have heard that he has been taken to a hospital in Montreal, the skull being fractured for a length of three inches.

Plane Damaged on English's Farm.— Mr. and Mrs. Watson of Montreal, who have been recent guests of Mr. and Mrs. Thos. English of this place, flew here from the St. Hubert airport in a Moth plane last week. As Ormstown has not yet a landing field, Mr. Watson was forced to take one of his own choosing, and in lighting on the soft turf of a pasture field at Mr. English's, his propeller caught, overturning the plane. Neither of its occupants were injured, but considerable damage was done to the plane.

Misses Dot and Gladys Cullen were among those who saw the R-100 at the mooring mast at St. Hubert last Friday.

Miss Eunice Patton is spending a few days in Montreal.

Miss Marian Bradley of Waterloo, is visiting friends in the district.

Miss Beryl Moore of the Commerce Bank Staff is holidaying.

Mrs. Margaret Bryant, Mr. Fred Bryant and Mr. Edison Stewart of Chicago, Ill., motored to Ormstown, and are visiting with Mrs. Ed. Finn.

Dr. and Mrs. L. E. McCaffrey and daughter, Ann, of Rochester, N. Y., are spending a few weeks with his mother, Mrs. Mary McCaffrey.

Miss Elizabeth Beaudin and Mrs. Beaudin have returned home after a week's visit with friends at Cornwall.

BOWLERS WIN FIRST VICTORY

Huntingdon Club Wins With Margin of Six Over Chateauguay.

Chateauguay bowlers visited Huntingdon last evening and played a league fixture that created much enthusiasm. All four Huntingdon greens took on a lead early in the game, which was fortunate. The visitors as they became more accustomed to the green started rolling up a score. On green 2 skipped by J. W. Stark and R. S. Muir of Chateauguay, the lead maintained by Stark throughout the game was whittled to a loss in the last two ends, when Chateauguay took a four and five end.

D. L. Kelly played Mr. Cobb on green No. 5 and after a very evenly contested game Lloyd nosed out with a margin of four to the good. J. A. Lanktree played L. Hay and in this game the excitement was running high, especially in the last end, when the Chateauguay skip rolled in a third counter which balanced the score 20 all. The green skipped by F. I. Batcheller against Mr. McNair was the most fortunate team for Huntingdon, as they won with the safe margin of 8, which made the Huntingdon Club win its first bowling victory by six points.

The teams and scores were:

Chateauguay	Huntingdon
Cox	B. W. Allen
L. A. Wyse	A. L. Sellar
Champion	W. J. Goundrey
R. S. Muir	J. W. Stark

COLD TEA TIPS.

Tea that is to be used for any of the following purposes should be carefully strained to ensure that none of the leaves find their way to the articles.

Cold tea will give a beautiful ebony shade to lace. Add a little to the final rinsing water after the lace has been washed.

If no other remedy is available when a minor burning accident occurs, soak a piece of linen in cold tea and apply to the affected part. This helps to alleviate the pain.

Use a mixture of strong cold tea and water for washing varnished woodwork. Allow the mixture to dry on the material, then polish with an old silk handkerchief.

Tea can be used for giving a gloss to mirrors, windows, and glassware. Add a generous quantity to the water with which the glass is to be cleaned.

ARCH. W. SWAN PASSES AWAY SUDDENLY

Ormstown High School Results Announced For Grades 10 and 11.

Sunday Schools' Picnic.

Gordon LeClaire Awarded Scholarship at McGill University.

It is with great regret that we chronicle the passing of an Ormstown resident, Archibald Wilson Swan aged 61 years and 6 months, who died at his home on July 30th, from heart trouble. A Masonic service was held Aug. 1st. Interment at the Ormstown cemetery.

The following marks are the results from the Ormstown High School:

Grade XI—Possible Marks 1100.

xNorris Nussey	539
Lyla Winter	522
xClifford Sproule	388

x—Failed.

Grade X—Possible 1200.

xMuriel Nussey	558

xx—Without Latin.
x—Failed.

Sunday Schools Hold Picnic.—

The Presbyterian and Anglican Schools held their annual picnic on Wednesday on the grounds of Mr. E. Hooker, with over 150 in attendance. All enjoyed the lunch after which the usual races were participated in. Those who were absent were missed by all and it is hoped they will be with us at our next annual picnic.

The annual tennis championship contest is moving slowly on account of holidays and busy times with some of the players. When the flights are finished the results will be published.

Miss Muriel Cavers spent a few days last week in Montreal.

Mr. Eric Lane of Hudson, spent two days last week the guest of Miss Dot Cullen.

Scholarship Won by Gordon LeClaire.—

Mr. Gordon M. LeClaire, who was successful in obtaining a high standing in the senior matriculation examinations recently held at McGill, has been awarded a scholarship valued at $150. Mr. LeClaire has been teaching for several years in Montreal and intends to continue his studies at the University this fall.

Interest in the race for honours in the baseball league continues at high peak, and the game of Saturday last was attended by record-breaking fans. Beauharnois Beavers and Ormstown staged a thrilling battle. It was a see-saw affair and for a time the Beavers nice clean slate looked like it was due for a smearing. However, they tightened up to win the game in the final stanza 7-2.

The Ormstown girls went down to defeat at the hands of the Valleyfield girls at a game of soft ball played on local grounds on Saturday. The score being 16-9. After the game all enjoyed a social hour.

The ladies of the W. A. Society of the Anglican Church held a food sale last Friday at the home of Mrs. D. LeClaire. The sale drew many and we understood the receipts were in the neighbourhood of $30.20.

Mr Andy McGerrigle is again working for the government taking the automobile census.

Mr. Arch. McEwen has been on the sick list for the past few weeks. He has been having a struggle with blood-poison caused by a scratch from barbed-wire. At this writing he is somewhat better.

Miss Marjorie Gruer of Aubrey is spending the week with her aunt and uncle, Dr. and Mrs. D. Gruer.

The Misses A. Stuart and Lillian Barr of Hemmingford, were guests last week at the John Campbell home.

Miss Isobel Elder left on Wednesday for Plainfield, N. J., to spend a month with her sister, Mrs. C. A. Hoffman. While there she will be accompanied by Mrs. Hoffman to Washington, D. C., to spend a few days.

The Rev. Mr. D. Fiander of Lakefield is the guest of Miss R. Hawley this week.

Miss Beryl Moore of the Bank of Commerce staff, is enjoying her holidays.

Mr. Alex. Lenney, who has a government position at Ottawa, was with his parents, Mr. and Mrs. Wm. Lenney over the week-end.

Mr. Eric Hawley of Shawinigan, is spending a few weeks at the C. W. Hawley home.

We are pleased to report that Mrs. Alex. Davies, daughter of Mr. and Mrs. J. T. Elder, who has been in a very critical condition in the Woman's General Hospital, Montreal, is slightly improving.

Many from Ormstown have been to see the R-100 stationed at St. Hubert.

Mr. and Mrs. Gordon MacKay and family of Montreal, spent the week-end with her parents, Mr. and Mrs. J. Rutherford, Tullochgorum.

Miss Ina Milne of Dewittville was a guest of Mr. and Mrs. Duff LeClaire last week.

Mr. and Mrs. Jas. Atkinson returned home Thursday from their motor trip to New Carlise, Gaspé, when they had spent their vacation with his parents, the Rev. Mr. and Mrs. Atkinson.

HIRAM LEACH MACHINERY HEADED FOR HUNTINGDON.

Mr. Peter Grant, the secretary-treasurer of Hiram Leach and Son (Canada) Limited, who are locating a branch of the woollen mill in Huntingdon, informs us that 15 cases of the machinery left Bradford, England, for Huntingdon. Mr. Grant has been in Huntingdon for the past three weeks, seeing to it that the Dunn building was repaired in such a manner as to receive the machinery when it arrives in Huntingdon. The machinery will come to Huntingdon in three shipments, all of which crosses the Atlantic on passenger liners. On Monday, three English couples set sail, and are to arrive here on August 15th. These people will immediately start work erecting the machinery. As the other shipments of machinery arrive and are erected, other master workmen will arrive.

Such in brief is the progress that is being made by the Hiram Leach & Son (Canada) Limited in regards to locating in Huntingdon. This company asked the people of Huntingdon to subscribe for $30,000 worth of 6½ per cent bonds with a stock bonus of 100 shares, $1.00 par value, for every $600. of bonds purchased. The bonds are redeemable in five years at 105. The Board of Trade who were successful in procuring this company for Huntingdon solicited a number of subscriptions and secured gratifying results. A portion of the issue has yet to be subscribed and will be wanted around September 1st, when the plant will commence producing woollen cloth for suitings. With the coming to Huntingdon of 50 people from the Bradford mill, the question arose, where are they going to live? A group of ladies of Huntingdon, unsolicited, grasped the situation and told Mr. Grant they would make sure the people coming here would be provided for. That is a co-operation that represents much. The people here who have money to invest whether it be little or much, will undoubtedly be doing good for themselves as well as Huntingdon through investing in this company. The Hiram Leach and Son of Bradford, England, have gained a favourable reputation as successful business people. They come to Canada well recommended, and investigations have been made into their welfare before bond subscriptions were solicited. Anyone who feels disposed to invest in this company might advise any member of the Board of Trade executive or Mr. Peter Grant, the Secy.-Treas. of the Company.

LET'S SEE THE BEAUHARNOIS DEVELOPMENT.

The Beauharnois Power Development undertaking is daily advancing by leaps and bounds. The gigantic work is watched with interest by thousands. It gives employment to upwards of 2000 hands and some of the greatest excavating machinery in the world is daily in operation along this 14 mile long canal. The special issue of the Gleaner published some weeks ago dealt with this work at large. Mr. Rielle Thomson, who gave a talk here on "Beauharnois and One Aspect of the St. Lawrence Deep Waterways" gave enlightenment to many Huntingdon people on this work. President R. O. Sweezey, who also spoke briefly on "Beauharnois," told enough to make many people so stirred that they wanted to visit the Beauharnois works, and many have so done. Mr. Sweezey extended the Board of Trade and their friends an invitation to visit the development works. Now, the question is, when will we make the excursion? The Beauharnois Power Corporation offered to guide us over the works and supply us with lunch at noon. In another week haying will be over, and many farmers will feel able to take a day off and see Beauharnois. If August 14th is a convenient day for you and your friends to drive to Beauharnois, advise either Carl Wheeler, Phone 188, Secretary of the Huntingdon Board of Trade, or Adam L. Sellar, the President, phone 40. A party of 50 to 100 is to be provided for.

The Board of Trade will not hold a Labor Day picnic this year, but will make the necessary arrangements for this outing. The excursionists will have to provide their own transportation. Have your car well fuelled before starting.

The offer here made is a generous one on the part of the Beauharnois Power Corporation. The party will in all probability be escorted over the works by Messrs. R. O. Sweezey and F. H. Cothran, who is at the head of the development works, and a number of other officials. It is safe to say a number of guides will be with the party so that everyone will be enlightened on all points of interest. Seeing is believing, and it is now up to us to see for ourselves, the greatest undertaking at the present time going on in the Dominion of Canada.

Remember the date, and phone your intentions to either the president or secretary of the Board of Trade by Wednesday noon, August 13, so that notice can be sent to Mr. Rielle Thomson, who is arranging things accordingly.

BENNETT HAS HIS OPPORTUNITY.

Taking up the reins of government with a majority such as no Prime Minister has had for years, Hon. R. B. Bennett will be in an excellent position to implement his election pledges by putting through any legislation he desires. Mr. King relied on the support of other groups, which inevitably necessitated a certain amount of bargaining. The Conservative Leader, on the other hand, will be free of obligations to United Farmers, Progressives, Laborites or Independents, which may or may not be beneficial to the country, but which certainly grants him a free hand. He will be able to take full credit for his legislation, and will also be required to accept full responsibility. Under these circumstances the voters will look to him to carry out his election pledges as laid down in his Winnipeg speech and as explained in subsequent addresses.

Mr. Mackenzie King, without delay, in advising His Excellency the Governor-General to summon Mr. Bennett, to form a government, has done, and will do, all in his power to expedite matters that Mr. Bennett may call his special session for the relief of unemployment.

SCHOOLS HAD SUCCESSFUL FISCAL YEAR.

Despite the fact that present general conditions are not at their best, and that many businesses have experienced a falling-off in trade during the past year, it is gratifying to know that the majority of school municipalities have come out on top.

The financial statement of the School Municipality of the Town of Huntingdon appears on another page, from which we learn that it has finished its fiscal year with cash on hand to the total of $5733.88. Salaries paid to teachers amounted to $10,075.

The School Municipality of the City of Valleyfield has also had a successful year with cash on hand as at June 30th of $8632.61. Teachers' salaries totalled $23,550.

SUMMER TOURISTS THIS YEAR.

Other cities and towns in the Province of Quebec are quite aware of the fact that the tourist trade is not this year what it had been heretofore. Mostly responsible are the stock market crash of last fall, and the unemployment situation in the U. S. A.

The Town of Huntingdon has experienced no such decline in tourist business, and only one afternoon this past week, two local merchants sold three suits and two topcoats to friends from across the border.

On July 4th this year records for the Trout River port of entry were broken. However, it is assumed, that the majority of these visitors were here for the day only, or possibly the week-end.

The road census which has been taken this past week by Lindsay Chambers and Forbes McGill will conclude tomorrow afternoon. Similar work is being done at Ormstown and other points along the Caughnawaga-Malone highway. When these figures have been compiled it will be interesting to note the difference between those of Huntingdon and Ormstown Then we will have a fair idea of how many visitors from the U. S. A. come no further than Huntingdon.

THIS HOUSING PROBLEM.

Three or four families which are to be connected with the Hiram Leach & Son (of Canada) Limited are to sail from England next Monday. Huntingdon can well afford an increase in population, but at the same time it should make some provision for that increase. Undoubtedly these families would much prefer a single house which they could properly call home. It is a question if at the present time there is even one house in the town which is not occupied.

Much money is being expended in stocks, and often in those which do not offer very good guarantee. How much better that money would be invested in building a few homes or in a nice apartment house in Huntingdon. The time has come when local well-to-do citizens should realize that if Huntingdon is to grow, it should at least be able to offer housing quarters to newcomers. One family, of which we know, moved to Ormstown this last spring, because a suitable home could not be found here.

Chronicled News Bits

Specially Written for The Huntingdon Gleaner.

Music Through Teeth.

The teeth were substituted in hearing for the ears in an invention exhibited recently at the home of Dr. Frederick Bedell, professor of physics at Cornell University, Ithaca, N. Y. The professor's guests appeared to sip their music through straws as they listened to a phonograph, the sound of which was inaudible to the ears. The seeming straws were long pieces of wood, with sharp pencil-like points. The listeners placed the sharp points on a tiny metal disc on a round, cloth-covered ball the size of a big fist, that concealed the mechanism of the invention. The metal disc was a special receiver for the deaf, transmitting its inaudible vibrations to the wood. By hitting the other end of the stick lightly the listeners could hear, and to two of the auditors, at least, the music sounded as perfect as when audible to the ear. Professor Bedell said he perfected the device in hope that it will be useful for the deaf in listening to talkies and radio. The receiver would be placed on the backs of seats and the straw-like sticks would cost but a trifle. They are ordinary wood. The sound vibration pass directly to the auditory nerves through the bones. No ear drums are needed. Professor Bedel said that only destruction of the auditory nerves prevents hearing by the teeth method. He adopted it after consultation with members of the medical faculty at Johns Hopkins, who said that about two-thirds of the deaf could hear through teeth vibration, a larger percentage than could hear by any other single method. The secret of the new receiver is the power of its vibrations. The strokes are shorter than those in sound vibrations pass directly to the auditory nerves much like the famous six inches that some of Jack Dempsey's knockout punches travelled as compared with the full arm swings of lesser fighters. The short hard sound punch transfers to the wood a vibration of strong carrying quality, without distorting the sound. The instrument is made to plug in like a sound receiver of a loud speaker.

• • • • •

Dogs Make Town.

Karasjok is a small town in northern Norway, above the sixty-ninth meridian in the center of the region known as Lapland. It lies a few miles west of the confluence of the Karasjok and Tana rivers, the latter forming the boundary between Norway and Finland. The town's population is made up mostly of Laplanders and is the home of the Balto family, made famous by an Alaskan malamute, named in honor of one of the members of the family. Balto was the lead dog of Gunnar Kasson's famous team that carried diptheria serum on the last 60-mile lap in the 600-mile sledge race from Nenana to Nome during the epidemic of February, 1925.

• • • • •

Before Age Of Baths.

In the days of Cromwell public bathing, no matter how heavily attired the bathers were, was strictly forbidden and our Puritan forefathers brought this rule over to New England with them, so it is very likely that on warm days 300 years ago what bathers might be found on the beaches of Massachusetts were Indians, with perhaps, an occasional backsliding Puritan. Another Puritan law was that if a person must bathe, it should be in a dark room, with no mirrors, alone, and at night.

• • • • •

Heat Home From Bottle.

Homes of the future will be heated by electricity "bottled" up in a reservoir in the house at night when the electric company's facilities are not busy, and used the next day, in the opinion of Chester I Hall, an electrical engineer. The "bottle," containing water, would be heated during the night by electrodes which would raise the water temperature to boiling. By reason of insulation, the reservoir would retain its heat during the day. It would be equipped with thermostatic controls. Such a heating plant would be economic, it was estimated, if the power company could store the heat during the idle hours of the night.

• • • • •

Dinner Bell Not Needed.

Bees don't carry wrist watches and they don't have any alarm clocks in their hives, but they are always on time for meals just the same. Not only that, but they quickly learn of changes in feeding time and adjust their schedules accordingly. The time sense of bees has been investigated by I. Beling of Berlin-Dahlem, Germany, who has reported his results to the scientific journal Die Naturwissenschaften. He set out saucers of sugar water at a given hour of the day. In a couple of days the bees knew when to expect the "hand-out," and turned up on time, or even a little before time. They kept it up even when he stopped offering free food. Then he changed the hour and also increased the number of feedings to two, and in some experiments to three. The bees quickly learned the new schedule and turned up expectantly at the right time.

• • • • •

Music Helps Efficiency.

As far back as 1886 the head of a southern factory, where cigarettes were rolled by hand, placed good singers in his workrooms to increase efficiency and contentment in the plant. There are today several hundred American industrial organizations that encourage musical activities among their employees. A survey conducted by the National Association for the Advancement of Music reports that 32 companies allow the musical programs to be conducted on company time, while 132 allow them to be conducted half on company time. Experiments prove that under the influence of music more work is done and fewer mistakes are made.

