

With this photo, the Association wants to pay tribute to three exceptional women who, each in their field, have done things in a brilliant way. These three women represent three generations of the same family. On the left, Lorraine Robitaille Samson who is considered as the initiator of the Association by grouping a first team and which led to its founding in 1988. On the right, Claire Samson, Lorraine's daughter, who leads a research career in high technology. In the center, Sophie Giguère Samson, Claire's daughter and Lorraine's granddaughter, who is embarking on a career in law. The picture was taken when she was admitted to the Ontario Bar in Toronto. More details inside the newsletter.

## A Word from the President

*Translated by Johanne Boucher, trad. A., Montréal*

Dear members,

As this gloriously warm and sunny summer is ending, we welcome the beginning of a new season full of activities. We hope that you will find these activities attractive and that you will take the opportunity they offer to make our Association better known among your friends and relatives.

We held our annual general assembly this past June, but few members attended. While we would hope for greater participation, we are always happy to meet new members. On that day, we had also organized, together with the Tremblay Family Association, a tour of Québec City by bus and it was a very interesting and lively event, though the number of Robitaille participants was small.

For many of you, our newsletter, Les Robitaileries, is the only means we have to keep you informed. Over the recent years, we have developed other communications tools to reach out to Robitaille descendants and their relatives. A team made up of Natalie Bissonnette, Marc, René, Jean and Florent Robitaille met over the

summer and prepared a strategic plan to improve the efficiency of our communications.

Natalie and Florent manage our Facebook group which has currently 245 friends as well as a Facebook page . If you have not done so already, we invite you to join the group and follow the posts on our page. We also urge you to let other Robitaille family members know about these.

The current members of the Board of directors have been volunteering for a good number of years and some of them have expressed their wish to retire. If you can give a little bit of your time to the Association, please let us know so we could welcome you to the team and get you started gradually.

Finally, I invite you to let us know what your needs and wishes are, so we can work towards making the Robitaille Family Association more relevant to everyone.

*Your president for 2018-2019,  
Marc Robitaille*

## Thanks to Facebook

*By Jean Robitaille, Québec*

Last spring, the Robitaille Family Association challenged Robitailles to post their old family photos on Facebook. For my part, I took up the challenge by introducing my grandfather and my great-grandfather, but the vein quickly ran out. At home the family album is not so full of old photos.

However, I really liked the experience and I searched the Internet for other old photos of Robitailles that would be related to me.

By chance, I came across a picture of Charles Robitaille, my great-grandfather's brother. On June 3, 2018, this photo was placed on the Ro-

bitaille Family Association page and provoked a series of comments. To date, the photo has been seen by 147 people.

Charles Robitaille (1843-1921) was born on June 12, 1843 in L'Ancienne-Lorette. Charles was the twin brother of Cyrille Robitaille (pianos dealer in Québec City). Their parents were Jean Robitaille (1805-1891) and Adélaïde Debigaré (1809-1857)

Charles's wife, Éлиза Guay (1853-1938), was born in L'Islet on October 24, 1853. Charles married Éлиза Guay on November 18, 1872, at St-Jean-Baptiste Church in Québec City.

With the help of Joseph Robitaille (USA), great-grandson of Charles and Éliza, we were able to identify the people who appear in the photo.

Charles Robitaille appears here proudly surrounded by his family, alongside his wife Éliza Guay.

In the photo, besides his wife, we find all his children alive at the time. By the apparent age of the children, especially the youngest, we can estimate that the photo was taken between 1900 and 1902, probably before the marriage of the eldest son.

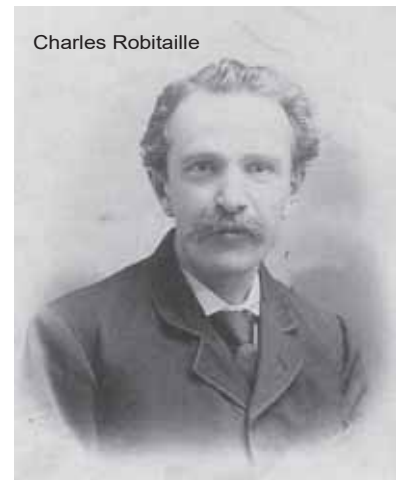

At the beginning of their marriage, Charles and Eliza were sorely afflicted. The twins Marie-Éliza and Marie-Éva born May 21, 1874 both died on May 26, 1874.

