Ten thousand chairs placed in the hall and galleries were soon filled and a very ample standing place in the aisles were occupied. Thousands gathered on either side of the hall, from which they viewed the platform. The Rev. Dr. Talmage made an eloquent prayer invoking the Divine blessing on the guests, directors and managers of the Exposition. President Arthur's address in English and French was being telegraphed to Washington, detailing the history of the Exposition.

NEW ORLEANS, Dec. 16.—The day of the inauguration ceremonies of the World's Exposition opened bright and cheerfully and the city and country were in a state of excitement. The morning to witness the long-expected event. The public and private buildings along the principal streets were gaily decorated with flags and bunting. The streets were lined with hundreds of orange trees bearing bending ripe fruit and to see the bright green of the leaves and the red and blue flower gardens. At eleven o'clock Gen. McCreary, of Louisiana, and Major General Grant, commanding the State Militia, with other distinguished New Orleans members of the State Legislature, foreign Consuls and guests assembled at the St. Charles Hotel. At the moment a large number of members of Washington Artillery, Continental Guards and the Garb of a century ago, and the Green Rifles, were formed. The procession, headed by the Mayor of New Orleans, moved through the crowded streets to the river, where a steamer was in waiting to convey the guests to the Exposition grounds. The guests were accompanied by the Mayor and other members of the committee. The procession was in high spirits and the music of the bands was heard through the streets. The guests were conveyed to the Exposition grounds by the Washington Artillery in a salute of 100 guns, and the guests were received by the Mayor and other members of the committee. man reaches the three-score-and-ten
period of life, he does not like to be told that
he is ageing. Sir John has been warned
about his age for five years and more, and
still he persists in living, and in looking
well, and in ruling the country. GLANSTONE
is seventy-five years of age, and the work
he accomplishes day after day is
the work of ten ordinary men.

Yet in England no one is
so rude as to tell the Hon. Sir John
Minister that he is old and that his
work is the work of ten ordinary men.
The fact is that Sir John's business is
no nonsense. When Sir John leaves the
house, the man to take his place will be
found. Such a man are always available
when they are needed. Meanwhile, we
have Sir John in the flesh, and in health,
and spirits. Let the most he made of
him. He was never better, physically or
intellectually, than he is to-day. Then
why worry him with impertinent references
to his age?

The banquet to-morrow night will
attract many hundreds. From Quebec there
will be a representation, influential but
not large. We may expect some good
speeches and a lively interchange of senti-
ment, and of self-glorification and compli-
ment no end. The practical aim of the
feast will be to congratulate the Premier
on the attainment of his new honours, and
his arrival at the fortieth year of his polit-
ical career. The reason of the celebra-
tion is not so easy to define.

A GOOD APPOINTMENT.
The Rev. Louis PAQUET will, we hear,
be appointed to fill the Principality of the
Laval Normal School, rendered vacant by
the death of the most respected Abbe LA-
GACE. The procedure in this case, we be-
lieve, is this:—The bishop nominates and
the Local Government appoints. Abbe
PAQUET does great credit to the posi-
tion. He is a gentleman and scholar of
excellent attainments, and as Professor of
Dogmatical Theology in Laval University,
his standing is deservedly high and mark-
ed. He is also an admirable executive officer
and well-versed in every way to dis-
charge the duties of Principal of an im-
portant institution like the Normal School.

WHY HE SHOULD BE MADE
TREASURER.
There is at least one man on this con-
tinent who wears his aims and motives on
his sleeve. He is a Georgian man, and
wants his friends to make him treasurer of
his county because he is in financial straits,
and wants one thousand dollars right off
with which to pay his debts. Says this
model, and at the same time, modest,
office seeker:—

"I am seeking the suffrages of my fellow-
citizens for the office of treasurer for this
purpose alone, and confidentially hope for
the support of such as are willing to see
things just as they are, and act accord-
ingly."

He ought to be elected. As affording a
precedent the scheme would be magnif-
icent.

HARMONY AND RELIGION.
(St. John, N. B., Globe.)
The New York Witness makes the rather
curious complaint, and the Montreal
Catholic voices it, that Roman Catho-
lics vote only for the Catholics.