• • • • •

Wirelessing a Newspaper.

The entire front page of a newspaper, with the title, headings, types of various sizes, and illustrations, has been transmitted by wireless and reproduced perfectly as an experiment. The apparatus by which this was done was invented by Mr. Charles Young, son of the originator of the Young Reparations Plan. The newspaper whose front page was transmitted was the "San Francisco Bulletin," and reception of the full-sized reproduction took place in the laboratory attached to the broadcating station WGY at Schenectady. The letterpress and illustrations came through with astonishing perfection and the process was conducted at the rate of about half an inch a minute. The apparatus is said to be very compact, occupying little more space than an ordinary suitcase, and it can be adapted to any existing wireless transmitter or receiver. Several other processes of transmitting pictures and print in facsimile are in use, and it is possible that in the not far distant future the special correspondents of newspapers will transmit their despatches, not by Morse telegraph, but in actual type. Services for the facsimile transmission of pictures are already in operation all over Europe, as well as between the Old World and the New.

• • • • •

A Lucky Break.

Three men at Chicago went to the races and won so much money they could not get it all in their pocketbooks, and that was a good break for them. The three, J. C. Wilkinson, Adolph Bernbach and E. W. Waltman, wagered wisely on long shots. When they boarded the train returning to Chicago they tried to put their winnings in their pocketbooks, but they had too much and they had to put it in their pockets loose. Reaching Chicago, the three entered an automobile to drive home. Another car, carrying three robbers, forced them to halt. Just then another machine was heard approaching, so one of the robbers shouted: "Quick, your pocketbooks." The victims gladly handed over their wallets, containing altogether $340. In their pockets, safe, was something more than $5,000.

• • • • •

A Brave Warrior.

John Wesley Herring, 86-year-old Civil War veteran of Kansas City, marched with Sherman to the sea only once, but marched with his third bride to the altar, Mrs. Josephine Slagel, aged 69. Herring's first wife died several years ago. His second marriage ended in divorce. But he says the third one is real love and that it will last.

• • • • •

Expensive Sardines.

Grover Lutter had a barrel of fun at the expense of Jake Nauer, his friend, at Racine, Wisconsin, the expense being exactly $1.90. "I wish," said Nauer when Lutter went fishing, "you would send me part of your catch, you being such a wonderful fisherman, says you." "Sure," retorted Lutter, "I'll send you a barrel full." A few days later the barrel of fish arrived. Nauer paid $1.90 freight charges. He opened the barrel. It was full of sawdust. Down at the bottom was a can of sardines.

• • • • •

No Dance Nor Auto.

The life of a professional soccer football player in England is well regulated. Dancing is prohibited by one club, motoring by another, and no golf are orders that prevail in several quarters. A Scottish league club puts them all in the pale by waging war on excessive cigarette smoking, and insisting that their players be in bed at 8 p.m.

• • • • •

That Big Nickel.

Money usually comes in handy, but in this case the big U. S. nickel almost cost Martha Hull, of Billings, Montana, her life. The 2-year-old child swallowed the coin. The five-cent piece obstructed the passage of food for three days. Finally a delicate operation was performed to remove it.

• • • • •

Shun Incubators.

While the peasants of Spain shake their heads over incubators, every year $10,000,000 in hen fruit is imported into the country to meet the scarcity of eggs. Still under the influence of the middle ages, the uncultured peasant class hold that hatching of chickens by artificial means is the work of the devil.

• • • • •

Vandals Boom Business.

The retail glass business of Butte, Montana is thriving and a group of young vandals is the answer. Their unerring aim with airguns and rocks has cost the school board $852.65 for broken glass replacements in public schools since the beginning of the school year. Somehow or other, the pupils over there don't have to pay for damage done.

• • • • •

Stork Halts Drive.

The stork halted the journey of 3,000 spotted reindeer purchased by Canada from Alaska herders. The reindeer were being driven to the mouth of the MacKenzie River. Before they arrived at their destination more than 1,000 fawns had been added to the original herd. While the Government had bargained for 3,000 reindeer they got about 4,000.

• • • • •

Died in Poverty.

Lieutenant-General Constantin de Brummer was once a shining light at the Czar's court. He has just died in a public hospital at Paris after years of poverty during which time he served as night watchman in a garage, and more recently, as invoice clerk. He was an aide-de-camp and cousin of the late Grand Duke Nicholas. He was 73 years old.

• • • • •

Hindenburg Courtliness.

President Paul von Hindenburg is not only a great soldier and statesman, but also a courtly gentleman of the old European aristocratic type. At a garden party given by him in honor of the Olympic Congress the eighty-two years old warrior politely bent over the hands of every one of some fifty ladies introduced to him and kissed them with the inimitable grace of his old age and charming personality. The American ladies present expressed their delight over the lovable manner of the old gentleman and his winning smile, saying that there was nothing about the President that would remind you of the fact that he was once the most feared warrior in Europe.

• • • • •

100 Lbs. To 38.

The police of Chicago walked in upon a strange scene in the cottage where Miss Dina Schreiner lived. Miss Schreiner, 55 years old, speechless and deaf from lack of nourishment, lay on a bed, shrunk by starvation from a normal weight of 100 pounds to 38. Seated watching her were her brother-in-law, Jacob Pfeiffer, 78 years old, and her nephew, Joseph Shea, 37. An ambulance was called and the woman moved to a hospital. She died shortly afterward. She had fasted so long that physicians dared give her only a mixture of milk and water, and even this was fed to her in a medicine dropper. When found Miss Schreiner was too weak to talk or even to signify by motions the reason for her failure to eat. A doctor had notified the police after Shea had called him.

• • • • •

Another Shrinkage.

There has been a storm in Switzerland this last week which "at times reached the proportions of a veritable cyclone," and, as such, it has received the reward of a paragraph from Reuter. But it seems rather sad to read that "hailstones the size of walnuts fell in many places." For reports of this nature "the size of walnuts" seems a very poor and unambitious effort—tennis balls or cocoanuts is the grander manner, and for preference one likes to read that they went clean through corrugated iron roofs. Alas! everything gets smaller nowadays (except the income tax)—houses, ovens, joints of meat, furniture, and now even the hailstones that occur on the edge of the Silly Season. Whether the rest of that season will do anything to repair our sense of loss remains to be seen—it may be a case of having to put up with the Smallest Giant Gooseberry ever recorded and a Monster Marrow whose chief claim to fame lies in the fact that it is little larger than a cucumber. As for the sea-serpent, it seems to have positively shrunk out of existence—we don't seem to hear of it at all. Really, things are not at all what they were.

HEALTH SERVICE

of the
Canadian Medical Association

SLEEP AND REST.

Good habits of sleep and rest play a large part in securing the healthy development of children. Very many children do not get sufficient rest and, as a result, they do not grow or gain in weight. In addition their appetites are poor, or they are irritable and cranky. Perhaps the most frequent cause of malnutrition in children is lack of sufficient rest.

The pre-school child suffers most in this way. He has reached an interesting age, and often he is allowed to remain up for the evening meal so that his father may play with him. Father most likely thinks that he is amusing the child, but it is really the child who is amusing Father. The child enjoys this play, but it makes him excited, and so he does not settle down to sleep readily when put to bed, with the result that his rest is disturbed.

The child of two and three years of age should be put to bed long before the family's evening meal. The child of four and five should go to bed right after the evening meal, and should not be stimulated by being played with just before his bed-time.

We need never worry about a child's having too much sleep. Up to six years of age, the child should sleep for not less than twelve hours at night, and one or two hours in the afternoon. The night sleep should continue until the child wakes naturally.

The child under six needs more rest than the school child, because he is more active and he is passing through a period when he is developing rapidly, both physically and mentally.

The afternoon rest should be continued. It is better that the child should sleep because sleep is the best form of rest. If he does not sleep, he should be told to lie quietly and rest, and he should not be fussed over for not going to sleep.

Mention should be made that the over-tired child is the one who, very often does not feel a bit sleepy. Parents may think, if the child says he is not sleepy and seems wideawake, that rest or sleep is not necessary. We would like to stress the fact that the underweight and so-called nervous children very often refuse to admit that they are tired.

Children are more active on some days than on others, and, therefore, they are not so tired on one day as on another. It is best, however, to have a regular bedtime for the child, because this makes it much easier for him to go to sleep. He should then be allowed to sleep until he wakens. In this way, he will get all the sleep he requires, which is, without question, what is most essential for his health and strength, but which, nevertheless, entails no expense.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Flattering Assumption

Judge: "You stole eggs from this man's shop. Have you any excuse?"
Accused: "Yes, I took them by mistake."
Judge: "How is that?"
Accused: "I thought they were fresh."—Lustige Blaetter.

YOUNG CALVES AND YOUNG GRASS

Some farmers make the mistake of turning young calves, those under six months old, on pasture, expecting them to get most, if not all, of their feed from grass alone. The most successful dairymen, those who have well grown heifers for herd replacements, continue their calves on grain, skinmilk and hay until they are well on to nine months old before they depend entirely on pasture to supply all the feed.

After that age and up to within six weeks of first calving, dairy heifers will do very well on an abundance of good pasture as their summer feed. As a factor of insurance some dairymen feed a small amount of grain with pasture.

A good many heifers get a bad deal on feed beginning the first of good qualities. Poor pasture must be July when pastures lose some of their supported with grain if normal growth is to be had.

HER RIGHT OF WAY

After the locomotive had smashed a fliver at the crossing, a flappper rose from the wreckage, uninjured, and powdered her nose. The engineer and others gathered around.

Why in the world didn't you stop when you saw the train coming?" asked the engineer.

"I sounded my horn before you blew your whistle," she said defiantly.

A well-known racing motorist is described as a man of parts. Spare ones!

Vienna 2,000 Years Old

It is nearly 3,000 years since an urban settlement was founded on the territory which today is covered by Vienna. The small Roman military camp, Vinoba, developed into the modern metropolis with her enormous municipal area of 275.88 square kilometers, second only to London.

CREATORE BAND BETTER THAN EVER BEFORE

Famous Maestro and His All-star Group of Musicians and Other Great Attractions For C. C E.

On the head of Maestro Guiseppe Creatore, the famous band master, the hand of Father Time has laid itself lightly. For a quarter of a century this great musician has been touring the United States and Canada with his wonderful band and each year he continues to grow in popularity and attract larger audiences as age's milestones are passed. Creatore knows nothing of age. Time to him is just a period with something to do and do it well. It therefore is a source of gratification to music lovers to learn that the directors of the Ottawa Exhibition have arranged for a return engagement and that he and his band will be a feature for exhibition week, Aug. 18th to 23rd.

People go to see and hear Creatore. First of all he gives a most artistic and novel program. Next he conducts in a manner that is bound to attract attention. He promises the strongest band he has ever brought here with each man a musician of the finest caliber. Lovers of singing will be more than pleased to know that with the band will be that popular lyric soprano, Pauline Talma, in a series of songs ranging from the simple melodies and folk songs. Miss Talma is today the most popular singer ever to travel with a band organization. She was discovered by Maestro Creatore four years ago while singing in a motion picture theater in Los Angeles. After hearing her sing some operatic songs in which her voice came out sweet, pure and clear over the audience Maestro Creatore immediately signed the young lady for a tour. She made such a fine impression at the very beginning and critics immediately took to her style, that today she has become a real attraction. During a stay in New York, practically every well know critic came to hear her. Robert Speare, writing in the morning Telegraph, put forth the following lines: "The bill of surprises and no mistake. This Creatore, rampant and vigorous as ever, introduced a young soprano, Pauline Talma. It is a voice of extreme purity, power, range and tenderness, one in a thousand. The singing of this young woman, a lovely girl, would make a visit worth while for any lover of lyric excellence."

With Creatore also comes Mary Brubaker, harpist, a brilliant artist who plays with vigor and assurance and her numbers have musical character and charm. Creatore, his band which includes a number of instrumental soloists, Miss Talma and Miss Brobaker will be heard twice each day during exhibition week.

Best in 47 Years.

Many other stellar factors will combine to realize the hope of the directors to make the 1930 exhibition the best in the 47 years of the Central Canada exhibition Association. These include the Winter Garden Revue, a spectacular music and dance production with pretty girls, color rhythm, harmony; exhibitions by Siskin planes, secured through the minister of national defence; aerobatics and formation flying arranged through the Ottawa Flying Club, an unusually strong bill of outdoor vaudeville attractions, a new midway, horse races, aquatic, field and track sports, automobile show, pure food show, live stock and poultry, child welfare demonstrations, baby show, horticultural and other displays.

This year there will be an outstanding feature provided by the Ontario government. This will consist of all kinds of wild animals, birds and live fish, shown with elaborate reproductions of their natural habitat. Then too there will be a remarkable showing of gold and tropical fish by Anson Pratt of Ottawa, who will arrange a display that has not been eclipsed in Canada.

FALL TERM, SEPTEMBER 2, 1930.

Cornwall Commercial College — the school you will attend if you investigate

CORNWALL, ONT.

FRANKLIN CENTRE

Mrs. M. E. Young who has been home for a few days returned to her summer resort in Alburg, Vt., on Friday.

The regular monthly meeting of the W. C. T. U. met with Mrs. Fred Stephenson on Thursday afternoon. Besides the regular attendance of members there were eight visitors. Mrs. Waller gave a talk on the liquor problem, after which Rev. Mr. Duncan gave a very interesting address. The meeting closed by singing the Temperance Doxology. A lovely lunch was served by the hostess.

Mr. and Mrs. Warren Thompson of Dewittville and Mr. and Mrs. Walter Frier and son Harold motored to Swanton, Vt., on Saturday and were the guests of Mr. and Mrs. Eddie Gay and family.

Mrs. Ralph McLaren and two children of Buffalo, N. Y., are the guests of her parents, Mr. and Mrs. R. C. Manning.

The regular meeting of the W. I. met in Mr. Norman Towns grove for a picnic on Friday, 5 members and 10 visitors were present besides a lot of children. It was voted that our library be opened to the public without charge for reading of the books, if books were returned at the end of two weeks, if not, the small sum of 5 cents would be charged. The library is at present at the home of our Vice-President, Mrs. A. A. Rowe. Very interesting books on fiction, history and poetry are in the collection. Donations of interesting and instructive books are solicited. Meeting then adjourned and every one partook of the good things provided.

Miss Jean Manning of New York City is the guest of her parents, Mr. and Mrs. R. C. Manning.

Miss Elizabeth Bowden returned home to Montreal on Friday after spending two weeks with her friends, Rev. and Mrs. Duncan.

Mr. Henry Rowe and family of Malone, N. Y., were the guests on Friday of Mr. and Mrs. Will Hanna, Mr. and Mrs. B. M. Johnston and Mr. and Mrs. Merritt Adams.

Miss Vance West of Montreal, spent a few days with her uncle and aunt, Rev. and Mrs. Duncan, last week.

Mrs. Robert Brooks and Mrs. Woodrow Jackson of Covey Hill were callers at Mr. and Mrs. W. A. Sharps last Thursday.

Mr. and Mrs. John Dickenson and Mr. William Woods motored to Chateaugay and Malone, N. Y., on Friday, returning home Saturday.

Miss Dorothy Sharp spent a day in Montreal recently.

Mr. Walter Lamb is the guest of his parents, Mr. and Mrs. Ruben Lamb.

Mr. Frank Davis of Montreal, who has been a guest of Mr. Harry Moneypenny for two weeks returned home on Sunday, taking Mr. Josie Moneypenny with him.

Miss Roxy Adams of Boston, Mass., is the guest of her brother, Mr. Merrit Adams and family.

Mrs. W. A. Sharp motored to Montreal on Sunday to visit her mother Mrs. Waddell, who underwent an operation for appendicitis two weeks ago. Glad to report Mrs. Waddell will be able to return home this week.

Mrs. O. Neeb and Mrs. T. Helring of Long Island, N. Y., who have been the guests of Mr. and Mrs. Harry Moneypenny for the past two weeks returned home last Monday.

Mr. and Mrs. George Sproule and son Edmund motored to Malone, N Y. last Saturday and were the guests of his sister, Mrs. Manedly and family over the week-end, returning home Sunday evening.

Mr. William Woods, who spent last week with Mr. and Mrs. Charles Rowe, returned to Montreal on Sunday.

Mrs. William McKinnon and baby returned home to Massena, N. Y., on Thursday.

Mrs. M. Oliver and Mrs. Howard Pollock of Rockburn were the guests of Mr. and Mrs. Charles Rowe on Saturday.

Mr. and Mrs. Miles Towns and Mr. and Mrs. B. M. Johnston and family motored to Mooer's Camp Meeting on Sunday.

ST. ANICET

Mr. and Mrs. Elmer Caza and family of Huntingdon were Sunday visitors at the home of Mr. J. C. Smythe.

Mr. and Mrs. Frank de La Fosse, Miss Freida Lamb and Messrs. Harry, Raymond, Norman and William Finigan of Montreal, were week-end visitors at the home of Mr. and Mrs. Michel Primeau.

Mr. and Mrs. John E. O'Neil, daughter Janice of Saranac Lake, N. Y., Mr. and Mrs. Bert Primeau and Cheri Hervieux of Summount, N. Y., were week-end visitors at the home of Mr. Alfred Primeau and other relatives here.

Mr. and Mrs. J. C. Lorden and family of Huntingdon, were Sunday guests at the home of Mr. and Mrs. John A. Saumier.

A burly dog fancier was taking his big Alsation for a run when he met a man with a very small puppy at the end of a leash.

"Hi, guv'nor!" shouted the burly one. "Hold your dog tight; I think mine's going to sneeze!"

HUNTINGDON

Mr. Jas. Powers of Three Rivers, Que., has been enjoying a week's holidays here.

Mr. Allister McCaig of Lachine, is spending a week with his grandmother, Mrs. C. Bell.

Mrs. J. B. McDougall of Lancaster, Ont., has been visiting at the home of Mr. and Mrs. Albert Howden, Henderson St.

Mr. and Mrs. Walter O'Connor and family of Notre Dame de Grace are spending a few holidays at the home of Mr. and Mrs. Thos. McConville.

The Misses Ann Burke, Hortense Becker and Madeline Mathews of Cleveland, Ohio, visited last week at the home of Mrs. Joseph Walsh.

