Mr. Thos. Hobin, local carpenter, is in charge of the building of a new office and dwelling apartment for Mr. Gordon Paul, insurance agent. The foundation was completed last week and brick is being laid this week by Wellington Armstrong & Son.

Daring Hold-up on Portage Road

Hazelwood Elliott Bound and Gagged Sunday Night

Left in Bush near Fitzroy

Mr. Hazelwood Elliott, only son of Mr. and Mrs. R. H. Elliott, of the Portage road, was the victim of a daring hold-up and an altogether horrible experience by three auto bandits when returning home from this village shortly after eleven o'clock on Sunday night. Bound, blindfolded and gagged he was left in a pot hole in a dense bush, near Fitzroy Harbour, more than thirty miles from the place of abduction.

Plain facts of case, which were only procured upon Mr. Elliott's return here on Monday afternoon, run as follows:—Mr. Elliott had been to Church with his parents and afterwards drove them home and returned to the village, and drove around in his car, an Oldsmobile six, till about eleven o'clock. At the outskirts of the town, a short distance south of the 6th line crossroads, on the Portage road, he was crowded to the side of the road by a person driving a roadster and wearing a traffic officer's uniform. Elliott was brought to a stop by a whistle and the supposed officer, leaving his car broad-side of the road, approached him about speeding. Elliott replied he was only going at the rate of about 25 miles, then he was told he had a flat tire. Getting out of his car to investigate he was immediately ordered to put up his hands at the point of a gun. At this moment he was pounced on from behind by two other men, who bound, gagged, blindfolded and relieved him of his money. He was then hoisted into the car which he believes was driven by the masquerading officer. From this time on he has only a vague idea of the route followed by his abductors, except that they travelled at a fast pace for several hours and that they covered considerable distance over cement road, this he judged by the momentum and sound of the traction of the car in which he was riding.

Before day-break the car following drew along side, and one of the abductors said they would have to get rid of their prisoner before day-light. Elliott was then taken from the car and led into a dense woods and told to remain quiet or he would be shot. After doing so for considerable time and not hearing any unusual noises about he then decided to remove the blindfold and other encumbrances, which included some barbed wire around his legs. He immediately proceeded to find his way out of the bush and after travelling for an hour or so finally came to a clearing and a road. Soon afterwards he met a man by the name of Stanton, who informed him that he was in the district of Fitzroy. He was then directed and driven part way to the farm home of some acquaintances of his family by the name of Hudson. Upon arriving there he immediately got in communication by telephone with his father, who with a nephew, Fred Elliott, went to Fitzroy.

Before returning the matter was reported to the Ontario police and later in the day Quebec police were acquainted with the facts of the case.

Returning home early Monday afternoon, Mr. Elliott said he was none the worse of the rather harrowing experience. He was unable to give the slightest clue that could be used to advantage for apprehension of his abductors.

Since the above was put in type we learn that the Elliott car was abandoned near the village of Galletta.

BORN

At Stark's Corners, on May 22nd, 1934, to Mr. and Mrs. Clive A. Smart, a daughter—Edna Faye.

PERSONAL MENTION

Mr. and Mrs. J. M. Argue and children spent the week-end with relatives in Carthage, N. Y.

Mr. and Mrs. H. M. Cuthbertson, of Wakefield, were Sunday guests of their relatives in town.

Mr. Heman Woolsey, of Onslow Corners, has been visiting relatives in Ottawa for a few weeks.

Miss Patterson, of Montreal, is a guest of Dr. and Mrs. Powles, this week.

Miss Euella Turner has been visiting friends in Ottawa for a few days.

Miss Gurtha Dale, of Ottawa, was a guest of her mother, Mrs. R. A. Dale, over the week-end.

Messrs. Grant Crofton and Lionel Powles, of Montreal, were Victoria Day guests at the home of Dr. and Mrs. Powles.

Mrs. Floyd Wilson returned on Sunday from a short visit to her parents, Mr. and Mrs. Keillor, at Spencerville, Ont.

Mr. and Mrs. Ernest Towsley and family, of Ottawa, were week-end guests of Mrs. Towley's mother Mrs. A. C. Hodgins.

Mr. and Mrs. Truman Tuck, of Ottawa, spent the week-end with relatives and friends in town and district.

Mrs. Harry Hobbs returned home on Monday evening after spending a few days with her son, Lawrence, at Wyman, Que.

Mr. and Mrs. Cyril L. Dale, now of Bedford, Que., paid a short visit to relatives here last week, before starting on a six week's motor trip to California.

Miss May Lunam, Reg. N., of Ottawa, who is spending a vacation at the home of her parents in Campbell's Bay, was a week-end guest of her aunt, Mrs. S. E. Hodgins, in town.

Mr. Hollie Corrigan, of Sault Ste Marie, was a visitor to town for a day or two last week, having accompanied his mother, Mrs. F. F. Corrigan home after spending the winter months as his guest.

Mr. and Mrs. George Woolsey and family, of Westboro, and Mrs. Gordon Hill, daughter, Gertrude, and Mrs. Thos. Campbell, of Ottawa, were Victoria Day guests of Mrs. A. Woolsey and Mrs. J. J. Armitage, of Onslow Corners.

Mr. and Mrs. T. A. Lucas and son Robert and his family, of Carp, Ont., were among the number of former residents of this district attending the Centenary services at the United Church on Sunday last. Mr. and Mrs. T. A. remained over for a visit of a day or two.

Mr. Wendell Alexander returned recently from Queen's University, Kingston, to spend the summer vacation with his parents, Mr. and Mrs. Samuel Alexander. As usual, Wendell, has annexed another scholarship, worth \$75.00, donated by the University.

Presentation

A very pleasant time was spent at the home of Mr. and Mrs. Geo. Finan, Lower Litchfield, on Friday evening, May 18th, when a number of friends and neighbours gathered to present them with a purse of money, before they depart from the community. The presentation was made by Miss Gwen Tubman, while an address was read by Mrs. Daniel Stewart.

Mr. and Mrs. Finan, who were greatly taken by surprise, thanked their friends for their kindness.

Mrs. William Smart Honored on 89th Birthday

A very pleasant day was spent at the home of Wellington Smart, Stark's Corners section, Clarendon, on May 27th, when the family gathered once more to congratulate their mother, Mrs. William Smart, on the event of her 89th birthday.

She was able to receive and converse freely with all the relatives and friends who called to wish her many happy returns of the day. Her intellect continues strong and alert in all the happenings of the times. Her memory is quite clear and she is still able to cite many chapters of scripture and memorize quotations from the latest authors. Present were the family, grandchildren and three great-grandchildren, and one sister-in-law; also friends from the home district and Ottawa, who contributed largely in making a pleasant time with music and the singing of many of her old favourites.

Mrs. Smart was the recipient of many beautiful bouquets.

Native of Shawville Nominated Conservative Standard Bearer in South Renfrew

Mr. John H. Findlay, of Arnprior, a native of Shawville, son of the late Geo. Findlay, was chosen Conservative standard-bearer to contest the County of South Renfrew in the Ontario general elections, scheduled for June 19. Since taking up residence in the neighbouring Ontario County, Mr. Findlay has taken an active part in municipal administration. For fifteen years he was Reeve of Branside and two years ago was warden of the County. Although moving from here when quite a young man, Mr. Findlay is well known and favourably known to a great number of citizens, who wish him every success in the coming elections.

United Churches of Clarendon Celebrate Centenary

Capacity congregations attended the United Church here on Sunday and Monday for their services in honor of 100 unbroken years of Methodist preaching in Clarendon. In the morning, Rev. T. J. Vickery, a former pastor was the preacher and was welcomed by many friends after his absence from Shawville for about 8 years on his first visit back. In the evening, Rev. Fred Williams, of Ottawa, gave a masterly address appropriate to the occasion. On Monday evening, a choice supper was served in the Sunday school room of the Church by the ladies of the congregation, and the Moderator of the Church, Very Rev. T. A. Moore, D.D., L.L.D., gave an address. The music led by Mrs. Edgar Hodgins was of a high order; and special numbers were enjoyed at the three services by Mr. and Mrs. Nellis Hodgins, of Ottawa. The Centenary continues for two weeks, with W. M. S. rallies on Wednesday and a Woman's Association gathering on Friday.

D. R. Barry, K. C. Dies Suddenly

Mr. D. R. Barry, K. C., Pontiac's oldest and best known barrister, died at his home in Campbell's Bay, on Saturday morning, May 26th, at the age of 83 years. He had been in failing health for the past five months, but death came suddenly and as a great shock to his family and friends.

The late Mr. Barry is survived by a wife, two sons, Elwood, of Montreal, and Stafford, of Three Rivers, Que., and one daughter, Miss Robertine, at home.

The funeral was held at nine o'clock Monday morning to St. John the Evangelist Church; thence to Campbell's Bay R. C. Cemetery. Solemn requiem high mass was chanted by Rev. Fr. W. L. Murray, P. P., who also preached a very touching and appropriate sermon.

Active pall-bearers were:—Sheriff Dominic Sloan and Messrs. F. W. Bowie, Dan Robillard, J. J. Gilchrist, Lawrence Smith and P. J. Monsean.

Noticed in the cortege were many old friends of the deceased from Fort Coulonge, Bryson, Portage du Fort, Shawville and other points in the County as well as relatives and friends from Montreal and Ottawa.

The late Mr. Barry was born in Escuminac, Que., the son of the late J. E. and Marie Rouleau Barry. He received his degree of L.L.B. from Laval University in 1874, and in 1875 was admitted to the bar and first practiced in Quebec city. Before coming to Pontiac to practice law, he was Liberal candidate in Temiscouata county.

In 1879 he was delegated by the youth of Quebec to convey to the Empress Eugenie, at Chislehurst, their sympathy with her over the unfortunate death of her son, the Prince Imperial, and to place a wreath on his tomb, which mission he very ably carried out. Mr. Barry started practising law in Pontiac at Portage du Fort, afterwards moving his practice to Bryson, where he remained until 1912 when he moved to Campbell's Bay where he continued to practice until his death.

While in Bryson he was made a K.C., and for a number of years was crown prosecutor for the county.

In 1909 Mr. Barry was elected batonnier of the Hull Bar Association and later was sent as a representative of the Canadian Bar from Quebec to a European bar convention.

In 1919, Mr. Barry was the standard bearer for the Liberal-Conservative party in the three-cornered fight for the provincial house, W. R. MacDonald, Chapeau, being successful candidate.

Mr. Barry is also survived by four sisters namely: Mrs. Necker, Mrs. Judge Choquette and Miss Hilda Barry, all of Montreal, Que.; and Mde. E. Barry, of the Sacred Heart Academy, Detroit, Mich.

COST OF BRINGING UP CHILDREN

Much is heard about the high cost of education, but figures prepared by the Dominion Bureau of Statistics go to show that it costs only about \$755 to keep the average child at school for eight years, but it costs more than that for clothing, twice as much for food and three times as much for housing. Altogether, it is said to cost \$5756 to bring up a child to the age when it is self-supporting. Next to good health, a good education is the greatest asset a youngster can have.—Fergus News-Record.

YOU SEE IT EVERY DAY

What chances men take of being severely burned, and even losing their life, is seen at almost every service station where gasoline is fed to the tank of a car. The owner of the car will stand over the tank and watch the inflammable fluid being poured in with a lighted cigar or cigarette between his lips and we have even seen them strike a match to light their pipe. In the open air the danger is not so great, but it is nevertheless, a great danger and once the fumes of the gasoline become ignited, the explosion follows, and the man standing nearby is liable to be the most severely burned. We have frequently noticed young men, while the gas tank was being filled, strike a match and light a cigarette. Accidents do occur, and often lives are lost by such carelessness, but those who do escape do not seem to heed the many warnings. Recently we read of a man who was removing gas from a car with a lighted pipe in his mouth. In a few hours he was being cared for in an hospital, and is probably disfigured for life. Fire and gasoline don't mix any more than alcohol and gasoline will mix.—Winchester Press.

WEED DESTRUCTION

Farmers can do much toward the elimination of weeds from their properties and their district if they will give more attention to the destruction of this menace to good crops. It was pointed out at a meeting of agricultural men at Essex recently. While some farmers realize the necessity of destroying the weeds on their farms, others are lax in this, and render ineffective all the work that has been done. The sow thistle and dodder are the enemies on which the farmer should wage war and the war will not be won unless all farmers do their utmost to prevent the weeds from gaining a foothold on their farms. It is to their own advantage to do so, for it means less work and better crops in the end. Testing their seed before sowing is one way of preventing the spread of weeds. Destroying the weeds as many times a year as it is necessary is another method. It is up to every farmer to co-operate with the weed inspectors as far as possible and help make their land cleaner.—Amherstburg Echo.

