Annual Convention of Pontiac Women's Institutes to be held in Quyon

The Annual Convention of Women's Institutes of Pontiac will be held in the United Church, Quyon, on Tuesday, May 5th, 1942, commencing at 10:00 a. m. Miss Roberta Scott, demonstrator, expects to be present, and will address the Convention.

SALVAGE

Now that the vote has been cast throughout Canada and a nine million dollar drive for Red Cross is under way for May, let us not forget to make a special effort to get all lines of war salvage ready.

A date for collection will be announced later.

Lachute Spring Fair June 11, 12 and 13

Lachute Spring Fair which holds an interest for several Shawville citizens will be held on June 11, 12 and 13th. Some changes have been made in the prize list and a general increase of 25 per cent has been made in the prize money.

The prize list is now in the hands of the printer and intending exhibitors should write for a copy if they do not receive one by the end of the month.

The usual attractions will be presented at this Fair including horse racing every day. Sims midway has been engaged and the dining room and lunch counters will be under the direction of the local Women's Institute.

Every evening will be featured by a grand display of light horses, particularly saddle and jumping classes.

SHAWVILLE VOTES 'YES' IN NO UNCERTAIN TERMS--98.3 per cent.

Shawville village and the surrounding townships of Clarendon and Bristol were included in the few polling divisions of the Province of Quebec to cast a strong "yes" on the plebiscite on Monday.

It is believed that the village, in proportion to population, cast the largest "yes" vote in the province, when 98.3 percent voted on the affirmative side. Out of a possible 450 voters, 390 cast their ballots and of these only 10 voted "no."

Polls in the district were as follows:--

	YES	NO
Stark's Corners.....	146	15
Zion.....	96	8
Yarm.....	70	10
Charteris.....	32	2
Total for Clarendon.	344	35

Bristol township cast a strong "yes" vote with 293 "yes" and 135 "no" South Onslow, 103 "yes" and 54 "no"; Portage du Fort, 52 "yes" and 31 "no".

Votes on the "no" side of the ballot in this district included--Litchfield township, 175 "yes" and 188 "no"; Otter Lake, 49 "yes" and 235 "no"; and the German settlement of Ladysmith, 28 "yes" and 81 "no". The total for the county showed 47 polls giving 2,480 "yes" votes, as against 2,203 "no".

The Red Cross Needs your Contribution

There has been no Red Cross Campaign since October, 1940, when some \$5,000,000 was raised. It is necessary for those who contributed in 1940 to at least double their contributions if the great sum now needed, is to be raised. Or we must have many more subscribers.

It costs more than \$5,000,000 a year alone to supply parcels of food and other necessities to prisoners-of-war as requested by the Canadian, British, Australian and New Zealand governments. It is only through the Canadian Red Cross Society that any Canadian can render any aid to any Canadian, British, Australian or New Zealand prisoners-of-war anywhere.

The Society is the only medium through which information regarding missing men can be obtained for next-of-kin and other anxious relatives.

The Society's blood donor service supplying blood serum for overseas need, affords the only way in which Canadians who cannot go overseas, may make good to fighting men, some of the blood they shed. The Society has to be prepared to meet any war emergency that may come to Canada at or from either coast.

The Society serves the troops overseas, in Britain and elsewhere; the wounded, the sick, the bombed out civilians, and suffering humanity anywhere its establishments operate.

All of these services are entirely free and voluntary. But Canadians must furnish the funds that make them possible.

MARRIED

DALE-ANDERSON

The marriage was quietly solemnized in College Chapel, Bloomsbury N. J., on Saturday, Feb. 9th, 1942, of Amelia Kathaleen Dale, to Mr. Swend Anderson, of New York City.

The couple were unattended. The bride chose a frock of pale azure blue wool, with accessories to match and wore a corsage of pink roses.

Following the ceremony, a reception was held at the Wivel Hotel.

The bride, formerly of Shawville, Que., is a graduate of the Children's Memorial Hospital, Montreal, Que., and the groom is a chief engineer with the Marine service.

PERSONAL MENTION

Miss Minola Gould, R. N., of Ross, spent the week-end with friends in town.

Mr. John C. Ross returned to Kippewa district this week to resume his duties as fire ranger.

Mr. Robert Davis, of San Francisco, Cal., is visiting his relatives in Bristol and Shawville districts.

Mr. Horden Hobbs, of Ottawa, spent the week-end at the home of his brother, Hilliard Hobbs, in town.

Mrs. (Dr.) Norman Halkett, of Ottawa, attended the funeral of Miss Agnes Hodgins, at Yarm, on Friday.

Miss Eleanor Beckett, R. N., left last week to take a position on the staff of the Peakskill, New York, Hospital.

Mr. and Mrs. Mahlon Hayes, of Ottawa, were week-end guests at the home of the former's parents, Mr. and Mrs. W. J. Hayes.

Mr. and Mrs. Thos. E. Farrell, of South Porcupine, have been spending a vacation with relatives in this section and at Ottawa.

Pte. Gordon Smith, of Cornwall, and son, Walter Smith, R. C. A. F. of Mountain View, spent the week-end at their home in town.

Mrs. C. E. Beech and daughter-in-law, Mrs. W. Churchill, of Winnipeg, were week-end guests of their daughter and sister-in-law, Mrs. Dean Howard.