A number from town motored to the St. Hubert airport over the week-end to see the giant British dirigible R-100.

Miss Madeline Malloy is spending a few weeks with friends in Lewiston, Maine.

Mrs. H. S. Barber and granddaughter of Watertown, N. Y., are visiting at the home of her brother, Mr. and Mrs. John A. Hunter.

Miss Doris Allen is spending a few weeks in a Toronto hospital, where she has enrolled in a special course for Dietitians.

Mr. Nelson White of La Tuque is spending his holidays at his home here.

Mr. and Mrs. Merrill Thomas of Whippleville, N. Y., Mrs. Matilda Wood of Malone and Mrs. Minnie Marsh of Burke, motored to Huntingdon on Thursday to spend the day with Mrs. Nettie Thomas.

ORMSTOWN

Miss Eunice Patton spent a few days last week in Montreal.

Mrs. Edward McClellan of Notre Dame de Grace, was the guest last week of her sister, Mrs. George Bustard.

Mrs. John L. Winter spent the week-end at Huntingdon, the guest of her mother, Mrs. Fleming.

Mr. and Mrs. Thompson, who have been spending two weeks at the home of Mr. and Mrs. James Atkinson spent a few days in Montreal before returning to their home at Megantic, Que.

Mr. and Mrs. Russel Meikle and little son, spent the week-end in Montreal.

Mrs. Henry Winter was the guest last week of relatives at Maxville, Ont. and Montreal, Que.

Mr. Hugh Tannahill of Huntingdon was the week-end guest of his sister, Mrs. Finley Wilson.

Miss Helen McNeil of Montreal was home over the week-end.

Rev. Mr. and Mrs. Pollock are enjoying a month's vacation.

Dr. and Mrs. Marston of Montreal, are occupying the Manse during the month of August.

ATHELSTAN

Mr. and Mrs. Robert Anderson and little daughters of Kingston, motored through and spent the week-end at the home of his brother, Mr. Alex. Anderson.

Miss Annie Barrie of Huntingdon, and niece, Esther Fee of Burke, N. Y., spent Sunday with W. E. Barrie and family.

Miss Elizabeth Grant, Mrs. F. D. Grant and little daughter Arlene are visiting this week with friends in Shawville.

Mrs. George Elder of Huntingdon is spending a few days among friends.

Dr. and Mrs. Annis and daughter Miss Mildred Annis of Lindsay, Ont. are guests at the home of Mr. E. A. McHardy and other relatives this week.

Mrs. Tena Cairns spent the week-end in Huntingdon with her sister, Mrs. D. A. Macfarlane.

The sympathy of the community is extended to Mr. F. X. Dorais in his recent bereavement.

The Women's Missionary Society of the United Church entertained the members of the Wide Awake Club and Mission Band, Friday evening on the lawn of Mr. William Blaike. Rev. J. Woodside gave a most interesting talk to the young people. Games were played and a very pleasant evening was spent. Ice-cream and cake were served to all present.

CHATEAUGUAY BASIN

SPARROWGRASS' LETTER.

Dear Mr. Gleaner:—

We now have the "calm after the blast," and judging by the reception given to our new member for Chateauguay and Huntingdon on Tuesday night, last which took place at Chateauguay Village, and which was attended by about five hundred of the voters of our district, I should say that a lot of the hard feeling were forgotten and that the tense nerves which are apt to run away with one's better judgment, were at last relaxed. The reception committee, composed of Mr. and Mrs. Arthur Laberge, Mrs. David Lang, Miss Rhoda Macfarlane, Mr. A. N. Laberge, Mrs. A. Boucier, Mrs. Grises and others, made adequate arrangements and the speakers had a good rostrum, on the porch of Mr. A. Laberge's house. Mayor Desparois conducted the meeting and the speakers were the new member, Dr. J. C. Moore, Mr. J. H. Rainville, A. Dubleau, Frank Jacobs, of Caughnawaga and Mr. Lafolley of Montreal and Woodlands, who spoke in French and English. Mr. Jacobs told the audience that although the franchise was withheld from the members of the Reserve they still had an opinion. Dr. Moore thanked the audience for their wonderful reception and at the conclusion Miss Annette Laberge presented Dr. Moore and Mr. Rainville with very handsome bouquets of flowers. The reception was closed by the singing of "He's a Jolly Good Fellow" and "O, Canada."

Mr. and Mrs. Norman Ashley entertained their nephew, Mr. Milne and his bride, to their wedding dinner. After dinner the happy couple left by motor for Montreal.

We were very pleased to see our old friend, Rev. Robert McVey, of Lansdowne, Ont. Mr. McVey, who was a former pastor of St. Andrew's United Church, has been attending the summer school for ministers of the Province, which is being held at Macdonald College, Ste. Anne de Bellevue. We hope to see more of Mr. McVey before leaving for home.

The Rev. J. Duckworth, of Montreal, preached morning and evening at St. Andrew's, on Sunday, and gave two of the most forceful and convincing sermons which it has been my privilege to hear. The choir was sadly depleted by the ladies being away on their holidays. The pastor and his Trail Rangers are expected home towards the latter part of the week. An old friend of St. Andrew's Mr. John Ogilvy, was noticed in church at the morning service which made things look like old times when he was a constant attendant at Divine Service in old St. Andrew's.

The great event of the week was the landing of the R-100 and the interest displayed by all in its safe arrival. There was a little disappointment experienced by those who went into Montreal or out to St. Hubert to see the actual landing, but I think this was mostly overshadowed by the joy that the Old Country had shown that she was equal to the best in the building of ships of the air as well as ships of the sea, and everyone will wish her a safe return to England.

Truly yours,

SPARROWGRASS.

ELGIN

Mrs. Jas. McIntosh and daughter Louise of Whitby, Ont., are guests at the home of her daughter, Mrs. John G. Henry this week.

GLENELM

Miss Lillian Murdoch is spending a few weeks in Syracuse, N. Y., the guest of Mr. and Mrs. Stanley Murdoch.

Messrs. James and Thomas Anderson and Miss Lizzie Anderson of Huntingdon, visited at the home of Mr. and Mrs. H. R. Wilson on Sunday.

Mr. and Mrs. Glen Harvey of Saranac Lake, N. Y., spent the week-end with her parents, Mr. and Mrs. Malcolm Hamilton.

Miss Irene Coffey of Montreal spent Sunday at the home of her father, Mr. Andrew Coffey.

Mr. and Mrs. W. H. Crawford and family, and Miss Jane Elliott were Sunday guests of Mrs. W. H. Hampson, Burke, N. Y.

Miss Jane Elliott of Howick, spent a few days at the home of Mr. and Mrs. W. H. Crawford.

Misses Bessie and Robina Seaward were Sunday guests of their friend, Miss Margaret Cooper, Athelstan.

Dr. James Seagar, Mrs. Lyons Allen and Miss Annie Seagar of Ottawa, spent the week-end at the home of Mrs. Peter Paul. Mrs. William Paul and daughter Shirley, who have spent the past three weeks in Ottawa, returned home with them.

Miss Violet Powell of Toronto, is spending her vacation at the home of Mr. and Mrs. J. J. Tannahill, Trout River.

The monthly meeting of Kensington Ladies' Aid took the form of a social evening, and was held at the home of Mr. and Mrs. Arthur Watson on Thursday evening. In spite of the rain, seventy members and friends were present. The meeting was conducted by the President, Mrs. Douglas Elder. Music was furnished during the evening by Misses Cora and Helen Macfarlane. At the close a delicious lunch was served to all by several of the ladies. * Proceeds of the meeting were $18.60.

Nature's Beauties Set Off Brazilian Capital

Rio presents to the traveller entering its harbor the most beautiful setting in the world. Nature was infinitely beautiful and it was no mishap that the people built up a beautiful city to emulate the example. From the harbor the city presents at the water line a solid white against the blue of the water.

Fascinated a couple of years ago by a description of the scene—although very meager— written by a newspaper man, it is passed along as not only authentic but beautiful and diverting:

"Rio de Janeiro is one city in the world that does not disappoint. No matter what a person has read or been told about it, or what preconception he has evolved out of his inner consciousness, no one is ever let down by seeing Rio in the flesh. He will find it different from his imagination, of course, but not disappointing. The bay is 16½ nautical miles long and 12 nautical miles wide and is as blue in the sunshine as the aquarine dug from the hillside of the neighboring state of Minas Gereas. At other times it is an emerald, an amethyst or a black pearl, depending on the light conditions. It is big enough to provide anchorage for all the navies of the world, and still have room enough for a reconstruction of the battle of Jutland. It has as many arms and reaches as far as a first baseman."

COVEY HILL

A record attendance turned out to the reception tendered Dr. Moore in the Town Hall last Friday evening. A capital musical programme included from the St. Chrysostome orchestra, violin solos by Messrs. Jas. and Wilmer Mannagh, and songs by Mrs. H. Gilmour, the Misses Rita and Hazel Gilmour and Mr. Aaron Stewart. The latter on being encored gave a recitation, pithy and very apropos to the occasion. Dr. Moore and Dr. Walsh gave timely addresses. Mr. W. R. Perry acted as chairman. At the close of the evening, refreshments were served to all. The decorations, programme and all other details reflected credit on all who worked for the success of the event, and in this connection special mention must be made of Mr. Martin Beattie's efficient and energetic management.

Mr. W. R. Perry met with an accident last Thursday which might have proved a serious one. While he was driving a load of hay into his barnyard, his attention was taken up with a somewhat frisky horse and his head struck against the top of the doorway causing a nasty wound.

Mrs. Baker of Montreal spent the week-end with her daughter, Mrs. L. Waddell.

The U. C. W. M. S. met on Thursday at the home of Mrs. C. B. Edwards.

Mr. Marshall Simpson of New York spent a couple of days last week with his brother here.

Mr. and Mrs. Geo. Hooker of Ormstown, also Mr. and Mrs. K. K. Pearce and children Lorne and Keitha of Lachine, spent Sunday at the home of Mr. W. R. Perry.

Mr. Herman Cole is at the Lilacs for a couple of weeks.

St. Anicet Council

The Mayor and all Councillors present.

On motion of Coun. A. Trepanier the following bills were approved:—A. Fournier, $17.42; D. Fournier, $10.12; Z. Fournier $29.75; J. Quenneville, $3.75; H. Quenneville, $11.80; F. I. Quenneville, $13.05; M. Quenneville $5.37; S. Caza, $48.25; G. F. Higgins, $23.40; P. Higgins, $23.25; Village sidewalks, $565.45; St. Charles West, $391.45.

On motion of Coun. A. Primeau the Minister of Roads will be asked to finish the Delmont Road for $1500.

On motion of Coun. A. Trepanier a sum of $650. was allowed for the construction of the St. Charles West Road.

On motion of Coun. A. Trepanier tenders are to be asked for the building of a cement bridge on the new road.

WILSON'S FLY PADS REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

FEEDING THE BABY
(By a Nurse)

Improper and irregular feeding of babies is the cause of most ill-health in later life. It is foolish to give any baby "tasters' 'of food which adults may be enjoying. All that a baby should have in the early months of its life is milk, a little water to quench its thirst, and a little diluted fruit juice. Bring a baby up on these and it will grow into a healthy child and a strong adult.

To keep feeding a baby because its stomach is so tiny, as many mothers will tell you, is another grave mistake. A baby's stomach is in perfect proportion to its frame, and increases in size with its frame; so to overload it in an attempt to make it grow faster is putting an uncalled-for strain on the child's small organs, and laying up serious trouble in after life.

When babies are fed too often, or given too much food, the stomach has to work overtime to deal with it.

Folly of Over-Feeding

Even then, a great deal of food remains in the digestive tract for too long a period to enable it to pass through the stomach in good condition. This is the reason some babies are always cross, often sick, suffer from gastric disorders and constipation. The food, fermenting in the digestive tract, causes untold misery and brings about catarrhal disorders and skin eruptions.

The trouble does not end here. Over-feeding brings about an unhealthy condition of craving which is not satisfied by food. To satisfy this craving the unwise mother loads her child with all manner of indigestible things.

If mothers would realize that improper and injudicious feeding blunts a child's normal desire for food, and sets up a vicious circle of unnatural craving which cannot be satisfied, they would never be tempted to do anything but feed baby at certain times and with a certain amount from the very beginning.

Storing Up Trouble.

Another mistake is to feed a baby at all hours of the night. A baby which has been brought up from its earliest day to have only a drop of water at night will soon learn to sleep soundly until breakfast-time. A baby's stomach requires rest in the same way as an adult's. Indeed, more so, as a baby's stomach has not got hardened to the rough usage of its owner and rebels more quickly than is the case when one is older. If you take proper care of a baby's stomach you give it a chance of developing and strengthening in a proper and natural manner.

Some artificially-prepared foods contain more starch than a baby can assimilate, because a child cannot properly digest starchy foods until it can toddle. This is why a baby should be fed on nothing but milk, with a little diluted orange juice and water as a thirst-quencher. The safest way is the best way if you want your baby to grow up to healthy adult life and escape the tortures of indigestion and constipation—both of which have their origin in wrong feeding in babyhood.

EASY METHOD SUGGESTED FOR LEARNING HOW TO SWIM

To be able to learn to swim without spending too much time and effort at the work would be a boom to many. Whether there is such a method or not, The Gleaner does not know. The Sault Ste. Marie Star professes to give such a method, but whether the Sault Ste. Marie Star is absolutely to be relied upon in such a case is not sure. It is a fact that recently the Sault Star admitted that all its wolf stories have not been true, but that, indeed, some of them were used simply to get the ear of the public.

However, here is the Sault Ste. Marie Star's supposedly infallible plan for learning to swim quickly:—

"If you cant's swim, you may learn easily and quickly.

"This system has stood the test of experience. Stand in the water up to your waist, inflate your chest, cup your hands with fingers together, lower your body into the water, remembering that you should only breath through your nose. Strike out so vigorously with both hands, that you tire yourself in six strokes. In nine cases out of ten the feet are off the ground at the end of the first trail. Don't swim high. Keep all of the body possible in the water. Lack of confidence is the great bar. Stick to it and you will quickly learn to swim."

You know what you get

When you buy branded beef bearing the red or blue brand of government inspection you know what you get. Much effective work has been done by the Live Stock Branch of the Dominion Department of Agriture in respect to popularizing branded beef but the serious fact is that there is an acute shortage of beef animals which wil measure up to the strict standards of the official grades. Most of the larger retail stores, however, now stock one or both grades. There are only two grades in branded beef; "Choice" and "Good". The "choice" beef is in all cases designated by the red brand. This grade is necessarily limited in volume and represents the product of particularly high class well finished cattle. The "good" beef is indentified by the blue brand and is the grade in greatest supply. It includes only beef which can safely be recommended as of good eating quality. Six months in operation finds the new brands gaining rapidly in popular favour particularly because of the assurance of quality which the government stamp provides.

BETTER RATIONS PREVENT ROOTING

When sows, shotes, and pigs turn the sod of pastures upside down in rough, irregular patches, their owners have a tendency to turn their tempers upside down in anger. No doubt the hog ring was invented by someone who wanter to get even with his hogs for what he considered an unnecessary justice.

For many years the hog ring was in great demand as a means of giving swine a stinging rebuke for their depredations. In many cases the rings were used even before the pigs had committed any crime against the fair surface of a good pasture. The practice of ringing hogs was apparently based on the assumption that our modern swine will root under any or all circumstances, being bound by traditions of early ancestors which found the nose an essential means of making a living.

Not so many years ago, some one being satisfied that the only reason why modern hogs root is because their early ancestors gathered much of their living beneath the surface of the soil, set about finding a substitute for hog rings.

When a pig is not fully satisfied with the feed offered him by his owner he takes advantage of any opportunity to supplement his ration. Being well equipped with a convenient means of undermining the surface soil he prospects for more palatable feed, being persuaded by instinct that, if found, it will aid in satisfying his requirements. When he finds something beneath the surface of the soil which he likes better than that which his owner offers him, he helps himself with his nose, in a manner resembling his ancestors. He is like a boy who turns the pantry upside down in search of jam to spread on his bread. It tastes better.

The succulent, tender roots of pasture plants, the bodies of insects, and various forms of mineral substances tempt him to disregard his owner's desire for a perfect sod in his efforts to get what he likes—and in many cases what helps him to do better.

In time the substitute for hog rings was found to be in well balanced, palatable rations such as will leave no craving for more palatable of feed. The feed a pig finds with his nose sometimes affords hard competition for those offered by the owner People eat more of the foods they like than of those they do not like. The hog will not be denied the same privilege if given the opportunity to select his feed.

Like most substitutes, well balanced, palatable rations do not always prevent all rooting. It may be said in general, however, that when sows shotes, and pigs are properly fed they will not do much damage to pastures with their noses. Palatable carriers of protein from animal source, such as skimmilk and tankage, together with an adequate supply of essential minerals, will go a long way in helping pigs to forget that their remote ancestors found the nose a very essential part of their anatomy.—(Hoard's Dairyman).

DIAGNOSE DISEASES

The following hints re deseases, which were published a short time back, are reproduced at the request of a correspondent:-

Experienced keepers will no doubt subscribe to the statement that it is often more easy to prescribe for diseases of fowls than it is to detect their nature in their earlier stages—in other words, to diagnose them.

When the excrement secreted by the kidneys, which is normally pure white, appears yellow, though the droppings are solid, and the bird appears perfectly healthy, look out for bowel trouble.

When the crop is hard and unyielding, there is danger of the bird becoming crop-bound.

When the discharges are streaked with blood, it is time to give preventatives for diarrhoea.

When the joints are hot and swollen, and the fowl is disinclined to stand rheumatism has taken hold.

When the nostrils are clogged with dirt, and the eyes water, ward off a possible case of roup by timely treatment. If the case is bad, apply the hatchet, and bury the carcass.

When the bird seems lame, and has a small swelling on its foot, remove to a house with no perches, and oblige it to roost on a bed of straw. Bumble-foot is easily cured in the early stages if the cause is at once removed.

When a hen seems to drop down behind, and goes repeatedly to the nest, without laying, she is usually suffering from a disorder of the oviduct, and might as well be killed and eaten.

When a bird is "going light", has good appetite, but passes food from the bowels undigested, it is the early stages of consumption, and treatment is useless.

When the hen seems giddy, and turns round and round, she is probably suffering from apoplexy.

When the bird has leg weakness, with no disorder of the liver, feed lighter, and give plenty of bone-forming material.

