

SUBSCRIPTION RATES.

Table with subscription rates for Daily Witness, Weekly Witness, and Northern Messenger, including advance and arrears rates.

TERMS TO MINISTERS AND TEACHERS.

DAILY, \$2; WEEKLY, 75c; LAUREOR, 75c. These rates include postage to any part of the Dominion, United States and Great Britain.

ADVERTISING RATES.

WEEKLY.—20c per line first insertion, and 15c per line each after insertion for large type or cuts. When set in small type, 10c per line each insertion.

NOTICE TO SUBSCRIBERS.

When remitting be particular to give the correct Post-Office address with the Province or State. In forwarding remittances register the letter, or procure a Post-Office order.

ISSUED LAST WEEK.

Table showing circulation statistics for the previous week, including copies of Weekly Witness, Northern Messenger, and Arrears.

The Witness.

WEDNESDAY, APRIL 18, 1888.

VOTING IN PARLIAMENT.

We published some time since a letter from Mr. Brown, of Windsor, proposing that a member of Parliament should cast votes on both sides according to the strength of the two parties in his county as shown by the election.

TICKER GAMBLING DECLARED ILLEGAL.

Some time ago the Chicago Board of Trade resolved that they would in future refuse to furnish the bucket shops with the quotations of grain prices, without which it would be impossible for these gentlemen to carry on their present business.

BULKHEADS.

In a paper on bulkheads, lately read before the Institute of Naval Architecture, by Mr. John Dunn, the admiral officer who acts as inspector of all merchant vessels offered to the Admiralty as cruisers or transports in time of war, facts and figures are given, which, if correct, and there is no reason to doubt that they are, show clearly that the safety supposed to be secured by bulkheads is, with regard to the majority of vessels, purely theoretic.

FIJI LAND.

In a paper upon the present condition of Britain's youngest colony, Fiji, a rather curious light is thrown upon the land question. When the islands were first visited by white men tribal laws were in full force, and everything was held in common.

A DISSATISFIED DEPARTMENT.

The Geological Survey is attracting more attention than usual just now from the discussion of the question why it is that there is so great a spirit of discontent amongst a majority of the staff, and why, also, there are so many resignations amongst the competent men, which are stated to have been at the rate of one per year for seven years back.

ELECTRIC LIGHT AND INSURANCE.

The vexed question of what is to be done with the electric light wires no longer remains an indifferent one to the people of Montreal. The action of the Board of Underwriters in petitioning the City Council to adopt some measures in order to regulate the matter shows that it is too serious a one to be evaded.

THE MONTREAL WEEKLY WITNESS.

follow. Let the City Council of Montreal prove, now that they have the opportunity, that they are worthy to control the destinies of the commercial capital of Canada, and that they have the future welfare of the city at heart, by taking the bull by the horns while he is yet young and comparatively manageable.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. evidence of the two informers agreed as to all material points. The evidence against Brady and some of the other men charged with the murder was so convincing that no doubt has been entertained, from the time that it was made public by the preliminary investigation before the magistrate, of his and their conviction.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. LIKE THE ANCIENT PROPHET of the storm, Dr. Wiggins swooped down upon the world's stage a comet of the first magnitude. Elijah promised drought for his first announcement, but Wiggins a whirlwind. Elijah thought of a country, Wiggins embraced the whole world. This much may be said for the Wiggins storm. It came off in some fashion, there was a blow at or near the predicted date, and herein it differed from the Wiggins lecture, which did not come off at all.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE MANNER in which Mr. Blake's motion, asking that all papers relating to changes of the tariff be laid on the table, was voted down on a strict party division, shows clearly that the Government has not the slightest intention of informing the common herd as to the process by which this wonderful production of genius is elaborated.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. BRADY has been found guilty by a jury of the murder of Lord Frederick Cavendish and Mr. Burke, and has been sentenced to be hanged on the 14th of May. The only direct evidence against him is that of his associates in the murder, Carey and Kavanaugh, the first of whom is undoubtedly by his own evidence the worst member of the whole conspiracy.

THE MONTREAL WEEKLY WITNESS.