Mrs. Lawrence Dagg has returned to her home in Rouyn, Que., after several weeks visit at the home of her parents-in-law, Mr. and Mrs. Percy Dagg.

Aged Resident of Yarm Section Passes

After a brief illness, Miss Agnes Hodgins, a life-long resident of Yarm section died at her home at Green Lake on Wednesday.

Miss Hodgins was born at the Lake-side homestead about 82 years ago, the daughter of the late Mr. and Mrs. Thos. Hodgins. She was the last member of her family and had been living alone for several years. There are no immediate relatives.

The funeral was held from the late home on Friday afternoon. Service was conducted at Yarm United Church, by the Rev. H. G. Steers. Interment was made at Yarm cemetery.

Mrs. Robert Cameron Dies at Pontiac Community Hospital After Lengthy Illness

After an illness of over a year and a half, which was borne most patiently, Mrs. Robert Hill Cameron of Murrells section died at the Pontiac Community Hospital, Friday evening, at the age of 58 years.

She was born in the state of North Dakota U. S. A., her maiden name being, Agnes Fraser Knox, daughter of the late James M. Knox and Margaret Fraser, his wife. At the age of 17 she came to Campbell's Bay where she lived until her marriage in the year 1907 to Robert Cameron. They then came to Clarendon, where they have lived ever since in the Murrells section.

She is survived by her husband, two sons, John, of Verdun, and Donald, at home; two daughters, Mrs. A. O. Stark, of Stark's Corners and Mrs. Howard Brown, of Oakville, Ont.; and two brothers, Roy Knox of Hull and James Knox of Ottawa. A sad feature of her passing is that a week ago, while she was ill in the hospital, her home was destroyed by fire and practically nothing was saved.

The funeral was held on Sunday afternoon from the home of her daughter, Mrs. A. O. Stark, at Stark's Corners, where a brief service with the family was conducted by Rev. A. F. Fikes of Shawville United Church. The funeral cortege then made its way to Lower Litchfield United Church, where a public service was held, conducted by Rev. T. P. Shaver, her pastor, of Campbell's Bay.

Interment was made in the parish cemetery.

SEED POTATOES -- Government Certified Seed Potatoes, P. E. I. Green Mountain, on sale at W. A. HODGINS STORE, Shawville.

C. P. A. S. No. 1 NOTES

Farmers are reminded of the joint policy of the Department of Agriculture, Quebec, and this Society of "The Assistance to Bacon Hog Producers" for which good cash premiums are available. The date for receiving entries has been extended to May 9th.

The Spring Stallion Show will be held at the Fair grounds on Friday, May 8th.

Red Cross Shipment for April

In the month of April Shawville Red Cross shipped in one consignment, the following finished goods to Hull headquarters:

50 quilts, 1 afghan, 20 hospital gowns 4 surgeons gowns, 15 prs. pajamas, 8 dressing gowns, 10 scarves, 6 sweaters, 10 prs. two-way mitts, 7 turtle-neck tuck-ins 10 prs. gloves, 18 helmets, 9 prs. auxiliary socks, 5 prs. mens socks, 7 sewn articles.

Bristol Lady of 95 Casts 'Yes' Vote

Whilst many younger voters were indifferent and unconcerned about voting on the plebiscite on Monday, we congratulate and raise our hat to Mrs. Peter Bell, of Wyman, who, at the advanced age of 95, showed her concern for an all-out war effort by casting a "yes" vote.

May this fine Canadian citizen live to see a victorious end to this horrible war and happier days. She did her bit--God bless her!

Austin Women's Association

The March meeting of the Women's Association of Austin United Church, was held at the home of Mrs. Clarence Carson, with the president, Mrs. Bland Little, in the chair.

After the opening exercises the minutes of last meeting were read. Roll Call was answered by 12 members and 8 visitors.

At the close of the meeting refreshments were served by Mrs. Clarence Carson, assisted by Miss Norma Carson.

The meeting was closed with prayer by Mr. Leslie Dean.

The April meeting was held in the Austin United Church, on April 8th, with the president, Mrs. Bland Little, in the chair. The meeting was opened by singing and reading of the minutes, 10 members and 1 visitor were present.

It was suggested that each member make an article out of a flour bag to be sold for 50 cents, not over. The meeting was closed by benediction repeated by all.

Facts About Vinegar

Vinegar has a long and ancient history as a staple condiment in cookery and pickling. And at this time, it assumes prime importance, when pickles and spice, and everything nice, are being canned and packed, and when the directions "bottle and seal" are daily passwords in the kitchen.

In countries of older civilization, where the mild climate favored grape-raising and hence wine-making, vinegar was most easily secured by allowing a natural souring process to wine, with resulting internationally common "wine vinegar." But in more northern countries, where neither grapes nor apples grew in abundance, vinegar was brewed from barley malt, or, from the malt of other cereals, and thus gave the cook a darker, more beer-flavored "malt vinegar."

In America today cider vinegar made from cider or apple juice has become a standard household product.

Identify New Stars

Comparison of photographs has brought out of hiding 24 faint little stars, now identified as members of the Pleiades constellation, Dr. Adrian Van Maanen of Mount Wilson observatory, California, announced recently.

Although the Greeks, who named the constellation, called it the Seven Sisters after the legend of the seven Pleiades sisters and their mother, who escaped the pursuit of Orion by becoming stars, the group contains at least 211 known stars, the astronomer said. The most brilliant, Alcyone, is about 1,000 times as bright as the sun and some of the newly added are 1,000 times as faint.

