VOL. VI. NO. 178. SHERBROOKE, QUE., SATURDAY, SEPTEMBER 6, 1902. PRICE ONE CENT.

SHERBROOKE FAIR IS OVER.

A Successful Exhibition—Unfavorable Weather Interfered Somewhat With Attendance—Continuation of Prize List.

Sherbrooke Fair is over. As an exhibition it has surpassed in size and excellence any of its predecessors. No official financial statement has yet been issued, it is believed, however, that there will be a balance on the right side. The gate receipts, owing to some unfavorable weather, will fall a little below those of last year. This, however, will be made up, or nearly so, by increased return from the grand stand, and sale of privileges.

There was a very good attendance yesterday though much below that of Wednesday and Thursday.

The race results are given below. In the Free-for-all, "E. E. Knott" was taken sick and withdrawn after the third heat.

2.19 Pace and 2.16 Trot—Purse, $300.

Transvaal, H. B. Stewart	1	1	1
The Governess, E. A. Sunderlin	2	2	2
Billy Wilkes, F. M. Pickle	3	3	3
Valencine Boy, L. N. D. Houde	4	4	4
Elvira Alberton, J. E. Dearden	5	5	5

Time—2.18 1-2, 2.18 1-4, 2.19 1-2.

Free-for-all, Pace and Trot—Purse, $350.

Milo S., M. R. Williams	2	2	1	2
E. E. Knott, E. A. Sunderlin	1	1	2	dr
Henry's Girl, Roaring Brook Stables	3	3	3	3
Best time—2.15 1-4.				

Handicap Hurdle Race, 1 1-2 Miles—Purse, $200.

Zyno, J. P. Dawes	1
King Top, W. B. Henderson	2
Cupa, T. Trainer	3
The Loafer, Dr. C. Sewell	4
Quick Fire, D. Minoque	5

COMFORT SOAP AT THE FAIR.

The mass of advertising matter utilized in letting the public know about soap is amazing, and probably in the history of the Sherbrooke Fair no firm has had a more artistic and attractive exhibit than have the Comfort Soap Co., of Toronto. Mr. F. D. Cockburn, who is in charge, assisted by Mr. Fred E. Perry, who represents the firm in Quebec province, have made a great hit, and the array of handsome pictures and valuable jewellery and novelties that are redeemable by wrappers of the soap in specified numbers, made a picturesque sight. The whole floor and pillars were made of packed bars of Comfort Soap. Then in the centre of all the flags and decorations was a beautiful girl, placed on the receptable of a huge flower, making an illusion that fascinated thousands. These energetic gentlemen most assiduously distributed their sheet music, cards, and various advertising novelties and no exhibit had more admiring crowds about it than this. The wholesome white suits of the attendants, as if on yachting bent, made the harmony complete, and Comfort Soap has scored a big success.

Further, Messrs. Pugsley, Digman & Co., Limited, the proprietors of Comfort Soap, 50 and 52 Wellington street, Toronto, or Montreal offices, 33 St. Nicholas street will be glad to send full information regarding catalogues and pictures, etc., to enquirers.

Catalogues are cheerfully mailed to any part of Canada.

(Continued on Page 2.)

SOUFRIERE ACTIVE.

Terrible Explosions Reported From the Island of St Vincent

PLANTATIONS DESTROYED—ANXIETY AND DEJECTION OF POPULATION GENERAL.

Castries, Island of St. Lucia, Sept. 6.—The eruption of Mount Pelee on Sept. 3 was not remarkable, but there was a terrific explosion from the Soufriere on the Island of St. Vincent, on Sept. 3.

The captain of the steamer Savan, now here, confirms the report cabled that she ran into dense clouds of dust when twenty miles south-west of St. Vincent, at 2 in the morning of Wednesday, and adds that absolute darkness prevailed soon afterwards, and that he changed his course to due west in order to avoid the ashes which were falling thick. The first officer could not see the captain two feet away and only knew him by voice. They did not see the sun till about 10 a. m. the same day.

The steamer Yare further reports that several more valuable plantations were destroyed at the time of the recent outbreak in addition to the town ships referred to in previous despatches, and adds that the anxiety and dejection of surviving population is very general.

IN MARTINIQUE.

Washington, Sept. 5.—The State Department has received the following cablegram from United States Consul Jewell at Fort de France, dated yesterday, relative to the latest eruptions of Mount Pelee; "Two violent eruptions of Mount Pelee, August 30, destroying villages of Morne Rouge, Ajoupa, Bouillon, devastating areas including Parnasse, Morne Carbet, Morne Belai, Bourdon Heights. Estimated, 1,500 killed; many injured."

THE DEATH LIST.

Castries, Island of St. Lucia, Sept. 5.—The report brought by the Royal mail steamer Yare, which arrived here yesterday evening from Martinique, of the loss of 2,000 lives through the recent outbreak on Mount Pelee, referred to the deaths since Aug. 30, and not to the loss of life resulting from the reported outbreak of Wednesday, Sept. 3rd.

LAURIER NOT WELL

PREMIER WILL SEEK INTERVAL OF REST BEFORE GOING TO ROME.

London, September 6.—Sir Wilfrid Laurier, despite his bronzed appearance, is not well. He intends to seek an interval of rest in Switzerland for a week or two before going to Rome. Sir Wilfrid may prolong his stay in Europe for some weeks.

NEW J. P.'S.

Messrs. Alfred Hudon, of Richmond, trader; Zacharie Ponton, of Brompton, farmer; Adolphe Tanguay, trader; and Cyrille Hamel, miller, Weedon centre; J. B. Despie and F. Z. Baillargeon, both farmers, of Weedon, Samuel Delude, farmer, of Lake Weedon, and James A. Hutchison, of Boynton, grist miller, have been appointed justices of the peace for the district of St. Francis. On the other hand, Mr. Romain Boulanger, secretary-treasurer of the municipality of Wolfestown, has resigned as justice of the peace. He had been appointed in April, 1898.

CITY NEWS.

Miss Maude Griffith is at present paying a visit to friends in Ulverton.

Mr. S. Fels, from Montreal, is the guest of Mr. J. L. Vineberg for a few days.

Mrs. J. Feltuis, of Beebe Plain, has been spending the week in town with friends.

Mrs. C. G. Beckett, who has just returned from England, is staying with friends in town.

Mr. W. J. Grey, adv. writer at Soroggies, Montreal, formerly of the Record office, is in town.

St. Andrew's Church Sunday School will meet in the afternoon to-morrow instead of in the morning.

Mr. J. Beamegard, of St. Johnsbury, Vt., and Mr. and Mrs. L. Simoneau, are visiting Mr. Frederic Allard.

Mrs. J. L. Terrill, wife of the late Sheriff Terrill, of Sherbrooke, is in town the guest of Mrs. T. B. Terrill, East Sherbrooke.

Mrs. H. A. Brooke, of Montreal, was in town yesterday on her way home from Coaticook, where she has been visiting old friends.

Mr. Harold E. Goodhue is visiting Thetford Mines and other places in that vicinity, in the interests of the Jenckes Machine Co.

Miss Kate A. Goodfellow has arrived in town to begin her duties as teacher at the High School, a position for which she is eminently qualified.

Mr. William Hawkins, contractor, is putting in the foundation for the new engine house which is to be built for the Quebec Central Railway Co.

Mrs. C. M. Hitchcock, of New York, who has been visiting relatives and friends in Sherbrooke and Compton for some weeks, left yesterday for home.

Mr. Howard Armitage and Miss Ruby Doyle, of Montreal, and Miss Reed, of Ulverton, are guests of Miss Armitage at Riverside, East Sherbrooke.

Dr. Thomas, of Lennoxville, left last evening for Bermuda, expecting to be absent three months or longer. He is under instructions from the Imperial Government.

The marriage of Miss Alice McIntosh, daughter of the Hon. John McIntosh, to Mr. Lorne McDougall Cairnie, of Montreal, is announced to take place on Wednesday, Sept. 25th, at Plymouth church.

Mr. F. W. Hills, on behalf of the Maple Leaf Rubber Co., wishes to thank the directors and officials of the Exhibition for their kindness and courtesy towards him in connection with his exhibit.

Miss Mathilde de Haerne has returned from a prolonged stay in Manchester, N. H., Lowell and Amesbury, Mass. While there Miss de Haerne followed with success a private course of singing.

Mrs. Buxton B. Smith, wife of the very Rev. Dean Smith, of Kingston Cathedral, Kingston, Ont., is in town the guest of Mrs. C. P. Reid. Mrs. Smith's many friends in Sherbrooke will be delighted to see her again.

Mrs. Bonallie left to-day for Montreal, en route to San Francisco, Cal., to spend the winter with her daughter, Mrs. Francis V. T. Lee. Mr. A. G. Bonnallie accompanied his mother as far as Chicago in her journey across the continent.

The thanks of the Record are due the directors and officials of the Exhibition for their assistance in connection with the Fair reports. To Mr. F. J. Enright and staff of the main office, and Mr. Jas. Robertson, clerk of the course, our thanks are specially due.

Among the notable exhibits at the Exhibition was one from the Society of Arts and Handicraft, Montreal, consisting of two pairs of potieres, several yards of home-spun cloth and specimens of drawn work and embroidery. The potieres are hand woven, one pair being of Canadian hemp, and the other of wool. Artistic in design, and excellent in coloring, no little object lesson could be placed before the people of the Townships. The home-spun cloth is smoothly woven, and is far prettier as well as more durable than factory cloth, while the drawn work and embroidery are exquisite in point of firmness and finish. The society is doing a good work in encouraging home industries in Canada and the spinning wheel and the handloom are no longer relegated to the attic, but used with just pride by the women of to-day who turn out artistic work.

Mr. Gordon Dinning is attending Stanstead College.

Mr. W. E. Paton is out of town on a business trip to Montreal and Toronto.

Mr. L. F. Bristow, Montreal, is the guest of Mr. Frank Pitts, East Sherbrooke.

Miss Myrtle Doplace, from Phoenix, Arizona, is visiting Mrs. Robt. Wyatt in town.

Inland Revenue returns for the division of Sherbrooke, month of August, are $33,339.16.

Mr. Charles Howard has returned to Stanstead College after spending a few days at home.

Mr. D. H. Tolmie, formerly of Magog, has taken a position on the staff of the E. T. Bank.

Miss Bella Lemaire and Miss Therese Larocque are visiting the Misses Beauregard, Sandborn street.

The "Little Grocer," Mr. R. Lakeman, has sold his grocery business to a Mr. Miller, of Bishop's Crossing.

Miss Herbert, daughter of the late Mr. Herbert, N. P., of Quebec, is in town visiting her friend, Mrs. C. C. Cabana.

Mrs. Samuel McKee has returned from Montreal, where she went to attend the marriage of her son, Mr. James McKee.

Miss Fissette, from Montreal, is spending her vacation in town with her parents, Mr. and Mrs. E. Fissette. Gordon street.

The Halifax express was an hour late last evening, the cause of detention being a large pilgrimage to Ste. Anne de Beaupre.

Mr. L. Lussier, of St. Charles, Richelieu, who has been visiting friends in town, has resumed his studies at the St. Charles Seminary.

Miss Eva Pelletier, who has been visiting her aunt, Mrs. C. Millier, in the city, has returned to her home at St. John d' Iberville.

Mr. Henry Miles, a prominent member of the Montreal Board of Trade, spent a day in town this week, the guest of his cousin, Mrs. A. Steele.

Mr. Robert H. Bonallie, with Mrs. Bonallie and children, of Cleveland, O., are visiting Mr. and Mrs. F. J. Beckett for a few weeks at "The Maples," near town.

Mr. and Mrs. Stephen Salls, and Mr. and Mrs. H. A. Salls, and two children, were the guests of Mrs. B. C. Howard during Exhibition week, at "Liberty Glee."

Invitations are out for the wedding of Miss Carrie McFadden, of Lennoxville, and Mr. D. J. Hay, of Sault Ste. Marie, to take place Wednesday, the 10th inst. at 5.30 o'clock in St. George's church, Lennoxville.

Yesterday a cab man at the Exhibition grounds, who was so much under the influence of intoxicants as to endanger the life of those who might ride with him, was prevented from continuing business till he had sobered up.

Rev. Principal Whitney, D. C. L., of Bishop's College, Lennoxville, and the Rev. F. J. B. Allnatt, D. D., Dean of the Divinity Faculty, have gone to Montreal as delegates to the General Synod of the Church of England in Canada.

Rev. F. J. Day will preach at both services at Plymouth church to-morrow. The sacrament of the Lord's Supper will be observed at the close of the morning service. Subject of the evening sermon, "The Christian Ideal of Life." The music will be in charge of Mr. A. H. Brooks, organist, and at the evening service the choir will be assisted by Miss LeBaron.

One of the principal attractions in the poultry exhibit at the fair this week was Cypher's non-moisture, self-ventilating and self-regulating incubator. During Wednesday and Thursday 112 chicks were hatched from 115 eggs. The incubator was awarded first prize and diploma for poultry appliances. The machine exhibited was the property of Mr. W. H. Lovell, of this city.

McKEE—CLEARY.

A very pleasing event took place in the Sherbrooke street Methodist church, Montreal, Saturday afternoon last, the occasion being the marriage of Miss Frances Louise, second daughter of the late Ed. Cleary, Stanbridge, to James H. McKee, of Sherbrooke. The bride was very daintily dressed in a blue tailor-made suit with hat to match, and was assisted by Miss Eva Finlayson, who was also very prettily dressed in blue. After the ceremony a reception was held at the residence of Mr. and Mrs. J. A. Finlayson, 127 Gutchison street annex. Later on in the evening Mr. and Mrs. McKee left for the east, to be gone about fourteen days.

(City News continued on page 2.)

TRYING TO SETTLE STRIKE.

The Governor of Pennsylvania Will Meet a Committee and Discuss the Situation.

Harrisburg, Pa., September 6.—Governor Stone yesterday fixed Thursday to meet a committee appointed by the People's Alliance at Hazelton, to discuss the best means of ending the anthracite coal strike. The Governor said he would be glad to meet any and all persons who might want to see him on matters pertaining to the strike.

HELD CONFERENCE.

New York, Sept. 6.—Senator Quay, of Pennsylvania, who held a long conference last night with Senator Platt at the Fifth Avenue Hotel, denied to-day that they talked about the coal strike directly or indirectly.

Senator Platt said: "I saw Senator Quay a little while last night and discussed private matters with him. In our discussion the coal strike was not mentioned."

Senator Quay left to-day for the Adirondacks, where he will spend a week hunting and fishing.

COAL SHIPMENTS.

London, September 5.—The anthracite coal shipments to the United States are the result of orders which have been coming in for the past fortnight. There are probably 20,000 to 30,000 tons contracted for to be shipped immediately to New York, which demands 5,000 tons daily. But the dealers regard the New York market as ephemeral. They prefer to serve their regular customers, and cannot possibly supply 2,000 tons daily.

FIZZLING OUT.

Charleston, W. Va., September 5.—It is reported that the Kanawaha and New River strike has been declared off at once, and that the Chesapeake & Ohio Railroad has ordered all equipment rushed back into the coal fields.

WEATHER PROBABILITIES.

the next 24 hours, issued by the Meteorological Bureau:

Fair and slightly warmer to-day; showers at night, with local thunderstorms.

Customs returns for the month of August, port of Sherbrooke, are $12,799.34.

CENSUS OF SEMINOLE INDIANS.

Agent Employed by Government Reports 339.

Orlando, Fla., Sept. 6.—J. O. Fries, of this city, who was employed by the Government to take the census of the Seminole Indians, reports that they number 339.

Jeweller. 7 Wellington Sq.

You Can't Get Heated Over a Pipeful of K & C Scroll Cut!

It's the coolest proposition in Smoking Tobacco that we know of—and our experience isn't to be sneezed at.