When Charles dies on April 12, 1921, at the age of 77, all his children are married except Rosario, who will marry a few years later.

Éliza will die on May 11, 1938, at the age of 84 years.

Charles was a shoemaker. It can be seen in the censuses of 1881, 1891, 1901 and 1911. In the census of 1861, at 18, he is an apprentice-shoemaker.

As we have already mentioned in an earlier issue of the *Robitalleries*, Charles is one of three Robitaille brothers who married three Guay sisters: Cyrille and Elmire, Charles and Éliza, Cyprien and Eulalie. The last two couples even married the same day at St-Jean-Baptiste Church in Québec City.

### ■ Offsprings of Charles and Éliza

## 2018 Annual Meeting

On June 3, there was a meeting of the members at L'Ancienne-Lorette which included the annual meeting, a conference on the Hurons crossing at the beginning of the municipality and a friendly meal.

The President in his annual report mentioned the difficulties of recruiting new members and volunteer availability as well as a governance project of the Association which will be presented to the Board in the fall. The treasurer has filed the financial statements which show that the finances are in very good order.

After the information and discussions of the annual meeting, the participants enjoyed a meal around a friendly table.

*Photo : Natalie Bissonnette*

The second part of the meeting included a lecture by the historian Gilles Drolet, a citizen of L'Ancienne-Lorette, who witnessed the 1983 and 2013 archaeological digs near the present church. These digs determined the exact location of the chapel built with more than 50,000 bricks. The bricks came from the Beupré coast and were transported by boat to Québec city and then sledged on the first winter snows to their final destination. In 2018, new archaeological digs were made before the conversion of the old presbytery into an administrative building of the municipality, and many new artifacts of Huron origin were found.

Model installed near the church of L'Ancienne-Lorette showing the site that welcomed more than 200 Hurons threatened to be massacred by the Iroquois. Father Chaumonot, a jesuit, built a Catholic chapel in 1674 for these Indians and for the first settlers, including the three Robitaille brothers, who were established a few kilometers away. A historian from the Historical Society of the municipality, M<sup>r</sup> Gilles Drolet, gave a lecture on the archaeological excavations that led to the discovery of the site of the chapel.

*Photo: René Robitaille*

Nearly thirty people gathered around a large table to enjoy a cold buffet to exchange ideas and get to know the future projects of the Association.

## Jean-Claude Caron, a living encyclopedia

By René Robitaille, Saint-Lambert-de-Lauzon

Jean-Claude Caron, whose mother was a Robitaille, has devoted more than half of his life to Collège Saint-Charles-Garnier in Québec City. Graduated in 1951, he worked as a pharmacist for ten years before undertaking a second career in education at the Jesuit College, his alma mater. For four decades he taught science and mathematics while performing administrative tasks including secretary general and general manager. Today, 94 years old, he volunteers in the Association of Alumni as secretary and is responsible for the publication of the college newspaper, *Le Garnier*, a position he has held since his retirement in 1991.

Jean-Claude, gold medalist in pole vault, in 1944.

It can be said that after 72 years spent at the Jesuit College (aka Saint-Charles-Garnier since 1981) he knows the history of this renowned establishment. This is what he tells us:

*"On the facade of this private educational institution on René-Lévesque Boulevard, you can read Collège des Jésuites - Saint-Charles-Garnier with two years: 1635 and 1935. The first date recalls that the Jesuits founded in Québec the first college in North America, one year before Harvard. It all began in a small wooden house in the Place Royale area. Reduced to ashes during the great fire of Québec in 1640,*