Dr. Van Maanen compared recent photographs of the Pleiades with plates taken 15 to 19 years ago and identified as Pleiadesians those stars which had changed position in the interval.

SUNDAY SCHOOL LESSON

LESSON 17
Wayside Conversations — Luke 13:22-35

GOLDEN TEXT.— Whosoever doth not bear his own cross, and come after me, cannot be my disciple. Luke 14:27.

THE LESSON IN ITS SETTING
Time—November, A.D. 29.
Place—Perea.

Who Will Be Saved?
22. "And he went on his way through cities and villages, teaching and journeying on unto Jerusalem." Through these towns and villages he had sent the seventy in advance and he was on the way through them now preaching as he went along.

23 (a). "And one said unto him, Lord are they few that are saved?" Why this question was asked at this time we do not know, but we do know that every believer in Jesus Christ will be saved.

23 (b). And he said unto them, 24. Strive to enter in by the narrow door; for many, I say unto you, shall seek to enter in, and shall not be able! Jesus does not answer the question asked because the answer is not one that He desires man to have, but He does speak of the more important problem, raised by this very question, namely, are we ourselves saved?

Acting Too Late

25. "When once the master of the house is risen up, and hath shut to the door, and ye begin to stand without, and to knock at the door, saying, 'Lord, open to us,' and He shall answer and say to you, 'I know you not who ye are.' 26. then shall ye begin to say, 'We did eat and drink in thy presence, and thou didst teach in our streets.'" In its application to salvation, this does not imply that there are any people in the world, whom Jesus does not know about, but there are great multitudes whom Jesus does not know as His own. The Lord does not know these people because they have never come to Him before. They did not accept salvation when it was offered, and now, the time being over for salvation, they have no right to His hospitality.

Without A Saviour

27. "And he shall say, 'I tell you I know not whence ye are, depart from me, all ye workers of iniquity.'" Inasmuch as salvation is from Christ alone, when He says he does not know one, that means that person is without a Saviour. Inwardly the worker of iniquity is separated from Jesus, and, at last, the outward relation will be adjusted to the inward, and departure from Him will be inevitable and that is ruin.

28. "There shall be the weeping and the gnashing of teeth, when ye shall see Abraham, and Isaac, and Jacob, and all the prophets, in the kingdom of God, and yourselves cast forth without." Here is the fate of those barred out, presented with the greater intensity because contrasted with the lot of the blessed. It is certain that the damned shall know fully of the joys of the blessed, and worse still, that they, too but for themselves, might be in the midst of those joys.

Judgment Reversed

29. "And they shall come from the east and west, and from the north and south, and shall sit down in the kingdom of God. 30. And behold, there are last who shall be first, and there are first who shall be last." Whatever be the number of those who are in the way of salvation, that which concerns us is that we should without delay secure a place among them.

31. "In that very hour there came certain Pharisees, saying to him, 'Get thee out, and go hence: for Herod would fain kill thee.'" Jesus was in Perea, and therefore within the dominions of Herod. It is impossible to say whether the message was sent by Herod or was invented by the Pharisees.

Christ's Mission

32(a). "And he said unto them, Go and say to that fox, Behold, I cast out demons and perform cures to-day and to-morrow." Here the fox is used as a symbol of craftiness. Jesus saw the inner heart of Herod and therefore when he described him as a fox, he spoke the word of righteousness and of truth. It was not an epithet; it was a character in a word.

32(b). "And the third day I am perfected. 33. Nevertheless I must go on my way today and tomorrow and the day following: for it cannot be that a prophet perish out of Jerusalem." Christ did not resign his functions, he did not decline to go on with his work. He said, 'I work in the name of God and for the good of mankind, and I must not be stopped. If we had more of that spirit we should all do more work in the world.'

RADIO REPORTER

DIALING WITH DAVE:

Full of ideas and plans for his new season, which starts over the NBC-Red Network Sunday, Oct. 5, Jack Benny returns from vacation bitten by the wanderlust bug. He plans to tour the U. S. A. a bit, instead of staging all shows from New York and Hollywood.

THE CIGAR! THE VIOLIN(?)! THE COMEDIAN!

Yes, it's Jack Benny, in probably as typical a pose as you could imagine him in! Jack, with Mary Livingstone, Dennis Day, the Music of Phil Harris and his Orchestra, and all the cast, continue to entertain their waiting millions each Sunday night at seven o'clock—heard throughout Canada on the CBC National Network!

Behind The Program!

Indeed, 'tis very often the story behind the show that gives the program the interest and entertainment value it has. Even more often, the story behind the scenes, if known, enhances the pleasure one has in listening to the program! Take for instance, the Fred Allen Sunday night 9.00 o'clock shows: During the past few weeks, they've been scripted by Vick Knight, who also does the production on such famous 'one shot' shows, as 'The President's March of Dimes' broadcast, and International 'Red Cross' Shows. Several weeks ago, the Army invited Vick to direct its "Command Performance" internationally short-waved shows for the American Fighting Forces! Vick's spare-time wasn't sufficient to cover this new assignment! The problem: Give up a \$600.00 a week job as Fred Allen's Scripter and take the Army work, full time, as a volunteer director at nothing per week! That would take some deciding, you'll agree! But right now Vick Knight is in Hollywood, directing bigger and better "Command Performance" shows!