When the new fowls are brought, quarantine them until they have no disease.

When a fowl has difficulty in breathing, look out for pneumonia.

When a fowl is dangerously sick with an organic desease, it is worse than useless as a breeder. It is usually safer to kill a bad case of illness than to try to cure it.

NAPOLEON'S WRITING
"Clisson and Eugenie," Written at 16, Still an Unread Book.

Just how good—or how bad—the story (a love story called "Clisson and Eugenie," written by Napoleon Bonaparte when he was sixteen) may be will never be known, for Napoleon's writing, always difficult to read, is here at its worst, says A. Vibert Douglas in Atlantic Monthly.

As a novelist he is at a disadvantage resembling that of the learned Dr. Parr, of whom it was said that "none would ever know the extent of his erudition, as no one could read his writing, and when he talked no one could understand him because of his harelip."

Napoleon is supposed to have been a man of extraordinary coolness—with an occasional outbreak of temper—probably histronic. I have a letter written by Maret, the emperor's Minister of Foreign Affairs, in which he says: "The only calm person in this crisis is the great man." Physicians noted that the emperor's pulse was abnormally slow.

Conceding the calmness, the handwriting of Napoleon is an argument against the revelation of character by autography. He wrote an exceptionally bad hand, generally indicating frantic haste and feverish excitement.

A page of his manuscript makes the famous scrawl of Horace Greeley look like copperplate by comparison. It is told of Greeley that an irreverent compositor once let a fly half-drowned in ink crawl over a paper and then went to the great editor to protest that he could not "make out this word." Mr. Greeley glanced at the fly tracks and promptly said the word was "unconstitutional."

Napoleon's writing is like that. Fortunately there lives in Paris a gifted creature employed as an expert by Charavay, the leading authority on French autographs. This solver of cryptograms has deciphered most of the manuscript of Napoleon's love story, though some paragraphs baffled him.

MRS. SOLOMON SAYS:

Don't worry if your children begin at the bottom of the ladder; that's the kind of folks who learn to climb.

Many parents fail to realize that this is a changing world and they try to hold their daughters to the kind of life they lived. "I had to quit school at twelve years of age and go to work. What was good enough for me is good enough for Mary," says one mother. Perhaps the girl's mother dies—these are the pitiful cases, for a mother is the natural protector of a girl. With no mother, she is placed around, in this home and that, and she becomes unstable and irresponsible.

Her father or her mother may be in prison. She may be the victim of an older man. She may have no natural opportunity for recreation or education or to learn a trade. Both parents may work away from home and she be permitted to run the streets. On the other hand, she may be so closely supervised that she has no chance to associate naturally with girls and boys of her own age. This may lead to her immorality when she arrives at the "boy-struck age."

There are many of these underprivileged and harassed "little Sisters" and the woman who finds such a girl and gives her love and leadership and opportunity to make good will likely be able to save a soul.

YOUTHFUL LOVERS MADE VICTIMS OF UNKIND FATE.

One of the minor executives in a large New York office and one of the secretaries had been carrying on a secret romance for some time, although no one in the establishment was aware of it.

Being an up-to-date young man, the executive, who shall be known only by his first name, Philip, to save embarrassment, carried on his courtship in a modern manner. Instead of writing her letters in the preliminary stage of his campaign he conceived the idea of waiting until the rest of the office had gone hom- and then speaking a few words into the dictaphone she used.

The next morning she would put on the ear phones and hear something along this line: "This is Philip, sweetheart. Don't forget I love you."

But one day the secretary was ill and could not report to work. The result was that her substitute, starting to transcribe the letters on the cylinder, heard the love message and burst into laughter.

Philip was unable to stand up under the razzing he received daily thereafter and soon found another position.— (New York Sun.)

RHUBARB FOR HEALTH

Rhubarb is one of the best cleansers in the form of food that we have, yet many people do not like it. Children are apt to grow tired of it very quickly. The best thing to do when rhubarb balls is to camouflage it.

A rhubarb and fig pie is very tasty. Allow half the quantity of figs to the rhubarb, and soak them all night after washing them well. Then cut them in small pieces and soak in boiling water for an hour, after which add the rhubarb and stew gently with a little sugar. Turn into a pie dish and cover with a short pastry crust, made by rubbing three ounces of lard or margarine into six ounces of flour, adding a pinch of salt and another of sugar. Make into a dough with water, roll out and place over the pie, putting in a hot oven until the crust is a nice brown. Sprinkle with sugar and serve with or without a custard sauce.

When making rhubarb mould, stew two pounds of rhubarb with six ounces of sugar and very little water. When the rhubarb is thoroughly cooked, pass through a sieve and allow one ounce of gelatine to three gills of juice. Warm the juice with the gelatine, but do not boil or it will be spoilt. Allow the mixture to cool then stir in a gill of custard and two tablespoonfuls of chopped and stoned dates. Colour pink with cochineal and leave to set.

Helps Them Grow

Children who are growing need lots of sleep. Mothers know that babies and young children need plenty of sleep, but our youngsters in their early 'teens begin to be so interested in their enterprises and have so many engagements and so much to do that it is almost impossible to get them to bed early.

When children are growing, they need much more sleep than a grown person—just as blooming plants need more water than one which is quiescent. If your child is listless or confused and finds it hard to concentrate on his lessons, it is probably because he is not getting the extra sleep he needs to balance his growing time.

The schools of today often fail to help the parents in this respect. They plan too full a program of night activities. It would be better for the growing child if he had nothing but his lessons and home work to engage him on the evenings before school days, and if he could retire early and be bright and fresh for the next day's studies. Loss of this needed sleep is likely to make him smaller and more nervous than he otherwise would be.

Golden Words Uttered by Tongues of Unknown

There are hundreds of people whose names we do not know, though their words have passed into history. There is the nameless, well-dressed woman who, meeting Wordsworth walking by Loch Kathrine one fine evening, observed, "What, you are stepping westward?" She gave the poet the idea for his poem, Stepping Westward.

There is the watchman who passed under Pepys' window crying, "Past one of the clock, and a cold, frosty morning!"

There is the man who first invented the Breton fisherman,s petition as he put out to sea, "Oh, God, do thou help and guard me; the sea is sea is so wide, and my boat is so small."

And who was the poor old dame who, when questioned by a kindly bishop, held up her dry crust and said, "I have all this, and faith"?

And there are, of course, all the unknowns whose words are sung and said around the world and will not pass away.

Let's pause long enough to shed a tear for the American Indian.
The white man copped his lands.
The College boy his yell, and
The flappers his paint!—Cincinnati Enquirer.

International Business College
— and —
ENGLISH TRAINING SCHOOL.
Fred Donald Caza, B.A.,
Principal,
306 St. Catherine W., Montreal.
A course in a School so well and favourably known, and a city like Montreal, where the demand for young men and women is far in excess of the supply, offers great advantages. Individual day and evening instruction. Positions secured for all competent pupils. Tel. LAncaster 8378.
Inspection earnestly solicited.
Prospectus on demand.

HAVELOCK

Mr. and Mrs. Ralph Hamilton and family and Mrs. Ida Hamilton of Mooers' Forks, N.Y. visited Mr. and Mrs. Jerry Roberts on Saturday.

Sorry to report Mr. Alf. Brisbin is laid up with pneumonia and is under Dr. E. M. Moore's care. Nurse Bustard is in attendance. All hope for a speedy recovery.

Rev. Wm. Bertal Heeny and son, Arnold of Winnipeg called on old friends in Havelock on Sunday. Mr. Heeny was pastor of Trinity Church, Havelock thirty years ago.

Mrs. H. Sayer, Miss Anna Sayer and Mrs. J. Watt visited Mr. and Mrs. A. A. Clayland, Hemmingford on Wednesday.

Mrs. Wm. Gilmore, Sr. spent the past week with her daughter, Mrs. Florence Pettes, St. Chrysostome.

Miss Lillian Barr spent the past week visiting friends in Ormstown.

Miss Rena Harmon of Longueuil is visiting her mother, Mrs. Grace Harmon.

Mr. and Mrs. R. Clelland and daughter Joyce, of La Tuque, Que., visited Mr. and Mrs. Martha Beattie for a few days the past week.

BORN

Henderson—At Ormstown, on August 3rd, to Mr. and Mrs. Earle Henderson, a daughter.

Maither—At Brooklet, on August 4th to Mr. and Mrs. Maurice Maither, a son, Ronald Archibald.

Moore—At Dewittville, on Aug. 2nd, 1930, to Mr. and Mrs. Fred C. Moore, a son, (John Clark.)

ANNOUNCEMENT

Mrs. P. Gurney, St. Johns, Que., announces the engagement of her daughter, Mary Margaret to Doctor Gerald Caza, also of St. Johns. The wedding takes place at the church of Notre Dame Auxiliatrice, St. Johns, Que., on Monday, September 1st.

DIED

Cunningham—At Valleyfield, Que., on August 4th, James Cunningham, husband of the late Etta Finnegan. Funeral on Thursday morning from his late residence, 55 St. Lawrence St., at 10 a.m.

Jack—On July 24, 1930, at the Western Hospital, Montreal, William A. Jack, beloved husband of Margaret L. Black, in his 64th year.

Swan—At Ormstown, July 30th, 1930, Archibald Wilson Swan, beloved husband of Malinda Todd, in his 62nd year.

CARD OF THANKS

Sincere thanks are extended to friends and relatives for the many kindnesses shown in our recent sad bereavement, also to St. Andrews and St. Georges Churches for their beautiful floral tributes.

Mrs. Wm. A. Jack and family.

PAIN
so easily relieved
How to treat
Headaches
Neuralgia
Neuritis
or check a Cold

WHY are some women so patient with pain? Shopping with a head that throbs. Working when they ache all over. Sometimes it's hours before they take Aspirin and get relief! Most men take these tablets the moment that some sudden ache or pain threatens their comfort and so should you. Aspirin is perfectly harmless; it cannot depress the heart. The tablets stamped Bayer are always genuine Aspirin; always the same, always *safe*. So it isn't sensible to suffer with a headache, a cold, neuralgic pains, or anything else that these tablets relieve almost as soon as swallowed. Buy by the bottle and save money. Any drugstore has the 100-tablet size.

BAYER TRADE MARK REG. ASPIRIN

HEMMINGFORD

Mrs. Charlotte Hull and Mr. and Mrs. Robert Hull of Mooers, N.Y. were recent guests of Mrs. R. Moore.

Mr. Albert T. Baskin, Miss Gertrude Baskin and friend of Hamilton, Ont. are visiting in town for a few days.

Many from here went to St. Hubert to see the R-100.

Mr. and Mrs. Donaldson spent the week end with Mr. and Mrs. A. A. Clayland.

Glad to report that Mr. Jerry Ryan has recovered from his accident.

Mr. and Mrs. Dudley, Mrs. Lindsay and Grace Lindsay of Ormstown spent Monday with Mrs. Alfred Kenney.

Miss Jennie Wilson of Montreal was with Mrs. A. Ferns for the week end. Miss Lundy returned to Montreal with Miss Wilson where she will spend a couple of weeks.

Mr. Harrington of Burlington and Mr. Phelps of Richmond, Vt. were visitors at W. J. McKay's Sunday.

Miss Beatrice Muckle is visiting Miss Maud de Mouilpied.

Mr. W. Smith of Bridgeville, Dela. has been here for a few days on business, being agent for the Wayland apple grader.

Miss Emma Wood of Montreal was at her home for the week end.

Miss Marjory Ellerton was home for the week end.

Mrs. Robinson and children of Lacolle recently visited her parents, Mr. and Mrs. Wm. Barr.

Mr. and Mrs. Wm. Barr, Mrs. Geo. Keddy and Miss Ella Barr spent Thursday with Mrs. Kyle at Mooers, N.Y.

Miss Jean Cameron has returned from Montreal where she spent two weeks.

Miss Catherine Ryan has returned from Verdun where she spent a month with her sister, Mrs. S. Viau.

The Misses Gabrielle and Therese Bouchard have returned from St. Albans, Vt. where they visited their cousin.

Mrs. Madden Stewart spent the week end at W. H. Stewart's at Frontier.

The Misses Millicent Orr and Rhoda Sellers were in Montreal on Friday.

Miss Aileen Miller was a visitor in Montreal Thursday.

Mr. and Mrs. Albert Moore were week end visitors of Mr. and Mrs. Wm. Johnson.

Mr. and Mrs. Walter Keddy and Mr. Wm. Keddy were Sunday visitors in Montreal.

Mr. and Mrs. Jas. Williams and Miss Evelyn Williams visited Mr. and Mrs. Jamieson at Plattsburg, on Sunday.

Mr. W. B. Stewart spent Sunday in the city.

Mrs. C. McGinnis spent the past week at Mr. Lester Sellers.

Week end visitors at Mrs. M. E. McKay's were, Mr. and Mrs. J. C. McKay and two children, Huntley and Betty and Mr. Norman Lane.

Mrs. Agnes Collings, Miss Margaret Collings and Mr. Gerald Clement called on friends here on Friday.

The July meeting of St. Andrew's United W.M.S. was held on Thursday, July 31st, at the home of Mrs. Walter McNaughton. One quilt was quilted and one tied, besides other hand work. The business meeting was conducted by Mrs. G. J. Brown, Vice Pres., owing to the illness of the President, Mrs. Fulcher. At the close of the meeting lunch was served to thirty members and visitors.

The August meeting of the Women's Institute was held Friday afternoon with an attendance of 17. Miss May Bennett had charge of the meeting owing to the absence of the president, Mrs. Petch. After a short impromptu programme in charge of Mrs. J. P. Simpson lunch was served on the lawn.

ROBSON

Mr. and Mrs. Thos. Cleland of La Tuque, spent a couple of days with their uncle and aunt, Mr. and Mrs. T. E. Cleland the past week.

Mr. Roy Clark has returned home after spending some time at Mooers.

Mr. and Mrs. Robert McConnell and three children of Montreal are spending their vacation with Mr. and Mrs. W. D. Sample.

Glad to hear that Mrs. Thos. Kyle has returned home from the R.V. Hospital.

Mr. Ernest Metcalfe of Fittsburg is spending a few days with his mother, Mrs. E. Metcalfe.

Mr. Harry Metcalfe of Gardner, is spending a few days with his friends here.

Mr. and Mrs. Wm. Smith and son Volney of Hamilton were guests of Mr. and Mrs. F. A. Sweet the past week.

Several from here motored to St. Hubert on Sunday to view the R-100. Amongst the number being Mr. and Mrs. Gray and family, Mr. and Mrs. Simpson, Mr. and Mrs. Turnbull and Miss Lily Clark.

Mrs. John Beattie has been quite poorly for a few days.

Mr. F. A. Sweet's herd of Ayrshires has passed its 8th clean test. Mr. Sweet has been very fortunate as he has never had a reactor.

Mrs. John Robson and Mrs. T. E. Cleland called on Mrs. Jas. Greer of Ormstown on Friday.

Mr. and Mrs. Robt. Cleland of La Tuque made short calls on friends here on Saturday.

Mr. and Mrs. George Beattie and two children of Montreal visited Mr. and Mrs. Fernie Beattie on Sunday.

We regret to hear Mrs. J. Fulcher is quite poorly and also we regret that Rev. Mr. Fulcher and Mrs. Fulcher have had to give up their trip that they had planned for their holidays.

Mrs. Elmer Robinson and three little girls of Lacolle visited her parents, Mr. and Mrs. W. C. Barr the latter part of the week.

Mr. and Mrs. W. C. Barr and Miss Ella visited the Misses N. and F. Kyle of Mooers on Thursday.

Some from here attended the Mooers' Camp Meeting on Sunday last.

HUNTINGDON

The Misses Ceil Popeck and Rose Rhode of Elmira, N.Y. are guests at the home of Mr. and Mrs. Stanley Popeck. Mr. and Mrs. Frank Popeck of Toronto, who were recently married at Detroit, are enjoying a few days of their honeymoon at Mr. and Mrs. Popeck's home here.

Mr. Stanley Ferry of Sherbrooke is spending his holidays at his home here.

Mrs. J. R. Clouston and her brother, Mr. Howard of Montreal spent a few days this week at the home of Dr. and Mrs. H. R. Clouston.

Notice to Students

Healthy teeth are as essential to a student's welfare as good eyesight. The slightest dental defect can oft retard mental progress.

Students should have their teeth attended to before classes open.

DEWITTVILLE

Mr. and Mrs. Allan Ritchie motored to Malone, N. Y. on Sunday morning, there they were met by Mr. and Mrs. Amasa Gale of Potsdam, N. Y., and together they proceeded to Saranac, N. Y., and visited Mr. and Mrs. Tom Stephen and family.

Mr. and Mrs. Henry Sorenson and family of Montreal, were callers on Sunday with her uncle and aunt, Mr. and Mrs. George Moore. Previously Mr. and Mrs. Sorenson had been to Ottawa, on business in connection with Ottawa Dairy, and had gone from there to East Templeton to visit Mr. and Mrs. John McIntosh and family.

Messrs. Richard and Robert Lewthwaite, of Montreal, were Sunday guests with Mr. and Mrs. William Graham.

Mrs. John Gordon and daughter, Miss Margaret Gordon, left on Friday for Pittsburg, Pa., to spend about ten days with Mr. Gordon's sister, Mrs. Palmer.

On Sunday Mrs. Van Vliet and Miss Elizabeth Van Vliet, also Mr. B. A. Rankin of New Erin, motored to Isle aux Noix and Lacolle. They brought back with them two of Mrs. Van Vliet's granddaughters, Misses Margaret and Patricia Hewson, who will remain for a couple of weeks.

Mr. and Mrs. Gordon Henderson, of Malone, spent Sunday with Mr. and Mrs. William Graham, and took home with them their two little daughters, Pearl and Viola, who had spent three weeks with their uncle and aunt, Mr. and Mrs. Graham.

Mr. Ernest Wood returned to his home in Montreal on Sunday, after spending a week in Dewittville visiting his uncle, Mr. Fred Tessier, and other relatives and enjoying the fishing and boating on the Chateauguay river.

Mrs. Eastwood of Lachine spent the past week with her sister, Mrs. Leonard Booth.

Mrs. Ferguson of Montreal is spending the month of August in the house which belonged formerly to her sister, the late Mrs. Leonard Lucas.

Guests with Mrs. Albert Bryson for the week-end were her sister, Mrs. Garrety, Mr. Garrety, Mr. Donald Stewart and his aunt, Mrs. Stewart.

