INTRODUCTION

For several years, the ministère de l'Éducation has been publishing a statistical report on the results on the June uniform ministry examinations and on graduation rates. This information reflects the Ministère's desire to facilitate access to information that is of the public domain.

This year, the report, which is also available on the Internet, combines the results for both the public and private school systems in one document. To make it easier to locate information, educational institutions are listed in alphabetical order for each administrative region. The document is divided into three sections: organization of the examination session, results on the uniform examinations, and graduation rates by school board and by administrative region.

The results are presented for the examinations as a whole, by language of instruction and by ranking of educational institution for each uniform examination. This year, the section covering graduation rates contains only one indicator (instead of two) presented in table form: graduation rates by cohort, observation period and sex. Additional information on the results on uniform examinations and graduation rates are available at the Ministère's Web site (see Appendix 1).

This information document is intended for educational institutions and the general public with a view to allowing:

- school boards and private schools access to information that they can use to evaluate their educational practices, to compare their effectiveness over time, to identify their strengths and weaknesses, and to compare their performance with that of other educational institutions;
- the general public access to official Ministère information.

1. ORGANIZATION OF THE EXAMINATION SESSION

1.1 Coordination

One of the responsibilities of the Direction de la sanction des études involves defining and applying rules regarding the certification of studies in general education. Consequently, one of its activities includes coordinating the administration of uniform examinations, the correction of the examinations and the publication of the results.

1.2 Certification Requirements

Certification requirements are determined by regulation in section 69 of the *Basic school regulation for secondary school education*. The annual *Directives* specify the current certification requirements. Thus, students participating in the June 1996 examination session were subject to the terms of the transitional certification system, which stipulates that they must have:

- a) accumulated a minimum of 130 credits (one credit corresponds to approximately 25 hours of learning activities) over the first five years of their secondary school studies;
- b) out of these 130 credits, earned at least 20 Secondary V or vocational education credits;
- c) obtained 60 percent or more in each of the following subjects:
 - Secondary IV and Secondary V language of instruction
 - Secondary IV or Secondary V second language (French sector), OR
Secondary V second language (English sector)
 - Secondary IV history of Québec and Canada
 - Secondary IV or Secondary V moral education or Catholic religious and moral instruction or Protestant moral and religious education

1.3 Preparation of Uniform Examinations

In Québec, the responsibility for preparing examinations for the certification of studies is shared by the Ministère and the school boards and private schools. Each year, the Ministère selects a certain number of subjects for which it will prepare uniform examinations. Evaluation in the other subjects is the responsibility of school boards and private schools.

The uniform examinations are summative examinations used for evaluation purposes in subjects that are compulsory for the certification of studies or the recognition of prerequisites for certain college programs.

The following are some of the characteristics of the uniform examinations that are used to certify secondary school studies:

- The examinations are prepared by teachers and educational consultants in the English and French sectors of the education system. Every year, many people partake in a process to develop uniform examinations and the Ministère coordinates the entire operation.
- These examinations are not field-tested prior to being administered to students in Québec schools; however, this does not preclude the field-testing of certain items that appear more problematic. A new examination is developed for each subject and each examination session. The Ministère strives to develop examinations that are comparable from one session to another.

1.4 Administration of Examinations

Every year, the Ministère publishes an official timetable for the examination sessions. Educational institutions must respect this timetable in full: school boards and private schools may not hold a uniform examination at any other date than the one indicated in the official timetable. Educational institutions are responsible for administering the examinations and must provide the required premises and supervisory personnel. The Ministère provides the examination materials.

1.5 Correction of Examinations

Uniform examinations may contain a certain number of multiple-choice items and a certain number of constructed-response items. The multiple-choice items are corrected by the Ministère and the constructed-response items, by the educational institution. The French, language of instruction, examination (with the exception of the French writing examination) and the English Language Arts examination are corrected in full by the educational institutions in accordance with the Ministère's instructions.

