KINGSTON, C. W.—The Chief Town of the United Counties of Frontenac, Lennox and Addington, is situated at the head of the River St. Lawrence, where Lake Ontario, the last link of the chain of the inland seas of Western Canada, together with the Bay of Quinte and the Great Cataraqui Creek, is united with the channel which conveys and empties their waters into the Gulf of St. Lawrence. It is one of the oldest settled localities in Upper Canada, and occupies the site of the French fort of Frontenac; was founded in 1784, and incorporated in 1838. Opposite the City are Wolfe Island and Garden Island; and between them and Kingston, a distance of three miles, lies the Bay, a beautiful sheet of water, forming a safe and commodious harbor for vessels of every draught. Additional and improved wharves have lately been constructed; which, together with those previously in use, renders it in every respect well calculated for an extensive shipping trade. Kingston, at no distant day, promises to be an important manufacturing City. Already the trade of shipbuilding has arrived at great proficiency. Sailing vessels and steamboats of every capacity are here built and fitted out with every requisite, ready for the Lake or Ocean navigation. The Marine Railway Co. has at different times built and fitted out vessels which have been loaded and sent direct from Kingston to England; and the largest steamboats that now navigate Lake Ontario and the River have been built and furnished with everything necessary at the same establishment. There are two shipbuilding yards in Portsmouth, a flourishing village within a mile of the limits of the City. The timber necessary for the construction of vessels—oak, pine, cedar, elm, knees, masts, &c.—is brought from the neighboring Townships; and the iron work, including every description of machinery for steamboats, &c., is furnished by the different foundries in the City. The sail and cordage lofts are kept well supplied; and in short, all the means and appliances for the complete outfit of every sized vessel are always ready at hand. Portable steam engines for mills and other descriptions of work are manufactured in Kingston; locomotives for railways, agricultural implements, stoves of every description, iron axles, cut nails, screw bolts, &c., &c. The Victoria Iron Works, of Messrs. Chewett & Co., situated on the corner of King and Queen streets, is the largest manufacturing establishment in the City. It gives employment to 75 men, and turns out per diem three tons of finished iron in bars, made from scraps; which is now taking the place of "Swedes," the latter having become a scarce and expensive article. The amount annually expended for "scraps," or waste iron, is about \$28,000; in the manufacture of which into bars and axles there are consumed 15,000 tons of coal, besides a considerable quantity of wood. In the axle shops, a ton of finished axles for carriages, with boxes, screw ends, and nuts complete, are made every working day, most of which find sale in Western Canada. There are also made here a large quantity of bolts, screws, &c., used in carriages; and the total aggregate weight of iron, axles, &c., manufactured annually, is estimated at 9,900 tons. There are several tanneries, one on a very complete and extensive scale at Portsmouth, four breweries, and a distillery (Morton's); the latter consuming annually 200,000 bushels of various kinds of grain. The Grand Trunk Railway passes within two miles of the City; but it will be connected with the Town shortly by a branch railroad. As a place of defence, Kingston stands next in strength to Quebec. The batteries of Fort Henry are calculated for the reception of numerous cannon and mortars of the largest calibre. These, together with neighboring martello towers, form a formidable and efficient defence against any aggressive movement which might be directed against the City or neighbouring country. The City possesses two Colleges, Queen's and Regiopolis. It has several magnificent public buildings; amongst which may be enumerated the City Buildings, New Court House, &c. The Commercial Bank of Canada has its head quarters here, and there are branch establishments of the Banks of British North America, Montreal, and Upper Canada. Kingston returns two Members to the Provincial Parliament. It is in lat. 44° 8' N., lon. 76° 40' W. from Greenwich. Distant from Montreal 198 miles, and from Toronto 165 miles. Population, including the military, about 13,000.

LONDON, C. W.—The chief seat of the County of Middlesex, and the westernmost City of Canada, beautifully situated on the River Thames,—a name, with those bestowed on the City, its bridges, and principal streets, that affords evidence of a desire to imitate, or to bear in remembrance, the principal City of the British empire. The growth of London has been more rapid than that of any other place in the Province, for in 1825 the present site of the City was a wilderness. It is laid out in wide streets, at right angles to each other, and is remarkably well built. The buildings generally, especially many of those required for public purposes, are beautiful specimens of appropriate architecture; among which may be noticed the English Church, a Gothic structure, with a chime of bells, the only one in Western Canada,—than the sound of which nothing can more surely tend to revive the reminiscences of former residents of the ancient city. London is the centre of a rich agricultural district, which furnishes it a large trade in wheat and other agricultural produce; while in various important manufactures it is making rapid progress. The City is lighted with gas. It is a Port of Entry; so that, amongst other advantages which its trade enjoys, goods may come direct through the United States under bond. There is a Board of Trade; and no fewer than five agencies of the Provincial Banks have been established, as also six newspapers. As might reasonably be expected from the enterprise hitherto characterising London, the important advantages derivable from railway communications are unusually extensive. The Great Western Railway passes through the City. There is also a Railway direct to Port Stanley, and lines are projected to Sarnia and Port Frank, on Lake Huron. A Railway to St. Mary's is in course of construction. Distant from Hamilton 76 miles, from Toronto 114 miles, from Montreal 447 miles, and from Sarnia 56 miles. Population about 16,000.
