PRICE ONE CENT

FATAL RAILWAY ACCIDENT AT PRESCOTT.

The Engineer Instantly Killed and Two Express Messengers Badly Hurt—Marvellous Escape of the Passengers.

Prescott, Ont., Aug. 13.

The No. 1 Grand Trunk express from Montreal to Toronto passed here at her usual time, 2 20 a.m., having in the large train, twenty five coaches, well filled. After leaving this station, and when passing the semaphore west of the station, the cow catcher caught a cow, which was one of three or four on the track, and carried her along the track, about three hundred feet, to the first crossing west of the town. The cow was carried over the cattle guard on the east side of the public road, but fell partially into that on the west of the road, lifting the engine off the track and throwing it over the slight embankment to the south side of the railway. The engine lies a perfect wreck, with its smoke stack and all its upper furnishings twisted off. The engineer, named Howarth, held heroically to his place and was found a mangled corpse partly under the engine with one arm around the whistle and the escaping steam pouring forth on his side. The ground where he lay is saturated with blood. His body now lies in the baggage room of the station awaiting the inquest. The express messengers, King and Mackenzie, were also among the injured, but were able to be sent to their friends. Report says six messengers were wounded, but as they were transhipped to another train and sent westward this cannot be positively ascertained. The tremendous force of the concussion can be partly understood by one standing at the scene and seeing the total wreck of cars and engine. The engine fell on the south side of the track where it remains, but the tender passed about 20 ft farther, and with its truck lies a shapeless mass. On the north side close by the tender, but further into the field, lies the express car, also a total wreck. The agent of the Company at this place promptly placed a man to guard the goods which were scattered by the collision. A second class car is piled on the tender, while its rear end is buried in the ground to a considerable depth. The windows of this car are broken, probably by the affrighted passengers, who made their escape through them. Some of the seats and windows are covered with the blood of the wounded. From the point where the engine caught the cow to where it jumped the track and now lies imbedded in the soil is about 300 feet. The track was torn up for sixty or seventy feet, which is being promptly repaired and will be ready for the westward express at 1.45 p.m. to day. The property damaged is the engine and tender, the mail and baggage and the express cars, one second class and three first class cars. The loss of life is small when it is remembered that a heavy train on a down grade was suddenly stopped, and its living freight piled indiscriminately among wrecked cars.

There was a large number of Montrealers on the train, including the members of the Junior Shamrock Lacrosse Club, going to Toronto to play. The fireman, Taylor, was brought to the city badly injured. He says he was thrown from the engine right over the tender and was caught on something and dragged along for some distance until he became unconscious. The accident he and others attribute to the slowness of the train on the down grade; had the speed been 20 miles an hour, the cow would have been pitched off and no injury done. Howarth, the dead engineer, leaves a wife and child, who reside near Montreal; he was 18 years in the company's service, and was considered one of the safest and best in its employ. Howarth was the man who was in charge of the celebrated lightning express engaged by J. Gordon Bennett to convey himself and party from Montreal to Ottawa to attend the ball given there in 1877 by the then Governor-General, Lord Dufferin. The fireman was seriously scalded, but saved himself from receiving any bruises by jumping from the engine. The baggage man, Robt. Scarlet, was found under a pile of luggage, and was seriously

bruised, his injuries are said to be internal. The expressman, Mackenzie, was so seriously injured, that, although he undertook to come to Montreal, where he resides, he had to put off the train as Co'reau, being unable to stand the jolting.

Several of the passengers received injuries which were very slight, however, with the exception of the case of a woman in the second-class car who was seriously bruised. The accident completely blocking up the track, a special train was immediately dispatched from Cornwall to bring down the passengers of the train from the West, which arrived at the scene of the accident soon after, and which returned to Brockville after taking on the passengers of the wrecked train. The train with the passengers of the train coming East arrived in town about noon to day, but through some mistake the Western mail for England was not transferred to it, and in consequence the Railway authorities found it necessary to run a special train to Rimouski. This delay necessitated the mail steamer to delay her time of sailing.

TEACHERS IN COUNCIL.

The address of Mr. Alexander, the President of the Teachers' Association, at Toronto, is well-timed, and contains some valuable suggestions.

After describing the half time system adopted in Galt, he pointed out an improved method of teaching reading adopted in Boston, and also urged the necessity for greater care in the construction of school buildings, so as to secure ample light and fresh air. The half-time system deserves more special consideration than has been given to it. In many of our rural schools teachers have to teach one class while trying to keep employed at some sort of work a crowd of little urchins who would be better every way were they in the play-room or in the open air. The aid of an additional teacher or monitor, who could take charge of these little ones, and keep them pleasantly occupied at a variety of exercises, singing, marching, gymnastics fitted to their tender age, interspersed with object lessons, whereby their vocabulary would be enlarged and their powers of observation quickened at the same time exercising careful watchfulness over their deportment—what a boon it would be!