Mrs. Donald Henderson returned with Mr. Henderson to her home in Montreal, on Sunday evening, after spending three weeks with her mother, Mrs. J. Carr.

Miss Russell is returning to the city on Tuesday after spending her tendays' vacation with Mrs. Carr.

Mr. and Mrs. Fred Rennie of Huntingdon, were visitors with Mr. and Mrs. Richard McIntosh on Sunday. Little Miss Arline McIntosh went home with her uncle and aunt, Mr. and Mrs. Rennie, to spend a week with them.

The July meeting of the W. C. T. U. was held in the church on Thursday afternoon, with the president, Mrs. Frank Martin, in the chair. The only business done was in connection with the coming bazaar, which is to be held on the 13th. It was decided to hold a special meeting on Friday evening at the home of of Mrs. Van Vliet, to arrange the prices on the various articles to be sold, and to make all the final arrangements.

Mrs. Donald McEwen and son Ronald were Sunday guests with her mother, Mrs. McArthur.

The services in the church here on Sunday were in charge of Rev. Mr. McCaskill of Montreal, as Rev. J. B. Maclean, D. D., is away on his holidays.

A car full of people went from Dewittville to St. Hubert on Monday to see the R-100. They report it to be well worth the trip of going to see, as its magnitude cannot be imagined until you have seen it.

Mr. and Mrs. Wm. Coulby and two children, Margaret and Billy, and Mrs. Cross, of Belleville, Ont spent the week end with Mr. and Mrs. John Lowden, leaving Monday morning for Lindenville, Vermont, and other points in the States.

Sunday callers with Mr. and Mrs. John Lowden were Mr. and Mrs. H. Sorenson and family of Verdun.

Mr. John L. O'Connor of Montreal was a week end guest at the home of Mr. and Mrs. Fred Murphy.

Mr. and Mrs. Leo McCormick were Sunday visitors with Mr. and Mrs. George Murphy.

Miss Margaret Irwin is spending a couple of weeks with her cousins, at the home of Mr. Willie Finn.

Mrs. G. Rice and daughter, Greta, and James Martin, of Flint, Mich. called on his cousin, Mr. Ernest Ouimet on Thursday.

Mrs. E. Finn and Miss Claire Finn of Ormstown, also Mrs. Bryant and son Freddie, and Eddison Stewart, of Chicago, visited on Saturday at the home of their cousin, Mrs. Ernest Ouimet.

Mrs. King is the guest of Mrs. Ernest Ouimet for this week.

Mr. Wm. Harvey of Montreal is spending the week at the home of his aunt, Mrs. Herbert Ferns.

CO-EDUCATION.

To send daughter to the Women's College or the Co-educational School is a real problem in many households.

There are points in favor of both types of institution. Some claim that the constant presence of the opposite sex is too diverting to the would-be student and that he or she, cannot concentrate sufficiently with the other so alluringly near at hand. Conversely, others argue that the shock of mind on mind, of those opposite temperament and sex is stimulating and makes for more enthusiasm and better scholarship. Men and women live together in real life; why should they not, in college, be trained to think together and to understand and complement and correct each other? It is said that man is practical and will not grow enthusiastic over new ideas. Woman is sentimental and grasps too gullibly after ideals. How splendid, then, that they should meet in a common classroom and balance each other.

An objection to the co-educational institution is the vice-presidential menace—the man being always chosen president and the woman vice-president. As we grow more enlightened and woman comes more into her own, this situation is less insistent. It is a calamity, if woman is never allowed to execute nor assume responsibility.

Some claim that woman has less lure for man if he knows her as his daily class-mate. On the other hand, he learns to adjust himself to her ideas, to respect her brain, to acknowledge her equality, and to accept her as a life chum, from that very basis; rather than treating her as a dolly type of creature, his toy, his chattel.

MAKING A WILL

Wills are found in strange places. Some people put them where they can be found at once. Others hide them away, to avoid curious eyes and also possibly to create a little suspense and trouble. One will was located between the photograph of the deceased. Another had been placed, with other valuables, in a disused stove, and the whole lot went up in smoke. Another will, known to have been made and witnessed just a few weeks before, was never located and the estate was divided according to law.

Making a will is not necessary, even for a person of wealth. Some people have the idea that, if they do not make a will, the government will take all or most of their money. This does not happen so long as there are relatives near enough to be recognized by the law. Every country has a law to intestate succession, which states how property, left without a will, is to be divided among relatives. In Canada, each Province determines this. If there are no relatives, the property reverts to the Crown.

It is only trough a will that money can be left to those who are not relatives. The will is therefore useful for making bequests to friends, servants, etc. It also enables the owner to distribute his wealth among his relatives, if he so chooses, in a different way from that set down in the law of intestate succession. He is not entirely free in this respect, however. The law insists in some proportion going to children, and to wife or husband, as the case may be.

There are these common ways of making a will. One way, and the safest, is to go to a lawer, state your plans, and he will prepare the will for a fee, which should not be large unless you give him a lot of trouble. Lawyers are not perfect, and there is no absolute certainty that things will be handled as you expect, but 99 times out of a hundred your wishes will be fulfilled.

A second method is to get from the stationery store a ready made will form, and fill it in. This is the most dangerous plan, because the ordinary person is apt to misunderstand the legal terms printed in the form. For instance, "real property" means only real estate, while "personal property" which the ordinary reader so often takes to mean only clothing and other personal effects, really includes bonds, shares and other securities. People filling in such forms, have often given away wealth to people they never intended it to go to, and such will give rise to many disputes.

A better way is to simply take a piece of plain paper and, under the heading "Last Will and Testament", set forth in plain language just how you want your property to be divided. Remember that judges can understand plain English just as well as you can.

Finally, there must be two witnesses to your signature, and the will must be dated. Two copies should be made, and they should be kept in separate places.

WE OWE A LOT TO TELE

We owe a great deal to "tele."

What is "tele", you ask? What does it do to help along the human race? Here below I give the one-two-three of the "teles" to which we moderns owe so much.

One:—The TELEgraph enabled grandfather to cover thousands of miles in a few seconds, where once it had taken weeks and months.

Two:—The TELEphone appeared in Father's day, and once again the limitations of time were destroyed.

It isn't necessary to elaborate upon these two. Their stories are old and, sad to say, familiarity has almost bred contempt for the marvels of telegraphy and telephony. But today we are learning the wonders of

Three:—The TELEchron, which has virtually eliminated time's last frontiers. For those of you who are not familiar with the word, may I say that telechron is merely the impressive name of ancient Greek origin for the modern electric clock, which is self-starting, is operated by ordinary alternating electric current, and is so honest that it can't possibly give you anything but the correct time unless the current stops altogether.

Think of what this means to men and women everywhere! No more will it be necessary to say, "It's 2 o'clock by my watch, 2.10 by mother's, and half past by the clock in the kitchen." No more will it be necessary to ask the telephone operator for the correct time. No more will Catherine or John be too early or too late for work because some clock or watch has lost or gained. The newest "tele" is an inexpensive home regulator that removes the myriads of troubles of the family that does not have absolutely correct time.

Bring on your "teles," Messrs. Inventors! If you have other ideas along the lines of the telegraph, telephone and telechron, by all means work overtime to perfect them in our generation. Others will probably invent many devices for the comfort of our sons and daughters—we crave more "teles."

In 1910 the inspector sailed for Hudson Bay on board the Jeannie. Her captain was Bob Bartlett, the man who sailed with Peary when he discovered the North Pole. On board ship were supplies needed to start new northern posts. The party landed at Churchill, and there deposited what material were necessary. Winter was a short time away. Then he sailed to Wager Bay and established a new post there. The Jeannie run into a violent Artic storm on her return trip and was stranded on the shores of Wager Bay. Seventeen men in the party managed to get to shore safely. A whaler, late on its way out of the bay, hove in sight, and saved them a 500-mile trip to Churchill in open boats.

In 1919 Commissioner Starnes was in charge of the Manitoba division, with headquarters at Winnipeg. At that time a general strike was declared. The trades and the post office stopped work in Winnipeg. Even the police were sympathetic. There was to be a parade, the police heard, and Starnes, burdened with threatening strikes in neighboring cities, prepared.

Fifty-four mounted troopers led the way, their scarlet tunics blazing in the sun, the same scarlet tunics which had made friends with the Indians in days gone by. They were followed by forty-six more in trucks. A force of 100 to fight, if need be, 10,000 strikers. Starnes ordered the crowd to disband, but no one moved. The order was given to draw revolvers Then the crowd disbanded, and the strike was over.

A writer on success says that people should notice little things in life. Forgers, of course, often pick up a piece of paper and make a note of it.

GORE

Gore Wins Game From Brooklet.—

A very interesting game of baseball was witnessed Tuesday, July 29th, by a large audience when the Brooklet team challenged Gore on the Gore diamond. All played hard and took a deep interest in the game. A mishap occurred about the 5th or 6th inning when the pitcher of Brooklet, George Taylor, broke his arm above the elbow. He was throwing swift balls and with wonderful success and also trying hard to face the batter. The Gore boys extend their deepest sympathy and hope he will soon be out and ready for action. At the ninth inning the score was 8-21 in favor of Gore.

The line-up was as follows:

Brooklet	Gore
pitcher	
G. Taylor	A. Neely
E. Wilson	G. Henderson
catcher	
H. McCracken	C. Montgomery
1st base	
M. Taylor	G. Henderson
	A. Neely
2nd base	
E. Wilson G. Taylor	L. Graham
3rd base	
E. McCormick	M. Henderson
s. s.	
J. Allen	C. Cooke
r. f.	
E. Lindsay, Elliot	C. Henderson
c. f.	
Elliot	Geo. Henderson
l. f.	

C. Sloan, C. Anderson .W. Anderson

A. Henderson umpired the game giving general satisfaction to all players.

Miss Edna Todd of Montreal is spending a couple of weeks at the home of her mother, Mrs. Jas. Todd.

Mr. and Mrs. W. W. Graham and son Walter of Notre Dame de Grace were the week end guests of Mr. and Mrs. W. J. Graham and family.

Mrs. Russell Anderson and two children, Ralph and May, were the week end guests of Mr. and Mrs. Alex. McCracken and family, Malone, N.Y.

Mrs. J. C. Coulter, Miss S. Coulter were the Sunday guests of Mr. and Mrs. L Merkley, Ormstown.

Mr. and Mrs. W. J. Graham and family, also Mrs. Jas. Graham were guests at the home of Mr. and Mrs. Robert Gruer, Ormstown, Tuesday.

Mrs. H. Herdman, Miss Eileen Herdman spent a few days the past week visiting at the home of Mrs. W. Burns, Chateaugay.

Mrs. Robt. Anderson was the week end guest of her daughter, Mrs. M. Manson, Malone, N.Y.

Mr. and Mrs. Sam Herdman and little daughter Eileen, Mr. and Mrs. Jas. Flynn, and Miss Vera McGinn motored to Ottawa on Wednesday and were the guests of Mrs. McGinn, the two latter remaining.

Mr. and Mrs. S. Whaley and family were the guests of Mr. and Mrs. Alex. McCracken and family, Malone on Saturday evening.

Miss Ella Johnston of Huntingdon was the week end guest of Mr. and Mrs. S. Herdman and family.

Mrs. M. Gorden and two children of Saskatoon are visiting relatives in this vicinity.

Mr. and Mrs. J. McCracken and family of Malone were the Sunday guests of Mr. and Mrs. S. Whaley and family.

Congratulations to Mr. and Mrs. Earl Henderson on the arrival of a little daughter on Sunday morning.

Miss Stella Herdman has returned home from Montreal where she has spent a week visiting at the home of Mr. and Mrs. W. Prescott and family.

Miss Myrtle Dawe of Montreal is spending a few days visiting at the home of her aunt. Mrs. Sam. Herdman.

Mrs. Jos. Anderson and Carl Anderson returned to Windsor, Ont. on Tuesday with Mrs. G. N. Brossard, who has been spending the past few weeks with her parents. They intend making an extended trip through Niagara Falls, Buffalo and other points of interest.

ROCKBURN

Mrs. George Winter and Mrs. Murray Blair accompanied Mr. Clark Winter on his return to his home in Zanesville, Ohio, and are spending some weeks with him.

Miss Hazel Jamieson of Lowell, Mass., is spending her holidays with her aunt, Mrs. John Oliver.

Mrs. A. Pollock is visiting with her daughters, Mrs. Farquhar in Piercefield and Mrs. Graves in Harrisville, N. Y.

Miss Mamie Jamieson is spending a few days with Mrs. John Patterson of Malone and Mrs. C. Oney at Port Lewis.

Mr. Roscoe Reeves of Pittsburg, Pa., is a guest at the home of Mr. Henry McMillan.

Mr. Frank Rosevear of Montreal was a recent guest at the home of Mr. Ernest Rosevear.

Mr. and Mrs. A. Tannahill and children of Allan's Corners, were visitors recently at the home of Mrs. W. G. Gibson.

Mrs. T. Moore and Miss B. Moore of Ormstown, were recent guests of Mrs. E. Moore.

St. Malachie Council

Met on Monday, members all present, except Couns. Collum, Mayor Alfred Greig presiding.

On motion of Couns. Gruer and Dumas, the Secretary was ordered to write thanking the Hon. Honore Mercier for the supplementary cheque of $3,090.42 received on road work for the year 1929.

The following accounts were ordered paid: P. H. Curran, overseeing work on Borden Street, $3.; J. A. Maheu, nails, 40c; County of Huntingdon, share of work on Seignory Line Road, $29.50.

Ormstown Council

Met on Monday evening, members all present except Coun. Duval. Mayor Dr. W. S. McLaren presiding.

As complaint was made of ball playing on the street, council decided that this would not be allowed.

On motion of Couns. McBain and Bryson the following accounts were ordered paid: J. B. Walsh Est., slabs $2.50; Beauharnois Electric Co., light $117.84; Ontario Engine & Pump Co. water pipes, $118.59; D. McCaig, auto hire, $2.50; W. A. Campbell, work on water line, $46.50; John Meehan, work on water line, $28.50; Jas. Watt, work on water line $23.75; Lawrence Vaincourt, work on water line, $6.25; Zotique Guerin, drawing gravel, $17.50.

FRANKLIN

Mr. and Mrs. Bruce P. Haire, Miss Marjorie Thomson and Mr. Cole of Niagara spent a few days the past week visiting Mr. and Mrs. W. A. Sharpe.

Miss Essie Waddell is spending her vacation at Maple Grove Farm, Covey Hill.

Messrs. H. Steele and John Waddell, accompanied by Mrs. W. A. Sharpe and Miss Mabel Waddell visited Mrs. John Waddell who is a patient in the Western Hospital, Montreal on Sunday, and found her recovering very nicely from her recent operation.

Mr. and Mrs. J. McArthur and family, also Miss Ruth Barr of Montreal were guests of Mr. John Waddell and family on Sunday.

Mrs. C. H. Harrington and daughter, Mrs. Phelps and two children of Burlington, Vt. visited at the home of Mr. John Waddell the past week. Mr. Harrington and Mr. Phelps were also Sunday guests at the same place.

Mr. Earl McNiece and Miss Libbie Waddell spent the week end at Maple Grove Farm.

Mrs. Baker of Montreal spent the week end with her daughter, Mrs. Lloyd Waddell.

WILY ELEPHANT

Though tigers and leopards cannot as a class, be said to sham death, there have been instances in which one of these—after having to all appearances, been shot dead—has suddenly "come to life" and then very much alive, until finally dispatched. There is an instance on record of a newly captured elephant playing the "artful dodger" so successfully that it completely deceived its captors, who, releasing its bonds, left it for dead, but scarcely had they gone a little distance when, to their amazement, the creature rose, and trumpeting loudly, made good its escape.

MATRIMONIAL

Wood-Roy

A very quiet wedding was solemnized on Saturday, August 2nd, at the home of Mr. and Mrs. Wm. Roy, Ormstown, when their daughter Lois was united in marriage with William Wilson, son of the late Mr. and Mrs. Henry Wood of Powerscourt. The ceremony was performed under an arch of summer flowers. The Rev. A. F. Pollock officiated. The wedding march was played by Miss Edith Sproule, cousin of the bride. The bride, who was unattended, was given in marriage by her father. She was gowned in powder blue chiffon fashioned in long, simple lines and wore shoes to match. She carried a bouquet of pale pink roses and baby's breath. After the wedding dinner the bridal couple left for a motor trip to Quebec and other points. The bride travelled in a fawn silk suit with hat, shoes and bag to match. On their return they will reside at Powerscourt.

IMPORTANCE OF EYES

The growing number of young people who are wearing glasses is one of the great tragedies of the modern age. An enormous amount of this could be done away with if the people would learn some fairly simple ways of avoiding eye strain. Under modern conditions the eyes are subjected to more and more strain all the time, even out of door recreation in a motor car means driving against glaring headlights, which is one of the worst strains I know of. But people are often very stupid about the arrangeemnt of lights in their houses. They hang big central chandeliers from the ceiling where the glare of high candle power electric lights comes straight down over the heads and the eyelids, and the resulting strain on the eye is terrific. Most of our houses are too brilliantly lit anyway, and most of them have the lights badly arranged. Go over all the lamps in your house and see if you cannot have them more softly shaded and more becoming, more restful. When the eyes are tired from overwork there is nothing as soothing as applications of hot water or of hot salt water.

All you need is a piece of old soft towel folded up to make a compress to be held over the eyes until it cools, then wrung from water again and the treatment repeated for five or ten minutes. A little cream should be messaged around the edge just to counteract the drying effects of the water.

It is said that if otter, the strongest fur, is given a 100 per cent durability rating, other of the furs rank thus: Beaver, 90; chinchilla, 15; hare, 5; natural fox, 40; dyed fox, 25; baum or pine marten, 60; dyed marten, 45; mink, 70; dyed mink, 35; raccoon, 65; dyed raccoon, 50; sable, 60; dyed sable, 45; skunk, 70; tipped skunk, 50; hair seal, 80; dyed seal, 75; fur seal, 70; squirrel, 25; dyed squirrel, 20; coney, 20; lynx, 25; mole, 7; muskrat, 45; dyed muskrat, 35.

OPEN SORES
HEAL IN QUICKEST TIME KNOWN

"The Shining Talent"

CHAPTER XXXIII

Molly had never realized there were so many reporters in Boston. They all wanted to know what she would do if the censors padlocked the theater.

