The Elmside Womens' Institute will hold their regular meeting at the home of Mrs. James Smith on Wednesday afternoon, March 8, at 2 o'clock. Program—Election of Officers. Roll call—Payment of dues.

Granites Presented to Shawville Curlers

Banquet Tendered to Winning Rinks and Montreal Curlers

Friday night, Feb'y 24th, will go on record as one of the most unique and eventful occasions in the history of the Shawville Curling Club and one which will be long remembered by many citizens as one of the town's "big nights" of pleasure and enjoyment.

The occasion marked the official presentation of the splendid set of curling granites which were won by two Shawville rinks, comprising Messrs C. J. Caldwell, Ira Hanna J. M. Argue, A. G. Brough, skip; H. M. Turner, E. C. Hodgins, J. H. Stewart and A. D. McCredie, skip, at the monster bonspiel held in Montreal on January 7th.

The presenting delegation, who came to town in a specially chartered car attached to the regular evening train, were—Messrs. T. Howard Stewart, P. D. L. Lyall, J. L. V. Mallette, Wm. Brown, J. Bruce Stewart, J. Currie, Ed. Jones, W. O. Roy, H. R. Hutchison and Dr. J. Pennoyer, all noted Canadian curlers and officials of the Royal Caledonian and Granite Curling Associations of Montreal.

Shortly after their arrival the party was informally welcomed at their car by officers and members of the Shawville Club.

At seven o'clock the visitors were driven to the Curling Rink where they engaged in two friendly matches of six ends each, with the winners of the granites. The local rink, skipped by A. D. McCredie defeated the visiting rink, skipped by P. D. L. Lyall, by 6 to 2. The second event, skipped by the local president, A. G. Brough, and Wm. Brown, was won by the Montrealers by a score of 11 to 2.

The new granites were used for the matches, which were witnessed by a large number of Shawville Club members.

Immediately following the games a banquet was tendered to the visiting delegates and the winners of the granites by the home Clubs, the arrangements being tastefully carried out by the Ladies' Club. The tables, artistically decorated with candles and flowers, seated about 150, which included members of both Clubs, their guests, rink shareholders and representatives of the town Council.

After dinner the gathering was called to order by Mr. Brough, who presided, and a very enjoyable program of song and speech, was carried out.

The program was as follows:—

Toast—The King; response the National Anthem.

Sing-song—led by Rev. A. F. Fokes; accompanist, Mrs. J. M. Argue.

Address of welcome by Mayor J. L. Hodgins.

Responded to by Wm. Brown, Hon. Secretary Granite Ass'n.

Toast—Royal Caledonian Curling Club (Canadian Branch)—Proposed by Mr. H. C. Rowat; response by Mr. J. L. V. Mallette, Vice President Royal Caledonian Club.

Toast—Granite Curling Ass'n—Proposed by Mr. W. A. Hodgins; response by Mr. J. Bruce Stewart, Vice President Granite Ass'n, who introduced the members of the delegation.

Sing-song—led by Rev. Fokes.

Toast—Shawville Curling Club—Proposed by T. Howard Stewart Thane of Curling, donor of the granites and recognized as Canada's greatest benefactor to curling.

Presentation of the granites by Mr. P. D. L. Lyall, President Granite Ass'n.

Response by Mr. J. H. Stewart, Past President Shawville Curling Club, who was instrumental in the inauguration of Curling in Shawville about twelve years ago.

Toast—The Ladies—Proposed by Rev. T. E. R. Nurse; response by Mrs. C. H. MacLean, President of Shawville Ladies' Curling Club.

Other speakers were, Mr. J. Currie, Treasurer of Granite Ass'n, and Dr. J. Pennoyer.

National Anthem.

PERSONAL MENTION

Miss Jean Hamilton, of Ottawa, spent the week-end at her home in town.

Mr. Art Hayes, of Ottawa, spent the week-end with his parents, Mr. and Mrs. W. J. Hayes.

Mrs. Thos. Bennett, of Campbell's Bay, spent Thursday in town a guest of Mrs. G. A. Howard.

Mr. and Mrs. R. A. Hodgins and little son, of Cornwall, were week-end guests of their relatives in town.

Miss Helen Langford, of Ottawa, was a Sunday visitor at the home of her mother, Mrs. S. Langford, in town.

Messrs Marshall and Melbourne Horner, of Kirkland Lake, are spending a vacation at the home of their mother, Mrs. Ed. Horner, Radford section.

The Young People of Zion United Church purpose giving a play, entitled, "Mother Mine" on Friday night, March 10th. The play will be presented under the auspices of the Ladies' Aid.

N. A. Drummond, County Agronomist, has donated a handsome silver cup, for the student securing the highest aggregate marks at the Short Course to be held at Shawville Exhibition Hall, on March 14, 15 and 16.

Shawville Intermediates Capture Willys Knight Trophy

Winning out by a total score of 4 to 3, in two game play-off series for the championship of the Intermediate League, Shawville returned from Quyon on Friday night with the Willys-Knight Trophy.

The series was one of the most interesting in the League's history, as not till the final moment in the last game could the winners be declared.

The first game, played on Shawville ice on Wednesday night finished at two all, and at Quyon on Friday night thirty minutes overtime was necessary to decide the issue which eventually went to Shawville by a score of 2 to 1.

Shawville gained an advantage of one goal after ten minutes of play in the first game, when Ross Swartz scored on a long shot, and in the last minute of the initial period Riviere evened the count on a neat play, when Shawville were playing a man short. Both teams passed up many good chances in the second frame but neither succeeded in breaking the tie.

After six minutes of the final session Max Carson gave Shawville a margin of one goal. This counter was disputed by the Quyon goaler but the Umpire's decision was upheld by Referee Findlay, who claimed that the stop was made after the puck had crossed the goal line. Several minutes after play was resumed, Riviere again notched the tying count when the Shawville defence was left wide open for the moment. Play went from end to end in even regularity but no further counts were made and the game ended at two all.

At Quyon on Friday night Shawville took an early lead in the first session when Kem Elliott, Shawville's hard-working little centre man, scored on a neat play, and Shawville held this advantage, despite the desperate attack of the home crew, up to within four minutes of the finish, when Quyon's scoring ace, Riviere again found an opening to put the teams on even terms.

When twenty minutes of the overtime session had gone and the large crowd of fans had about decided that a third game would be necessary, Welly Howard, one of Shawville's kid line, sent home the winning tally from a scrimmage in front of the Quyon net. For the remaining minutes Quyon sent up a fierce attack but the Shawville defence held intact, and the game closed with Shawville 2, Quyon 1.

Immediately following the match, the Willys-Knight Trophy was presented to the Shawville players by the League President, Mr. Wm. Boland, of Quyon, and when returning home the Cup was presented to Shawville team's President, Mr. H. C. Rowat, at the Curlers' Banquet.

Much credit is due, Albert Chisnell, for the able manner in which he managed the Shawville team throughout the season. It was a very creditable win as the Shawville team is composed of much younger and lighter players than the Quyon aggregation.

The line-ups were:—

Shawville:—Goal, L. Howard; defence, Prondfoot and Schneider; center, K. Elliott; wings, Swartz and Hobin; subs, Masson, Judd, W. Howard, Langford and Carson.

Quyon:—Goal, Moyle; defence, Chevrier and J. Daoust; centre, Riviere; wings, Lepine and Trudeau; subs, Diotte, Amm, A. Dowe, and Fraser.

H. Findlay and V. Caldwell was in charge of the first game and V. Chisnell and V. Caldwell handled the second.

Shawville Defeated by Maniwaki in First Game of Play off Series

Attended by ill-luck and other disadvantages Shawville Seniors, champions of Pontiac, lost their first game of the play-off series with Maniwaki, Gatineau champions, at the local arena on Tuesday night by a score of 2 to 0.

The game was the worst exhibition witnessed at the Shawville arena this season, and far from what the fans would expect to see in a play-off engagement. With the exception of the goaler, the locals were decidedly off regular form, while the hefty Maniwaki aggregation, seemed to play a sort of an indifferent style of hockey.

Shawville gave the visitors their first score after seven minutes of play in the first period, when a loose puck was accidentally knocked into their own net. Maniwaki had several good scoring chances before the period ended but failed to beat Parr, in the local nets.

Shawville passed up many chances in the middle session, several times getting entirely through their opponents to shoot wide of the net.

Maniwaki attempted a clever passing system in the last session, but Parr again turned aside all their efforts till the last minute of the game when a Shawville player took a penalty and the puck was again mishandled at the side of the Shawville net.

Both teams shared equally in the twelve minor penalties handed out by Referees, O'Hara and R. Smith.

The teams were:—
Maniwaki—Goal, R. Forest; defence, G. Boyle and Gendron; centre, Couture; wings, Leduc and Sabourin; subs, Britt, Vaillancourt, Leeroix and Quaille.

Shawville—Goal Parr; defence, Carl and Claude Horner; centre, R. Carson; wings, Ritchie and Hubert Dale; subs, M. Carson, U. Hodgins and K. Sereney.

The second match was postponed from Thursday to Tuesday of this week and will be played at the Minto Rink, Ottawa.

HENRY'S SHORTHAND SCHOOL

OTTAWA, ONT.

This Institute offers a superior training and thereby insures a more successful future. It leads all others—a fact fully established by more than 625 pupils who have left other business schools to come to it—and ranks among employers as "The School of Higher Efficiency."

It is not surprising then that business men, in advertising for stenographers should definitely state "Graduates of Henry School preferred."

Get particulars about our course.

Amusing Anecdotes Of Famous People

Flashes of Humour From the Lives of Galsworthy, Doyle and Others

John Galsworthy confesses to having favorites among his works. Of his novels he liked best those now included in the "Forsyte Saga" and "The Country House," and "Five Tales," believing these to be the works which most fully achieve fusion of seer with things seen, most subtly disclosed the individuality of their author, and best revealed such of truth as has been vouchsafed to him.

Conan Doyle always believed that if he had never touched Sherlock Holmes his position in literature would be a more commanding one, for the reason that Holmes has tended to obscure what Conan Doyle termed "my higher work." He regarded "The White Company," written in 1889, and "Sir Nigel," written fourteen years later, as forming "the most complete, satisfying and ambitious thing that I have ever done."

At one of Doyle's lectures an emergency chairman, pressed into action at the last moment, did nobly until the very end of his introductory remarks when he convulsed the audience, and lecturer, by saying:

"And now, ladies and gentlemen, I take great pleasure in presenting to you that eminent Divine, Canon Doyle."

Chaliapin, great Russian singer, was once stopped on the street by a celebrated violinist.

"What ails you?" asked Chaliapin, noticing his friend's long face.

"N—(a famous music critic) is out for my scalp," wailed the scraper.

"What should I do?"

"Oh, play better the next time," counseled Chaliapin.

Which is a variation of the famous story about Oscar Wilde. You remember, he, too, as stopped on the street by a minor poet, who complained bitterly that the critics had ignored his latest book of poems.

"It's a conspiracy of silence, that's what it is," exclaimed the poet, adding: "What would you do if you were me?"

"Join it, my boy, join it," said Oscar, hurrying on.

Anyone at all inclined to self-pity, chirps E. W. Lazell (in "The Anatomy of Emotion"), should remember that Robert Louis Stevenson suffered from tuberculosis and yet did the work of several healthy men; that Charles Darwin was a lifelong invalid and that W. E. Henley had one of his feet amputated for tuberculosis, yet faced the harsh world with the greatest of courage, as witness those immortal lines of his in "Invictus":

I am the master of my fate;
I am the captain of my soul.

In the household of Sir Walter Scott there was little or no talk about the father's work, says John Buchan (in his admirable biography of the famous Scotsman). Apart from the fact that he did not regard his own poetry as of supreme merit, Scott had the good sense to see that an atmosphere of domestic admiration is bad for both admired and admirer. James Ballantyne once asked Scott's daughter Sophia what she thought of "The Lady of the Lake," and her answer was "Oh, I have not read it. Papa says there's nothing so bad for young people as reading bad poetry."