The subject of ventilation is one requiring most earnest attention. Many of our schools are terrible. There are some in which the air seems thick, laden with the vitiated emanations from the lungs and the skin; the children's faces flushed, eyes heavy, inertness in their movement. Let one be suffering from any infectious disease, how rapidly it spreads. What is the result? Instead of strength there is weakness; in place of robustness, debility and premature decay. To remedy this evil, measures too drastic cannot be adopted. Stupidity, pennywise selfishness, and indifference are making the people pay terrible penalties in shortened lives and badly developed bodies. The remarks of Mr. Alexander should lead to practical results. A committee has been appointed to bring the matter under the attention of the Ontario Educational Department. Industrial Exhibition Associations could not offer a premium for a better object than a well-devised ventilating system, and the Teachers' Association would do well to appoint committees to investigate different methods of ventilation and report on the conditions of their different schools in this respect.

On the Princess of Wales and her children reaching the seal pond in a recent visit to the Brighton (England) Aquarium, they stayed several minutes to see seals fed, and one of the elder seals, a well trained brute named Charley, was induced to come forward and offer one of its flippers for the Princess to shake. This the Princess did, but the honor seemed to be too great for the usually very docile brute to bear with calmness, for after the royal party had quitted the conservatory where the seal pond is a great splashing was heard, and Charley was found sprawling in the corridor, making great efforts to follow the Princess and the children in their walk through the building. It was speedily secured and placed in the pond.

THE CARELESS USE OF ICE.

(New York Hour.)

It is only in this country that ice enters so largely into the apparent comfort of its inhabitants, and a very dangerous comfort it is. Dyspepsy and a number of other evils follow directly in the train of a consumption of ice. To the great pitchers of iced water so temptingly displayed on hot days may be traced a number of maladies, for it is evident that no person can without danger suddenly and violently lower the temperature of his stomach by filling it full of water at 32° Fahrenheit. That valuable organ will certainly resent the insult especially if followed up by repeated injuries of the same kind.

In the tropics, where the use of ice has more temptations surrounding it than in any other part of the world, the inhabitants most carefully avoid it. You cannot get a Cuban to indulge in iced water. People who have been previously addicted to the foolish habit of using ice will, after visiting the West Indies, forever eschew the dangerous practice. A party of men who recently visited San Domingo on business (who would go there for any other reason?) on their first arrival mourned greatly at the absence of ice. "Ah!" said they, "when the English steamer runs in here we will go aboard and have a treat in the shape of a good iced brandy and soda." The steamer arrived in due course. The advent foreigners jumped into the boat of the captain of the port (a negro gorgeously arrayed in uniform covered with gold lace) and, barely saluting the captain, rushed to the saloon for the coveted refreshments. It was duly absorbed, and the whole party were rendered ill in consequence. None of them have ever touched ice since that time. In the West Indies it is only the coloured race who patronize ice; to the white people it is not only no luxury, but a dangerous enemy.

Ice has its uses; in the hospitals it is invaluable, for the preservation of provisions, especially fish, it is useful, although detrimental to favour if allowed to touch the meats to be preserved; but as an article of human consumption it should be avoided. There is yet an essay to be written upon the maladies and woes produced by the careless consumption of ice. It is only with us that this takes place. Abroad ice is simply a luxury only resorted to at times, even in California the residents are wary of ice. In short, ice is a very good friend in moderation, but a bitter enemy when the intimacy is too absorbing.

Another steam mill is to be started at the head of Lake Megantic. The commissioner sailed last week for France, to put the machinery in motion. All the lumber to be cut is to be shipped direct to France.

Ayer's Cathartic Pills.

For all the Purposes of a Family Physic,

CURING

Costiveness, Jaundice, Dyspepsia, Indigestion, Dysentery, Foul Stomach and Breath, Headache, Erysipelas, Piles, Rheumatism, Eruptions and Skin Diseases, Biliousness, Liver Complaint, Dropsy, Tetters, Tumors and Salt Rheum, Worms, Gout, Neuralgia, as a Dinner Pill, and Purifying the Blood, are the most copious purgative yet perfected. Their effects abundantly show how much they exceed other pills. They are safe and pleasant to take, but powerful to cure. They purge out the foul humors of the blood; they stimulate the sluggish or disordered organs into action; and they impart health and tone to the whole being. They cure not only the every day complaints of everybody, but formidable and dangerous diseases. Most skillful physicians and eminent clergymen, and our best citizens, send certificates of cures performed, and of great benefit derived from these Pills. They are the safest and best physic for children, because mild as well as effective. Being sugar-coated, they are easy to take; and being purely vegetable, they are entirely harmless.

