Introduction

The harmonization of pre-university programs is part of a lifelong learning approach that makes it easier for college-level students to switch from one pre-university program to another without having to repeat activities for which they have already obtained credit.

The two main objectives of the harmonization process are:

- to determine equivalencies for the objectives and standards of general education components and pre-university program components, in order to facilitate the recognition of prior learning
- to assist universities with respect to the admission of students who have followed a non-standard learning path

The harmonization process will benefit adults who go back to study at the college level in a different program or under a different Regulation. It will also benefit students who change programs while still at college, students who study in two different programs at the same time and students who have previously graduated from college.

The program in which a student has already attained one or more objectives is called the **source program**, and the program in which the student wishes to continue studying after obtaining credit for objectives already attained is called the **target program**.

Each table is divided vertically into two sections and shows the relationship between two programs. In each table, the code and statement for each objective completed in the source program are given on the left, and those for the target program on the right. A student who has met one or more of the objectives of the source program can obtain credits for the equivalent objective or objectives in the target program after enrolling in that program.

The institution has the option of using these equivalencies or establishing its own.

Target program: *Science*

Source program: *Computer Science and Mathematics*

Versions 200.B0 and 200.C0 of the programs have seven common objectives. A student who has attained one or more of these objectives in the *Computer Science and Mathematics* program can obtain credit for the equivalent objective or objectives in the *Science* program after enrolling in that program. The codes for these objectives are: 00UL, 00UN, 00UP, 00UQ, 00UR, 00US and 00UT.
