

# Supplement to the Examiner

SHERBROOKE, QUE., FRIDAY, APRIL 16th, 1897.

## Base-Ball Meeting.

The meeting for completing arrangements of the St. Francis District League was held at the Albion Hotel last Friday at 8 o'clock.

The important business was receiving the league deposit and electing to the office made vacant by the unfortunate death of E. A. Parsons. The president, Mr. Ibbotson, referred to the untimely demise of their respected friend who had so long encouraged and was responsible to a great extent for the prosperous condition of the East Sherbrooke club at this season.

Mr. Moore, of Magog, was elected to the office of vice president by a unanimous vote of the club.

F. E. Ibbotson and W. J. Woolsey were appointed committee to arrange programme of play for the season. It was decided by vote to have two games played May 24th, National vs. Magog at Magog, East Sherbrooke vs. Waterville at Waterville.

Secretary was requested to write to Angus, Beebe Plain, Coaticook, Danville, Sawyerville and North Hatley, asking their intention for the season's work, and in order to be able to work in their interest.

Moved by Mr. Pierce, seconded by Mr. Hawley, that the four teams represented in the league be Magog, East Sherbrooke, Nationals and Waterville.

The president called attention to the satisfactory progress that has been made by the several clubs, and considering the season it augured well for a successful year's work.

A meeting was called for the 23rd inst, at the same hour and place, for receiving reports for the date committee, other clubs and new business pertaining to the season's work.

"Does Modern College Education Educate in the Broadest and Most Liberal Sense of the Term?" is one of the most important inquiries that could be set on foot. This discussion, which is to be taken part in by President Gilman of the Johns Hopkins, President Dwight of Yale, President Schurman of Cornell, President Morton of the Stevens Institute, Henry Thurston Peck of Columbia, Bishop Potter and others of the most distinguished men of both the United States and Europe, is begun in the April *Cosmopolitan* by a radical inquiry into the educational problem along the lines of Herbert Spencer. President Gilman will follow in a direction almost equally searching. Altogether there is promised the frankest possible expression of opinion, and it seems probable that it will be the most thorough comparison ever made of educational methods with the needs of every-day life at the close of the nineteenth century.

## A Tuftsman's Trip.

During the last two weeks, the writer, Mr. Editor, paid a flying visit to Worcester, Gardner, Greenfield, Springfield, Pittsfield and North Adams. Worcester is the second city in the State, Boston of course being first. It is growing too. Its manufactures are something to be proud of. Its first settlement was in 1673, was named and resettled in 1684 and permanently settled in 1713, incorporated as a town in 1722 and as a city in 1848. It is thus a new city, but has seen wonderful growth, and now the population is nearly a hundred thousand. The valuation is about \$86,397,576.50 and area 36 square miles. The elevation of the city hall above tide water is 481 feet. The paved brick and concrete sidewalks both private and public are well kept. It is probably not as well laid out as some cities, but the streets are wide generally and handsomely kept. The public buildings, new city hall, libraries, public and private, jails, city hospital, armory, court houses, State Mutual building, lunatic or insane asylums, Y. M. C. A. and Y. W. C. A. buildings, Orad Castle, etc., etc., are all handsome edifices. The public grounds and parks are elegant. On Newton Hills one gets a good view of the city. The educational institutions of the city, too, are good. These are, the Clark University, the Worcester Polytechnic Institute College of the Holy Cross and Heath Schools. The churches, Church of Unity, All Saints, First Universalist, Plymouth, Trinity, new "old South," Piedmont, St. Paul's, First Unitarian, St. Peter's are all magnificent structures. Also are there Swedish Churches. There are many Canadian people resident in Worcester, among them Messrs. Blount and Gillson and families, Waterville people.

From Worcester to Gardner. Gardner is a small town of little importance comparatively. From Gardner to Greenfield via Fitchburg as before. Greenfield of little importance also, compared with rest. From Greenfield to Springfield, via B. & M. On entering this the "City of Homes" one is struck with its beauty. Its population is, I believe is in the neighborhood of 60,000. The public buildings in Springfield, city library, art museum, armory, post office, etc., are large and handsome. The manufactures of the city are not to be slighted either and the educational institutions are in marked prominence. The churches, Olivet, State street, Baptist, State street Methodist-Episc., church of Unity, etc., are fine structures. Springfield, will, in way of well kept streets and front yards and modern institutions, compare well with any city of its size on the continent probably. The parks, streets, educational institutions, fire and police departments of both Worcester and Springfield, are up to date.

