LIVELY TIMES IN HAMILTON, ONT.

Street Cars Stoned and Police Powerless to Control Situation

MILITIA TO BE CALLED ON — MAYOR ISSUES PROCLAMATION AND PUNISHMENTS WILL BE HEAVY.

Hamilton, Ont., November 14. — Mayor Biggar issued a proclamation yesterday stating that the Riot Act will be read if the disorderly conduct in the streets, when the cars are operated is not stopped.

Judge and Magistrate have agreed that all found guilty of taking part in the disturbances will be sent to prison for ten years.

The Street Railway Company asked the Mayor to requisition the militia and he refused, but issued his proclamation instead.

The company intended to operate the cars yesterday, but because of previous proceedings, decided not to attempt it.

The Ontario Railway and Municipal Board yesterday decided to investigate the finances of the Hamilton Street Railway Company, and will also seek to discover the price the Cataract Company charges for its power, and the profit it makes on it.

At the meeting of the Police Commissioners yesterday afternoon, they decided that they were unable to give proper police protection, and that if the company ran its cars it should assume the risk.

The Mayor has issued a proclamation to the citizens, calling on them to observe good order.

Last evening the company officially announced that it will commence to run cars to-day, and have asked the Toronto authorities for militia protection.

MOBS WRECKED CARS.

When the people awoke to the fact that the cars were running Monday afternoon, large crowds made their way to the centre of the city, and fully 5,000 people congregated at the corner of James and King streets.

There was trouble when the first car came to the corner on its second trip. The crowd began to hiss, and cries of "scab" came from all directions. The police did not think that the trouble would go any further, and made no attempt to disperse the crowd. When the next car came along the crowd became more demonstrative, and someone threw a bad egg at it.

It was when the third car came along that the real trouble began. From all directions eggs, stones and other missiles were hurled at the car. Windows were broken and the strike breakers and officers had to duck their heads to escape being hit. From that on the police were powerless to do anything, and for the next hour there was a wild scene in the centre of the city.

Sergt. Finch made an attempt to arrest a man named McFadden, but the crowd surrounded him and rescued the prisoner. Someone picked up a large sign that was standing on safety and struck the officer over the sidewalk in front of a photograph and head with it.

LADIES RIDE ASTRIDE.

SOME TITLED ONES MAY BE SEEN DAILY IN ROTTEN ROW.

London, Nov. 14.—The custom of fashionable women riding horseback astride is so growing in England that it can be predicted that it will be the rule instead of the exception in a very few years, and that it will attract no more remark than the custom of women bicycling. The practice is already often followed by society women in Rotten Row, the fashionable riding place in Hyde Park. Among the prominent women who ride in this fashion are Viscountess Castlereagh, the Duchess of Westminster and the young daughter of the Duchess of Sutherland. Their riding habits are so contrived as to present the neatest appearance. Even from some points of view it can hardly be realized that they are not using a side saddle. The chief opposition to the custom comes from the teachers of horsemanship, who found the new style much easier taught. The course of lessons is much curtailed; indeed, girls learn to ride astride as quickly as their brothers.

THE ONTARIO BANK MATTER.

McGill's Defence is to Connect Directors With Speculations.

CHIEF ACCOUNTANT LANGTON IS EXAMINED WITH THIS OBJECT IN VIEW.

Toronto, Nov. 14.—The cross-examination of J. G. Langton, for years chief accountant of the Ontario Bank, lasted throughout almost an entire Police Court day, and incidentally directed the outlines of the case for the defence of Mr. Charles McGill, ex-manager of the Ontario Bank. The efforts of Mr. R. E. McKay, who is representing Mr. McGill in these proceedings, were plainly directed towards proving the connection of the president and the directors of the bank in the series of marginal stock speculations and in the manipulation of accounts.

The purpose appeared to be to establish that the acts of Mr. McGill were the result of a certain policy, and that he did nothing unknown to at least some of the directors. Mr. Langton was on the stand throughout the day for cross-examination, and in several instances Mr. McKay succeeded in securing statements which indicated that the bank's investments in speculative securities and its account with New York stock brokers must have been known to some of the directors. Before Mr. McGill came from Peterboro to be general manager of the bank, the directors were engaged in an effort to maintain the quotations of the bank shares on the market, and, according to the evidence of Mr. Langton, Mr. A. E. Ames assisted in these operations so materially as to breed the suspicion in the mind of President Cockburn that Mr. Ames was endeavoring to secure a place upon the board.

TIARAS AND TIARAS.

AN IMPORTANT CABLEGRAM FROM THE OLD WORLD.

London, Nov. 14.—Fashion having ruled that the tiara will be the favorite form of head-dress for evening costumes during the winter season, thousands of women are practising the tiara tilt, that is, the correct angle at which the tiara is most effective, relatively to the carriage of the head. Ten years ago, only titled ladies or women worth millions, wore tiaras. Now there are few society women who don't possess one. Of course, tiara is an elastic word. It need not necessarily represent a cornet of diamonds. It may mean anything from that to a wreath of metal leaves. Among those most popular forms are chaplets of flowers constructed of metal and colored enamels, with such gems as the wearer can afford. Amethysts, turquoises and stones of the less expensive kind are abundantly used by the less ambitious, while minute examinations sometimes reveals blobs of colored sealing wax.

KAISER'S WAR ON A WOMAN.

MARIE SULZER, THE ACTRESS, TO BE BANISHED FROM GERMANY.

London, Nov. 14.—The Berlin correspondent of the Daily Express says that, taking advantage of the fact that by marrying Baron Liebenberg, Marie Sulzer, the actress, became an Austrian subject, the Prussian Government has served a notice on her ordering her to quit the country within a fortnight, on the grounds that she is an undesirable alien. If she does not comply she will be forcibly expelled by the police. This step was taken to supplement the Kaiser's banishment to German Southwest Africa of Prince Joachim, His Majesty's cousin, who intended to marry the actress.

"HE'S A BRICK."

The phrase, "He's a brick," originated from an Eastern ruler, who while visiting a neighboring principality asked his host to show him the fortifications.

Waving his hand toward his troops, which were drawn up in soldiery array, the Prince said to his guest:

"These are my fortifications; every man is a brick."

ANNA GOULD GRANTED DIVORCE.

Now Free From Count Boni de Castellane.

GIVEN CUSTODY OF HER CHILDREN, BUT CANNOT REMOVE THEM FROM FRANCE.

Paris, Nov. 14.—(Special.) — The Countess de Castellane, formerly Miss Anna Gould, was to-day granted a divorce and custody of her children, who, however, will not be allowed to be taken from France without the consent of Count Boni de Castellane, their father.

CONVICTED SAILORS MAKE THEIR ESCAPE.

Had Been Convicted And Sentenced To Siberia.

ON EVE OF DEPARTURE, OVERPOWERED GUARD AND ESCAPED.

Cronstadt, Russia, Nov. 14.—Twenty-five sailors who were sentenced to hard labor in mines for life after having been convicted of participation in August mutiny, escaped last night while awaiting deportation.

They were allowed to visit baths under an escort of 16 soldiers, and overpowered and disarmed the guard, killing one man.

The convicts then donned civilian clothes and disappeared. Only one of the fugitives has been captured.

CHINESE TO SPEND NEW YEAR'S AT HOME.

NINE HUNDRED OF THEM LEFT VANCOUVER ON THE S. S. EMPRESS OF JAPAN.

Vancouver, Nov. 14.—All records of an exodus of Chinese to attend the New Year's festivities in their native land were broken recently with the departure of about nine hundred celestials for the Orient on the steamship Empress of Japan. The largest number which ever left this port before on one steamer went out on October 30 last year, on the Japan. On this occasion she took six hundred and fifty-five Chinese.

Local Chinese to the number of about four hundred and twenty-five were registered out on the Japan. The remainder came from all parts of the United States, and a special train bringing over three hundred of them reached Vancouver from Montreal. The record for local outward registrations is held by the crowd going out on the Japan. The greatest number of local Chinese ever sent out before was three hundred and sixty-one, taken by the Japan on October 30, last year.

The cause of such a large number of Chinese going home this year is that times in this country have been prosperous with them, as with the white races, and they have more money to spend. The November sailings from Vancouver for the Orient will also take out many Chinese. Practically all of them will return within the next year.

Nine Hindus and half a dozen Chinese were deported on the Empress of Japan. Because she took out so many steerage passengers, the Empress of Japan has had little room for cargo and she had but about 1,500 tons.

LORD'S DAY ALLIANCE AND EARL GREY.

DELAY ACTION REGARDING RESOLUTIONS OF THANKS TO HIS EXCELLENCY.

Toronto, Nov. 14.—At the annual meeting of the Ontario Lord's Day Alliance on Friday it was intended to adopt a resolution expressing the thanks of the Alliance to His Excellency Earl Grey the Governor-General, for his sympathy with the Alliance and assistance in their work. This, however, was not done on account of an objection raised by one member, Rev. Mr. Scott, who stated he had read in a newspaper a report that during his western trip Earl Grey had either gone on a shooting expedition or made preparations for doing so on Sunday. In view of the uncertainty of the members as to accuracy of this report several protested against the adoption of such a resolution and on suggestion of the president, Mr. J. K. MacDonald, the resolution was not put.

COAL STRIKE ENDS.

REPRESENTATIVE OF UNION VINDICATES COMPANY—CONCEDES ALL ITS DEMANDS.

Fernie, B.C., November 14. — The coal strike that has been in force for the past seven weeks came to an unexpected end Tuesday evening, when Mr. T. Burke, representative of the National Board of the A.M.W. of A., called upon General Manager Lindsey and conceded all that the company had all along demanded.

The agreement, signed by Mr. Lindsey and Mr. Burke, vindicates the company completely. Mr. Burke was forced into surrender by the unmistakeable attitude of the bulk of the miners, who opposed the strike from the first.

The births in France for 1905 number 807,292, showing a decrease of 10,937 from the total of 1904.

LICENSE WINS IN SUTTON TOWNSHIP.

Vote Took Place Yesterday on Local Option Question.

75 MAJORITY FOR LICENSE IN TOWN—VILLAGE GOES LICENSE BY 5.

Sutton, Nov. 14.—(Special.)—Voting on local option against license took place here yesterday.

The license men won by a majority of 75 in the town and by 5 in the corporation of Sutton.

The majority in 1900 in town was 114 for license.

The contest though brief has been keenly waged. The temperance party has held meetings throughout the township and had strong hope of victory.