AERIAL FREIGHT TRAINS

Who knows, but that, as now powerful engines pull the freight cars, some day a powerful plane will pull half a dozen gliders at its heels—the freight train of the air.—Halifax Chronicle.

LIFE AND KISSES

A would-be crepe-hanger has informed an indifferent and unresponsive world that every kiss indulged in shortens one's life three minutes. If this chap has the correct dope he has certainly suggested a delightful method of leaving this vale of tears. If the pleasures of kissing must be given up in order to reach a ripe old age, a referendum on the subject would undoubtedly be unanimous in favor of an early but blissful demise.—Kingston Whig-Standard.

ON THE HIGHWAYS

There are just as many discourteous drivers in Canada as anywhere else. We have the road hogs. We have the reckless drivers. We have the people who never stop at a red light, but expect everyone else to. We have the "fender scrapers" and the obnoxious horn-blowers and the unreasonable cutters-in and all the rest who make driving more or less of a nightmare for decent citizens with some sense of their obligation to society. Motoring courtesy—what a change its general adoption would mean to the whole business of driving.—Border Cities Star.

FAMOUS FAIR PASSES

Passage from the contemporary scene of some of Old England's most ancient traditions and customs. An example is the pending abolition of the famous Stourbridge Fair at Cambridge. The fair dates back to the year 1211. In the Middle Ages it was one of the most famous fairs in the world, bringing merchants and travellers from all over Europe. Milton mentions it in "Paradise Lost" King Henry VIII, levied on the fair's profits in 1539, to relieve his own financial stringency.—Guelph Mercury.

POISON FOR PESSIMISTS

From a low point of 60.9 in February, 1933, the general index of in-

dustrial production rose to 86.8 in January of this year. From a low in January, 1933, of 91.8 total mineral production rose to 120.6 in January 1934. Manufacturing, as a whole, has made steady progress from February, 1933, when it stood at 58.7, up to 80.7, in January, 1934. Construction showed a gain of 17.8 pts. this January over January, 1933. January, 1934, automobile production in the total of trucks and passenger cars was over double that of January, 1933. Both the railways have shown substantial gains in operating revenue. During the second half of 1933 there were 20 per cent less commercial failures than in the first half.—Canadian Business.

LEARN TO PLAY

Last spring a 72-year-old federal judge in Seattle informed President Roosevelt that he wished to be put on the retirement list, but asked that he be given the privilege of continuing to preside over admiralty cases—a field in which he has made a considerable reputation. He explained why he wanted to keep on working. "I never have learnt to play," he said. "If I should quit work now, my friends would have to hire somebody within 90 days to watch me." The period that begins with retirement should be one of the happiest and most fruitful in a man's whole life. It is tragic to find men who look upon it with dread—because they never learned how to play!—Chatham News.

MORE JOBS

When circumstances eliminate a blacksmith shop it is replaced by a garage or a service station employing more men; the tradition of the cross-roads carriage shop is continued in the automobile factory, and so on down the roll of industry. Among them the engineer, the inventor, the scientist, it appears abundantly proved, have made far more jobs than they have added enormously to the comforts and luxuries available to the masses of the people.—Ottawa Journal.

WAY FOR THE WALKER

Walking is becoming almost obsolete on this continent, with serious consequences to health and loss of a delightful form of exercise. There are so few places where the practice may be indulged in with comfort and without risk. Paths along the highways are the solution—and the cost would be negligible if undertaken in connection with ditch-filling operations.

THE EMPIRE

TIT FOR TAT

An amusing "Sunday observance" deadlock has occurred in the little Berkshire town of Farringdon between the butchers of Farringdon and the local council. For years the butchers of the town have been in the habit of killing animals on Sunday, but the District Council are considering taking action to stop the practice. They quote as their authority an Act of Charles I, which imposes a penalty of 6s 8d, but the butchers have threatened to retaliate through the medium of the same act, which imposes penalties on those who do not attend a place of worship. The butchers say that if they are prosecuted they will keep a watch on members of the council, and will turn informer against those who do not attend church.—Banffshire Journal.

AN INDUSTRIAL BAROMETER

Facts and figures show beyond dispute that Great Britain's progress over an area which is constantly widening. Two of the surest indicators of trade are the output of steel and the production of coal. The output of British steel last month reached the highest figures that it has attained since October 1929, before the slump abroad became acute. The production of coal for the first quarter of the year, though not yet published in detail, is known to have been markedly in advance of that for 1933 or 1932.—London Daily Mail.

HOW RESEARCH PAYS

To those who are still sceptical as to the practical value of scientific research in the development of industry—and the niggardly nature of the provision that is made for such work by most industries suggests that they are many—we commend perusal of the Report of the Department of Scientific and Industrial Research. In it there is told the arresting tale of how the grant of £1,000,000 made by the British Government in 1917 for the encouragement of industrial research, which is now exhausted, was not only well but most profitably spent. It is admitted in the report that it is impossible as a rule to assess in terms of money the importance of the part played by research in industrial progress, but several striking concrete examples are quoted. As a result of experiments by the Electrical Research Association costing £80,000, annual savings amounting to £1,000,000 have accrued, while the Iron and Steel Research Council's investigations are expected to result in saving about £300,000 worth of coke per annum in the production of

pig iron and a saving in coal of not less than £1,340,000 in the production of finished steel.—The Statesman, Calcutta.

FLOODS UPON DROUGHT

Nature seems to lose no opportunity for an ironical comment on our present distress. In the midst of widespread flooding we are in drought. At the moment when Parliament is conferring drastic emergency powers to deal with water shortage, Nature is uncomfortably profuse in her assurances of water in abundance. Yet the fear of shortage is real and justified, and the proposed emergency powers lose none of their point.—Glasgow Herald.

THE BRITISH MEAT MARKET

The Bingley Reorganization Commission, whose report is published today, although nominally concerned with fat stock, has in fact included the whole of the meat supplies of England—beef, mutton, pork, veal—in its survey and has drawn up a far-reaching scheme for their control. The recommendations are that a Livestock Marketing Board shall be established to prescribe the methods and conditions of all sales of meat. This country now produces less than half its supplies of beef and mutton. Chilled meat comes from South America, and frozen meat from Australia, New Zealand, and Canada. Since Ottawa fairly successful restrictions have been imposed on the import of chilled meat, but despite certain voluntary agreements the imports of frozen meat have increased. The Commission advises that when the Ottawa arrangements come to an end in June the Dominions shall be asked to accept voluntary quotas. If not, compulsion may have to be applied—a threat to which they are already resigned.

Princess Plays In Tennis Meet

King Gustaf Sees Ingrid and Partner Defeat Opponents

Stockholm.—Princess Ingrid of Sweden took part in an open tennis tournament at Cannes recently for the first time. She was visiting her grandfather, King Gustaf. The princess appeared under the name of Mlle. San, an abbreviation of the Swedish "Sessan," which is the princess' pet name among her intimates in Stockholm. Her partner was a Count Shapary, and their opponents were Miss Albert and Hornsby Wright.

Princess Ingrid and the Count last the first set, but in the second their luck changed and they won the match. King Gustaf who watched the game rewarded his grandchild with a kiss. She appeared on the court in skirts, whereas Miss Albert wore shorts, a garment that King Gustaf recently frowned upon as unsuitable attire for tennis.

Princess Ingrid's name again has been linked with that of Crown Prince Frederik of Denmark, but so far no official announcement of an engagement has been forthcoming.

A Smile

Two small boys were travelling from town to school by train. They hoped to secure an empty compartment wherein they might smoke. To their disgust a woman entered. The boys immediately entered into tacit conspiracy to freeze her out.

One said, audibly: "I think I'm sickening for smallpox or something." "Yes," said the other, playing up gallantly, "and I'm perfectly sure I've got scarlet fever coming on." The woman extracted a cigarette case from her hand-bag, and, looking at the boys, said: "Have either of you young lepers got a match?"

"Let the current of your being set towards God, then your life will be filled and calmed by one master-passion which unites and stills the soul."—Alexander MacLennan.

Taking No Chances

It isn't bothering the young fellow in the centre one bit. The keepers are just playing safe while they transfer the ugly-tempered vulture from his winter to summer quarters at the Philadelphia zoo.

Empire Press Conference To Be Held In '35

Toronto.—Canada will be invited to send eight delegates to the fifth Imperial press conference, it was announced at the annual meeting of the Canadian section, Empire Press Union, here. The conference will be held in South Africa from May 6 to June 21, 1935.

Details of the trip were explained at the meeting, held under the chairmanship of J. H. Woods, editor of The Calgary Herald. There will be a tour of South Africa and Rhodesia, the delegates to be the guests of the South African section. Preliminary arrangements for selection of delegates were left in the hands of the executive.

The following officers were elected: Honorary chairman, Rt. Hon. Lord Atholstan, Montreal Star; chairman, J. H. Woods, Calgary Herald; honorary secretary-treasurer, W. A. Craik, Industrial Canada, Toronto; executive committee, representing daily newspapers, J. W. Daffoe, Winnipeg Free Press; Henri Gagnon, Quebec Le Soleil; P. D. Ross, Ottawa Journal; representing weekly newspapers, E. Roy Sayles, Renfrew Mercury; representing trade and class publications, H. T. Hunter, Maclean Publishing Company, Limited, Toronto; auditor, T. F. Drummie, Saint John Telegraph-Journal. Mr. W. Rupert Davies is a member of the London (Eng.) Council.

Blind Woman To Get Ph.D.

Sightless Since Birth; Thesis Entitled "Milton's Blindness"

New York.—Miss Eleanor Gertrude Brown, of Dayton, Ohio, blind since childhood and burdened with illness and poverty in her early years, will receive the degree of Doctor of Philosophy from Columbia University at the commencement next month, probably the first woman to earn such a high scholastic honor while blind. She is 46.

Publication of the thesis for her doctorate, entitled "Milton's Blindness," has already been announced by the Columbia University Press. In it, from the point of view of "one who knows what blindness is," she opposes the conventions of generations of scholars that the blind poet lamented his affliction.

"No one," she wrote, "would deny that blindness has its deprivations. That it has its compensations in recognized by every sightless person. It is, I believe, the thought of these benefits that Milton would leave with the reader.

"It is not miserable to be blind. It is inconvenient. The blind need to exert undue patience with reference to their affliction, since on account of their dependency their lives are closely knit with their helpers. The blind make the adjustment to their handicap perhaps as happily as any group of afflicted people."

To clinch her argument she quoted Booth Tarkington, who once was blind for six months and has had several operations on his eyes: "It is hard for any one who has not been blind to realize what a thrill it is not to have to see everything." While Miss Brown worked for her doctorate, a printer at the New York Institute for the Blind copied her notes for her in Braille.

Training Girls as Wives

Berlin.—Importance of training girls as wives was stressed by Nazi authorities last week.

The Federal Employment Bureau appealed to housewives to take graduates from public schools into their homes for one year, training them in cooking, house-keeping and care of children.

Most of the 600,000 girls being graduated this Spring would be eligible for such training.

Brothers Meet After 47 Years

Do Not Know Each Other Until Introduced—Separated After Yukon Gold Rush

NORTH SYDNEY, N.S.—A story of how two brothers had met in Nelson, B.C., without knowing each other until they were introduced is told in a letter received here from Duncan Johnstone, a former Cape Bretoner, who recently visited his home.

The brothers, Duncan and Daniel Johnstone, left Barrachois, C.B., and went west together. They helped clear the land where the Vancouver post office now stands, and then operated a logging camp in British Columbia until the Yukon gold rush, when they separated. Duncan following the trail of the sourdough prospector in to the gold fields, and Daniel going to the interior. They did not meet again for 47 years.

Since then Duncan has resided at Whitehorse, Alaska, and before coming to his old home in Cape Breton he went to Nelson, B.C., where his brother lives, and they met, neither recognizing the other. After being "introduced" they swapped stories of their experiences.

Toronto A Railway Without A Station Declares Airman

TORONTO.—"In view of the fact that airplanes form the only real contact with our northern mining centres, it is important that Toronto's airplane landing facilities should be improved," J. R. Caldwell, member of the Toronto Flying Club, told the Gryo Club here recently.

"Toronto," he said, "is like a railway without a station. What we need is an adequate field which will be accessible all the year round, instead of being unusable for two months during the winter. Also it should be surfaced and lighter, with a ground staff to look after it." Mr. Caldwell also asked if Canada was going to drop out of aviation. He pointed out the rapid strides the U.S. had made and how this will effect Canadian commerce. At present mail can be transported from Halifax to California, via New York, in 16 hours, whereas it takes four days for it to be transported across Canada by rail.