There was also the occasion when young Walter Scott was dubbed the Lady of the Lake at High School and not having heard of his father's work, assumed that he had been called a girl, and engaged in violent fistuffs.

Which recalls a story Ian MacLaren—author of that phenomenal best seller of years ago, "Beside the Bonnie Briar Bush"—used to tell.

"My schoolboy son," chuckled Ian MacLaren (who was really the Rev. Dr. John Watson, a Scottish minister), "had vainly been trying to read some of my books, and in a confidential mood remarked:

"I say, father, why don't you write a proper sort of book—one of those Sherlock Holmes stories, like Conan Doyle, or something of that sort, and not so much Scottish rot?"

A Kipling autograph story: On one occasion one of the trees at Kipling's home was injured by a bus, the driver of which was also the landlord of the village inn. Kipling wrote this man a letter of complaint which the recipient promptly sold to one of his guests. Again the angry author wrote, this time a more violent letter, which immediately fetched double the price of the first.

A few days later Kipling called on the landlord and demanded to know why he had received no answer to his letters.

"Why, I was hoping you'd write me some more," said Boniface.

And then he told the author what he had done with the two letters.

"They pay a good deal better than bus-driving," he added.

Temple Thurston, the novelist, is one of the most successful hop grow-

ers in the beautiful County of Kent, often called the "Garden of England," where he has an eighty acre farm.

Here is a favorite folksong of the county, sung to a rather weird but catchy tune:

Now the hopping's over,
All the money spent;
Don't I wish I'd never
Been hopping down in Kent.

Then there was a refrain which sounded like:

With a Tee-eye-eye, Tee-eye-eye,
Tee-eye, Tee-eye, Tee-eye-eye.
There were countless verses to it and every one joined in the refrain.

The smell of the hops is invigorating and supposed to be very beneficial from a health point of view, but for what complaint is unknown. But it is a fact that lots of young men and some young women, go hop picking for a cheap vacation, and if you go in the right spirit you can have a very happy time.

Learn Physical Culture

The education of physicians who specialize in physical culture has been reorganized in the Soviet Union, according to the Moscow correspondent of The Journal of the American Medical Association.

"Since 1931 the theory and practice of physical training has been obligatory for all students at the medical institutes," he says. "Chairs of physical culture under the guidance of special professors have been created. The educational plan requires sixty hours' work in the first three years of study, including the principles of Soviet physical training, and forty-eight hours for the next two years of training in curative physical culture. Every six days students have an hour of practice in athletics so that every student will be able to demonstrate the methods he uses.

"In 1932 faculties of physical culture were founded at the Moscow and Leningrad medical institutes. Physicians who graduate from such a faculty will become specialists in physical culture. During their five years' training they study, in addition to medicine and general science, physical and social environment. The specialist in physical culture must know the theory and practice of physical culture, always remembering its biological educational and social significance. He must take an active part in the organization of sport in all its aspects everywhere: at school, in industry and in the towns. He must be well acquainted with rational nutrition, so as to be able to advise sportsmen in training. He must be accustomed to the methodology of physical education and development and thoroughly know anthropometry, physiology, hygiene and clinical methods, so that he can take part in scientific work.

"In many other medical schools physical culture as a discipline is introduced, so that every physician will be acquainted with the program of contemporary physical culture. The work of a physician specializing in physical culture consists principally in organizing physical culture and in the methodical development and instruction of medical men. At present there are in the Soviet Union about 420 physicians specializing in physical culture and 3,300 other physicians who have received special training in physical culture. For the 3,000,000 people engaged in athletics, this number is small. That is why the increase in the number of physicians acquainted with medical physical culture is welcomed."

Engines

All night, ding-danging up and down the yards,
Incessant, clamouring mellowly, now near,

Loudly insistent, then far off and faintly calling back,
The sleepless engines cough, and whoop, and gasp,

Working or resting, pausing, on the trucks.

Shocking the midnight with heretic blasts—
And sudden series of subsiding puffs,
They strain with mighty effort, or they slide

Relievedly into the distant dark.

Man made them and they are his pride,
They do his bidding, asking not for rest

By day or night.

I lie here now
And hear a freight train clunking slowly west.

—Donald Stevens, in The Frontier.

"What do you mean by reverting to type?"

"Lugging a controversy into the newspapers."

The Tibetan yak is not only a reliable beast of burden and a provider of food, but his tails is used as a ceremonial fly-switch and is often represented in Indian sculptures.

The Trouser Fad Con

Trousers for ladies are an old, old story says Mariou Dix and Harriette Myrne, a couple of New York's prettier showgirls, who use the masculine habitment to command respect from their wolf hounds.

Driving Back Jack Frost in the N.W. Territories

The future of the North-West Territories of Canada, which lie north of the Prairie Provinces, is a fascinating subject for speculation. The subject is approached from a different angle by Mr. C. S. Macdonald, D.L.S., of the Topographical Survey, in a paper appearing in the Canadian Surveyor.

Agriculture is probably the most important of the possibilities of that vast territory. Mr. Macdonald says that the main factor limiting agriculture seems to be occurrence of Summer frosts. Virgin land in the North-West Territories is generally thickly covered with moss or brush which prevents the soil thawing out until late in the season, a condition which keeps the soil cold and produces Summer frosts. When a large area of such land is cleared off and cultivated and any neighboring swamps are drained, danger from Summer frost diminishes materially. The second factor limiting agriculture in the North-West Territories seems to be the length of growing season. However, the growing season should not be estimated in days but in hours of daylight or sunshine, and since the North-West Territories enjoy very long days in Summer, field crops there require much fewer growing days than they do farther south. Moreover, to cope with a short growing season, the Dominion Experimental Farms have been very successful in developing fast-growing cereals, and their achievements along this line promise even better results in the future.

It has been proved that Summer frosts can be largely banished from a district by clearing off the cover and breaking and draining the soil; and that, though the length of growing season cannot be greatly changed, faster growing cereals have been and are being developed very suc-

cessfully by the Dominion Experimental Farms. It therefore appears that the present northern limits of cereals and roots may be extended much further in the future.—Toronto Mail and Empire.

Greatest of Them All

Recently a well-known New York publisher gave a list of ten words which he considered the most beautiful in the English language. Later a New York newspaper carried a column in which it questioned its readers as to the most admirable human trait and such words as honesty, frankness, loyalty, unselfishness and tolerance headed the list. In neither of these lists could we find the word "kindness" and this omission carried our thoughts back to a little poem by J. B. O'Reilly which we read many years ago:

"What is the real good?"
I asked in musing mood.

Order, said the law court;
Knowledge, said the school;
Truth, said the wise man;
Pleasure, said the fool;
Love, said the maiden;
Beauty, said the page;
Freedom, said the dreamer;
Home, said the sage;
Fame, said the soldier;
Equity, the seer;

Spake my heart full sadly:
"The answer is not here."

Then within my bosom
Softly this I hear:
"Each heart holds the secret:
Kindness is the word."

He who is taught to live upon little owes more to his father's wisdom than he that has a great deal left him does to his father's care.—William Penn.

Destiny bears us to our lot, and destiny is perhaps our own will.—Disraeli.

New Brunswick Reports More Scallops Found

Fishermen generally had their difficulties in last December but the scallop fishery of Southwestern New Brunswick had better fortune than some of the men in the fishing industry elsewhere and indeed their greatly increased catch and the discovery of several new beds was a feature of the month's Atlantic coast operations.

Scallops taken by Charlotte County fishermen during December totalled 2,440 hundredweights, with a landed value of \$3,510, as compared with only 940 hundredweights and a value of \$1,070 in December, 1931. As a matter of fact, and it is reason for satisfaction, the scallop landings in this district have been showing a steady and substantial annual increase in the past few years.

During December fishermen from Grand Manan Island—the island is part of Charlotte County—did fairly well on some previously known scallop areas but, better still, they also discovered several new beds, although none of very large size. Others did well at the Wolves Islands beds, producing areas discovered a comparatively short time ago by one of the scallop investigation boats which were at work for the Dominion Department of Fisheries. Subsequently, these fishermen tried dragging on a bed off Campobello, which was formerly an important producer but had been regarded as exhausted some fifteen years ago, and much to their satisfaction they found the fishing very good. One large boat in a single day, landed enough scallops to produce a hundred gallons shelled.

Scallops, nutritious and tasty shellfish, occur in the waters of three of the Dominion's Atlantic provinces—Nova Scotia, New Brunswick and Quebec. Nova Scotia is much the largest producer, with New Brunswick ranking second.

Dickens is Analyzed in Scientific Manner

Montreal.—Impressions of a scientist featured a study of Dickens' life and works during a banquet celebrating the 121st anniversary of the birth of the popular novelist and help under the auspices of the Montreal branch of the Dickens Fellowship.

The scientific analysis of the personality of Dickens was given by Prof. Harold B. Fantham, Stratheona professor of zoology at McGill, who explained the great energy of Dickens in writing and lecturing by a very active thyroid gland while his capacity for expressing heightened feelings was due to an over-active adrenal gland.

An appreciation of the literary genius of Dickens was given by R. L. Calder, K.C., and his achievements in bringing a fuller sense of fellowship was stressed by Miss Mary Saxe and Rev. Canon Allan P. Shatford.

What is Marquess?

The visit of the Marquess of Zetland to Toronto has led many to wonder as to the difference between a Marquess and a Marquis.

Whitaker's "Peerage" points out that in old usage Marquess was sometimes used as the feminine form, but there is no difference recognized today, Marquis being considered merely the French form and by some objected to although others use it.—Toronto Star.

There is a shrine in the temple of ages, where lie forever embalmed the memories of such as have deserved well of their country and their race.—Colonel John Mason Brown.

Are Wild Ducks Skinny or Fat on Their Spring Flight?

A remarkable difference of opinion between duck-shooting members of Parliament developed during the discussion on some minor amendments to the Migratory Birds Convention Act. Mr. Cantley, member for Pictou, claimed that the regulation which prevented Spring shooting is unfair to the people of the Maritime Provinces. The great bulk of the migration northward in the Spring follows the coasts of Nova Scotia and New Brunswick, but the people there are not allowed to shoot the birds. On the other hand, 90 per cent. of the migration southward in the Autumn passes overland down through the United States. The people there get the advantage of the treaty and Canadians in the Maritimes get none.

Mr. Hanson (York - Sunbury): "With all due respect to my hon. friend from Pictou there are two views with respect to this matter. Anyone who has shot geese in the Fall of the year and also in the Spring will know what I mean. In the Fall of the year the birds are in good flesh and are good to eat. In the Spring they are not, but are as skinny and tough and lean. I say let the birds have a chance to get up north and breed. It will be better for them notwithstanding what a few game hogs may think."

Mr. Cantley: "With all due deference to my hon. friend from York-Sunbury, I have probably had as much experience in the attempt to shoot ducks, brant and geese in the Province of Nova Scotia as he has, and my experience is that the first flight in the Spring, when probably only three or four days elapse between the birds leaving their southern Winter sojourn and their arrival in Nova Scotia, finds the birds in as good condition as they are when they come down from the north."

Further discussion failed to settle this important question whether these birds are skinny or fat on their northward migration in the Spring.—Toronto Mail and Empire.

Education in Beauty

At the annual meeting of the American Society of Landscape Architects in Boston, Prof. Philip H. Elwood Jr. of Iowa State College said in the course of his address, "Let us now carry the quest for well-ordered beauty into every humble home in America. This includes slum education."

In his appeal Professor Elwood was re-echoing the thought of John Drinkwater, who wrote:

If all the carts were painted gay,
And all the streets swept clean,
And all the children came to play
By Hollyhocks, with green
Grasses to grow between . . .