The anti-local option campaign work was done more quietly but evidently quite as effectively.

MASONIC

FIRST MEETING IN NEW HALL LAST EVENING — VICTORIA LODGE TO CELEBRATE ANNIVERSARY.

The new Masonic chambers in the Record block were occupied for the first time last evening, when Victoria Lodge, No. 16, A.F. A.M., held a regular communication. There was a very large attendance of the members of Victoria and other lodges. All expressed themselves as being very much pleased with the new quarters. A committee was appointed to make arrangements for the celebration of the 50th anniversary of the institution of Victoria Lodge, the lodge having passed the 50th mile stone last year. What form this celebration will take has not yet been decided upon.

The District Deputy Grand Master of St. Francis District R. W. Bro. A. Sangster, paid his official visit to Victoria last evening. He was received with the honors befitting his rank, and after witnessing the exemplification of work he addressed the brethren present and bespoke a period of prosperity to the Masonic bodies that will meet in the new quarters.

The dedication of the rooms will take place probably some time in December.

TO EXCAVATE HERCULANEUNM.

PROFESSOR WALDSTEIN'S PLANS ACCEPTED BY THE ITALIAN GOVERNMENT.

Rome, November 14. — Professor Charles Waldstein, professor of fine arts in King's College, Cambridge, England, will arrive here shortly for the purpose of perfecting an agreement with the Italian Government concerning the carrying out of his project for the excavation of the ancient city of Herculaneum. The Professor's plans to this end have been accepted by the Italian Government on the condition that the participation of foreign countries in the work be only under the form of private contributions, and that there is no foreign official interference.

Professor Waldstein has secured the active co-operation of King Victor Emmanuel as president of his organization, as well as that of Emperor William, King Edward and President Roosevelt.

The excavation of Herculaneum will be a gigantic enterprise. The work of digging up the ancient city was begun by King Charles III., in 1738, and it was continued under the direction of the Italian Government in 1866. This excavation has always been attended with the greatest difficulty, as over the ruins of the ancient city there stands to-day the town of Resina, with 20,000 inhabitants. The location of Resina has often made it necessary to abandon research work.

ROYAL PAPER MILLS NEGOTIATIONS.

ANOTHER MEETING WILL BE HELD ON THE 22ND WHEN MATTER MAY BE CLOSED.

Mr. George Van Dyke, of Boston, who has made a proposition for the purchase of the Royal Paper Mills, of East Angus, was in town this week. The deal is not yet closed. A meeting is to be held on the 22nd instant, when the negotiations will be advanced and possibly closed by the purchase of the property by Mr. Van Dyke and the syndicate he represents.

THE ROOSEVELT MISSING.

MRS. PEARY ANXIOUSLY AWAITING HUSBAND'S ARRIVAL AT SYDNEY.

Sydney, N.S., November 14. — The Peary Arctic steamer Roosevelt has not arrived yet, and no one seems to know when she will reach port. Mrs. Peary has been here since Saturday. Last night she stated that she had not heard from her husband since the 8th, he then being at Battle Harbor. She has sent him messages from Portland, but they have been returned, her conclusion being that the station has been closed for the winter, and there will be no further news of her husband until he arives in Sydney. In view of this the date of Peary's departure from Battle Harbor cannot be ascertained. It may be that he will not arrive here for several days yet. Telegrams have been received by Morris K. Jessup, President of the Peary Arctic Club, from Peary, in which he expresses anxiety about Mrs. Peary. It is thought that possibly these were delayed in the transmission.

COURT NEWS FROM SWEETSBURG.

Judgment In The Cases Of Charbotte vs Page, Of Granby

THE AUGER VS. BROME CASE MAY GO TO APPEAL—SUBJECT OF CAMPAIGN SPEECHES A FEW YEARS AGO.

Sweetsburg, November 14.—(Special.)—The regular term of the Superior Court opened here yesterday under the presidency of His Lordship Mr. Justice Lynch, who, however, will have to leave Thursday morning for Montreal, where he will be sitting for several days, ad hoc, in the Court of Appeals.

Amongst the judgments rendered are the following:

CHABOTTE VS. PAGE.

Both parties are from Granby.

The defendant is just building a large hotel on Main street, at Granby, and had contracted with the plaintiff, Joseph Chabotte, to build a stonewall at $2.25 a rod. The contract was a verbal one and took place at the end of May, 1906, and the job was to be completed by the 1st of July then following. During the progress of work defendant paid plaintiff certain sums of money on account, but then a disagreement happened between the parties. The result was that the plaintiff took the present action to recover the sum of $272.18, balance of his work and for materials furnished. The defendant pleaded that he had not formally accepted the work that the same was not completed, that he had to finish it himself, and that moreover he had a contra-account more than sufficient to offset plaintiff's claim. There was also a misunderstanding about the measurement of the wall, plaintiff pleading that it should be calculated as simple rods, whereas defendant claims that they should be measured as running rods, and one stating that there were 240 rods, whereas the other put it at 249 rods and 13 feet. The evidence on this score being conflicting, the judge took the medium course and adopted as the measures, 244 2-3 rods at $2.-25, making a total of $551.04. Out of this, it is admitted by the parties that the sum of $385 was paid on account before the institution of the action. Defendant also got credit for $48.05 for hired help and lime; $20 for pointing the wall; $23 for filling the joices which ought to be done by the plaintiff, and also $25 damages for delay in making the work, making a total sum of $501.05, leaving a balance due in favor of plaintiff for which judgment is given and costs of an action of that class.

CHABOTTE VS. PAGE.

These are the same parties.

This is an actioh for $199, damages for slander, defamatory language and assault, alleged to have taken place at Granby the 2nd day of August last. There was no special damage proved except that defendant used pretty rough language towards plaintiff, and being in violent temper, gesticulated so much that plaintiff took it that he was threatened to be struck, but nothing of that kind happened. However, the Court must show its disapproval of the undignified conduct of defendant, who is condemned to pay the sum of $25 damages, with costs of an action between $60 and $100.

THE AUGER VS. BROME CASE.

The extended and technical notes already published in these columns in the case of Auger vs. Brome do not give a full and popular aspect of the case.

The matters from which the case arises have not been well known in these latter years, but fifteen to twenty years ago it was the general talk amongst municipal councillors and public men generally in the District of Bedford. At that time, no candidate for popular suffrage would have thought himself worthy of public confidence if he did not say that he had or would relieve his constituency from the burden of large sums claimed by the Provincial Government as coming from what was then known as the Municipal Loan Fund. Few municipalities, if any, did reimburse the public exchequer for any advances had from that fund. But readjustments had to be made with the Government or neighboring municipalities. In the Eastern Townships the ratepayers were entitled to a certain indemnity arising out of the fact that the old parishes, seigneuries, had been favored by the Seigniorial Act of 1854, by which the old censitairies were discharged, at the public expense, of tedious and onerous charges towards their lords and masters, seigneurs. It appears that the County of Shefford did not get such indemnity, but had to give it up in order to wipe out its credited indebtedness to the Municipal Loan Fund. The Townships of Farnham and Brome, having passed within the limits of Brome, were supposed to have received their share of the seigniorial indemnity. Shefford lost hers, to discharge the old obligations contracted together with these townships, when they decided to help the building of the Stanstead, Shefford and Chambly Railway. After broiling the matter over for some time the hard-headed, positive municipal councillors of Shefford, with a good deal of horse sense and otherwise, decided not to enter the litigation about their claim against Brome, and were willing enough to turn over the hot chestnut to the present plaintiff, who having got a transfer by a resolution of the County Council, carried on division, proceeded with his case, under the advice of as good lawyers as could be found at that time. On this respect, it is queer enough to remark that the lawyers who began with him, afterwards became attorneys on the

For several years past he with his growing family has lived in Knowlton and has made many friends. MOTHER AND THREE CHILDREN PERISH.

House Caught Fire In Early Morning.

SAD AFFAIR AT COLDWATER, MICH. — HUSBAND DISCOVERED BLAZE BUT COULD NOT ENTER HOUSE.

Coldwater, Mich., Nov. 14.—(Special.)—Mrs. Charles Mowrey, aged 21 years, and her three children, Homer, aged 6 years; Louise, aged 3 years, and a baby of six months, were burned to death early to-day in their home on a farm at Batavia station, on Lake Shore Railway, near here.

Charles Mowrey, husband and father, rose early and built two fires in the house. He then went to the barn to do chores, and while there discovered that his house was afire.

He rushed back, but the flames had made such headway that he could not enter the house and his calls through the windows to his family brought no response.

It is thought that mother and children were suffocated while asleep.

TO MURDER ITALY'S KING.

PLOT HATCHED IN NEW JERSEY FRUSTRATED BY POLICE.

London, November 14.—A despatch from Naples to the Central News says that the police there have made two important arrests, thereby frustrating two conspiracies hatched in New Jersey against the life of King Victor Emmanuel, the Duke of Aosta, who is his cousin, and the Duchess of Aosta. Information was received by the police that an envoy had left Paterson, N.J., charged with the assassination of the Duke and Duchess. This anarchist was promptly arrested upon his arrival at Naples. Meanwhile the Italian authorities learned that an Italian anarchist, named Gabrielle Lauseto had been chosen by the Paterson committee to compass the King's death. Thanks to a second warning from the American police, Lauzeto was also taken prisoner as soon as he stepped ashore at Naples.

JAPAN AND UNITED STATES.

Inquiry Into Situation at San Francisco Ended.

CALIFORNIANS ARE AGITATED AGAINST THE JAPANESE — WOULD EXCLUDE THEM.

San Francisco, Nov. 14.—Secretary of Commerce and Labor Victor H. Metcalf, who was sent to San Francisco by President Roosevelt to investigate the exclusion of Japanese children from the schools attended by whites, has concluded his work and will depart for Washington to make his report. Secretary Metcalf has, during the visit here, gone very thoroughly into the matter, and will take a great amount of statistics and facts bearing on the case to Washington with him. He heard complaints of boycotting of Japanese restaurants and other places of business; investigated cases of assault on Japanese, and the numerous street brawls between Japanese and white boys. Secretary Metcalf declined to say what conclusions he had reached, or to make any statement until he has made his report to the President.