"But the censors couldn't do that!" she protested. "They'd have to get a court order. And it's not a horrid play. The critics were very kind. They liked it very much."

"But what did the censors say?" demanded somebody. They said it was all the six deadly adjectives—"obscene, lewd, lascivious, filthy, indecent and disgusting—that's what the censors said!"

"Darn the censors!" exclaimed Molly.

And some of the papers led with a screaming banner: "Darn the Censors!"

'Molly Burnham Condemns Vigilants' 'Boston Playwright Will Fight Efforts to Padlock Second Sensational Play'

The story was wired to New York, and appeared on Broadway almost as soon as in Boston. Mr. Durbin, delighted, telephoned his congratulations.

And that evening Jack telephoned, too. He had received Molly's letter, and the ring. He had also read the papers.

"Molly dear," he began, without preamble, "you were an awfully sweet little girl to send me that stunning ring. And I want to thank you. It was might nice of you."

"I'm glad you liked it," she faltered. "I, I suppose you're having a fit about the play?"

"That was one reason I called," he admitted. "Can't you do something about it, Molly?"

"About what?" she asked blankly.

"The play, of course. What did you think I was talking about?"

"What can I do?"

"Heavens, I don't know! But it's a pretty mess for a nice girl to be mixed up in."

"Did you think the play was indecent, Jack?"

"Now, Molly, be your size, dear. I thought it was a peach of a play. Mrs. Bulwer-Eaton thought so, too. Anybody with any sense would. But you know what these reporters are. What's the sense of playing into their hands? How do you think it sounded to hear you'd told them to go to hell?"

"Oh, I didn't," she broke in. "Not really. That is, not intentionally."

"Well, that's what the newsboys are yelling about," he retorted.

"I'm awfully sorry," she insisted. "I never meant to say anything of the sort."

"Why don't you take the play off?" he demanded.

"Take it off!" she cried. "I guess you don't know, Jack, how much it costs to put a play on."

"Well, you'd be better off if you did. It's a success and a sensation, and all that. But a rather dubious one, I'm afraid. First thing you know, Molly, nice people will be cutting you."

"Jack Wells!" she cried. "You're the most provincial creature that ever lived!"

Furiously, she slammed her little pink telephone on her little pink table. But, presently, it was ringing again.

"I only wanted to be sure you knew I liked the ring," said Jack. "I just thought I'd thank you again for it—that's all. You were awfully sweet to get it for me, Molly."

Then the receiver on his end was also up.

A little later a telegram came from Red:

"Atta Girl stick by your guns even Ottawa has fallen for your picture in all the evening papers great stuff carry on for frankness and freedom."

What a difference between Jack and Red! Difference enough to keep Molly awake all the night. At three a.m., wide-eyed and sleepless, she conceived an idea. She would compile an anthology of dark and desperate love verses. Tragic, mournful things, for women in love with the wrong men. To be read on sleepless nights, after lovers' quarrels.

She would have it bound in purple. And she would write a preface with beautiful, sad words. She would dedicate it to "Women—Women Everywhere."

Fired with the notion, Molly put on her bed light, and, propping herself up on her pillows, reached for the pad and pencils she kept on her bedside table. She would begin immediately, writing from memory all she could remember.

She scribbled as one inspired—a mournful thing of three lines:

"The gift of love is this—
A crown of thorns to thy head,
And vinegar to thy kiss."

Then there was that wistful little verse of Jessie Rittenhouse:

"You came again, but silence
Had fallen on your heart,
And in your eyes were visions
That held us still apart.

And now I go on hearing
The words you did not say,
And the kiss you did not give me
Burns on my lips today."

Then there was that wild sonnet that began:

"What lips my lips have kissed,
I have forgotten, and what arms."

Molly was growing sleepy. Too sleepy to remember any more.

"Anyhow it's a good idea," she reflected drowsily. "I'll make it an anthology of unrequited love. I'll bet a million women would simply eat it up."

But in the morning Molly's enthusiasm had waned. When she was tired or lonely, she was often sentimental. After a good breakfast, she was apt to grow matter-of fact. Today was going to be a lovely day.

The nurse was leaving early. She would have little Rita to herself until bed-time. They were going down town, and Rita was to have her hair cut. Then they would have luncheon, and go to see Peter Pan. Molly had told Rita about how the children flew around their nursery. And how Wendy flew right out into the night, and fell in love with Peter Pan, and lived, like the fairies, up in a tree. Rita listened wide-eyed and eager.

"Didn't she have no mama?" she asked.

"Yes, indeed," declared Molly. "But Peter bewitched her, and she forgot all about her mother."

"What's bewitched?"

Molly tried to explain. But Rita shook her curly head.

"Wendy was a naughty dirl," she pronounced.

"Why, dear Because she flew away from her mama?"

Rita nodded, and buried her face in Molly's skirt. It was a childish avowal of love.

"You wouldn't want to fly away from me, would you, dearest?"

"No—no!"

Rita hugged Molly's knees ecstatically. "I love you!" she whispered.

And Molly's heart, with joy and thankfulness, was filled to overflowing.

It was some time before she happened to see Bob again. He had called frequently, to take Rita for a ride in the swan boats, or a walk through the Public Gardens, Once he had taken her to the Aquarium. And another day to Franklin Park, to see the elephants. But Molly happened to have been out on each occasion.

She was writing a novel from the pot of "Sacrifice." Because she fancied she could write better at night, she slept late in the morning, and devoted her afternons to various things. There was a modern art course at the museum in which she was interested. And another in applied phychology at Harvard.

Red was taking the course at Harvard, too, and so they were together a great deal. He talked occasionally of his mother now. Her heart was beginning to fail, the doctors said. Perhaps she could not live another year. Red was very good to her, buying any number of absurd and loving gifts.

One day it was a lavender shawl. And the next day a gay French breakfast service. He found pomegranates for her, and avacado pears, and sweet ripe figs. He would go down to the markets, to get the Italian cheese she particularly liked. And drive into the country for tender young broilers, and green vegetables, fresh from the gardens.

He never had any money now. and Molly suspected that he was spending it all on his mother. She tried to think of some way she might help him. His specialists' bills, she knew, were enormous. But she was too afraid of offending to make any suggestions.

Her money, she reflected, had never enabled her to help the people she loved most. It had actually kept her from marrying Jack. It had alienated her mother completely. She was never able to do anything for poor Rita. Nor for Ruth. Only for little Rita.

And now—with the way Bob was acting—she was beginning to wonder if anything could ever happen by which she might lose her darling child.

Bob had reformed of late. Molly had been to a concert one afternoon and walked home, for the exercise. Bob and Rita were returning at the same time.

"The least I can do," thought Molly, "is ask him in for tea. After all, he's Rita father."

They sat in the drawing room, fragrant with flowers, and homey now with books and magazines, and lamps with parchment shades.

Bob's eyes were brighter now, and his skin was clearer. He seemed more alert, and straight-forward. Molly could almost forgive him for Elsie Smith. He seemed actually like a different person.

"Been on the wagon," he offered, "ever since Elsie's death."

"You'd better stay on," advised Molly. "I've never seen you look so well."

He filled his pipe and smiled contentedly.

"I'm being an exemplary citizen," he declared. "Saving money, and everything."

"It's high time," she observed.

"Now, don't be nasty, Molly. You don't know what I've been up against the last few years."

She smiled sardonically.

"Rita was up against a lot too," she said. "And it didn't make it any easier for her, when you started to drink."

"I know," he admitted. "I've been an awful egg. But you're not going to hold that up against me all my life, are you, Molly"

"Oh, I don't know," she parried. "I'm apt to."

"But that's not fair. Listen, Molly . . ."

He leaned, and took her hand. And she noticed what white, horrid hands he had. Jack's were brown. And Red's were red, and homely, with hair sticking up on his knuckles . . . But Bob's were white, white and horrid.

She tried to draw her fingers away.

CHAPTER XXXIV

Molly wondered why she hated Bob's hands. And why she thought they were horrid, because they were white. It might, of course, have been beause they were also moist. And cold.

Clammy, she thought. And, shuddering slightly, she drew her fingers away.

"You don't like me, do you, Molly?"

Bob's face was flushed now, and his mild eyes were brighter than she had ever seen them.

"Why, of course I like you, Bob."

"Well, not much you don't."

"Not very much," she admitted, trying to laugh, as though it were a quite unimportant matter. "You see, you're not a bit my kind of a man, Bob. Not the type, I mean, that I particularly like. That is . . . oh, dear, I'm afraid I'm not being very tactful . . . Anyhow I do like you."

"What type do you like?" he demanded.

"Oh, a sort of an athletic type," she declared, smiling. "A big, brawny he-man. The tender, powerful sort. You know."

"I mean it," he insisted. "Don't kid me, Molly."

She laughed. "Personally," she said. "I've a lamentable weakness for the shocking, fascinating kind. Most women have, I guess. But the wise ones never marry them."

"Now, Molly," he reproved, "you're simply being adolescent. I'm quite serious."

"Well, I'm not," she bantered. "Besides, it's time your young daughter was in bed."

"I'm a good dirl," announced Rita solemnly.

"You're an angel-girl," corrected Molly. "But it's time to go to bed, just the same."

She swept the child into her arms.

"I'll tell you about the gingham dog and the calico cat," he promised, "and the hushaby lady from lullaby street."

Rita sighed contentedly.

"All wight," she said. "Dood night, daddy."

She climbed into his lap, and kissed him dutifully. Molly had noticed that the warmth of little Rita's kisses was reserved exclusively for her. She hoped that Bob would not notice. It would probably hurt his feelings.

"You don't mind if I wait?" he asked, as she carried the baby away.

"No, I don't mind," she told him. "Red's coming for dinner. Would you like to say too?"

"You're seeing an awful lot of Flynn, aren't you?"

"Oh, yes?" she exclaimed. "He's such good company. I love having him around."

"You're no little ray of sunshine," she countered.

"Well, I'd hate to spoil your evening. What does Red do to amuse you? Turn handsprings and spring wisecracks? I suppose he has a lot of cute parlor tricks."

"Now you know better than that!" she exclaimed. "If there's anything I hate it's one of those bright young men who's the life of the party. Red isn't a bit like that, and you know it."

"No? Maybe he's the great lover then?" Bob smiled hatefully. "Of course he doesn't look it. But there must be some explanation for the way he fascinates you. Some hidden charm. Tell me, Molly, does he make love to you?"

Molly turned furiously.

"I shan't quarrel with you, Bob," she told him coldly. "Ive too much respect for your daughter's sensibilities. But, under the circumstances, I doubt if you would particularly enjoy having dinner with us tonight."

"No," he agreed. "I don't believe I would."

A few hours later Molly sat with Red over their coffee cups. There was a pink alabaster table in the drawing room. And Molly's demitasses had roses on them. She particularly liked pouring coffee in front of the pink porcelain fireplace, because it was such an attractive ceremony. Sometimes she wondered what her father would think if he could see her. Sitting, in her low-cut evening gown, behind her great silver service. Pouring amber liquid in egg shell china cups, as tiny as she could find. Her father liked his coffee in a big coarse cup, with plenty of cream and sugar. He would think her dainy demi-tasses a most absurd affectation . . . Molly had traveled a long, long way from Snodgrass.

Red was smiling now as he raised the little cup to his lips.

"You certainly done wonders to a police court reporter," he remarked. "What's that they say about making a silk purse out of a sow's ear? What is a sow, Molly?"

"An adult female swine," she told him promptly. "All little girls from Snodgrass know that one. You're not a sow's ear, Red. You're the cat's meow. Speaking of swine—Bob Newton left shortly before you came. You know, Red, he's simply impossible! What do you think he said tonight? He asked me if you made love to me!"

Red grinned. "He's got a nerve. What did you tell him?"

"I didn't tell him anything. I sent him home," Molly considered her guest quizzically. Her eyes were smiling, but her voice was serious.

"You don't actually make love to me—do you, Red? You're just sort of casually affectionate. Of course you put your arm around me, sometimes . . . And you hold my hand in the theater. But I shouldn't call that 'making love'. Should you?"

Red looked startled.

"Good heavens, Molly, you don't want me to make love to you, do you?"

She laughed at his alarm.

"No," she said. "I think it would be simply poisonous. I should probably want to slay you."

"No joking," he told her solemnly. 'You wouldn't want to start something we couldn't finish, would you Molly?"

She shook her head.

"Because ," he continued soberly. 'I should love you so fiercely, my dear. So unrelentingly. So terribly. . . . I think you would be afraid to be loved the way I should love you."

"It . . . it might be rather wonderful," she murmured.

He looked at her sternly.

"Don't cheapen yourself, Molly. Love's nothing to play with."

"Oh, I didn't mean exactly that," she declared, setting her cup down nervously. "I, I think you're wonderfur, Red. I wouldn't have you change for anything. I like you just the way you are. Besides, there's your mother, Red. You know you have to think about her."

He laughed shortly.

"I wasn't talking about marriage Molly. I was talking about love."

"Oh," he said. And then, after a moment, "I don't think you're the narrying kind anyhow."

"No," he agreed. "I don't know as I am."

He came and stood in front of her, and taking her hands, drew her to her feet. Then, for a moment, he put his arms about her.

And then, abruptly, he released her.

Red went away early that evening. And after he had gone, Molly sat for a long time, on the cubist sofa, deliberating.

It was time, she told herself grimly, to call a halt. Two men in a single evening. And both of them making love to her. She had even rather encouraged Red. Poor Red! He could not marry her, if he wanted to. So why make Red miserable? And Bob! He probably had feelings too. Most likely she'd been leading him on. Not really meaning to, of course.

Molly, like most attractive women, played a game that is more or less unconscious. Some women cannot help baiting men. They are not purposely ruthless, nor intentionally unscrupulous.

They have inherited an art which Eve had direct from the serpent. It was a talent which Molly employed unconsciously. It is, moreover, the way of women, when they keep men dangling. And Molly, to all intents was dangling Red and Bob. Not because she wanted to. But because she couldn't help it. It wasn't, she felt, quite honorable.

"Now if I were only married," she thought, "everything would be different. Bob wouldn't try to make love to me. And Red wouldn't get all bothered.

"But Jack won't marry me!" she moaned, and put her head in the pillows. And shed an angry tear or two.

Suddenly she sat up straight, and flung her feet determinedly to the floor.

"I'll ask him!" she cried. "I'll go over to New York—and I'll ask him!"

Hurreidly she packed her bag. She wouldn't let him know she was coming. It would be better to surprise him.

She telephoned the South Station, and reserved a drawing room on the midnight. She would be in New York before he was awake in the morning. She would telephone him, and ask him to take her to breakfast.

Then she would ask him right straight out.

"Jack, will you marry me?" Just like that. And she would be explicit about it, too.

"Now, I mean. Not next year, nor next month. But now. Today, if we can get a license."

He would be astonished, of course. Perhaps he wouldn't believe she meant it. Then she would tell him how she had always loved him. She would say he must not be stubborn any longer. Love was all that counted. Money did not make any difference. Nor success . . . Oh, money was nice, of course. She had plenty now. But success was hateful. She'd as soon be a nonetity for the rest of her life.

The'd have to live in New York, of course, because Jack's business interests were there. She would sub-let the apartment, and find one in New York. Then she could install the nurse and housekeeper, with little Rita. And she and Jack would have a perfectly wonderful honeymoon.

They'd go to Italy! To Naples, and Rome—and they'd sit in the Colosseum, and she'd tell Jack about the Duke. And they'd go to Venice, and drift around in a gondola, and live in a palace, and feed the pigeons in St. Mark's Square. Then they'd go on to Florence. And she would take Jack to the little old shop where she bought his ring. And he might buy her one, too. And they would exchange them solemnly, in pledge of their undying love.

Molly's heart was beating excitedly. She ran in to kiss little Rita goodby. And, scribbling, a note, left it under the coffee pot. Then she ran downstairs to get a taxi.

"Do Not Hesitate to Try It"

"Your Vegetable Compound is a good medicine. Anyone who is in poor health should not hesitate to try it. When I was taking the Vegetable Compound I tried the sample Liver Pills I found in the package. I have taken them every night since and I can feel myself improving. I am so thankful for the good they do me that I have told several women about it."—*Mrs. G. W. Postliff, 263 Huron St., Stratford, Ontario.*

CASTLES IN THE AIR.

If you have built castles in the air, your work need not be lost; that is where they should be. Now put the props under them," said Henry David Thoreau. Helen Keller says we cannot always realize our ideals, but we can always realize our realities, and our ideas must be practical if we are to make a religion of them and live by them. Phillips Brooks expressed a high ideal in these words; "We reduce life to the pettiness of our daily living. We should exalt our living to the grandeur of life."

WHEN CHERRIES ARE RIPE.

Cherries can be cooked in a variety of ways. Tartlets can be made by lining tartlet cases with a good short pastry—half a pound of best flour, a pinch of salt, and six ounces of margarine well rubbed in and mixed to a stiff dough with water. Roll out, line the cases and prick all over, then fill with pieces of stale bread or rice to prevent from rising. Bake in a sharp oven until brown.

Stalk and wipe the cherries. Make a syrup of two tablespoonfuls of water and two ounces of sugar, adding the juice of a lemon. Add as many cherries as will be covered by the syrup and simmer until tender. strain, return the syrup to the pan, and thicken with a tablespoonful of cornflour mixed first with a little cold water and coloured with cochineal. Put the cherries in the tartlet cases after removing the bread, pour over a tablespoonful of the thickened syrup, and leave to set.

A delightful sweet for a hot day can be made as follows. Stone a pint of cherries and stew them in a syrup made with three-quarters of a pound of white sugar and a little water, adding the juice of a lemon or an orange. Soak an ounce of gelatine in a little cold water and then dissolve it in a pint of hot milk, being sure that the milk does not boil. Add the cherry pulp, whisk until frothy, then stir in the white of an egg, whisked very firmly. Place in a wet mould and leave to set. Add a little pink vegetable colouring if a better tint is desired. Turn out when set and eat with or without custard or red-currant jam.

A sweet the children will like can be made with an ordinary jelly square dissolved in the usual way, to which is added about half a pound of wiped stoned cherries. Allow to set and serve with custard.

Venerable Flemish City

The city of Ghent in Flanders has existed from the very earliest time, and no exact date can be given for its settlement, nor is the derivation of the name accurately known. The site was occupied by prehistoric tribes and later by the Celts and Belgii and Nervii. It is mentioned as early as the Seventh century. According to one author, Ghent was originally Gand, which derives from a Celtic word meaning "confluent" in reference to the location of the city at the confluence of the rivers Schedt and Lys.