Till both should understand
I think that holiness would take
This laughter by the hand.

To reach every humble city dweller individually with an education of beauty would be a colossal task. But hopes that it can be tackled in the United States in the near future are encouraged by the fact that the Reconstruction Finance Corporation has funds which might be employed in razing slums and providing better homes for thousands. If their surroundings be changed from dinginess to brightness, if beauty begins to appear about them, there can be little question as to the effect on thousands who must work hard for small returns. With a combination of clean streets, gay colors and beautified parks and buildings, those civic problems that exist because of sordid and ugly environment would disappear naturally and unnoted.—The Christian Science Monitor.

Gems from Life's Scrap-book

"Be not forgetful to entertain strangers; for thereby some have entertained angels unawares."—The Bible.

"Stranger, thou art the guest of God."—Mary Baker Eddy.

"Let not the emphasis of hospitality lie in bed and board; but let truth and love and honor and courtesy flow in all thy deeds."—Emerson.

"It is an excellent circumstance that hospitality grows best where it is most needed."—Hugh Milles.

"Hospitality sitting with gladness."—Longfellow.

"It is not the quantity of the meat, but the cheerfulness of the guests which makes the feast."—Clarendon.

"There is an emanation from the heart in genuine hospitality which cannot be described, but is immediately felt and puts the stranger at one with his case."—Washington Irving.

Remember: Mueller never doubted his ability to care for his homeless child-guests.

Mrs. Orlich—"My husband is a conservative."
Mrs. Nurich—"Oh, I didn't know he was in that business. Has he, er, er, a large conservatory?"

THE BUDGET SYSTEM

By GLUYAS WILLIAMS

(Copyright, 1932, by The Bell Syndicate, Inc.)

GETS OUT ACCOUNT BOOK TO SET DOWN DAY'S EXPENDITURES. NOW THAT HE AND WIFE ARE LIVING ON A STRICT BUDGET

BEGINS CHEERILY WITH 10¢ FOR CARFARE AND 10¢ FOR SHINE

WONDERS SHOULD HE PUT DOWN 50¢ LENT TO OSCAR BALCH. IF HE SETS IT DOWN, WHAT WILL HE DO IF OSCAR PAYS HIM

PUTS OFF DECISION FOR TIME BEING AND PASSES ON TO LUNCHEON EXPENSE

REALIZES \$2.20 FOR LUNCH, IS WAY OVER BUDGET FIGURE AND WILL NEED A BIT OF EXPLANNING TO WIFE

WONDERS WOULDN'T IT SAVE ARGUING TO CHARGE PART OF \$2.20 TO STAMPS, CARFARE, ETC

DECIDES TO TAKE UP LUNCHEON ITEM LATER AND TRIES TO REMEMBER WHAT IT WAS. HE SPENT \$1.50 FOR TO-DAY

CAN'T RECALL, BUT DOES REMEMBER FORGOTTEN ITEM SPENT FOR COUSIN RAY'S BIRTH-DAY LAST WEEK

LOOKING BACK, FINDS HE HAS REMEMBERED AND SET DOWN THAT ITEM TWICE BEFORE. DECIDES NEW SLEEPY AND GOES TO BED

THE EQUITY

SHAWVILLE, MARCH 2, 1933.

Canada stands ready to enter closer commercial relations with the United States but the present is not the time to take the initiative, Premier R. B. Bennett announced in the House of Commons last week.

At Daytona Beach, Florida, on Wednesday, Feb. 22nd, Sir Malcolm Campbell, famous British race car driver, smashed the world's automobile record by attaining the astounding speed of 272.108 miles per hour.

Sir Malcolm exceeded by 18.140 miles an hour his old record of 253.968, established on the same speed-way a year ago.

Canadian Farm Population

Of the 10,362,833 people who form the population of Canada, exclusive of the Yukon and North West Territories, only 3,298,507, or 31 percent, live on farms, according to a report published by the census and vital statistics branch of the Dominion Bureau of Statistics. The rural population of Canada at the last census numbered 4,792,135 of which 3,298,507 or 67.2 percent, lives on farms and were presumably engaged in farming. The remainder, 1,502,628 or 32.8 percent, represented the rural population which did not live on farms—usually in small hamlets or other unincorporated villages.

The rural population of Ontario is listed at 785,550 and the urban population at 15,410, living in 188,134 rural farms, and 4,404 urban farms. The average number of persons per farm is rural 4.17, and urban, 3.81.

Of the 728,623 farms in Canada 281,044 or 38.5 per cent. employed hired labor for 7,368,671 weeks at a cost of \$100,425,980 for cash and board, making an average of 260 weeks per farm at an average cost of \$13.60 a week.

Price of Milk to be Investigated

An investigation into the spread of the price of milk as paid by the consumer and received by the milk producer will shortly be undertaken by the agriculture committee of the House of Commons.

Premier R. B. Bennett gave notice recently on the order paper of the House of Commons that he will sponsor a motion to the effect.

"That the select standing committee on agriculture and colonization be instructed to ascertain the facts connected with the production, collection, manufacture, distribution and marketing of milk and milk products throughout Canada, with power to examine and inquire into all aspects of the said questions and report their findings to the House."

Ontario Conservative members of Parliament, who have been pressing for the milk price inquiry, claim that the farmer receives only two cents a quart for milk and that the consumer has to pay 10 cents a quart for the same product. They claim that without increasing the price to the consumer, the milk companies could easily pay at least four cents a quart to the farmer.

Officials of dairy companies and milk distributors' organizations will be called before the agriculture committee and will be questioned closely. Gordon C. Wilson, Conservative member for Wentworth, has pressed the proposal for the inquiry and he has received strong support.

Shawville Council

Shawville, Feb. 23
A special meeting of the Shawville Council was held on the above date. Those present were: Mayor Hodgins and Councillors Campbell, Argue, Reg. Hodging, Prendergrast and Caldwell.

A letter from the Department of Municipal Affairs, Quebec, was read advising that the Council must fill the vacancy on the board themselves.

Motion—Prendergrast-Hodgins—That Duncan Campbell, Gentleman, of the Village of Shawville, be appointed to fill the vacancy on the board.—Carried.

Motion by cr. Campbell, to adjourn
E. T. HODGINS
Sec.-Treas.

Minutes of South Onslow School Board

A meeting of the School Commissioners held on the above date at the usual place of meeting. Members present: Chairman J. H. Henderson and Commissioners Draper, Taber and Inglee.

On motion of Inglee the minutes of last meeting were confirmed as read.
On motion of Inglee the following bills were ordered paid viz:

Walter Cochrane, work at No. 4 School	\$ 10.00
J. J. Graham, 12½ cords wood	25.00
No. 1 School at \$2.00	25.00
E. A. Pritchard, supplies to No. 1	7.27
W. T. Draper, 20½ cords wood at No. 3 and No. 4, at \$1.75	35.44

Motion by Taber, that the Sec.-Treas. write each of our teachers asking if they would be satisfied to accept a cut of \$10.00 per month beginning at the first of March.—Carried.

On motion of Draper, the meeting then adjourned.

Jos. A. STREELE
Sec.-Treas.

Why Hurry to Dentist?—

Here's Toothache "Cure"

Here is a sure cure for toothache, according to those who have tried it: Catch an ordinary green snake, hold it horizontally extended by the neck and tail, and run it seven times back and forth between the teeth. Then turn it loose. Eat no food containing salt for four days afterward.

Dr. Frans M. Olbrechts of the University of Brussels, who reports it to the Smithsonian Institution, of which he is a collaborator, is not so sure of the efficacy of the treatment, which he found among the Cherokee Indians of the Carolinas. But it is the sovereign remedy of the medicine men, not only relieving pain, but protecting the teeth in the future.

Magic dentistry. Doctor Olbrechts reports, is about the most colorful phase of Cherokee medicine and surgery. The snake is supposed to carry the toothache away with it. Toothache, the medicine men hold, is intimately bound up with various natural phenomena and can be kept away entirely if a person observes proper precautions. Whenever one sees a shooting star, for example, it is necessary to spit at once. Otherwise a tooth will be lost in the near future. Also one must be careful not to spit anything that has been in the mouth such as tobacco or the peelings of apples, into the fire. They have been in contact with the teeth and a sort of magical connection is made between the teeth and the fire. The latter will "eat out" the former.

Feed and Flour

We have recently unloaded several car-loads of Feed, Flour, Salt, etc., and are now in a position to supply your requirements at the lowest prices offered for a number of years.

We now offer

Pembroke Flour

(I X L Brand)

At \$1.90 per 98-lb. bag

Every pound guaranteed satisfactory, or your money cheerfully refunded.

Liverpool Coarse Salt, \$1.40 per 140-lb. bag

Rolled Oats, 20-lbs at .69 cents

Ask for our prices on Feeds of Government Standard Quality You will find that they more than meet the prices quoted by competitive dealers.

Myth About Horns of Deer

Deer and elk shed their horns once a year. This occurs soon after the breeding season. The horns begin as single points on the young deer during the second season and generally increase in size and number of points with each renewal. But the increase in size and number of points is not strictly progressive. So it is not possible, as popularly supposed, to tell the age of a deer or elk by the number of points on its antlers. The growth of the antlers is dependent upon a number of circumstances, such as physical condition of the animal and its virility. There is a tendency for the horns to become smaller with fewer points as the deer grows old.

Ancient Coinage Excelled

Some Corinthian coins, 2,300 years old, have recently been put through a test alongside of some modern mint productions and in the opinion of the investigators the old pieces were far superior to those of the present day. The analytical study was made in the department of chemistry of Princeton university. Corinthian bronze was, for the use for which it was intended, much better, since it was extraordinarily hard and, in this respect, distinctly superior to the present United States bronze coinage, although the latter is made with special reference to this quality and in accordance with the most modern metallurgical knowledge. The report reveals that coins of the city of Sicyon were made by mass production methods. As in modern mints, the metal was hammered out into sheets and the design later stamped with a die.

AN ANIMAL SANCTUARY.

Nearly a Thousand Head of Buffalo In Reserve Near Edmonton.

Within an hour's motor ride from Edmonton, Alberta, lies one of Canada's principal animal reserves—Elk Island National Park.

This reserve, the first animal sanctuary to be established by the Canadian Government Department of the Interior, has been in existence since 1906 and was originally created for the preservation of elk or wapiti.

When in 1907 the Dominion Government purchased the Pablo herd of buffalo numbering 716 animals, Elk Island Park was utilized as a reserve for the first shipments of these animals until Buffalo National Park at Wainwright was made ready for their reception.

In 1909 when the buffalo were moved to Buffalo Park, 45 animals were left in Elk Island Park to form the nucleus of an additional herd there. These have increased to 946 according to a recent count.

GIFT OF "MISSIONARY COW."

John Joynt, ex-M.P.P. for North Huron, Ont., is one of Canada's largest and most successful farmers. He operates 1,400 acres of land in Wawanish township and harvested in one year 2,500 barrels of apples from his own orchards. From 65 acres of potatoes he took a crop of 18,000 bags of No. 1 quality, besides quantities of lower grades. One of his best investments, giving him the greatest amount of satisfaction, he says, is a missionary cow, which he bought for a frontier minister in the west. The letters of gratitude he receives from time to time give him so much pleasure that he wishes he had a small herd of them out west doing the same work.

QUYON MILLING CO., Ltd.

Government Analyst, says:—

"Feed Flour" not "Middlings"

"Kindly note in regard to Certificate F-1038 that the analysis of this feed, which is reported by Inspector to have been "MIDDINGS," the Analyst reports to be "FEED FLOUR."

We would advise in this regard that the product be sold as FEED FLOUR and not as MIDDINGS.

The above is an extract from a letter received from the Department of Agriculture and shows that our Middlings are of superior quality, as is the case with all our Feeds.