*this first school was replaced in 1650 by a prestigious stone building. The latter was demolished in 1878 to make way for the current Québec City Hall. In 1930, the Jesuits took up the vocation of the 1<sup>st</sup> college in the former presbytery of Notre-Dame-du-Che-min (site currently occupied by CHSLD Courchesne). Some wall sections of the presbytery are still visible. Becoming cramped, it moved to Saint-Cyrille Boulevard (René-Lévesque) in 1935. Hence the second date."*

Starting as a student in 1937, M<sup>r</sup> Caron is almost part of the history of this new college. As a pupil he lived the requirements of the classical course and the

rigor of Jesuit education. Upon his return as a teacher in 1954 in a boys-only college, he first saw the arrival of girls from 1966 to 1969 for the 3 last years of the curriculum (rhetoric and philosophy classes). He also witnessed the disappearance of the classical course, of which the last two years formed Cégep Garneau with Collège Mérici and École Normale Laval. Later, the administration evolved rapidly. Lay people became part of the board of directors, then the Jesuits entrusted the management to a new corporation, Collège Saint-Charles-Garnier, of which M<sup>r</sup> Caron was the first president. Shortly afterwards he was appointed general manager. It was under his reign that the college became mixed in all the classes.

In 1985, he returned to teaching until his retirement in 1991. Embedded in the walls of the college, he simply cannot leave his alma mater. Then begins, almost a third career, volunteering. He was administrative secretary of the College Foundation until 2010 and of the Alumni Association to this day. His vocation as a teacher and educator never abandoned him. He continued for many years, with students of the 1<sup>st</sup> secondary school, holding classes of discovery and learning of nature on Île aux Basques. He entrusted this training to a new team in 2014 after 43 years of dedication to initiate the youth to the wonder at all the beauty that nature offers us. He has authored two textbooks in botany and zoology.

Aline and Monique, and his brother Michel. His elementary, secondary and college studies were also conducted in this part of the city. Having a great scientific curiosity, he read and wrote a lot, especially on plants, animals and landscapes. He discovered the beauties of nature during his walks in the forest, his photography sessions and his fly-fishing parties.

Jean-Claude is a life member of the Robitaille Family Association and has been actively involved in the activities. Members have always appreciated his attachment to family values, his great knowledge and his *joie de vivre*.

In addition to his involvement at the College, M<sup>r</sup> Caron has actively participated in various scientific, environmental, cultural and social associations, including the Robitaille Family Association. Currently, he resides at CHSLD Saint-Dominique where he is the secretary of the users committee and even ... unofficial photographer.

According to Jean-Claude Caron's family tree, his mother was Régina Robitaille and his maternal grandfather, Michel Théodore Robitaille. Going up the ascent, he would be a descendant of Pierre Robitaille and Marie Maufay, one of the two founding couples of the Robitailles of America. Married to Fernande Simard, the couple has three children: Lucie, Robert and Benoit, but only one grandson.

Jean-Claude has lived all his life in different neighborhoods of the Upper Town of Québec City. He was raised there with his two sisters

Newly weds of 1951

## Robitaille Pedigree of Jean-Claude Caron

Father	Marriage	Mother
Pierre Robitaille (1652-1715)	1675-05-05 (Contrat Duquet)	Marie Maufay (1660-1730)
Romain Robitaille (1696-1749)	1723-10-10 (Notre-Dame-de-Foy, Sainte-Foy)	Marie-Françoise Lemarier (1691-1774)
Romain Robitaille (1724-1809)	1751-04-19 (N.-D.-de-l'Annonciation, L'Ancienne-Lorette)	Marie-Josette Drolet (1733-1801)

## A Robitaille discovered by Paul Robitaille, our representative in the United States

*By Jean Robitaille, Québec*

In the suburbs of Zanesfield, Ohio, a historic sign recalls the location of an old trading post held by Robert Robitaille around 1795. Where does Robert Robitaille come from? What has been his importance in American history? Did he leave an offspring?

Zanesfield, in Logan County, Ohio, was in Native American territory, in the middle of the Wyandot family of Hurons. Did Robert care for them? Could he have known both the Hurons of L'Ancienne-Lorette and the Hurons of Ohio?