Bogey's Back

Horror Man, Boris Karloff, master of the macabre, is now heard Sunday nights as guest on the Inner Sanctum Mysteries broadcast via the Blue Network, to a network of Canadian stations

at 8.30! Mr. Karloff's Friday the 13th of March fun-party at his Hollywood home, was one of the most original and eerie, yet staged by a member of the movie-radio colony!

Bonus From Baker

One of the shows a lot of Canadians thoroughly enjoy is the "Breakfast Club," broadcast by a majority of CBC stations daily at 9.00 a.m. Jack Baker, tenor of the show, recently sang a concert for convalescent soldiers and sailors at the O'Reilly General Hospital in Springfield, Missouri. And here's the bonus: Jack gave them, as a parting gift, a fine public-address system for the Hospital auditorium!

An 1150 Listening Tip or Two

The excitement, the danger, the brilliant execution of a mass bombing flight over military objectives in Germany, is just one of the many spine-tingling episodes in the life of the boys of the R.C.A.F. on Active Duty, brilliantly recreated for radio in the story "Flying For Freedom," heard from CKOC, Wednesday nights at 8.00 o'clock.

"Telequiz," popular phone-quiz feature, with special tune identification section for out-of-town listeners, is heard from 1150 on your dials daily at 11.45 a.m. Record of the week, Tommy Tucker's "Tangerine," featured in the film "The Fleet's In!"

34. "O Jerusalem, Jerusalem, that killeth the prophets, and stoneth them that are sent unto her! how often would I have gathered thy children together, even as a hen gathereth her own brood under her wings, and ye would not! 35. Behold, your house is left unto you desolate: and I say unto you, ye shall not see me, until ye shall say, Blessed is he that cometh in the name of the Lord." One of the inexplicable features of divine love is that, in spite of the infallible foreknowledge that all will be in vain, its call and effort to save never ceases till the very end. When Jerusalem persistently refused to receive Christ as her Saviour and a Prophet come from God, then God could do nothing else but leave her to the fate which she was shaping for herself.

Canada's production of crude petroleum and natural gasoline in 1941 totalled 10,123,532 barrels compared with 8,718,058 barrels in 1940 and 7,837,503 barrels in 1939.

Lesson In Attack For New Airmen

New pilots with the Royal Canadian Air Force Spitfire Squadron got a lesson not long ago from a veteran English commanding officer when they took part in a sweep over the coast of Northern France with another Canadian fighter unit.

On the way across the channel a formation of Messerschmitts appeared far below and in the words of the commander: "Some of the more bloodthirsty Canadians wanted to dive and attack them."

"I had to point out," he added, "there was another larger German formation considerably above us, waiting for us to do just that so it could attack us the moment we were involved in a scrap. The lads were disappointed, just the same!"

The sweep was the Canadians' second job of the day which started with a patrol over a convoy moving along the British coast.

Supply Of Wheat Larger Than Ever

Surplus in Four Leading Nations Biggest on Record

Despite two successive short war crops and prospects that the 1942 production may be smaller yet, the world may have a larger supply of wheat this year than ever before.

This is because the surplus existing in the world's four leading exporting nations—United States, Canada, Australia and Argentina—is the largest on record.

Russia Excluded

The present prospects indicate a total 1942 crop for most of the world of around 3,950,000,000 bushels, or slightly less than was harvested last year. This figure compares with the record crop of 4,636,000,000 produced in 1938. Russia and China are excluded from the world figures because adequate information has not been available.

The world—again exclusive of Russia and China—is expected to have a carryover of about 1,590,000,000 bushels of old wheat when the 1942 crop is harvested. Of this amount, only about 175,000,000 bushels were expected to be held by countries other than the United States, Canada, Australia and Argentina.

Famine Implied

The large stocks in the four exporting countries and small stocks in other countries . . . imply a serious bread situation in continental Europe.

United States is expected to have a wheat supply of 1,425,000,000 bushels when this year's crop is harvested. The carryover of old wheat is estimated at about 630,000,000 bushels. This country normally uses about 675,000,000 bushels a year for all purposes.

The crop in Europe this year is expected to be about the same as last year's below average harvest. Bad weather, lack of labor and military operations have hindered farming operations there.

Australia Calls Up More Land Forces

The Australian Government ordered that all Commonwealth land forces be brought up to full war strength by calling up additional personnel.

The order requires all unmarried men between the ages of 18 and 45, as well as married men from 18 to 35, to report immediately for military service.

Army Minister Francis Forde said the step was taken on recommendation of Gen. Sir Thomas Blamey, Commander of Allied land forces in Australia, and applied to men who were already listed for service but who would not have been called for some time.

Intensive battle training for all units was ordered by Gen. Blamey, Mr. Forde said.

How War Affects Farm Auction Sale

It Puts Pep into It, Says The Woodstock Sentinel-Review

If you really want to know how the war is affecting Ontario, attend one of the farm auctions. Auctioneers say the attendance is away above the attendance before the war and prices appear to ignore any such thing as price ceilings. Good quality farm machinery is at a premium. Ancient binders dating from before the Great War, they say, find a ready market at prices more than half their original cost.