It's remarkable how such an excellent blend can be sold for such a small price—40c the 1-4 lb. tin; $1.50 if you buy a lb.

Better form a smoking acquaintance with it.

Did you say you'd include a few tins in your assortment, Mr. Retailer?

We'll quote you a close price, and grant convenient terms for payment.

NORTH HATLEY.

The growth of this Canadian summer resort has been phenomenal. About thirteen years ago, Professor Clark, a noted teacher in Baltimore, paid a cursory visit, and was at once entranced by the beauty of the place and its adaptibility as a summer resort. The next season he prevailed on some of his acquaintances to spend the summer there, meanwhile having made arrangements with the farmers to board and lodge them. They came and were charmed, and continued to come, every season bringing others with them. At first the visitors were nearly all Baltimoreans, and they aimed to keep the place sacred to the people of that city. But they could not hold it to themselves. Washington city began to send its quotas; so did Richmond, Norfolk and other southern cities. And now New York, Boston, Philadelphia, Chicago, New Orleans, and even California and Texas are represented. Not far from a thousand people have been there this summer. Quite a number of them have bought land close to the shores of the lake and have built beautiful cottages, some of which have cost not less than $10,000, and furnished them with all modern conveniences and luxuries. About twenty-five new ones are now in the course of construction. Innumerable boat houses line the shores of the lake. There is a boom in land and desirable building lots are bringing remarkable prices. The village is an incorporated municipality. Early this summer a system of sewerage was construed, which will give greater assurance of health to the place. One thing is remarkable, this growth has been natural. There has scarcely been any advertising in the papers. People have looked in vain for such notices, and still the visitors are coming, and of their own accord. While very cordial to new comers and evincing a desire to be on good terms with the natives, they constitute a unique society—United States, civil, military and naval officers and their families predominating who give tone to society. Seven years ago the visitors formed a library association and contributed about 1000 volumes. A building is now in course of construction, to house these books, with reading rooms, which will be an ornament to the place. Aside from the fine scenery and situation of North Hatley, and which helps to make it a popular resort, are the excellent railroad facilities furnished by the Boston and Maine road. There are three express trains daily in the summer time to and from New York and Boston, Montreal is also very easy of access. As a business place, aside from the summer season, North Hatley does not rank very high. Good farms, well worked, in and around the municipality, several stores and mechanical establishments, a fine hotel well kept, and some lumbering in winter, constitute about all there is of business at the present time.—Waterloo Advertiser.

HUNTINGVILLE.

Sept. 6.—Mr. and Mrs. Henry Hyatt, from Pittsburg, Mass., are visiting his parents, Mr. and Mrs. S. A. Hyatt, of this place.

Mr. W. A. Hunting and Miss Gertie Robinson, from Massawippi, were at his mother's over Sunday.

Mr. C. P. Hunting, from Abbott's Corner, and Elmer Hunting, from Massawippi, were calling on relatives here Wednesday.

Mrs. George Pease and daugheer Bertha, from Laconia, N.H., were guests at Mr. Ernest Hunting's Wednesday.

Mrs. B. W. Ford, from Waterville, is spending a few days with her daughter, Mrs. Herbert Hunting.

Service in the church here next Sunday afternoon, Sept. 7th, at 2.30

INSPECTION OF SUPERIOR SCHOOLS.

The following is the copy of a circular letter sent out to the Commissioners of the Protestant Superior Schools of the Province.

Coaticook, Que., Aug. 26, 1902.

Dear Sir,—I have been appointed by the Secretary of the Protestant Committee of the Council of Public Instruction, acting under instructions from the Committee, a commissioner under Articles 596, 597 and 598 of the Revised Statutes of Quebec, to inquire into the method of inspection of Superior Schools of the Province, by Dr. J. M. Harper, the present Inspector. I shall shortly proceed to take evidence to the above end. Would you like to be heard or make a statement in regard to the matter? If you are aware of any facts covering the Inspector's methods which, in the best interests of our schools, the Protestant Committee should know, I should be glad to hear from you and will give you an opportunity to express them.

If you are not desirous of making a statement yourself, but know of some other person who could, upon examination, throw light upon the matter, I would be pleased to be advised of his name and address.

I have the honor to be, dear sir,

Your obedient servant,

W. L. SHURTLEFF.

The St. Johns News comments as follows upon the above:

"Dr. Harper has been inspector of the Superior Schools of the Province of Quebec for a long series of years,—if our memory serves us aright, for fully a quarter of a century—and we always supposed that he had been an uplifting force in the cause of education in the territory over which he has exercised jurisdiction. He is the author of some works of a meritorious standard, he has been an active member and President of the Provincial Teachers' Association and in private as well as public life, has stood high in the community. We have no idea what the present investigation means; a lisp of it never reached our ears until a copy of the foregoing letter was placed in our hands a day or two ago, and beyond an occasional criticism, which few public servants cannot escape, we have never heard Dr. Harper's methods called in question, nor his usefulness challenged. Possibly Dr. Harper is a great offender; it may be that he has violated all the laws of the decalogue, or he may even have stepped on the corns of some members of the Protestant wing of the Council of Education; but in any event the means adopted of bringing him to justice is not one that commends itself to our conception of British fair play. It is very much like condemning a man in the first place, and placing him in the dock afterwards. Even if not one unfavorable reply—that is unfavorable to Dr. Harper—should result from this thinly veiled appeal to anyone and everyone to appear again him, the very fact of scattering the circulars broadcast over the country would impair, if not entirely destroy, his usefulness in the future. We cannot suppose that the Protestant Committee or any official of the department would intentionally lead themselves to any scheme to drive from office with tarnished reputation a gentleman who has been so long, and prominently and honorably before the public as Dr. Harper has; nor, do we imagine that, Mr. Shurtleff, in the prosecution of the delicate task he has in hand, has any thought of acting ungenerously, much less unjustly, towards Dr. Harper; nevertheless, an injustice has been done which it will be exceedingly difficult, if not impossible, to undo. The method adopted by the prosecution is as novel as it is cruel, and it is one which we hope will not be taken as a precedent by future investigators. We shall watch the proceedings with the keenest interest. Meantime, it is quite evident that Dr. Harper has a difficult task before him; he starts out with a black eye, he is likely to be confronted with all sorts of unexpected charges and from unexpected sources, and he is entitled to the sympathy and the support of his friends."

RICHMOND.

Sept. 6.—Mr. K. MacRae's grocery store was broken into on Wednesday evening. The burglars entered by breaking the lock of the door at the rear of the building, and also broke the locks of the cash drawers, but only succeeded in securing a few coppers, besides some cigars, biscuits and other dainties which they evidently thought they might relish.

Mr. A. C. Lalonde, C.P.R. travelling passenger agent, is in town.

The G.T.R. train service to Sherbrooke has been particularly good during fair week. The extra morning train leaving Richmond, which was secured through Mr. Mappen's influence, was taken advantage of by a great many people, as it gave them quite two hours longer in Sherbrooke than they would have had by going on the regular morning train. This train has been jokingly called "Mr. Mappin's special," and the securing of it is only one of the thoughtful acts which go to show what a public-spirited man and a splendid citizen Mr. Mappin is.

Mr. E. J. Pearson has returned from a short visit to Montreal.

Mr. L. S. Gowe, who, for the past year has been publisher of the Richmond Guardian, has severed his connection with that paper and leaves shortly for Markham, Ont., where he will take charge of a paper of thirty years' establishment. Mr. Gould is a talented and energetic young man, and his many friends wish him every success in his new venture.

Misses Jennie and Jessie Martin, of Spencerville, Ont., who were the guests of Miss Jessie Kellock, at the Manse, left for home on Wednesday.

Major R. J. and Miss Marion Hewton have returned from a trip to Trenton and other places in Ontario.

Miss Findlay, of Portland, Me., is the guest of Mrs. George Dyson, Janesville.

Miss McMorine, of Montreal, is visiting her sister, Miss K. McMorine.

Mrs. W. Haggart, Craig street, who was taken suddenly ill on Tuesday, is still confined to her room.

Mrs. R. F. Jennings, of Gorham, N. H., formerly of Richmond, spent a few days in town this week, the guest of Mrs. E. M. Stewart.

Mrs. Octave, Miss Mamie and Master Willie Janelle, of Manominee, Mich., who have been spending several weeks with friends in town, left for home Friday.

CHURCH SERVICES.

Sunday, Sept. 7.—Brompton, Christ church, 10.30; Windsor Mills, St. George's—Sunday school, 10.30; evensong at 7. Brompton Falls, School House—10.30 and 7.30. Bible class and Sunday school at 2.15.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney and Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fail's to cure. Send for circulars and testimonials.

Address, F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Hall's Family Pills are the best.

GOULD.

Sept. 6.—Miss Tina McMichael returned home to Windsor Mills on Tuesday morning.

F. A. Morrison is in Montreal for a few days.

Miss Helen French entertained some thirty-five of her friends on Monday evening in honor of her guests, Mr. and Mrs. French, Washington; Mr. and Mrs. P. S. Cyr, Montana, and Miss McMichael, Windsor Mills.

Miss Pansy Young left for Magog on Monday morning, where she will teach for the winter.

Miss Laura McIver, Barre, Vt., is visiting friends in town.

Mr. and Miss Hanright returned home to Ottawa Wednesday.

Bertie McKay is visiting his brother, in Montreal.

Miss Katie Morrison, of Lowell, is visiting her parents.

Mrs. D. H. Morrison entertained a number of little girls on Wednesday afternoon in honor of her nieces, from Washington, who are returning home on Saturday.

Mrs. J. McCaskill is quite ill.

The model and district schools open on the 8th.

A number visited the Sherbrooke Fair.

DIXVILLE.

Sept. 6.—Mr. H. M. Cowhard, of Boston, arrived here on Wednesday night. He took in the Sherbrooke Exhibition en route.

On Sunday next, the 7th inst., Victoria Lodge, No. 16, I.O.O.F., will attend divine service in St. Cuthbert's church in a body. Visiting brethren will be welcome. Service at 2.30 p.m.

On Thursday, the 11th inst. there will be a basket picnic in Mr. Lyman Martin's grove under the auspices of our city band and both Sunday schools. It is expected that Mr. W. L. Shurtleff will deliver an address. There will also be other speakers present. A general and cordial invitation is extended to all.

Mr. and Mrs. House, of Cleveland, Ohio, father and mother of Mrs. (Rev.) C. E. Bishop, are guests at the episcopal parsonage. They expect to remain about three weeks.

The late fine weather has advanced the crops wonderfully so that now everything except corn bids fair to be a large yield. Grain is especially well filled.

COATICOOK.

Sept. 6.—Coaticook turned out nobly to the Great Eastern Exhibition, six hundred persons going from here Tuesday and Wednesday. Five hundred tickets were sold on Wednesday.

Miss G. A. Scott has returned from a trip to Toronto and Montreal, where she has been spending a couple of weeks attending the millinery openings and selecting the latest things in hats for the coming season.

Mrs. A. W. Thomas, of Boston, is visiting his parents, Mr. and Mrs. N. W. Thomas.

Mrs. F. Gordon Roe, of Montreal, is spending a couple of weeks with Mr. and Mrs. W. C. Webster at "Oakhurst."

Mr. and Mrs. L. M. Thomas have closed "Pine Grove Cottage" for the season, and have returned home, leaving their delightful summer residence to silence and solitude once more.

Mrs. E. L. Sleeper, who has been the guest of friends in town, has returned to her home in Sherbrooke. She was accompanied by Miss Trihey, who will spend a few days in Sherbrooke before returning to Boston, and by her sister, Miss James.

Miss Cora Davis, after a most delightful holiday spent in England, returned last week by the S.S. Parisian to Lennoxville, to resume her duties in the Lennoxville Academy. She is at present the guest of her sister, Miss Davis, at the Coaticook House.

Mrs. M. H. Ives, of Sherbrooke, is spending a few days in town the guest of Mrs. A. M. Bullock.

WHEN YOUR PHYSICIAN

Writes out a prescription for any member of your family, it is important that this prescription should be accurately and well filled. Our long experience as dispensers, and our reputation for pure drugs, should induce you to place your trade in our hands.

PAINE'S CELERY COMPOUND

surpasses all other remedies as a blood purifier and system cleanser. It gives grand and blessed results to the weak, rundown, nervous and ailing. Paine's Celery Compound banishes rheumatism and neuralgia; thousands of strong testimonials from cured people prove its worth. Buy your Paine's Celery Compound from us.

W. J. H. McKindsey, Druggist, Lennoxville, Que.

MAGOG.

Sept. 6.—Miss Elizabeth Moore, who has been visiting with her parents here during the past three weeks, left for Montreal yesterday, where she will take up her Kindergarten classes.

The cotton mills have been closed for the past three or four days to allow of some needed repairs to the water wheels. It is thought that the entire plant will be opened up in full on Monday morning.

The house belonging to Felix Benoit, who lives on the Ayer's Flat road, was burned to the ground with its contents one evening this week. Mr. Benoit was in the house alone at the time of the fire, and had only been in bed a short while. The neighbors turned out and did all they could to save the contents. The loss was total, with $200 insurance.

Joseph Hopps, who lives at Miletta, also lost a valuable barn by fire the following night. The building was a valuable one and cost in the neighborhood of $1,200. The crops were also stored in it and there were two cows tied up in it. The whole was lost, with an insurance of $700. The cause of the fire in both cases is unknown.

A large number of people from this way attended the Sherbrooke Fair this week, and are very enthusiastic about the whole affair.

Miss Maud Girard is spending her holidays in Sherbrooke, Stanstead and other places.

Miss Mathewson, who has been visiting her sister, Mrs. R. W. E. Wright, for the past month, left for her home in Lennoxville yesterday.

Every-Day Shoes

and Sunday Shoes for every member of the family.

Fertilizers for Potatoes.

Fertilizers for potatoes received the best and widest of tests all over the country in the American Agriculturist crop contests of 1889 and again in 1890. The ten largest crops averaged 533 bushels per acre the first year and 633 bushels the next year. Most of them were grown by the use of high grade special potato fertilizers. The amount of fertilizer used ran all the way from 500 to 5,000 pounds per acre, but the largest yields over the greatest variety of soils and climates were obtained from 1,800 to 2,500 pounds of fertilizer per acre. Plant food in excess of 2,000 pounds per acre did not materially increase the yield, and that is probably the utmost fertilizer that can be profitably used per acre by expert growers. All these large crops of potatoes paid handsome profits. Some put half the fertilizer in the furrow, running through with a brush harrow to lightly mix it with the soil before planting, the rest of the fertilizer being sown between the rows just before the first cultivation. Others broadcasted half the fertilizer and harrowed it in before furrowing out for the seed and cultivated or hoed in the balance. Stable manure does not produce as large crops or as good quality as the best grades of fertilizers.

Orchard and Garden.

There is really no time saved by planting large trees.

Never allow blighted leaves or limbs to remain on fruit trees.

The gooseberry thrives best in a heavy, loam but not wet, soil.

In a majority of cases the cause of unfruitfulness in orchards is lack of plant food.

CAMERAS !

CAMERAS !!

There's a lot of "moral suasion" in a camera, better than a weekly whipping to keep a boy out of bad company. The pictures are a delight to the whole family.

The camera may cost as little or as much as you choose. Any of these in our window will make good pictures. See them.

CITY NEWS.

(Continued from page 1.)

There was a heavy frost last night.

Dr. J. C. St. Pierre, Dental Surgeon, Y.M.C.A. Blds. Bell Tel. 140.

Mrs. Eames, of Richmond, is visiting Mrs. M. Ross, Queen street.

Miss Yvonne Bourbeau, from Victoriaville, is visiting Mrs. Genest, wife of Dr. L. A. Genest.

For black dress goods the best place in town is T. Belanger's.

Mrs. L. E. Codere and her daughter returned last evening from a visit to Ottawa.

If you are in need of kid gloves, Belanger's store keeps the best make of Perrin's Freres.