Paul Robitaille, our representative in the United States, went back and searched this interesting question. After three years of research that took him from Wendake to Oklahoma, he wrote an important report that will captivate you.

We'll talk about it again in the next issue.

*Photo : Paul Robitaille*

## Picnic at Robitaille Park

*By René Robitaille, Saint-Lambert-de-Lauzon*

Robitaille Park is a beautiful place to remember the settlement of our ancestors in 1670. The descendants of Pierre and Marie Maufay lived until the end of the twentieth century on the ancestral land while the residential development put an end to its agricultural vocation. Fortunately, a park was created, and our Association proposed the name Robitaille, which was accepted by the municipal council of the time. Formerly owned by L'Ancienne-Lorette and then Sainte-Foy, it is now part of the great city of Québec.

In 1993, a monument was erected and a large group, including people from Europe, Manitoba and Abitibi, gathered for the inauguration. Fifteen years later some members decided to embellish the monument by surrounding it with hostas and daylilies, flowers whose foliage remains interesting for three seasons.

An annual picnic is organized to do the maintenance of this setting each spring.

Thanks to Yvan for ensuring the health of the flowers, the oak tree that was planted alongside the monument for the 400<sup>th</sup> anniversary of Québec City and all the other trees he has added and planted himself.

The picnic of June 22, 2018 included from left to right Julie, Marc, Diane, Donald, René, Micheline et Jacques.

*Photo: Micheline Dussault*

In 2003, a team of members undertook the beautifying of the monument.

*Photo: René Robitaille*

## Sophie Giguère Samson, a young woman with a promising future

Sophie was born in Cambridge, England on August 6, 1992. After a few years there, she followed her parents to Holland for 6 years, where she took the opportunity to learn Dutch. The family returned to Canada to settle in Ottawa, where she completed her elementary and secondary education. Her university studies, internships and work experiences, are summarized below in the CV she sent us.

During my undergraduate studies at York University:

- ▶ Bachelor of Business Administration from York University in Toronto (mostly in International Trade) (2009-2013)
- ▶ Accounting Internship at Public Works and Government Services Canada in Gatineau (2010)
- ▶ Internship in Public Affairs at the Consulate General of Canada in Ho Chi Minh City, Vietnam (2011)
- ▶ Semester abroad at Chulalongkorn University in Bangkok, Thailand (2012)

During law school at the University of Toronto:

- ▶ Diploma in Law (Juris Doctor) from the University of Toronto (2013-2016)
- ▶ Internship in an NGO in legal education in Laos (2014)
- ▶ Semester abroad at Central European University in Budapest, Hungary (2015)

Since the end of my studies:

- ▶ Articling student at the law firm Power Law in Ottawa and Vancouver in the field of human rights / education law / language rights (2015-2017)
- ▶ Legal consultant to the Office of the United Nations High Commissioner for Refugees (UNHCR) in Abidjan, Côte d'Ivoire in the field of refugee resettlement (2017)
- ▶ Admitted to the Ontario Bar in January 2018
- ▶ Currently residing in Toronto and working for the Ombudsman of Ontario (since January 2018)

In 2008, our Association took part in the celebration of the 400<sup>th</sup> anniversary of the foundation of Québec city. We planted an oak tree in the Robitaille park in honor of the descendants of Pierre Robitaille and Marie Maufay, who lived on the ancestral land for more than 300 years.

Barely 16 years old, in historical costume, Sophie (first row, far right) personified Marie Maufay, while Julien (back and centre) was Pierre Robitaille. They played these roles during many events: tree plantation, unveiling of an inscription on the Robitaille monument honoring the wives of our ancestors, a marriage ceremony at L'Ancienne-Lorette's church, and the recording of a TV capsule which was aired repeatedly during a week on Vox Channel.

## Claire Samson, a woman with a sparkling career

*Source: Abbott P. & Samson C., Natural Disasters*

Originally from Québec City, Claire Samson is a professional engineer with an undergraduate degree in engineering physics from Laval University, a M.Sc. in geological sciences from McGill and a Ph.D. in physics from the University of Toronto.