PROSPECTUS.

THE LAST FORTY YEARS: CANADA SINCE THE UNION OF 1841.

IN ISSUING THE EARLY PARTS OF this important work, the publisher desires to call attention to a few of the special features by which it will be characterized.

"THE LAST FORTY YEARS" will contain a review of the leading events in our political, social and religious life, from the date of the Union of the Provinces of Upper and Lower Canada in 1841, down to the present time. The inauguration of the Union under Lord Sydenham; the struggle between Sir Charles Metcalfe and his Ministry, and the final establishment of Responsible Government; the advent of the Railway Era; the long and hotly-contested contest which ended in the secularization of the Clergy Reserves; the abolition of the Seigneurial Tenure; the making and subsequent abrogation of the Reciprocity Treaty with the United States; the Legislative Dead-Lock and the ensuing movement which led to Confederation; the amalgamation of the Maritime Provinces, Manitoba, the "Great Northwest," and British Columbia with Canada; the inception and subsequent history of the Canada Pacific Railway Scheme; the Fisheries Question; the National Policy—these are merely a few out of the many prominent episodes in our modern history which will receive consideration in the pages of this work. A review of the Canadian literature and journalism of the period will form the concluding chapter. The work will be written in a popular and readable style, and will, it is hoped, be the means of disseminating a wider and more accurate knowledge of the events of "THE LAST FORTY YEARS" than at present prevails in Canada.

"THE LAST FORTY YEARS" will not be a compilation, but the result of original inquiry and research. It will involve the discussion of various incidents of local and general interest not touched upon in ordinary histories of Canada. As its name implies, it will be a veritable Canadian "History of Our Own Times." Events will be contemplated from a modern, but not from a partisan point of view; and there will be no attempt to serve the interests of any political party.

GEORGE VIRTUE,
12 Adelaide St. East,
Toronto.

Aug 12, 1881.

ADVERTISED IN ENGLAND, or travellers from Canada, will find a complete file of The Mercury from 1843, in the Reading Room of the British Museum, Great Russell Street, W. C., London, England.

The Quebec Mercury

MONDAY EVENING, AUGUST 15, 1881.

Major-General Inard was in town yesterday and attended morning service at St. Matthew's. He left by the eastern train this morning.

The Honorable Adolphus Caron and Piping Tom, of Cardwell, left for the east this morning on a speechifying tour to counteract Mr. Blake's telling eloquence in the Maritime Provinces. The train was delayed nearly half an hour to fish out a swell car from the reserves for their special accommodation.

The death is announced of Senator Bull, of Hamilton. He was appointed to the Senate March 1st, 1879, in place of Hon. Donald McDonald, deceased. He was a major in the Hamilton cavalry, and an officer high in position in the Masonic Fraternity. He leaves a widow and two sons. Social qualities of an attractive nature, a kindly disposition, and a character noted for integrity, won him many warm friends.

The position of the two houses of Parliament in England over the Irish land question is one which points directly at an ultimate settlement. It is absurd for any section of Irish landlords to attempt to get rid of the Ulster Tenant Right. It dates from James I, and was recommended by Bacon. Ulster was settled on it and the undertakers took their properties subject to its operations. It is too late to disturb all that, and the Peers are not likely to persist in its abrogation.

At the opening of the Manchester Assizes in England recently Lord Chief-Justice Coleridge expressed the opinion that the crime of perjury was on the increase. This conclusion had been forced upon them by his observations from the bench. After pointing out that if the oaths of witnesses could not be relied upon, the courts themselves must become the instruments of oppression, the Lord Chief-Justice remarked that he should not think ill of a law which made the possible punishment of perjury heavier than it now is, for seven years of penal servitude might be a totally inadequate punishment for the mischief which a perjurer might commit.

It has been decided that the London statue of Lord Beaconsfield shall be erected in Parliament square, the large open area bounded on two of its sides by the houses of Parliament and the Abbey of Westminster. It will thus be near the well-known statues of Peel, Palmerston and Lord Derby. The dead Earl will be represented as looking towards the House of Lords, with his back to Peel and St. Margaret's church. It was Lord Beaconsfield who presided at the ceremonies on this same ground which attended the unveiling of the statue of Lord Derby.