To Be Evening Paper

TORONTO.—With the consent of J. H. Woods on behalf of the Calgary Herald, the board of directors of the Canadian Press have authorized transfer of the Calgary Morning Albertan to the evening paper field. The Morning Albertan ceased publication on the morning of May 15 and the evening paper was issued the following day.

Never Refused Call, Dr. Leaves \$160,000

TAYLORVILLE, Ill. Service pays, Dr. Campbell A. Stokes, 74, of Edinburg, who had the reputation of never refusing a call from the sick, left an estate valued at \$160,000.

When he died a month ago the physician was at the bedside of a five-year-old boy, whose arm had been broken.

Pants on Men, Skirts For Women, Decree

HADDONFIELD, N.J.—Pants is pants and skirts is skirts in Haddon township, where the community fathers have passed an ordinance to emphasize the distinction. A jail sentence of 90 days or a \$50 fine is provided for the male who wears a skirt or the female who dons trousers.

In Defense Of Sport

Contributes to Good Citizenship Says Amherstburg Echo

Few spectators at a game of any organized branch of amateur sport realize the time and effort that has been expended to bring clubs up to a competitive standing. The majority of amateur organizations are composed of men who are enthusiasts in a particular sport and are willing to do all they can to stimulate the interest of the general public. When there is not an opportunity to raise the money necessary to defray the expenses of the team they solicit help from the citizens of the town. To some people this is an imposition. Sports organizations are always crying for money," they say. "They get all the fun out of it and they ask us to pay the bills. Why can't those birds run their game without begging money? What do we get for all the money we give to them?" To the last question the answer is "good citizens." We do not mean to imply that every man or boy who plays a game is a good citizen. But the majority of people who indulge in sport have a clean healthy body and mind. If they have properly absorbed the sporting instinct they are willing to play the game at all times, not only in sport but in the activities of life.

Sport attracts children from the time they can shake a rattle of toys one of their mother's best china dishes on the floor. Whether the child's attitude in sport is of the former harmless amusement or the later destructive pastime depends on how it is brought up. If the sporting instincts are cultivated by an organized body they will develop into an asset not only to the person concerned but to all with whom he comes in contact. If left to follow his own inclinations there might be a tendency to indulge in the lower forms of amusement.

A sport organization is operated solely on the enthusiasm of its members. They wish to see their favorite sport prosper and to see followers added to it. They like to see boys developing into strong and healthy men. That's why they give their time and effort to promoting it.

Every citizen of a community should be interested in developing the mind and body of the young man within its environs. It is a duty. And it is a service that everyone can help to perform by allying themselves with some organization or by assisting in a monetary way. The returns from money and efforts thus expended are great, glorious and self-satisfying.

Wills Bulk of Fortune to Family

New York.—Two of America's largest fortunes figured in the news recently.

The will of the late dowager of the Vanderbilts, Mrs. Cornelius Vanderbilt, sr., filed for probate, passed on her share of the family fortune to other members of the family. The amounts willed to charities, social services, and family servants were relatively small.

The tax appraisal of the estate of the Wall Street banker, George F. Baker, showed it to be worth \$77,529,652. At the time of his death in 1931, his estate was estimated at several hundred million.

Mrs. Vanderbilt's will righted an old "injustice." Her son, Brigadier-General Cornelius Vanderbilt married against his father's wishes and when the elder Vanderbilt died in 1899, he was cut off with \$1,000,000, the bulk of the \$80,000,000 estate going to the second son, Alfred Gwynne Vanderbilt. Mrs. Vanderbilt willed General Vanderbilt in trust the residuary of her estate. The value was not set but it was estimated to be \$10,000,000.

The Vanderbilt mansion valued at \$6,000,000 went to her daughter, the Countess Szechenyi, who also received the famous Newport country home, "The Breakers." Mrs. Gertrude Vanderbilt Whitney, widow of Harry Payne Whitney, received \$7,000,000.

All of the grandchildren were mentioned for specific legacies except Cornelius Vanderbilt, jr., former newspaper reporter and publisher and lately author of books and articles "exposing" the rich.

Seeks Arts Degree At 72 Years of Age

Hamilton, Ont.—Henry Edwards, Dundas, never expects to make use of the additional education that he is acquiring at 72, but in a back room of the Board of Education offices here he is writing his British and Canadian history examination in the hope of obtaining the B.A. degree.

Mr. Edwards is studying under the eyes of the local examiner for the University of Toronto and has successfully written on a number of the degree subjects. It will take at least another year for him to complete the course. "Like Plato, I find pleasure in thought," he says.

WHEN SHE LOST 28 lbs.

She Gained Energy

This young woman's method of reducing overweight is evidently as beneficial as it is effective, and a letter she writes is therefore worthy of publication:

"I am 24 years of age; height 5 ft. 5½ ins.; and a short time ago my weight was 28 lbs. above normal. I was listless and without energy. Now after taking Kruschen Salts regularly I have lost 28 lbs. in weight, and have much more vitality. Also I have a very good complexion and I do not have face blemishes of any kind. Surely this must be due to my having pure blood, and I attribute the fact to my taking Kruschen Salts."

(Miss M. S.)
Kruschen combats the cause of fat by assisting the internal organs to throw off each day those waste products and poisons which would otherwise be converted by the body's chemistry into fatty tissue.

Recent Events From Overseas

A RECORD

DEAL, Eng.—Old Rugbians, the holders, were beaten in the third round of the Hallowell-Hewitt Golf Cup on the Royal Cinque Ports course here recently, by Old Watsonians by 3 games to 2.

The most spectacular shot of the day was a shanked drive by E. C. Tyrwhitt-Drake (Lancing) from the first tee, the ball going through the door of the clubhouse and coming to rest outside the dining room—the 19th hole in one!

The winners in the third round were O Wellingtonians, C Watsonians, O Foresters, O Radclians, O Uppinghams, O Carthusians, O Hatley-Burians and O Etonians.

NEW FUEL

LONDON—A fleet of new streamlined wagons recently delivered to the R.A.F. aerodrome, Biggin Hill, Kent, enough British coal-petrol to supply seven air squadrons.

It was the largest bulk supply of petrol made from British coal ever delivered.

So confident are the authorities of the quality of the fuel—proved by last year's gruelling tests—that the seven squadrons at Biggin Hill are to leave on protracted manoeuvres early next month, using nothing else.

For 17 Squadrons

The R.A.F. now consumes the whole of the British output.

This year 1,000,000 gallons of petrol will be produced for the force from 300,000 tons of British coal.

By the end of the year seventeen squadrons will be using it.

The South Wales coalfield, which, before the war, supplied the Navy with the bulk of its coal, has sent a deputation to the oil-conversion experts inviting them to establish a plant in Monmouthshire.

PAPER WORTH £10,000

LONDON—A frail little woman is fighting a legal battle with lawyers and executors in New York over a square inch of paper. But that piece of paper is worth between £10,000 and £15,000.

Meanwhile in England half a dozen connoisseurs are keeping in touch with New York by cable, watching and waiting for the opportunity to step in and gain possession of that piece of paper.

It is the British Guiana one cent stamp, the rarest stamp in the world. It is the only specimen in existence.

The frail woman is Mrs. Hind, widow of the millionaire brush manufacturer, whose hobby was collecting rare stamps.

She still possesses the stamp,

If Past 45 and "Low" and Upset Look for Acid Stomach

HERE ARE THE SIGNS:

Nervousness
Frequent Headaches
Indigestion
Feeling of Weakness
Loss of Appetite
Sleeplessness
Nausea
Mouth Acidity
Auto-Intoxication
Sour Stomach

WHAT TO DO FOR IT:

TAKE—2 teaspoonsful of Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed.

OR—Take the new Phillips' Milk of Magnesia Tablets—one tablet for each teaspoonful as directed above.

If you have Acid stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy 25c and 50c sizes.

ALSO IN TABLET FORM
Each tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA
Phillips' Milk of Magnesia

What Does Your Handwriting Show?

By GEOFFREY ST. CLAIR

(Grapho-Analyst)

All rights reserved.

(Editor's Note: Many letters of appreciation have been received from readers, who find these articles on Character from Handwriting fascinating and of absorbing interest. Read the author's offer to you at the end of this article.)

One of the most interesting features about Grapho-Analysis, the science of Character Reading from Handwriting, is the opportunity it presents of finding the truth about oneself.

Oh, had some power the giftie give us

To see ourself as others see us!

—Burns.

Burns spoke truly when, in those memorable lines, he expressed the inability of people to really know themselves. Grapho-Analysis provides the key that opens the door of knowledge.

Nearly a year ago, a young lady wrote to me, and explained that she could not keep her friends. She was good-looking, and cultured, and had a good personality. She could make friends—but she could not keep them!

A glance at her handwriting supplied the reason. She was inclined to indulge in sarcasm, and her wit was rather biting. No wonder she lost her friends.

I told her the truth. I suggested that she curb this tendency, and cultivate a more sympathetic demeanour towards people.

Not so long ago, I had a letter from her, in which she expressed her gratitude for my advice, and told me that she no longer found her friends deserting her. She had cured herself of her sarcastic habit.

Bad Habits.

The unfortunate thing about bad habits is that, in many instances, we do not know that we are guilty. A friendly suggestion often opens our eyes to the truth.

which, she claims, was given to her by her husband; the executors dispute her right to it. Negotiations continue.

Meanwhile the remainder of the collection, valued at £100,000, has arrived with Mr. R. H. Harmer, the stamp dealer, who, on hearing that the collection was to be sold, raced out to America in advance of hundreds of other dealers, and bought the lot.

Hope of Settlement

But the precious stamp which Mr. Harmer wanted more than any other in the world, for which he had waited many years to buy, eluded him.

When he reached America the squabble was still going on, and the stamp cannot yet be sold.

Mr. Harmer said: "The question has not been taken to court, and I hope it will be settled amicably."

"I am in touch with the executors, and as soon as the ownership of the stamp is settled I shall buy it."

"It is printed in black on magenta-colored paper, and was one of a few issued in 1856 by the British Guiana authorities."

HUGE EDIFICE

LIVERPOOL, Eng.—Thanks largely to the munificent gift, just announced of nearly \$1,250,000 from Lord Vestey and his brother, Sir Edmund Vestey, Liverpool Anglican Cathedral is likely to be finished completely in another 16 years or within 50 years of the laying of the corner-stone by King Edward VIII.

Compared with the time it took to build some of the other great cathedrals of England this will be a truly amazing achievement. Whole centuries were spent upon the erection of such noble piles as Canterbury, York or Lincoln. On the other hand St. Paul's was rebuilt after the Great Fire of London, in the short space of 35 years. The money for its rebuilding came largely from a tax on coal brought into London.

Freewill Offerings

Liverpool Cathedral is rising entirely through freewill offerings, ranging from the penny of the Sunday scholar to gifts even more princely than that of the brothers Vestey.

Lord Vestey and Sir Edmund Vestey are making the gift in memory of their parents and the money is to be devoted to the building of the great Central Tower of the Cathedral. This, the crowning feature of the design of Sir Gilbert Scott, will rise 327 feet above ground level, making the Cathedral a landmark for many miles out at sea.

"Up to now we have had rather a shapeless building from the outside," says Sir Gilbert Scott. "The tower will give it a certain completeness and dignity. We shall start on the tower in about two years, and it ought to be completed in about four."

Anticipate Criticism

The nave, which is the final stage

That is where the Grapho-Analyst is able to be of great help to you.

Replies

B.J. Winnipeg—You have a very great emotional capacity. And you are very expressive in your emotions. They sweep you along. You must gain control over them. Of course, it will not be easy, but it is worth the effort. As it is now, you are swept hither and yon, without any mind control, and you are likely to do things, and say things, that you will bitterly regret afterwards.

W.J.S. Toronto—You're a very reserved nature. You feel things readily, but you are backward in expressing your feelings. You carry your reserve almost to a point of coolness, and alienate friends, against your will. The cure in your case lies within yourself. Try and cultivate a more open and friendly disposition. Be sympathetic towards people and their troubles. You do not have to be gushing; in fact, you never could be. But you can show your interest in people and sympathize with them. You will find that people will reciprocate and you will be better liked. At the present time, you do feel for these people and their worries, but you do not show this feeling.

Do you want to know the weak points in YOUR character? The author will send you a personal analysis of your handwriting. Merely send a letter in your normal writing, and enclose 10c coin and a 3c stamped addressed envelope—please. Be sure it is a 3c stamp—and you will be surprised at the revelations. Address: Geoffrey St. Clair, Grapho-Analyst, Room 421, 73 Adelaide St. West, Toronto, Ont. If you send more than one specimen of writing, please enclose coin for each.

of the Cathedral building, will cost \$2,500,000 and if money comes in to enable the committee to spend \$300,000 a year the Cathedral will be completed in 1950, or 50 years from the date it was begun.