A BOON TO GOLFERS

There is usually a tendency to stiffness on the second day after the game of golf—this is particularly so at the beginning of the season . . . and unless you safeguard yourself against this tendency, you are liable to experience considerable discomfort for several days.

Anticipate this stiffness by giving yourself a thorough rub-down immediately after the game with Absorbine, Jr. This famous antiseptic liniment will arouse circulation, break up congestion and bring your muscles into proper condition again.

Keep a bottle of Absorbine, Jr., always handy in your locker at the golf club . . . and use it freely after your shower . . . it will soothe and refresh sore, overworked muscles and tired, aching feet. Absorbine, Jr., is not greasy and does not stain the skin. At all druggist's—$1.25 per bottle. 134

Room Decoration

A rug of solid tone is very beautiful but may become monotonous unless the furniture is in contrast. If the plain rug is gray or brown, the upholstery might be a vivid blue or red. If the rug is red or blue, the furniture should yield a brown or blue tint to tone the rug down. A plain black rug is very beautiful with bright and lively colors in the furnishings and draperies.

BONDS.

Issued in sums of $100. and upwards, bearing the attractive rate of 5 Per Cent. per annum, payable half yearly. These Bonds are issued by the Canada Permanent Mortgage Corporation which is one of the oldest financial institutions in Canada (established 1855) and has assets exceeding $50,000,000.00.

Interest commences the day the money is received.

Don't Starve The Teeth

Teeth have to be built out of foods that are rich in phosphorus and calcium. Many children take into adult life teeth that are defective, unfit for the job that nature intended. Shredded Wheat with milk helps develop sound teeth, good muscles and good bones. It is rich in the bone-making salts. The crisp, crunchy shreds make chewing necessary and that develops healthy gums and good digestion.

THE EVOLUTION OF EARTH AND MAN.

Written by a group of scientists internationally known for their scholastic attainments. Edited by George A. Baitsell, Professor of Biology in Yale University, Yale University Press, New Haven. Price $5.00.

This fascinating volume gives with great completeness the scientific knowledge relative to the origin of the earth; the origin of life and its development on earth during the past ages; the origin of man as shown by evidence derived from fossil remains, from his present embryological development, from his structural features—particularly those associated with his nervous system—and from a comparative study of animal intelligence; the prehistoric industries of man, his art and culture at that time; the evolution society; the effect of environment on man's development; the future trend of evolution as it effects humans; the mechanism of evolution as seen by the biologist.

The material included shows the steady accumulation of scientific knowledge which continually sheds new light upon unsolved problems and assists in the solving of them. The 84 full-page illustrations add greatly to the interest and usefulness of the volume.

A few quotations show the intimate relation between biology, psychology and economics—and the other sciences.

Professor Huntington wrote: "Human progress depends upon three factors. The first is inherent mental capacity including both intellect and temperament, the second is material resources and the third human energy. If any of these is lacking, civilization stagnates or even retrogrades. The more we study the matter the more we see that from the lowest protosoan to the highest philosopher a marvellous unity pervades all nature. All progress in civilization, whether material or moral, arises from ideas in the minds of individuals. Therefore the first requisite of any advance is men with unusually gifted minds.

The vigor of the United States, Canada, Australia, and New Zealand is partly due to the faet that their people represent still another slight hit real racial change due to selective immigration.

Inherent ability is less important than the zeal and determination, or in other words, the energy with which that ability is used. We may have good ideas but not the energy to undertake the hard work necessary to bring them to fruitition. Such energy is needed not only by the individuals of unusual capacity who make the great inventions, but also by the people around them who must put the new ideas into effect.

He quotes from the article of H. S. Williams "Civilization." "We have but partly solved the mysteries of the progress owed its initiative to a new invention or discovery of science. The necessary mental mood is "alertness" which depends partly upon inherent mentality partly upon training, and partly upon health and physical energy which are quite as important as inherent mental capacity or material resources."

Professor Conklin of Princeton University in discussing "The Trend of Evolution" wrote: "Man transmits to his descendants the rough language, education and customs, his own acquirements, experiences and possessions as well as those of former generations. This has been called 'social inheritance' to distinguish it from 'general inheritance;' It is inheritance in the legal rather than in the biological sense. These are no part of our germ-plasm, nor even of our blood and brain, but rather of our environment. Civilization is the result of the accumulations of social inheritance, and the future progress of society must depend largely upon this capacity of profiting by the experiences of former generations.

Everywhere in the living world, progress is brought about by increasing specialization and co-operation, or, in the language of biology, by increasing differentiation and integration. Whether it be the development of an egg into an adult, the evolution of primitives, animals and plants into their more complex descendants, or the development and evolution of the body, mind and society of man progress everywhere is caused by increasing specialization and co-operation.

The only great progress which the human race has made during the past twenty thousand years has been social, and so far as we can now see into the future the progressive evolution of mankind must depend to a great extent upon society. Progress has not been in the individual but in the association of individuals, not in the inherited capacities of persons but in the organization of society and the future evolution of the body and mind of man will be determined to a great extent by society. Progress through natural selection is exceedingly slow and wasteful, intelligence is a great time-saver as contrasted with "trial and error," and intelligent artificial selection is the most rapid and satisfactory means for the improvement of the human race. Mankind could if it would breed a more healthy, more intelligent, more moral type than the general average of the existing race. By means of artificial selection, requiring no more intelligence than that which is now used in breeding of domestic animals, weakness of body, of mind, and of social instincts could be largely eliminated, and the average of the race could be raised to a level more nearly that of the best existing individuals. To a large extent mankind will determine its own destiny on this planet.

Whether it has wit enough to save itself from the dangers which now threaten is a serious question.

It is probably more valuable to the race to preserve a spirit of altruism and social justice than it is to rid society of its degenerates by ruthless methods.

Frequent wars have taken the best blood of the nations while the weak, incompetent, and degenerate are left behind. In general every man killed leaves one woman unmated for life. Among these are some of the best human stock the world possesses and thus the race is made poorer for many generations to come.

The ideals of the race as a whole are against the establishment of hereditary classes and in favor of democratic equality of opportunity, with social position dependent upon individual merit rather than upon family name or class privilege, and these ideals are probably sound both socially and biologically.

To be effective knowledge must rest upon character. Unless the instincts of service, sympathy, love prevail; unless the ideals of altruism, justice and morality persist, neither education nor science can save our civilization. The whole future welfare of the human race rests upon these decent instincts and social ideals of mankind. Here are the foundations upon which civilization rests, and, if they decay, the superstructure, however great and glorious, will fall to ruin."

HOWARD S. ROSS.

BRICK PATHS AND PORCH FLOORS

Garden walks offer an opportunity to bring out color in the same way that shrubbery finishes off the house, contractors declare. Dirt or gravel paths are held the least expensive to install but they require constant attention and the home owner is urged to install a more permanent material when the garden is laid out.

Common brick usually lends itself to any type of garden, says a writer in the Herald Tribune and variety may be secured by the use of various designs, such as the herringbone, diagonal running and cross patterns.

The method of laying and the pattern should be chosen for effect desired. Brick laid flat and directly on the ground will permits tufts of grass to grow through the joints, and as some of the bricks get out of line the walk soon has the appearance of great age. If the garden is geometrically laid out the walk should harmonize.

The herring-bone pattern fits into such a plan, but the regularity of the brick should be preserved with cemented joints on some type of foundation. Three inches of sand, well tramped, or two inches of concrete with a one-inch sand cushion are the most common bases. Where the walks intersect or widen an opportunity is given for the display of craftsmanship and originality of design in laying out the work.

With wide, well-kept lawns and a house set back from the highway there is no more effective drive than common red brick. For the average drive a sand-cushion foundation will be sufficient, with cement joints. The owner will find common brick a material of reasonable first cost and low upkeep that does not detract from the appearance of his home.

When the porch is not far above the ground brick may be used to advantage as a flooring. During the summer it may be sprinkled down and when covered will prove a cool rereate even on the hottest of days, and if it is enclosed for a sun porch during the winter the bright-red flooring will add much for a cheerful atmosphere.

Counting the Scratches

"That fellow's driving his car so carefully that I think he must be a new driver."

"No, he just paid cash for the car."
—Michigan Gargoyle.

FOREST FIRES.

Their Cause and Effect.

No doubt that many have, at some time, seen the terrible scars left on the countryside by bush fires— the millions of feet of standing timber destroyed and the absolute barrenness for years afterwards—only miles of waste.

What is visible to the eye is only a part of the damage, and it is probable that very few people realize the appalling waste of animal and bird life.

To obtain a slight idea of this, it is only necessary to go into the bush anywhere, sit still for fifteen or twenty minutes and note the number of living things within your range of vision. Now multiply this by a few thousand acres and you may have some idea of the teeming life that is in our forests.

When a forest fire sweeps through the countryside, what happens to all these animals and birds?

Some of them escape through flight if they get a early enough start—thousands are suffocated by the pall of smoke that precedes the fire, and many thousands more perish in the flames. Only the strongest and swiftest survive.

The eggs, nests, burrows and dens are all searched out and destroyed.

It is a very pitiful sight indeed, to see the deer, foxes, rabbits, squirrels, birds of all kinds, all travelling together with the same wild look in the eyes—FEAR!

You will see the rabbit and the fox, the wolf and the deer, the wolverine and the porcupine—all travelling together or taking refuge in the same water—with all natural fear of each other gone—all bent on the one thing —to escape from the all consuming peril behind.

This is not all the destruction.

There are no more trees or bushes to nest in.

No more dens or burrows to live and breed in.

Nothing more to feed on—in other words—nothing left but destruction; and it takes nature a good many years to cover up the scars and replace the food and nesting places of our wild creatures.

There are many causes of forest fires, most of them, it is sad to relate, are attributable to man's carelessness. Settlers and farmers clearing land and letting their brush fires get out of hand. Campers and hunters not extinguishing their fires properly. A cigarette butt, or a burning match carelessly thrown to the ground. These and many other acts of a similar nature yearly destroy thousands of acres of fine timber, thousands of game and other animals and millions of birds' eggs, nests and young.

Our forests are carpeted with several feet of pine needles and leafmould which in dry weather burns like tinder. A lighted cigarette butt dropped in this will smoulder until it ignites the ground it is lying on. This in turn will smoulder and burn, travelling under the surface for a long distance until it re-appears on the surface where it may be fanned into flame by the wind and it is hard to say where the resultant fire will stop.

We have seen a bon-fire lighted in freshly cleared land and ten days later a small child have his feet badly burned passing over this place in bare feet, although there had been no sign to show that there was still fire in the ground.

This discovery, while painful, no doubt enabled us to remove what might have been the cause of a serious forest fire.

This incident brings home very forcibly the extreme care necessary in extinguishing with absolute certainty any fires lighted in forest areas.

It is gratifying to note that the Province of Quebec in recent years has had a smaller percentage of fires than almost any other district on the continent, but that does not mean that we can let down the bars and be careless. The P. Q. Assn. Protection Fish and Game ask everyone to watch their fires, matches and cigarettes, and see that nothing is done to cause one of these most destructive of all fires.

Sporting Proposition

Abe was at a dance and lost a wallet containing $600. He got up on a chair and announced, "Gentlemen, I lost my pocket-book with $600. in it. To the man what finds it, I will gile $50.

Voice from the Rear: "I'll give $75.00—Medley.

BEWARE! THE WOMAN DRIVER

By Evelyn Robb.

I heard a man say the other day, "There are only two things that worry me when I am driving a car, cows and women drivers, because you never can tell which way they are going. When a woman driver puts out her hand it means she's either going to the right, to the left, straight ahead or she's going to stop." This is grossly exaggerated, of course, but there is some truth in it. There are a great many women driving cars who simply don't know what it's all about. They are either so cautious that they hold up traffic and get themselves in all kinds of unnecessary trouble or else they are absolutely reckless. There are very few women who reach a happy medium.

I am not going to say that all men are good drivers, or even that they are better drivers than women, but most of them seem to have a greater sense of responsibility than women. Before they take a car out they want to know what makes it go, how to fix it if anything happens, and what to do in case of an emergency. Most women drivers, on the contrary seem to have the feeling that these things don't matter because there will always be some nice man around to help them out if they get in a jam. A short while ago I saw a smart green roadster with a very pretty girl at the wheel stalled in the middle of a busy street. After fiddling with the starter for several minutes she walked across to a nearby taxi stand and asked one of the drivers if he would see what was the matter with her car. He obligingly got into the car and a moment later the engine was running. With a broad grin the man said, "It's always a good idea to turn on the ignition, lady." This girl probably had a driver's license and would have told you that of course she knew how to drive a car.

There are a lot of women drivers who do things like that. You see them out on the highway calmly watching a kind-hearted passerby who is changing a tire for them or perhaps fixing some little thing in the engine which every driver should know how to do. Changing tires is not very pleasant work, anybody will admit, but there's nothing so very hard about it. If a woman is capable of driving a car she is certainly capable of changing a tire and it doesn't seem fair for her to sit at the side of the road with a bewildered look on her face until some man comes by and takes pity on her helplessness. What's more it doesn't sound like what women are trying to kid the world into thinking they are, capable, reliable and just as efficient as men.

In the city a lot of women drivers are a regular menace just because they won't take the trouble to obey or even to learn the traffic rules. A woman smiles sweetly at a traffic cop and gets by with almost anything. If some policeman who really takes his job seriously stops her and explains why she shouldn't be doing what she is doing she looks insulted and reminds him that she is a lady and isn't used to being spoken to like that. If doesn't seem fair if women are going to do the same things as men that they should use their sex to get them out of troubles they bring on themselves by thoughtlessness and carelessness. Women drivers should know something about the insides of their car, should know and obey the traffic rule and should realize that by disobeying these rules they are not only endangering their own lives but the lives of the other people on the road.

PAINFUL IMPRESSION

There is no real pain when you cut your finger, Professor Pireon, of the College of France, informed the international congress on psychology. What you have, then, is just the impression that there is pain. A real pain, the professor explained, is a sense level reached when specific sense organs are stimulated. Whether toothache, lumbago or a punch on the jaw stimulates these organs, we know, says the San Francisco Chronicle, for the professor did not go into such particulars. But what we do know is that the impression of a pain hurts just the same.

PRECAUTIONS FOR PICNICKERS.

By Barbara B. Brooks.

Vacation days are picnic days. Many mothers pack their baskets with food and their cars with children their own and the neighbor's) and drive to the beach or woods for a day out-of-doors. The accepted style of dress for these outings is a sun-suit or bathing suit and no one questions the wisdom and comfort of such costumes.

Children have no tendency to overdress in summer, but they will overeat if their meals are not supervised. Many are the digestive upsets following picnics. Sometimes these unpleasant experiences are attributed to food poisoning but a recent publication from a State Department of Health says that such outbreaks may sometimes follow when the food is above reproach from a sanitary standpoint.

"Thus factors other than contaminated food must be found to carry the blame. Since experimental evidence shows conclusively that hot weather has a very profound influence over the digestive system of human beings it is believed that a picnic dinner eaten on a hot sultry day under mental stress may cause an outbreak of severe diarrhea even when the food is free from contamination.

Experiments performed with animals show that high temperature greatly reduces the efficiency of the digestive system. Animals confined in hot rooms will undergo attacks of severe diarrhea after eating slightly contaminated food which causes no abnormal symptoms in animals kept in rooms with cool air. Furthermore, the experiments show that radical changes take place in the acid content of the stomach and in the functions of the whole alimentary tract when the animal is subjected to high temperature.

Hot weather, moreover, causes a great increase in the heat regulating functions of the skin and there is a very close relation between the activity of the skin and the activity of the digestive system. When the skin is doing a maximum volume of work the digestive system is able to carry only a minimum load.

These factors make it very reasonable to believe that a picnic meal hastily eaten on a hot humid day under the stress of mental anxiety brought on by a threatening storm for example would cause severe digestive disturbances of a character similar to food poisoning outbreaks."

It is well to keep these facts in mind and to plan a quiet half hour before eating. This time can be spent playing a word game in the shade, reading a story aloud, or, if the children are used to such a thing, taking a rest period.

The luncheon should be simple and one which cannot be bolted hastily. One good combination is bran bread and butter, tomato sandwiches, casserole of cream potatoes and hard cooked eggs, lemonade and filled cookies. Another to use when a camp fire is possible is vegetable chowder, crackers, jelly sandwiches, and fruit. Stuffed eggs, vegetable salad, lettuce sandwiches and milk may be followed by a "surprise package." This is an assortment of things wrapped in a gay paper napkin—one piece of chocolate, 3 dates, 1 fig and two or three sweet crackers.

DISCOVERY OF RADIUM

In 1896 Henri Bacquerel discovered that a crystal of salt of uranium could in the dark reduce the silver bromide on a photographic plate, even when a sheet of black paper was placed between. Evidently a radiation different from the light was given out by the salt. Pierre and Mme. Curie found that the minaral pitchblende had the same properties. It belongs to the uranium family.

The Cheat.

An innkeeper who was away a good deal at race-meetings was disturbed to know that the bar takings had fallen considerably during the previous weeks.

One evening, returning home before he was expected, he went quietly into the bar, where the potman was dividing the night's takings into two piles, muttering as he did so, "One for me and one for the boss."

Coming to the last note, the potman hesitated a moment and finally placed it on his own pile. The innkeeper came forward.

"You know it was my turn that time," he shouted. "I wouldn't keep such a rotten bad sportsman. You're sacked."

His Alibi.

One of the men in the smoking compartment claimed that he was an expert on cities. He could look at a man and tell from what town he came. To his discerning eye each city put upon its inhabitants a certain stamp which never deceived him.

"You, for instance," he declared to the man on his right, "are from Montreal."

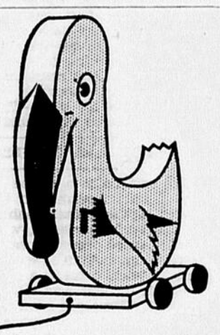
The man admitted the fact.

"And you," he said to the man on his left, "are from Quebec."

The man nodded.

"Now, you," he said, turning to a third man, "are from Toronto."

