TORONTO, C. W.—The Metropolis of Upper Canada, is situated on the north-west shore of Lake Ontario, facing a very spacious Bay, or beautiful sheet of water, somewhat oval in form. The City is laid out in the form of a parallelogram, with singular regularity, the streets intersecting each other at right angles. Owing to the banks of the Lake being low and the site of the City rather flat, Toronto presents at a distance no striking aspect from any of its approaches. On nearing it from the Lake, however, it gradually unfolds itself, till, passing through the narrow entrance of the Harbor and steaming up the Bay, the Provincial Lunatic Asylum, Trinity College (Episcopal), the Parliament Houses, and other buildings come full into view. The domes and spires of the churches and public buildings in the background, give the City a very picturesque and imposing appearance. When finished, the projected Esplanade will greatly improve the front view from the Lake and Harbor (which it encroaches upon and faces), and, with its lines of quays and parallel lines of railway, will present a striking and animated scene. King and Yonge are the two principal streets: the former runs parallel with the Bay and the latter, intersecting it, extends northward, through a rich and prosperous agricultural country, forming a sort o irregular village of upwards of thirty miles in length. King—the Oxford street or Broadway of Toronto, a very long, straight, and spacious street, with its broad sidewalks, and many handsome, well-filled shops—is the fashionable business resort, the great thoroughfare and promenade. The public buildings of the City are very numerous, and many of them extremely handsome; such, for instance, as the new General Hospital, St. James's, St. Michael's, Zion, and Knox's Churches, the City Hall, St. Lawrence Market, Nordheimer's Music Hall, the Exchange, Mechanics' Institute, Post Office, City Schools, several of the Banks, the Rossin House, &c.; and especially the Normal and Model Schools,—a spacious edifice, whose organisation and methods of instruction, though not long established, have produced a most beneficial change in academical government and tuition, which is rapidly making itself felt for good throughout the whole Province. Osgoode Hall, the seat of the Superior Courts of Law and Equity for Upper Canada, situated on Queen street, nearly opposise York street; the University of Toronto, and University College, standing retired amid the sequestered retreats of the University Park, are noble edifices. The University Park, with its Avenues to Queen and Yonge streets, and the Normal School grounds, beautifully laid out and planted, are places where all may freely go for tranquil walks and needful recreation. The Provincial Magnetical Observatory is also situated in the University Park, and is one of the meteorological stations established by the British Government, at the request of the Royal Society of England, in 1840. It is now attached to the University of Toronto. Its position is as follows: Latitude 43° 39.4 North, Longitude 79° 21.5 West, or 5 hours 17 minutes 26 seconds slow of Greenwich time. Toronto is at present the seat of the Provincial Government; and the several public Departments are located here. It has many industrial establishments, some of them extensive,—including foundries, tanneries, a great variety of other factories, and some very fine milling establishments,—which are thriving, and rapidly extending and improving their productions. Her spacious land-locked Harbor, easy of access to the largest craft that navigate our inland waters, and perfectly sheltered by the bar which faces it and keeps out the Lake, affords the utmost facility for any possible extension of business or trade. Connecting, as it does, at all seasons of the year, with almost every place of importance in Canada and the United States (seaboard as well as inland),—by means of the Grand Trunk, Great Western, Northern, and their connections; and by navigation, during summer, besides,—the future of Toronto cannot but be prosperous. Thanks to her steady energy and enterprise, no less than to her centralized position, she is already reaping the first-fruits of her new connections in an extending trade,—a steady prosperity which seems destined to be both durable and progressive. Distant from Niagara Falls 50 miles, Collingwood 93 miles, Hamilton 45 miles, London 114 miles, Kingston 165 miles, Montreal 333 miles, New York 500 miles, Boston 593 miles. Toronto returns two Members to the Provincial Parliament. Population about 50,000, and rapidly increasing. Value of assessed property in 1856, $28,532,300; value of imports $7,500,000, exports $1,500,000.—Toronto, formerly called York, was founded, in 1794, by Lieut. Governor John Graves Simcoe.

THE UNIVERSITY OF TORONTO.

The University of Toronto was established by Royal charter in the year 1827, under the title of "King's College," and in the year 1828 was endowed by patent, with a grant of the lands which had been set apart by the Crown for that purpose. It was opened in the year 1843, and its first Convocation took place in the year 1844. In the year 1853, the rights and privileges of the Convocation, as guaranteed in the original charter, were abolished by Act of Parliament. Under this present Act the University is modelled after the University of London, Eng., and is governed by a Senate appointed by the Crown. There are no professorships in the University, but examiners are annually appointed by the Senate. No fees are charged by this University for matriculation, examination, degree, or diploma.