Nearly all our worthy Protestant citizens
belong to some party, and no party is will-
ing to incur the displeasure of Roman
Catholic voters. Hence, many Protestants
are averse to taking any open part in favor
of missions to the Roman Catholics among
us. They can only subscribe, if at all,
anonymously. Probably there is another
reason. Not only regarding the feel-
ings of others, a recognition of the desire
to be treated as you would treat others,
probably has a great deal to do with it.

There are other things than "votes" which
should be considered in the short time
ago that Rev. Dr. Fulton, a clever, but
somewhat erratic, Baptist preacher in New
York, had announced that the time
had arrived when a special effort should be
made to convert the Catholics. Suppose the Catholics were
to turn the tables; and suppose the late
Presbyterian Council at Baltimore had declared
that the time had come when a special
effort should be put forth to convert the
Baptists, that subscriptions should be
taken up for that purpose, and that as a
result long lists were published announc-
ing the names of Catholics who had sub-
scribed for that purpose, would the Baptists
take that kindly? Well they might laugh
at the idea or they might not. But the
probability is that they would consider the
proceeding a gross insult, and that certainly
it would not be a proceeding at all calculated
to increase Christian harmony. We fancy,
therefore, that Protestant gentlemen in
New York, and gentlemen of all denomina-
tions everywhere, should be certainly
violating the courtesies of life if they were
to parade themselves in the newspapers as
giving large sums of money to convert in-
telligent fellow Christians from their par-
ticular form of worshipping God to the
form which they regard as correct. Per-
haps this is not the right way. Perhaps,
on the other hand, the best work of Chris-
tianity is done by a courteous recognition
of the feeling of our fellow countrymen
that the strongest conviction of truth upon
them were to enter as a Quaker meeting house
and tell the silent worshippers that their
method was wrong, and expect them to
be silent, and praise he would be speedily
"freed out" even by the peace-
loving Friends, and a callous magistrate
would unhesitatingly fine him, no matter
how strongly he might feel that he was
right by the Spirit. It is understood that
the right way to treat him, for the work of
civilization would come to a stand still if
the conventional rules and guards set up
unwisely by the ignorant society were
violated by persons who were not
supposed that the strength, depth and height
of their feelings implied to aggressive
war on the feelings and rights of others.

Sanitary.
A Bulletin paper makes a very sensible
statement in the danger of the ap-
pearance of cholera. It appeals to the city
fathers cautioning them from entering upon
any contract which will involve the break-
ing of the streets or disturbing of the soil any-
where, for the purpose of repaving or lay-
ing sewers. Excavations of every character
during the summer or fall months of the
coming year should be strictly avoided and
prohibited. Nothing should be done that
might endanger the health of the popula-
tion. The streets should be left undisturbed
to place it in a proper sanitary condition for the coming
season. What applies to Buffalo applies,
under circumstances, to every other
centre of population.—Ottawa Star.

of the City Council was held last night at
the City Hall.
An application was received for the supply
of water necessary for a skating rink at
the foot of the city. The water for the
same would be furnished on payment
of \$50.

subject of the water works has recom-
mended the appointment of W. Hoesack, Esq.,

has also recommended the appointment of
Mr. Hoesack as water works engineer.

Lectures by Hon. D. A. Ross.
The inaugural lecture of the season before
the Literary and Historical Society was
delivered by the President, Hon. D. A. Ross,
last night, at the Morris College. The
audience was very small, but seemed to enjoy
the intellectual treat afforded them very
much.

The subject was Edward I. of England and
Mr. Ross treated of it in considerable length,
dwelling particularly upon Edward's conquest
of Wales and wars with Scotland. His
remarks were interspersed with many inter-
esting anecdotes, and marked by pleasing
descriptions of persons and events. The
presentation of the Jews, with France
and King Edward's character were also
mentioned. Regarding the subject to
a certain extent was by Mr. Ross, from a
Scottish standpoint, his view of the
subject is most liberal and correct. He
regarded the King as a patriotic and beloved ruler
of his own country, a valiant and determined
warrior, and a public and clever statesman.

At the close of his lecture, an enthusiastic
vote of thanks was tendered the hon. gen-
tleman, on motion of Dr. Marston, seconded
by Mr. Geo. Stewart, Jr., P. K. S.