Claire has a wide range of experiences, both in industry and academia, in Canada, as well as in Europe. From 1991 to 1992, she was a research associate at Cambridge University in England, and from 1993 to 1999, she worked for the Shell Oil

group at three locations in the Netherlands, including the Shell International Research Laboratory. Upon relocating to Canada in 2000, she joined Neptec Design Group, an Ottawa high-tech company specializing in vision systems for space applications. In 2003, she was appointed Associate Professor in the Department of Earth Sciences at Carleton University, where she teaches a popular course on natural disasters, an introduction to the earth sciences for engineering students, and exploration geophysics.

Claire, on her first day of school, 5½ years old

Claire at the Toronto Marathon in October 2013

Claire has held a number of senior positions at the university, including Director of the Earth Sciences Department, Co-Director, Ottawa-Carleton Geoscience Centre and Associate Dean (Planning), Faculty of Graduate and Postdoctoral Affairs. She also has nearly ten years of professional experience in the industrial sector. Specializing in geophysics, she uses 3D laser imaging systems and unmanned aerial vehicles. In her research and field work, Claire prefers to tackle practical problems, ranging from pipeline corrosion to rock stability in underground mines, involving industrial partners. The Faculty of Science at Carleton University awarded her the Teaching Excellence Award in 2014. She also received the Mentorship Award for Graduate Students in 2012.

Claire with her husband and four children, in 2005

Since February 1, 2018, Claire Samson has been orienting her career with a new challenge in a different environment. She was named Dean of Research for a first three-year term at the École de technologie supérieure in Montréal. It is a university school that trains engineers and graduates oriented towards applied research.

Claire is married to Christian Giguère and the couple has four children, Sophie, Irène, Dominique and Liliane.

Claire is an enthusiastic world traveler. She has visited over 50 countries and speaks four languages, French, English, Spanish and Dutch.

The family of Pierre Robitaille, from father to son  
in the seigneurie of Gaudarville