Buggies are scarce and bring from \$20 to \$25. Before the war, buggies, good enough for the purpose, could be had at auction for \$5. Three horses sold for \$150 each. A year ago, the auctioneer said, these horses would have brought only from \$75 to \$90. A binder, which had cut two crops, sold for \$285. The market price of the machine today, including Federal Tax, is \$325. Most surprising of all, a manure spreader, bought second hand two years ago for \$45, sold for \$115. A crosscut saw, costing \$3.50 when new, sold for \$5.25. Similarly, furniture brings prices which definitely put it in the antique class.

THIS CURIOUS WORLD

By William Ferguson

BEGINNING ABOUT APRIL 16, YOUR WATCH WILL RUN SLOWER THAN 'SUN TIME,' UNTIL JUNE 15; THEN FASTER UNTIL SEPT 1, SLOWER AGAIN FROM THEN UNTIL DECEMBER 25, AND FASTER FROM THIS DATE UNTIL APRIL 16

HEDGE HOGS FOLD UP INTO A BALL AND ROLL DOWN STEEP INCLINES.

GIANT PEANUTS, WITH KERNELS LARGER THAN THE ENTIRE SHELL OF PREVIOUSLY KNOWN VARIETIES, HAVE BEEN DISCOVERED IN BRAZIL.

OWING to the obliquity of the ecliptic (the angle between the planes of the earth's equator and orbit), and the eccentricity of the earth's path around the sun, the latter sometimes passes the meridian, before 12 o'clock by our watch, and sometimes it does not cross the meridian until after 12. "Sun time" can be as much as a quarter of an hour slow, or fast.

NEXT: How was the date of Easter decided upon?

Britain Thorough In Matter of Fines

The British people have often been accused by their American brothers and cousins of being slow, but no one yet has ever accused them of not being thorough, states the Huron Expositor.

And that goes as well in the matter of fines for infractions of war restrictions.

Last week Woodlands Chemists, Ltd., of London, was fined forty

thousand pounds, which runs close to two hundred thousand dollars in our money, for exceeding its cosmetics sales quota under Britain's wartime rationing laws, and was given three months to pay the fine.

By the time the company succeeds in paying that fine they will be looking back upon their profits and dividends as vanishing cream, a highly prized cosmetic in women's lives, but something which the company will be very chary of disposing of in future.

POP—Pop Takes the Wind Out of the Old Man

By J. MILLAR WATT

(Released by The Bell Syndicate, Inc.)

INDIANS SING FOR LONDON CHILDREN

These London children, orphaned by the blitz, are being entertained by two Cree Indians, A. B. Ward and Joe Dacoin (with guitar) both serving with the Canadian Forces in England. The men sang hill-billy songs for the children, and gifts of clothing purchased with money subscribed by Indians living on the Old Crow Reserve, Northern Yukon, were presented by the Rt. Hon. Vincent Massey, Canada's High Commissioner in London.

Modern Etiquette

- K—Modern etiquette**
1. Is it proper to send gifts to the mother of a new-born baby?
 2. Is it all right for an overnight guest to ask the hostess for an extra blanket?
 3. Is it necessary to write anything on the card that accompanies a wedding gift?
 4. What is a good thing to remember when playing bridge?
 5. When entertaining a house guest and an invitation is received to some social affair, is it permitted to ask the hostess for an invitation for the guest?
 6. Is it correct to eat frozen puddings with a fork or with a spoon?

ANSWERS

1. Yes. Friends, as a rule nowadays, send flowers to the mother and perhaps some dainty apparel for the baby—such things as a lace cap, a little sweater, or a pair of boots. This is not absolutely necessary, but it is considered nice.
2. Yes. This should be done by all means if insufficient covering has been provided.
3. No. The card is sufficient, as good wishes and congratulations are offered at the reception.
4. The words of one famous bridge authority: "Not everyone can play a faultless game; but everyone is certainly capable of the highest degree of etiquette and courtesy—and these two things go far towards making up for any lack of skill."
5. Yes, provided the entertainment is general enough to make this acceptable to the hostess.
6. With a fork.

Store Up Steam In Accumulators

British War Factories Have Saved Thousands of Tons of Fuel

Thousands of tons of fuel have been saved in Britain's war factories by storing steam in accumulators during air raids. Although factories do not shut down merely on getting the "alert," they have to do so when the roof spotters signal that the raiders are overhead.

But instead of the boilers blowing off their steam into the air when work stops, the steam is generated into the accumulators and stored, to be used when the raiders have passed.

More than a thousand of these accumulators have now been installed in iron and steel works, sugar refineries, breweries, dairies, dyeworks and laundries. All set on the same principle—the storage of energy during off-peak periods, and the calling into action of this steam when production requires it.

In one sugar refinery the installation of a steam accumulator raised production by 12 per cent, and lowered coal consumption by about 7 per cent. In a dairy the time taken to produce condensed milk was reduced by 20 to 25 per cent, while in a brewery 16 per cent of the coal was saved. Output in a laundry was increased by 10 per cent after installing an accumulator, and the boiler efficiency of a dyeworks was improved from 66 to 74 per cent.

Britain has the largest steam accumulators in the world, their steel shells being 14 feet 9 inches in diameter by 83 feet long and weighing approximately 500 tons.

Need 20,000 Pupils For Ontario Farms

Twenty thousand Ontario secondary school students will be needed to work on farms in the holiday season, A. McLaren, Farm Service Director, said recently.

Students from twelve years of age up are being registered for farm help, he said. Camps were being established for girls from sixteen to nineteen who will be paid a minimum of 22½ cents an hour for farm work and in such areas as the Niagara Peninsula where piece work prevails the minimum must come up to this hourly rate.