1.6 Processing of Results

For the reasons specified below, the Ministère may use two procedures called *conversion* and *moderation*, which can affect examination results. However, under no circumstances does the Ministère normalize results in the statistical sense of the word. If it were to do so, it would have to change the raw scores for each of the examinations so that the distribution of the scores would follow a normal (bell-shaped) curve.

Conversion

To ensure that the examinations are fair, the Ministère endeavours to prepare examinations of comparable difficulty from one year to the next. It is important to remember, however, that these examinations are not field-tested.

Despite the customary precautions taken during the development of the examinations, abnormally high failure rates may occur. In this case, the Ministère may either take corrective measures—for example, by removing a poorly worded question—or it may convert the results. Conversion is a procedure that involves raising all the scores of an examination slightly, thereby lowering the failure rate. In this respect, the first paragraph of section 470 of the *Education Act* stipulates that, "The Minister may, to avoid penalizing students unduly, revise the results obtained by them in the examinations he imposes, to compensate for any error or ambiguity in the examinations brought to his attention after they are taken." Recourse to this measure is exceptional. In June 1996, the scores for the examinations for history of Québec and Canada (085-414 and 585-414) and physical science 416 (056-416 and 556-416) were converted.

Moderation

To ensure that all candidates are treated fairly, and in accordance with the *Education Act*, the Ministère strives to make marking as comparable and objective as possible. However, the marks given by different schools are not always comparable because evaluation policies vary widely from one school board to another, from school to school, and even from one teacher to another. In addition, the degree of difficulty of the various local examinations varies from one educational institution to another. It is within this context that the Ministère uses moderation. Moderation involves adjusting each student's school mark upward or downward, on the basis of a comparison between the average school mark of all the students in the same teacher-group and the average mark of the same group on the uniform examination. This moderated school mark is used to calculate the final mark.

It is important to note that moderation cannot result in the failure of any student who has obtained a pass mark both from the school and on the uniform examination.

Final Mark

For the uniform examinations, the final marks are made up of the students' moderated school marks and their results (converted or not) on the June uniform examinations.

1.7 Diffusion of Results

The Ministère is responsible for diffusing the results and publishes official documents for students and information lists for educational institutions as soon as possible after the examination session.

In this way, educational institutions may immediately assess their performance and make adjustments to their educational practices in order to ensure academic success for all.

Lastly, the Ministère publishes a report for educational institutions and the general public.

2. EXAMINATION RESULTS

This section presents tables showing the overall results on the June 1996 uniform examinations in terms of the success rates and average marks on these examinations, by school board and private school, for each administrative region. The tables also specify the number of students, the number of examinations taken and the ranking of each institution in the public and private school systems. Educational institutions are listed in alphabetical order for each administrative region in order to facilitate the location of information.

2.1 Overview

In June 1996, nine uniform examinations in French and eleven uniform examinations in English were administered to Secondary IV and Secondary V students:

| Examinations in French | | Examinations in English | |
|------------------------|--|-------------------------|------------------------------|
| 051-570 | Chimie 534 | 551-570 | Chemistry 534 |
| 054-570 | Physique 534 | 554-570 | Physics 534 |
| 056-416 | Sciences physiques 416 | 556-416 | Physical Science 416 |
| 056-436 | Sciences physiques 436 | 556-436 | Physical Science 436 |
| 064-436 | Mathématique 436 | 564-436 | Mathematics 436 |
| 085-414 | Histoire du Québec et du Canada | 585-414 | History of Québec and Canada |
| 132-560 | Français, écrit | 630-516 | English Language Arts |
| 136-570 | Anglais, production orale et écrite | 634-560 | French Writing |
| 136-580 | Anglais, compréhension orale et écrite | 634-570 | French Reading |
| | | 634-580 | French Listening |
| | | 634-590 | French Speaking |

Table 1 presents a few points of general information on the June 1996 examination session for public schools, private schools and institutions falling under the responsibility of or financed by a provincial ministry other than the ministère de l'Éducation or under the jurisdiction of the federal government. The equivalent data for June 1995, June 1994, June 1993 and June 1992 are also included.