Mr. A. Arkley is superintending the construction of the Nichol's Chemical Co's. dam at Capelton.

Ladies who have loaned dishes for use at the hospital counter will please call for them to-day at Plymouth Chapel.

Miss Florence Byrd, Mrs. W. C. Fuller, and Miss Bernice Fuller left town this morning for Toronto, Ont., to be the guests of Mr. and Mrs. Walter Fuller.

Visitors, while in town don't forget to stop at T. Belanger's and give a full inspection of dress goods, jackets, costumes, etc.

The Lord Bishop of Quebec, the Right Rev. Dr. Dunn, is in Lennoxville to-day, and will be in Sherbrooke on Sunday to induct the new Rev. Dr. Shreve as rector of St. Peter's.

J. A. Savoie, lumber dealer, Brompton Falls, will deliver in Sherbrooke or on cars, at reasonable prices, builders' supplies of all kinds, including clapboards, lath, cedar shingles, plain matched and dry boards in hard and soft wood, square timber and studding of all lengths. Orders received by mail or Bell Tel. 268y.

On Thursday evening a demonstration was given in Strathcona Square by Mr. R. A. Cairns, of Montreal, showing the merits of the Swan Dry Powder Fire Extinguisher to put out a fire. A building to represent a room had been erected, in which was first placed a lot of old paper and other inflamable material, and after it was burning well, about two pounds of the powder was thrown on the fire which was immediately extinguished. There was then a lot of fine, dry lumber saturated with oil, set fire to. When it was well started and flames leaping high, the same quantity of powder put this out at once. The demonstration was highly satisfactory to all.

MARRIAGE.

LEMEUX—LAVIGNE—On Sept. 2nd at Exeter, N.H., by Rev. Father Kenan, Mr. Hector J. Lemieux, contractor and builder of Brookline, Mass., to Miss Aurore Lavigne, of Exeter, N.H.

MALENFANT.—At Stoke Centre, the 3rd inst., at the age of 12 years and 11 months, Joseph Alfred Zephirin, beloved son of Joseph Malenfant.

Central House, Magog. Heath & Meigs Props. Travellers Home.

SHERBROOKE MARKET.

The market this morning was very largely attended, and although it was at the end of fair week, good prices were obtained for most every product, more especially for eggs, which brought 25c. per dozen. Many of the attendants at the market this morning were visitors who before leaving the city wished to see one of its interesting establishments. Many remarks were heard regarding the good order that prevailed in the market, as well as the numerous products which are brought in, and none were astonished at the progress of the city with such evidences of its rich agricultural surroundings.

Sausage, per lb.,	11 1-2c
Ham, per lb	15c
Bacon, per lb.	15c
Lamb, per lb.	10c

Beans quiet, ranging from $1.40 to $1.45 per bushel.

Maple products unchanged. We quote: Syrup, in large tins, at 70c to 80c in small tins, at 50c to 60c; and in wood, at 5c to 5 1-2c per lb. Sugar, 7c to 8c per lb.

Honey steady. White strained, in 10-lb. tins, at 8c to 8 1-2c per lb., and white clover comb at 10c to 11c.

Potatoes steady. Good to choice early rose sold at 77c per bag, and ordinary do., at 60c.

THE WORLD'S GRAIN

AN ESTIMATE OF THE WHEAT YIELD ISSUED.

Budapest, Hungary, September 6.—The Hungarian Ministry of Agriculture estimates the world's yield of grain this year as follows:

	Bushels.
Wheat	2,905,320,000
Oats	3,004,720,000
Corn	2,973,480,000
Rye	1,577,040,000
Barley	1,141,680,000
Barley	1,141,680,000

The European wheat crop is estimated to give an increase of 193,120,000 bushels over the crop of 1901. A decrease of 136,320,000 bushels is expected in the European corn crop.

The wheat crop of the United States is estimated at 646,100,000 bushels with a surplus of 210,160,000 bushels.

The Canadian wheat crop is estimated at 93,728,000 bushels, with a surplus of 29,820,000 bushels.

THE KAISER.

LEAVES POSEN AND THE POLES BEHIND.

Posen, Prussian Poland, September 6.—Emperor William, the Princess, and the Crown Prince Frederick William, started at noon yesterday for Potsdam. They were everywhere heartily cheered.

ANOTHER GREAT STEAMSHIP.

Order For One Larger Than The Cedric.

London, Sept. 6.—The White Star Line has ordered another steamer to be built by Harland & Wolff, of Belfast, which is to be twenty feet longer and a few feet wider than the same Company's steamer Cedric, now the largest liner in the world.

TENDERS

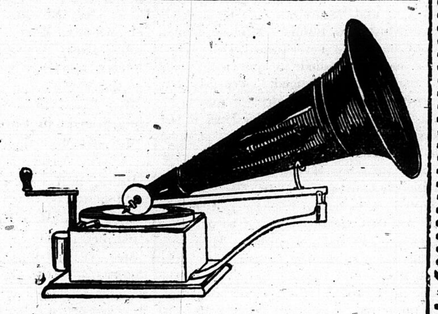

will be received for excavation of earth and construction of basement walls, by D. McManamy up to noon, the 13th inst., as follows:

1. For excavation for sub-basement, basement and their respective walls and footings, as directed by owner on premises.

2. For labor and material necessary for the construction of sub-basement and basement foundations and footings, walls, piers, vault, etc., as per plans; or as per directions, as to brick line round sides and rear building, per cubic yard.

Plans and specifications may be seen at the office of D McMANAMY and CO.

THE WORLD'S GREATEST ENTERTAINER

THE BERLINER GRAMOPHONE

This wonderful instrument will talk, sing, preach, recite. It will reproduce vocal or instrumental music, coon songs, hymns, banjo solos, etc. It will amuse and instruct a whole family.

Easy to operate--a child can run it.

Prices $15.00 to $40.00.

Sold on Easy Monthly Payments if Desired.

THE ONLOOKER.

THE DRUG STORE BURGLARS.

It is not possible to say with certainty whether the two brothers recently sentenced to penitentiay terms for entering Griffith's drug store are the same who committed the former similar offences or not. From the methods pursued in the latest visit it would seem that they are. This will be the general view and the public will rightly congratulate itself that the thieves have at last been detected, tried and committed to prison.

The burglaries have all been of a petty nature but the success constantly attending their efforts if our surmise be true, was almost certain to lead to more serious depredations, in fear of which with the criminals at large, the public would constantly live.

Though minus considerable merchandise, Mr. Griffith, if he be inclined to treat the matter in a philosophic manner, may consider his losses offset by a large amount of the very best of advertising without other cost to himself.

FOUR DOLLAR BILLS.

If his intentions have been rightly reported, Finance Minister Fielding is on the eve of a popular success in ceasing the issue of the four dollar Dominion of Canada notes. In actual circulation they are seldom of real service and not infrequently they are worse than useless. There never was any need for a separate bill between the two and the five, as three or four is easily totalled by the use of smaller bills, and besides the fours already in circulation are frequently mistaken for fives. It will naturally be some time before all the bills can be called in, and until they are, whatever his later accomplishments, we must continue to class the Minister who first put them into circulation with him whom we all love for bringing into existence the useful and handy twenty-cent piece.

QUEBEC'S DEFAULT.

Notwithstandiyg the fact that the defaulting of the Quebec Club gave Sherbrooke the cup without the shadow of a struggle, none will regret more than lo cal lacrosse men that the Quebecers should have deemed it necessary to take such a sorry step. For years and years Quebec and Sherbrooke Clubs have been the staunchest enemies, and with an enmity which once in a while exceded the bounds of true sportsmanship, but always each had a high appreciation of the playing qualities of the other.

The visits of no other lacrosse team were looked forward to with greater pleasure because when Quebec came a game well worth the seeing was almost assured. The expressed hope of the Quebec Telegraph that the defunct club may be found restored to life with another spring will find a ready echo here.

CRUELTY TO ANIMALS.

It was a pleasure to note the commendable zeal of the S.P.C.A. authorities in despatching an inspecting officer to Ayer's Flat during the progress of the recent fair to take cognizance of the possibly brutal treatment of horses brought there by the French-Canadian farmers solely for the purpose of trade. It was patent to the officers that many of the animals were unfit for any service, and one, worse than the rest, was removed, but as no cruel treatment of them was seen the officer was forced to return without doing anything further.

We wonder if the S.P.C.A. would object to a suggestion that an officer be occasionally sent to a horse trading corner near No. 3 station.

From the published reports it is evident the conditions at Ayer's Flat were not worse than those constantly in evidence here. It is not an unusual thing to see an ancient animal put through severe paces, which it is plain that he should have been sleeping the sleep years ago. On top of this brutal use of the lash and reins is not infrequent. We have often wondered if the S.P.C.A. officials lived in knowledge of these Saturday horse-trading conditions, and, if so, why is light not more often let in upon them.

Might it be that there exists a possible objection to the inspecting officer operating so near home?

POLITICAL HUMAN NATURE.

Onlooker was privileged not long since to be present at a political meeting, in fact, at two political meetings, in the both of which occurred an incident peculiarly illustrative of one type of oratory. One of the speakers at the first of the two meetings was a gentleman evidently not quite at home on the stump, and whose speech, boyishly elaborate and studiously prepared, was delivered in a manner best described by a phrase used some years ago in referring to the piano accompaniment to a Boys' Brigade drill in the Art Hall as "lacking uniformity of execution."

The second meeting was held in a different place, and presumedly, in the speaker's opinion, with an entirely different sets of auditors, for, following a preface in which he frankly stated his intention not to make a speech, because his mean abilities were not equal to the task, etc., etc., he coolly repeated almost word for word the speech of the previous meeting, anecdotes, studied gestures, all complete.

No doubt it is the way of the world, of the political world, that is, but politics in general and reform movements in particular, in themselves most worthy, as this one was, ought not in justice to be called upon to bear the burden of such trash.

THE ONLOOKER.

A FISHERMAN'S PARADISE.

Harold Simpson Tells All About It in the Fishing Gazette.

"Yes," said the Major, as he lighted his cigar, "it was up in Canada, when I was quartered there in '88. We had got six months' leave, and went up the river in a little sailing boat. As luck would have it, we ran aground while trying a rather difficult bit of navigation, and damaged our craft so much that there was no going on in her. However, we struck a settler's hut not far away, and put up with him for a day or two while he helped us to repair the boat. Just before we left he asked us if we would like some fishing on a lake a few miles away. 'It belongs to me,' he said, 'but I have never fished it, nor any one else for that matter. In fact, I don't believe it has ever been touched since the days of creation.' We jumped at this offer, naturally, and he lent us his boat—something between a punt and a canoe, but very light and easy to carry. Accordingly we stocked her with provisions and started off.

"We got there in the evening, or what we imagined to be there, for as to seeing the lake it was impossible, so thick was the forest that grew around it. But we could tell by the lay of the trees that there was a piece of water there. Well, gentlemen, we started cutting our way through. Ever seen a primeval forest? I expect not. It took us two days and a half, which will give you some idea of what we had to go through. We would cut our way for a hundred yards or so and then come back and fetch the boat to the furthest point that we had cleared. At night we camped under it on the spot where we had knocked off work for the day. We got there at last, however, and found a lake about five miles long by three broad. A nice bit of water it looked, and we got out in the boat and started fishing about 10 o'clock one morning.

"Now, gentlemen, I have not the slightest wish to exaggerate, but any fool could have caught fish in that lake. I assure you, upon my word of honor, that had we been absolute novices we could if we had been able to cast a couple of thousand flies on the water at the same time have hooked a couple of thousand trout. The result was that after about two hours of it we began to get exhausted. My arms were aching, and I could hardly hold the rod. We agreed to knock off. But just as we were about to make for the shore we discovered that a terrible thing had happened. We had filled the boat so full of fish that it was beginning to sink. There was only one thing to do. Here we were in the middle of a big lake in a boat that was rapidly filling. We commenced to shovel out fish as fast as we could. Perhaps some of you have been in a leaking boat, and tried to bale her out against time when you know that the water is gaining on you every minute. Well, that was just our state, only we were bailing out fish instead of water."

"Did you get to shore without a ducking?" some one asked, when he seemed to have finished. "Yes," said the Major, "we managed it. But that was not the most wonderful part of the whole thing."

A chorus of questions assailed him. "Well," said he, "the extraordinary part of it was this. Every one of the fish that we threw overboard revived and swam away as if nothing had happened. They had been there for so many centuries that they had become immortal."

Travels 67,704 Miles Yearly.

The conductors and brakemen who man the trains on the Wellington, Grey and Bruce branch of the G. T. R., travel 217 miles daily. This makes a weekly run of 1,302 miles, 67,704 yearly, or nearly three times around the world.

BABY'S OWN TABLETS

Help Little Babies and Big Children In All Their Minor Illnesses.

When your child—whether it is a big child or little baby—suffers from stomach or bowel troubles of any kind, is nervous, fidgety or cross and does not sleep well, give Baby's Own Tablets. This medicine is the quickest and surest cure—and the safest, because it contains no opiate or harmful drug. No matter how young or how feeble your little one is the Tablets can be given with a certainty that the result will be good. For very young infants crush the Tablets to a powder. Mrs. Geo. W. Porter, Thorold, Ont., says: —"My baby had indigestion badly when he was about three months old. He was constantly hungry and his food did him no good as he vomited it as soon as he took it. He was very thin and pale and got but little sleep, as he cried nearly all the time, both day and night. He was constipated; his tongue coated and his breath bad. Nothing did him any good until I got Baby's Own Tablets, and after giving him these a short time he began to get better. His food digested properly; his bowels became regular, he began to grow, and he is now a big healthy boy. I always keep the Tablets on hand and can recommend them to other mothers."

The Tablets can be obtained at any drug store or you can get them by mail, post paid, at 25 cents a box by writing to The Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y.

EMBLEM OF CANADA

THE HARD OR SUGAR MAPLE LEAF AND ITS RELATIVES.

A Queen City Regret That the Silver Maple Was Not Chosen Instead of the Grandest of Forest Trees—The Dominion's National Leaf Does Not, However, Find City Life Congenial—Better as It Is.

The maple chosen as our emblem is the hard or sugar maple, and although it is the grandest of forest trees in magnitude and beauty of aspect, it is not unnatural in the city, where all maples are on an equality, to regret that the silver maple, with its early buds and delicately-outlined leaves, has not been our choice, says The Toronto Globe. The silver maple blossomed three weeks ago in Toronto, and the male buds have already strewn the pavements where the streets enjoy the blessing of sunshine. As with most of the maples, there are male and female trees, but some are found bearing both sterile and fertile flowers. The flower buds, which have been giving promise of life all through the winter and have now come forth to fulfill their mission, are rounder and more obtuse than the foliage buds, which will soon elongate and fall away from the pale, green, downy leaves. The beauty of these leaves is in their deep, narrow sinuses and long, slender-pointed and sharply-indented lobes. The five main divisions and many sharp subdivisions of the leaf could not be more gracefully outlined than in nature's pattern. Their color, pale green above and silvery white beneath, matches their delicate outlines, and their slender, drooping stems enable them to turn with every passing wind, though not with the uniformity of the aspens. This is an early maple, and its familiar two-winged seeds will be on the ground and striving to sprout and take root before the seeds of our chosen emblem have matured on their stems. The red maple is also early, and its male buds are already tramped into the boulevards or swept into the carts of the scavangers. Their first appearance a few weeks ago, red, swelling and putting forth the delicate growth they had treasured through the winter was an announcement of spring. The seeds of this maple ripen in May, turn a bright red and fall, taking root at once if conditions are favorable. The leaves are of a more substantial pattern than those of the silver maple, the divisions between the lobes being angular and not so deep. In color they are a brighter green above and of a duller white beneath, but they can be distinguished from the leaves of the sugar maple by their sharply-serrated margin. They present the most beautiful of autumn colors.