Boys would be paid \$20 for the first month they work if they are inexperienced and \$25 if they worked on farms last year. For the remainder of their employment, their salary will be settled between themselves and their employers, Mr. McLaren said.

FARYON GOES TO QUAKER OATS

REG. R. FARYON
Reg. R. Faryon, formerly president of Lord & Thomas of Canada Ltd., has been appointed vice-president and general manager for Canada of Quaker Oats Company. Canadian-born, Mr. Faryon has had long agency association with the company. For the past two years he has been with the parent agency in Chicago as vice-president.

Norway's Clergymen Tender Resignations

All clergymen in Norway have handed in their resignations to the Ministry for Church and Education in Premier Vidkun's Quisling's government, the Oslo newspaper said.

A long message was read on Easter Sunday in every Norwegian church giving reasons for the mass resignations, the story added.

The clergy recently has been in conflict with the Nazi-controlled Quisling regime over youth control and other matters.

The PAIN of RHEUMATISM Relieved

75c Package FREE

Write to The PAIN-X Co., P.O. Box 97, Station F, Toronto.

Have You Heard?

The small daughter sat watching her mother making up her face, no doubt wondering what it was all about. When it came to the time for the application of the lipstick the small girl could contain herself no longer.

"What do you put all that on your face for, Mummy?" she asked.

"Mummy puts it on to make her look pretty," came the reply.

"Then why doesn't it?" asked the small girl innocently.

And there was the Indian rope trick performer who was discharged from the navy because every time he climbed the rigging he disappeared.

A Hollywood actress was shredding a reputation at a night club. She stopped back-biting long enough to order a chicken sandwich and a glass of milk.

"Wouldn't you," asked a friend of the victim, "prefer the milk in a saucer?"

"What are seasoned troops?" asked the bright young thing on her first visit to an army camp. To which the new recruit replied: "Oh, they are mustered by the sergeant and peppered by the enemy."

Teacher: "Tommy, why is your composition on milk only half a page when I asked for two pages?"

Tommy: "Well, you see, I wrote about condensed milk."

The teacher was explaining the meaning of the word "recuperate" to young Tommy.

"When your father has been working hard all day, he is tired and worn out, isn't he?"

"Yes, miss."

"Then, when night comes and his work is over, what does he do?"

"That's what mother wants to know," Tommy replied.

Man: Whatcha cryin' for?
Boy: I lost my nickel.
Man: Where?
Boy: In Virginia.
Man: How come?
Boy: She swallowed it.

JUST RUB IN MINARD'S "KING OF PAIN" LINIMENT

Relieves MONTHLY FEMALE PAIN

Women who suffer pain of irregular periods with cranky nervousness—due to monthly functional disturbances—should get Lydia E. Pinkham's Vegetable Compound Tablets (with added iron) very effective to relieve such distress. Pinkham's Tablets made especially for women help build up resistance against such annoying symptoms. Follow label directions. Made in Canada.

HOW CAN I?

Q. How can I give a creamy appearance to chocolate frosting?
A. Add a tablespoon of corn-starch or flour to each cup of sugar used in the chocolate cake frosting, which will give it a creamy, smooth appearance; nor will it crumble when the cake is cut.

Q. How can I make a good supper dish that can be quickly prepared in an emergency?

A. Slice cold boiled ham thick enough so that it will not break apart when handled. Spread mustard on each piece and then place in it a tablespoon of baked beans. Roll and fasten with toothpicks, then bake for ten minutes in hot oven.

Q. How can I make the carpet sweeper more efficient?

A. When cleaning the carpet sweeper, remove the brush and after taking off all hair and lint, rub it well with a cloth wet in kerosene. Let the brush remain in the air until the odor has evaporated.

Q. How can I dry bed clothing if water has been spilled on it when attending someone who is ill?

A. It can be very quickly dried by slipping a hot water bag filled with very hot water between the covers over the wet spot.

Q. How can I make it easy to find the electric light switch at night?

A. Touch the electric light buttons with a little luminous paint, and they will easily be seen in the darkness.

What Science Is Doing

Hungry people live longest—if they are not too hungry, Edwin Teale writes in Popular Science Monthly. A diet that contains all essentials in reduced quantities is, next to long-lived ancestors, the greatest aid to longevity. This is the conclusion of eight years of pioneer experiments with more than 2,500 white rats by Dr. Clive M. McCay, working under a grant of the Rockefeller Foundation at Cornell University.

White rats react to diet in the same manner as humans. Roughly ten days in the life of a rat is

Picobac

HANDY POCKET POUCH - 15¢

also packed in pocket cans

"IT DOES TASTE GOOD IN A PIPE!"

GROWN IN SUNNY, SOUTHERN ONTARIO

equal to one year in the life of a man. All the rats were fed a basal diet, but those receiving only half rations lived longest. The reduced diet slowed down bodily activities. There were fewer white corpuscles in the blood stream, and the animals' hearts beat only three hundred times a minute instead of the four hundred beats of the well-fed rat.

Living more slowly, saving energy, they lived longer. The Methylsulphur of the laboratory was an underfed rodent with a life span of 1,430 days—proportionately 148 years for a man.