TABLE 1 Examination Sessions, 1992 to 1996

| | 1996 | 1995 | 1994 | 1993 | 1992 |
|--|---------|---------|----------------------|-----------------|---------|
| Number of Uniform Examinations | 20 | 18 | 17 | 15 ¹ | 26 |
| Number of Students Taking One or More Uniform Examinations | 160 766 | 159 185 | 155 461 ² | 227 110 | 220 367 |
| Number of Examinations Taken by These Students | 428 592 | 400 141 | 358 529 | 359 283 | 426 550 |

Table 2 shows the average marks and success rates obtained in all the schools of Québec (public schools and private schools, as well as institutions under the responsibility of a provincial ministry other than the ministère de l'Éducation or under the jurisdiction of the federal government) for the uniform examinations administered in June 1996. The data presented in this report are based on the students' final marks. The equivalent data for June 1995, June 1994, June 1993 and June 1992 are also included.

TABLE 2 Examination Results According to Certain Variables, 1992 to 1996

| | Average Mark (%) | | | | | Success Rate (%) | | | | |
|-------------------------------------|------------------|------|------|------|------|------------------|------|------|------|------|
| | 1996 | 1995 | 1994 | 1993 | 1992 | 1996 | 1995 | 1994 | 1993 | 1992 |
| Boys | 71.7 | 71.2 | 71.3 | 72.2 | 71.5 | 84.9 | 84.0 | 84.3 | 83.9 | 83.9 |
| Girls | 73.0 | 72.6 | 72.1 | 72.5 | 71.3 | 86.1 | 85.4 | 83.9 | 83.7 | 81.8 |
| Public Schools | 71.2 | 70.8 | 70.3 | 70.8 | 70.0 | 83.8 | 83.0 | 82.0 | 81.4 | 80.6 |
| Private Schools | 78.0 | 78.1 | 78.6 | 79.4 | 77.4 | 93.4 | 93.9 | 94.7 | 94.7 | 91.9 |
| Language of Instruction: French | 72.7 | 72.4 | 71.9 | 72.5 | 71.6 | 86.0 | 85.5 | 84.3 | 83.9 | 83.0 |
| Language of Instruction: English | 70.0 | 68.1 | 70.2 | 71.2 | 70.3 | 81.3 | 78.5 | 82.1 | 82.5 | 81.4 |
| All of Québec | 72.4 | 71.9 | 71.7 | 72.3 | 71.4 | 85.5 | 84.7 | 84.1 | 83.8 | 82.8 |

¹ The disparity between the number of examinations administered in 1993 and 1992 may be explained by the implementation of new programs in physical science and mathematics for which no uniform examinations were prepared in 1993, as well as by the elimination of the former chemistry, physics and mathematics programs.

² The disparity between the figures for 1994 and 1993 may be explained by the fact that there were no Secondary III examinations in 1994.

Table 3 presents the results on the June 1996 uniform examinations by administrative region in the public and private school systems.

TABLE 3 Uniform Examination Results, by Administrative Region, Public and Private School Systems, June 1996

2.2 Results by Educational Institution and Administrative Region

The results presented in this section should make it possible for educational institutions and the general public to assess the performance of school boards and private schools with respect to academic success. As indicated in the various factors affecting academic achievement in Appendix 2, this information should be used with discretion: it has its limitations and there will always be factors that are beyond the control of school boards and private schools.

The following tables include the overall results for school boards, public schools, private schools and institutions under the responsibility of a provincial ministry other than the ministère de l'Éducation or under the jurisdiction of the federal government. The Cree School Board and the Kativik School Board are, however, not included and the results for institutions under the

responsibility of a provincial ministry other than the ministère de l'Éducation or under the jurisdiction of the federal government are not published.