The Government fear the result of stopping the work, as the laborers would, if thrown out of employment, be quickly converted from Republicans to revolutionaries.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THERE SEEMS to be a possibility that the American Government might come to see its responsibility for the loss of property by dynamite London. There are certainly very wide distinctions between this matter and the "Alabama" case, but there is a common principle at the bottom. The "Alabama" was built in England openly for belligerent rebels, and while the Government was lengthily discussing the question whether any English law was or was likely to be broken, the vessel put to sea on her two years' cruise of destruction and her path was marked by confagurations of unarmed vessels treacherously attacked under the British flag on the lone sea, while every exploit was cheered in the English clubs and even in Parliament.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. IF IT BE TRUE that the colony of Queensland has decided to take possession of the Island of Papua or New Guinea the undertaking thus entered into is by no means a small one. The Island of New Guinea is one of which but little is known, and that little is by no means satisfactory. The climate is moist and unhealthy, the natives utter savages, and as far as can be learned its most valuable natural product is the Bird of Paradise. It, however, possesses the charm of comprising three hundred thousand square miles, equal to all the Eastern States put together, of rich soil upon which all the products of the tropics may be grown.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. AN ATTEMPT is being made to get up a dynamite scare at Ottawa. There can be no doubt that it has succeeded to some extent, principally, we think, owing to the bill against conspiracies introduced into the House by a member of the Government. Since then stories of packages of dynamite having been found near or in Rideau Hall and of conspiracies of various kinds have been going the rounds of the American papers greatly to the delight and profit probably of Jeremiah O'Donovan and his clique. It is not reported that a scare was got up by the explosion of a small bomb while the Governor-General was in Boston. Another report from Ottawa states that extraordinary precautions are being taken to guard the departmental buildings.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE APACHE WAR, now going on, appears to be nothing more than one of the chronic raids of the red freebooters of the border, the reservation Indians having so far kept inside their reservations. Nearly every spring a new band of Apache robbers gathers, for the purpose of slaughtering settlers, burning houses, stealing cattle and playing hide and seek with the American troops. With a force of settlers, troops and friendly Indians, strong enough to form a cordon around the marauders is got together, the Apache band is driven into Mexico where they have either to lay down their weapons and take refuge in the hills, or be exterminated. The success the Mexicans have had in the past in dealing with these savages is very remarkable. After outfitting large bodies of American troops, whose trade is Indian fighting, they will be completely outwitted, and as a consequence ruthlessly massacred by a band of Mexican ranchers. In the future the Americans will be able to take advantage of this feudish skill, a treaty having been made between the two countries permitting the troops to pass the border in pursuit of hostiles.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE CITY OF BERLIN has long been looked upon as the one city whose system of disposing of sewage was above reproach. Instead of turning the mouth of the sewers into a river and poisoning the waters for leagues, a system of irrigating canals was built and the waste of the city was spread over the land in the neighborhood. The apparatus necessary was very costly, but owing to the fact that it was almost impossible to find a river big enough to carry off the sewage it was rendered necessary. The result was declared at the time to be more satisfactory than any other system, which is not, after all, saying