There is no more doubt that the school board of San Francisco intends to stand by its guns in the matter of compelling Japanese here resident to attend separate schools than there is that in this course the board will be backed up overwhelmingly by the public sentiment of this city and State. Not only is California behind San Francisco in this matter, but the entire Pacific seaboard is behind California as well. There is no question, whatever, that the feeling against the Japanese is rising fast. It is already very nearly as strong as the sentiment that forced the passage of the Chinese exclusion act. The Chinese population is actually decreasing in California, while the Japanese population is increasing by jumps.

WHAT THE COUNTRY NEEDS.

(From the Louisville Courier-Journal, Dem.)

If you want to cripple the trusts and help the people, smash the protective tariff. If you want to do away with the opportunity for the plutocrats to amass ill-gotten wealth, destroy the Dingley law. If you want to keep the poor from falling prey to the rich, lower the tariff. The Dingley law is for the benefit of a few. A tariff for revenue would benefit the whole people.

What is needed in the United States is a tariff for revenue only.

BRYAN SEES HOPE FOR HIS PARTY.

DECLARES THERE IS LITTLE IN THE NEW YORK RESULT TO PLEASE ROOSEVELT.

Lincoln, Neb., Nov. 14.—Commenting on the results of Tuesday's election, W. J. Bryan has issued the following statement:

"The election of 1906 indicates a trend in favor of the Democratic party. It proves that the Democratic party is growing stronger as Republican policies are developed. In New York the party has won a signal victory in spite of the tremendous efforts put forth in behalf of the Administration. The defeat of Mr. Hearst, the Democratic and Independence League candidate for governor, while a great disappointment to his friends and to the party, is explained by facts which rob Mr. Hughes's victory of both glory and political significance. President Roosevelt cannot find very much cause for rejoicing in the New York returns. To have his own State go Democratic cannot be gratifying to him, and to find that his personal attack upon Mr. Hearst had little influence on the result, compared with the influence exerted by McCarren, Murphy and Croker will not gladden his Thanksgiving Day. The President's personal attack on Mr. Hearst was in bad taste, to say the least, and the failure of that attack to favorably impress the public ought to be a warning for the future. The Republicans have had an effective campaign cry in "standing by the President." Two years from now that appeal will be of no avail. Even if he were a candidate, which no friend of his can assume after his repeated declarations, he would have to confront the third term issue, and who would say that that issue alone would not lose the President enough votes to make his race hopeless?"

FINED FOR SNEEZING.

GERMANS ACCUSED OF CREATING PUBLIC DISORDER.

Berlin, Nov. 14.—The danger of sneezing loudly in the public streets in Germany has again been brought to general notice. Some time ago a citizen of Mulhausen was arrested on a charge of gross misdemeanor in rendering himself a public nuisance, but managed to get off, as the medical evidence showed that a polypus in the nose prevented him from sneezing otherwise than loudly.

The Goettingen police have now attacked this form of gross misdemeanor and arrested a master tailor who sneezed five times while crossing the street with a party of friends. The policeman declared that the tailor had purposely created a disturbance, and the prisoner was fined 3 marks on the spot. The tailor declined to pay, and subsequently a magistrate decided in his favor, saying he thought the man had not squeezed purposely, but because he could not help it.

CORRESPONDENCE.

A BROMPTON MAN'S PROTEST AGAINST SCHOOL CONDITIONS IN HIS DISTRICT.

Editor of Record:

Sir,—Some time ago the trustees of Brompton closed the school at Brompton Falls, and took the ratepayers' tax in that district to help run a school at the western town line. The ratepayers at Brompton Falls hire a teacher and run a private school at their own expense.

Is justice being done? When the trustees last year passed resolutions authorizing an expenditure of some $150.00 to educate six scholars at the west end of the township when they refused to pay ten cents per day for transport to ratepayers in the eastern part of the township, who had to carry their children three miles or over to a school in a neighboring village.

Did the ratepayers of Brompton get justice when last year they paid $1.40½ per month, scholar fee each, for four scholars at Bromptonville, when a party from the township of Windsor only paid fifty cents per month for his children attending our school?

The Secretary says he was willing to pay more, but he, the Secretary, thought it was enough.

Do we receive justice when the school at the western town line is started the 1st of September every year, when our children usually have to wait until the middle of October before a school is provided for them, thus losing the best time in the year to travel the long distance they have to go to and from school?

School Law Art. 116 says:

"No district shall exceed five miles in length or breadth unless the school commissioners or trustees have provided means for the transportation of the children to the school."

Why did Art. 116 not state that transport must be furnished for children distant more than two and a half miles from school.

Our trustees seem to think that they can run a school at one corner of the district and compel ratepayers to carry their children the five miles.

Last year there were three farms and seven scholars in this part of the township. Two of the farms have been sold and when these parties move away there will be two scholars left in this quarter of the township.

Who can blame the French-Canadians for buying cheap farms?

I appealed to Inspector Hewton on the 30th of July in regard to a matter that should have been attended to before the first of September.

My letter sent by Mr. Hewton reached the Secretary some two months later, I am informed, asking the Secretary to lay the matter before the Board, and as it was addressed to another person, the Secretary paid no attention to it. I appealed to the Superintendent of Public Instruction, and the Secretary received a letter from him enquiring if the Board provided transportation for some, and not for others.

Now, Mr. Editor, I defy the Superintendent to find anything in my letter to justify such an enquiry.

We have no appeal, public opinion is against the party who opposes the representatives of the ratepayers, when too often they only represent the majority in a certain part of the township.

Go to the Court, and you must pay or help to pay the cost, whether you win or lose.

Country elementary schools have been drifting from bad to worse for the last twenty-five or thirty years. Many of the little so-called red school houses have gone down in the past, and many will go down in the near future.

Too many conflicting interests are backing water to leave much hope for the future.

There is no mistake; errors have been made both by the Protestant Committee and the Government. Our School Inspectors should be in a position to better advise, but they seem to be taken up very much with the Teachers' Association just now. Will it help our schools if many ex-teachers who have left the profession, leave their homes and families and return, and teach a year or two, and saddle a pension on the country?

What right had the Ontario Government to force their ratepayers to pay their teachers $300.00 a year? They have separate schools and poor municipalities. The municipalities that pay less than five mills assessment, and do not secure the best teachers that can be found, are wronging their children.

Mr. Editor, you may justly consider this a poor ill made pill, but it is not loaded with chicken-weed either from the Fisher farm or the Borden garden.

Brompton, Oct. 24th, 1906.

PEOPLE OF THE UNITED KINGDOM CALLED ON TO DENOUNCE PARLIAMENT.

The following manifesto has been issued by the Women's Social and Political Union:

"Women and men of the United Kingdom! How much longer will you tolerate a House of Commons which refuses to obey your will? How much longer will you tolerate women being sent to prison for demanding political justice?

"Men! are you satisfied with the laws your representatives have made? You are not. You know that your children are starving. You know that aged workers have to end their lives in the workhouse. You know that industrious workers, women as well as men, are unemployed; that sweated women labor for one penny an hour; that women in despair are selling their bodies on the streets; that these things are because women are refused their rights as citizens.

"Women! forget party politics and unite in demanding the vote. Women should have no political party until they are citizens. Join our union and work with us for freedom.

"Eleven women are now in prison for two months each for your sake. They suffer in Halloway Jail the fullest rigor of prison discipline because they went to the House of Commons to demand your citizenship, and because they refused to remain silent.

"They fight for you. Will you fight for them and for yourselves? Every day women are joining our union, but we shall not rest content till we have every woman in the land in our ranks. To stay outside is to be a traitor to your sex."

There are Thousands of Run-down Women.

Are You One of Them?

There are thousands of women here, there and everywhere, who are suffering from a run-down condition.

The tendency is, to let matters go, till serious illness or some chronic female weakness results.

Isn't this a foolish thing to do?

Don't do it. Get well. Be your old self again.

Do you ask, how? Do as Miss Clark and Mrs. Thomas did when they got run-down. They took Health Tablets.

Dr. Hugo's Health Tablets Make Healthy Women.

I was suffering from a run-down condition. My doctor gave me some brown tablets. I improved so much in two weeks that I congratulated my physician. He then told me I had been taking Dr. Hugo's Health Tablets.—Flora Clark, Island Pond, Vt.

The benefit secured from one box of Dr. Hugo's Health Tablets has been so great that I am satisfied one box more will effect what you claim for them, and make me again a healthy woman.—Mrs. Jennie Thomas, Dixville, Que.

Notice, too, that there was no waiting for results. Improvement began at once. And it always does. The 72 tablets in 50c box will start you on the road to health.

An Important Matter.

The Eastern Townships immigration question is attracting well deserved attention throughout this section of Canada. It is important. The lure of the west and of the south is bound to continue its drain upon the population of this rich agricultural section of old Canada. If prosperity, agricultural and industrial, is to continue, if the productiveness of Eastern Townships farms is to be kept up to its present standard, if the people we have are to be retained, our immigration must be equal to our emigration. The birthrate, unfortunately, among the English portion of the population, at least, cannot be depended upon to perpetuate a populous community of tillers of the soil, in view of the constant exodus to the west and to the cities of Canada and the States.

"Let us organize local immigration societies," is the splendid suggestion of a correspondent of the Record. This correspondent continues:

"I would suggest that there should be issued for free distribution by the Dominion Agents, and in the schools, libraries and railway stations in England, an attractive (illustrated) pamphlet setting forth the situation and resources, the educational, social and religious conditions, and the industrial and agricultural possibilities of the Townships."

Is not this a matter in which the County Councils and, indeed, the Councils of the various townships, should interest themselves? In Sherbrooke the Board of Trade might well give attention to it. Its consideration is within the special province of the Eastern Townships representatives in parliament.

Men in the Eastern Townships, of reflective mind, cannot fail to realize the importance of this townships immigration question. It is perhaps more important than the elementary school question which has been so much discussed, for it suggests a possible and plausible solution to this problem.

624 immigrants of a sturdy agricultural class is the result of immigration agent Brewster's single-handed efforts during the season.

These have been absorbed within the townships population but the demand for help upon the farms is not diminished.

What might not a strong local organization accomplish?

A Sign of the Times.

The federal cabinet has under consideration the demands of several of the Canadian provinces for an extension of boundaries. Manitoba asks for the district of Keewatin, thus extending the provincial boundaries to Hudson Bay. Ontario lays claim to that portion of the district of Keewatin east of the Churchill river. Saskatchewan desires extension to Hudson Bay and including Port Churchill. Quebec has an eye on the vast territory of Ungava.