The sugar maple, which we claim as our very own, does not find the city congenial, and does not attain the splendid proportions familiar in the woods of eastern Ontario and Quebec. It is not a precocious tree, and the winter buds, both of flowers and leaves, are still dormant on its branches. Both open about the same time, and while the soft downy young leaves are shedding the elongated scales that have encased them during the winter the flowers are developing in yellowish clusters on slender stems. The male and female trees are generally distinct, but both fertile and sterile flowers are sometimes found in separate clusters on the same tree. The five-lobed leaf, sharply toothed and divided by rounded sinuses, is familiar as the emblem of the Dominion. This is the tree of the sugar bush, and that Canadian has missed something out of his life who does not associate it with the "sweet" recollections of his childhood. The smoke of the open fire, the paths through the snow, the quivering of the heat, the piece of pork suspended over the great kettle to prevent the sap boiling over, the dripping spiles and basswood troughs, the looped twig as a tester, and a heterogeneous assortment of kitchen utensils pressed into the service for sugaring off, make a harmonious background of memory that always comes with the first announcement of maple sugar, and those who see it with the eye of understanding will pardon the complaint that maple sugar is not like it used to be. The maple stands in many and varying backgrounds. Perhaps the handsome grain in the back of a violin recalls the occasional discovery of a "birdseye" stick in the woodpile, and efforts to split it so as to show both the bird's eyes and the wavy curls. It rivals the soft maple in the brilliancy of its autumn tints, and paints a much bolder landscape. The rich carpet with which it strews the ground hastens to early decay and does its part towards producing the moist warmth we delight in under the name of "Indian summer." The sycamore maple is familiar, though a European immigrant. Its leaves have the characteristic five lobes, but are quite distinctive in appearance, being darker and thicker than those of the sugar maple, and having roundly and obscurely toothed margins. Like the Norway maple, it retains its foliage later than our native trees. The ash-leaved or California maple should be more popular, but its compound leaves of from three to five leaflets seem a bar to its claim to membership in the chosen family. It retains its seeds late into the fall, and seems reluctant to part with them even after its leaves have fallen. The little spike maple is met occasionally in our suburban woods. The five lobes of its leaves seem crowded into three, and they have a finely-wrinkled appearance, but they are smooth above and downy underneath. Its spike of greenish yellow flowers is found among the leaves in June. The moosewood that makes so much of the underbrush in Quebec and eastern Ontario is also a maple. But in its native forest our chosen emblem is supreme in her regal beauty, commanding the homage of all other members of that handsome and interesting family.

PRINCESS RADZIWILL.

Sketch of the Career of This Titled Adventuress Now in Prison.

Princess Katharine Radziwill, who has just been sentenced to two years in prison at Cape Town, comes of an old Polish family, that of Rzowuska. She married Prince William Radziwill, and one of her three children is now Princess Blucher. She resided for some years in St. Petersburg, and then in Berlin. It was during a casual visit to London that she first met Mr. Rhodes. Those who believe in the "evil eye," will find confirmation of their superstition in the fact that no less than three people concerned in the case or mixed up with the Princess' affairs have died since criminal proceedings were first instituted against her—to wit, Mr. Rhodes, Dr. Scholtz of Cape Town, and Captain Penfold, a director of the De Beers Company. Princess Radziwill visited Cape Town in 1900, her object, it was said, being to sow dissension between Government House, to which she had letters of introduction, and Groot Schuur, by repeating to Mr. Rhodes wholly imaginary conversations she had had with Lord (then Sir Alfred) Milner. She is given the credit for the discovery of a new medium of intrigue—the typewriter. To many persons of standing she had read private instructions she professed to have received from the highest authorities in England, the Prime Minister among them, of an extraordinary and even a startling character. When asked whether the Princess showed them the originals the uniform reply was, "No, they were typewritten copies, which she used to avoid the danger of losing the originals." It was said that she was acting for Dr. Leyds.

Couldn't Remember the Duke.

Dr. Temple was often greeted affectionately by perfectly unknown young men who professed to be old friends, and who afterwards turned out to the old Rugby boys. The bishop got into the way of pretending to remember the identity of any lively person who flew up to him with rapturous greetings—simply, says The Week End, to save lengthy, and sometimes crestfallen, explanations. One day, at Oxford, a handsome youth greeted him with a fervent shake of the hand.

"Eh?" said the always curt bishop, abstractedly, "you quite well?"

"Yes," replied the good-looking young man, with graciousness.

"All well at home?" said the bishop.

The young man stared slightly, but replied courteously:

"All well, thank you."

"Father well?" said the bishop.

"My father, sir, is dead," said the young man, with a little pardonable sternness.

"Ah!" said the utterly undisturbed bishop, "and how's your mother?"

"Sir," replied the handsome young man, with great gravity, "her Majesty the Queen is in excellent health."

He was Prince Leopold, the Duke of Albany, to whom Dr. Temple had been tutor, but whom that unimpressionable bishop had for the time being forgotten. The reply is unrecorded!

Beginning to Notice It.

The newspapers of the Western States are becoming alarmed at the emigration from them to the Canadian Northwest. It is quite apparent that the Yankee farmer knows a good thing when he sees it, in Government as well as land.—St. John Telegraph.

RE-BUILDING The Brokendown Structure

Paine's Celery Compound

REPAIRS THE DISEASED PARTS OF THE HUMAN BODY AND ESTABLISHES HEALTH, COMFORT AND HAPPINESS.

Can we re-build our pain-racked, emaciated and wasted bodies? Yes, the work can be done even though the spark of life glimmers but fitfully and feebly. This work of re-building can only be effectugly accomplished by the use of Paine's Celery Compound, that marvellous medicine that has saved so many lives in the past.

Paine's Celery Compound, nature's fortifier and builder, acts directly on the great nervous system, giving pure vitalizing blood, nerve force, digestive vigor, refreshing sleep and increased weight.

Begin the good work of health-building to-day. Take home a bottle of Paine's Celery Compound, use it faithfully, and you will have cause for rejoicing and thanksgiving. Mr. C. B. Holman, 262 King St., West, Hamilton, Ont., happily saved from a complication of serious troubles, writes thus:

"Having been troubled with a cough, debility and general depression of spirits, I used a number of medicines but received no benefit from them. I was then advised to use Paine's Celery Compound. I procured the preparation and began to use it with wonderful benefit. I am now convinced, after using several bottles of this unequalled medicine, that no other can compare with it in any respect. I am now a changed man; my health is renewed, depression of spirits gone, my appetite is good, and I can sleep well. I will always say a good word for Paine's Celery Compound."

MISS BONNIE DELANO

A Chicago Society Lady, in a Letter to Mrs. Pinkham says:

"DEAR MRS. PINKHAM:—Of all the grateful daughters to whom you have given health and life, none are more glad than I.

"My home and my life was happy

MISS BONNIE DELANO.

until illness came upon me three years ago. I first noticed it by being irregular and having very painful and scanty menstruation; gradually my general health failed; I could not enjoy my meals; I became languid and nervous, with griping pains frequently in the groins.

"I advised with our family physician who prescribed without any improvement. One day he said,—'Try **Lydia Pinkham's Remedies.**' I did, thank God; the next month I was better, and it gradually built me up until in four months I was cured. This is nearly a year ago and I have not had a pain or ache since."—BONNIE DELANO, 3248 Indiana Ave., Chicago, Ill.—*$5000 forfeit if above testimonial is not genuine.*

Trustworthy proof is abundant that **Lydia E. Pinkham's Vegetable Compound** saves thousands of young women from dangers resulting from organic irregularity, suppression or retention of the menses, ovarian or womb troubles. Refuse substitutes.

FIRST BLOOD SHED.

GENERAL DEWET'S NEPHEW TELLS OF HIS EXPERIENCE.

Adolph Dewet's Says He Lost the First Blood Shed in the Boer War and Tells How It Happened—Says the Boers Were All Prepared When the Outbreak Came.

Adolph DeWet, a nephew of the Boer general who was captured and deported to Bermuda, and who subsequently escaped, told in New York the story of the first blood shed in the long war.

Since his escape the young Boer general has been making a desperate effort to make enough money to take him back to South Africa. He is a manly, intelligent young fellow, tall, straight, broad shouldered and muscular. He can talk in four languages. He is an electrical engineer by profession. You might mistake him for a college graduate.

It was at the end of a long talk that he spoke of his wounds. "Only twice," he said, "was I much hurt. Once was when I got that bullet in my foot and was caught. The other time—well, that was funny, now I come to think of it. I suppose I lost the first blood that was shed in the war. You see, we Boers were all prepared for the thing when it came. Our plans were all laid. The first thing we did, you remember, was to ship all Englishmen out of Johannesburg. We began the very day war was declared.

"My folks lived in a suburb of Johannesburg. As soon as I heard that the war was on I took my rifle and went into the city. I had no more than reached there when I met an Englishman. He had an old musket with bayonet fixed. I stopped him, and he stopped me.

"'You just hand over that gun, young fellow,' says he.

"'Not much,' I says. 'You come with me to the railroad station. We're going to send you all packing.'

"With that we had a scuffle. Of course I might have shot him or he me, but you must remember that up to that time not a Blow had been struck. It would have seemed like murder to me. I suppose he looked at it in the same way. So we just scuffled. In the mixup he stuck his bayonet into the calf of my leg. Then I hit him between the eyes and laid him out. I took away his old musket. What do you suppose he did then? Why, he gave me his shoulder as we walked down to the station and carried the guns. Every few minutes he would say: 'Sorry I jabbed you, young fellow. Does it hurt much?' We hadn't got used to killing each other then."

This was his story of an incident which might well find place in history—the first blood spilled in a war which has made the world shudder.

"When I went home that night," says young DeWet, "my old mother made an awful fuss. She put me to bed and bathed and bandaged my leg, drying all the time until I felt like a baby. The hole healed up in the course of a week or so, and when I started to join Joubert's commando she made another fuss. My father only said: 'Let the young whelp go. He'll have to learn it sooner or later. Go on, Adolph.'

"Six months later, when I came back for more clothes and a day or two of rest, mother drove me out of the house with a broom.

"'Why are you not fighting with the other men?' she asked. 'Go back and stay until you have driven the ruineks into the sea.'

"That was the cry of all our women."

OUR GREAT NORTHWEST.

Rev. John McDougall's Unique Sermon—What 100,000,000 Cultivated Acres Would Mean—A Little Figuring.

An exceedingly inspiring missionary sermon was heard by the members of the Metropolitan Methodist Church recently from Rev. John McDougall, Superintendent of the Methodist Indian Missions in Manitoba and the Northwest. It was a unique sermon, and at the outset seemed more like an address by a western statesman to, say, the Board of Trade than a pulpit discourse. Mr. McDougall's figures came as if from a politician, but were in reality the result of close reasoning by a zealous missionary. He spoke from an experience of 42 years in travel and work throughout every part of the Northwest, and yet confessed that he knew only a part of it, notwithstanding the fact that the pastor had introduced him as a man knowing more, perhaps, about it than any other living person.

Mr. McDougall took as an illustration of the greatness of that country a block of land 1,000 miles square (640,000,000 acres), abutting the 49th parallel, and lying between the Rockies and the western boundary of Ontario. This great stretch of territory contained, in his estimation, more acres capable of agriculture and of responding to the thrift and mechanical operation of industrious men than any other stretch of like dimensions on the face of the globe. He called it the very acme of God's work in this respect. Of this great block of land he took 100,000,000 acres, less than one-sixth of it, and placed a conservative estimate of a yield, when cultivated, of fifteen bushels an acre. Then he took the bulk estimate, and asked what it would mean to move it to the markets of the world. Looking at it as Mr. McDougall presented it, the haulage necessary seems enormous. He took a train of 40 cars leaving Winnipeg for the east. Each car would carry 1,000 bushels, making an aggregate cargo of 40,000 bushels. Then he asked how many trains of that kind it would take to move his conservative estimate of fifteen bushels an acre of one-sixth of his selected block. He had found that it would take 37,500 trains of 40 cars, or a little more than 102 trains a day for every day of the year. Figuring more finely still, he had found that it would keep one of such trains moving out of Winnipeg every fifteen minutes, day and night, for 365 days to move the wheat crop of but one-sixth of that stretch of country.

But Mr. McDougall did not confine his estimates to wheat alone. He supposed that in time live stock would be raised in that part of the country. He had waited 23 years for a railway, and had come to know the virtue of patience. The country was rich in pasture land and grasses of rich butter and cheese producing qualities, so that it promised great possibilities. Mr. McDougall allowed one fat bullock a year for shipping purposes to every 40 acres of one-sixth of the block 1,000 miles square. That meant 16,000,000 head of cattle a year. At 20 head to a car it meant 40,000 trains of 20 cars each, or a little more than 100 trainloads of cattle moving out of Winnipeg every day for a year. To every ten acres he allowed one fat sheep and one marketable hog. That meant 64,000,000 of each, which, loaded 200 to a car, would show 32,000 trains of twenty cars each moving out of Winnipeg, one about every fifteen minutes, day and night, for a year. Butter and cheese were not overlooked, but of wheat and live stock alone, at this very conservative estimate, it was shown that 109,500 trains of twenty cars each would pass out of Winnipeg every year, or one train every five minutes, to the markets of the world.

Mr. McDougall said that he himself had traced along the eastern base of the Rockies 500 miles long and 200 miles wide one great bed of rich anthracite and bituminous coal, or, in other words, 100,000 square miles of it. He had heard that China had the largest coalbeds in the world, but his own observations had led him to believe that she had not one-fifth as much as this one block.

Then there were great water powers. Mr. McDougall, in his travels, had found strong and persistent currents. He and a companion in an old punt had once gone with the current down the big Saskatchewan 160 miles in 28 hours. There were also great natural reservoirs of water, with splendid tumbling power. The country along the valley of the North Saskatchewan was compared with England. It looked to Mr. McDougall as if some great race had lived there centuries ago, so splendid were the terraced forests and natural beauties.

A Vast Irrigation Scheme.

The C.P.R. has in contemplation a great project for irrigating the immense plateau stretching from Calgary eastward to Medicine Hat. The area that it is possible to supply water to is 100 miles by 30 and the soil is of great fertility. The water to be used is that of the Bow River, and the most favorable point of a very promising project is that in June, July and August, when water is most needed on the land, the river, because of the melting of the snow on the Rockies, where it has its source, is at its maximum flow, and will provide water enough to turn what is now a barren plain into a garden.

With such work to their hand and such an outlook for the future, it is little wonder that the people of Calgary look more care-free than those of us who wrestle for a living in what a confrere happily described as the "cent belt." Here at Calgary we are in the heart of the "nickel region," and the man who offers a copper in payment even for a stamp is speedily made aware that he has done something almost as heinous as eating with his knife.

McOnnechy, or Duncan—The son of Brown Head,

The Manufacture of Beds By Geo. Gale & Sons, Waterville.

On the 30th January last the large iron and spring bed works of George Gale and Sons, Waterville, were entirely destroyed by fire. It was a severe blow to the owner, Mr. Frank G. Gale, as well as the village, of which it is the principal industry, but notwithstanding the unseasonable time of the year, and other disadvantages, Mr. Gale proceeded at once to rebuild on a larger and more improved scale. On April 1st the foundry was ready for work and in May all departments were in order and shipping goods.

By the cuts accompanying this article some idea can be obtained of the task accomplished in three months, while only those who are acquainted with the weather usually experienced in February, March and April in this country can appreciate the unusual difficulties overcome.

The buildings occupy a floor space of over 6,600 square feet, about 1½ acres. The foundry is 60 x 132; boiler room and dry kiln, 2 stories, 30 x 50; main building 55 x 180, 3 and 4 stories; and addition with offices, 50 x 100, three stories. The buildings are being fitted entire with the sprinkler system, as well as special fire pump with frictional gears that can be connected instantly, night or day, thus every precaution is taken from fire in the future.