The cemeteries too, present a very fine appearance. What would strike most anyone on entering such a city and look at a register or other descriptive book, would be, I think, the number of Societies, brotherhoods or fraternities, as Masons, Oddfellows, Redmen, Knights of Pythias, Knights of Malta, Ancient Order of Foresters, Hibernians, Sons of St. George, Order of Alfredians, Patriotic Orders of Daughters of Revolution, Sons of Revolution, Daughters of Liberty, etc., Knights of Columbus, Royal Arcanum, Knights of Honor, Travellers, Firemen, Workmen, Engineers, and so on endlessly. From Springfield to Pittsfield, via Boston and Albany is a fine ride of about two hours duration. Pittsfield is the centre of a farming district, which is perhaps 75 miles in circuit. Its population at present is between twenty and twenty-five thousand. It is a very young city,—date of birth being Jan. 1 1891 and by the way this is a city, where evidently the temperance have failed to be successful in their attempts to put a stop to the rum traffic—and have only themselves to blame. This city too has prominent buildings and edifices. Its public grounds are fine, and its walks and drives are picturesque, while the scenery everywhere is elegant. There are Canadians in both Springfield and Pittsfield. In the former city for instance, there are Mr. Chas. Maryson and family and Mrs. Alonzo Hovey and Miss Ida Hovey as well as Mr. Wingham and family and Mrs. Horace LeBaron. In Pittsfield Mr. Henry Hovey and family were Canadians. The social clubs, military bands, grand Army of Republic regular army and navy union of U. S. and similar institutions are also prominent in these cities. From Pittsfield to North Adams via the Boston and Albany (along most western part of State of Massachusetts.) North Adams has a population of

about 20,000. It is a new city, with prominent buildings, public and private, but badly laid out. From North Adams to Greenfield via Fitchburg. On this way we pass through the Hoosac Tunnel, four miles and seven-eighths, (save two hundred feet,) one of the greatest of the kind in the world. Then on to Boston via Fitchburg. Thus ended one of our most beautiful trips. C. T. Tufts College, Mass.

## Newfoundland Bait Act.

### WAR VESSELS SUMMONED.

Halifax, N. S., April 14.—H.M.S. Pelican, Buzzard and Cordelia have been ordered to leave Bermuda at the end of this week for Newfoundland via Halifax, to aid in the enforcement of the new Newfoundland Bait Act. The Newfoundland press, in general, adopts an exultant tone over the injury the operation of the act is calculated to inflict upon the competition of bounty fed French fishing, with the Newfoundland fishermen. In the past, the papers state, Newfoundland fishermen have been unable to compete against French fish, and they have been steadily driven out of the European and West India markets by low prices. Several communications have passed on the subject during the present month between the Imperial Government and the Colonial Legislature.

Mr. Chamberlain, Colonial Secretary, has expressed a fear that the enforcement of the bait act, by which the French are refused herring, would lead to trouble, but he further intimated that if the colonial authorities insisted upon the act becoming law, the Home Government would hesitate to exercise the power of disallowance.

In accordance with these views, it is learned that instructions were cabled the warships at Bermuda, to hurry their departure for Newfoundland, to assist the local revenue cutters in enforcing the new act.

A prominent member of the Newfoundland Legislature, who was in Halifax yesterday, en route for St. John's, Newfoundland, said the enforcement of bait act would be the best thing for Newfoundland that had been accomplished for some years. He explained that it would cause an immense damage to the French interests.

The French fleet require to have their herring bait by the first of May at the latest, but by the operation of the bait act it was forbidden to put a seine in the water before the middle of May.

A protest had been sent to the Imperial Government by the French Consul, and it is understood the St. Pierre authorities have asked the Home Government to send warships from France to protect their interests. The St. John's man said the St. Pierre fishery was a nursery for seamen for the French navy, and that the British Government would be glad of a justifiable pretext to hamper the business.

The *Argus*, of Cape Town, Africa, announced a few days ago that it had received trustworthy information from the capital of the Transvaal that the British have secured Inyack Island, at the entrance of Delagoa Bay, and that a squadron of warships from that port will proceed there to take possession of the island and proclaim it British territory.