The time was when Canadians considered the opening of territory west of the province of Ontario as a foolish venture.

The awakening has come. The vista of the future has aroused Canadian spirit. Provincial boundaries are too narrow as long as there are lands beyond awaiting development.

All this is but a sign of the times.

The Man Behind the System.

Reports of shocking railway disasters have become so common as news items in the daily papers that a general apathy in regard to the harrowing descriptions seems to have been produced in the public mind. Each week, indeed almost each day, adds to the list of unfortunate victims of the modern iron steed. Sometimes the careless trepasser on the track is tossed dead and mutilated into the ditch; sometimes the passengers are thrown into the awful physical agonies attendant on the modern wreck; in either case the occurrence has been so often repeated that it entirely lacks any novelty, and seems powerless to awaken any marked indignation or resentment.

Nevertheless there is behind every effect a cause, and this truth is not suspended in connection with railway companies in relation to wrecks that occur on their roads. Is it mismanagement common to all railroads that produces such disastrous results in much of the railroad travel of today? Is it a faulty system which causes confusion at critical moments, leaving the employee in doubt as to his instructions? Or, is it the congested traffic caused by great travel and great commercial activity that makes ordinary systems too complex for strict adherence?

No one who has been in any great railway terminus of today but must have marvelled not at the lack of system, but at the perfection of the system, that regulated the incoming and outgoing of trains. Each had its track; each had its time; and there was no confusion. The system, the rules prevailing, would seem to make disaster impossible. But—and here is the secret that governs all excellent systems, for their good or ill execution—all the proper action of these trains was dependent upon the trustworthiness of station agent, despatcher, engineer, conductor and brakeman. The system, the regulations, depended wholly for their efficacy upon these men, upon their conscientious discharge of duty.

So, in every wreck, in every disaster, is there to be found some careless, sometimes, it would seem, excusably careless official. His eternal vigilance has ceased for a second, and a few dozen lives are destroyed in consequence. He is but a link in a system, a link that may be one of thousands in the continental chain of railroad systems, yet on the efficiency of each link is based the integrity of them all. In finding cause for many of railroad disasters, one must go beyond the company, beyond the system, to the men upon the trustworthiness of whom, public safety depends.

CITY NEWS.

Mrs. Albert Wiggett, Fulton avenue, kindly gave the use of her house last evening to the Guild of St. Agnes, of the Church of the Advent, East Sherbrooke. The entertainment was well attended and most successful. Much amusement was caused by the cobweb contest, the prizes being finally disentangled by Mr. Gilbert and Miss Ellis, 1st, and Miss Higginson and Miss Winifred Wiggett, 2nd, Mr. Bark and Miss H. M. Terrill, 3rd. In the drawing contest the prizes were won by Mrs. Causier and Mr. James Wilson. Messrs. Houston, Geo. Wilson and Barks sang solos, the Misses Keene played a piano duet, Miss Jessie Johnson recited and Mr. Higginson and Mr. Mills played a banjo duet. Refreshments were furnished by Miss Wiggett and much appreciated.

LENNOXVILLE MUSICAL CLUB.

The second concert of the Lennoxville Musical Club was held on Monday evening with an exceptionally good attendance.

A very fine programme was rendered, contributed by the following: Miss Mabel Smith, Miss Eva Ames, Miss Loll, Miss Florence Mallory, Miss Kathleen Stevens, Miss Olive Lusk, Miss Joll, Rev. E. J. Bidwell, Messrs. Harding, Walley, Von Stridsburg and Johnson.

A very delightful feature of the concert was the playing of three numbers by Professor Bourgeault's orchestra. The first was "Selections from Faust," followed by "Beau Brummel" (Bendix). The orchestra kindly responded to an encore.

At the close of the concert the following was read:

"Since the date of the last concert the committee have met and fully discussed the subject of changing the night of the concerts from Monday to Wednesday and have come to the conclusion that the change is desirable.

"We must fully recognize that we cannot compete with a city like Sherbrooke. At the same time it is to the advantage of both places that we should work in harmony, and that our friends there, who frequently assist in our programme should be able to do so with as little inconvenience as possible, and should also be able to join our membership, as many of them have done in the past, when there was no musical organization in Sherbrooke. The committee therefore on account of these various reasons, recommend the change before mentioned."

The voting was unanimous in favor of Wednesday, so in future the concerts of the L.M.C. will take place on that day.

The Municipal Council of St. Joachim held a general session on Monday, the 12th inst. The usual crop of small bills were passed and other routine business. The most important discussion was regarding the keeping open of winter roads. The members of the Council were appointed to confer with the road inspectors and arrange with them to keep the different districts open for the amount of tax levied, failing which then the district will be sold to the best and lowest bidder.

BRIGHAM.

Nov. 14.—The annual business meeting of the Brigham Congregational church recently held, indicated that the year's work was very successful, all of the departments showing a financial working surplus.

The Rev. James J. Hutchinson has recently terminated a very successful three years pastorship over the Brigham Congregational church. During that time he has greatly endeared himself to his people, and great effort was made to retain him as pastor, but the good traits and talent of a man are not confined to the immediate sphere of location, and the reaching demand from other provincial towns and western cities have had their influence. However, the strong existing friendship between himself and this congregation make it desirable that he may accept the call from Ayer's Cliff or some other place of close proximity. The affectionate esteem in which he is held was verified previous to his leaving for a few weeks' vacation at his home in Ontario, by James Dougall, on behalf of his congregation and adherents, "with expressive feelings," presenting him with a purse of $76. The reverend gentleman replied in a feeling and able manner.

The Rev. J. W. Pierce, of Barrie, Ont., has accepted a call to the Brigham Congregational church.

Our district school is progressing finely under the able management of our popular and progressive teacher, Miss Cora Buck.

Mr. Robert, who had his mill and shop recently destroyed by fire, is preparing to rebuild.

Mr. Gleason is also making ready to build a saw and grist mill, using a gasoline engine as his motive power.

Mr. Charles Short is fast completing a modernized horse and hog barn. Although a native of Canada by birth and residence, the great energy which he exhibits in all his undertakings would rightfully cause us to believe that he is a full-fledged American.

Mr. William Thompson has vacated his farm on the Adamsville road, and gone to reside on his Riverdale farm.

Mr. Thompson, a large and successful farmer of Moose Jaw, is visiting friends in this locality.

Mr. Henry Messier recently lost one of his horses, which hung itself in the stable.

MEN'S WINTER STYLES.

Are Shown in the Book Just Published in Montreal.

"Manners and Modes for Men" is the title of the book published by the Semi-ready Company in Montreal. Copies may be had free from the Manager of the Semi-ready Wardrobe here.

In the book, the President of the Semi-ready Company, who is a recognized authority on men's dress, gives a series of effective pictures showing the distinctive character of dress for various pursuits and purposes. While it is impossible to picture that touch of warmth and brightness in the new cloths, the Semi-ready styles cling closely to the subdued and unobtrusive finer cloths which assure distinctive elegance and forbid that too bold effect which is displeasing.

The forecast made some months ago by the author of this book has turned out correct in the tone, the shape and the color most desired by gentlemen.

The new sack coat for the Fall and Winter of 1906 will have neither centre or side vents. This has given place to the close waist and flowing hip and the easy fitting sacks. Both styles are shown.

The newest winter overcoat is called the French Chesterfield. It is a modification of the fashions first shown.

Boucher & Lacroix, of Sherbrooke, are the possessors of the Semi-Ready franchise.

FRANCE'S PERIL.

BIRTHS SHOW A DECREASE OF 10,937 FROM A TOTAL OF 1901.

Paris, November 14.—Public attention has again been drawn to the national peril involved in the constantly diminishing birth rate by the publication of the vital statistics for 1905. The births in France for this year number 807,297, showing a decrease of 10,937 from the total of 1901. The reason for this decrease is not to be found in a reduction of the number of marriages, in which the statistics show a slight increase over 1901, but it apparently arises from the aversion of the French people to raise large families. The National Association, which is studying this matter, has reached the conclusion that it is necessary to inculcate the idea that any couple that raise more than three children merit and are entitled to public gratitude and protection.

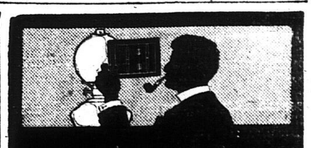

THE PERMANENCY OF CHRISTIAN SCIENCE.

(From the Watchman.)

It seems to be the popular idea that Christian Science stands or falls with Mrs. Eddy, and that her sickness and death would disprove her theories. This is not the case. If Mrs. Eddy were to die the Christian Science movement would go on. The ideals of Christian Science do not require perfection in any of the members or even in the founder; and attacks on Christian Science based upon such misconceptions fall as harmlessly as drops of rain on a rubber coat. Christian Science has gained a great deal of strength from the wild and easily disproved accusations which have been made against it; and it will keep on growing on the mistakes of its opponents. No serious check can be brought to the advance of Christian Science by such trivial attacks. It can only be effectively opposed by a just recognition of the certain amount of truth as to the influence of mind over matter which it emphasizes; by a fair acknowledgement of the intelligence and purity of life of members of the Christian Science Churches, and by a just exposition of its essentially antheistic and therefore unchristian philosophy and its contradictions of the plain teachings of Jesus.

DURAND REGRETS HIS DEPARTURE.

ALL IS WELL BETWEEN THE KINDRED PEOPLES, SAYS RETIRING AMBASSADOR.

New York, Nov. 15.—"I especially regret leaving America, as ever since I entered the diplomatic service I have wanted to come here. I expressed the desire to come here, as I consider it the most important post in the world" said Sir Henry Mortimer Durand, the British ambassador to the United States, last night, at the dinner given by the British Schools and Universities Club in honor of the 65th birthday anniversary of King Edward. "I feel that the old era of misunderstanding has passed away, and all of us ought to recognize the fact and rejoice in it," continued Sir Henry. "I am stating it as a fact. I say this while leaving America with deep regret and with sorrow I leave it with the feeling that between the kindred people all is well."

It was ascertained in this city that Cecil Arthur Spring-Rice will probably be the next ambassador to the United States from Great Britain. As fas as could be learned the British Foreign Office has not yet definitely decided on the appointment, but of all those mentioned for the office, Mr. Spring-Rice is regarded as the most probable appointment. Mr. Spring-Rice is at present in Paris, having succeeded Sir A. Hardinge at Teheran. Before that, he was first secretary of the embassy at St. Petersburg. He was born in 1859, and was educated at Eton, and Balliol Oxford. He became a clerk first in the War Office and then in the Foreign Office, and for a time was assistant secretary to Earl Granville and writer to Earl Rosebery.