The French Academy has just refused a legacy of 200,000 francs left in trust to be distributed among les meres les plus secondes. Our projected Canadian Academy had better organize at once and secure this prize, as from the census returns it appears that the proverbial fertility of our Canadian mothers maintains itself unimpaired. Vive la Canadienne

The free-pass system for officials on railways is a recognized evil. An American Judge throws out a new idea in this respect. He does not object to State officers riding free, as it is a proper return for the great privileges granted by the State, but then he says, "it should be demandable as a right."

MAIL BOAT DETAINED.—The English mail from the west, due on Saturday evening, was some ten hours late, consequently the mail boat Parisian was detained at Rimouski until Sunday morning.

BONUSES TO MANUFACTURERS.

The Superior Court of the United States has declared bonuses granted by Municipalities to Corporations to be unconstitutional. In the judgement it is said: "To lay with one hand the power of Government on the property of the citizen, and with the other bestow it on favoured individuals, to aid private enterprises and build up private fortunes, is none the less robbery, because it is done under the form of law and called taxation. Any business which employs capital and labour is a benefit to the ideal public in the same sense as manufactures, and no line can be drawn in favour of the manufacturers which would not open the public treasury to the importunities of two thirds of the business men of the city or town."

OUTSIDER APPOINTED.—Mr. F. X. Belanger, of the Parish of St. Foye, has been appointed landing-waiter to fill the vacancy caused by the death of the late Mr. Lee. The claims of old and faithful servants of the public service are completely ignored now-a-days. By right of promotion, Mr. McHugh, who has been twenty-seven years in the Customs, was entitled to the position. The appointment is a terrific snub to the large and influential number of Lower Town merchants who signed Mr. McHugh's application paper. But it will be their turn by and by to retaliate when their votes and influence are solicited in favor of the present rulers at Ottawa, and their rotten and corrupt Government.

INFANTICIDE.—Mr. Bedard, the porter of the General Hospital, when shutting the doors of the building on Saturday evening, found the body of a newly-born female child tied in a handkerchief and hung to one of the doors. We believe the deputy-coroner will hold an inquest. The neighborhood is stated to be a centre of several lying-in houses.

ECCLESIASTICAL.—The Anglican Synod of the Diocese of Ontario will not be held before November. The Bishop will not return from England before October. The Rev. J. H. S. Sweet, of Dalhousie, N.B. has been appointed to Newcastle, N.B.

FIRE RELIEF.—The fire Committee have been advised that \$10,000 have been placed to their credit in La Banque Nationale by M. Thors, on the part of the French Committee of Paris, and that a further remittance will be made shortly.

The following is from the London Times of July 20:—"The King of the Sandwich Islands, King Kalakaua and suite, visited Madame Tussaud's exhibition yesterday in the evening. His Majesty, attended by Mr W N Armstrong, Minister of State, Colonel C H Judd, Chamberlain, and Mr R F Syngue, dined with Mr A Hoffnung, the agent in London of the Hawaiian Board of Immigration, at his residence in Redcliffe square, Mr E Whitely, M P, for Liverpool, and a select party had the honour of dining with His Majesty. Later Mr Hoffnung held a numerous attended reception at which the King was entertained at a concert under the direction of Herr W. Ganz. Afterwards the King and his attendants went to Cady Alfred Pagot's ball to meet the Prince and Princess of Wales."

[Mr. Hoffnung's many friends in Montreal will be pleased to know that he still maintains the high social position which he attained immediately on his making England his home. Mr. Hoffnung was one of our most enterprising merchants 20 years ago.—Ed. Montreal Herald]

Montreal, Aug. 11. One of the most notorious New York bank and bond robbers, who is said to have netted a large fortune by his depredations, has been making Montreal his headquarters for some days past. He deposited the proceeds of the sale of American bonds to his credit at a banker's here, and goes out of town for a day or so occasionally. He is supposed to have been connected with the Hochelaga Bank robbery here some years ago, but as he cleared out to the States he was not arrested. Since his arrival in the city the clever robbery at Williams' sewing machine establishment has taken place. He is about 45 years of age, of very dark complexion, and has the cut of a horse dealer. His appearance is that of a Spaniard, but from his accent he is evidently an American. Not the slightest clue has been found to the robbers of the \$3,000.

Sitting Bull has named one of his twins "The War is Over." His daughter, "She who Glances at You as She Walks," is fourteen years old and a very nice girl.

WEATHER PROBABILITIES FOR THE LOWER ST. LAWRENCE DISTRICT

Meteorological Office, Toronto, August 15. Fresh winds, mostly from the northward; fine cool weather. Tuesday and Wednesday will probably also be fine.