The Kingsville Woolen Mills at Windsor, Ont., which recently suspended operations, is reported to have been purchased by a strong company who will start it up again at once.

## Greek Irregulars Invade Turkish Territory.

Athens, April 12.—Accounts are very conflicting as to what really happened last Friday, April 9th, when the frontier was crossed by the insurgents, whose carefully planned invasion is accepted by the Athenians as inaugurating war. The Turks evidently share the views entertained at Athens that the movement was one of great importance. Advices from Ellassona indicate a universal belief there that the invasion was simply a precursor to action by the Greek army. A special correspondent of the Associated Press went to Larissa on Saturday evening and ascertains that the invaders numbered upward of 3,000. Among them were Signor Ciprani and his Italian Volunteers. The entire force was under the command of three ex-officers of the Greek army and four Macedonian chiefs. The rendezvous was at Koniskos, a village near Kalam-baka. The men were all fully armed and wore the national costume, their black fur caps bearing the badge and initials of Echnike Hetairia embroidered in blue and white, with the words "En touto Nika," crossing the initials in black. On Friday a monk from Mount Athos assisted his abbot and two deacons at a religious service at Koniskos, at which all members of the invading body partook of the sacrament and registered the oath of the order "Liberty or death." In addition to large quantities of ammunition and provisions the force had £3,000 in gold. During Friday night following the service the frontier was crossed, the force moving in the direction of Schuik. While the movement was in progress a second band, the number of whom is as yet unknown, had a rendezvous at Nezerous, on the frontier, about 35 kilometres north of Larissa and near the coast. This band was similarly equipped, had a similarly mission and took the same oath. It was commanded by the Macedonian chief, Sinsinikos. It crossed the frontier on Thursday night, marching on Korva.

When the attack began strict orders were sent out to all the Greek outposts on the frontier to preserve neutrality and not to open fire till actually attacked by the Turks.

Although the Turkish army has not yet assumed the offensive, orders to that effect from the Sultan are expected at any moment. All classes of the troops are full of war enthusiasm.

The Sultan's chief chemist, Boniatowski Pasha, has arrived at Ellassona to inspect the ambulances. He brought a number of presents from the Sultan to Edhem Pasha, the Turkish Commander-in-chief.

General Makria of the Greek army and his staff, with some knowledge of the movement afoot which they were unwilling to impart, left Saturday for Tyrnavos the most important Greek position near Fllassona. Four batteries of reinforcements followed for the same point. At headquarters the Greeks declare that nothing is known as to the raid and as to the probable character of the raiders.

The Turkish government informed the representatives of the foreign embassies, on Saturday last, that, in consequence of the Greek invasion of Macedonia, Edhem Pasha, the Turkish Commander-in-Chief was marching on the Greek headquarters at Larissa. But according to authentic information obtained to-day, the Turkish army has not yet started. Therefore, it is supposed that at the last moment Edhem Pasha's orders to advance into Greece were countermanded.

Nevertheless the Turkish Government still seems to have the intention of attempting to seize and hold Larissa until the Greeks have evacuated the Island of Crete.

It is pointed out that Franai the town in Macedonia, which is believed to be in the hands of the Greek insurgents and the scene of the present invasion, is an important strategic position threatening Edhem Pasha's communication with Janina, the Turkish headquarters in Albania.

The plan of the insurgents was to occupy Baltino, on the frontier of Macedonia in order to prevent the Turks from taking up a more advanced position. Directly the Greeks crossed the frontier their leaders issued a proclamation calling upon the Macedonians and Epirotes to rise for freedom.

There is an unconfirmed rumor from Trikhala that the insurgents are continuing their advance unchecked by the Turks.

London, April 12.—A despatch to the evening News from Larissa says the fighting at Baltino lasted throughout Saturday and late that afternoon, the Turks were reported to have capitulated. The total loss on both sides were under 100. There is no news regarding the Turkish prisoners.

The idea of the insurgents, it appears, is to cut the Turkish communications be-

tween Macedonia and Epirus. If it is true that the insurgents have pursued the Turks to within a short distance of Grebina, they are in a fair way to accomplish this object.

The Arta correspondent of the Evening News telegraphs that the war preparations of the Greeks there are being finally perfected.

Troops have been advanced to the frontier and the military depots have been moved back to positions of safety in the rear. Thirty English volunteers have arrived at Arta. They include among their number young Harris, the son of the British Admiral in Cretan waters.