In anticipation of criticism about the spending of so much money on a cathedral, it is pointed out that 8½ per cent. of the Vestey donation will be spent in local wages and material.

Loosely-Waved, Simple Coiffure is Becoming

"How shall I arrange my hair so that I won't look like everyone else?" beauty experts are frequently asked. First of all, no smart woman should consider sacrificing a tasteful and flattering coiffure for one that is different, as to appear grotesque or conspicuous. Any girl likes to feel that her hair is a trifle out of the ordinary but she must stay within the realm of the dictates of fashion and consider her hair dress from a practical viewpoint.

Let's consider what may happen to the average woman with average hair. There's no use in telling her to dress it in a fashion meant to be worn only in the coiffure style shows. Aside from the fact that such coiffure creations are too "different" to be flattering to anyone but an exotic stage beauty, they are generally speaking, highly impractical. They won't withstand a hat nor a strong wind nor anything else for that matter. So the simple hair styles are best for anyone who leads an active life—at least for the daytime anyway.

Most women look prettier when their hair is waved softly about their faces. However, if you are lucky enough to have classic features that need no softening touches, wear your hair straight and be glad that you do not have to bother getting it waved. But such fortunate types are few and far between. For the average, wide, loose waves brushed back smoothly from the face are easy to keep in place and usually are most becoming.

LIGHT CHOCOLATE CAKE

Work 6 tablespoons butter and ¼ cup fruit sugar to a cream. Then add 1¼ cups flour and the yolks of four eggs one by one, with a tablespoon grated chocolate. Whip the whites of the eggs to a stiff froth and stir them lightly in. Pour the mixture into a well-buttered mould and bake in a moderate oven. When quite cold pour chocolate icing all over it.

France's Exports Up

France's exports to the United States jumped nearly 50 per cent in a recent month.

Without cost or obligation, mail copy of Lloyd's Map of Canadian Mines.

You Have Heard?

"You will now kiss the bride," said the parson after the ceremony.

"Oh," said the nervous groom, "I've done that already."

—O—

Mrs. Newrich had given the landscape artist full authority and he was showing her over the formal garden he had just completed for her.

Mrs. Newrich (pointing)—What is that?

Landscape Artist—That is a sundial.

Mrs. Newrich—What's a sundial?

Landscape Artist—That is to tell the time of day. The sun moving through the heavens cast a shadow which is recorded on the dial, indicating the time of day.

Mrs. Newrich (beaming with interest)—My goodness! These modern inventions! What will they be thinking of next?

—O—

"I do hope you keep your cows in a pasture," said Mrs. Newrich, as she paid her bill to the milkman.

"Yes'm," replied the milkman, "of course we keep them in a pasture."

"I'm so glad," gushed Mrs. Newrich. "I've been told that pastured milk is much the best."

—O—

Photographer (to woman sitter)—Look pleasant, please.

Sitter—I get the idea.

Photographer (click, click)—Now you can resume your natural expression.

—O—

After chasing a street car for blocks, or a boy for years, nothing equals the feeling of disappointment of finding you've caught the wrong one.

—O—

A manager of a concern was presenting a purse and a watch to one of the employees who was leaving the concern. The purse and watch were gifts of the other employees. After a long flattering speech, the manager wound up with: "The contents of this"—holding up the purse—"may in time disappear. But"—holding up the watch—"here is something that will never go."

—O—

Joe—I've just come from a dog show.

Sam—Did you win a prize?

—O—

Never bother about the man who calls you names to your face, but beware of the "bird" who goes around and talks about you behind your back.

—O—

Wife—Why does the whistle blow for a fire?

Husband—It doesn't blow for the fire, it blows for water. They've got the fire.

—O—

No matter what you do, somebody always knew you would.

—O—

How Is Your Liver?

Wake up your Liver Bile
—Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter. By refusing to pour out its daily two pounds of liquid bile into your bowels, you won't completely correct such a condition, by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant. Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask to them by name. Refuse substitutes. 25c at all druggists.

More Tobacco for the Money! and POKER HANDS, too with TURRET FINE CUT!

Wise smokers who "roll their own" cigarettes are making 10c do a bigger job than ever before. They're using Turret Fine Cut—the mild, cool, fragrant tobacco that gives them more and better smokes for the same money and Poker Hands to exchange for free gifts.

A turn to Turret Fine Cut is a turn in the right direction: greater economy, greater pleasure and the extra value of Poker Hands. Don't wait!

Here's the Perfect Beauty Routine

A perfect nightly beauty routine and one which every skin needs, regardless of its age or type, makes use of the four essential cosmetic preparations—complexion soap cleansing and tissue creams and skin tonic. Today we'll concentrate on a regular home treatment.

First, wash your face and neck with soap and water, rubbing with the palms of your hands as well as with a rough wash cloth. Then rinse several times with tepid water and finish with a very cold rinse.

Cleansing cream comes next. Using upward and outward strokes cover the skin with a thin layer of the quick-melting cream. Let it stay on for two minutes and then with soft cleansing tissues remove every trace of it.

Skin tonic is the third step. Pour a bit of it on a cotton pad and pat throat face and forehead with the pad. Use brisk upward movements that stimulate and strengthen sagging muscles and lazy tissues. Let the tonic dry into the skin before you put on a very thin coat of tissue or nourishing cream.

Tissue cream should be patted into the skin and the spot under the chin deserves a few extra vigorous slaps. See that there is plenty of cream around the eyes and across the forehead where fine lines have a tendency to form. When you have finished, wipe off the excess and go to bed.

Beauty Preparations Used by Men

Montreal—Men use beauty preparations. There are still business offices where the appearance of a woman is interpreted as a request for a subscription to something or other. These facts were glanced from addresses delivered before the Business and Professional Women's Club.

Nearly 60 per cent of all Canadian exports which in their original state were produced on Canadian farms went to the United Kingdom during the fiscal year ending March last year.

BARGAINS IN FARM PUMPS

A few low priced belt drive power pumps, 1933 models. To be sold quickly at greatly reduced prices. Write today for prices, and state depth of well. Mr. Anderson, Beatty Bros., Limited, Fergus, Ont., Box 238W.

Are You WEARY?

Do you find it hard to do things some days? Days when body and brain feel oppressed? Incomplete elimination of body wastes is probably the reason. It is most likely the reason even though you are as regular as can be in your daily habits, because regularity is no guarantee of completeness. Follow these simple health rules: Eat moderately, sleep sufficiently, get lots of fresh air and exercise—and once or twice every week take a bracing, sparkling glass of Andrews Liver Salt. Andrews will purify and invigorate your whole system and help Nature end those tired, "headache" days. Get Andrews Liver Salt from your druggist. 35c and 60c in tins. 75c for the new, large bottle. Sole Agents: John A. Huston Co., Ltd., Toronto.

DOCTORING YOUR DAIRY HERD

Cows aren't machines. They can get sick or hurt. But Minard's Liniment makes it easy to care for their ills. Mrs. Thos. Bulmer of Lardo, B.C., found one of her herd with a lump in her udder. "I rubbed it with Minard's Liniment," she says, "and it soon got better." Minard's is best for Cuts, Bruises, Colic, Distemper, etc., and equally good in stable or in house. Well named "King of Pain".

Issue No. 20—'34

THE EQUITY

SHAWVILLE, MAY 31, 1934.

Enforce New Provision in Quebec Wage Act

Montreal, May 25.—Employers who replace women in industry by boys and men will have to pay male workers the same rate as set for the women under the Quebec Women's Minimum Wage Act, G. Franq, chairman of the Wage Board, declared on Friday last. He said this new provision of the act will be rigidly enforced. A conference with companies in the food industry is to be held next week when Mr. Franq said he intends to lay emphasis on this requirement.

United Campaign Against Grasshoppers Started

A united drive on the grasshopper pest by United States federal officials and Prairie farmers and Provincial and Dominion governments in Canada now underway, is expected almost completely to save this year's crops on southern Saskatchewan and Manitoba.

"On a normal crop of 15 bushels to the acre we expect to save 14 bushels," Hon. Robert Weir, minister of agriculture, told the house of Commons recently.

Grasshoppers entered the debate in the last half hour when the agriculture estimates were under consideration.

New Agricultural Survey

The farmers of the Province of Quebec as those of the rest of the Country, will have again this year, at the very beginning of the month of June, to answer the questionnaire for the half yearly survey of the extent of the crops and live stock kept on the farms.

For that end, the section of the agricultural Statistics of the Department of Agriculture has already distributed to the teachers of the rural schools, whose intelligent co-operation has greatly contributed in the past to the success of those half yearly surveys, about 140,000 cards including the questions to which the farmers will be requested to answer.

Interviewed on that subject, Dr. L. P. Roy, director of the Services of the Department of Agriculture of the Province, has declared: "When the survey was made in June 1933, 40,987 farmers of the Province of Quebec have answered the questionnaire. The total of answers received by the Federal authorities of the Dominion, was 149,127. The percentage of the Province of Quebec, was 28 per cent. of the national grand total, and our farmers obtained the first rank. The Province of Alberta obtained the second rank with 23,839 answers. The Provinces of Ontario and Saskatchewan obtained the third and fourth rank respectively with 22,159 and 21,521 answers. Such a result shows us to what degree our farmers realize the importance of an agricultural statistic established through inquiries gathered at fixed periods and furnished by the greater majority of the interested parties. This enables us to hope that our farmers will not do less this year, and that they will live up to increase the number of answers obtained last year."

Pontiac Rural Telephone Company

Shawville, May 26th, 1934.

A meeting of the Directors of the Pontiac Rural Telephone Co. Ltd., was held in the Secretary's office at ten o'clock.

Those present were: Thos. Eades, Pres., R. J. Tracy, Vice-Pres., and Directors, A. Sly, W. F. Pritchard, L. W. Dahms, Ira Hanna, H. G. Young, Wm. Graham and E. J. Barber.

The minutes of last meeting were read and approved on motion of R. J. Tracy and H. G. Young.—Carried.

Motion by W. F. Pritchard and A. Sly, that the following Telephone Stock be transferred:

To Emmerson Horner from the late D. A. Baker.

To Thomas Eades from George Draper. To Dr. McPherson from Thos. Mousseau. To Mrs. Joseph Sly from the late Joseph Sly.

—Carried.

Motion by Ira Hanna and L. W. Dahms, that the following bills for March be paid:

Federal Tax 29 56
E. Chamberlain 7 50

Motion by R. J. Tracy and E. J. Barber, that the consideration of the buying of the Bell Telephone Lines through Pontiac be left over till next meeting.—Carried.

Motion by W. F. Pritchard to adjourn.

H. E. ELLIOTT,
Secretary-Treasurer.

Mulching Apple Trees

A satisfactory mulch conserves moisture by retarding evaporation, and, on decomposing, supplies a considerable quantity of plant food. Applied to apple trees, in sod, mulch has a decidedly beneficial effect as moisture is conserved at a time in the season when it is urgently required by the trees. This together with the fairly liberal amount of plant food supplied by the decomposing mulch material creates a very favourable soil condition which, under average conditions, will increase both yield and quality of crop.

In an experiment, conducted by the Dominion Experimental Farms, at Abbotsford, Que., mulched Fameuse trees have produced annual crops, of well-sized fruit, for eight consecutive years. Unmulched trees, of the same variety, in the same block, have remained biennial in bearing habit during this period.

Practically any kind of vegetable material, such as straw, grass, garden refuse or even corn stalks will make a satisfactory mulch. The material should be spread evenly over the ground, from about two feet from the trunk of a mature tree to at least a similar distance beyond the spread of the branches.

The amount to be used will depend, to some extent, on the local conditions. In order to permit the trees to ripen and mature the wood, sufficiently early in the season, to insure the maximum of winter hardness for the variety, a mulch should be almost entirely decomposed, and no longer capable of conserving moisture, by about the first of August. On soils well supplied with essential minerals and high in organic matter, relatively large quantities of mulch material may be used, providing the trees require it. On poorer soils, where decomposition may be slower, relatively smaller quantities must be used. In general, however, a covering of about four inches of straw, or its equivalent in other material, is sufficient. If the material for mulching must be hauled in, the best time to apply it is during the early winter, preferably after the first snowfall. When tramped into the snow, it will not as a rule, be disturbed by winds, and, in the spring will be found lying compact and close to the ground. In this condition, decomposition starts quickly and the material will remain moist throughout the season, rarely if ever becoming dry enough to constitute a fire hazard.

Where grass or other vegetation, is cut in the spaces between the trees and used for mulch, the first cutting should be made early in the season, certainly not later than the middle of June, and the material applied while moist and green. The next cutting should be delayed until the terminal buds have formed on the new growth on the trees, usually about the middle of August. If mulch is applied during the middle of the summer, tree growth may be unduly prolonged and serious winter injury result.