He has been consecutively secretary at Brussels, Washington, Tokio, Berlin, and Constantinople, and was charge d'affaires at Teheran in 1900. In the following year he was appointed British commissioner of the public debt at Cairo. He has been decorated with the first-class order of Medjidie.

Mr. Spring-Rice is comparatively a young man for the post at Washington if he succeeds Sir Henry Mortimer Durand his promotion will be due, in some part, at least, to the fact that he is on exceedingly friendly terms with President Roosevelt. His father was the Hon. Charles Spring-Rice. In 1901 he married Florence, daughter of Sir Frank Lascelles.

The two principal features at the Baltimore races were the Owner's Handicap Steeplechase and the Amateur Cup, both going to local horses.

NO OPIUM OR SPIRITS FOR ABORIGINAL RACES.

PLAN SUGGESTED BY PRESIDENT ROOSEVELT MEETS WITH APPROVAL.

Brussels, Nov. 13. — Although the United States is not interested in the African spirit question, it is worthy of notice to record the presence in Brussels, in connection with the conference for the revision of the spirit trade in Africa, of Mr. Wilbur Crafts, Superintendent of the International Reform Bureau of Washington. That gentleman has come here as bearer of a monster petition, signed by 586 philanthropic and commercial bodies of the United States, representing some 19,000,000 people, for the increased protection of savages against intoxicating liquors and opium. The petition was presented to the delegates of the European Powers represented at the conference. It requests the conference to recognize as the goal to be reached as speedily as practicable the prohibition of the selling of intoxicating liquors and opium to all aboriginal races. It is understood here that the petition was drawn up at the suggestion of President Roosevelt.

Over 4,000 visits have been made at the building since entering the new quarters, on Oct. 16th; six men have been helped to positions and thirteen directed to boarding houses. The membership now numbers 468. The Night School is a most encouraging feature, there being now 114 students enrolled. HORSE TRADE CASE.

A question affecting a horse trade was heard before Mr. Justice Hutchinson in the Superior Court yesterday. F. W. Norman, of Montreal, is suing Loftus Lodge, of Danville, for the sum of $110. It appears that the defendant had a horse to sell and gave it to Mr. Baker to sell for him. Mr. Norman was attracted by the horse and looked him over. The local veterinary surgeon was in camp at the time, and the plaintiff said he would take the horse provided the veterinary would pronounce him sound. On the return of the veterinary he examined the horse and pronounced him as suffering from a lame hip. It was also brought out that when Norman took the horse he noticed the lameness, but Mr. Baker said that he could have it examined and if it was pronounced lame that he could have his money back.

Men's Overcoats

Last week we called your attention to the special line of Men's Overcoats in our Ready-to-wear Department, and again we would emphasize the STRONG points of our range for the winter season.

Our garments are just a little different from the ordinary—in fact they are the extraordinary kind—both in the way they are made up and the class of goods that enter into the manufacture of same.

Every kind of Overcoat that fashion decrees are at your service. The swell ulster made from the Swagger Scotch Tweeds; the Newmarket; the French Form Fitting and the Paletot, all correctly tailored and perfect fitting.

We invite inspection and comparison—price, quality and make.

RUMMAGE SALE IN AID OF FUNDS BEING HELD—A GOOD WORK WHICH DESERVES SUPPORT.

The rummage sale in aid of the Young Women's Christian Association now being held in the Long block, Wellington street, is receiving good patronage. The receipts up to last evening were about $50. The sale will continue to the end of the week and will be open Friday and Saturday evenings.

There have been quite large contributions of rummage, but more is needed.

A more worthy object than that of the Y.W.C.A. can scarcely be found. The Sherbrooke Association, though organized but a short time, has found a great field of usefulness. It now has between twenty and thirty rooms in two buildings, one on Wellington street and the other on Court street, which are let at the lowest possible charges for the most part to young girls from the country around Sherbrooke who have come to the city in search of work or who are here serving an apprenticeship in some of the shops or learning shorthand and typewriting. Already the demand is greater than the Association in its present limited quarters is able to meet. The expense of keeping up rooms in two establishments is also heavy. The present aim is to raise funds which will enable the Association to undertake the rental of an adequate building, which might be run more economically than the present two establishments and at the same time with greater results.

Philanthropic people in Sherbrooke and throughout the district will find in the Y.W.C.A. an object worthy of their practical support.

CHINA STILL SLUMBERS.

JAPANESE REGARD FOREIGNERS INCREASED FEAR AS A RIDICULOUS NIGHT-MARE.

London, Nov. 14.—The Tokio correspondent of the Telegraph says that the Japanese authorities and newspapers ridicule the theory fostered in Europe that China is awakening to such an extent as to become a menace. The admiration some foreign critics displayed at the recent amnoeuvres of the Chinese army are regarded as ludicrous and superficial. It is certainly not shared in by the Japanese officers who were present. Any increased fear abroad of the yellow peril, based on the remoulding of the Chinese army on western lines, is a ridiculous nightmare.

AND JAPAN?

London, Nov. 14.—According to the Telegraph's Tokio correspondent, the fact is commented upon that in the recent competitive examinations at Pekin for Government appointments, Chinese students trained in America and Great Britain, defeated those trained in Japan. The reason is that a full curriculum is compulsory in America and England, while superficial studies are permitted in Japan.

THE CANADIAN HOCKEY SITUATION.

(Montreal Gazette.)

Professionals and amateurs may play upon teams of the Eastern Canada Amateur Hockey League without prejudice to the amateur standing of those who will play the game for the pastime.

The action of the Canadian Amateur Athletic Union upon this, or any other matter, will be ignored, the league having set itself upon record as competent to manage its own affairs.

Lists of players of each team must be submitted to the league showing what players are professional and what players are amateur in each organization. These lists are to be given to the press.

The National Club was refused membership in the league.

A plan of league extension is under consideration, and a committee was appointed to go into the matter.

It was decided not to have paid referees, but a board of unpaid officials will be appointed by the league.

There was a disagreement relative to the schedule and further action upon dates was deferred until November 24.

The foregoing is a resume of the transactions of the E.C.A.H.L., at the annual meeting, held Saturday in the Windsor Hotel. At this meeting officers were elected as follows:

President — F. L. McRobert, Victorias.

First vice-president—D'Arcy McGee, Ottawa.

Second vice-president—Gordon Blair, Quebec.

Hon. Secretary-treasurer — Emmett Quinn, Shamrocks.

Representatives—H. J. Shaw, Montreal, and James Strachan, Wanderer.

Committees were appointed to consider the expansion of the league, and to draw up in proper form the various amendments submitted and passed at the annual meeting. In addition, this latter committee will go over the by-laws and rules of the game, and make such suggestions for changes as is considered necessary.

FRENCH WOMEN AND THE ENGLISH

COMPARISONS EVOKED BY THE BOOK OF PIERRE DE COULEVAIN.

Pierre de Coulevain, the French authoress, is one of the few, if not the only one of her countrywomen who has invaded England and then given the world her impression of the English, which on the whole is favorable, if not comprehensive.

And in turn, in reviewing her comments, the English critics give their views of the women of both countries. A French woman never understands an English woman's point of view. How can she? The French woman as a nation, is convent bred. For centuries the discipline, training and seclusion of the convent are behind her. She knows no liberty until she leaves the convent, generally to be married immediately, and she seldom, even as a married woman, travels. Women of the highest rank, as well as humble mortals, seldom know any country except their own. Their lives are spent among their chateaux, going for the season to Trouville, Dinard, Aix and back to Paris. The English woman lives only a less free life than the American from her girlhood. She travels; she sees the earth as well as the world. In sport the French women never excel. They imitate the English in their "tailor-mades" and "tennis," "la sport" and "fief o'clock," as they call afternoon tea, but it always obviously an imitation. And in character they are as wide apart as the poles.

The French woman is shrewd; she generally is the cashier in her husband's office or shop, or the financial manager of his estate. She is narrow, cold, and, while loyal to her family and self-sacrificing, her affections are not deep. She does for those who belong to her because she does not want others to have what she can get. Life in France teaches the Anglo-Saxon how very small the French can be. The English woman is naturally affectionate. She isn't thrifty, and she generally allows her heart to rule her life. She takes the wide view of existence suggested by outdoor life, her open windows and being a "good sport." The Frenchwoman is truly her husband's helpmate; the Englishwoman is his friend and companion.

THE RISE OF CHAS. E. HUGHES.

ALWAYS STEADY; BUT FAME CAME SUDDENLY—STORY OF NEW YORK'S NEW GOVERNOR.

Washington, Nov. 13.—Far as the poles asunder in most respects, Chas. E. Hughes, the newly elected governor of New York, and William Jennings Bryan, are alike in that both awoke one morning to find themselves famous. True, it was not the same morning, for the meteoric career of Bryan dates back to the Democratic National Convention, while New York's governor-elect did not get on the front page of the newspaper until the insurance investigations of last year, when he made a name for himself by his incisive methods of getting at the facts. This story was told the other day by a New York lawyer of the debut of Mr. Hughes in the metropolis :

"Twenty years ago Charles H. Hughes was 'on the floor' in a downtown law office. By that phrase 'on the door' is meant the clerk in the office whose desk is nearest the entrance and who acts as the buffer between the members of the firm and the outside world. The man 'on the door' sees the visitors that no one else wishes to see, and attends to such clerical work, as is assigned to him when he is not explaining to callers the impossibility of seeing whom they ask for. Young Hughes came into this office one day with a letter from an up-country judge to the head of the firm. The latter was out at the time, and one of his associates read the letter, which spoke in unusually high terms of the abilities of the bearer. Hughes desired to become a law clerk in this firm. His clothes showed very clearly that he was from up the country. They were home-made and his trousers were broad at 'the bottom, like the sailors wear, and enough to show some good old-fashioned woollen socks, of the home-knit variety. His appearance was not a card in his favor, but the judge had written him such a strong letter of recommendation that he was offered the desk 'on the door' at a salary of $10 a week and accepted it gladly. Several hours later the head of the firm returned and noticed the country boy in the outside office. When he reached his sanctum sanctorum he demanded of his associate in a rather sharp tone, 'What, in heaven's name is that out there "on the door"?' When Hughes's identity was vouchsafed to him and he had read the letter from the up-country judge he dismissed the matter with the remark to his associate : 'Well, fill up the office with freaks if you like, but try and persuade this latest acquisition to make the acquaintance of a tailor as early as possible.'