To find if excess in one kind of food shortened life more than excess in other kinds, Dr. McCay fed one group of middle-age rats excess sugar, another starch, a third whole-milk powder, and a fourth liver. All four over-fed groups lived approximately the same length of time. All died much sooner than they would have if they had continued on short rations. Over eating, no matter what, works against a long life.

Dr. McCay could find no "longevity foods". Nor could he find that a high protein diet shortened the span of life. He thus sums up his findings: "Eat what you ought to eat first; then eat what you want to eat—but not too much of it."

EVEN IF YOUR CORN IS AS TOUGH AS A TANK

Cress SALVE will knock it out, root and all

Glass Is Delivered Despite Nazi Subs

Two torpedoes failed to bar blue glass from Britain from reaching St. Paul's Episcopal Church, for a memorial window. The first ship carrying the glass was torpedoed in the Atlantic, but was beached and the cargo was saved. The glass was reloaded on a second vessel, which was torpedoed. The process was repeated with a third, and the glass was delivered—the packing case still wet and labelled "Great Britain Delivers the Goods."

John Duff, wood, to No. 2 and No. 6..... 84 00

Motion by Comm. Stewart that the Sec. Treas. advise for teachers in the Huntington Gleaner.

A petition was presented from 4 parents in No. 6 district.

Motion by Comm. Beattie that Rev. Mr. McGibbon be appointed deputy examiner for No. 9 exams.

Motion by Comm. Walsh that the application of Miss Maude A. Hauver be accepted for No. 1 School and the application of Miss Mabel E. Nourse for No. 6 School.

Motion by Comm. Stewart that we do not hold our regular meeting in May.

On motion of Comm. Beattie the meeting adjourned.

H. I. SMITH,
Secretary-Treasurer

Wartime Prices and Trade Board Notes

Careful housewives who do their own canning and preserving and thus help to conserve metal and glass for essential war industries came into their own when S. R. Noele, Sugar Administrator, Wartime Prices and Trade Board, announced easement of sugar rationing for jam making and preserving.

In addition to the amount of sugar allowed for ordinary purposes purchases of sugar for putting up jellies and jam from fruit are allowed on the basis of one pound of sugar for every two pounds of fruit to be canned or preserved at home in light syrup. For jam or jelly sugar may be bought in the ration of three parts of sugar to four parts of fruit or juice.

Burlap, for civilian use, is now restricted to bags for agricultural products salt, chemicals, wool, fish meal and the packing of beef, bacon and frozen fish for export overseas.

Pulpwood contracts made in the Province of Quebec must be submitted to the Timber Administrator, Wartime Prices and Trade Board, in order to be valid. Since this order was made last January it has been found that many contracts are not being sent in.

The order applies to farmers or other persons offering to sell pulpwood as well as the large corporations. It reads, in part, "The terms of every agreement or commitment for the sale, supply or delivery of pulpwood of spruce, balsam, jack pine or poplar, either in the form of pulpwood or logs... must be submitted to the Timber Administrator and approved by him". Without this approval contracts are not valid and binding.

To cover waste in potato storage from sprouting, rotting and shrinkage the Wartime Prices and Trade Board has announced an adjustment in the price ceiling to permit a maximum increase of five cents per bushel in April, 10 cents per bushel in May, 15 cents per bushel in June. Only these three months are covered by the order.

This constitutes a recognition of a seasonal price movement without removing the ceiling established by the Board on March 7th.

Although many announcements have been made of the scope of the restrictions laid upon the purchase of new automobile tires offices of the Wartime Prices and Trade Board report that many dealers are puzzled as to what to do.

Dealers have been asking if they may sell new tires to tourists from the United States, undertakers, clergymen, bailiffs, blacksmiths, highway engineers, threshing machine operators and a host of other "special classifications."

In most cases the answer is "No." Complete information on rubber tires, rubber products in fact, all regulations is available at the nearest office of the Wartime Prices and Trade Board or from the Airdred Building at Montreal.

WANTED

Owing to war conditions we may require some female workers in our plant. We are therefore open to receive applications from willing workers.

SHAWVILLE CREAMERY

YOUR SCRAP RUBBER

is now a vital war material

Enemy action in the Far East has caused such an acute shortage of rubber that our whole war effort is in serious danger. Canada and her Allies must have rubber, *quickly*, for the armed forces, for factories, for ships. The Japanese control our source of crude rubber imports—the *only* other quickly available supply is old scrap rubber, which can be reclaimed. Every citizen in Canada must do his part in collecting all the scrap rubber in the country and turning it over to the Government for war purposes. Here is how to do it.

THIS IS AN URGENT APPEAL FOR YOUR HELP

Question: Is the rubber situation really serious?

Answer: The shortage of rubber is so grave that any citizen hoarding rubber or using it unnecessarily is committing an act of disloyalty. It is now illegal to destroy any rubber article.

Question: Of what use is reclaimed rubber?

Answer: Old rubber is processed so that the rubber content is reclaimed. This reclaimed rubber is used in the manufacture of essential articles for our war effort, thus replacing crude rubber.

Question: How much scrap rubber is needed?

Answer: Fifty Million Pounds. This is a large quantity, but it **MUST** be found. Every old piece of rubber in Canada, no matter how small, is needed, **QUICKLY**.

Question: Should I turn in any usable rubber articles as well as worn out ones?

Answer: Absolutely not! By no means discard anything that is still useful and that might have to be replaced. On the other hand, rubber tires used as boat bumpers, swings, etc., should be turned in for war uses.