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. much for it, for at present all are bad enough. It appears, however, that this famous Berlin system is by no means a complete success. The exhalations from the land under treatment are extremely unhealthy, and the works are conducted at a loss so that the Berlin experiment has not done away altogether with the trouble.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE GRAND TRUNK RAILWAY seemed to be still able to make an effective impression on Parliament when it tested its strength against Mr. Dalton McGarthy's bill for the appointment of a Government railway commission. The read was free to all delegations going to Ottawa to worry members into opposing this bill, and the effect was the defeat of the bill. Canada may think itself a self-governing country, but if the Canadian Pacific and the Grand Trunk Railways unite their strength, the combination will either own the country, as indeed, one of the companies does largely now, or the country will have practically to own the railways. No action more mischievous to the country could be taken, and yet, if the matter comes before Parliament, we may almost count upon it as a foregone conclusion that even good men will get their minds so arranged as to be able to see nothing wrong in it. Canada will be like what New Jersey once notoriously was, a railway-governed country.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE BOARD OF TRADE has put on record its opposition to an honest effort to put an end to the unjust and impolitic discriminating rates charged upon freight by railway companies. The legislation in itself may not have been wise, but the object sought was a good one and one which Montreal has a great interest in securing. Every winter, just as surely as navigation closes, Montreal produce merchants have complained of the rates which discriminate against them, by making it cheaper to ship through from Toronto and points west of that to Nova Scotia or New Brunswick or to Portland than to ship first to Montreal and then to points east. The rates on grain from Chicago to the seaboard are lower than those from Stratford to the seaboard, which is in effect offering a premium to Canadian farmers to go to the United States. The Board of Trade should have at least showed its sympathy for the object of the bill while opposing the method by which it was sought to obtain it.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. ITALY has allied herself with Germany and Austria. This, we suppose, in the interests of the peace of Europe. It is therefore on the principle that if you would have peace you must prepare for war that Italy has at once ordered the construction of an immense transport ship and the increase of her army by several corps. Italy is ambitious, and her ambition has been wonderfully gratified. But she should take care of that vaulting ambition which overleaps itself. The Italians are already the most overtaxed people in Europe. The taxes amount to from one-third to one-half the whole rental of the land used for agricultural purposes. Surely a nation whose people are already so heavily burdened with taxation is doing unwisely in increasing its expenditure so largely. A whistle even as desirable as that of alliance with the dominant powers of Europe may cost too much.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE WARNINGS that are being dealt out with such a liberal hand to the various cities of this continent should not pass unregarded. A short time ago the burning of a large block of flats in New York should have taught the people of that city and of all other cities that at present the laws regarding such buildings, and in fact all high buildings, are woefully inadequate. Now a new building has tumbled down in the city of Rochester from its own inherent weakness and some fourteen men are either killed or wounded. This is an extreme case, no doubt, but none the less does it teach a lesson; if a building can be put up not strong enough to bear the weight of its own internal finishing, what frightfully dangerous abortions, just strong enough to stand upright, must be built.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. ONE CAN HARDLY imagine the persistency of wrong-headedness, and we presume, sometimes of wrong-heartedness, with which the result of prohibition in Maine is misrepresented by a press which does not wish to see or remember the truth. One would have thought that the Toronto Globe, by its commission to Maine, had forever set at rest the absurd statement that prohibition does not prohibit; but here we have it repeated again, as fresh and green as ever, in a paragraph which Mr. Casey has cut from the British Whig, of Kingston, and forwarded to the Hon. Neal Dow for reply. The Whig asks what has the Witness to say to its assertions. In answer, the Witness will surely be pardoned for saying they are a piece of very senseless effrontery. The paragraph appears with Mr. Dow's reply in another column.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE TONE of the American press with regard to the duty of the United States in putting an end to the dynamite war which is being carried on by her citizens against Great Britain is unsatisfactory. They appear to consider that so long as political grievances exist in any country the Americans are justified in assassinating the authorities of that country or blowing up her public, or private buildings either for that matter, until that country is willing to establish a system of government in consonance with the views of Americans. The New York World, in putting forward such views, represents the views of itself, O'Donovan Rossa, Patrick Crowe and a number of voters to whom the Democratic party have todied time and again and gained nothing but disgrace thereby.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. OF ALL KINDS OF LABORERS none show such a strong disposition to strike and become united as the dock laborer, and this applies to this class all over the world, from the sturdy, yellow-headed giant who with steam winch and electric light to assist him unloads the steamers at our own dock to the dark slim coolie who by weight of numbers unloads the multitude of strange craft that throng the harbors of the East. The dock laborers of Marseilles have