Armadillo Is Defended

A study of the food habits of the armadillo show that it feeds almost entirely on insects, and is therefore beneficial. In fact, scientists say, the individual armadillo is the greatest consumer of insects among all our insectivorous animals, and the occasional slight damage it may do cannot be urged as adequate reason for an eradication campaign. When an armadillo is rummaging about for food, it may occasionally plow through a quail's nest or otherwise leave evidence that it has been digging, and as a result a casual observer is likely to believe that the animals are destructive egg-eaters. Tests conducted with both free and captive animals show, however, that the armadillos do not recognize whole hen eggs as food. In captivity, it is true, the animals do learn to break quail eggs and eat them; but investigators believe that in the wild they do this rarely. Analyses of the contents of stomachs examined reveal no egg material, but show that the armadillo is a voracious consumer of beetles, ants, grasshoppers, termites, caterpillars, and in fact of all the small creatures it finds by its characteristic method of feeding, rooting in the soil.

Our Eyesight

The development of sight is gauged by the skill and mental development of each individual. Thus to one person a passing auto may be a dark closed car, while a fleeting glimpse enables another, educated in such things, to describe it as a four door blue sedan of a certain manufacture and certain year's model and other distinguishing features. So writes an expert in Hygeia, the health magazine. But eye hygiene depends on other physical facts. For example, the eye, like an arm, would atrophy from non-use. This is one of the not uncommon conditions of the eye. When this condition is caught early enough, the poor eye is put to work, while the patient is wearing glasses, to the exclusion of the good eye. Crossed eyes are usually found in children who are farsighted.

Worth Remembering

What the great author and poet Ruskin once wrote about amusement is well worth remembering—"Never seek for amusement, but be always ready to be amused. The least thing has play in it, the slightest word wit, when your hands are busy and your heart is free. But if you make the aim of your life amusement, the day will come when all the absurdities of a pantomime will not bring you an honest laugh."

Bloodhound Traced Back

to Early Days of France

The name bloodhound, meaning a hound of pure blood, was given this breed of dogs in France, where its ancestors have been traced back to the very earliest history of the country.

On St. Hubert's day (November 3) in France, it was the custom to stage a bear hunt, using large packs of bloodhounds. It was also an old custom for the Abbots of St. Hubert, who bred and maintained these dogs very carefully, to present three couples of hounds to the king of France annually, as a token of their allegiance.

An idea of the great strength of these hounds may be visualized by the report of a later writer, who describes the hounds as dogs of superb qualities; very fast, with grand voices, extraordinary courage and power, even to the extent of throwing down the largest bear.

The bloodhound, formerly used for slave hunting in America, is claimed to be the American foxhound, crossed with the Cuban mastiff, sometimes called the Cuban bloodhound.

Every point and characteristic of dogs which hunt by scent is brought out in bold relief in the pure bloodhound. He is powerful and stands over more ground than is usual with hounds of other breeds. One of the most acute olfactory organs in dogdom is contained in this breed. Temperament is very affectionate, they will not quarrel with humans nor with other dogs; in reality, they are shy in nature and sensitive to kindness or correction.

Trumpets Once Used as Whistles on Sea Boats

During the Middle Ages, when a ship was ready to leave her moorings, two trumpeters would come hastily aboard and, standing in the bow, would blow two long blasts, a signal that the boat was about to set out to sea. The sailors would then rush to the stern of the boat, and with long poles push out into deep water, where the oarsmen began their work. Later, if the wind were favorable, the square, bright-colored sail in the center of the boat was unfurled, and the rowers were permitted to rest.

The two blasts the trumpeters sounded in the Middle Ages are still blown by our magnificent boats, only they use deep-throated steam whistles and, in place of poles, puffing little tugs pull the boat away from the dock.

Previous to the Middle Ages, no shelters had been erected on the upper decks of ships. However, forecastles and additional structures in the stern of the boat were built, thus giving us our cabins of today. The crow's nest was also developed in the Middle Ages. During naval battles, a man would be sent up to the top of the mast to shoot arrows at the enemy.

The sailors of the Middle Ages taught us also the need of carrying extra sails and supplies. On long voyages they often carried thirteen sails and the same number of steering oars. Sailors of those days were not easily daunted.

Wedding Anniversaries

The custom of celebrating silver and gold wedding anniversaries originated in Germany many years ago. When a couple had been married for twenty-five years, friends and neighbors joined in presenting a silver wreath. On the fiftieth anniversary a gold wreath was presented. In each case the wife was the recipient, partly in congratulation that her husband had been spared to her, and partly in accordance with the idea that the harmony of the home depended mainly on the wife and therefore she was more entitled to the reward! China, tin and such like anniversaries are comparatively recent introductions, adopted in imitation of the older custom.

Pine Gives More Heat

Than Heavy Hardwoods

Pound for pound, pine wood gives off more heat than hickory. There is a widespread belief that hickory or other heavy hardwood has a higher fuel value than pine. Tests by the forest products laboratory of the United States Department of Agriculture show the fallacy of this notion, which probably has held sway since stoves first came into use.

A cord of hickory wood, being heavier, may give off more heat than a cord of pine. But most resinous woods, like pine, have a higher heat-production value per pound than nonresinous woods.

Another mistaken idea about fuel wood is that sapwood of long-leaf pine contains more resin than the heartwood. This notion comes probably from the frequent sight of "gum" glistening on the freshly cut sapwood, but not on the heartwood. Although the resin is formed in the sapwood, it is stored mostly in the heartwood, according to the forest service.

Famous Cassie Chadwick

The famous Cassie Chadwick was regarded as one of the cleverest women to succeed in swindling of bankers and others, for which she was sentenced to ten years' imprisonment in 1905; she died two years later in the Ohio state penitentiary. She was born at Eastwood, near Woodstock, Ont., in 1857, as Elizabeth Bigley and she was first tried for forgery at the age of sixteen. A short sketch of her criminal life is given in Charles Kingston's "Remarkable Rogues." For a time she practiced clairvoyance; she posed as the daughter of a former American President, the widow of an earl, etc. She forged the name of Andrew Carnegie to get a big bank loan, while the frauds led to the failure of one Ohio bank. Her cleverness in extracting large sums from millionaires through her impostures gave her the name of the "Madame Humbert of America."

Great Dane Is Not as

Fierce as He Appears

The absolute fierceness of the Great Dane's appearance is not due to the expression of his eyes; they are intelligent and vivacious, lacking the hardness of the terrier. Nor is it attributed to the clean, well-arched neck, snakelike in its carriage, supporting a large, powerful and excellently modeled head. Nor to the elegantly outlined massive form that combines the grace of the greyhound with the almost tigerlike power of the mastiff. His high leg action effecting a lithe, free and springy gait is far from fierce, as is the graceful carriage of his strong tail that suffers serious injury when it strikes with force, obstacles encountered on its pendulous swing of happiness.

None of these is responsible; the vital point of deception is the cropped ears. No less beautiful, Great Danes with wide flapping uncut ears possess a friendlier and more gentle appearance.

It is Germany that lays greatest claim to the dog's development. In forming the new German empire in 1870, dog lovers of the patriotic populace, craving an emblematic national dog, selected, because of his elegance and power, the Deutsche Dogge, or Great Dane as he is still known in the English-speaking countries.

His origin is obscure. However, representatives of a breed sufficiently similar to be his ancestors, are to be found on the oldest Egyptian monuments. Most claims suggest the Irish wolfhound and mastiff as foundation, but all claims are still questionable as is the derivation of the name Dane. It can be assumed only that at some time or other he was a Danish breed.—Los Angeles Times.

Egg Grade Responsibility

In case of dispute about properly marked cases of graded eggs, the Canadian egg regulations are quite explicit. No case or container of eggs is considered too properly marked if, upon examination by an inspector, the case is found to contain more than an average of 6 1/2 per cent. below grade, apart from breakage. In transactions between wholesalers or between a wholesaler and a retailer, any complaints by the purchaser with respect to eggs below grade must be made to the seller within 36 hours of the receipt of the eggs. Thus responsibility as to eggs below grade is upon the seller for a period of 36 hours after delivery to the buyer. After the expiration of the 36 hours the responsibility as to eggs, below grade is upon the person in whose possession such eggs are found.

Drying-off Cows

The most economical period for a cow to be dry is 6 weeks. Some cows, however, are very persistent milkers and their owners do not like drying them off too quickly for fear of causing undue trouble. There are three methods commonly used in drying-off cows, namely, (1) incomplete milking, (2) milking less frequently—usually once a day, and (3) ceasing to milk altogether. Experiments have shown that the last method is the best. Cows can be dried off the most rapidly, and without any ill effects to the udder, by ceasing to milk altogether even when these are giving up to 20 pounds of milk per day. Putting cows on dry feeds is a great help in drying them off.

Pawpaw Contains More Protein Than Banana

The pawpaw (custard apple) grows wild in the woodlots in some sections of the country. In flavor and general character it resembles tropical fruits much more than fruits commonly grown in temperate climates. In many respects it resembles the cherimoya (a Mexican and West Indies product) and the soursop of Florida. The creamy-white flesh which melts in your mouth has a rich, most delicious flavor, which suggests a sort of glorified banana, although far superior to the latter in flavor.

The pawpaw is superior to other fruits, according to an authority, in the amount of protein it contains which is four times that of the banana. The flesh is soft with no fiber and requires no mastication. It has never been extensively cultivated though there is no reason why it shouldn't be. The tree grows rather rapidly and attains a height of about 30 feet. The flowers in spring resemble those of the wine-colored blossoms of the wild ginger. The fruit resembles an over-stuffed banana, first green and then turning brown in fall. The first nip of frost imparts a delicate flavor to the fruit and this is the best time to eat it. The wood of the pawpaw has little commercial value being light and soft and subject to rapid deterioration.

The Word "Process"

The preferred pronunciation of the term "process" is pro-ses—o as in plural, says the Literary Digest. The plural is formed by adding es, but the accent is not shifted. The pronunciation "pro-cess" is an affectation without standing. A secondary pronunciation is preferred in England, but the Universal English Dictionary, published in London, which aims to give the pronunciation common to and preferred at Oxford university, does not recognize a plural form with stress of the third syllable, nor the pronunciation of the termination es as eez in processes.

Where Spices Come From

Many of the world's spices come from Singapore's nutmeg groves, cinnamon and clove plantations and vineyards which produce white and black pepper berries. Coconuts and coffee beans grow abundantly on this verdant isle. Being near the equator, the sun rises and sets at the same time throughout the year. The air is fragrant with the odor of growing spices and the temperature is always like that of moist July. The Southern Cross, most famous of constellations, is visible there and natives claim that no night is as beautiful as one of Singapore's.

Totem Poles Used in Florida

The average person usually thinks of totem poles in connection with Alaska or the Far North, yet a genuine eagle totem rudely shaped from heart pine was unearthed in south Florida. The specimen was found near the south bank of Fishcreek, about four miles on a line west of Lake Okechobee. The exact spot where it was found is 100 feet east of a large Indian mound called Fort Center, in Glades county, Florida.—Scientific American.

Plane Like Bat

One of the curious flying machines of the early 1800's was constructed in imitation of a bat, with a frame below for carrying the driving power and the load. The wings, made of bamboo, covered with silk, were made to oscillate and given a rocking motion. A means of propelling this machine by an electric current from lines on the ground dispensed with the weight of batteries. Of course, no great distance could be covered.

WINGS OF FORTUNE

BY
LESLIE BERESFORD

CHAPTER I.

OTHER PEOPLE'S LUCK

"If I may trouble you so much little lady, I'm wanting to be off to Paris and the Riviera as soon as possible, and I'd like you to fix things up for me!"

The pleasant baritone voice drifted to Sylvia Darnley's ears, awakening her from a daydream. She had been gazing out over the great marble entrance-hall of the Malchester Palace Hotel, which was warm and brilliantly-lighted and crowded with those well-dressed, comfortably-circumstanced people, who were usually to be found in this expensive type of place.

Perfumes from beautifully-frocked women lingered caressingly on the heated air. An aroma of choice cigars came from the lips of opulent men. Distantly, an orchestra lifted a dance-melody, a soothing shimmer of strings floating above the chatter of those who lingered in the palm-lounge over their after-luncheon coffee.

In the big kiosk of Moorish design, which was the hotel travel-bureau, set in a corner of the entrance-hall near the lift and palm-lounge, Sylvia had just been considering the irony of her lot, when the pleasant baritone voice intervened with its polite request.