C. CARMAEL, Supl. The above notice is displayed as soon as received at noon daily in the window of Mr. Frechette's News Room, Mercury Building.

Ottawa, Aug. 13.

The Canada Gazette contains the following:—

The Dominion revenue on account of the consolidated fund of Canada for the month of July was as follows:—

Table with 2 columns: Item and Amount. Includes Customs (\$1,481,983.87), Excise (393,967.91), Post Office (125,830.55), Public Works including Railways (216,463.79), Bill Stamps (18,277.94), Miscellaneous (57,553.57), Total (\$2,294,076.73).

The expenditure during the month was \$1,499,484.28.

The value of Dominion exports for the month of June (exclusive of British Columbia) was as follows:—

Table with 2 columns: Item and Amount. Includes Produce of the mines (\$187,736), Produce of the fisheries (732,993), Produce of the forest (4,056,950), Animals and their products (2,411,163), Agricultural products (2,448,643), Manufactures (563,802), Miscellaneous articles (56,497), Total (\$10,247,784).

Of the above \$9,102,097 was the produce of Canada.

Gemmed with Pearls.

A mouth gemmed with pearls flashes radiance every time it is opened. The contrast between the ruby of lovely lips and pearly teeth they enclose has winged the fancy of many a poet. SOZODONT, fair ones, is the thing that most contributes to adorn the feminine mouth. It is pure, it is aromatic, it retains the natural color of teeth incrustated with yellow tartar. No gritty or other objectionable ingredient contaminates it, its odor is balmy, and its purifying operations thorough.

Preserve Making!

THE GRAND COMFORT OF MAKING PRESERVES in a Cool Room and not having the trouble of using the spoon to constantly stir and mash up the fruit, is on reason why our CELEBRATED OIL STOVES are so popular. But the fact of their saving every cent in fuel should be the consideration of every good housekeeper to procure one at once.

Table with columns: STOCKS, Asked, Offered, Last dividend payable. Lists various banks and companies like Quebec Bank, Union Bank, National Bank, etc.

Stocks bought and sold for cash and on margin.

A COUGH, COLD or SORE THROAT should be stopped. Neglect frequently results in an incurable Lung Disease or Consumption. BROWN'S BRONCHIAL TROCHES do not disorder the stomach like cough syrups and balsams, but act directly on the inflamed parts, allaying irritation, relieving ASTHMA, BRONCHITIS, CATARRH, and the THROAT TROUBLES which SINGERS and PUBLIC SPEAKERS are subject to.

MOTHERS! MOTHERS! MOTHERS!!! Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, get at once and get a bottle of Mrs. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it: there is no mistake about it. There is not a mother on earth who has ever used it who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere. 25 cents a bottle. Feb 25/81

Q. M. O. & O. RAILWAY Change of Time.

Trains to and from Ottawa connect with Trains to and from Quebec. SUNDAY TRAINS Leave Montreal and Quebec at 4.00 P.M. All Trains run by Montreal Time. GENERAL OFFICES—13 PLACE D'ARMES TICKET OFFICES.

Magnetic Mineral Spring Water.

Murray Bay, Lower Canada. Sulphuretted, Bicarbonate, Iodized, Bromized, Ferruginous and Gaseous, this is the purest and most medicinal of all the mineral spring waters known. The Chemical Analysis of this water and its composition are unvariable. I have examined and analyzed the above water, and recommend it for all kinds of purposes—F. A. H. LAURE, M.D., Public Analyst. This Mineral Water is one of the most powerful remedies for the numerous diseases of the chest, such as Bronchitis, Catarrh, Asthma, also in cases of Rheumatism, Gout, Paralysis, Stenosis, Dyspepsia, and in affections of the Skin, Blood, Stomach, Kidneys, Bladder, and urinary organs. This water is a tonic and renovating—restores languid circulation, imparts freshness to the vital energy, and tempers anew, as it were, the entire system. It is used in doses of from one to two glasses before meals, or in a small quantity during the day, either pure or with syrup. It is also excellent at meals with wine. Keep the bottle on its side. Sold by all Druggists. GINGRAS & LANGLOIS, ADVERTIS, Palace street, Quebec. July 20, 1881. 3m

SIX O'CLOCK EDITORIAL. Eye Quebec Mercury.

MONDAY EVENING, AUGUST 15, 1881. HOW THE CITY IS MISRULED.