The results for the June 1996 uniform examinations are presented as follows:

TABLE 5: the overall results on the uniform examinations, by educational institution

TABLE 6: the overall results on the uniform examinations for the French sector, by educational institution

TABLE 7: the overall results on the uniform examinations for the English sector, by educational institution

TABLE 8: the results on each uniform examination - ranking of educational institutions by success rate

NOTE

The names of educational institutions have been taken from the *Répertoire des organismes et des établissements d'enseignement*, published by the ministère de l'Éducation in 1996.

3. GRADUATION RATES BY SCHOOL BOARD AND ADMINISTRATIVE REGION

This section sheds light on the situation of school boards and administrative regions with respect to students graduating from the youth sector or before the age of 20 from the adult sector.

Table 9 presents the graduation rates by cohort, observation period and sex, as follows:

- cohort of 1988-89: observation periods of 5 and 6 years; observation period of 7 years, by sex;
- cohort of 1989-90: observation periods of 5 and 6 years; observation period of 7 years, by sex;
- cohort of 1990-91: observation periods of 5 and 6 years;
- cohort of 1991-92: observation period of 5 years.

The graduation rates for school boards are calculated by means of a longitudinal method based on the observation of various cohorts of students. These rates are determined for observation periods of 5, 6 and 7 years. This means that students in the 1988-89 cohort obtained a diploma in 1992-93, 1993-94 and 1994-95. Moreover, the probability of obtaining a secondary school diploma, as stated in the *Education Indicators*, measures the total graduation for a single year.

Thus, the graduation rate after 7 years for the cohort of 1989-90 corresponds to the percentage of students **newly enrolled in Secondary I**³ in 1989-90, in a given school board, who earned a first diploma⁴ within a 7-year period.⁵

The first diploma may have been obtained at the same school board, at another school board or at a private school, either in the youth sector or in the adult sector (before the age of 20).

³ Only students without a diploma enrolled for the **first time** in Secondary I are included. Students repeating a year are excluded from those considered "newly enrolled" to ensure that they are counted as belonging to one cohort only.

⁴ Because some students obtain more than one diploma, only the first diploma is taken into account. The following diplomas are considered for the purposes of all graduation indicators in this document: Secondary School Diploma—SSD (general and vocational), Secondary School Vocational Diploma—SSVD, and Secondary School Vocational Certificate—SSVC.

⁵ This 7-year period is required to measure the graduation rate of students 19 years of age and under, in both the youth and adult sectors, given that 12 is the normal age for entering secondary school.

For example, the following data were used in calculating Québec's overall graduation rate after 7 years for the new enrolments of 1989-90:

- a) **89 899⁶** students without a diploma were newly enrolled in Secondary I in the youth sector in 1989-90;
- b) **65 780** first diplomas were granted to these students from 1989-90 to 1995-96 inclusively.

According to the above figures, Québec's overall graduation rate for the new enrolments of 1989-90 after 7 years is **73.2 percent**. Table 9 shows that this result is higher than that observed for the previous cohort. A total of **72.2 percent** of the students newly enrolled in Secondary I in 1988-89 obtained a diploma after 7 years, representing an increase of 1 percentage point.

Table 9 demonstrates that more girls continue to graduate from secondary school than boys. In the 1988-89 cohort, **79.4 percent** of girls and **65.3 percent** of boys obtained a diploma. For students in the 1989-90 cohort, the rates were **80.2 percent** and **66.5 percent** respectively.

Lastly, Table 9 shows that the graduation rates after a usual period of 5 years increased slightly. Thus, **57.7 percent** of the 1988-89 cohort earned a diploma after a 5-year observation period (therefore, up to 1992-93). For the cohorts of 1989-90, 1990-91 and 1991-92, these rates were **59.8 percent** (graduating up to 1993-94), **60.5 percent** (up to 1994-95) and **61.8 percent** (up to 1995-96).

⁶ The number of students leaving without a diploma because of emigration or mortality, as found in the estimates produced for each school board, has been subtracted from the total number of new enrolments.