She looked up at the owner of the voice, whose dark eyes were regarding her meanwhile with an expression which suggested unlimited approval of her, of himself of the world in general. She was sorely tempted to lean forward over the shiny, glass-covered counter between them ad-

dressing him something like this:

"Well, that's why I'm here. But you needn't look so disgustingly pleased with yourself about it anyhow. You're not the only person wanting to go to Paris and the Riviera, or anywhere else out of this beastly foggy Malchester. You're just one of the lucky ones, with enough horrible money to lease yourself, that's all. If only I were in your shoes....!"

The last was a foolish suggestion, anyway. For he was rather a tall young man, and built in proportion. So her very small feet would have been completely lost in the substantial pair of brogues he was wearing, besides, such things were not said, however true they might be in substance, when one has a job which must be held at all costs.

Lastly, and the thought called a quick flush of color prettily to Sylvia's cheek, he was quite a nice young man as well, and meant no harm. He had been about the hotel foyer a good deal in the last week. He had spoken to Sylvia often beginning with some business excuse, gazing on from that to talk of the weather, or about Malchester, which it seemed he had known when he was younger.

Not that he was at all old now. He looked little more than thirty, at the most. Sylvia had liked both his voice and quiet manner, had felt unusually interested in him, even found herself wondering who and what he might be. And now he was off to Paris and the Riviera. She would never see him again. He would join the long procession of people in this hotel, who had come and gone with her to help them on their way.

Sylvia caught at her breath, felt that she was giving way to very foolish thoughts, drew towards her the continental time-table and other papers necessary to go through the usual routine.

"Paris and the Riviera?" she smiled up at him. He nodded.

"If you don't mind! You looked at me just now, you know, as if I'd no earthly right at all to be going there!" he laughed.

"Did I?" She turned embarrassed eyes from his quizzical gaze, felt the colour more warm than ever in her cheek, and stammered an awkward evasion: "I—really, I'm afraid you caught me miles away in thought when you spoke—"

"As a matter of fact," he interrupted her smilingly, "I was on the point of offering you a penny for those far-away thoughts of yours. Only—that would perhaps have sounded rather a cheek, wouldn't it?"

"It would have been a shocking waste of good money!" she retorted, laughing now in turn, a little emboldened as well, because—after all—they had been on speaking terms and—he really was rather nice.

"If it would interest you to know the truth," she found herself confessing quite frankly, "I was thinking something like that about you. When you came along wanting to go Paris and the Riviera, I had just been telling myself what hard luck it was on me that I have to stay here helping you fortunate people to go away and enjoy yourselves in all those nice places I'm just dying to see and probably never will."

"Oh don't say that!" he protested, smiling. "You've plenty of time yet for the luck to change. Besides it isn't always a question of luck, or pleasure, when people go where I'm going. It may be—as in my case—business."

"I shouldn't care what took me there, so long as I could go, out of this dreadful Malchester, and its fog, and—"

Sylvia's impulsive tongue stumbled to silence. She realised suddenly that she ought not to be behaving in this way, and opened the time-table hurriedly.

"Oh, let me get rid of you to Paris and the Riviera!" she laughed a little, shakily. "I've no right to be talking about myself. And—if you're in a hurry to—to get across the Channel—"

She glanced at the clock, began to look up trains. He had just about time, she told him, to get through to Southampton for the midnight boat to Havre, unless he preferred to go by air from Croydon. He wasn't it seemed, in such a hurry as all that. So long as he reached Paris next day, that was time enough for him. Two days there for business, and then on to Monte.

Since he chose a most expensive hotel for his stay in Paris, and an equally exclusive one in Monte, with good-priced rooms at each, it was obvious to Sylvia that money was of consideration with him. Whether he was going on pleasure or not, he could afford to do himself well.

Meantime his name which she had to enquire for booking purpose proved to be Fellowes. John Christopher Fellowes. While making sure that his passport was in order, she could not help seeing that he had

Exercise, Right Food Holiday Substitutes

If You Have That Tired Feeling and Can't Get Away, This Advice May Help

Along about this time of year, vitality is at a low ebb and a girl's reflection in the mirror isn't apt to please her. Her complexion seems to be grayish, tired lines appear around mouth and eyes, her neck is stiff when she wakes up in the morning. Something must be done, of course. No one wants to go on feeling out of sorts and looking tired and wan. A vacation probably is the most effective way of getting rid of "spring fever." If you possibly can, take a trip somewhere and get away from the typewriter, sewing machine, children or what have you. You'll be surprised at what one short week will do for your disposition and your looks as well.

However, if you're one of those people who never seem to be able to take a vacation, substitute exercise, the right food and some home beauty treatments for a holiday in the country or on a boat. They're inexpensive substitutes and really quite pleasant.

First, make sure that your drinking ten glasses of water each day, a dash of lemon juice when you get up in the morning. Walk to the office or, if your work is confined to the home, take a brisk walk as soon as the morning's housework is done. Get ten hours sleep every night and do some setting-up exercises when you get out of bed.

New Argument About A Political Career

ALBANY, N.Y.—There is no doubt but that a legislative career agrees with Miss Doris Byrne, only woman member of the New York Legislature. She has gained six pounds.

"Really, I'm getting worried about it," declared the comely young Bronx Democrat. "My only hope is that I'll lose it all in the excitement of trying to get re-elected this fall."

Silver Jubilee

Great Britain, India and the British Dominions lay plans for King George's silver jubilee one year hence. May 6th, 1935, is expected to usher in a celebration equalling Queen Victoria's golden jubilee in 1887. Since the union of the crowns of England and Scotland 13 sovereigns have sat upon the throne, only four of them longer than George V. Always popular, the great war and the great depression afforded real opportunities to which this democratic ruler rose.

"To find a cat with loyalty would be like finding one with five ears."—Albert Payson Terhune.

ART LITERARY SERVICE

39 Lee Avenue, TORONTO

The Smart Bedroom Is Done In Modern or Classic Manner

Naturally you want your bedroom to convey an impression of peace and repose. But whether you furnish it in modern style or use some of the lovely adaptations of period pieces depends entirely upon your individual taste.

A walk through the furniture shops or departments of any of the fine modern stores will furnish you with plenty of inspiration. You will see fine woods wrought with skillful craftsmanship into pieces of rare and enduring beauty. Pieces that you will be proud to own and to hand down to your children. For one of the outstanding characteristics of the new furniture is that it is soundly and substantially made. If the modern trend has done nothing else, at least it has re-established a regard for value and lasting worth in furniture. For it is a type of furniture that admits of no slighting in construction. Everything must be sound and substantial.

SIMPLE, RESTFUL DESIGNS

One of the most distinguished of the modern bedroom suites was modern in inspiration. The pieces were made of beautifully matched woods—the grain of the wood forming an important integral part of the design. The twin beds had plain head and footboards with the grain meeting in the middle to form an effective pattern. The beds and each piece in the set were outlined in ebony. The drawer pulls were formed of oblong blocks of highly polished wood. The large round mirror over the dressing table was set in a black ebony base—the top entirely without a frame. Above the mirror a long cylindrical light of frosted glass was fastened giving a clear bright illumination for make-up. Another dressing table, also in the modern manner was illuminated by indirect lighting—the bulbs set into the top of the table, throwing the light upward and directly on the face so that there were no shadows—a very important feature as every woman who has struggled with old-fashioned methods of illumination can tell you.

Low triangular or square stools are used before the dressing tables. An especially notable feature in bedroom furniture of modern design is the efficient way the chests of drawers are designed. Any man will delight in the easy sliding drawers that open to display large storage place for masculine belongings.

ADDITIONAL BEDROOM PIECES

If you are doing your bedroom in the modern manner you'll be fascinated by a lovely chaise longue upholstered in soft beige fur fabric. It

is luxurious in the extreme and there is a small arm chair to match. These pieces are typical of the comfort and ease of this modern furniture. It is severely simple in design yet highly effective.

New York Dresses Up in New Clothes

New York's new night season is in full swing. There were some prophets who would have bet that no night haunt would open ever again and that the revolutionists would take over all the best locations. But New York is getting riotously gay and dressing itself up in the newest clothes to be found. The woman who has pouted through a few years with a \$32.50 dress on her back is now flouting a \$75 number. The Place Pigalle, one of the gayest spots in town after theatre, is bidding for the smart women. They definitely have bought the best of the Molyneux, Mainbocher last-collection-Paris clothes and that means the Japanese trend. Bordered large-pattern prints, tunic silhouette, etc.

Porridge Stays On Menu Till Summer

LONDON, Eng.—All is well again at the London County Council institution in Fulham road. Porridge is to remain on the breakfast menu until summer.

There was pandemonium at the home when the master introduced a summer diet and cut out the porridge. The chairman of the L.C.C. Central Committee controlling the institution and a public assistance officer went around and smoothed the ruffled inmates.

They also decided that objectors need not say grace before meals or prayers in the morning and evening.

"The only true source of politeness is consideration—that vigilant moral sense which never loses sight of the rights, the claims, and the sensibilities of others."—Simms.

Ease Pain, Headache in Few Minutes

1 PEG, I'M FRANTIC, THIS WORK MUST BE DONE—AND I'VE A SPLITTING HEADACHE

2 LATER

LOOK WHAT I'VE DONE, PEG... ASPIRIN SURE STOPPED THAT AWFUL HEADACHE IN A JIFFY... NEVER FELT BETTER!

DON'T WORRY, GET SOME ASPIRIN TABLETS AND YOUR HEADACHE WILL BE GONE BEFORE YOU KNOW IT...

I KNEW IT WOULD! ASPIRIN IS THE QUICKEST SAFE RELIEF FROM PAIN KNOWN...

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that BEFORE it touches bottom, it has started to disintegrate. What it does in this glass it does in your stomach. Hence its fast action.

Does Not Harm the Heart

MADE IN CANADA

Christie's Arrowroots

For more than eighty years preferred and

Approved

by the mothers of Canada because of their proven purity and maintained quality.

DEPARTMENT of PUBLIC WELFARE

Provides for:

The dependent aged—through the Old Age Pensions Plan.

The dependent widow and children — by means of Mothers' Allowances.

Neglected children—through Children's Aid Societies.

The socializing of problem boys and girls—in Training and in Industrial Schools.

Needy veterans—through the Soldiers' Aid Commission and Veterans' Welfare Service.

YOU'LL HAVE "BETTER LUCK" WITH

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernet's Powder. Largest seller in world—holds plate so tight they can't annoy yet so comfortable they actually feel and act like your own. Keeps mouth sanitary, breath pleasant—special comfort-cushion prevents sensitive gums from getting sore. Small cost—any drugstore.

FRETFUL BABIES Quieted!

"If my three baby boys were restless with colic or peevish from their teeth I gave them a Baby's Own Tablet and they were soon asleep," says Mrs. T. Tweedy, 475 Millwood Rd., Toronto. These sweet little tablets remove the cause of fretfulness and the child becomes happy and well again. All the common ailments of little folk are promptly and safely corrected with Dr. Williams' Baby's Own Tablets. Price 25¢ at your druggist's.

Issue No. 20-'34

Woman's Chatter...

By Mair M. Morgan

TORONTO WELCOMES MARY

Mary Pickford, who was born at No. 211 University Avenue, Toronto, and left the home town to become America's Sweetheart, returned to pay a visit in this, Toronto's centennial year.

An undemonstrative crowd greeted her, but there was no doubt that everyone was cordially and sincerely pleased to see the famous star. Her welcome to the city of her birth was in extreme good taste. No wild outbursts—only a quiet murmur—"There she is" as her car drove through the streets, the sidewalks packed with her fans and friends.

Toronto may be congratulated on the restraint shown and Miss Pickford must have found it a pleasant change from the wild scramblings of the crowds and persistent questions of the newspapermen of other cities.

CONSIDERATE

Here is an idea that might be copied the world over. The British Post Office, in a campaign to popularize the telegraph service, has brought into use the night telegraph letter with bright green envelopes so that recipients of such letters will know at once they do not contain bad news.

I think that is one way of overcoming the feeling we all have, don't you? How many times have we all experienced that awful thumping of the heart while we stare at an unopened telegram, expecting direful tidings. And when we tremblingly scan the message we find mother has left her diamond ring on the shelf in the bathroom, will we please put it in safe keeping?

JOLLY MOURNERS

Last week two hundred friends of one Peter D. Post, of Bad Axe, Michigan, who died a year ago, met at a banquet.

It seems Mr. Post was an optimist and asked his friends not to mourn his death.

In his will he made provisions for the banquet, stating in the document "I do this for the boys to have a good time in my memory, desiring that they leave their long, sober faces at home and be sociable and jolly."

HOW WOULD YOU FEEL?

James Kemper, widely known character actor, who specializes in the portrayal of sinister roles, is undergoing treatment from two psychiatrists in New York because of a growing tendency to live the parts he plays!