Official feeling in St. Petersburg is strongly against Greece. A despatch from that city to-day says that Turkey's attitude is regarded there as correct and irreproachable, while on the other hand, the Greek raid is condemned by the Russians as being a fresh violation of international law, as completely alienating European sympathy and as exposing Greece to the dangerous consequences of disregarding the warning note of the Powers. This note is still unanswered.

### A FORMAL PROTEST.

London, April 14.—The Evening News this afternoon publishes a despatch from its special correspondent at Athens saying that the Turkish Government has formally informed the Greek Government that any further raid of irregulars into Turkish territory will be regarded by Turkey as a declaration of war upon the part of Greece.

Trustworthy reports received at Larissa, Greece, confirm the statements that the Greek irregulars have captured Baltino in Macedonia. The Turks lost forty men killed.

The insurgent chief Davelis occupied a strong position in the mountains near Drania. His force later was attacked by a Turkish battalion from Valmisti but the Turks were repulsed with severe loss. The Greeks then assumed the offensive, cut up the Turkish detachment, captured eighteen mules, a convoy of provisions and a large quantity of ammunition and made prisoners of fifteen Turks.

After this success the Greeks advanced to Kipuri on the road to Grevena, threatening the communications of the Turkish central force at Ellassona with Janina the Turkish headquarters in Albania.

In all the skirmishes and fighting since crossing the frontier, the Greeks only lost five men and had fifteen men wounded.

Despatches received here to-day from the Greek expeditionary forces say that the irregulars have passed Kirpuri driving the Turks before them and are pushing on for Grevena, where a strong Turkish force, some say an army corps is stationed.

### TURKS ON RAMPAGE.

The Athens correspondent of the *Daily Chronicle* says that advices from Epiurus represent the situation there as a reign of terror. The Turks are laying the country waste with fire and sword. The Vali of Janina has ordered every Christian to give the Turkish army ten sheep and a bullock.

An Athens despatch to the *Times* says: "Authentic news has been received of an encounter at Quisnie, on the frontier of Montenegro, between the Montenegrins and the Albanians and intense excitement is said to prevail at Uskub."

### Kruger Circumvented.

London, April 3rd.—The *Daily Mail* prints a despatch from Cape Town, saying it is reported there that Delagoa Bay, controlled by Portugal, has been leased to Great Britain for thirty years at an annual rental of half a million sterling, and that the Transvaal Government was not aware of the arrangement until completed. The Transvaal sought German control for this port.

### The Transvaal.

The preparations against eventualities in the Transvaal are being steadily pushed forward. A press representative has learned from the War Office sources that a General to command the British forces has been selected and has been asked to prepare a plan for the campaign against the Boers, including the number and description of the troops of different branches of the service, etc., which he judges will be necessary to being the military operations to a successful conclusion.

This General, who is familiar with African fighting, has replied 1000 British regulars will be sufficient, as he counts on the 40,000 troops, white and black, which are already there, while he does not consider the Boers, even if able to do so, will put 40,000 armed men in the field, and one half of these, he believes, will be required to guard the towns, forts, etc.

### The War on Women.

New York, April 14th—Specials from Havana say that sixteen Cuban women from the town of San Francisco de Paul, in Havana province, have been thrust into the house of detention for disreputable women in Havana. They all belong to families of the highest respectability. On their way to the prison they were insulted by the soldiers, and one of them, Aurora Veloz, who attempted to protest, was knocked down with a knife. In Guanabacoa, women of prominent Cuban families have also been arrested on the charge of being abettors of the insurgents. The police enter houses after midnight and arrest the women without giving them time even to dress. The town is terrorized again as in the days when Colonel Fondeviela was its mayor.

The April number of the *Canadian Home Journal*, (Toronto), reminds us that Easter is near at hand. Some interesting chapters are devoted to the latest styles in Easter bonnets and gowns, all profusely illustrated; a pretty page of Easter poetry and another of suggestions for Easter gifts; Mrs. Sheard contributes a bright story entitled "Dorothea" a descriptive article by Mina S. Fraser, on the Bavarian Cold Water Cure; Faith Fenton chats about the theosophist, Countess Wachmeister; notes on books and Music, Needle work and the Household; doings of Canadian women, and reports of the National Council, by the Countess of Aberdeen, are among the contents.