*Lorraine Robitaille Samson*

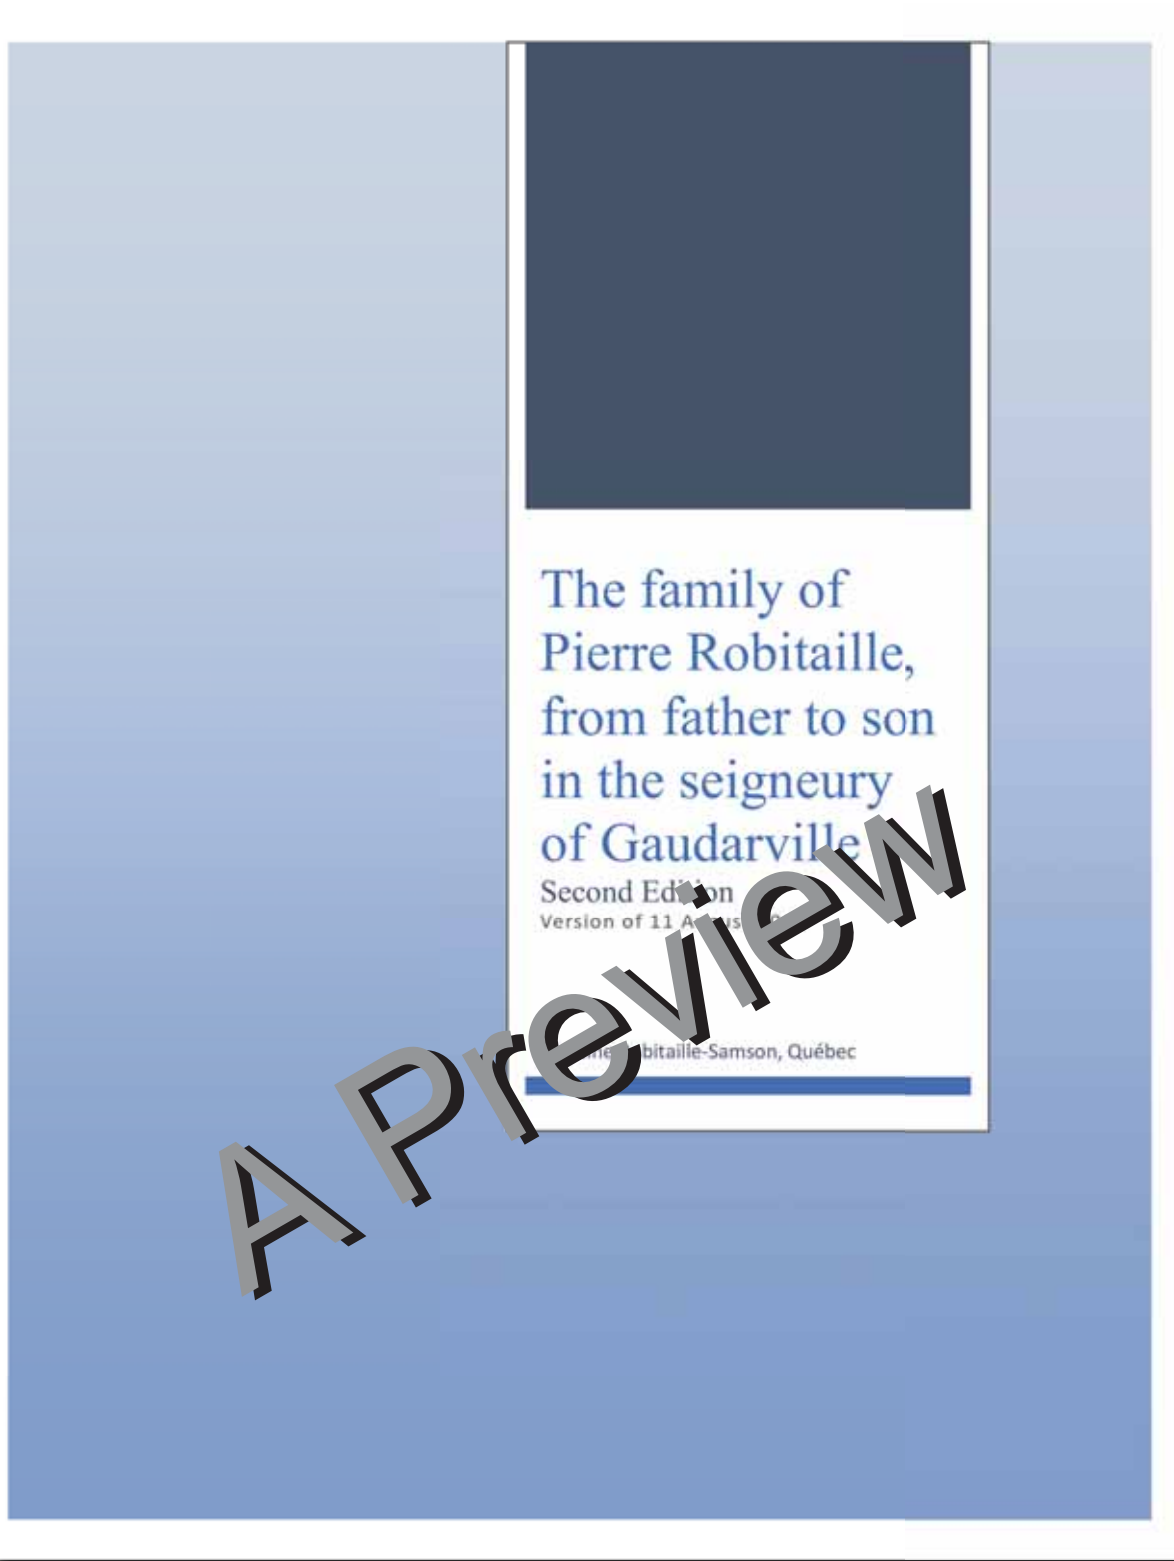

Figure 1- Ancestral France showing the location of Artois in the north of the country