The notorious way the Mayor and Corporation rob the city of taxes, and misapply the money instead of mending the roads and paying accounts long over due, will soon get past the endurance of the people, who are totally ignored in their scheming with the finances in favor of their friends and fellow bleu politicians. The Corporation, in verity, is merely a body of schemers who give contracts to their friends to spend the money in elections. No extensive work is ever completed by the city, as half of the money is devoted to the bleu money lenders. The Battery road money all went, and the Battery road is but half made. St. Andrew street, so energetically taken up by Mr. Joly's ministry, and the railway track, constructed despite of the bleu politicians, remains unfinished and the city's money has gone no one knows where. Then Dalhousie street has been four years in progress, under Chevallier Bailhaire's great designs, but is not yet graded, even at its most important point, the junction with the foot of Mountain Hill, where a carriage load of travellers may at any moment be murdered by our civic rulers on their way to the Saguenay boats!

By CABLE THIS EVENING. Insurrection in India—7 Executions—Fatal Accident at Marseilles.

Calcutta, Aug. 15. There is a serious insurrection at Muncipoor. The Maharajah is suppressing it with the utmost severity. He executed 17 men and imprisoned 300. Marseilles, Aug. 15. During a bull fight yesterday, several tiers of seats collapsed. 12 persons were killed and 150 injured.

THIS EVENING'S TELEGRAMS. Condition of Mr. Garfield—Sympathy With Mrs. Garfield—Another Massacre by Indians.

Washington, Aug 15.—12:30 p.m. Since last bulletin the President has not again vomited, and has been able to retain the nourishment administered. At this morning's dressing, the discharge of pus was free and of good character. Since this, the pulse has been more frequent, but his temperature has fallen to a little below what it was at this time yesterday. At present, the pulse is 119; temperature, 99; respiration 19. In response to an enquiry as to the cause of the President's vomiting, Private Secretary Brown said it was due entirely to a weak stomach, and while it was more or less aggravated by the wound, it could not be attributed safely to its effects. He added that the President contracted dyspepsia while in the army, and had no time since been entirely free from it. When he was in apparent good health, he was oftentimes troubled with nausea. The universal sympathy felt for Mrs. Garfield in her present affliction will be greatly lightened by the knowledge of the fact that she again expects to become a mother about the end of November. 4 p.m.—The surgeons took patient's pulse at 1.45, when it was 112, being a decrease of six beats in less than two hours. At this hour the surgeons say pulse still decreasing. The flow from patient's wound is again obstructed. It is rumored that Agnew will perform an operation to-day.

Chicago, Aug. 15. Wild excitement prevailed on 'Change at the opening this morning and continued to this hour. It was believed the reports of rain in the western States would have sent the markets down, but they had no effect. Prices started with an advance, which progressed almost without break. Every article shared in the rise. Los Vegas, N. M., Aug. 15. Apaches surrounded a small Mexican village 18 miles from Rio Parco, and murdered 27 out of 29 inhabitants. The two Mexicans who escaped were nearly exhausted when they reached the railroad. They had their horses shot from under them before getting out of the reach of the Indians. Herbert Anson set his daughter on a tree in Victoria Park to give her a swing. The branch broke and so did several of the child's teeth. A piece of her tongue was bitten off and her face cut and bruised.

Montreal, Aug. 15. The local papers have announced the death of Dr. Graham, of Richmond, Quebec, Grand Master of Freemasons of this Province. This is an error. Dr. Graham is alive and well, but his wife died on Saturday last. A son of Mr. Fraser of this city was accidentally drowned at Dorval while bathing. A fire at the Canada cork cutting factory here did considerable damage to the stock. The loss is not known but will probably amount to \$1,500, and is insured. The enquete in the telegraph amalgamation case was declared closed to-day on behalf of the Montreal Co., and the argument is appointed for Wednesday. The stock market was stronger to-day; business showed very little improvement, however.

From Ottawa this Evening. Ottawa, Aug. 15. The next Manitoba special leaves here on the 6th September. The fire in the Chaudiere lumber yards was the work of an incendiary. Last night some unknown parties set fire to a pile of dry brush wood near a fence on Rideau Hall grounds. Considerable of the fencing was destroyed before the Dominion Police succeeded in extinguishing the fire. Rev. Father Whalen discussed the charavari nuisance in his sermon yesterday, and severely censured the parents who allowed their children to participate in such vulgar amusement. The Princess Dragoon Guards will take their horses to Toronto and have representatives in 100 yards, quarter, half and one mile races. Changes are being made in the Rideau Rifle range to afford increased accommodation at the approaching Dominion matches. The four prisoners, Berry, McLaren, O'Brien and Kelly, charged with the murder of the old man Wetherall, were arraigned at the Police Court this morning and remanded until after the inquest which will be resumed on Thursday. The other young men, charged with the minor offence of riotous conduct, were similarly dealt with. It is understood that other arrests will be made this evening. The list numbers about thirty.

