CHEPTTEL DES FERMES

1930 - 1945

Québec, P.Q., février 1946. La division agricole du Bureau provincial des Statistiques présente une série de tableaux indiquant, par comtés, le nombre d'animaux sur les fermes de la province de Québec au mois de juin de chaque année, de 1930 à 1945 inclusivement.

Ces statistiques, d'après le relevé annuel de juin, sont publiées spécialement pour l'information des techniciens agricoles et des autres officiers intéressés aux différentes politiques du Ministère de l'Agriculture.

Une révision du nombre et de la valeur des animaux pour la province a été effectuée par le Bureau Fédéral de la Statistique. Entrevoyant là l'opportunité de mettre à date les données pour chacun des comtés, nous avons fait une répartition proportionnelle du nombre d'animaux et ce, en utilisant les pourcentages d'augmentation ou de diminution rapportés au total de la province.

Si une telle révision s'impose après quinze ou vingt ans, c'est surtout pour éliminer les brusques changements d'ordre statistique plutôt que réel, des années précédant immédiatement chaque dénombrement du recensement.

La préparation des graphiques qui apparaissent aux pages suivantes est l'oeuvre du Service de la Cartographie Économique du Ministère de l'Industrie et du Commerce.

Charles-A. Doyon, B.S.A.,  
Statisticien agricole.

BÉTAIL SUR LES FERMES, 1930-45