The northern French region known today as Pas-de-Calais corresponds roughly to the territories of Artois, Picardy, and Flanders between the 13<sup>th</sup> and 17<sup>th</sup> centuries. It was in 1237 that King Saint Louis (Louis IX), who had inherited part of this region, entrusted it to his brother Robert, the latter taking the name of Robert I of Artois. Thereafter, the boundaries of the territories changed according to the will of the many different leaders who succeeded: of England, of Burgundy, of the Germanic Empire, of the Spaniards established in the Netherlands. It was only in 1639 that the French succeeded in regaining the stronghold of Hesdin from the Spaniards and, in fact, of Artois, which was confirmed

by the Treaty of the Pyrenees in 1659. It was during this troubled period that the French couple Jean Robitaille and Martine Cormont raised the four sons: Jean, Nicolas, Pierre and Philippe who emigrated to America. They were born between 1642 and 1662. It is the story of these four Robitaille pioneers that is recounted in this book.

## Foreword

This book tells the story of four brothers, sons of Jean Robitaille and Martine Cormont of France, Jean, Pierre, Nicolas, and Philippe, who came to settle in New France in the 17<sup>th</sup> Century. The first edition of the book, published in 1987, was intended for my family. In response to numerous requests, this new edition review and update, with the collaboration of René, Jean, Florent, and Henriette, will be available progressively to the interested population on the website of the Robitaille family Association Inc.: [www.robitaille.org](http://www.robitaille.org)

Figure 2- The author Lorraine Robitaille

The preamble deals with the history of the family living in the Pas-de-Calais region in the north of France. Chapter 1 presents the history of the first generation of Robitailles in North America, that is to say, of the four brothers, two of whom have offspring who are alive today. Subsequent chapters, however, relate to my family and who are descendants of Pierre. He had many offspring; however, the other family branches are not included in this book.

Spelling variants are to be noted in the names of the wives of the three brothers who got married. To simplify reading and understanding, the names have been standardized based on those used in the contracts that were notarized and on contemporary usage. Thus, the names used are the following; those in parentheses can be found in various documents:

- For Jean's wife, Marguerite **Buletez** (Bulté, Bultey, Burté, Bully)
- For Peter's wife, Marie **Maufay**, (Maufait, Mauffet, Moffet)
- For Philippe's wife, Madeleine **Warren**, (Hourarine, Grizel, Otis).

The name Robitaille<sup>1</sup> may derive from the first name Robert which in turn has produced several derivatives: Robin, Roby, Robineau. And "taille" means a hamlet or an ancient fief which was called La Taille: "a cut of wood." We might imagine that one of our ancestors, whose name was Robert, lived in a place called "La Taille". On the other hand, "la taille" was the name of a tax that was levied in France until 1789. "La taille" also referred to the work done by tailors who worked with leather or stones. Perhaps one of our ancestors was a tax collector, a leather worker, or a stone mason who built cathedrals. Today, there are Robitailles in the north of France, Robitaillies in southern France, and Robitaglies in Florence, Italy. Are we descendants of Italians or has our name undergone changes over the years? Other research conducted since 1950 has contributed to our knowledge of the origin of the name.

<sup>1</sup> Albert Douzt, *Dictionnaire étymologique des noms de famille et prénoms de France*, Larousse, Paris 1951

The etymology of the surname, Robitaille, in Europe includes several variants of the name. Compilations in France have shown that there are six branches of related families (Robitaille, Robitaillé, Robitaillie, Robitaillié, Robitail, and L'Hôpital) as well as several branches now non-existent or consisting of fewer than 50 people<sup>2</sup>.

Several other hypotheses have been put forward concerning the origin of the name: Italian<sup>3</sup>, Artesian (i.e. from Artois), Basque, and Breton<sup>4</sup>, and even Viking<sup>5</sup>. In America<sup>6</sup>, especially in the United States, in addition to the name Robitaille, we encounter Rabbitoy, Roberts, and several others of lesser importance, because of how difficult it is to pronounce the word "Robitaille" in English.

<sup>2</sup> *The Robitailleries*, number 73, pp. 9 — 13.