"Nothing of the sort!" objected that individual, hotly. "I've been ill for six months. That's what makes me look that way."



for

ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

HOWICK

The Knox church W.M.S. held their annual garden party at the home of Mrs. Andrew Roy on Thursday, July 29th inst. Miss A. Beaton gave a talk on the work of the girls who had graduated with her from the Deaconess Home at Toronto, also an outline of her own work. Mrs. S. Reddick gave a special talk on Prayer. Special music was given by Mrs. C. Orr, and Mrs. W. Logan who sang "The Old Rugged Cross." After the meeting lunch was served on the lawn and a social hour spent.

Miss Lydia McRae spent last week visiting her friend, Miss Vera Bennie at Riverfield.

Guests over the week end at the home of Mr. and Mrs. G. G. Stewart were Mrs. Paton, Mr. and Mrs. J. B. Stewart, Miss Betty Stewart and Mr. A. R. Stewart, all of Montreal.

Mr. and Mrs. Gay of Huntingdon spent Sunday with Mr. and Mrs. W. F. Welch.

Miss Marjorie Cullen is visiting friends at Dalhousie Station.

Mr. and Mrs. John Logan of Ormstown spent Thursday at the home of Mr. and Mrs. Jas. Logan.

Mrs. Hogans and family of Montreal are guests at the home of Mr. and Mrs. R. A. Henderson.

Mrs. Cuttle of Montreal is visiting at the home of Mr. and Mrs. Arthur Kerr.

Sunday guests at the home of Mr. and Mrs. W. L. Gebbie were Mr. and Mrs. M. B. Gilmore, Mr. and Mrs. W. H. Gilmore and Mr. J. J. Gebbie of Chateauguay Basin, Mr. George Gebbie of Winnipeg and Mr. and Mrs. Fisher of Rochester, N.Y.

Mr. and Mrs. Sidney Stewart spent Sunday in Valleyfield.

Guests last week at the home of Mr. and Mrs. Andrew Carruthers were the Misses Shirley and Lillian Waddell of Covey Hill, Miss Dixie Cavers, Ormstown and Miss Dorothy Stewart of Valleyfield.

Week end guests of Mr. and Mrs. D. C. McDonald were Mr. and Mrs. D. Cameron McDonald of Massena, N.Y. and Mrs. John Blachford of Huntingdon.

Mr. and Mrs. Albert Brown and family spent Monday in the city.

Mrs. Harrison and family of Bury are visiting at the home of Mr. and Mrs. Archie Cameron.

Mr. and Mrs. W. L. Gebbie and daughter Gladys spent Wednesday at Chateauguay Basin.

Mrs. O'Sullivan of Montreal spent Friday with her parents, Mr. and Mrs. Chas. Jodoin, Mrs. Jodoin and Master Francis O'Sullivan returning with her on Saturday.

Mrs. W. F. Welch spent Thursday and Friday with friends at St. Lambert.

Misses Linda and Norma Steele spent part of last week with friends in Ormstown.

The Knox Church Guild held a quilting party at the home of Mrs. Sidney Stewart on Thursday, Aug. 1st. Ten ladies were present, the afternoon was spent in quilting, after which a dainty lunch was served by the hostess.

HUNTINGDON

Miss Vera M. Ferns spent the week-end with Mrs. Jack Pringle of Ormstown.

HAVELOCK

Mrs. Charles Harrington and Mrs. Phelps and two sons of Burlington, Vt., visited friends in the vicinity the past week.

ROCKBURN

Miss Marjorie Greer of Ormstown is the guest of her uncle and aunt, Mr. and Mrs. George Williams of Rockburn.

STONE-EATING MICROBES

A London botanist, Dr. Buchanan, has discovered microbes which feed on stone. The germs have been artificially cultured and are of various types. They attack stone castles, cathedrals, and monuments, and infect buildings as other germs do the human body. Having found the disease it is surmised that it may be easy to find the cure and so prevent the decay of beautiful buildings.

Province of Quebec
School Municipality of Township of Elgin.

TEACHERS WANTED

For School No. 2 in the Township of Elgin. Term: ten months. Salary $55.00 per month. Schools to open September 2nd. Applicants must state qualifications and give Examining Boards from whom they received diplomas.

C. E. Ewing, Sec.-Treas.
Glenelm, Que., April 14, 1930.

NOTICE—Threshing and silo filling. Phone 622 r. 11, Warren G. Thompson.

NOTICE

Kept at the stable of the undersigned, a Yorkshire boar. Service fee, $1.50 at time of service. Wm. R. Wilson, Athelstan, Que.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Wharf, Beauharnois, P.Q.," will be received until **12 o'clock noon (daylight saving), Tuesday, August 19, 1930,** for the construction of a close faced cribwork wharf, at Beauharnois, County of Beauharnois, P.Q.

Plans and form of contract can be seen and specification and forms of tender obtained at this Department, at the offices of the District Engineer, Postal Station "H", Montreal, P.Q., Builders Exchange, 118 New Birks Building, Montreal, P.Q., and at the Post Office, Beauharnois, P.Q.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained therein.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to 10 per cent of the amount of the tender. Bonds of the Dominion of Canada or bonds of the Canadian National Railway Company will also be accepted as security, or bonds and a cheque if required to make up an odd amount.

NOTE.—Blue prints can be obtained at this Department by depositing an accepted cheque for the sum of $20.00, payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order,
N. DESJARDINS,
Secretary.

Department of Public Works,
Ottawa, July 28, 1930.

DISTRICT NEWS ABOUT OUR FARMS

Holstein News.

Luella of Pleasant Valley, the valuable Holstein 3 year old cow owned by W. S. Cullen, died this week. Upon examination after death, there was found a 5 inch piece of wire which was so deeply embedded in the liver that the veterinaries in charge agreed that it was doubtless swallowed by the animal about one year ago.

This cow which brought the highest price at the Sangster Dispersion Sale this spring won sixth place in the dry class at Ormstown Exhibition this year. In 1928 and 1929 it was one of the group of five exhibited as Quebec entry in State Herd Class at the Royal Winter Fair. Both years Quebec's entry ranked first.

Louella was bred to Brookholm Inka the 27th, one of the best bred bulls in the world, owned by Raymondale Farm of Veaudreuil.

Ayrshires in R. O. P.

During the months of June and July the secretary received in his office 95 reports of cows and heifers that qualified in the R. O. P.—33 in the 365 day division and 62 in the Honor Roll or 305 day division.

In the 365 day division, 15 qualified in the mature class, 4 in the four year old class, 5 in the three year old class and 9 in the two year old class.

It is perhaps worthy of mention that 27 of these records were made on two milkings a day, 12 in the mature class, 4 in the four year old class, 2 in the three year old class and 9 in the two year old class.

In the Honor Roll division, 20 qualified in the mature class, 8 in the four year old class, 14 in the three year old class; 20 in the two year old class.

The total records made on two milkings a day were 50—18 in the mature class, 7 in the four year old class, 12 in the three year old class and 13 in the two year old class.

BURNSIDE NEWS.

Just recently we shipped to Alta Crest Farms, Spencer, Mass., seventeen commercial cows, including ten pure breds and seven grades purchased from the herds of the following breeders: W. C. Tully, J. R. McOuat, James Angel, George Petrie, W. C. Wylie, A. B. MacFarlane and the Burness herd.

To James A. Vance, Princetown, Ont. we have shipped a very promising herd sire in Burnside Dalfibble Top Grade, an August calf. He is sired by Howie's Top Grade and out of Dalfibble Firefly Imp., with a record of 10,453 lbs. milk, 410 lbs. fat as a three year old. This calf was first in a strong class of senior calves at Ormstown and we believe he should prove a valuable herd sire in the hands of Mr. Vance.

House Conveniences

Invention is adding new devices to make our homes more convenient and attractive. Among these are the new screens which roll and may be made to fit any window. Ventilating systems are now being made which function in summer as well as in winter and are a part of the cooling system as well as the heating system. They carry the hot air off through the attic and even leave the upper story cool.

Steel clothes posts supplant the old time wooden contrivances to which we fasten our clothes line. The new posts are set in sockets, burried in the ground, and may be lifted out of the sockets and removed from sight when not in use. This is in line with our new delight in our artistic back yards.

A liquid abestos cement is now available which can patch the leaking roof without the trouble and expense of re-shingling. The modern tendency in bathrooms is, more of them and smaller. The ideal would be a bathroom for every bedroom. Many a clothes closet is being made into a bathroom, or in the corners of two adjoining rooms are sometimes cut away and the space converted into a bathroom.

A portable fence is the latest contrivance to enclose a dog or a baby. The legs are easily stuck into the ground and the sections wired together.

Three Idioms of Latin Tongue Long Employed

Ecclesiastical Latin differs from classical Latin in various ways, these changes being due principally to the origin and derivation of ecclesiastical Latin. Originally the Romans spoke the old tongue of Latin known as the prisca latinitas. In the Third century B.C., Ennibus and a few other writers trained in the schools of the Greeks made certain changes and, encouraged by the cultured classes, thus developed the classical Latin. The mass of the Roman people, however, continued to speak the old tongue, and after the Third century there were two separate idioms. The necessary contact between the two classes produced still a third. When the church developed a Latin it was necessary to employ a language which would appeal to the masses as well as to the literary class; hence some of the factors of each idiom were used. St. Augustine says: "I often employ words which are not Latin, and I do so that you may understand me. Better that I should incur the blame of the grammarians than not to be understood by the people." —Washington Star.

The life of an impostor is a very monotonous one, says an ex-convict. It is just one sham thing after another.

SANDWICH SUGGESTIONS

Bread for sandwiches should be at least twenty-four hours old.

Butter can be spread on the bread more easily if it is melted and applied with a brush before the slices are cut. Before cutting the bread plunge the knife into boiling water and dry thoroughly. This ensures neater slices. When preparing meat sandwiches mix the mustard with the butter before spreading it over the bread. If this method is adopted there will be no danger of the mustard forming in unsavoury patches.

Sugar is much more effective than salt for bringing out the flavour of tomato sandwiches.

If the weather is very warm wrap the sandwiches in a damp cloth, or in damp, grease-proof paper. Sandwiches treated in this manner keep moist and palatable for a considerable time.

ABUNDANT PROOFS THAT SOUND WAVES CAN KILL

Living creature can be struck dead by sound waves too highly pitched for the human ear to hear them, writes T. C. Bridges. These high frequency waves—called super-sonics have been tried on animals and produced instant death. The sound appears to shatter the blood corpuscles, as if the creature had been struck by lightning. Sound can do many things which seem mysterious and almost miraculous. For instance, fire can be extinguished by sound. Some little time ago Mr. Charles Kellogg of California gave a demonstration of the power of sound over the flames, and by drawing a violin bow across a piece of aluminum extinguished a burning gas jet at 50 feet. Sound vibrations can not only break a wine glass but can damage a building. It is suspected that the deep, vibrating notes of organs can cause vibrations which may actually weaken the structure of a church or cathedral.

ESSSENTIALS OF HAPPINESS

What makes for happy living? Three things, above all else. A healthy body, first and foremost. Then an environment which offers fair opportunity for a man's normal activities and aspirations. And finally a community of people who do two things: they must respect each individual's personality and leave him to work out his own salvation according to his own nature, in so far as he harms nobody; and they must co-operate in his work good-naturedly with him as well as in his play.—Prof. Walter B. Pitkin in the Household Magazine.

POPULAR COTILLON

The cotillon is a dance of French origin, and is performed to quadrille music. It was a fashionable dance at the court of Charles X, where it had been adapted from a peasant dance. At first for one, then for two performers, it soon became a ronde dance, in which form it was introduced into England. There are hundreds of possible figures in the modern dance, and the accessories are most elaborate. The cotillon is begun by a small number of couples, who occupy the floor while the rest of the guests sit about the ballroom. These couples select others from among those seated, and after going through a figure all take seats and are replaced by other couples until the whole company has danced that particular figure. Another method is for each set of couples to dance a different figure.

GENEROSITY

True generosity rises above ordinary rules of social conduct and flows with much too full a stream to be comprehended within the precise marks of formal precepts. It is a vigorous principle in the soul which opens and expands all her virtues far beyond those which are only the forced and unnatural productions of a timid obedience. The man who is influenced singly by motives of the latted kind, aims no higher than at certain authoritative standards, without ever attempting to reach those glorious elevations which constitute the only true heroism of the social character. Religion, without this sovereign principle, degenerates into a slavish fear, and wisdom into aspecious cunning; learning is but the avarice of the mind, and wit its more pleasing kind of madness. In a word, generosity satisfies every passion, and adds grace to every acquisition of the soul; and if it does not necessarily include, at least it reflects a lustre upon the whole circle of moral and intellectual qualities.—Melmoth.

Disavowal of Liability

"He washed his hands of the entire affair" we read every now and then, the application being that he of whom this is said simply refuses all responsibility for or interest in the particular matter under discussion.

Certainly, if any phrases sounded modern, this one does; and yet, surprising as it may seem, it is a direct allusion of Matthiew 27:24.

"When Pilate saw that he could prevail no longer, he took water and washed his hands before the multitude, saying, I am innocent of the blood of this just person."—Kansas City Star.

"It is possible for fish to become intoxicated." says a naturalist. Everybody has heard of canned salmon.

DANCE

— IN —
Riverfield Curling Rink
— ON —
TUESDAY, AUG. 19, 1930.
Music: O'Neil's Orchestra.
Tickets:—$1.00.

DUNDEE

Mr. Arch. Ferguson of Syracuse, N. Y., is visiting at the home of his brother, Mr. Wm. Ferguson and other relatives.

Mr. Arch. Colquhoun and Miss E. McLennan motored to Finch, Ont. Mr. Colquhoun returned on Saturday after spending a couple of days, while Miss McLennan is remaining longer.

Mr. A. Smirl of Chrysler, Ont., accompanied Mr. Colquhoun on his return and is visiting among relatives, including Mr. Wm. J. Steven.

Mr. Kenneth Steven of Saranac is also visiting at the home of Mr. R. G. Steven and Mr. Wm. Steven.

Mr. Peter Ferguson and Miss Elizabeth Ferguson intend taking a trip by boat up the St. Lawrence to Toronto this week.

Miss Verna Fraser is visiting her friend Miss Elizabeth Elliott at Howick.

Mrs. A. J. Elliott of Malone, visited at the home of Mr. and Mrs. H. A. Millar on Saturday.

Mr. and Mrs. John A. Carr were recent visitors at the home of Mr. and Mrs. Geo. W. Fraser.

Master John Tanner of Montreal is visiting at the home of Mr. and Mrs. John J. Fraser and family.

Mr. and Mrs. Leonard Farley and little daughter Margaret are spending a month here, occupying the residence of Mrs. Jessie Vass.

Miss Muriel McDougal of Lancaster, Ont., is a guest at the home of Mr. and Mrs. John J. Fraser.

Mrs. Dan Moody is in Montreal, with her sister, Mrs. McDermid, who we regret to learn is very ill, we hope soon to learn of an improvement in her health.

Mrs. Jos. Quenneville and son Robt. of Perrnyan, N. Y., is visiting his parents, Mr. and Mrs. Eli Quenneville.

Though the weather has been somewhat broken, haying has progressed very well and several farmers have completed gathering in their crops of hay, which is very good generally.

The "Y" met at the home of Mrs. John Cruickshank on Friday evening, Aug. 1st. The meeting was conducted in the usual manner by the President. It was decided to hold a picnic at Fraser's Point on Friday, Aug. 8th, to which all the members and friends are invited. A short while was spent in playing games on the lawn after which lunch was served to about 35 members and visitors. A vote of thanks was given Mrs. Cruickshank and family for entertaining the "Y". Then all joined hands and sang, "Auld Lang Syne."

The monthly meeting of the Presbyterian Ladies' Aid was held at the home of Mrs. J. T. Arnold, Thursday afternoon, July 31st.

Mrs. McPhee presided. Arrangements were made for an afternoon tea to be held on Mrs. Watson's lawn Aug. 14th, from 3 p.m. to 7 p.m.

At the close Mrs. Arnold served lunch to 22 members and visitors present.

Subject: The Living Church.
then on
Tuesday, Aug. 12th at 6.30.
Supper will be served on the church grounds, followed by a concert, Also our annual Bazaar.
Admission 50c and 25c.

WHEN TEA IS GOOD.

A well-known author has attributed his success to—a cup of tea before breakfast (writes a doctor).

Many dietetic experts condemn the habit, but except in the case of chronic dyspeptics, who should never drink tea, I consider it an excellent one. A cup of weak tea before breakfast not only stimulates the internal organs, but gives the mind a bright outlook.

As the beneficial effect of a cup of tea in the morning is as much psychological as physical, a great deal of it would be lost should the drinker have to get out of bed to make himself a cup. He should keep a small kettle with a spirit lamp on a table beside his bed.

China tea is better than Indian tea, as it is not so strong. It is best drunk very weak or without milk, but with a slice of lemon in the Russian style.

Tea should be avoided with breakfast or with any meal in which meat is included. Meat and tea do not go well together and are one of the chief sources of indigestion. Few people, however, realize this, and may be seen drinking tea with a heavy lunch or dinner.

A cup of tea in the afternoon, unless accompanied by too many sandwiches or pastries, does no harm. But it should always be taken hot, as tea contains tannin, an astringent acid which becomes very potent when it is cold.

The use of tea as a mouthwash is an excellent practice, and is indulged in by natives on the tea plantations in Ceylon and India, who clean their teeth with cold tea leaves. The acid in the leaves hardens the gums and preserves the teeth.

On no account should tea be taken before going to bed, as it is a powerful stimulant and will usually keep the drinker awake. A glass of hot water, however, may be taken at this time, It aids the digestion.

Adjustable Racquet Strings

Mainsprings of timepieces, violin strings and the strings of tennis racquets have a way of breaking without any explainable reason. To overcome this trick of the atmosphere, for the atmosphere has had to bear the blame, the violinist loosens the strings of the instrument during the interval of disuse. The idea has been recently made use of in the design of the tennis racquets. By means of a threaded contraption extending through the handle, it is possible to loosen the strings when not in use. It is said that the implement is in much better condition for play when tightened after a short repose of this kind.

Let us help you plan your next trip. Telephone or call on

HUNTINGDON Fair

Sept. 10 - 11 - 12

We are counting on you as an exhibitor.

The Prize Lists will be out shortly.

Lord Atholstan has kindly donated four $50.00 prizes for most prize money in horses and the three cattle breeds. This is an excellent prize and should encourage exhibitors.

R. A. ARTHUR, President. **J. SMAILL,** Secretary.