The buildings are high and afford plenty of light and are fitted with every convenience for the employees. The men and girls have separate reading rooms, which they use during the noon hour.

The private offices, facing the south-east and enjoying the morning sun, are finished in black cherry, and have a specially neat appearance.

Only a visit through the factory can give an idea of the process of manufacture. It is ver interesting. Starting in the foundry, one sees the iron in long bars, which is cut, bent and cast into iron beds, turning out 1,000 a week. Then passing to the paint room the first act of finishing the beds is witnessed. They are given three coats of white paint, and to do this thoroughly and quickly they are dipped in the paint, one day being allowed for each coat to dry.

In another part of the building the manufacture of brass beds, and brass finishings for the iron beds is in process. After the brass has been burnished bright it is put through a special process, called lacquering, to retain the bright appearance. This consists of giving the brass, when very hot, about nine coats of a secret preparation, obtained in England, something like varnish. Many attempts have been made in the United States to find out what the preparation is composed of, but so far unsuccessful, although several imitations, very inferior, are used. The extreme care taken by George Gale and Sons to have all their brass goods properly finished with the best English preparation, has been one of the reasons for their success.

The next item of interest is the spring beds, the manufacture of which was the first start of the present company. The patent was granted to the father of the present proprietor, and much of the machinery used was of his design, in order to be able to produce the well-known "Gale Spring Bed." New styles, known as the New Dominion and Cuban Woven Wire, have been added during the past few years, and are now the popular beds of the country. The output is 500 a week. These were designed and patented by Mr. Frank G. Gale.

It is worthy of note that about 50,000 bedsteads supplied with "New Dominion" Springs have been supplied the British Government for army and hospital purposes. The King's yacht is furnished with bedsteads fitted with the "New Dominion" fabric. This is the only spring bed, as far as we know, that the British Government has adopted.

In the third story of the main building 300 different kinds of mattresses are manufactured weekly.

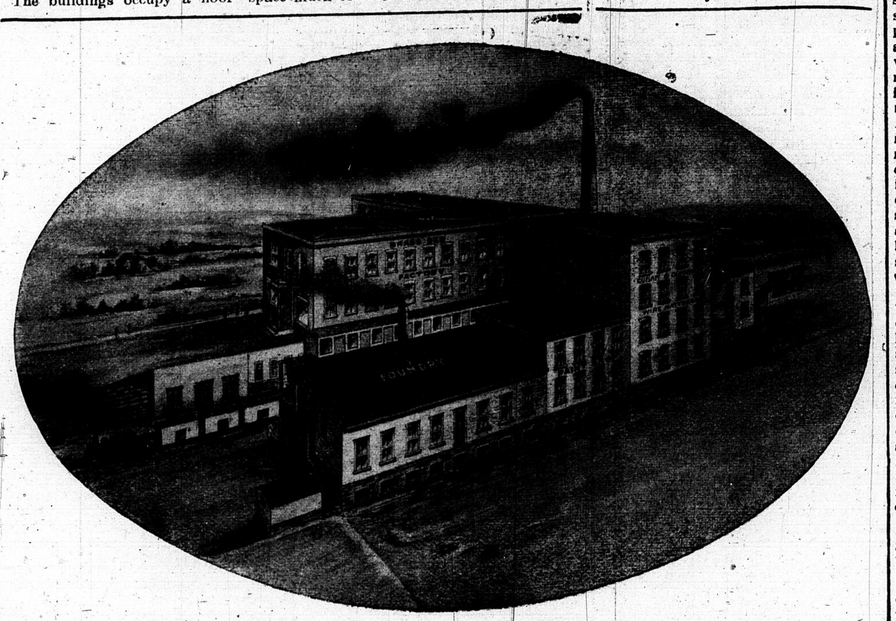

Water power is used to run the machinery of the whole building, and a 190 h. p. Crocker water wheel, being manufactured by the Jenckes Machine Company, of Sherbrooke, is just being installed. This wheel has been selected only after a great deal of care. The results of actual tests having been found superior to any other water wheel.

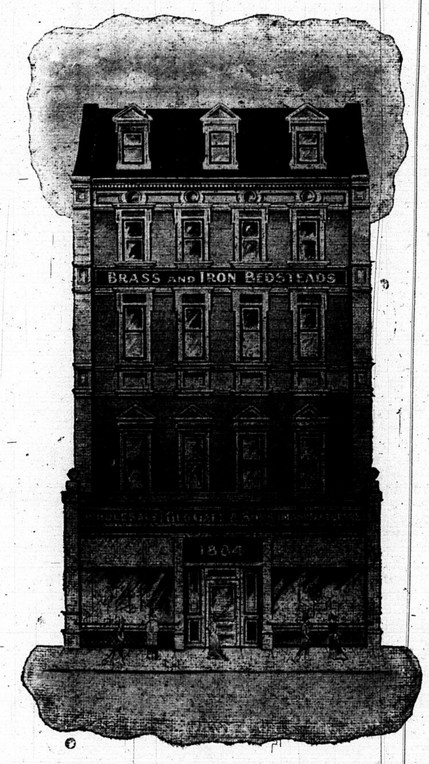

Since the new buildings were completed the entire force have been working night and day to try and catch up with accumulated orders, but notwithstanding travellers have done but little soliciting since the fire orders now ahead will keep them busy until late in the fall. Over one-half the goods are sold west of Ontario.

The number of employees in the building is between 140 and 150, of which about 25 are girls.

There being no job printing office in Waterville, Messrs. Gale and Sons installed one of their own, which in addition to doing all the work of the firm also handles other jobs secured in the village and surrounding places.

The firm of George Gale and Sons was first organized at Smith's Mills, Que., in 1877, acquiring the business of the late Mr. George Gale. In 1881 they removed to Waterville. The firm, as first constituted, consisted of the late Mr. George Gale, his two sons, the late Mr. A. H. Gale and the present proprietor, Mr. F. G. Gale. Still continuing under the old style and name, a reorganization of the firm was necessitated by the death of Mr. George Gale in 1892, and again in 1895, when Mr. A. H. Gale became proprietor of the English business.

"BEAUTIES OF SILVER LAKE."

There are many old sayings which have been handed down through ages, but let us not think light of them because of their antiquity, but rather let us respect their years and their wisdom.

For instance, in the days of yore it was proverbially said, that

"That far sought and dear bought
May be good for naught."

Of course, by this, the writer does not mean to insinuate that everything sought and bought will be good for nought, but simply to impress upon those who may chance to read these few lines not always looking for "summer resorts" in foreign lands when silvery lakes are at their doors.

So please allow a late guest to the attractive and pleasant resort of "Silver Lake" to express in a few words his sense of admiration for such a spot. First, the locality is most beautiful, situated about one mile north of Marbleton, surrounded on three sides by lofty hills, with shaded trees, forming a most picturesque and inspiring scenery. Its situation affords easy access with a main road within a few yards of the water's edge. Then by the lake shore landing or "embarking station" there is a handsome boat house where several boats are kept for the use of pleasure keepers. Then crossing over to the largest of the "Trois Soeurs" islands is a suitable club house, where visitors may find perfect comfort and sure pleasure and various amusements. The building itself is situated high on a rock on the very water's edge, so much so that fishing may be ndulged in from an easy chair or hammock off the elaborate verandah, and from where the whole panorama may be seen at a glance.

The lake affords good fishing, delightful boating and swimming, and moreover an "extraordinary appetite" ir guaranteed, which, as a rule, is a most wholesome characteristic.

The body of water I should say were about three or three and a half miles in circumference, with beautiful landing spots all around, which would seem most delightful for tourists or picnic seekers. And so fertile are its banks that ladies coming from their shores have been known to be greeted as coming from a "fairyland," so gorgeous were they decked with floral decorations.

Another important characteristic is from whence it derives its name of "Silver Lake." No one could fail to read its very name on its still water's surface, especially at sunset when all is still and calm, with the bright rays and reflections of the sun forming a most beautiful and striking spectacle.

And who could wonder but that after frequent visits to such a spot the author of the beautiful poem entitled "Seer of Silver Lake," should have received sufficient inspiration with which to accomplish such a task, and which production may now be found in circulation amongst ye sons, daughters and friends of the "Silvery Waters of the Marbletown."

Trusting that before long "Silver Lake" will be known as one of the important and famous Canadian summer resorts—and in conclusion, 'ye writer would say, readers, remember "old sayings" "and silvery lakes."

E. R. R.

MALE CANDY FIENDS

ONE MAN EATS 400 POUNDS OF CHOCOLATES DURING THE SUMMER.

The Matinee Girl Is Simply Not in It With Some of the Men—One Who Goes On Candy Sprees—Has Craving by Fits and Starts—Eats It to Be Doing Something.

Ever since far-seeing dealers began putting candy into artistic pasteboard boxes fringed with ingenious designs of paper lace and tied with gold or silver cord, the title of "candy fiend" has clung with inseparable tenacity to the matinee girl. But in Toronto, at least, says The Sunday World, the matinee girl is not the only one who has a pronounced and assertive sweet tooth. There are others who have the candy habit with all of its pernicious seductions, and strangely enough those others are men.

In point of numbers women who have the candy habit dominate men similarly afflicted, but in this respect only can they be said to occupy a position to the fore. For when a man becomes a candy fiend he develops into the worst kind of a fiend, resorts to lavish expenditures and injects candy eating into his business, as well as his social diversions. An American city is said to have one man alone who during a single summer ate 400 pounds of chocolate creams, a record sufficiently startling to cause even the most perfectly developed matinee girl to blush for shame. This man has made several attempts to "swear off," but as yet hasn't succeeded, and the enemy pursues him as relentlessly to-day as when he first became a "candy fiend."

A citizen of Toronto suffers from what he calls candy sprees, and, according to his own admission, is as helpless when the desire for candy strikes him as the most helpless slave to liquor. His periodicals come on every three weeks with remarkable regularity. He may be sitting at his desk, walking along the streets or even lying in bed when the idea strikes him, but this matters not, for when his sweet tooth begins to assert itself there is but one thing for him to do—start out to find a candy store.

This man never buys in large quantities, for he never knows just how long the desire for something sweet will pursue him. Sometimes it lasts but a day or two, while again it will continue for a week. While on one of these "periodicals" the candy slave is never without a little bag of sweets, except when asleep. Even then he is not free, for he sometimes wakes up in the night suffering from the same burning desire for more candy. After eating a little he goes back to sleep perfectly satisfied. A strange peculiarity of the habit as it has fastened itself upon this man is that after the "fever" has left him he couldn't be induced to taste candy for any consideration.

"The stuff is absolutely repulsive to me except when I am on one of my sprees," he says, "This candy eating is no joke with me. I sometimes try to throw off the desire when it lays hold of me, but I find that I cannot work without candy, for my nerves become all unstrung, and nothing will satisfy me. Naturally, it seems foolish to most people, but with me it is a serious matter. I usually buy chocolate creams and carry a small bag of them around with me. I never eat more than 25 or 50 cents' worth a day. The minute the "spree" works itself out I lose my desire for candy and the sight of a chocolate cream will sometimes make me sick. I go along in this way until the next periodical arrives, and then it is the same story over again. I have tried to quit it, but have never been able to hold out more than one day."

Candy dealers who, perhaps, are better qualified to judge the consuming properties of each individual sweet tooth, assert that men buy fully as much candy as women, and not all of it is intended for future delivery, either. There is, however, a difference in the manner in which men and women make purchases. Men buy in five and ten cent lots, so they can carry the sweet stuff in their pockets and eat it while walking along the street. Women usually lean toward pretty pasteboard boxes and most of their candy eating is done either at home or in the theatre. But as to persons who suffer from the candy habit, well developed types are to be found among both men and women.

"Certainly there are candy fiends," said a Yonge street merchant, "and it would be hard to say whether men or women have the habit to a more pronounced degree. The candy habit is like every other habit that fastens itself upon humanity. A good many people eat sweet stuff because they like it, while others devour it simply to do something. They are the habitual candy eaters.

"I know several men who buy candy three and four times every day, and I suppose they could be called fiends. One man who comes in here never thinks of going back to his office after lunch, without taking five cents' worth of peppermint lozenges with him. Another buys peanut candy every morning on his way down to work. He is so regular with his calls that our clerks have quit asking him what he wants. When he enters the door they begin weighing out the candy. Oftentimes not a word is spoken."

One man, given somewhat to periodical encounters with liquids intemperate has found in chocolate creams a helpful remedy after a night with the boys. He keeps a box of creams in his room at all times. When he wakes up in the morning suffering the tortures of his inebrious jaunt he eats two or three of them.

"They are the best things I ever found to settle my stomach after it has been unduly upset," he says. "Sounds strange, I know, but I have tried them and know whereof I speak."

A Physician's Testimony for
Labatt's
(LONDON)
STOUT.
For Agency,
Address 127 Delorimier Ave.,—Montreal.

ALEXANDRIA, DEC., 20th, 1901.
Dear Sir:—
Speaking from personal experience I can state that your Stout is excellent in building up the system—I was very much run down and was advised to use Labatt's Porter—this I have done for some time and I largely attribute to its effects my steady improvement in strength and weight. I deem it but justice to you, and it certainly is a pleasure to me to add my testimony to its sterling qualities, and I glady recommend your Stout as an excellent tonic and food in cases where such is required.
Yours truly, G. S. TIFFANY, M.D.

EQUAL PARTNERS

By HOWARD FIELDING

Copyright, 1901, by Charles W. Hooke.

(Continued from last Saturday.)

Alden, as was to have been expected, had left his office long before Elmendorf returned to it. Robinson also had gone away, but might come back soon. By the exercise of a little tact the detective secured permission to wait in the private office, and while there he familiarized himself thoroughly with the contents of Robinson's desk, but it was not worth the trouble.

It was difficult to suppose that Robinson was still carrying that money in his pocket. He must have put it somewhere. And Elmendorf racked his brains, asking the conventional and generally useless question, "What would I have done in the same circumstances?" It came into his mind at last that Robinson had been present when Alden was arrested, and for this reason would not have expected to see him at the office again immediately. Thus reflecting, Elmendorf drew some keys of convenient design from his pocket and cautiously raised the lid of Alden's desk. It was fairly clear on its working surface and the pigeonholes did not look promising, so at random Elmendorf opened a little drawer in which, under some papers which seemed to have lain there a long time, he found an envelope addressed in typewritten characters to John Robinson.

The envelope looked fresh and the papers on top of it did not. The inference that the thing had been slid into a little used drawer and under those old documents for purposes of concealment was as easy as possible. Elmendorf closed the drawer and the lid of the desk and walked to the window with the envelope in his hand. It looked suspicious, and the detective gently murmured that he would "chance it."

With the thin blade of a penknife he very adroitly raised the gummed lappet without inflicting any injury which could not be repaired. The envelope contained five $100 bills wrapped in a blank sheet of the firm's paper.

Despite the coincidence of amounts, this was not necessarily the money mentioned in Alden's note to Elsie. If, for instance, Mr. Robinson should say that he had frugally laid by that sum, and had thought his employer's desk the safest place for it, the statement would be equally hard to believe or to disprove. For this reason Elmendorf scrutinized the bills with an eager eye, and when he found upon one of them a peculiar mark, as if a word of a strange language had been scrawled there, he was more than pleased. Raising the lower sash of the window, he made a mirror of the glass by holding the cuff of his black coat against it. Placing the bill before this mirror, he beheld the strange word reversed, and it became legible as "Clarence."

"The signature was blotted against the money," said he. "It couldn't be anything else. The bills were folded into the note while the signature was wet, and of course it printed itself on one of them."

If Robinson had entered the room at that moment, he would have been arrested for attempted murder, but he

He beheld the strange word reversed.

did not come in. Whether this was his luck or Elmendorf's may be hard to determine.

The detective sat down by Alden's desk, holding the money in his hand. His face wore a look of triumph, but it was not pleasant to see, for the resentment which this crime had inspired in him was burning in his heart. He was not the hunter who does a day's work in the woods and counts his gains with dull interest at night. He was the man who has caught the wolf that killed the pet lamb.