I have often wondered that there were not more cases of this nature. Acting an intense role night after night, it seems to me, would eventually have an effect.

Kemper, when interviewed, was reluctant to discuss the matter as he feels people might be inclined to think him crazy.

It seems two weeks ago he was doing a gunman skit in which he killed his girl and is cornered by the law. When he finished he went to his dressing-room and continued the act. He attacked his dressing-table and went into alternate fits of ferociousness and fright.

About twenty minutes later he was found cringing in a corner, still apparently believing the law had him trapped. He soon recovered his normal senses but the two nerve specialists are watching that he does not have another relapse.

Tennis Rig

By HELEN WILLIAMS
Illustrated Dressmaking
Lesson Furnished with
Every Pattern

Sporting days are here again! You'll be needing a smart little tennis rig like this.

Why not have it? It's remarkably simple to make it. And won't you be surprised when you find out how utterly inexpensive it is as the original.

The shirts are brown linen crash.

The shirt is yellow cotton broadcloth. And of a smart change make another outfit with plaited shorts and shirt of checked red and white seersucker.

Style No. 3247 is designed for sizes 12, 14, 16, 18 years, 36 38 and 4 inches busts. Size 16 requires 1 1/2 yards of 10-inch material for blouse with 1 1/2 yards of 39-inch material for shorts.

Curious Facts

Throughout the world today, more rice is consumed than any other kind of food.

The largest underground "city" in the world is the Witwatersrand Gold Mine, near Johannesburg, South Africa, which has more than 4,000 miles of subterranean shafts, streets, and avenues, and employs, under normal conditions, about 190,000 workers.

Japan believes that it has preserved for 10,000 years a complete record of its 1923 earthquake. The documents are enclosed in fused-quartz bottles filled with argon gas and encased in thick coverings of asbestos, lead, and carborundum.

Musk, the world's strongest and most penetrating odour, is so powerful that when a man opens a musk-gland it frequently causes his nose to bleed.

During a radio conversation across the Atlantic, the voice has to be amplified ten million billion times by the station that receives it.

Max Mannison, of Denver, snapped his fingers and said: "When I die I want to go just like that." Thereupon he died.

Medical history records more than 200 cases of reversed body construction in which from one to nearly all of the vital organs—such as the heart, liver, and stomach—were on the wrong side. The condition did not interfere with the health of the individuals.

The world's record for the fastest top speed of an aeroplane propeller is 1,500 feet a second, or a mile in less than four seconds.

Criminologists have developed a new method of identification through

the analysis of human hair, which they have divided into more than 21,000 classifications.

The only domestic animal that is bred profitably in the Arctic regions is the reindeer, because it requires neither hay for food nor shelter. There are more than 125,000,000 of them, and it is not uncommon for single breeders in Arctic Siberia to own herds of 10,000 at a time.

How to Prevent Nose And Throat Affections

"Much may be done to prevent those nose and throat affections that are so troublesome in the spring months, especially amongst indoor workers," writes Sir W. Arbuthnot Lane, in the New Health Magazine. The first point is correct breathing. Remembering that the nose is a most efficient filter to dirt and germs we should breathe deeply for the deeper we expand our lungs the more oxygen our blood receives and the more able it is to resist germ infections. A few deep breathing exercises every morning in front of an open window will do a great deal for the health of the air passages and of the body generally.

How to blow the nose is also important. During a cold or windy spell some secretion gathers normally in the nose and it should be got rid of in a proper manner, thus: breathe deeply, sniff forcibly and then compress one nostril expel all the air through one passage and repeat this process for the other side. There is a useful hint which may help to prevent nasal catarrh. In some people the hair round the nostril which entangles dirt and germs is thin or absent. By daily application of a little vaseline containing menthol around the nostrils it is possible to stimulate this growth of hair which is undoubtedly a valuable check to germ infections of the nose and throat."

Shape of Face Governs Coiffure

If you're planning a new coiffure, carefully consider the shape of your face.

A round face is flattered by the new windblown arrangements but the forehead line should be exposed to give length to the profile. Waves should be wide and soft, but distinctly slanted to eliminate the broad effect.

The girl with a square jaw can easily wear curls about the back of her neck and her waves should be soft and feminine. For evening, she may be a little more extreme and tuck her fair locks behind her ears. The pointed face usually needs width and the woman who has one ought to wear her hair quite fluffy about her face. If the hair is bobbed, that makes it simple. If not, try letting the waves fall free about the cheeks instead of pinning them in place.

Of course, the very first essential for a becoming coiffure is clean, shiny, healthy hair that is easy to arrange and which will still be attractive even after your perfect coiffure has become slightly disarranged. Shampoo at least once every two weeks unless you have a special reason for not doing so and always put a towel or bathing cap over your hair when you apply or remove make-up.

Taking Snuff New Fashion in London

The elegant manner of our forefathers in taking snuff promises to become the newest fashion of tomorrow.

And it will not be a fashion among men only. English women, old and young, are taking to the habit—not coyly and secretly as our grandmothers and great-grandmothers did, but openly and on level terms with men, in the same way as they have taken to smoking cigarettes.

One London West End tobacco dealer told a reporter he had 50 or 60 customers a week for snuff where he used to have three or four.

This experience was confirmed by another tobacconist.

"I have plenty of women among my customers," he said, "but women have always been snuff takers. Our books show that we used to supply it to George IV., Queen Charlotte, and many of the royal princesses."

"Since those days its use has fallen away very much, largely, so it is said, because of the introduction of the white handkerchiefs. In the old days, coloured handkerchiefs were invariably used."

"The steady growth of the snuff habit can be attributed to the belief that it is a specific against colds and influenza. A doctor told me of a case where the whole of a hotel staff, threatened with an influenza epidemic, were offered snuff. Those who took it escaped and almost without exception the others caught it."

A SMILE

Mrs. Poe—How are you, Mrs. Perkinson?

Mrs. Perkinson—Oh, I've nothing to grumble at.

Mrs. Poe—Mr. Perkinson away, then?

When Your Bridge Club Comes to Lunch

Serve a Fruit Salad — Recipe Given Below

What a problem it is to think up something different in the way of refreshments when it's your turn to have the bridge club for lunch! Every member has served chicken—a la king has had a good run for its money, too. The delicious winter concoctions simply won't do at all in the springtime and it's not warm enough to start planning on paper-thin sandwiches and iced drinks.

What, then, is a hostess to do? Well, she can always fall back on that old favourite, fruit salad, but if the guests are to show one solitary speck of interest for the dish, it must be dressed up and served in some new and interesting manner. Why not put the fresh fruit into the skins of bananas that have been sliced lengthwise and call them Dream Boats?

Here is a novel recipe for fruit salad: Allow one banana for each person to be served. Cut them lengthwise, remove pulp and arrange the skins on crisp lettuce on huge platter.

Mix one-half cup of grapefruit pulp and one-half cup of white grapes with one-half cup of diced orange pulp. Add a few chopped nut meats and fill each boat with it. Garnish scooped out to make the boats. Moisten the mixture with French dressing and fill each boat with it. Garnish with maraschino cherries and serve with toasted cheese crackers.

Wants To Marry

Debutante Sister of Mrs. Kaye Don Wants to Marry Man Listed as Hairdresser

Greenwich, Conn., — Miss Sylvia B. Martin 18, Greenwich and New York City debutante and sister-in-law of Kaye Don, the British speed pilot, and Robert E. Ezequille 25, who gave his business as insurance, took out a license to wed yesterday.

Miss Martin, one of nine daughters of Leonard J. Martin, who was reported to have made \$120,000,000 after the Great War, while he was a resident of England, by buying up airplane linen from the British Government and selling it, was told she would have to have her parents' consent to marry.

Town Clerk Howard W. Allen, who issued the license said Miss Martin is under age (Connecticut law requires a girl to be 21 years old to wed), but he filed the license, pending Miss Martin's consulting with her parents.

Although Ezequille, who works in Greenwich, said he was an insurance man, he is listed in the city directory for Stamford, where he lives, as a hairdresser.

At the age of 21, Sylvia's sister, Eileen, married Kaye Don, September 15, 1932.

Finnish Couple Surprise Nurses

Girl Calling on Fiance in Hospital Brings Minister and is Married in Public Ward

Sudbury, Ont. What sisters and nurses of St. Joseph's hospital thought was purely a social visit proved to be a wedding as J. Victor Jutila and his fiancée, Senja Amanda Kytola, of Worthington were married in the public ward by Rev. V.J. Hanninen of Copper Cliff. The groom sat up in bed during the ceremony. Attending hospital officials did not even know a wedding was going on.

Asked if that was the first wedding in the hospital, Sister Secretary Aldegonde looked startled and then exclaimed: "This is news to me. It is the first I have heard of it. They must have just had a short ceremony and talked in Finnish so we didn't understand what they were saying. I think it is the first wedding of that nature we have ever had."

Jutila was admitted to the hospital with both his legs fractured after an automobile hit a sleigh he was driving. Some time before the accident he had asked Mr. Hanninen to marry him but he was told he would have to obtain a license and then wait for three days, and he did.

Mr. and Mrs. Victor Salo of Copper Cliff were called as witnesses and the ceremony was performed during the regulation visiting hours.

More Marriages Show Business Is Better

MERCER, Pa.—Sure signs of recovery—smashing an all-time record of 130 years, 525 marriage licenses have been granted at the county court house since January 1. Of this number 113 have been issued in the last 13 days.

"Crying" Squires are springing up throughout the county and "business" competition is so keen that advertising is being used.

FOR SOUND HEALTH WATCH YOUR DAILY DIET CAREFULLY

A Properly Balanced Diet Will Keep Disease Away — There Is No Happiness Without Good Health.

By "Bon Sante"

Health! In that small word is embodied most of the joy and happiness of this world, and most of its miseries. With good health there are no heights of peaceful and joyous achievement, while the whole record of human history is strewn with the wrecks of promising lives broken and ruined through ill-health and disease. As it was in the past, so it is today.

Is there a remedy? If so, what is it?

There is a main remedy, and that remedy is diet. All other measures, important though they may be in keeping the body strong and healthy, are subsidiary and complementary to the one main factor, what we eat. If we are eating properly our chances of enjoying good health are fairly sure, but if we fail to observe sound dietetic laws illness and disease are sure to follow. No amount of exercise, fresh air, domestic sanitation and health laws can withstand a persistently faulty diet.

There is no gainsaying the truth of the above. Our hospitals are filled to overflowing with victims of faulty diet, as practically the whole gamut of human disease can be traced directly or indirectly to a wrong diet. When it comes to incorrect eating the strong are bowled over the weak, and it is only the timeliness of medical action and the perfection of modern medical science which is saving thousands of people annually from an early grave. Many there are who cannot be saved since the extent of their dietetic indiscretions are too much for medical science to cope with.

So, it behooves all of us to look into the question of our diet and correct our dietetic errors, such as they may be.

The subject is a very broad one, which many books have failed to cover completely, but is worthy of the

closest study.

Bread, for instance, has been known all down through the ages as the staff of life. But, bread is only a baked product of grain, so we must understand that grains of various kinds, mainly wheat, are the principal foods with which life is sustained. All other foods are only supplementary in providing the body with the minerals, salts and sugars required to keep the body in complete working order. Since grain is such an important item in our daily food we make no unsupported statement when we suggest that we should eat the whole grain, not a refined product such as is represented in white flour. Therefore, for sound health eat wholemeal bread and wholemeal products. The indications of the broad-based viewpoint on whole wheat is seen in the great number of whole wheat products which have come on the market recently.

But, if we stuck to wholemeal and ate nothing else we would be rather ponderous individuals. We would be strong in bone and tissue, but we would lack the liveness and buoyancy of body and spirit which goes with sound health. So, to have balance to our diet we must add fruits and vegetables. They are absolutely essential and should be eaten lavishly. Never a day should pass without them.

Milk, butter and eggs should also occupy a place and there need be no ban on the great variety of other wholesome foods in general use, but all such foods should be eaten in the greatest moderation, particularly meat, fish, nuts, etc., otherwise the organs of the body would be overworked in trying to digest a greater quantity of food than is required to sustain life.

"Bon Sante" will be pleased to answer questions. Simply address "Bon Sante" care of this newspaper, enclosing self-addressed stamped envelope.

Students Report the World News

World news is served up with dinner every evening now at Abbot Academy, the girls' academy at Andover, Mass. But the method is not the usual one of tuning in a favorite radio station. The students take turns at giving their own resumes based on their selection of the most significant events of the day. The young speakers rarely use notes while on their feet.