From Toronto this Evening. Toronto, August 15. The men wounded in the Prescott accident are, so far as learned, doing well. John Clotte, a Quebec Frenchman, on his way to visit a brother in Brantford, met with some sharpers who got him to lend them \$160 on a package of worthless jewellery, and have not returned it. Mrs. Simpson Humbert was charged with shooting a man who was taking stone from her husband's shore rights. Seventeen pellets are said to have been taken out of his face. The affair occurred after dusk. Thomas Lannier, while swimming in the Don last night, became exhausted and sank. Three companions rescued him with much difficulty.

THE WRECKED STEAMSHIPS.—The steamship Southbourne, previously reported ashore at Langley Island, near St. Pierre Miquelon, is stated to have become a total wreck. The tug Progress was on Saturday chartered to leave this morning to the assistance of the other steamship Duoro, reported ashore at Longlade, near St. Pierre Miquelon, but, owing to the receipt of a telegram from the Island this morning, stating that the steamship had become a total wreck, the sailing of the Progress has been delayed, until it can be ascertained whether the telegram is genuine, as it is surmised that it might have been sent by parties interested in seeing the vessel go to pieces.

THE CARTRIDGE FACTORY.—A gang of men of A Battery, with eight horses, were this morning engaged in bringing a large piece of machinery from the Allan steamship wharf intended for the proposed cartridge factory. They took it along Peter street and up Palace Hill. In going across the Champlain market the rotten planking was unequal to the weight and collapsed, the piece of machinery sinking into the ground. It took some time and a considerable amount of hard work to get it out and again started.

RECORDER'S COURT TO DAY.—Several cartors and tradesmen were fined for not having licenses. Ann Finn and Ann Killen, loitering, were each sent to jail for one month. Alfred Caron, Brazil Bisson, and James McGee, all for drunkenness, were sent to jail for two months each. Joseph Rowan 15 days and Jean Giguere one month. Thomas Maguire got 8 days and Alfred Brown was discharged.

CANDAHAR—A RETROSPECT.

To the Editor of the Times: Sir,—The first fruits of the scattering out of Afghanistan are now apparent. Ayoub Khan, who defeated our forces at Candahar, is now master of Candahar, and of the whole country. The people of Candahar, three-fourths of whom are Afghans, have been, in consequence of our withdrawal, exposed to a double outrage. The British looking youth of 19, whom Abdurrahman set over Candahar oppressed them with whips; now Ayoub's victorious army has chastised them with scorpions. So much for the interests of the natives, the great majority of whom pray for a continuance of British rule, and to whom Sir Donald Stewart in vain pledged the word in England that "they should never again fall under the rule of Cabul." The influence of this event must be unfortunate upon India. While Russia advances close to Herat and annexes a splendid people and fertile territory, we retreat, and Ayoub, our enemy, becomes master of Afghanistan. What has become of the 2400,000 rifles which the present Ministry has given to Abdurrahman? Anarchy and civil war in Afghanistan, alarm and loss of prestige in India, the approach of the Russian armies 400 miles nearer the keys of that great dependency: these are the outcome of our fatal retreat from Candahar. I have the honor to remain, Sir, Your obedient servant, E. ASHMEAD-BARTLETT, House of Commons, London, July 28.

CUSTOM HOUSE RECEIPTS.—Duties collected at the Custom House to-day amounted to \$5315.46.

TEMPERATURE.—The following is the state of the temperature during each day, by Negretti and Zambra thermometer, in the shade, at the "Mercury" Buildings, Buede street, 150 feet above spring tide level:—

Table with columns: Date, Min., Max., Wind, Aspect. Lists temperature data for August 1st to 15th.

DR. J. COLLIS BROWNE'S CHLORODYNE THE ORIGINAL AND ONLY GENUINE

ADVICE TO INVALIDS. If you wish to obtain quiet, refreshing sleep, free from headache, relief from pain and anguish, to calm and assuage the weary aching of protracted disease, invigorate the nervous system, and regulate the circulating systems of the body you will provide yourself with that marvellous remedy discovered by Dr. J. COLLIS BROWNE, Member of the College of Physicians, London, to which he gave the name of CHLORODYNE.

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedy ever discovered. CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma, Effectually checks and arrests those too often fatal diseases - Diphtheria, Fever, Croup, Ague. CHLORODYNE acts like a charm in Diarrhoea, and is the only specific in Cholera and Dysentery. CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms. CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis, &c.

FROM LORD FRANCIS CONYNHAM, MOUNT CHARLES, Donegal, 11th December, 1868. "Lord Francis Conynham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half a dozen bottles sent at once to the above address."