<sup>3</sup> *The Robitailleries*, number 74, pp. 5 — 7.

<sup>4</sup> *The Robitailleries*, number 75, pp. 5 — 10.

## Maisonneuve MP

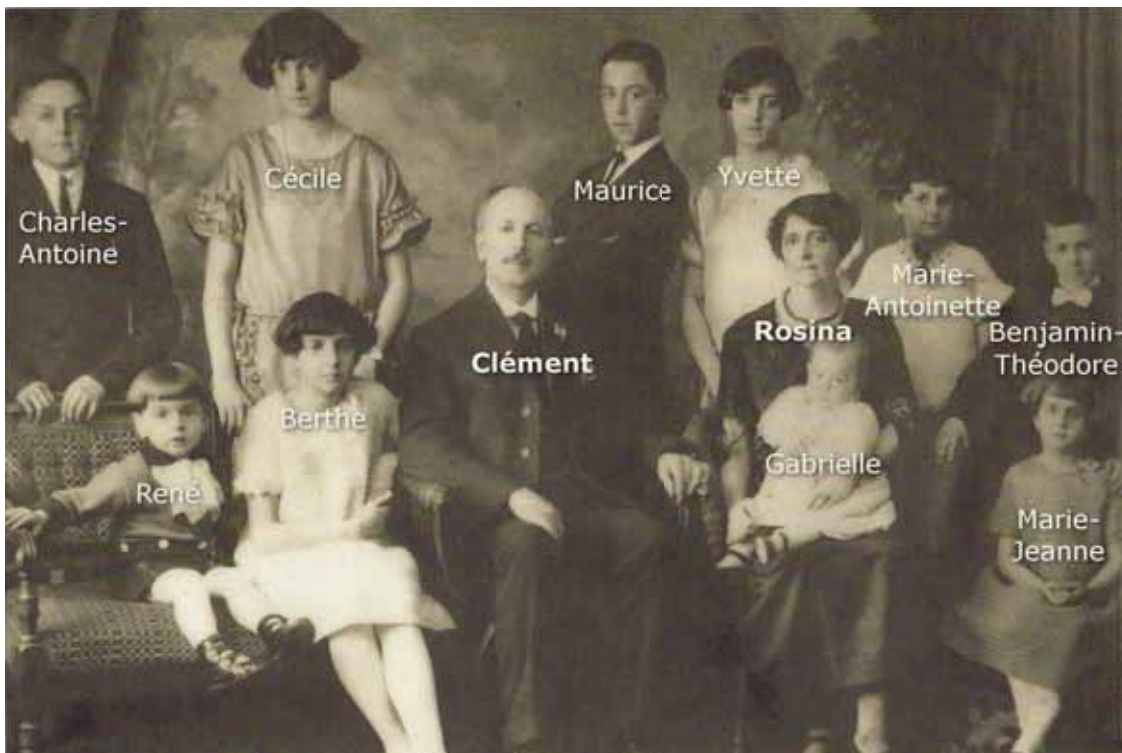

Meet Clément Robitaille circa 1924 with his wife Rosina Giard and what looks like their ten living children at that time. When this picture was taken, two of their children were already deceased: Théodore and Annette.

Little Gabrielle, sitting on her mother's lap would also pass away in 1928.

Clément (1873-1932) is the son of Charles-An-

toine Robitaille (1840-1904) and Mathilde Morin (1885-1920). Clément married Rosina Giard on May 1<sup>st</sup> 1906 in Saint-Sulpice, Québec.

Lawyer graduated from Laval University, in Québec City, Clément was elected MP for Maisonneuve riding at the federal level in 1921 and sat continuously as a Liberal MP until his death on January 16, 1932. (Source Wikipédia)

### Children of Clément Robitaille and Rosina Giard

- ▶ Théodore, 1907-02-24 / died 1907-08-16
- ▶ Cécile, 1908-08-03
- ▶ Yvette, 1909-07-02
- ▶ Maurice, 1911-02-09
- ▶ Charles-Antoine, 1912-07-14
- ▶ Berthe, 1913-07-25