But there came a slow change upon him. His face was puckered around the eyes, and his lower lip got between his teeth. Presently with a hasty hand he scribbled upon a sheet of paper this sentence:

For further particulars inquire of William Elmendorf, New York detective bureau, 800 Mulberry street.

This message he inclosed instead of the money in the envelope, which he carefully resealed. He held it balanced upon two fingers for a moment, eying it critically. Then he replaced it in the drawer under the papers.

The knife with which he had opened the envelope was lying open upon the desk. He picked it up, pulled down the desk's lid and drew out one of the sliding leaves, upon which he beat out a gentle tune with the point of the knife blade. He had worn a little hole in the wood without being aware of it, when he heard Robinson's voice just outside the door.

Elmendorf suddenly gripped the knife hard and set the point upon the back of his left hand. Then with a bit of a laugh he shifted the knife to his left hand and slowly, steadily pressed the blade down upon the other. This Spartan act was accompanied by much wrinkling of the forehead and a few hard words softly uttered. When Robinson opened the door, the knife was lying on the floor and Elmendorf was striding toward a bowl in the corner.

"Dropped my knife on the back of my hand," he said. "Sharp blade, and it went in deep."

Robinson came forward hastily and viewed the injured member, from which a steady stream of blood was flowing.

"Bleeds like the deuce!" said he. "You must have cut an artery."

Elmendorf looked keenly at Robinson, holding his hand meanwhile in a stream of cold water.

"It will stop in half a minute," said the detective. "If you'll pull my handkerchief out of my pocket and tear off a couple of strips, we'll tie it up."

Robinson assisted in this operation, by request, but he was awkward and nervous and seemed not to relish the sight of blood. When it was done, Elmendorf thanked him cordially, asked a few trivial questions and departed. Half an hour later he delivered the five $100 bills to the chief of the detective bureau, with a full report upon the manner in which they had come into his possession and the method by which he had succeeded in identifying one of them.

CHAPTER XI.

ST. WINIFRED'S—MORNING.

WHEN the sun had been up three hours, it was able to look over a low portion of St. Winifred's building and see the window of the room where Elsie lay asleep. The sudden increase of light awoke her, and she found that Brenda was holding both her hands.

"I was afraid you would move too much and hurt yourself," said she. "I knew you must wake soon. How do you feel?"

Elsie winked her eyes and twisted the left corner of her mouth with the air of one who is testing a bruise to see how sore it is.

"There was a girl who felt better once a long time ago," she said, "but it doesn't matter. Haven't you been to bed all this night?"

"I have slept on the couch," replied Brenda. "My maid brought down this loose gown, and I've been very comfortable. I have had some things brought from your house too."

"Did you get my little silver mirror?" asked Elsie, with eagerness. "Oh, how good of you! Please let me have it."

Brenda gave her the mirror, and she gazed long and intently into it; then she sighed and laid down the glass.

"All gone," she said. "Well, that doesn't matter either. Nothing matters any more. But I used to think I would be pretty when I was dead."

"So you will, my dear," answered Brenda. "You'll have a sweeter, prettier face than you have now—the dearest old grandmother's face, with beautiful white curls all around—and the children who come to kiss you will cry, like a little shower on a May morning, but they will be better children afterward, for they will want to live the life that brings such happy sleep at the end of it."

"I wish I could say things like that," said Elsie. "Even if they aren't true they make people feel good. I—look—fierce! Don't I, honestly?"

"Fierce!" echoed Brenda. "Why, anything else in the world, I should say."

"That's slang," said Elsie. "It merely means terrible."

"Well, I'd hardly agree to that word either," said Brenda. "You don't inspire any terror in me. You're only a little bit pale, and perhaps you have cried too much."

"You must think I am a perfect baby. Really it isn't so. I have borne some things in this life fairly well. I would bear much more and be as happy as any girl if I only knew how." But there's no way. My life is in a tangle that cannot be unwound. I just simply *can't* go on, Brenda. That's what I felt when I opened my eyes in this room the first time and while I lay thinking before I would let Dr. Kendall know I was conscious. There is no way, absolutely no way"—

Her voice began to tremble, but she resolutely checked the tendency.

"How everything settles down on you in the morning!" she said. "You wake so happy. Perhaps you have dreamed of the pleasantest things. I almost always dream of people I like and of being with them in the fields or abroad somewhere in a strange city and all dressed up in the most wonderful clothes, and then the reality begins to come down, like—like a great ball of rags. I saw them loading a barge with rags once—she was alongside a steamer—and I always remembered how those dirty, heavy, stifling bales came down. They were like life."

"Your life hasn't been altogether a bale of rags, my young friend," said Brenda, "and unless I'm much mistaken it will be in the future quite like some of those dreams. There was a young man who made a promise or two about strange cities and beautiful clothes, you know," she added, reddening a little. "I saw Mr. Alden's note to you, and I was tricked into reading a part of it."

"I suppose it will be printed in the papers," said Elsie, "with your picture and mine and Mr. Alden's. Isn't this awful? It is so absolutely horrible that there's no use being polite about it. But really I never meant to do you any harm. I never encouraged Mr. Alden. I loved him from the beginning. The very first evening I saw him I went home and cried about him, but when he began to come to see me I made him think that I didn't care for him. I actually did make him think so."

"I know it," replied Brenda gently. "He told me so."

"It was only on that last evening that I let him guess the truth," said Elsie, "and how I did that, heaven may know. Suddenly he seemed to see it, and then, honestly, I had no opportunity to deny it. I didn't speak a word in two hours. Mr. Alden talked for both of us, making my arguments for me and then answering them without the faintest perception that they weren't really mine at all. In fact, he was like a big boy, so carried away with his own idea that all the world seemed to be rushing along in the way he wished. It was only when he talked about sending me a lot of money to buy wedding clothes that I managed to make myself heard, and even then he thought that my objection was altogether to the money and not to the wedding. Remember that I was not much calmer than he, and you will have some idea of the confusion. Oh, Brenda, how can I talk to you like this? And you don't seem to care in the least. Are we all crazy together?"

"Some of us have been so perhaps," said Brenda, "but this morning I think we are all particularly sane."

"It was wrong, of course, to let him come to see me," Elsie continued. "But it must end soon, and it was so little, and you would have so much. You know in those days I hated you, envied you, lay awake at night to think bitter thoughts about you, with your beauty and position and luxury! Oh, I saw you! I walked up and down in front of your house for an hour one day until you came out and got into your carriage. And I wished the horses would run away with you, and just as the thought flashed into my mind one of them began to prance, and I actually prayed out loud, because I was so afraid he really would run, after I had wished it."

The rhetorical value of this speech was somewhat marred by the circumstance that Elsie's face was being washed while it was delivered. Having rendered this service, Brenda began to arrange her patient's hair.

"I felt so small and shabby outside your house," said Elsie. "You can't have any idea of it. Fancy that mansion full of servants, all yours, and there was I who was in need of shoes. I don't mean to say they were full of holes or anything like that, but they didn't look very nice, and I couldn't afford to buy a new pair, for I was saving every penny. My mother and I have a little income, and I was down to that, for I hadn't had an engagement since February. I suppose you never wasted your time thinking about me—after you knew there was such a girl."

"I never knew there was such a girl," replied Brenda, "until I saw you in this room. The girl I thought about never existed. And now let me say this: There is no rivalry between us. There are matches so manifestly made in heaven that even a woman's jealousy must admit the divine sanction. So don't think of 'sparing my feelings,' as my New England aunt expresses it, or 'being polite,' to use your own phrase for the same idea. You and Mr. Alden were made for each other. If I had been writing a book or a play, I might have tried to create two people so perfectly reciprocal. The way is made smooth for me to be a friend to both of you."

Elsie turned her head suddenly and kissed Brenda's hand. Then she relapsed into thought which culminated in her saying:

"You couldn't have loved him. I ought not to say that, of course, but it's true. Divine sanction hasn't anything to do with jealousy. They don't come from the same locality. I have always been jealous whenever I have been in love."

She looked up out of the corner of her eye to catch the effect of the shock.

"Whenever you have been in love!" cried Brenda. "I hope it hasn't happened often."

"Well, not so very often," replied Elsie. "I remember being in love with an actor once for as much as two weeks. You spoke about putting Mr. Alden and me into a play. Well, this man resembled Mr. Alden, and we were in the same aggregation of genius. He was just as much like Mr. Alden as the man they get to play Napoleon in a third rate road company production of 'Sans Gene' is like the real Napoleon. They pick out a fellow with the right kind of nose. However, I loved him with a consuming ardor. I remember leaning out of a window of a fierce little hotel in a jay town in the west to watch him sitting on a fence in the moonlight, smoking a cigar after the show. I imagined that he might be thinking of me. By and by another fellow in the company came along and asked him [illegible] as entering the moon. And my idol said: 'To—somewhere—with the moon. I was waiting for you to buy me a drink.' It wasn't very bad, but it was coarse, and I didn't love him any more after that, and as he had never taken the slightest notice of me the romance was not serious except that I caught an awful cold leaning out of that window. Now, why did I tell you that story, Brenda?"

"Because it is amusing, I suppose," said Brenda, surprised by the question.

"Because at that time I was not quite 17 years old," said Elsie, "and I was traveling around the country alone. My mother was not strong enough to go with me, and we both needed money very badly."

While Brenda was striving to grasp the full meaning of this, being well assured that Elsie spoke with a definite purpose, there came a rap at the door, announcing the morning visit of Dr.

"I was so afraid."

Kendall. Brenda was sufficiently and very becomingly attired, and not so much as a single shining thread of her hair showed the smallest disarray, yet she could not help feeling a sense of disadvantage. Having leaned upon the conventionalities quite steadily all her life, she had come to need them, and Dr. Kendall was to her a young man whom she had met in society rather than a physician. She was surprised and a little ashamed to find that this was true.

As for Kendall, he was all doctor that morning. He had been detained from Elsie longer than he would have wished, and that strange thing which is a doctor's conscience was driving him hard. He wasted no time in words until he had satisfied himself about his patient. In the course of his investigation he discovered that Elsie still calmly believed that she would die of her wound, and this was the sole unfavorable symptom. It was the more remarkable because she had not at that time any sensations which a rational mind could attribute to the approach of dissolution. There was pain, of course, but it was not of the kind that depresses and frightens the sufferer.

The doctor spoke to her in the most encouraging words that he could command, but they seemed not to produce an adequate effect. Elsie said little upon the subject of death, but it was clear that her mind was fixed upon it.

"I must hurry away," said the doctor. "Mr. Alden is waiting in my room in a state of anxiety that I need not describe. I shall not only relieve that completely, but I shall tell him that he may see you this afternoon, five minutes precisely, and Miss Maclane will hold the watch."

"Tell him, please," said Elsie, "that I thank him very much for the violets; also that I received his message and that he must not think of it any more. You will remember? He must put it out of his mind."

Kendall glanced somewhat uneasily at Brenda as he repeated this singular message.

"I received from Mrs. Simmons," said he, "a telegram sent to her from your mother—that is, from one of the family. I haven't it here; must have left it in my room"—and he pretended to search his pockets. "It said that your mother was not quite well enough to start at once, and, in view of the encouraging telegrams sent last night, your relatives wouldn't let her come unless she was quite able to make the journey. Mrs. Simmons' message, sent immediately after you were hurt, was quite alarming, I'm afraid; but we have corrected all that."

"My mother is prostrated," said Elsie, her eyes filling with tears, "and I shall never see her again."

"I assure you that you will," replied Kendall earnestly, "and, by the way, here's a letter from her. It came this morning, I was told. There was no other mail for you."

"It's strange what has become of Mr. Alden's letter," said Elsie, "the one he mentioned in that note."

"Do you mean that you didn't receive it?" exclaimed Brenda.

Elsie shook her head.

"It didn't come," she said.

Kendall did not understand the significance of this, as he had no accurate knowledge of the contents of the note. He arose and moved toward the door, Brenda accompanying him.

"If you should chance to meet Mr. Elmendorf this morning," said she, "perhaps it would be better not to mention what you have just heard."

"About the letter?"

"Yes."

"I will not speak of it," said Kendall, "and as to the message which I shall take to Mr. Alden from Miss Miller, while of course I attach no sinister meaning to it, I shall take pains to forget it immediately."

"We cannot know what it is that she wishes him to put out of his mind," said Brenda. "Perhaps his love for her."

"We will take that view of it," replied Kendall.

(Continued next Saturday.)

SHERBROOKE DIRECTORY.

CHURCHES.

BAPTIST CHURCH.—Rev. Mr. Brown pastor. Service every Sunday at 11 a.m. and 7 p.m. Sunday School at 2.30 p.m. Prayer meeting every Wednesday at 8 p.m.

CHURCH OF ENGLAND.—Rev. C. W. Balfour, Curate in charge. St. Peter's (parish church). Services: Daily 9 a.m. and 5.30 p.m. Wednesday additional service at 8 p.m. Sundays, 8 and 11 a.m., 2.30 and 7 p.m. Besides at 8 a.m. each Sunday H. C. at 11 th first Sunday in each month.

CHURCH OF THE ADVENT.—Sundays: 11 a.m., 2.30 and 7 p.m. H. C and 8 a.m. the second Sunday and at 8 and 11 a.m. the last Sunday in each month. Thursdays, 8 p.m.

Knights of Columbus. Secretary, M. Hawkins.

Canadian Order of Chosen Friends. Meets at call of President in Sun Life Building. Secretary, Alfred Tester.

Ancient Order United Workmen. Secretary, G. Donnelly.

CITY COUNCIL COMMITTEES, 1902.

Mayor, Dr. J. O. Camirand.

Finance—Coun. Cate, chairman, with Couns. McManamy, Jenckes and Olivier.

Road—Coun. McManamy, chairman, with Couns. Lanctot, Royer and Jenckes

Water—Coun. Jenckes, chairman, with Couns. McManamy, Cate and Codere.

Fire—Coun. Fuller, chairman, with Couns. Royer, Caron and Wilson.

Police—Coun. Olivier, chairman, with Couns. Wilson, Codere and Thompson.

Sanitary — Coun. Wilson, chairman, with Couns. Fuller, Royer and Lanctot.

Light—Coun. Caron, chairman, with couns. Fuller, Codere and Wilson.

Real Estate and Park—Coun. Codere, chairman, with Couns. Cate, Olivier and Thompson.

Market—Coun. Thompson, chairman, with Couns. Caron, Fuller and Lanctot.

City Hall—Coun. Lanctot, chairman, with Couns. Olivier, Jenckes and Thompson.

Poor—The Mayor and the Police Committee.

Strathcona Square Building — Coun. Thompson, chairman, with Couns. McManamy, Olivier, Cate and [illegible]

PRIZE LIST.

(Continued from page 2.)

CEREAL PRODUCE.

Agricultural Products and Garden Vegetables.

GRAINS, ETC.

Spring wheat, white, 2 bushels and sheaf—1 J. Edwards, Cookshire.

Spring wheat, red, 2 bushels and sheaf—1 J. Edwards, Cookshire.

Spring wheat, ladoga, 2 bushels and sheaf—1 J Edwards, Cookshire.

Barley, 2 rowed, 2 bushels and sheaf—1 J Edwards, 2 W Edwards, Cookshire.

Barley, 6 rowed, 2 bushels and sheaf—1 J Edwards.

Rye, 2 bushels and sheaf—1 J Edwards.

Oats, white, 2 bushels and sheaf—1 J Edwards, 2 W Edwards, 3 A W Bradley, Lennoxville.

Field peas, 2 bushels and sheaf—1 J Edwards.

Buckwheat, 2 bushels and sheaf—1 W Edwards, 2 J Edwards.

SMALL FIELD SEEDS, FLAX HEMP, HOPS, MALT, ETC.