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. neither in the past nor present forgotten the traditions of their class, and they are now on strike with an energy that if applied to their work would do much to do away with all cause to strike.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE UNITED STATES WHISKEY MEN found it more difficult than they imagined to induce the Canadian Government to help them out of their difficulties, and were bitterly disappointed at the refusal of the Government to connive at their cheating the United States laws even with the consent of the United States Government. Whiskey-men are not as powerful as was generally supposed in Canada, and their influence at Ottawa is accordingly somewhat weak at present. It is now proposed to send the surplus whiskey to Bermuda on a sea voyage.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. HEAR MOST says that the United States is not a nation but a vast caravansary under whose roof gather people of all nationalities, and, this being the case, it is his duty to unite them into societies for the purpose of redressing the wrongs social, moral and physical of the world. It never occurs to strike Hear Most that the people of the United States if they have not already become a nation, have before them a work quite large enough to tax their energies for a long time to come in that matter alone, not to speak of the manifold wrongs of their own they have to redress.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE NEW GOVERNMENT of New Brunswick presents a good programme to the Legislature including measures for the following objects: to vest legislation in one house, the conservation of forests, the protection of inland fisheries, the promotion of immigration, the collection of information regarding the natural resources of the Province, and so on. If the Government leads the Legislature to do justice to all these matters, it will make a creditable record. A maximum of talk with a minimum of work seems to be the standard of most of our local Legislatures.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. ONE CIRCUMSTANCE noted in the accounts of President Arthur's trip is that, as the party penetrated Florida, the style of the architecture decidedly changed, the log cabin of the Georgian giving place to the neat weather-faced green-shuttered dwelling of the New Englander, with the addition, however, of generous verandahs. This curious fact proves that the northern emigration that has taken place to the south has not been uniformly scattered throughout the land, but has been mainly confined to the extreme south.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE AMERICAN POST-OFFICE system has been immensely improved within ten years, but it still stems from Dr. Leffingwell's account of it, copied on another page, to be one of the least progressive in Christendom. Many of the points he speaks of as lacking in his own country are not lacking here, but we still lack postal telegraphy. We hope this lack will be soon remedied.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. NOTES FROM OTTAWA. (Special to the Witness.) OTTAWA, April 10. The warrant for the extradition of Phelps was signed yesterday.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. Mr. T. P. French, Post Office Inspector, has just returned from an inspection and re-arrangement of Post Offices in the Districts of Nipissing and Algoma. He has established new post offices at Veveo River and Sandbury (under the name of Sandbury), and has also the Canadian Pacific Railway postal system. Mr. French has also made arrangements to increase the service of delivery at Amable du Fond, Lake Falls, Colindale, Ho Vase and Westwater, and making Sturges Falls and Sibley into registering offices, thus completing a tri-weekly service which will serve, in addition to the lumbermen and the inhabitants, some three or four thousand railway employes working on the main line of the Pacific and the Algoma branch of the Canadian Pacific Railway.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. The Marine and Fisheries Department received a telegram yesterday from Grose Isle, Magdalen Islands, stating that the weather was clear, a fresh south-west wind blowing and extending to the coast, and that the sea was north of the Magdalen drifting slowly eastward. The vessels left the harbor on Sunday and arrived at that point on Monday.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. A bill received its first reading in the House yesterday to amend and extend the Dominion chapter seventy-one of the consolidated statutes of Canada respecting charitable, philanthropic and provident associations. The framers, Mr. Colby explained, had the old act in view, and its fullest extent in the Province of Quebec where its provisions had been extended by local legislation. In the Province of Ontario a local act was in force containing, to a large extent, similar provisions to this bill. The present measure was designed to provide more cheap and inexpensive machinery for the incorporation of these societies than the old act afforded.

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. ACADIA POWDER COMPANY. The debate was resumed on the motion of Mr. Tupper for the "third reading of the bill to grant certain powers to the Acadia Powder Company and Mr. Amyot's proposed amendment that this bill was not within the jurisdiction of this Parliament. Mr. Blake moved an amendment that the bill be referred back to the Committee of the whole House in the House of Commons, held in June last. During the course of his remarks he strove hard to show that he was a much abused man. The notice was read at ten o'clock on Saturday, was put in one

THE MONTREAL WEEKLY WITNESS.

THE MONTREAL WEEKLY WITNESS. THE ORANGE BILL. The Orange Bill was given a week's hoist at the request of the framers, Mr. White, Hastings. He said it had been placed in his hands by a committee of whom he never wished it to be postponed for a week while another committee proceeded with the bill so matter whom he befriended or whom he injured. The party requesting the postponement is said to be Mr. H. Merfick, Supreme Grand Master, who was said to be playing into the hands of his political enemies. BETHWELL ELECTION. The time of the House after was totally occupied with the Bethwell election case. Mr. Hawkins moved for a committee to enquire into the conduct of the County Judge of Kent, Ontario, in refusing to recount the votes on ballots cast at a election for a member to represent the electoral district of Bethwell in the House of Commons, held in June last. In doing so an extremely lengthy review of the whole case was taken, and a decision was reached, very partially in this case, and the returning officer. During the course of his remarks he strove hard to show that he was a much abused man. The notice was read at ten o'clock on Saturday, was put in one

ON RUSSIAN FRUITS.