"Some five years later 'the latest acquisition married the daughter of the head of this firm. Next year they will be the governor of New York and Mrs. Hughes. From the day Hughes entered that law office he made good. His discovery by the public may have been sudden, but his success in the investigation of the insurance scandals last year was made possible by twenty years of constant work and study."

BLOWN OUT TO SEA IN A LITTLE VESSEL.

FIVE MEN ARE LOST ON THE BROAD ATLANTIC FOR 14 DAYS WITHOUT CHARTS OR FOOD.

New York, Nov. 14.—Blown out to sea by a succession of gales, without charts and without food and water, the five men comprising the captain and crew of the Nova Scotian schooner the A. M. Lewis were lost on the ocean when their signal of distress was made out by the Armenia, of the Hamburg-American line on Wednesday morning.

Though their vessel was in good condition, in spite of the severe mauling she had received from wind and waves Captain Simon Butler, the skipper, did not know where he was, according to First Officer Koldeweg, of the Armenia, which arrived Saturday, and he and his men were starving.

"We had reached a point in latitude 41 degrees 53 minutes north, longitude 63 degrees 29 minutes west, or about two hundred miles off the coast of Nova Scotia, he said, "when we made out a small craft flying a signal of distress. We stopped and from her side a small boat containing two men put out for us. They made slow progress, and when they came on board the reason was apparent—they were almost starved.

"They said that their vessel, which belonged to St. Margaret's Bay, had started for that port from a little place down the coast fourteen days before. Encountering heavy gales one after another, she had been blown away from the coast. Their provisions and water had practically given out after the fifth day, and since that time they had had hardly anything to eat or drink, two biscuits a day being the size of their ration until the last two days, when they had absolutely nothing to eat.

"We gave them something to eat immediately and put in their boat all the food and water it could carry and gave them some charts. Their vessel should have reached a port by this time."

NURSE TO WED A MONTREAL MILLIONAIRE.

MR. AND MRS. BURLAND WILL SPEND THEIR HONEYMOON IN CALIFNORNIA.

Montreal, Nov. 14.—The marriage of Mr. G. B. Burland, President of the British American Bank Note Co. takes place Thursday evening at the home of the bride, Miss Hilda Beard. After the ceremony the couple will leave for California. The bride to be is a nurse who recently attended the groom through illness.

$250,000 BLAZE ON RIVER FRONT AT MOBILE, ALA.

Mobile, Ala., Nov. 14. — Fire early Monday along the river front destroyed the saw mill plant of Hierenymus Brothers and the mill of the Mobile Hardwood Co. Several other buildings were damaged. The loss is estimated at $250,000. Traffic over the Louisville and Nashville, whose tracks are along the fire scene, was blocked for several hours.

MILLIONS FOR THE NEEDY.

MRS. SAGE TO DO ALL SHE CAN FOR UNFORTUNATES.

New York, Nov. 14.—Mrs. Russell Sage will give away the bulk of the fortune of about $80,000,000, bequeathed to her by her husband, the financier, to individuals whom she considers worthy. It will not be given to endow churches nor to those who write begging letters.

"I shall keep only sufficient of the fortune left to me by my husband to live quietly and comfortably," Mrs. Sage said the other day. "The fact that churches are endowed put them beyond the necessity of work, thus making them indifferent and negligent along the lines where Christian institution should do the most good. I mean to give to those individuals whom I think worthy. When I have left only enough to live comfortably perhaps I may not be annoyed by persons indelicate enough to beg for help, as I am now.

"I wish to help men and women of the higher or lower walks of life, who, through no fault of their own, are so unfortunate as to need assistance, and too proud to ask. Such persons I deem it a pleasure, a privilege and duty to aid. Persons who were faithful and kind to Mr. Sage will be remembered, and I know he wished me to do so. In all my plans I am carrying out his desires, I am certain."

Mrs. Sage said she would do all she could, however, for struggling churches and institutions devoted to the care of the needy and sick.

SAYS PRINCE RUPERT IS SPLENDID HARBOR.

INSPECTOR OF AGENCIES BREDT RETURNS FROM NORTHERN TRIP.

(Victoria Daily Colonist.)

P. M. Bredt, of Regina, Dominion Government inspector of agencies and foreign colonies, accompanied by Mrs. Bredt, arrived in Victoria yesterday after attending the New Westminster fair.

In the fall of last year Mr. Bredt visited the coast for the benefit of his health impaired by too close application to the arduous duties of his office and made his headquarters in Victoria. The balmy climate of this Island had its customary effect and in a few weeks Mr. Bredt was sufficiently recovered to make many excursions among the Island, taking notes of its conditions and advantages; and among other functions, he attended the Cowichan Agricultural exhibition at Duncans, where he acted as one of the judges, afterwards taking a sea trip up the west coast as far as Port Simpson.

"My opinion of Victoria and its surroundings," said Mr. Bredt, "is sufficiently expressed by the fact that I have taken the earliest opportunity of coming back again to spend my summer holiday with you and that I have brought Mrs. Bredt this time to share my enjoyment. I have this year repeated my west coast trip, this time extending it as far as Skagway. It is certainly the most picturesque country one could imagine. We were delighted and surprised at its grandeur, it is like several Norways in one wonderful panorama. Among many other changes for the better that I noticed was that of the improved conditions of travel. The boat in which we made the trip was commodious and comfortable, luxuriously fitted with the latest improvements with the additional recommendation of good cuisine and attendance, a good seaboat, a genial commander and pleasant and capable officers. We

ENJOYED THE TRIP IMMENSELY

and were fortunate enough to have as fellow passengers, President Hayes, of the Grand Trunk Pacific railroad. We had thus the chance to visit Prince Rupert. In my opinion it is an ideal location for the terminus and the harbor is unsurpassed on the coast. At present the hydrographic survey is still incomplete and mariners enter for the first time with natural caution but once having made the entrance they say that they would have no fear about entering at any time. While we were there the weather was very stormy with a nasty sea running outside. Inside, however, it was perfectly calm, the position being well protected from the prevailing winds.

"Certainly," continued Mr. Bredt, "there is room there for a great city, and Digly island would make an ideal suburb or summer resort. Communication would have to be by ferry, I think, though the dividing passage is narrow and the distance short; not greater than between North Vancouver and Vancouver city, if as far; it would be practically a part of the city.

"There is plenty of activity in evidence at Prince Rupert; houses for the engineers are being rapidly constructed and gangs of men are busy clearing land for the township. Already there is a very serviceable wharf which they intend to extend immediately, and everything seems to point to quick development. * * * * * * * * *

WIND ANCHORS THE LATEST AT NEW YORK.

TALLEST BUILDING TO HAVE SOME ODD FITTINGS TO HOLD THEM FAST.

New York, Nov. 14.—The Singer building, now building on Broadway, near Liberty street, which will be 625 feet high, the tallest skyscraper in the city, is to have wind anchors so that it may be firmly braced against every gale.

The wind pressure, on account of the structure's great altitude, will be tremendous, and for that reason the building is to be literally tied to its foundations by an ingenious arrangement of steel rods. They will be three and a half inches in diameter and descend for nearly fifty feet into the concrete which forms the caissons resting on solid rock 85 feet below the curb. The lowest rod has on the end of it a great anchor plate to which it is secured.

The new great airship, Ville de Paris, owned by M. Deutsch, has been wrecked at Sartrouville. A guy rope became entangled in the tree tops. The motor and car were smashed. Nobody was hurt.

COURT NEWS FROM SWEETSBURG.

(Continued from page 1.)

other side, so that the action having been taken nearly ten years ago, after several years of hesitation, was submitted to the Court in November of last year, and judgment has just been delivered. Several lawyers have been acting in the case, and they had to study a dozen of the old statutes of the first years of the reign of Queen Victoria, as well as perusing an indefinite number of exhibits, old books and documents. It is likely that the case will go to appeal, and the end is not near yet probably.

Judge Lynch declined to sit on the case, as he had expressed an opinion over it, whilst he was practicing solicitor as well as member of Parliament. It is the reason why the case was heard and decided by Mr. Justice Doherty.

NOTES OF THE NEWS.

The Parliamentary Naval Commission of France has approved the building programme for 1906, under which the construction of six battleships will be begun this year. Three of the ships are in course of construction.

The Kaiser has again made a change in the uniforms of the military officers. On certain occasions when those of exalted rank must don gold epaulet instead of silver ones, and officers of lower rank red epaulet instead of blue.

The collectors of customs throughout Canada have been advised that the duties of customs, if any, collected on goods of Japanese origin entered in Canada since 12th July, 1906, in excess of the duty payable in respect of like goods under the French Treaty Act will be refunded pending further legislation on the matter.

APPOINTED PASHA OVER FIFTY MILES OF TERRITORY.

Paris, November 14.—A despatch from Tangier says that the Sultan has appointed Raisuli pasha of the city of Arzila and the neighboring provinces, thus giving the former bandit authority over fifty miles of territory between Tangier and El Araish, which is only forty-five miles southwest of Tangier. Raisuli has invited his friends to attend a feast that he is to give at Zinat, his home town.

Daily Market News

MONTREAL LIVE STOCK SITUATION.

Montreal, Nov. 14.

At the Montreal Stock Yards at Point St. Charles Monday morning the supply of cattle for local consumption was larger than it has been of late, but the offerings of sheep, lambs, hogs and calves were smaller. A feature of the trade was the excessive supply of cattle, which had a depressing influence upon the market, and prices declined ½c per lb. There was a good demand from butchers at the reduction and an active trade was done. Choice beeves sold at 4c to 4¼c; good at 3½c to 3¾c, fair at 3c to 3½c, common at 2½c to 2¾c, and inferior at 1½c to 2c per lb. The market for sheep and lambs was very firm on account of the smaller offerings and the good demand for the same. Sheep sold at 4c to 4½c and lambs at 5½c to 6c per lb. A fairly active trade was done in calves, but as none of them were of choice quality, sales were made at 2c to 3½c per lb. There were no new developments in the hog situation, except that the undertone to the market was steadier, on account of the smaller supplies and the good demand from packers for the same. Sales of selected lots were made at $6 to $6.12½ per 100 lbs., weighed off cars

AT THE EAST END.