Clover seed, half bushel—1 W Edwards.

ROOT AND OTHER FIELD CROPS.

Potatoes, white, half bushel—1 J Kirby, Birchton, 2 J H and P P Fowler, Dalling, 3 A C Page, Sherbrooke.

Potatoes, red, half bushel—1 A W Bradley, 2 J Kirby, 3 J H and P P Fowler.

Potatoes, best collection, 10 varieties, named 5 each—1 J H and P P Fowler, 2 J Kirby, 3 W L Rowell, Ayer's Flat, 4 A C Page, 5 G Woolley, Cookshire.

Swede turnips, 6 largest, named—1 J Edward, 2 J Wilson, Lennoxville.

White globe turnips, 6 largest, named—1 J Woolley, 2 J Kirby 3 J Edwards.

Aberdeen yellow turnips, 6 largest, named 1 Mrs W G Johnston, Compton, 2 J Kirby, 3 J Edwards.

Red carrots, 12 largest, named—1 J Marand, 2 J Kirby, 3 J Edwards.

White carrots, 12 largest, named—J Marand, 2 J Wilson, 3 J Kirby.

Mangel Wurtzels, long red, best 6—1 J Marand, 2 J H and P P Fowler, 3 Mrs. W J Johnston.

Mangel Wurtzels, red globe, best 6—1 J Marand, 2 J H and P P Fowler.

Mangel Wurtzels, yellow globe, best, 6—1 J Marand, 2 Mrs W G Johnston, 3 J H and P P Fowler.

Mangel Wurtzels, long yellow, best 6—1 J Marand, 2 J H and P P Fowler, 3 J Kirby.

Kohl rabi, wurtzels, half bushels—1 J Marand, 2 J H and P P Fowler.

Sugar beet, half bushel—1 J Marand, 2 J Kirby, 3 J H and P P Fowler.

Parsnips, half bushel—1 J Marand.

Large pumpkins, for cattle, 2—1 J Marand.

Large squash, 2—1 J Marand.

Best collection, most creditable exhibit in this class—1 J Kirby, 2 J Marand, 3 J H and P P Fowler.

GARDEN VEGETABLES.

Beans, 1 plate—1 J Edwards, 2 W Edwards, 3 J Kirkby.

Beets, 5 specimens—1 G Woolley, 2 W Edwards. 3 J Kirkby.

Cabbage, 2 heads, any variety, not elsewhere specified—1 J Marand, 2 J Baxter, Sherbrooke, 3 J H and P P Fowler.

Cabbage, 2 heads, Winningstadt—1 J Baxter, J H and P P Fowler, 3 J Marand.

Cabbage 2 heads, St Denis—1 J Baxter, 2 J Marand.

Cabbage, 2 heads, Drumhead—1 J Marand, 2 J Baxter.

Cabbage 3 var. Winter, named—1 J Baxter, 2 Marand.

Cabbage 2 heads pickling—1 J Marand, 2 J Baxter.

Cauliflower, 2 heads—1 J Wilson, Lennoxville, 2 J Baxter, 3 J Marand.

Capsicum, best plate—1 J Marand, 2 J Baxter.

Cucumbers 2 specimens, white spine—1 J Baxter, 2 J Logan, Sherbrooke.

Cucumbers 2 specimens, long green—1 J Baxter.

Gerkins, best plate—1 J Baxter, 2 J Marand.

Carrots, best bunch of 6—1 J Kirkby, 2 J Marand, 3 J Wilson.

Celery, 6 heads, white—1 J H and P P Fowler, 2 J Baxter, 3 J Marand.

Celery, 6 heads, red—1 J Baxter, 2 J Marand.

Celery, 6 yellow—1 J Marand, 2 J H and P P Fowler, 3 J Baxter.

Corn, sweet, 6 ears fit for table—1 J Baxter.

Egg plants, best 2, purple—1 J Marand.

Leeks, bunch of 6—1 J Marand, 2 J Baxter.

Onions, 3 var. 5 specimens of each—1 S T Westlake, Lennoxville, 2 J Marand, 3 J H and P P Fowler.

Parsnips, table, best bunch of 6—1 J Marand, 2 J Baxter, 3 J H and P P Fowler.

Salsify, 12 roots—1 J Marand.

Squash, table, 3 var. 2 each—1 J Marand, 2 J Baxter.

Tomatoes, 3 var. 5 each—1 J Baxter.

Vegetable marrow, 2 specimens—1 J Marand, 2 J H and P P Fowler, 3 J Wilson.

Pot herbs, best coll., named—1 J Marand, 2 J Kirkby.

Potatoes, best 5 var., for table, 5 each—1 J H and P P Fowler, 2 J Kirkby, 3 G Woolley.

Best coll. garden vegetables—1 J Baxter.

HORTICULTURAL DEPARTMENT.

FRUITS.

Apples, 16 varieties, correctly named, exhibited by grower, 5 of each—1 Mrs W Johnston, 3 A J Standish, Rougement, 3 J Coupland, Shefford.

Apples, 12 varieties, 3 Summer, 3 Fall, 3 early Winter, 3 late Winter, exhibited by grower, correctly named, 5 each—1 Mrs W Johnston, Cowansville, 2 J Coupland, 3 G Carr, Compton.

Apples, 4 varieties, dessert, correctly named, 5 of each—1 A J Standish, 2 Mrs. W Johnston, 3 J Logan, Waterville.

Apples, 4 varieties, cooking, correctly named, 5 of each—1 J Kirkby, 2 Mrs. W Johnston, 3 J Coupland.

Apples, 8 varieties, best for commercial purposes, 5 each, correctly named—1 J Coupland, 2 A J Standish, 3 Mrs W Johnston.

Apples, Duchess of Oldenburg, 1 plate, 5 specimens—1 J H Warrington, 2 J Coupland, 3 A J Standish.

Apples, St. Lawrence, Fall, 1 plate, 5 specimens—1 J H Warrington, 2 A J Standish, 3 Mrs W Johnston.

Apples, Alexander, 1 plate, 5 specimens—1 Mrs W J Johnston, 2 G Carr, 3 F Viland, Sherbrooke.

Apples, Canada Baldwin, 1 plate, 5 specimens—1 J H Warrington, 2 A J Standish, 3 Mrs W Johnston.

Apples, McIntosh Red, 1 plate, 5 specimens—1 J H Warrington, 2 Mrs. W. Johnston, 3 J Coupland.

Apples, Fameuse, 1 plate 5 specimens—1 J H Warrington, 2 Mrs W Johnston, 3 J L Riche, Sherbrooke.

Apples, Red Astrachan, 1 plate, 5 varieties—1 J H Warrington, 2 J Coupland, 3 A J Standish.

Apples, Wealthy, 1 plate, 5 specimens—1 Mrs W Johnston, 2 A J Standish, 3 J Coupland.

Apples, Golden Russet, 1 plate, 5 specimens—1 Mrs W Johnston, 2 J Coupland, 3 A J Standish.

Apples, Peach, 1 plate, 5 specimens—1 A J Standish, 2 Mrs W Johnston. 3 J L Riche.

Apples, Winter, St Lawrence, 1 plate, 5 specimens—1 Mrs W Johnston, 2 A J Standish, 3 J Coupland.

Apples, Yellow Transparent, 1 plate, 5 specimens—1 Mrs W Johnston, 2 J Coupland, 3 J Kirkby.

Apples, McMahon's White, 1 plate, 5 specimens—1 Mrs W Johnston.

Apples, Tetofsky, 1 plate, 5 specimens—1 J H Warrington, 2 J Kirkby, 3 A J Standish.

Apples, Pewankee, 1 plate, 5 specimens—1 J H Warrington, 2 J Coupland, 3 Mrs W Johnston.

Apples, Russian, 5 varieties, 5 each, must not include any variety already named on this list—1 J Coupland, 2 G Carr, 3 Mrs W Johnston.

Plums, 2 distinct varieties, named, 10 specimens—1 Mrs. W Johnston, 2 F Plant, Sherbrooke.

Pears, 1 variety, best plate, 5 specimens—1 Mrs. W Johnston, 2 J Coupland.

Melons, best Musk, 1 specimen—1 J Marand.

Melons, best Water, 1 specimen—1 J Baxter, 2 J Marand.

PLANTS.

For the best stand of plants occupying a space 25 square feet—1 J Baxter, 2 Mrs E Johnston, Lennoxville, 3 Mrs C Price, Sherbrooke, Mrs J D Bush, do, Mrs R Curtis, Sherbrooke.

Plants, 3 distinct varieties, in bloom—1 J Baxter, 2 Mrs R Curtis, 3 Mrs E Johnston.

Plants, 2 distinct varieties in bloom—1 J Baxter, 2 Mrs C Pearce, 3 Mrs R Curtis.

Plants, 1 distinct variety, in bloom—1 J Baxter, 2 Mrs R Curtis, 3 S T Lake Lennoxville.

Plants, 3 distinct varieties, in foliage—1 J Baxter, 2 Mrs E Johnston, 3 Mrs C Pearce.

Plants, 2 distinct varieties, in foliage—1 J Baxter, 2 Mrs C Pearce, 3 Mrs E Johnston.

Plants, 1 distinct variety, in foliage—1 J Baxter, 2 S T Westlake, 3 Mrs E Johnston.

Plants, 3 distinct Begonias Rex—1 J Baxter, 2 Mrs C Pearce, 3 Mrs E Johnston.

Plants, 2 distinct Begonias Rex—1 J Baxter, 2 Mrs C Pearce, 3 Mrs J D Bush.

Plants, 1 distinct Begonia Rex—1 J Baxter, 2 Mrs C Pearce, 3 Mrs J D Bush.

Plants, 3 distinct Begonias Rex in foliage, Rex excluded—1 J Baxter.

Plants, 2 distinct Begonias in foliage, Rex exc'd—1 Mrs C Pearce, 2 Mrs E Johnston, 3 J Baxter.

Plants, 1 distinct Begonia in foliage, Rex exc'd—1 Mrs C Pearce, 2 Mrs E Johnston, 3 J Baxter.

Plants, 3 distinct Begonias in bloom—1 J Baxter, 2 Mrs E Johnston, 3 Mrs R Curtis.

Plants, 2 distinct Begonias in bloom—1 J Baxter, Mrs E Johnston, 3 Mrs C Pearce.

Plants, 1 distinct Begonia in bloom—1 Mrs E Johnston, 2 Mrs J D Bush, 3 J Baxter.

Plants, 6 distinct varieties Tuberous Begonias in bloom—1 J Baxter, 2 Mrs C Pearce, 3 S T Westlake.

Plants, 3 distinct varieties Tuberous Begonias in bloom—1 Mrs C Pearce, 2 S T Westlake, 3 Mrs J D Bush.

Plants, 1 distinct variety Tuberous Begonia in bloom—1 Mrs C Pearce, 2 S T Westlake, 3 Mrs W H Lovell, Sherbrooke.

Plants, 3 distinct table decorations, 3 varieties—1 Mrs E Johnston, 2 Mrs J. D Bush, 3 Mrs C Pearce.

Plants, 2 distinct Fuchias in bloom—1 Mrs E Johnston, 2 Mrs C Pearce, 3 Mrs J D Bush.

Plants 1 distinct Fuchia in bloom—1 Mrs J D Bush, 2 Mrs E Johnston, 3 Mrs C Pearce.

Plants, 4 distinct Geraniums in bloom, single—1 Mrs J D Bush, 2 Mrs C Pearce, 3 Mrs E Johnston.

Plants, 2 distinct Geraniums in bloom, single—1 Mrs J D Bush, 2 Mrs C Pearce, 3 Mrs R Curtis.

Plants, 4 distinct Geraniums in bloom, double—1 Mrs J D Bush 3, Mrs E Johnston.

Plants, 2 distinct Geraniums in bloom, double—1 Mrs C Pearce, 2 Mrs E Johnston, 3 Mrs J D Bush.

Plants, 3 distinct Geraniums in foliage—1 Mrs W H Lovell, 2 Mrs E Johnston, 3 Mrs J D Bush.

Plants, 2 distinct Geraniums in foliage—1 Mrs W H Lovell, 2 Mrs E Johnston, 3 Mrs J D Bush.

Plants, 1 distinct Geranium in foliage—1 Mrs W H Lovell, 2 Mrs E Johnston. 3 Mrs C Pearce.

Coleus, distinct varieties—1 Mrs C Pearce, 2 Mrs J D Bush, 3 J Baxter.

Coleus, 1 distinct variety—1 Mrs C Pearce, 2 Mrs E Johnston, Mrs J D Bush.

Plants, 3 distinct Gloxinias in bloom—1 S T Westlake.

Plants, 2 distinct Gloxinias in bloom—1 S T Westlake.

Plants, 1 distinct Gloxinias in bloom—1 S T Westlake.

Plants 2 distinct Heliotrope in bloom—1 Mrs E Johnston.

Plants, 1 distinct Heliotrope in bloom—1 Mrs R Curtis, 2 Mrs C Pearce, 3 Mrs J D Bush.

Plants, 1 distinct Ficus—1 J Baxter, 2 Mrs E Johnston, 3 Mrs C Pearce.

Plants, 3 distinct Foreign Ferns—1 J Baxter, 2 Mrs C Pearce, 3 Mrs E Johnston.

Plants, 2 distinct Foreign Ferns—1 S T Westlake, 2 Mrs E Johnston, 3 Mrs C Pearce.

Vase of Plants—Mrs E Johnston, 2 C Pearce.

Hanging basket not over 14 in. diameter—Mrs C Pearce, 2 J Baxter, 3 Mrs E Johnston.

CUT BLOOM, &c.

Annuals collection not exceeding 15 varieties—1 Rev G H G Murray, 2 R Gunning, Sherbrooke.

Asters, 6 varieties, 3 blooms each—1 G W Ayer, S Wilmington, Mass., 2 J Tilling, Sherbrooke, 3 Mrs E Johnston.

Asters, 12 blooms, dissimilar in color—1 Rev Mr Murray, 2 R Gunning.

Bouquet, table—1 Mrs E Johnston, 2 Miss B Short, Sherbrooke, 3 J Baxter.

Bouquet, hand—1 Mrs C Pearce, 2 Mrs E Johnston, 3 J Baxter.

Basket cut flowers, basket not exceeding 12 inches—1 Miss B Short, 2 Rev G H H Murray, 3 Miss Lincoln, Boynton.

Collection Cut Bloom, 4 feet square—1 J Baxter, 2 Mrs E Johnston, 3 Mrs C Pearce.

Collection Dianthus, 12 distinct blooms—1 Rev Mr Murray, 2 R Gunning.

Petunia, single, 12 varieties—1 E Johnston, 2 R Gunning, 3 Mrs C Pearce.

Petunia, double, 6 varieties—Miss Lincoln.

Dahlias, double, 6 blooms—1 Rev Mr Murray, 2 Miss Lincoln, 3 S T Westlake.

Dahlias, single, 6 blooms—1 Mrs E Johnston, 2 Miss Lincoln, 3 Rev Mr Murray,

Dahlias, Pompon, 6 blooms—1 Miss Lincoln, 2 Mrs E Johnston, 3 Rev Mr Murray.

Gladiolus, 6 spikes dissimular—1 Miss Lincoln, 2 J Baxter, 3 Mrs J D Bush.

Phlox Drummondi, 12 var., 3 spikes each—1 Mrs E Johnston, 2 R Gunning, 3 Rev Mr Murray.

Phlox Drummondi, 6 var., 3 spikes each—1 Mrs Johnston, 2 Rev Mr Murray, 3 Miss B Short.

Phlox Perrenials, 3 var., 1 spike each—1 Miss Lincoln, 2 R Gunning.

Pansies, 18 blooms with foliage—1 J Tilling, 2 Mrs C Pearce, 3 W L Ball, Richmond.

Pansies, 12 blooms, with foliage—1 J Tilling, 2 Mrs C Pearce 3 R Gunning.