"Earl Russell communicated to the College of Physicians that he received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE." - See Lancet, 1st December, 1864.

CAUTION - Beware of Piracy and Imitations. CAUTION - Vice-Chancellor Sir W. PAGE WOOD stated that Dr. J. COLLIS BROWNE was undoubtedly the inventor of CHLORODYNE; that the story of the D-fendant, FREEMAN, was deliberately untrue, which, he regretted to say, had been sworn to. - See Times, 10th July, 1864.

Sold in Bottles at 1s. 1/4d., 2s. 9d., 4s. 6d., and 11s. each. None is genuine without the Words "DR. J. COLLIS BROWNE'S CHLORODYNE" on the Government Stamp. Overwhelming medical testimony accompanies each bottle.

SOLE MANUFACTURER - J. T. DAVENPORT, 33 Gt Russell Street, Bloomsbury, London.

Sept. 2 1880

PEPPER'S QUININE and IRON TONIC strengthens the nervous and muscular system, improves digestion, and acts on the spirits, recruits the health. For debilitated spirits from the effect of hot climates this tonic is invaluable.

PEPPER'S QUININE and IRON TONIC rouses and develops the nervous energies, enriches the blood, promotes appetite, dispels languor and depression, fortifies the digestive organs, is a specific remedy for neuralgia, ague, indigestion, fevers of every kind, chest affections, and in wasting diseases, scrofulous tendencies, &c. The whole frame is greatly invigorated by Pepper's Tonic, the mental faculties brightened, the constitution greatly strengthened, and a return to robust health certain.

TARAXACUM and PODOPHYLLIN. Prepared only by J. Pepper, London. This Fluid combination, extracted from medicinal roots, is now used instead of blue pill and calomel for the cure of dyspepsia, biliousness, and all symptoms of congestion of the liver, which are generally pain between the shoulders, head ache, drowsiness, no appetite, turred tongue, disagreeable taste to the eating, sickness, disturbance of the stomach, and feeling of general depression. It acts the sluggish liver in motion, very slightly acts on the bowels, giving a sense of health and comfort within 24 hours. It is the safest medicine. Taraxacum and Podophyllin is a fluid made only by J. Pepper, Bedford Laboratory, London, whose name is on every label. Bottles, 2s. 9d. and 4s. 6d. Sold by chemists. A most valuable and essential medicine for the Colonies generally.

LOCKYER'S SULPHUR HAIR RESTORER will darken grey hair, and in a few days completely bring back the natural colour. The effect is superior to that produced by an instantaneous dye, and does not injure the skin.

LOCKYER'S SULPHUR HAIR RESTORER is the best for restoring grey hair to its former colour. It produces a perfectly natural shade, and is absolutely harmless. It is recommended for destroying scurf and encouraging growth of new hair.

LOCKYER'S SULPHUR HAIR RESTORER. Sulphur being highly prized for its stimulant, cleansing, healthful action on the hair glands, Lockyer's Restorer is strongly recommended. It is most agreeable in use. Large bottles 1s. 6d. Sold by Chemists, Hairdressers, and Perfumers in London, and throughout the world. Lockyer's is equal to any of the high-priced preparations.

LIVER COMPLAINTS. DR. KING'S DANDELION and QUININE LIVER PILLS (Without Mercury.) The best remedy for Biliousness, Stomach Derangement, Flatulence, Pains between the Shoulders, Bad Appetite, Indigestion, Acidity, Headache, Heartburn, and all other symptoms of disordered liver and dyspepsia. Acknowledged by many eminent surgeons to be the safest and mildest pills for every constitution.

In Boxes at 1s. 1/4d., 2s. 9d. and 4s. 6d. Sold by Chemists and Medicine Vendors throughout the world. Prepared by James Rorke, London. Specially valuable Pills for residents abroad and travellers.

"SULPHOLINE LOTION." - AN EXTERNAL MEANS OF CURING SKIN DISEASES. There is scarcely any eruption but will yield to "sulpholine" in a few days, and continue to fade away, even if it seems past cure. Ordinary pimples, redness, blotches, scurf, roughness, vanish as if by magic; whilst old, enduring skin disorders, that have plagued the sufferers for years, however deeply rooted they may be, "Sulpholine" will successfully attack them. It destroys the animalcules which cause these sores, irritable, painful affections, and always produces a clear, healthy, natural complexion of the skin. "Sulpholine" Lotion is sold by most Chemists. Bottles, 2s. 9d. Made by J. PEPPER & CO, London, England. June 17, 1881.