The offerings of live stock at the East End Abattoir market were 2,500 cattle, 500 sheep and lambs, and 300 calves. The supply of cattle was largely in excess of the local requirements and between 500 and 600 head were left over unsold at the close. This means that if many more arrive later on in the week that prices for the commoner grades will likely be depressed still lower. The demand was good today and especially so for the best stock, but other kinds moved rather slow. Choice beeves sold at 4c to 4¼c, good at 3½c to 3¾c, fair at 3c to 3½c, common at 2½c to 2¾c, and inferior at 1½c to 2c per lb. There was an active demand for sheep and lambs, and prices ruled firm. Sheep sold at 4c to 4½c and lambs at 5½c to 6c per lb. The supply of calves was fair for the season, but the quality was generally common to fair, and sales were made at 2c to 3½c per lb.

FOREIGN REPORTS

London, November 12— There was no market at Deptford today, but sales of American cattle on Saturday were made at 13¼c, and Canadians at 12½c, which figures are ¼c lower than last week.

Liverpool, November 12.— An easier feeling has prevailed in the market for Canadian cattle and sales today were made at 11½c to 12c, and ranchers at 11c, which prices show a decline of ½c compared with a week ago.

GARTER FOR KING HAAKON.

INVESTURE AT WINDSOR ATTENDED WITH GREAT POMP AND CEREMONY.

London, Nov. 14.—King Edward last night invested King Haakon of Norway with the Order of the Garter, at a special charter held in the throne room of Windsor Castle. The investure was attended with great pomp and ceremony. Although knights of the order are elected from time to time as vacancies occur, there has not been an investure like the one of yesterday since 1855, when the late Queen Victoria conferred the honor upon Napoleon III. and Victor Emmanuel, then King of Sardinia. King Edward is the only surviving member of the royal house of Great Britain who participated in that historic event.

Queen Alexandra, as "the Lady of the Order," whose predecessor lived two centuries ago, was present last night. The brilliant colors of the gorgeous robes of the knights and knight commanders of the order, as well as the richness of the decorations of the historic chamber where the investure took place made the scene one of the most brilliant and impressive of the present reign. The ceremony was followed by a state banquet.

The "La Rive" Glove

The enormous demand for long Kid Gloves that arose last Spring and is still in existence, has had a very serious effect on the price of the raw leather, and consequently on wrist gloves.

In spite of this, we are still selling the "La Rive" at its former price.

The quality is unimpaired—we vouch for that—each pair is worth every cent of $1.75, our price, however, is **$1.25**.

3 Pairs of Hose for $1.00

This is a line of Cashmere Hose we always carry, and there are two special points to it—quality and variety.

There is never a pair of stockings in the whole lot worth less than .40, and from that figure the values run up to .50 and even .60 a pair. It is not confined to any one kind—on the contrary—the variety is so great, that any taste can be satisfied.

FOUR YEAR-OLD BOY PLAYED WITH MATCHES.

HE WAS FINALLY BURNED AND BABIES HAVE A NARROW ESCAPE.

Dalhousie, N.B., Nov. 14.—The wife of Paul Savoy went out for some groceries, leaving three children at the home, two babies in a cradle and a boy of four years, who was left out of doors with orders to remain there till his mother's return. Immediately after her departure the little boy entered and climbing on a chair secured some matches. With these he set his clothing on fire and was found in a hopeless condition when the mother returned. Mrs. Savoy saved the two babies, although the fire had already reached the cot, but all that could be done by medical aid could not save the lad, who died two hours after.

SWISS ARMY IS THE IDEAL.

The Swiss army is one of the most remarkable of her political institutions. It is the ideal toward which the common people of every European country, weighed down with taxation to support huge standing armies, turn with longing and hope.

According to the Arena the Swiss system of militia saves millions of money to the taxpayers and gives years of freedom from military service to the soldiers.

Practically all Swiss serve from the age of 20 to 50 in the militia and reserves. The raw recruits go into the schools, the infantry for 45 days, the cavalry for 80 days.

After this the cavalry serves 16 days each year and the infantry and artillery 14 days each every other year. The reserves serve only five or six days every four years. The officers, of course, are carefully trained in good schools for a period of years.

This short service would be insufficient were it not preceded and supplemented by military training for boys in school and rifle practice every year by practically all Swiss citizens. Target shooting is the national sport and in accordance with the law a place for target practice must be supplied by every town in the country. As an encouragement prizes of all sorts are offered by the national government.

Thus little Switzerland, with a population of less than 3,000,000 of people, has an army of 337,000 of the most martial soldiers of Europe, armed, equipped and ready to take the field at a moment's notice.

SWINDLER CAUGHT AFTER 2 YEARS

EDWARD CLIVE, WANTED IN MONTREAL, IS NOW BEING HELD BY LONDON, ENG., POLICE.

Montreal, Nov. 13.—Edward Clive, alias Fraser, for whom the police of this city, New York, Baltimore, Philadelphia, and London, Eng., have been searching for a couple of years, is now under arrest in London, Eng.

Chief Detective Carpenter received a cablegram from London on Saturday stating that Clive was under arrest there, and asked for information about him and for what charge he was wanted here.

It will be remembered that Clive is the man who was arrested in Baltimore on a charge of swindling an English woman and her daughter in this city out of about $2,000 in money and jewels, and while he was being brought to Montreal to answer to the charge, he escaped from the Baltimore detective who had him in charge by jumping from a New York Central train just after it left the 125th St. station in New York.

The detective came on to Montreal with about $40 in cash and a small quantity of jewellery that had been found on Clive when he was arrested. When he returned to Baltimore he was dismissed for having allowed his prisoner to escape.

Clive had induced the English woman whom he swindled here to come over from London to marry him, and promised that he would secure her daughter a good position on the stage in America. When the mother and daughter arrived on one of the Allan line vessels, he met them at the dock and took them to a fashionable boarding house in the west end. The same night he took them to His Majesty's Theatre. On their return from the theatre to the boarding house, Clive induced the mother and daughter to give him their money and jewellery to lock in the safe at his hotel, as he did not think it would be safe for them to keep it in the house. They did so. He was to have been married to the mother the following day, but they have not seen him since.

The case was reported to Chief Detective Carpenter, and a short while afterwards Clive was arrested in Baltimore.

Clive was originally a Scotchman named Fraser, but has changed his name many times. After being released at Belfast, where he was serving a term, he went to England, leaving his lawful wife in Ireland. He travelled over England a great deal, and later he went to New York.

From New York he went to Philadelphia, where he married a woman under the name of Gilbert. Then he came to Montreal to meet the English woman and her daughter by appointment. He was to marry the mother.

There was another woman in the case at this period, one whom he was to have met in New York. When the New York woman found that Clive did not turn up, she went to the British consul of that city and had enquiries made concerning him, and found out that he was a swindler.

It is not likely that Clive will be brought back to Montreal, as the police have not the money necessary to pay the expenses of extradition. It would cost between $250 and $300 to bring him back.

BOOM IN MAINE ABANDONED FARMS

MAINE ALARMED; SEES DANGER TO AGRICULTURE.

Augusta, Me., Nov. 14.—The buying of abandoned farms by city people who convert them into summer places has assumed such proportions that it has been called to the attention of the agricultural department of the State. Commissioner Gilman, who has investigated the subject states that he does not think it will be a good thing for the agricultural interests of Maine, as it would naturally reduce the total output of the State. In recent years hundreds of rich New York and Massachusetts people who visit this State in the summer have bought up farms and occupied them during the summer only, cultivating only such land as they wished for the raising of flowers and garden vegetables. This policy is not in line with that advocated by the agricultural department. Vigorous efforts have been made, aided by the authorities of the University of Maine, to interest rural communities in the possibilities of farming and fruit raising. Trains have been sent throughout the country bearing lecturers who gave talks to the farmers on scientific agriculture and attempted to stimulate interest by distributing literature on the subject. The movement met with a cordial reception, and as it is backed up by the National Agricultural Department at Washington, the use of so many farms merely for summer idling is looked upon with some disfavor by many agricultural enthusiasts.

LONG CHASE OF WIFE.

RUN DOWN BY HUSBAND— KILLS TWO CHILDREN AND HERSELF.

Geneva, Nov. 14.—A tragic sequel to a divorce case took place at Blankenburg, in the Canton of Berne Saturday.

Five months ago a merchant of Cassel, Germany, named Schopfwinkel, secured a divorce from his wife, and was awarded the custody of his two children, aged 1 and 5 years, respectively.

Before he could secure the children, however, the mother fled from Cassel, taking them with her. For five months Herr Schopfwinkel and a detective pursued her all over Germany and Switzerland, and at last found her living in apartments at Blankenburg.

When Schopfwinkel and the detective, accompanied by a local gendarme, entered her apartments Saturday morning they found Mme. Schonfwinkel and her two children lying in bed, shot through the heart.

Lying on the table was a note in which the wife declared that she was "as innocent of the charge against her as her babes." She had killed them, and then committed suicide.

Dan Wilson states that he is willing to box Fred. Routhier at any time and at any place at 150 lbs., and for any side bet that he wishes to put up.

$10,000,000 FOR POOR.

MEXICAN MINE OWNER ANNOUNCES GIFT.

Galveston, Texas, Nov. 14.— From Palralal, State of Chihuahua, Mexico, comes the story that Pedro Alvarado, the young owner of the Palmillo mine, whose wealth is said to be in the hundred millions, announces a public benefaction of $10,000,000 to the poor Mexicans. Since his rise from a peon to a Croesus in eight years he has given away millions to the poor and for churches and schools. His plan is to build homes for the poor, educate their children and give the land upon which to cultivate crops. He has been working on the plan of distribution of the ten millions for many weeks. Alvarado is the man who some time ago offered to pay the Government debt of Mexico but the offer was declined because President Diaz was advised that it was a political move to entangle his administration. The young mine owner says he will renew his offer to President Diaz in person upon his visit to the city and assure the general that his offer is from the heart and that there will be no hereafter to the gift to his country. Alvarado says he expects to die poor, but to share his wealth and happiness with his less fortunate countrymen while he lives.

PEARY TO TRY AGAIN IN 1907.

PRAISES QUALITY OF HIS SHIP, ROOSEVELT.