Canada Life

Life Insurance is a Great Social Asset

"Life Insurance, by its certainty of performance, has so completely demonstrated its solidity and usefulness under the economic strain that it is hard to overvalue the service contributed during this period of depression to its policyholders and to the national welfare. The beneficent purposes of Life Insurance have been vindicated in a broader way than was contemplated in earlier days. It has shown itself a wonderful reservoir from which the insured himself may draw to relieve his own emergencies."

Maritime Rule

The captain of a vessel, upon entering a harbor must first obtain a harbor pilot, then pass quarantine inspection, and then enter at the customs house and present his certificate of registry. If a foreign vessel, the captain presents his certificate to the consul of his country and receives a receipt which he gives to the customs officers. Then it is necessary to pay tonnage tax. In leaving a port, the captain must have clearance papers to show that he has paid all taxes, and must indicate the country to which he is going.

Wealth in One Shell

The young Frenchwoman who recently found in an oyster 41 pearls—two of them black and probably worth as much as the other 39—had an exceptional stroke of luck. Many a pearl would rejoice in as many pearls for a season's haul. The average Scottish pearl at the end of his season can rarely show more than a phial of lead-colored and brown rubbish with some tiny lustrous white specimens worth about \$5 each. Scottish pearling has had its great days, and even so recently as 1860 gems to the value of £12,000 passed through the hands of a syndicate controlling the industry.

Controlling Swine Parasites

All classes of domesticated animals harbour numerous kinds of parasites and swine in particular are liable to infestation with very large numbers of these pests. The chief and most harmful parasite affection swine is the round intestinal worm. These worms interfere materially with the absorption of food, irritate the lungs and stunt the growth. In the early stages of their development they travel through the blood stream to the lungs, are coughed up, then swallowed and pass to the intestines. Infection with worms causes coughing, pneumonia, or other lung congestions, which are fatal in many cases, and the pigs which survive are apt to be stunted and prove unprofitable feeders. Pigs heavily infested with worms become puny, have rough coats, may snuffle and run at the nose and eyes, and show signs of general unthriftiness. The losses from worms are great enough to make it advisable for the pig raiser to spend considerable time and effort in avoiding them.

Small pigs get the worm eggs from the udder of the sow or from the floor or walls of the pen, probably within a few days after birth. Preventive measures will go a long way in eliminating the trouble, and cleanliness cannot be too strongly recommended. This should start at the time the sow is prepared for farrowing. At the Dominion Experimental Station, Lacombe, Alberta, before the sows are put into their farrowing house, the house is thoroughly washed with a strong hot lye solution (1 pound of lye to 30 gallons of water) scrubbing the floors, troughs and walls well. The lye solution is best for the removal of worm eggs. Needless to say, the work must be well done. If cracks and corners are neglected, bad results are almost sure to follow. Three weeks previous to farrowing, the sow is well starved and given a reliable worm remedy in order to rid the intestinal track of worms. Just previous to putting the sow in the clean farrowing pen she is washed off with warm soapsuds and a stiff brush to remove any worm eggs which may be adhering to the skin or hair. These measures protect the pigs to weaning age. At weaning time the pigs are given access to a clean lot or pasture which is known to be uncontaminated.

At Lacombe every yard and lot in which pigs run to any considerable extent is ploughed and seeded to a temporary pasture crop at least once every year.

Just Playing at Business.

"Can we play at keeping store in here, mamma?"

"Yes, but I have a headache, so if you do you must be very quiet."

"Oh, all right, mamma. We'll pretend we don't advertise."

Architectural Point

Houses in many parts of the South are built with a porch at the side with an outside door to the porch. This is done for both comfort and privacy. In practically all cases the porches are built on the side of the house and face either south or west in order to take advantage of the prevailing southwest winds in summer. The houses of this type are usually only one room wide and are large, with high ceilings, allowing ample ventilation. The porches usually overlook a side garden and there are two front doors, one placed in the porch enclosure on the street and the other in the center of the house, entering into a hallway.

Fish for Venison

The origin of venison being sold by British fishmongers is given in Prior's "Life of Malone": "Many noblemen having more bucks than they had occasion for, wished to dispose of them, but were ashamed to take money. They, therefore, sent them to their fishmonger, and received fish in return. This odd practice commenced many years ago, and the fishmongers still continue to sell venison, though they do not obtain it in the same way, for the owners of parks now find no reluctance in receiving cash for a certain number of bucks every season at a stipulated price."—London Times.

Faraday's Diary

No other experiment in physical science has been more fruitful in the profit of mankind than that of Michael Faraday, whose work was responsible for the production of the dynamo. The centennial of his birthday will be celebrated by a large gathering, representing the great electrical societies of the world. Faraday kept a careful diary in his own hand of all his experimental work. For sixty years this diary has been the most treasured possession of the Royal Institution, which has resolved to publish it in full. Some of the six or eight volumes will be ready for the centenary.

Hard Earned

Mary had a new hat on her return home and said:

"Mother, how do you like my new hat? I earned it myself."

"How was that?" inquired her mother.

"I talked dad out of five dollars," replied the willing worker.

Voice of the Press

Canada, The Empire and The World at Large

CANADA HOPEFUL.

It seems a hard thing to believe, but from many sources there is evidence of returning prosperity. In keeping with the age, it is coming in installments, and so far the installments are not much felt. But it is a good thing to keep a stiff upper lip and a hopeful heart.—(Petrolia Advertiser Topic.)

BREVITY IN SPEECH.

Much may be said for the statement made by Judge Hawley Mott when questioned by a reporter recently in Bowmanville as to the reason that he only spoke for 30 minutes at the Women's Canadian Club. Judge Mott said that any man should be able to express all he has to say in 30 minutes, and if he could not then he should not rise to speak. Some men are notoriously long-winded in an address, so long-winded in fact, that by the time they have concluded their talk the chances are ten to one that the audience have completely forgotten the first part of his remarks.—(Canadian Statesman, Bowmanville.)

ECONOMY AT SEA.

So rapidly has post-war ship design developed that a modern 40,000-ton liner costs less to run to Montreal than a 20,000-ton 30-year-old rival.—(London Saturday Review.)

WOMEN IN INDUSTRY.

To want to establish an inflexible rule and to deny women the right to earn their daily bread is a lot of nonsense; to pretend that replacing women by men in industry would allow the men to support their homes is another of those utopian theories which will not hold water, just as it is untrue to say that the majority of women seek employment as a hobby, to satisfy their taste for luxury and to be independent of men. The reverse in fact is true, for, in the majority of cases, the woman works because she needs to, of necessity, because the conditions of modern existence compel her to do so.—(Le Monde Ouvrier, Montreal.)

LEARNING A NEW TRICK.

Just when farm boys are adept at adjusting carburetors, the old horse stages a comeback and you've got to learn to knot a halter.—(Winnipeg Tribune.)

IT HAD TO COME.

There's a gal in old Kentucky who is deserving of a general vote of thanks, if not a public memorial. She is suing for \$10,000 a vaudeville performer, who left the stage during the performance, ambled along the aisle and crooned to her. In her statement of claim she declares she was humiliated and embarrassed and that her health was affected as a result.—(Hamilton Spectator.)

THE UNFINISHED WORLD.

In 1834, a current magazine article reveals, an official of the United States patent office resigned because "Everything possible had been invented."

Since this gentleman left his post it, the smug belief that the world was a finished product, the world's brains have invented the sewing machine, the typewriter, the electric locomotive, the air brake, wireless telegraph, internal combustion engines, aeroplanes, cash registers, incandescent lamps, motion pictures and about a million and a half other devices which we now consider commonplace.—(Vancouver Sun.)

WITH BARED HEADS.

From time to time there are pictures in Toronto papers showing scenes at the funerals of prominent people, or again it may be some public function outdoors, such as the opening of a new building.

The people appear to be well and comfortably dressed as a rule, that is if there is any comfort in a silk hat for a man. Often, though, it is noticed that many stand with bared heads in cold weather. They do so as a mark of respect. The same thing is done in nearly every other place.

Whether all these people can do so safely is something we do not know; in fact we have doubts. We do not believe the person to whom the honor is being paid, were he able to make his wishes known, would suggest that heads be bared by elderly people in cold weather. In many cases it is a sure way to invite a cold and possible serious illness.—(Stratford Beacon-Herald.)

THE EMPIRE

IDLE HANDS.

After every great war the spread of crime is attributed to the restlessness and the recklessness of the returned soldiers. We heard the same story after the Great War. It cannot be said now. According to Edward Mulrooney, New York Police Commissioner, the criminal of today has no skill, is utterly ruthless, and his average age is only eighteen years. These law-breakers are not men who have found it hard to settle down to work after war. Because of widespread unemployment they have never been in harness.—(London Daily Express.)

GOLD AND THE CONFERENCE.

The report of the experts on the agenda for the World Economic Conference confirms all the worst expectations. If the experts have their way, it is not to be a Conference to devise ways and means of emerging from the economic depression. It is to be a Conference to devise ways and means of forcing the whole world back upon the gold standard. From first to last these experts have approached the problems, not from the point of view of the workers, not from the point of view of the industrialists, but from that of the financiers—of the money-lenders. Unless there is quick and effective protest, the World Economic Conference is going to be little more than a new and international "bankers' ramp."—(London Daily Herald.)

LORD WILLINGDON'S RULE.

The law-abiding section of the community, Indian and European, owes a tremendous debt of gratitude to Lord Willingdon for the manner in which he has succeeded in restoring the symbols of law and order that had become so dreadfully defaced during the rule of his predecessor.—(Calcutta Englishman.)

BLOOD THICKER THAN WATER.

The cordiality that should exist between these two English-speaking nations—Great Britain and America—should be sponsored as much as possible, but cordiality must be promoted by correct information, and both sides must work to disseminate such information. The best agents, of course, will be the leading statesmen of both countries. Will Mr. Roosevelt take the initiative in this work in America?—(Kingston (Jamaica) Gleaner.)

BRITISH FILMS IN TRINIDAD.

Australia, New Zealand and South Africa are eager buyers of British pictures. Canada, as a film distribution centre, has hitherto seemed virtually identical with the United States, but British films are triumphing here, too. The significance of Trinidad's acceptance of British films is thus seen. The distributing organization responsible for winning the co-operation of our local cinema owners are on the threshold of entering the entire West Indian market. This, we understand, will be the greatest colonial conquest made by the British industry. It must be the beginning of one more step in encircling the entire British-speaking areas of the Empire to cater for the major portion of their requirements in cinema entertainment.—(Trinidad Guardian.)

HOARDING IN INDIA.

Those who persist in believing that all India still "hoards" precious metals and does not put them to any practical use have proof of their mistake right under their eyes. As Sir George Echster mentioned, the improvement in sales of Post Office Cash Certificates indicates that some part of the proceeds of gold sales is being converted into other forms of investment even by the smallest class of investor. Then, too, the maintenance of the import trade is only explained by the fact that some part of the profits from gold sales is being used for current expenditure. As a large profit has been, and is being, made on sales of gold, it cannot be said that the utilization of that profit for current needs is equivalent to eating up the savings or capital of the people; the capital value of the original investment remains intact.—(Bombay Times of India.)

GOLD AND WAR DEBTS.

The inevitable return to some form of gold standard for all countries has come appreciably nearer in the last few weeks; but it is equally clear that no stabilization of currencies can be achieved while the war debts remain, with the implied necessity for the periodical transfer of huge amounts of gold from one country to another.—(The Melbourne Argus.)

Sinclair Lewis Advocates Cancellation of War Debt

London.—Sinclair Lewis, the writer, arriving here from the continent, proclaimed that Anglo-American friendship could save the world from a new war.