CONDENSED FROM A PAPER IN THE PORTUGUESE REPORT OF THE MONTREAL BOTANICAL SOCIETY, BY C. GIBB, SECRETARY.

At last, at this late date, we have begun to explore our like climates in the old world.

For several generations the mild temperate regions have followed up that interchange which has resulted in their present advanced horticulture.

Our fruits came to us, as it were, by chance. In the days of the old French and British brought with them the apple and pear, the cherry and the plum.

The fruits of Western Europe and their pure offspring born on this continent, as a rule, are not long-lived upon the Western prairie above latitude 43°.

At Saratoga, in the State of New York, we find fruit growing in a profitable industry in climates decidedly more severe than that of the city of Quebec.

At Saratoga, in the State of New York, we find fruit growing in a profitable industry in climates decidedly more severe than that of the city of Quebec.

the winter temperature is but one degree milder than the city of Quebec, we find very large orchards, one of 12,000 trees.

Notes on the best of these Russian fruits will appear in another article.

VETERINARY.

(Conducted by Dr. McEachern, F.R.C.V.S.) SWELLING OF THE LEGS IN THE STABLE.

How shall I treat a mare addicted to colic? I have a mare which is very liable to colic.

DIARRHŒA IN COWS. The cattle in this part of the country are suffering and a good many of them dying from a sort of diarrhœa.

DEAD CALF. I have a cow which began to refuse food three weeks ago, at that time appearing quite well.

HEART DISEASE. I had a cow that, notwithstanding I fed her well all winter, kept in very poor condition.

WORMS. I have a yearling colt which rolls a great deal in his box, seems pleased to lie down and throws his feet up against the wall.

PROBABLY A FRACTURE OR A FOREIGN BODY. I had a valuable horse three years old, and on the 12th of January last he was taken to the stable.

CANKER OF THE FOOT. We have a horse here that is supposed to have had the heel of a fore foot frozen.

BERRY PLANTS and other small fruits. SEND for beautiful, Descriptive Illustrated Free Catalogue. T. C. ROBINSON, OWEN SOUND, ONTARIO.

It is of course hours on weight on the foot: simply retreating the toe on the ground.

LEGAL. DOMESTIC SERVANTS AND Hired persons have a privilege for a year's arrears of salary, clerks, apprentices and journeymen for three months.

TRANSPLANTING. In the setting out of shade and ornamental trees, as well as of fruit trees, there is a great loss in not doing it in a thorough manner.

PROFITABLE BEE-KEEPING. Mr. G. M. Doolittle gives in the American Bee Journal his account with his bees for a period of ten years.

CANADIAN NEWS. ONTARIO. SABRATH BREAKING.—Eleven members of the Salvation Army have been arrested at Chatham for causing a disturbance on Sunday by beating drums, tambourines, etc.

THREE PLANTING.—The township of Hops has passed a by-law giving a bonus of twenty-five cents for every tree planted and protected for three years after planting.

NEW LAW FACULTY.—The Law Faculty of Dalhousie College, Nova Scotia, organized in connection with the chair endowed by Mr. John G. Weldon, M.A. (M.A. Allison, Ph.D. (Yale) International and Constitutional Law.

QUESTIONS & ANSWERS.

THE ARMS OF CANADA. Sir—Would you be kind enough to inform me what the arms of Canada are?

THE MEN OF DERRY. Sir—Please publish in the "Question Department" this article of thirteen apprentice boys who saved the gates of Derry.

BRITISH COLUMBIA. Sir—You will oblige me if you will let me know what latitude British Columbia is, and what sort of climate it is in the neighborhood of Victoria.

TO DYE A MINK SKIN. Sir—Please give me a recipe for dyeing a mink skin brown.

POULTRY AND PETS. HOW TO MAKE INCUBATORS AND HOW TO RUN THEM. During the month of January there appeared in these columns an article on Artificial Incubation copied from an Exchange.

THE VICTORIA BRIDGE. Sir—Will you please answer the following questions, to wit: 1. How many tubes constitute the Victoria Bridge?