Bucksport, Me., Nov. 14.—Commander Robert E. Peary, who is returning to the United States with the record of the "farthest north," will make another attempt to reach the North Pole in 1907. The explorer's ship, the Roosevelt, was built in this town, and it is recalled that when Commander Peary was here he said that if he did not succeed this year he would make another attempt in 1907, provided he did not lose his vessel. Despatches from Commander Peary speak highly of the ice-fighting and seaworthy qualities of the Roosevelt, and the local ship builders think that with a few repairs she will be ready to make the trip north next season.

THE CRANBERRY.

The history of the cranberry can be told on a bit of parchment no larger than the fruit itself, but to judge its interest by its length would be like ranking the berry's importance by its weight. The cranberry, to begin with the day of its christening, was so named because its sponsors fancied that its bud resembled a crane; and in truth, just before the bud expands into the perfect flower with steam, calyx and petals, it resembles the neck, head and bill of that ungainly bird. Hence it was originally dubbed the "cranberry," popularized into cranberry.

It gradually worked its way out of obscurity until to-day the cranberry occupies a place of no mean industrial importance in the community; yearly it adds to the wealth of our nation all the way from $3,000,000 to $4,000,000. The family is exceedingly prolific, 1,300,000 bushels being produced in the United States, leaving Europe far behind in quantity as well as quality.

"KICKING THE BUCKET."

When a person dies nowadays, we say in common parlance that he "Kicked the bucket." The origin of this phrase is unusual.

It alludes to the way a slaughtered pig is held up by a bent piece of wood, technically called a "bucket," being fastened behind the tendons of its hind legs in order to suspend the carcass. Other authorities assert that "Kicking the bucket" originated from method of committing suicide by standing on a bucket while adjusting the noose, and then kicking the bucket away.

THE WHITE FEATHER.

An official of the Smithsonian Institution was speaking of the origin of some well-known phrases, and pointed to a small mounted bird. This bird was a French grey on the back, drab breast, black wings, and with a small but conspicuous white spot at the base of the tail.

"That is the wheatear," the official said. "It is very common in Scotland, where it is known as the "clacharan." It is from this bird that we get the expression, "Showing the white feather." You will notice the location of the only white feathers on the body—they can be seen only when the bird is flying away from you."

HUSBAND SEEKS REFUGE BEHIND BOLTED DOOR.

WHILE HIS WIFE WHO MOURNED HIM AS DEAD, SITS ON DOOR STEP.

Brussels, Nov. 13. — Mme. Lebourgeois is besieging the house in which her husband lives at Dunkerque.

About four years ago M. Lebourgeois who lived at Havre, went out for a walk and never returned. A few months later a man's body was dragged from the Seine, and Mme. Lebourgeois recognized it as her husband. The body was buried with due ceremony, and mass was said for his soul.

Last month a Havre merchant went to Dunkerque on business, and met there his old friend, Lebourgeois, who was in the best of health, in the company of a pretty young widow.

The merchant, on returning to Havre, told Mme. Lebourgeois of his discovery, and she promptly followed her faithless husband to Dunkerque. For the past two weeks she has been sitting on the doorstep at the house in which he is living. Both sides up to the present have assumed a passive attitude, the husband contenting himself with sitting behind the bolted door.

SCARED BY SPOTTERS.

INTERCOLONIAL EMPLOYEES DO NOT LIKE TO BE WATCHED.

Sydney, N. S., November 13. — The spotters are again becoming active on the I.C.R., and there is much indignation among the employees. The system was first inaugurated about three months ago, and, as a result, one of the oldest and most popular conductors on the road was suspended. It has been persistently rumored that he is to be reinstated shortly, and that there is no justification for his removal, the management having caused his suspension in order to scare other conductors and prevent misappropriations if there were any in the service. Until Saturday it was generally believed among the employees that the spy system would not be resorted to again, but the unexpected appearance of one of the spotters dispelled that impression. As the train pulled out of New Glasgow he bobbed up serenely and took charge of a train, checked it up, and dropped off at Point Tupper. There was considerable excitement along the line when it became known, and the episode was freely discussed among passengers and at different points along the line, where it had been wired ahead.

ITALIAN PRINCESS MYSTERIOUSLY DISAPPEARS,

REPORT THAT SHE COMMITTED SUICIDE IS NOT CREDITED BY FAMILY.

Milan, Nov. 13.—Some days ago the Italian newspapers stated that the Countess Paolina Barni Corrado, of Bergamo, aged forty-three, wife of Count Carlo, and mother of five sons, committed suicide by throwing herself from the railway bridge near Paderno into the River Adda, a height of more than 250 feet. The corpse of the countess has not yet been found, and people say that she did not commit suicide, but escaped from her family. Some think she has retired to a monastery. The Countess Barni, before disappearing, lived at the Villa Delizia, near Bergamo. Here her daughters are always waiting the return of their mother, as they do not believe she was guilty of suicide. A patrician family accused the countess lately of misconduct against her daughters, but this is not believed to be the cause of her suicide. Before disappearing the countess borrowed $500, and she also carried away some family jewels, so that her suicide is inexplicable.

WOMAN IS A LEPER.

PITIABLE STORY OF SUFFERING OF MRS. F. E. CROWELL.

Honolulu, November 13.—A pitiable story of a woman's misery for years came to light this week when Mrs. Flora E. Crowell was arrested and held for investigation as a leper. If the charges against her be proved she must go to the Molokai leper settlement for the rest of her natural life.

She is the daughter of John A. Cummins, once minister of foreign affairs under King Kalahana. Her mother was a Hawaiian. She married a native Hawaiian and had one child. When the child was five years old she developed symptoms that resembled leprosy. To avoid her transfer to Molokai she agreed to go to Japan and never return. This was six years ago.

Soon afterward those who had agreed to send her an allowance failed to do so, and she returned here and took up her residence in her mother's home, where she had a secret room, to which she retired when anyone called. She lived thus and cared for her daughter, till her mother's death recently. Then she was spirited to another island, but those who promised to provide for her failed to do so, and starvation drove her out. She is heir to about $10,000.

ITALIAN WARSHIP ARMOR.

PROTEST AGAINST PLACING ORDER WITH A PENNSYLVANIA FIRM.

Rome, November 13.—A committee from the City of Terni, headed by the mayor of that place, has come to Rome to protest against the placing of an order for armor plate for an Italian man-of-war with the Midvale Steel Company of Pennsylvania, and has been received by Premier Giolotti. The Premier explained that the Government was desirous of protecting and favoring national production, but not against the interests of the State, and that natural production must put itself in condition to stand foreign competition.

A report from Constantinople says that the Porte has replied to the joint note of the embassies accepting all the conditions incidental to an increase in the customs'

HEALTH OF THE WORLD'S ARMIES

REPORT OF SURGEON-GENERAL O'REILLY, U.S.A. PUBLISHED.

Washington, D. C., November 14 — The report upon the work of the Medical Department of the United States Army by Surgeon-General R. M. O'Reilly, which has just been made public, compares the health of the different armies of the world as far as possible in view of the different conditions in each army. The United States and Great Britain are the only countries whose statistics include that part of the army serving outside the home country. Many of the countries have a low death rate because their sick are promptly discharged or retired and die out of the service instead of on the sick report.

The highest rate of admission to the sick report is held by the Dutch army whose rate is 13.21 per thousand men, with the American army ranking second with 12.95 and the Russian army having the lowest rate of 3.48 per thousand men.

The British army ranks first in the death rate, with 7.13 deaths per thousand men, the American army having the next lowest, 6.28. The Prussian army has the lowest rate, 2 per thousand men.

An important factor in judging the relative healthfulness of the different armies is the duration of each case of sickness, the American army, according to their standard, excelling all others except the Dutch and Bavarian The average duration of each case in the United States army was less than one-half of that of the British and a little more than one-half of the Spanish army.

The surgeon-general states that the total number of admissions to the sick report during the year was 73,742 equal to an admission rate of 1,295.97 per thousand men, compared with 1,354.89 for the previous year, and 1,903.31 for the semi-annual period from 1898 to 1903.

The death rate was also much better than for the previous year, there being 383 deaths from all causes, equivalent to 6.28 per thousand, as compared with 6.75 for the previous year, and 7.16 for the six year period.

Fort Niagara, N.Y., which last year had the lowest admission rate, this year occupies the same enviable position, and, in addition, had the lowest non-effective and discharge rates.

A comparison of the health of the colored troops with that of the white troops is given in the report, and with the exception of the death rate, all the other rates were lower for the colored troops than for the white troops. In speaking of the health of troops in the Philippines, the report says that all she rates, except the death rate for disease, were lower than in 1904. Tuberculosis alone caused nearly 50 per cent. of the discharges, and more than 20 per cent. of the deaths from disease. Again this year all the rates except the death rate were considerably lower for Filipino than for American troops. The death rate total and disease only was, however, much higher among the Filipinos. Undue prevalence among the Filipinos of tuberculosis and beri beri is given as the explanation for this.

Surgeon-General O'Reilly states that the medical department is very badly in need of officers, and that unless Congress comes to its assistance it will be impossible for the department to reach a high degree of efficiency or to escape a lamentable breakdown in the occurence of war. He says that it should not be postponed until war is imminent, as it requires years of time for the selection and training of medical officers.

WANTED HALE JURY TO BE FRENCH SPEAKING

UNUSUAL DEMAND MADE IN MANITOBA AND NEW JURYMEN HAVE TO BE EMPANELLED.

Winnipeg, Nov. 14.—A most peculiar obstacle has confronted the Assize Court. For the first time in ten years' history of the Eastern judicial district of Manitoba, the fact that the dual languages still prevail in Manitoba courts of justice was forcibly exemplified.

Charles Bernier, a French Canadian, residing in St. Boniface, was arraigned for trial for unlawfully wounding. Theo. Philerokyns and Joseph Bernier, counsel for the defence, demanded that as accused conversed only in French he had the right to have at least one-half the number of jurors familiar with his mother tongue. The court allowed the demand.

Thereupon there ensued a still further difficulty, inasmuch as there were no French-Canadians on the present panel. His Lordship, therefore, issued an order that when the new panel of petit jurors was called on November 22, the Sheriff should call enough members able to converse in the French language to get the necessary jury for the Bernier trial.

THREAT MADE BY THE CATHOLIC BISHOP OF LIVERPOOL.

London, Nov. 14.—Speaking at a great Roman Catholic mass meeting at Liverpool against the Education bill, the Catholic Bishop of Liverpool said the Catholic hierarchy had declared they would obey God rather than man, and it would be their duty, even through fines and imprisonment, to make the bill unworkable.