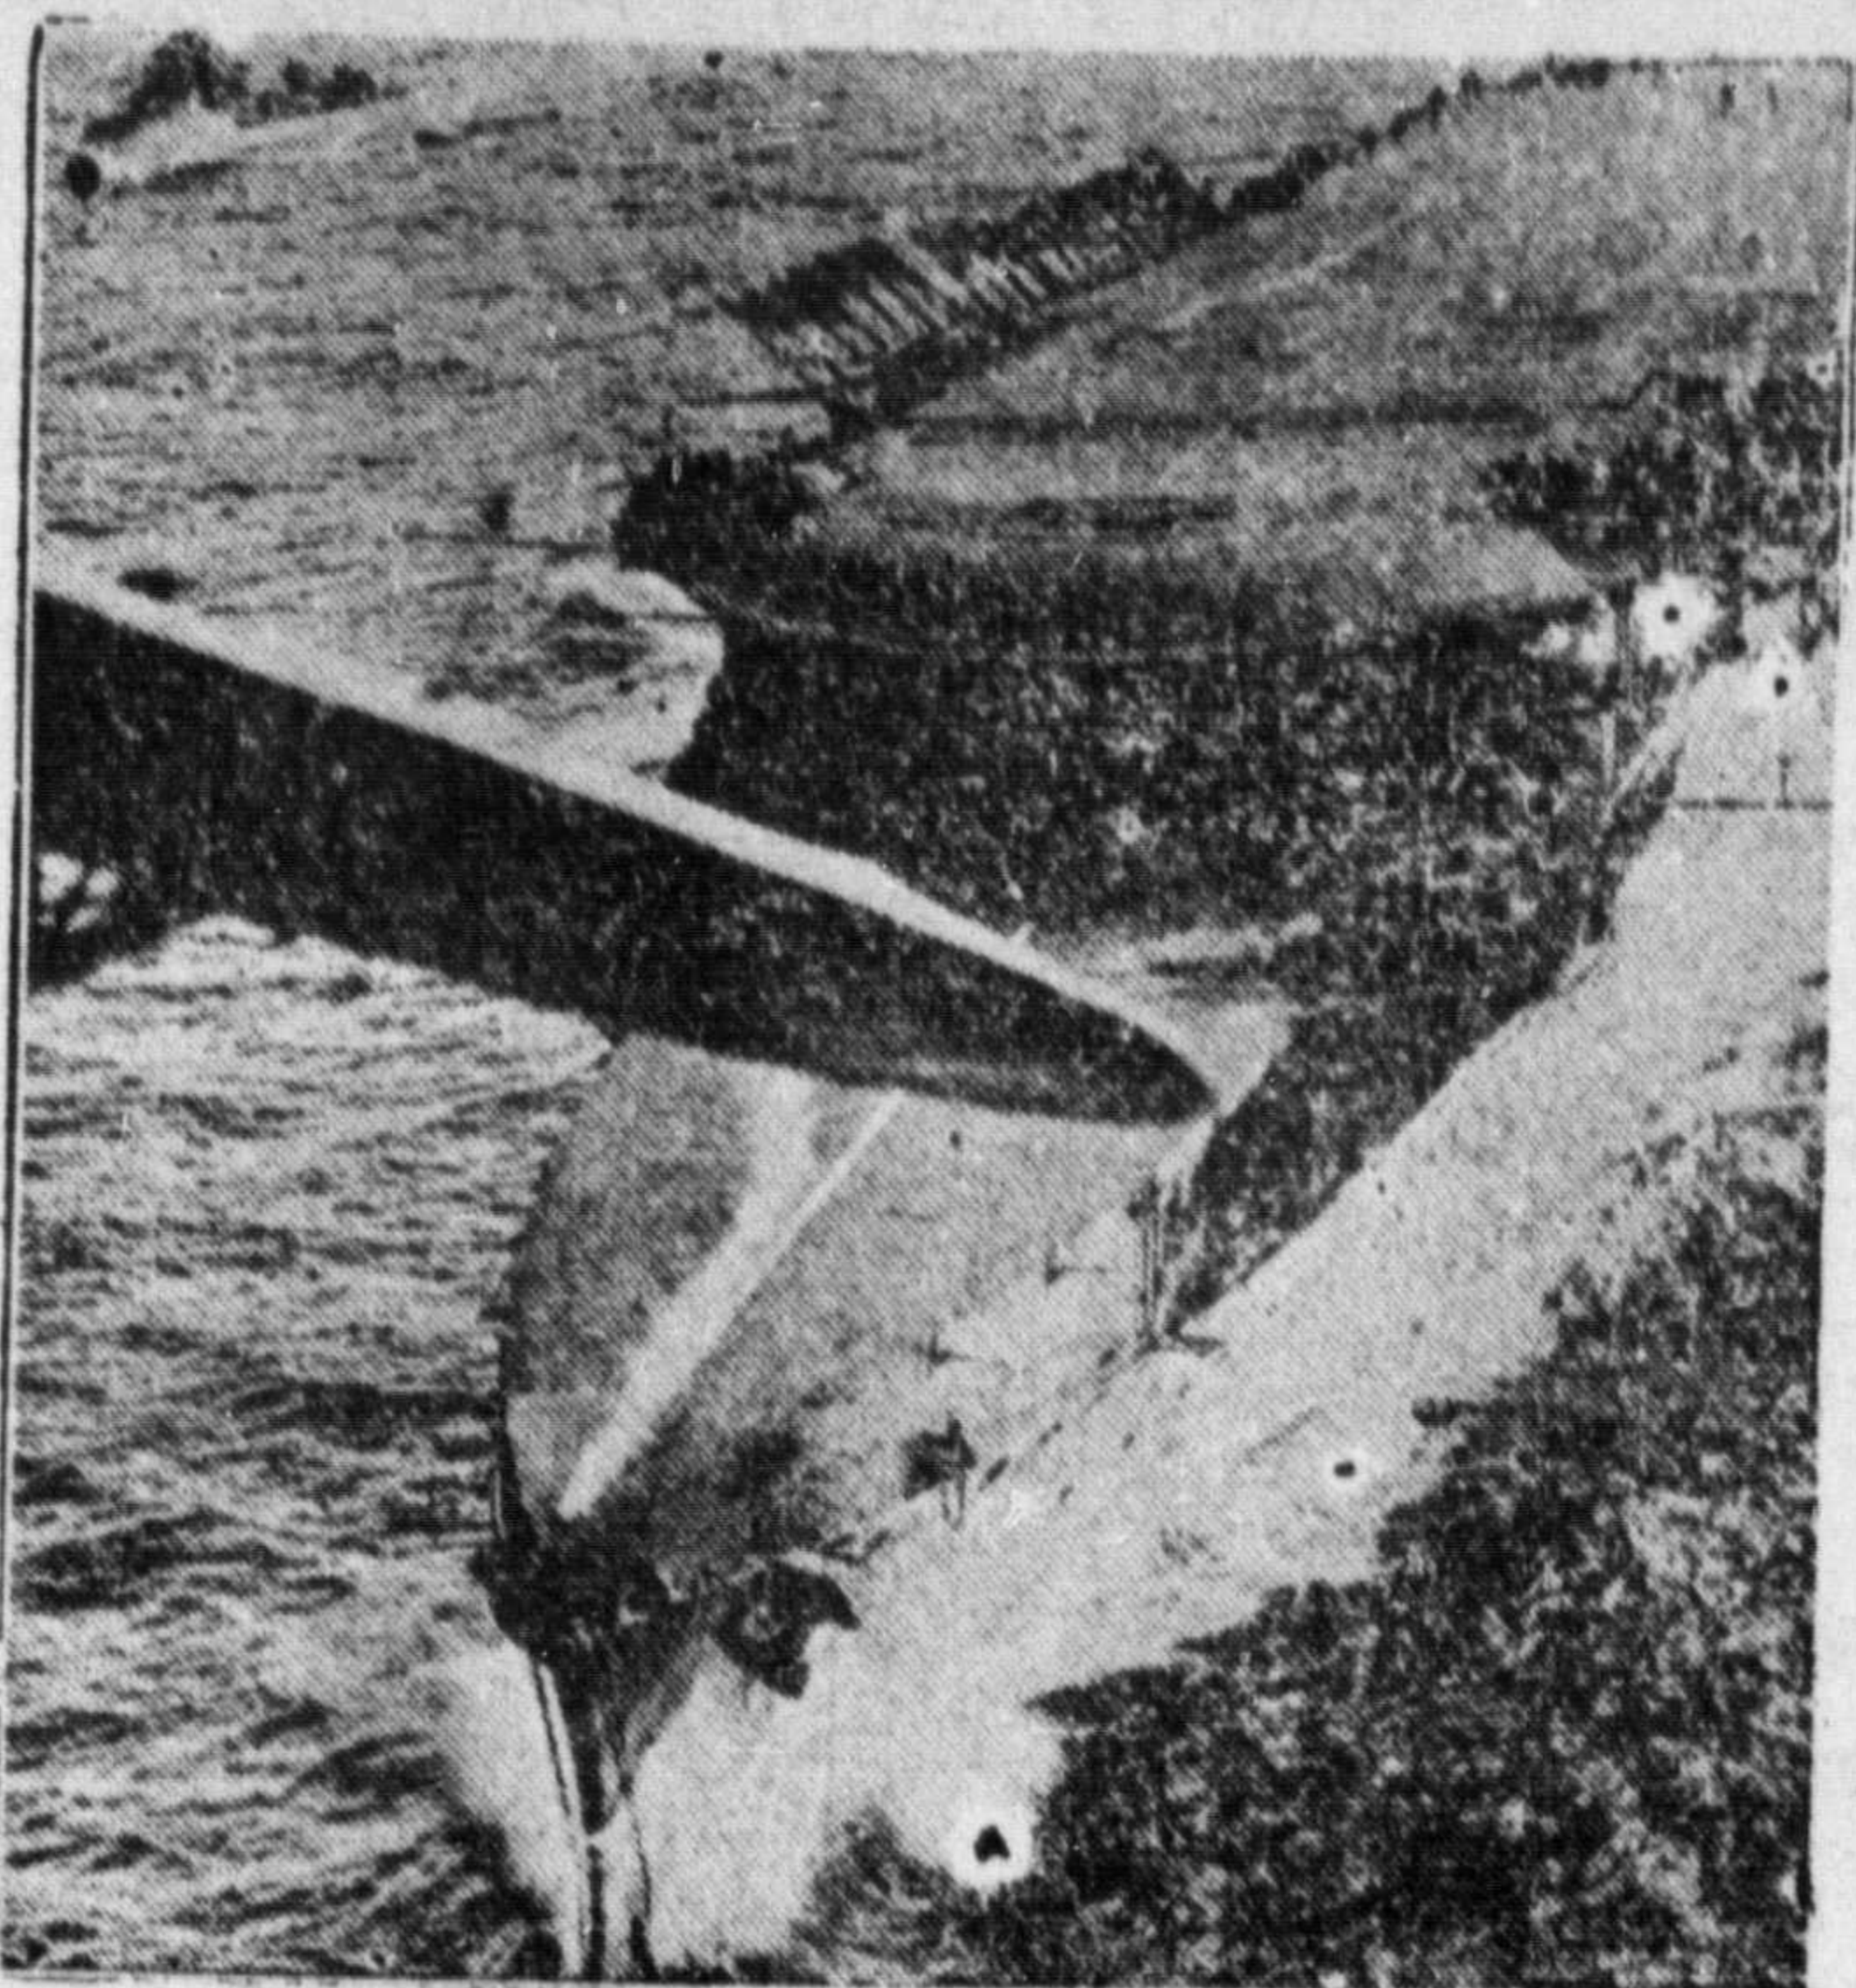

Lewis, professing a new-found affection for Great Britain, declared his belief that "modern civilization is a heritage worth keeping," and a contention that "the only countries which have a chance of retaining it are America and Great Britain."