The custom fits into the policy of making the girls citizens of the world, while living on the tranquil, century-old campus. This is a policy of relating happenings of importance to their academic subjects and to the life outside the classroom. For example, the struggles of many nations today for financial and political stability come up for discussion in the history, language and even in the mathematics classes; and news of writers, artists, musicians, scientists, and others give opportunity to mention their achievements.

The "dinner current events" talks

have proved valuable in a number of ways, according to Miss Bertha Bailey, the principal. The students pay close attention, generally, not only because of an interest in the news but because those in certain classes each year know that they will be expected to speak several times, as part of their training, and are observant of the methods of others.

The preparation of these news reports is proving valuable for the practice it affords in scanning newspapers intelligently, in learning to read quickly and receptively, and in making the most efficient use of the time allotted for study.

Crowded

SAN RAFAEL, Calif.—Though Ed. Baier was locked in a telephone booth by a robber, who looted his pool hall, he couldn't reach the receiver to notify police. Eight of Baier's customers were locked in the five-foot square booth with him and it was too crowded.

Our Sketch Club

Lesson No. 7

In lesson 4, Exercise 6, we suggested drawing three cubes on top of one another placed at the left side of a cylinder. The top cube to be white, the second cube to be grey and the third cube to be the darkest. Fig. 40 illustrates that problem. Compare the results with your own sketch.

Fig. 41, is an illustration of a hollow hexagon, and exemplifies the effect of reflected light and cast

shadows. The upper side is illuminated by direct light and the darkest side is next to the light side. You will see that this tone is not uniform, but that it is darker at the end nearest the eye and along the edges, gradually becoming lighter as it recedes.

The third side is strongly illuminated by reflected light from the white ground and is joined by the cast shadow; the extreme dark is along the line of conjunction. The edges of shadows are the strongest near the eye and decrease in strength and intensity as they go away from the eye.

Most of the illustrations used in these lessons are known as "Still Life" subjects. Figs. 42 and 43 are still life objects used in story illustrations, and Fig. 44 was used in an advertising design, note the use of the spread lines.

You will find many objects around the home from which excellent still life drawings may be made.

After making some real good studies from still life objects you should

be ready to sketch from nature, a subject which will be taken up in our next lesson.

Ex. No. 12. If the weather permits, go out of doors and make at least three still life sketches, if not you may make three sketches in the home.

Watch for a special announcement with the next lesson.

Questions will be answered in this department. Anyone wishing to receive a personal reply, may have same if a 3c stamped addressed envelope is enclosed with the request. The Art Director, Our Sketch Club, Room 425, 73 Adelaide St. West, Toronto.

Dale's Tinshop

WINTER DAMAGE

The past Winter has been hard on roofing and eavetroughs and now is the time to check up on the damage and have them replaced or repaired.

Estimates gladly furnished on Bath-room equipment and the installation.

Headquarters as usual for Stoves, Ranges, Tinware and all Kitchen Utensils.

DALE'S TINSHOP, Centre St., SHAWVILLE.

At the last regular meeting of St. Paul's Ladies' Guild it was decided to hold the annual garden party on the Rectory grounds on Thursday evening, June 14th.

The home of Mr. and Mrs. Adolphe Martineau, at Quyon, was totally destroyed by fire on Friday night last. The fire started from overheated pipes in the upper story and spread so rapidly that none of the contents could be saved. The loss is estimated at \$2,000 with no insurance.

The Renfrew Mercury, says:—Provincial Constables Johnston and Brown went over the Portage du Fort way on Friday evening but did not go the whole distance. They halted close to the Ontario end of the main bridge and proceeded to search cars for contraband wet goods purchased in the province of Quebec. In some cars none was found; in other cars a limited number of bottles were located. The beer was confiscated and its owners informed that their presence at a magistrate's reception was a matter of some urgency.

First Quintuple Birth in Canada

Birth of five daughters to Mrs. Oliva Dionne, near Calander, Ont., is the first quintuple birth in Canada, so far as he knows, Dr. F. C. Routley, general secretary of the Canadian Medical Association, said Tuesday of this week.

"It is not a world record, it is a Canadian record, so far as I can recall," said Dr. Routley. "At any rate, I would say 'congratulations' to the mother and father."

Maternity specialists in Ottawa stated that the birth of quintuplets was most unusual, and especially when the mother was so comparatively young and had already given birth to six children. Mrs. Dionne is 26 years of age.

Dr. W. J. Stevens claimed he had never heard of such an occurrence in Canada before. In Italy, he said, although not an everyday happening it was known for quintuplets to be born.

Approximately 700 mental defectives in Ontario cannot be taken care of at existing institutions owing to lack of accommodation, will be taken in at the new institution to be established at Smiths Falls. Work on the new hospital has been commenced; total amount involved is \$1,000,000 and three years will be required to complete the building. 600 acres of land are included in the grounds around the new building.

Trying to Save Bicycle Two Youths Drowned

Montreal, May 26—In an effort to save a bicycle from falling, two youths lost their lives here last night when they fell from the Canadian Pacific Railway Bridge over the St. Lawrence River between Lachine and Caughnawaga. The victims were Joseph D. Horn, 17, and Joseph Horn, 16, cousins, both of Caughnawaga.

Store house at Otter Lake Destroyed by Fire

The store-house of Mr. W. A. Moore at Otter Lake was totally destroyed by fire on Tuesday of last week, with all contents which included a Studebaker sedan, and all shanty and lumbering equipment belonging to Mr. Moore. The loss, amounting to several thousand dollars, is only partially covered by insurance.

Miss Winnie Horner is Chosen for Special Course

Miss Winnie Horner, youngest daughter of Mr. and Mrs. Henry Horner, Clarendon Front, who completes her Intermediate Teachers' Course at Macdonald College this month, is one of three girls in her class chosen for a special course in social service work in New York City. The course, of six weeks, is sponsored by the King's Daughters and the young ladies will be expected to institute social service work in their respective teaching communities under the guidance of the King's Daughters.

Exceptional Values In Boys' Two-pant Suits

**FRED. E. HENDERSON,
BRYSON, QUEBEC.**

Standard Church

Evangelist M. Ernstman, will be in charge of special revival services conducted at the Standard Church, Shawville, commencing Tuesday evening, May 29th, at 7.45 o'clock. A cordial personal invitation is extended to all.
 REV. M. S. SLACK, Pastor.

DEATHS

Mrs. Annie Park

The death occurred at her home Elmside, on Sunday morning, May 20th, of Annie Sly, widow of John Park, in her 75th year.

The deceased who was a daughter of the late Mr. and Mrs. John Sly, of Clarendon, has resided in Elmside for the past 35 years. Her husband predeceased her 18 years ago. The funeral service was held on Tuesday afternoon, May 22nd, at her late home and was conducted by the Rev. F. W. Taylor of St. Andrew's United Church. Interment was made at Norway Bay Cemetery.

Surviving are a daughter, Mrs. Edna Young, and a grandson, Gilbert L. Young, Elmside; one sister, Mrs. Theresa Carson, Shawville; one brother, A. G. Sly, of Pembroke.

The pall-bearers, all nephews, were: Crawford Carson, Vincent and John Sly, Ben, Robert and Walter Young.

Mrs. John Richardson

The death occurred at her late residence, Radford, on Monday afternoon May 21st, of Lavina, Horner, widow of John A. Richardson, in her 71st year.

The late Mrs. Richardson was a life-long and highly esteemed resident of the Radford community, and her passing, which came as the culmination of a long and painful illness, is regretted by a host of friends.

The funeral, which was largely attended, took place on Wednesday afternoon to Radford United Church where service was conducted by Rev. A. F. Fokes, of Shawville, assisted by Rev. Ivor Currie-Mills of Yarm.

Pall-bearers were:—Six nephews of the deceased, Messrs. John E. Horner, Emerson Horner, John W. Horner, Clarence Horner, Guy Johncox and Claude Richardson.

Left to mourn the loss of a loving and devoted mother are five sons and three daughters, Warnie, of Yarm; Gordon and Perley, of Radford; Bert of Ottawa; Russell, of Niagara Falls, N. Y.; (Ethel), Mrs. Gordon Hodgins, Ottawa; (Amy), Mrs. Clarence Hodgins, Ottawa; (Julia) Mrs. Rutledge Arncliffe, Niagara Falls, N. Y.; also two adopted daughters, Mrs. Wm. McGuire, and Miss Audrey Richardson, both of Ottawa.

Another son, Percy, passed away at Niagara Falls, N. Y., just a few months ago. Other surviving relatives are two sisters, Mrs. John Anderson, of Toronto and Mrs. Stephen Johncox, of Ottawa, and one brother, Wm. John Horner, of Radford.

Floral tributes included: Pillows The Family; Miss Audrey Richardson and Mrs. John Jamieson. Sprays, Radford Ladies' Aid; Mr. and Mrs. Forrest Prendergast, Mr. and Mrs. Alex Hodgins and Mrs. Asa Hodgins, Ottawa.

Tinamou Leaves Nest to

Care of Her Busy Mate

It takes a lot of husbands to keep a female crested tinamou happy, officials of the California bureau of game propagation have decided after two years of trying, without success, to propagate this South American game bird species in California. They have found that as soon as a hen has produced a clutch of eggs she leaves the matter of incubating them entirely up to her mate and immediately goes in search of a new husband. If plenty of males are available she will produce clutch after clutch of eggs for them to hatch, but if she is provided with one mate she will neither assist him to incubate the eggs nor leave him alone so that he can perform this duty properly himself.

Efforts to propagate the tinamou in California were begun when a sportsman of that state brought back several live specimens on his return from a hunting trip in the Argentine and Uruguay and presented them to the bureau of game propagation. The flesh of these birds is highly esteemed in their native countries and it was thought that they might prove a valuable addition to domestic wild game in California.

Although the report describing the unusual habits of these birds refers to them as pheasants, this is a wrong classification, according to most ornithologists who have anything to say about tinamous in their records. The birds are frequently classed with the pheasants and partridges, they say, but are in reality much more closely related to the ostriches.

Columbia River Starts in Canada, Winds South

The present Columbia river starts in Canada, and winds south for 300 miles until it reaches that elevation of land known as the Columbia plateau. Faced with this obstacle, the river turns first west and then south again as it skirts the plateau on its western edge. Finally, at the junction of the Snake river, it once more turns west and finally enters the Pacific.

The Columbia river did not, however, always have this course. During the ice age one lobe of the ice sheet known as the "Cordilleran" came down and blocked the pre-glacial Columbia at the western end of the Columbia plateau. With no outlet the river started to back up. Its waters were raised nearly a thousand feet by the melting of the glacial sheet until they finally were high enough to find a path over the high plateau at Grand Coulee. This outlet had to drain what by this time was an enormous body of water known as glacial Lake Missoula, 2,000 feet deep and containing some 500 cubic miles of water.

Flowing over the plateau these glacial waters came to a "jumping-off place" about half-way down the present canyon of Grand Coulee, where the land falls 500 feet in two miles. There a giant cascade was formed that eventually cut through the rock to form a cataract 600 feet high, with a mile and a half crest. In addition a gorge was dug out above the falls that is three times as deep as that of Niagara and at a maximum nine times as wide.

1? 2? 3?

How long are you going to be able to work?
 How long are you going to be well?
 How long are you going to live?

BECAUSE these questions cannot be answered, people buy Life Insurance. By means of Confederation Life Endowments, with Total Disability Benefits, men and women can and do make provision for dependants; provide, in part, for loss of earning power in the event of total disability, due to accident or disease; and accumulate capital to live upon in old age.

It is significant that men and women between 25 and 35 years of age are showing a decided preference for this form of policy. Fill out and mail the coupon below. Do it now. You will be keenly interested in the particulars that we shall send you.

Confederation Life Association,
 Toronto, Canada.

PLEASE SEND ME PARTICULARS OF YOUR ENDOWMENT POLICIES, WITH TOTAL DISABILITY BENEFITS.

J. B. ARMSTRONG
 Shawville, Que.

Card of Thanks

The family of the late Mrs. John Richardson desire to express their sincere appreciation to their many friends for the kindness and sympathy extended to them during their recent bereavement; also their deepest thanks for the beautiful floral tributes.

Card of Thanks

We wish to convey to our friends and neighbours our heartfelt thanks for many acts of kindness shown during the illness and death of our mother and grandmother, Mrs. Annie Park.

Mrs. Edna Young
 Gilbert L. Young.

Cattle Graze on Asparagus

Asparagus, the highly prized vegetable for which Americans at times are forced to pay high prices, grows so freely in the wild state in Russia the cattle graze on it. The plant also grows wild on the southern coast of England. There are some 150 known varieties of asparagus, the most common being the so-called esculent asparagus, which is used for table purposes. It has been under cultivation for more than 2,000 years. The usual practice is to grow it for two years in the nursery bed before setting it out and then no shoots are cut off at least for two years.