TABLE 9

THE RESULTS FOR ALL OF QUÉBEC INCLUDE THOSE FOR THE PUBLIC AND PRIVATE SCHOOL SYSTEMS AS WELL AS INSTITUTIONS THAT ARE UNDER THE RESPONSIBILITY OF A PROVINCIAL MINISTRY OTHER THAN THE MINISTÈRE DE L'ÉDUCATION OR UNDER THE JURISDICTION OF THE FEDERAL GOVERNMENT.

APPENDICES

APPENDIX 1 ADDITIONAL INFORMATION

The following information is available (self-extracting files in Excel 5.0) at the Ministère's Web site <http://www.meq.gouv.qc.ca>:

Overall Results

- Overall results on the uniform ministry examinations, by educational institution (school board and private school)*
- Overall results on the uniform ministry examinations, by school board and by public school
- Overall results on the uniform ministry examinations for the French sector, by educational institution (school board and private school)*
- Overall results on the uniform ministry examinations for the English sector, by educational institution (school board and private school)*

Results by Uniform Examination

- Results on each uniform examination by school board and by private school, as well as by school board and by public school:
 - . Anglais, langue seconde, Secondary V: final results and results by examination (oral and written production, oral and written comprehension)
 - . Chemistry 534, Secondary V: final results and written examination
 - . English Language Arts, Secondary V: uniform examination
 - . Français, langue maternelle, Secondary V: final results and results by examination (writing, reading, listening, speaking)
 - . History of Québec and Canada, Secondary IV: uniform examination
 - . Mathematics 436, Secondary IV: uniform examination
 - . Physical Science 416, Secondary IV: uniform examination
 - . Physical Science 436, Secondary IV: uniform examination
 - . Physics 534, Secondary V: final results and written examination

* These results are included in this document.

Graduation Rates

- Graduation rates after 7 years, delayed secondary school entries and proportion of students enrolled in the private sector, by administrative region and by school board, 1988 and 1989

APPENDIX 2 FACTORS AFFECTING ACADEMIC ACHIEVEMENT

Certain factors may affect students' academic achievement. It is important that educators take these factors into consideration when comparing their students' marks with the provincial results. Some factors may be a result of the diversity in the educational and administrative practices of school boards, whereas others are considered beyond the institution's control. Such factors include:

- **Prerequisites for admission to certain courses:** For instance, students may be required to obtain a minimum mark in a mathematics course before they are allowed to take certain optional chemistry, physics or mathematics courses.
- **The number of uniform examinations for which students sit:** The number of examinations for which students sit may influence the results for an educational institution. Thus, the students of a school that does not offer Secondary V instruction would write only examinations up to the Secondary IV level. A school offering Secondary IV and V instruction would have its students write all the uniform examinations for their particular level of instruction.
- **Family situation:** The support and availability of parents, their financial situation and the family's standard of living in general are among the factors that may affect a student's academic achievement. Studies carried out in Québec and elsewhere in the world have shown that the academic achievement of students from socio-economically disadvantaged areas is generally lower.
- **Socio-cultural, support and sports services:** The existence of such services and their ease of access allow students to engage in activities outside of school hours that may stimulate the development and mastery of complementary skills and knowledge.
- **The location of the educational institution:** Learning in some subjects, such as the second language, may be affected by the institution's location. For example, the conditions for learning English as a second language are not the same throughout Québec.
- **The number of students in the second cycle of secondary school:** In educational institutions with relatively few students in the second cycle of secondary school, the choice of courses offered may be somewhat limited and the classes more or less homogeneous. The institution's overall performance may thus be affected.
- **Mother tongue:** In the past several years, some educational institutions have experienced an increase in the number of students whose mother tongue is not the language of instruction, which may have an impact on the institution's overall results.

- **The integration of students with special needs into regular classes:** It is clear that in educational institutions that routinely integrate students with special needs into regular classes, the increased range of disparities among the students sitting for ministry examinations may affect the overall success rates for those institutions.
- **The grouping of students with major learning difficulties or psychosocial integration difficulties:** Such students enrolled in special classes may have a significant impact on academic achievement.
- **Different practices related to admission:** Some educational institutions take in all students, while others base admission on past academic achievement or performance on aptitude tests.