Lewis, in an interview with the Daily Express, advocated outright cancellation of the war debts as "simply a matter of good business—not sentiment."

Air Shuttle Service Planned

Chicago.—Air-traveling visitors to the Century of Progress Exposition here this summer may be "set down" right at the fair's front door if they wish. A fleet of amphibian planes—ten-passenger, twin-motor ships—has been ordered to provide a shuttle service between the municipal airport and a special ramp on the shore of Lake Michigan.

British Air Fleet Maneuvres

Just after taking off from the British aircraft carrier Furious, during annual exercises off the north coast of Africa en route to Malta. An unusual view of the giant carrier, while she is speeding ahead under full steam.

Campbell Says Speed Contests Develop Auto

British Racer States Valuable Lessons Learned Are Most Useful in Improving Models of Future

Daytona Beach, Fla.—Motor speed contests develop the automobile just as horse racing improves the breed, in the opinion of Sir Malcolm Campbell.

"I have often been asked," the British racer said, "what is the use of attempting these high speeds, but the answer is easy. Unless we progress we shall soon come to a standstill, and when this occurs we would immediately go backward."

"The lessons learned are most valuable, and, although the man in the street has no wish to travel at a speed of 200 miles an hour, yet in the course of time he benefits by information that is compiled, since a great deal of knowledge can be utilized in the touring car of tomorrow."

"We should never have possessed the powerful four-wheel brakes of today had not the racing car of yesterday developed this most important factor, and undoubtedly the tires of today owe a lot of lessons learned in the past by strains and stresses which racing has imposed on them."

Turning to a discussion of automobile record attempts, Sir Malcolm explained the governing factors at present are tires and condition of the course.

"Regarding tires," he said, "as we progress, so will they become more efficient and will be made to stand terrific strains and stresses to which they are subjected when these high speeds are attempted. And, naturally, it is only possible to achieve high speed under the most favorable conditions of the course."

An auto trip across the United States from Jersey City to Oakland was made in 86 hours and 20 minutes elapsed time.

O.A.C. Short Courses Packed With Practical Usefulness

Amazed at the amount of practical information which she has picked up in the ten-day short course in Farm Power, a woman who is operating a 150-acre farm in Norfolk County has decided to return next week to attend two or three other short courses in which she is confident that she can get many practical ideas which will be helpful to her in the management of her home farm.

"I am glad that there are so many people taking advantage of these short courses, but after going through one of them and thus realizing its practical value, I am surprised that there are not five times as many people in attendance."

She is just one of many who are having similar experience at the Ontario Agricultural College this winter.

In all, there are 218 men and women, young and old, taking advantage of the various short courses which are under way at the present time. Two or three other courses of different kinds will open in the near future and these will undoubtedly bring a number more to take advantage of what is being offered by the College in these special winter courses.

World Conference, Debts, Trade

Whether the Conference meets or not, this monstrosity of the Great War is now clearly at an end, writes George Glasgow in the Contemporary Review. No political force can longer keep it going. No more political debt payments will be made. If the politicians of the world cannot agree to lower tariffs and thus to remove a gigantic barrier to trade; if the United States and France cannot agree to unloosen their hoards of gold which make the working of the gold standard impossible; then the wit of man and his innate resource for acclimatizing himself to any conditions will force him to resume his normal work in spite of the politicians and their tariffs and without the help of the gold standard; and experience suggests that he will succeed in doing so.

Off To French Indo China

Helen Boucher, pretty French girl, about to celebrate her 21 birthday, decided to celebrate in a proper manner. In a few days the flighty miss hops off for French Indo China.

Flying Across Continents As Described By J. A. Mollison

Famous British Aviator Recounts Mental Experiences of His Adventures in the Air

Two essential things we want to learn when a famous flyer enters the confessional of autobiography: his thoughts and feelings in moments of crisis, and the mental outlook which sustains him in his life of hazard and adventure. The facts of his achievements most of us already know; they have become flying history.

Mr. J. A. Mollison's "Death Cometh Soon or Late" is an illuminating as well as thrilling narrative because it reveals the mind and emotions of the courageous record-beater who flew from Australia to England, from England to the Cape, across the Atlantic from east to west, and from England to Brazil, apart from War service in Waziristan and general test-pilot work which involved grave if less spectacular risks.

To-day's the Day

First, then, his outlook on life. It is, he confesses, "lamentably hedonistic," taking little or no thought for the morrow; but one which takes cognizance of the present and the near future, and finds the years to come beyond its range, is, I believe, really adapted to anyone who takes advantage of life in fact is fairly adequately summed up in the words of a recently popular song, "To-morrow the skies may be grey, I dare say, but not to-day."

This lone flyer can also truly say of himself:

"I am never more happy than when in a crowd. My own companionship quickly begins to pall. . . . On my long flights I have to drive continually on my nerves, singing, muttering and reciting poetry to myself to vary the monotony of loneliness. Not for me is the ideal contemplation of the true philosopher: my feelings can never pursue a level course. When I am left alone to think I only know the moods of ecstasy and depression. The airman who takes risks with his life is frightened to give free rein to meditations on the future."

Because of an element of laziness within him, he adds, which whispers of the joys of security in routine, one day his nerves will cease to rule him and his imagination will forsake him. Then "I shall become a contented bore. All that I think worth while will die that day."

The Ship At Night

It is deeply interesting, psychologically, to watch this cast of mind in action during the most crucial phases of his flights. We see grim courage and resource, but no Olympian indifference, no easy fatalism. Mollison lives to the utmost every successive moment, whether it be of trial or triumph. Everything that is happening within and without his cabin impinges on his mind with instant force. When, on the flight from Australia, for instance, he espied a brilliantly lighted ship about 120 miles out from Batavia, I somehow felt I must not leave it. I circled round it two or three times, while the passengers on deck gazed at me. The night was very dark, and it was a wrench to leave the only link with existence I saw that night. I pressed on, grateful for the clear weather, but beginning to

feel the need of sleep. I continually shifted my position, adopting the most uncomfortable postures to keep myself awake. My ears began to play me tricks. I would fancy an interruption in the regular heat of the engine and start with sudden terror only to relax a moment later as I realized it was merely the fancy of my semi-dormant brain.

Making for Singapore he found that the petrol in his main reserve tank had completely run out:—

"I started talking to my engine—'come along, that's it; come along, damn good; come along, that's it; come along damn good'; my eyelids were aching and sore and I repeated the monotonous refrain of my coaxings as my head nodded to and fro.

On the Atlantic flight of August last year he had to fly blind through the worst of Newfoundland fogs, for he could not see even the tips of his wings:—

"I could only press on, straining my eyes in vain, hoping against hope that all would be well. My head ached, and I began to feel physically sick. The length of the crossing was telling on me, and I felt the drowsy numbness that I had experienced so often in my earlier flights beginning to attack me with ever-increasing force. Thus I flew on, philosophically resigned to the worst, but still hoping faintly that a miracle might happen that would see me through."

Scotch Economy

The miracle did happen, and he completed the flight at a cost, it is estimated, of only £10 6s. 3d. for petrol and 15s. for engine oil—a fact which induced an American editor to remark: "Took a Scotchman like Mollison to do it economically. Wait, now, till Harry Lauder flies from Edinburgh to New York for sixpence!"

Mr. Mollison does not pretend that his outlook enables him to take serious defeat philosophically. At his first attempt to fly from Australia to England his machine failed to clear telegraph poles bordering his taking-off ground and was wrecked. Next morning I awoke in black despair. It was the worst day of my life. Oaths that I never suspected I knew came crowding to my lips as I lay thinking of the disaster. . . . I lay for hours and cursed myself for my bravado in taking off with a full complement of petrol. . . . I blamed the mechanic. . . . I blamed everything and everybody, but in my heart I knew that I had only myself to blame.

Mr. Mollison traces the spirit of adventure in himself to his grandfather, a Glasgow man who became an officer in the Turkish navy. It was first aroused in the direction of aviation, he says, by Claude Grahame-White's early book, "With the Airmen," and his machine was the first young Mollison ever saw in flight. When the Great War came he realized his ambition by joining the R.A.F. and bombing work on the Indian frontier laid the foundations of a distinguished career.

"Death Cometh Soon or Late." But, luckily, not sufficiently soon to prevent Mr. Mollison writing a book which is a superb gesture of defiance in the face of danger and a beckoning to achievement and adventure.

Ford Sees Bright Future Nearing

Magnate Says Machine Age Has Barely Started as Yet

New York.—The New York Times recently published under a Detroit dateline a copyrighted interview with Henry Ford in which the automobile manufacturer declared that these are not bad times but good ones, and that we are on the threshold of an inconceivably bright future.

He said that it is the development of machines which will bring the bright new era and he smilingly dismissed technocracy.

"Technocracy seems to be misnamed," he said. I see little evidence of technical experience in it. Its diagnosis of present conditions is partly correct, but when it assumes that present conditions are permanent, when it forgets the fluid and progressive elements in life, it simply goes on the rocks.

"The machine age is barely started now. In the real machine age which is to come the dirt and ugliness and confusion and noise and disregard of human rights which are all about us today will be done away with. This is only the ox cart stage of the machine age.

RECOVERY GOING ON.

Although he declared no one knows just when industry will pick up, he said: "This period that we are going through right now is the recovery. The bad times were back in 1929 and before. That was the real panic—that so-called prosperous period. Business, at bottom, never was so bad as it was in what we called boom times. The managers were off the job. People weren't really working or really thinking. Now they are. We are seeing now the passing of an old era and the beginning of a new one better

than anything the world has known before."

Ford talked enthusiastically about his program to restore prosperity to the farmer by teaching him to produce other commodities besides foodstuffs and of a system of decentralized industry, in which small, self-contained communities scattered over the country will be the units.

Postal Savings Popular

Buenos Aires.—The Argentine Postals Savings Bank continues to be popular, especially among school children in the country districts for whom special facilities were provided when the bank was established in 1905. Today the bank has 1,523,506 depositors with average deposits of 60 pesos (\$12). Slightly more than half the amount now on deposit, 90,793,381 pesos, is interest that has accrued on the savings. There are 5,145 branches of the bank, of which 3,713 are in schools and 1,432 in post offices.

Scottish Business Plans Second Trade Trip Here

Glasgow, Scotland.—Scottish business men, it is reported have begun steps to organize a second trade mission to Canada to follow up success attained last year through the visit to eastern Canadian ports of the floating industrial exhibition aboard the steamer Letitia.

Business circles said the visit of the Letitia resulted in a considerable increase in trade between the Clyde district and the Dominion. They anticipated a second mission, probably headed again by the Duke of Montrose, would build up more business.

Makes Release Easier

Releasing the hand, or parking, brake on some cars which have a single brake system with two means of operation involves a trick that all drivers should know. The task of releasing the ratchet is simplified if the brake pedal is depressed at the same time.

CLAYTON'S
 HALIFAX

Song From the Ship

To sea, to sea! The calm is o'er;
 The wanton water leaps in sport,
 And rattles down the pebbly shore;
 The dolphin wheels, the sea-cows snort,
 And unseen Mermaids' pearly song
 Comes bubbling up, the weeds among.

Fling broad the sail, dip deep the oar;
 To sea, to sea! The calm is o'er.

To sea, to sea! our wide-winged bark
 Shall billow cleave its sunny way,
 And with its shadow, fleet and dark,
 Break the caved Triton's azure day,

Like mighty eagle soaring light
 O'er antelopes on Alpine height.
 The anchor heaves, the ship swings free,
 The sails swell full. To sea, to sea!
 —Thomas Lovell Beddoes. "Poems".