Pansies, 6 blooms, with foliage—1 W L Ball, 2 R Gunning, 3 Miss B Short.

Sweet Peas, 3 spikes each not ex. 50 var—1 Mrs Johnston, 2 J Baxter, 3 J Tilling.

Verbenas, 6 varieties, 2 blooms each—1 R Gunning, 2 Mrs Johnston, 3 Mrs C Pearce.

Zinnias, 6 varieties, 1 bloom each—1 R Gunning, 2 Rev Mr Murray.

Carnations Marguerite, not more than 12 varieties coll—1 Miss Lincoln.

Roses, out-doors, best collection—1 J Tilling, 2 Mrs C Pearce.

Nasturtiums, coll. 3 blooms each—1 Miss B Short, 2 Mrs E Johnston, 3 Rev Mr Murray.

Design for table—1 J Baxter, 2 Mrs E Johnston, 3 Miss Lincoln, 4 Mrs C Pearce.

Design for funeral—1 Mrs C Pearce, 2 Mrs E Johnston, 3 Miss Lincoln, 4 Rev Mr Murray.

HONEY AND APIARY DEPARTMENT.

SUGAR, HONEY, BACON, &c.

Maple Sugar, not less than 50 lbs., in tub as made in sugar place—1 Small Bros, Dunham, 2 F Goddard, S Stukely.

Maple Sugar, in cakes, not less than 30 lbs—1 Small Bros, 2 F Goddard.

Maple Syrup, 9O2, three gallons, to be shown in clear jars—1 F Goddard, 2 Small Bros.

Honey in comb, not less than 10 lbs—G Hall Sherbrooke, 2 E P H Lemay, E Sherbrooke, 3 F L Brown, Ways Mills.

Honey extracted, 1 gal. in clear jars—1 E P H Lemay, 2 N W Smiley, Richmond, 3 O M Gaudette, S Simon.

Sugar Evaporator, arches and other sugar utensils.

MAINTAIN SOIL FERTILITY.

The Dominion Live Stock Commissioner Gives Some Pointers as to How This May Be Done.

"We all know it is very desirable to have a fertile soil in which to grow crops," says F. P. Peck of Michigan. "For success in farming depends largely on the fertility of the land. Every one knows of many once fertile farms which are not now producing half what they should—scarcely enough to pay for the labor necessary to produce a crop. It is more profitable to farm so as to maintain or improve the soil than it is to rob the soil of its fertility, and in the end bring ruin to the owner of the farm."

How is this to be done? I believe our greatest loss of fertility is the loss of humus. A soil without humus will not carry a crop successfully through a drouth. A clay soil devoid of humus will be lumpy and hard, and will not retain moisture for very long. We all know the effect on the crop, and the great amount of labor required to prepare such a piece of ground for a crop. To me our aim should be to farm so as to produce and leave as much humus in the ground as possible. This is best accomplished by a rotation of crops, and one crop in the rotation should be clover, which is our greatest soil renovator. We should aim to feed everything, or nearly everything produced on the farm, and if we add a little bran or concentrated feed to the ration of each animal, and carefully save and apply all the manure, it is easy to see that we shall maintain and probably add to the fertility of the soil.

I may advocate the plowing under of green crops, but unless a farm is very much run down, I would not practice this, unless it be to bury a second crop of clover, or a clover crop sowed to protect the ground during the winter. A clover crop should always be sowed whenever a piece of ground remains idle during the fall and winter. Many times we have a piece of stubble which we intend to plant to corn or potatoes. On this we can grow a crop of rye or peas and barley, either of which will make a large growth and can be plowed under in time to plant corn. This adds largely to the humus of the soil, and will tend to carry the crop through a drouth without injury.

As I said, it should be our aim to feed all, or nearly all, we raise on our farms for the purpose of keeping up the fertility of the farm, and I believe it to be more profitable to sell our produce in the form of butter, beef, pork, etc., than to sell it in the rough. I believe our produce fed to good stock will bring us more than twice what it will sell for on the market. For example, I can feed a cow for 12½c. per day, and have her bring in 25c. per day or more for butter alone, and I believe the same to be true with all other kinds of stock.

Many advocate the use of commercial fertilizer. Of course the basis of all our fertility is the amount of nitrogen, potash and phosphoric acid a soil contains. When we consider that an ordinary crop of wheat of 25 bushels per acre removed about $8.75 worth of these elements from the soil, and a crop of corn nearly as much, we can readily see that when a soil is exhausted of these elements it is quite expensive to replace them by using commercial fertilizers. Now, if we feed our crops on the farm we can return about 80 per cent. of these elements to the soil in the manure, and at the same time get twice the market value of our produce. We can readily see that it is more profitable to farm so as to improve our soil, than to sell our crops on the market and at the same time be losing heavily in the fertility of the soil.

I would not advocate the feeding of wheat, but would sell it and purchase bran or cottonseed meal, which is worth more for feed than wheat, and has about double the manurial value. If I sold much wheat I would use commercial fertilizers freely for it is impossible to keep up the farm and sell grain without their use. If we grow all the forage crops we can and feed them on the farm, carefully save and return the manure, we need have but little fear about the fertility of the land.—F. W. Hodson, Live Stock Commissioner.

The Buying Public Now a Discriminating Public.

Merit and Excellence Always Win

MALT BREAKFAST FOOD

AFTER TESTS AND TRIALS IS PRONOUNCED TO BE THE MOST HEALTHFUL AND BEST OF ALL BREAKFAST FOODS.

Before the advent of Malt Breakfast Food, a vast number of breakfast cereals (called health foods) were put on the market. To-day many of these are only known to the memory of the grocer; others are making a hard struggle for existence. When Malt Breakfast Food appeared, its many excellent qualities were sufficient to make it an immediate home necessity. Tests and experiments proved it to be the most healthful of all breakfast grain foods. It possesses merit and excellence; it became the favorite in thousands of homes, and will ever hold its place. Your Grocer sells it.

Battles House, Magog. J. E. Taylor, proprietor. First-class in every respect.

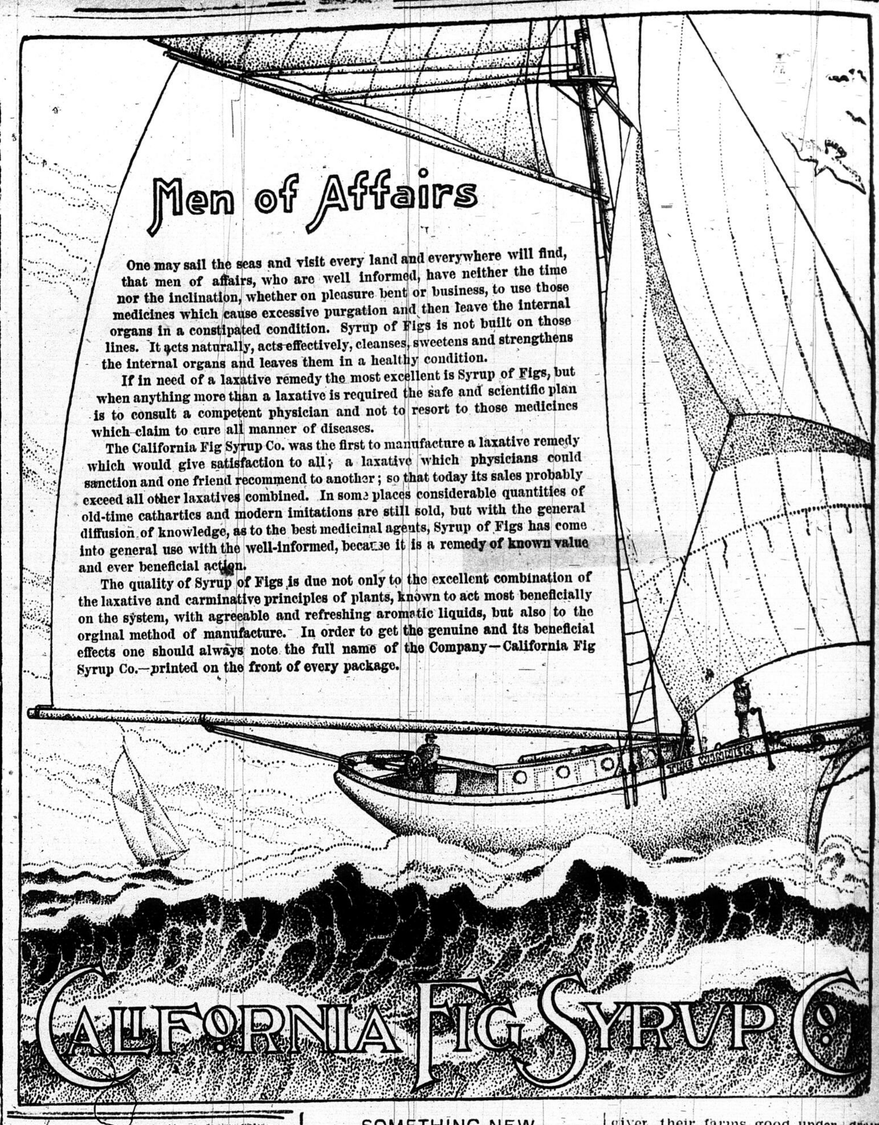

Men of Affairs

One may sail the seas and visit every land and everywhere will find, that men of affairs, who are well informed, have neither the time nor the inclination, whether on pleasure bent or business, to use those medicines which cause excessive purgation and then leave the internal organs in a constipated condition. Syrup of Figs is not built on those lines. It acts naturally, acts effectively, cleanses, sweetens and strengthens the internal organs and leaves them in a healthy condition.

If in need of a laxative remedy the most excellent is Syrup of Figs, but when anything more than a laxative is required the safe and scientific plan is to consult a competent physician and not to resort to those medicines which claim to cure all manner of diseases.

The California Fig Syrup Co. was the first to manufacture a laxative remedy which would give satisfaction to all; a laxative which physicians could sanction and one friend recommend to another; so that today its sales probably exceed all other laxatives combined. In some places considerable quantities of old-time cathartics and modern imitations are still sold, but with the general diffusion of knowledge, as to the best medicinal agents, Syrup of Figs has come into general use with the well-informed, because it is a remedy of known value and ever beneficial action.

The quality of Syrup of Figs is due not only to the excellent combination of the laxative and carminative principles of plants, known to act most beneficially on the system, with agreeable and refreshing aromatic liquids, but also to the orginal method of manufacture. In order to get the genuine and its beneficial effects one should always note the full name of the Company—California Fig Syrup Co.—printed on the front of every package.

Danger in Carrying Firearms.

Kingston's awful tragedy in which a bit of a schoolboy of fifteen shot and killed a girl aged fourteen draws attention once more to the danger there is in carrying firearms with the most innocent intent. Why should any boy of fifteen go around with a gun in his hip-pocket? In this country there is no need for people to go armed. The jury found that in this case there was no intent to kill or wound, but that the discharge of the weapon was accidental. The finding does not lessen the force of the statement that the carrying of concealed weapons, more particularly revolvers, is always a source of danger to the carrier or to some other person. According to the story as told in the press despatches, the boy and the girl were good friends. He was rattled for the moment by her tripping his hat in play. He had no intention of shooting her when he drew the revolver, which went off before he knew. Yet he threatened to shoot, and he will now carry to his dying day a regret that the means were in his possession which made it possible for any such threat to be uttered or for an accident to happen which made the threat good. The boy was a reader of dime novels of the Jesse James type, and, according to his companions, had been carrying a gun for some time. The carrying of the gun may have been a result of the dime novel habit, but both may be symptoms of something deeper. Boys who read trashy and silly paper story-books may do so because they are ignorant of the existence of more elevating literature that is equally entertaining. The reading habits of a great many boys and girls are unfortunately wholly unformed and unguided by their parents. Parents who are in the dark as to what their boys and girls are reading are pretty certain to be ignorant of other important points in connection with the habits they are forming. There are boys who could not carry a revolver for twenty-four hours without the fact becoming known to those at home. There are other boys of whose outgoings and incomings their parents are blissfully ignorant until something happens that shocks the community and makes a stain on the family escutcheon.—Don, in Saturday Night.

Dry Application of Poisons.

If small garden patches are dusted with poison from bags or with hand bellows for the destruction of insects, it is advisable always to dilute the paris green with ten parts of flour or, preferably, lime, and for application to vegetables which will ultimately be used for food one ounce of the poison should be mixed with six pounds of flour or ten of lime and dusted merely enough to show evenly over the surface. Arsenicals should not be applied to lettuce or other vegetables the free leafage of which is eaten.

SOMETHING NEW.

Description of the New Wooden Hoop Unshrinkable Silo and How They Are Constructed.

Much has been written in regard to silos and silo building, and numerous plans have been published, but in actual experience none of them has proved entirely satisfactory. Some are too expensive for ordinary farmers, others are cheap, but last only a few years. The round stave silo is one of the cheapest sorts, and if it were not liable to collapse on account of shrinkage of the staves, and the expansion of the iron hoops, it would be very satisfactory.

There is now a prospect of these disadvantages being overcome. A number of farmers in the United States have adopted the plan of using wooden hoops, which cannot shrink or lengthen endwise. The inside sheeting is of one-inch Georgia pine, which seems to be the best kind of lumber for silos, on account of its non-shrinkable character. It is so full of pitch that moisture has practically no effect upon it. This lumber has been recently laid down at Ottawa for $27 per thousand, and at that price should be one of the most economical our farmers could use.

The foundation of this new sort of silo is in its wooden hoops, six inches wide, and made of half-inch elm lumber, sprung around a form, and built up with well lapped joints, using a trifle longer nail each time, until the hoop has a thickness for the three bottom hoops of five layers. The remaining five top hoops require only four layers each. The average silo will not require more than 500 feet of lumber, and 20 pounds of nails, for the hoops which are easily and quickly made and should not cost more than $1.25 each, or $10 for the lot. This is a good deal less than the cost of the usual iron hoops and lugs. A three-cornered frame is erected at the exact outside circumference of the silo, and the hoops placed in position and fastened.

The lining of the silo is then put on, and should be of inch Georgia pine lumber three inches wide, matched and nailed to the hoops the same as the flooring. When the lining is on within twenty inches of the starting place, stop, and put in 2x4 studding, up and down between the hoops on each side of the door for door stays and jambs. Make the doors of the same lumber as the walls, cutting them into "joints" on the inside of the hoops.

If the silo is outside the barn, it can be covered with tarred paper, and cheap siding, run both up and down as a protection against frost. The roof and foundation is the same as for any silo, and the outside covering could be of any sort the owner wished, or it might go without siding, the same as any other tub silo. If protected from the weather the wooden hoops should last for years, and if at any time the inside lining became "dozy" it might be lined with tarred paper, and then sheeting, thereby making it serviceable again for a number of years at small cost.

John Gould, the well known Ohio dairyman and Farmer's Institute lecturer, who has seen a number of these silos in operation, thinks highly of them.—F. W. Hodson, Live Stock Commissioner.

Tile Drainage Important.

Tile drainage is more important than most people believe and should be encouraged by farm journals. Most of the up-to-date farmers have given their farms good under drainage. By tiling, a poor field is readily changed into a fertile one. A wheat field, for instance, where water stands for a short time, cannot be very productive, as no plant can do well with its roots under water. A wet place in the fields is not only a distinct loss but is a great annoyance as well. Such a spot is difficult to plow, and a binder will not run over it during a wet harvest.

It has been noticed that a great deal of tile is being put in this spring by farmers that have previously done no work of this kind. A farmer who continues to raise crops without good drainage is sure to be unsuccessful. He must be either shiftless or lazy. The cost is not beyond the means of most farmers and the tile can easily be secured from a factory in the neighborhood within hauling distance.

Unreasonable Man.

"Why do you and George quarrel so much?" asked the mother.

"He is so unreasonable," answered the fiancee. "I make it a point to let him have his own way once in ten times, and still he is not satisfied."