Weak After Flu and Pneumonia

Joseph English is Well and Strong After Taking

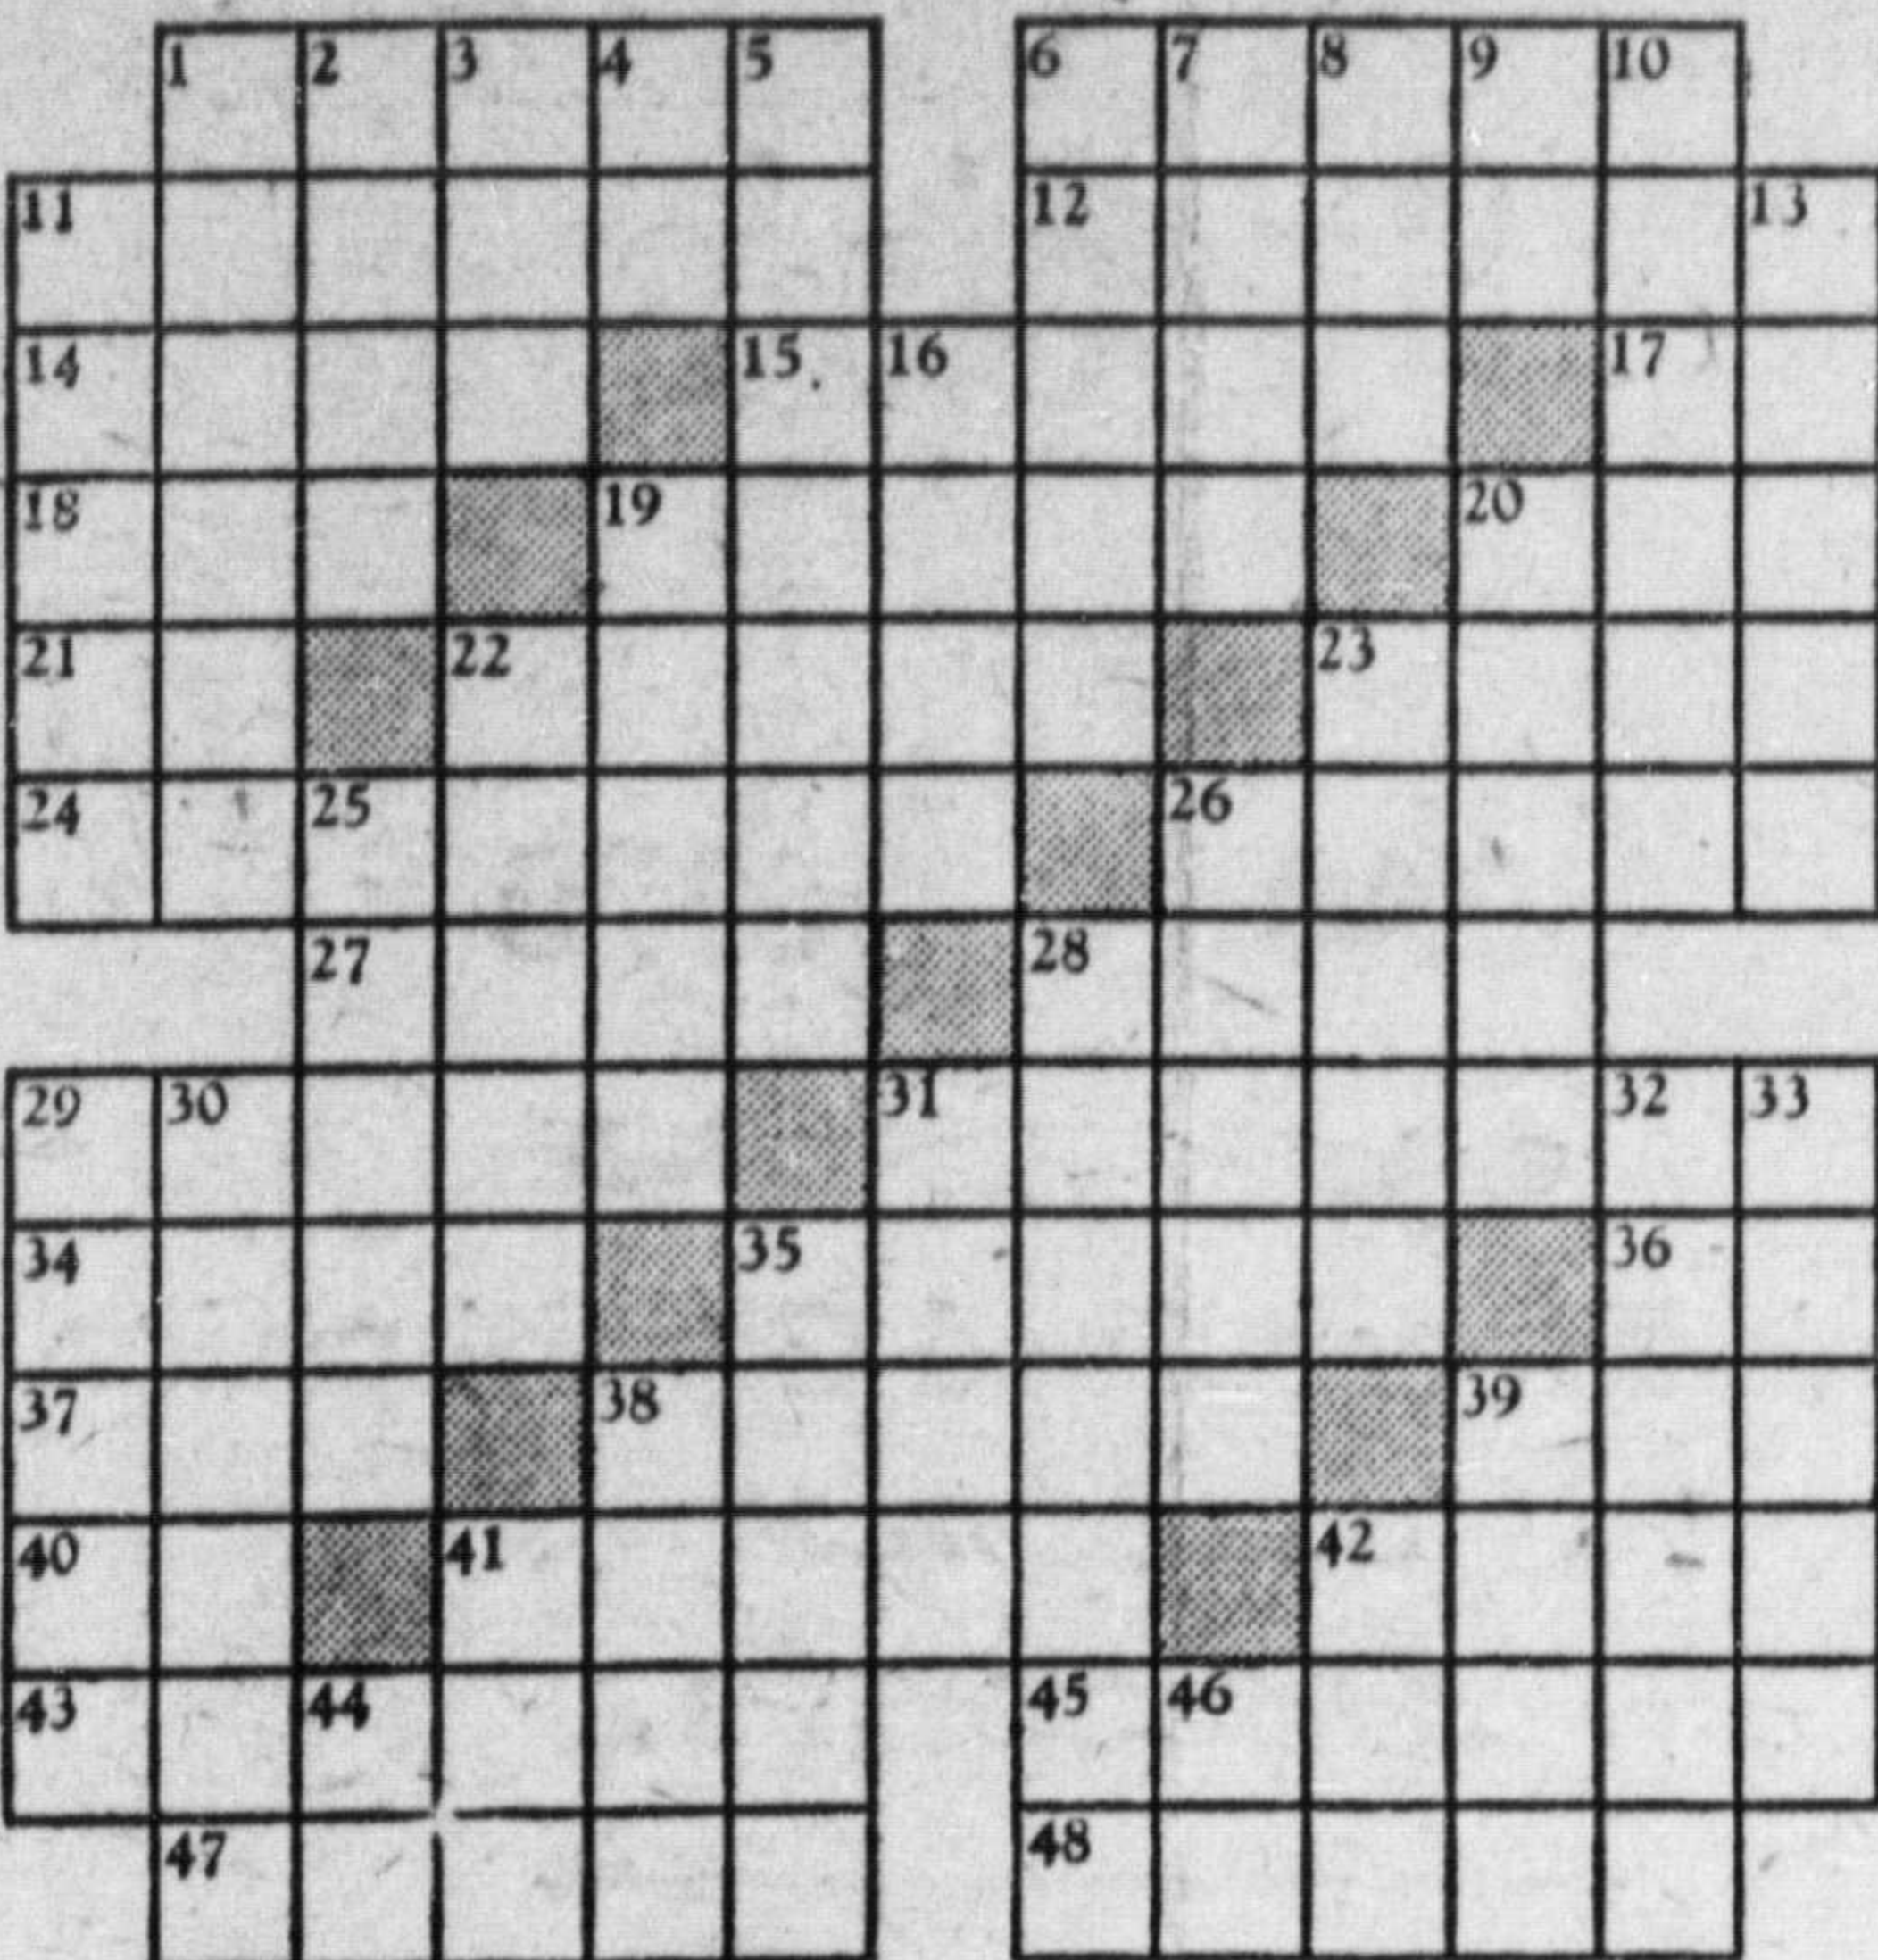

Dr. Williams' Pink Pills to Rebuild Health

"I feel we practically owe my brother's life to the benefit obtained from Dr. Williams' Pink Pills," writes Doris English of Fort Langley, B.C. "My brother took the 'flu' and, getting a chill, contracted pneumonia, which later developed into an abscess on the lung. After an operation and a long siege of illness, he was so thin and weak he was a sight. He had no appetite for food, and we weren't given much encouragement that he would recover. However, we found Dr. Williams' Pink Pills to be good as they were advertised. From the beginning of the treatment there was a marked improve-

ment. He soon had a good appetite, and his face took on a healthy color. He gained weight from the first. To-day he is well and strong, and hopes others may benefit from this wonderful remedy as he did." Whatever the cause of a run-down condition of health, use Dr. Williams' Pink Pills. They create new red blood, which revitalizes the whole system and builds up new energy and vigor. For that reason they are equally good for young, growing girls. Get Dr. Williams' Pink Pills in the new glass containers from your druggist. 50c a package.

ANSWER TO LAST WEEK'S PUZZLE

Canadian Pine Valuable Wood

There are nine distinct pine species native to Canada, of which six are of great commercial importance. Eastern white pine is the most valuable coniferous wood in Canada. Up to a few years ago it was the most important in point of quantity exported, but recently there has been a relative scarcity. The Western white pine is similar in most respects to the Eastern species but does not form extensive pure stands. It is confined to the Province of British Columbia. The red or Norway pine of Eastern Canada is harder and more resinous than the white pine, and the tree is a valuable source of structural timber as well as of sawn lumber. The Western yellow or "bull" pine of the interior of British Columbia is softer and lighter in color than the red pine, and is now extensively used as a substitute for white pine.

There are three hemlock species in Canada's forests, two of which are valuable timber trees. The Eastern hemlock is abundant throughout its range in the Eastern Provinces, but is not found west of the Province of Ontario. The wood is chiefly used for construction, especially in house-framing. It supplies the demand for a cheap, strong material for many purposes, including poles, mining timber, pulpwood and firewood, and its bark is a valuable source of tannin. The Western hemlock is found in Canada only in the Province of British Columbia, and is becoming more valuable each year as its qualities are better appreciated. The Western species is used more extensively than the Eastern in pulp manufacture.

There are only two species of the genus commonly called cedar in Canada. They are both of great commercial importance, each in its own region as their ranges do not overlap. The wood of the cedars is the most durable coniferous wood grown in the Dominion. The Eastern tree, white cedar, is found from the Atlantic to the south-east part of Manitoba. Cedar is preferred to all other native woods for shingles and for all structural work exposed to moisture, enormous quantities being used for poles and fence posts. The Western red cedar is one of the giants of the Pacific coast, being surpassed in size only by the Douglas fir. Its wood is made into shingles to a greater extent than any other wood in Canada, and it is also sawn into lumber.

Texas Supplies Most Mohair

Lubbock, Tex.—Texas produced 31 per cent of the United States mohair clip in 1929, according to an analysis of the 1930 census completed by Dr. J. O. Ellsworth, head of the department of agricultural economics at Texas Technological College. Sixty-five per cent of the nation's goats and kids are in Texas.

"A great deal that is most important in newspapers is unfortunately read only by a very few."—Nicholas Murray Butler.

MOLASSES
 CUTS FEED COST AND TURNS LOSSES INTO PROFITS

REDUCE WITHOUT STARVING

+ Do You Know? +

That at Kettle Point, Ontario, on the shore of Lake Huron, stones which are known locally as "kettles" break through the ground like a mushroom and harden only after exposed to the air and daylight? The size of these "kettles" which are strewn all over the beach at this point is shown by comparing it with the child standing on one.

London's Beauty

Is London beautiful? Not at all in the sense in which Paris is beautiful, i.e. on account of its splendidly laid-out streets and "places" and the unity of style in its chief thoroughfares. Paris has a classic beauty which no one can deny. London's beauty is like the face of a Rembrandt portrait; it looks beautiful without being so. London gets its beauty from the climate, the light and, above all, the mist; it is barely the same for two days, nay two hours, together, and is at its unloveliest in "lovely" weather. You get the most marvellous sunsets in the world on the river, lighting up with a magical radiance the masts and warehouses and bridges that pierce the misty sky. Rain and mist, the sky signs, the trains puffing out steam as they roll by, the many-colored reflections of a thousand lights on the asphalt are among the ingredients of London's beauty, and the soot that blackens every building, leaving only the turrets and domes standing out in their whiteness, the red of the innumerable buses against the grey of the streets, the flickering acetylene lamps in the street markets help to complete the picture. —From "England, the Unknown Isle," by Paul Cohen-Portheim. Translated by Alan Harris.

"Size does not constitute value."—Canon Lindsay Dewar.

Dental Parlor Put on Wheels

REDUCE FAT NOW

SAFELY - SIMPLY - SURELY
 Women everywhere are now striving that British science has solved the problem of reducing excess fat without the slightest risk to health. LACEY'S REDUCING GUM is guaranteed harmless—not a cathartic, no fasting or rigorous exercises. Margaret Filmer, beauty specialist, writes: "I have reduced 25 pounds with LACEY'S and feel better than I have for years. I have been recommending it to all my clients with gratifying results." To regain the slim and beauty of a slender figure, chew LACEY'S after each meal. Recommended by British doctors. 75c A BOX AT ALL DRUG AND DEPT. STORES. If you do not live near a drug store, write to LACEY'S, P.O. Box 226, Vancouver, B.C. Mail order. Doublet, "The Slim and Easy Life," free on request.

HAD RHEUMATISM FOR 20 YEARS

But None Since 1930

This man must have something like a record for suffering. He says:—"since 1910 up to 1930—that is 24 years—I have been a great sufferer with rheumatism. I am pleased to say that since 1930 up to date, I have been free from that dreadful pain, simply by taking Kruschen Salts—and nothing else. I must say that 20 years is a long time to have that awful rheumatic pain about one."—W. P.

Your rheumatism is just like his and everyone else's. It is caused by sharp-edged uric acid crystals getting into your joints. Kruschen will dissolve those crystals away. Furthermore—if you keep up the "little daily dose" ever afterwards, it will never be possible for them to form again. Rheumatism will be gone for good.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c package. This consists of our regular 75c bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c. Immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Est. 1756). Importers: McGillivray Bros., Ltd., Toronto.

Shawville Women's Missionary Society

The regular monthly meeting of the Shawville Women's Missionary Society was held in the school-room of the Church on the evening of Feb. 23rd. Attendance was large.

Mrs. E. T. Hodgins' group was in charge of the meeting. A vocal duet was rendered by Mrs. A. D. McCredie and Mrs. L. Workman. Readings were given by Mrs. Robt. Young and Mrs. Harold Hayes.

There were reports from the delegates who attended the Convention held in Ottawa. Mrs. McPherson gave the report for the Baby Band, stressing the value of educating very young children for future activities in the Missionary enterprise. Mrs. C. Wilson read the Scripture lesson. Mrs. E. T. Hodgins gave a synopsis of Dr. Arnprior's address given at the Convention. Mrs. Alf. Draper then read her report featuring Miss Isobel MacIntoch's speech.

The meeting was closed with prayer by Mrs. Richardson.

Fatal Plane Crash in Northern Ontario

Timmins, Feb. 21 — Pilot H. R. Clegg of North Bay and four Schumacher residents are dead today, victims of an air crash late Sunday afternoon when their plane crashed on the frozen surface of Lake Temagami.

The dead are:
H. R. Clegg, North Bay.
Lorne Buckman, 36, Schumacher, widower, formerly of Sudbury.
Alma Tario, 25, Schumacher.
Norton Abrahams, 24, Schumacher, formerly of Iroquois Falls.
Gordon Konigsberg, 30, Schumacher, formerly of Montreal.

Clegg had the party in the air on a pleasure flight in a private plane when the machine went out of control and crashed into the lake. All five, it is believed from information reaching here were killed instantly. Temagami is about 100 miles from Timmins and communication with the lake is difficult.

Mrs. J. C. Williams of Arnprior Passed Away Suddenly

Hulda Magoon, widow of the late James C. Williams of Arnprior, died somewhat suddenly in that town on Tuesday. Her husband was at one time a newspaper publisher in Eganville, later at Cowansville, Que., and finally at Arnprior where he conducted the now defunct Watchman for several years. There are two sons and two daughters, one of the daughters being Mrs. Harry N. Osborne of Arnprior, from whose home the funeral took place on Friday afternoon, Feb. 24th. Mrs. Williams was born at Wyman in Pontiac county in 1892.

If You Owe A Bill

If you owe a bill and have not got the money to pay all of it, why not pay something on account? There isn't a businessman in the country who wouldn't be delighted to give a receipt for your payment. Businessmen have "fixed expenses" that they must meet at least once a month and they do appreciate hearing from those who are indebted to them. Protect your credit. Times may not be as they are much longer and wouldn't it be nice when better times come again to be able to say, "Well I did my bit to help things along—I paid what I could when I could—My credit was always good—and I never held out on anybody."

In Memoriam

In loving memory of our dear husband and father, William Turrieff, who died Feb. 27, 1932.

For many years the family chain

Was firmly linked together

But oh, the chain is broken now,

For father is gone forever.

The flowers we place upon his grave

May wither and decay,

But the love for him who sleeps beneath

Shall never fade away.

Wife and Family.

General Insurance

Life, Fire, Windstorm, Casualty

NEW TOTAL DISABILITY BENEFITS

Are announced by the

Confederation Life Association

And provide as follows:

In the event of total disability from accident or disease, before the insured reaches age 55 (males) and age 50 (females) and during the continuance of such disability, the following benefits, based on a \$10,000 Policy, will be payable after six months' continuous total disability:

1. \$100. per month for 50 months;
2. \$50. per month for next 100 months;
3. \$10,000 in cash at end of 150th month;
4. Waiver of all premiums falling due during the period of disability payments.

In event of death or maturity during the 150-month period, the proceeds of the policy will be paid without any deduction of amounts paid on account of disability. The guaranteed values accrued dividends will not be affected in any way by the payment of the monthly income during disability.

I have all the records from the former Agency of DAGG & TUCK, which have been transferred to me. Would be pleased to attend to your Insurance problems.

Good Illustration of "Horns of a Dilemma"

A "lemma" is a thing taken for granted (from the Greek word "lambano," to take). A "dilemma" is a double lemma, a two-edged sword which strikes both ways, or a ball which will toss you whichever horn you grasp. A classic illustration of a dilemma is given in the following ancient story: A young rhetorician said to an old sophist, "Teach me to plead and I will pay you when I gain a cause." The master sued for payment and the scholar pleaded, "If I gain the cause, I shall not pay you, because the judge will say I am not to pay; and if I lose my cause I shall not be required to pay, according to the terms of our agreement." To this the master replied, "Not so; if you gain your cause you must pay me according to the terms of our agreement, and if you lose your cause, the judge will condemn you to pay me."

Pancake Bell!

Many of the ancient customs and curious anniversaries of England are recalled in a book recently from the press. One of them is the Pancake Bell. In old days this was rung on Shrove Tuesday to call the people to church to confess their sins. It is still rung on Shrove Tuesday at Olney, in Buckinghamshire. At the first chimes of the bell the makers of pancakes mix their materials. Then, after sufficient time for cooking the dainties has been allowed, a big bell tolls as a signal to eat them. Immediately girls rush to the church with frying pans in their hands and the pancakes merrily sizzling within. The reason for the race is to have the honor of being the first to serve pancakes to the ringers.

CAMPBELL'S BAY, UNITED CHURCH
E. G. WARREN, PASTOR.

Campbell's Bay United Church Young People's Society will take charge of the evening service on Sunday, March 5th. The choir will be composed of Young People who will sing special anthems. Three Young People will speak on the following subjects:—

Why do I believe in Jesus Christ?
Why do I believe in The Bible?
Why do I believe in The Church?
A large congregation is looked for.