HOW DO I TURN IN MY SCRAP RUBBER?

The school boys and girls of Canada are being organized, through the school authorities, to act as Official Collectors of Scrap Rubber. The school nearest you is, therefore, your best Collection Depot. You may dispose of your scrap rubber in any one of the following four ways:

When you gather up your scrap rubber and dispose of it by one of these methods, it will be used by the Government for Canada's War Effort. Do it NOW!

Department of Munitions and Supply
SCRAP RUBBER DIVISION ROYAL BANK BUILDING, TORONTO

This advertisement is issued in co-operation with
The National Salvage Campaign, Department of National War Services

Question: What kind of scrap rubber is needed?

Answer: Every all-rubber or part-rubber article must be salvaged. Here are a few of the articles you must turn in:

Old Tires of every kind Rubbers
Old Inner Tubes Overshoes
Rubber Boots, Hats, Coats, Aprons, Pants,
Gloves, Tubing, Matting, Toys
Sport Shoes (crepe soles are especially good)
Garden Hose Hot Water Bottles Stair Treads
Bathing Caps and many other articles

Question: What happens to the scrap rubber collected?

Answer: The scrap is sorted, baled and assembled into carload lots and is then purchased by the Government at fixed prices throughout Canada. The Government pays forwarding transportation charges on these carload lots, and is responsible for their allocation. You may be sure that every pound will be used directly or indirectly in the war effort.

Question: How do I go about saving scrap rubber?

Answer: Start hunting for it TODAY. Clean out your cellars, attics, garages and sheds right away. You will find more rubber articles than you expect. Start them all on their way to the battlefield.

HOW DO I TURN IN MY SCRAP RUBBER?

1. Give it to the children for their school collection.
2. Give it to your local National Salvage Committee.
3. Leave it with any Service Station or Tire Dealer where you see the sign; "Voluntary Scrap Rubber Receiving Depot."
4. Sell it to a junk collector.

Tenders For Coal And Coke

Federal Bldgs.—Province of Quebec Sealed tenders addressed to the undersigned and endorsed, "Tender for Coal, Province of Quebec", will be received until 3 00 p. m. (E. D. S. T.), Wednesday, May 13, 1942, for the supply of coal and coke for the Dominion Buildings in the Province of Quebec, EXCEPT MONTREAL, P. Q.

Forms of tender with specifications and conditions attached can be obtained from the Chief Purchasing Agent, Department of Public Works, Ottawa; from Mr. Roland Simard, Supervising Architect, 150 St. Paul St. West, Montreal; and from Mr. J. A. Drolet, Architect, Public Works Department, Customs Building, Quebec P. Q.

Tenders should be made on the forms supplied by the Department and in accordance with departmental specifications and conditions attached thereto. Coal dealers' licence numbers must be given when tendering.

The Department reserves the right to demand from any successful tenderer, before awarding the order, a security deposit in the form of a certified cheque on a chartered bank in Canada, made payable to the order of the Honourable Minister of Public Works, equal to 10 per cent of the amount of the tender, or Bearer Bonds of the Dominion of Canada or of the Canadian National Railway Company and its constituent companies unconditionally guaranteed as to principal and interest by the Dominion of Canada, or the aforementioned bonds and a certified cheque, if required to make up an odd amount. Such security will serve to guarantee the proper fulfilment of the contract.

By order,
J. M. SOMERVILLE,
Secretary,
Department of Public Works,
Ottawa, April 24, 1942.

Teachers Wanted

Protestant Teachers holding Elementary Diploma for Masham Schools Nos. 1 to 3, for term 1942-43 duties to commence September 1. Applicants please state salary expected. Apply to
JOS. NESBITT,

Could you do this with your present cream separator?

YOU WOULD BE PERFECTLY SAFE WITH A Renfrew

Of course, you wouldn't operate your separator in the best room of the house. This is just to impress you with the absolute cleanliness of a Renfrew. No splashing of oil—no greasy, insanitary, fly-attracting mixture of oil and milk, making a mess of both machine and floor. The oil necessary to the operation of a Renfrew goes in at the top and remains inside until it is time to change it.

This is only one outstanding feature of the Renfrew Separator. Others include the low supply tank, ease of operation, close skimming—and highest quality and performance at a reasonable price. You can buy your Renfrew from the man you know—Renfrew's own representative in your neighborhood. He is responsible to you and we stand behind him and all the Renfrew products he sells.

VOICE OF THE PRESS

WORK WITH FEAR OF DEVIL
It would be an excellent thing if every Canadian were to cut out and place in a prominent position in his home or office Mr. Gordon's declaration that total war will remain for most of us an empty platitude "until we are seized with the sense of terrible urgency, until we all go to work with the fear of the devil himself driving us forward; until we are ready to sacrifice in the flame of a true understanding patriotism all the selfish advantages of class, position and property. Until that time, until we and the other democracies who are still in the fight do that, we shall neither deserve nor achieve the victory that we so confidently assume must be ours."
—Montreal Star

BRITONS AT WORK
Almost half of Great Britain's 45,000,000 people are either in the armed forces or working on munitions; her war production now equals that of Germany; her construction of new naval tonnage is four times that of pre-war days; she is building merchant ships at the rate of 1,100,000 tons a year, and the Royal Air Force now exceeds Germany's both in size and quality. John Bull is sweating, but he is far from exhausted.
—Hamilton Spectator

LAMENT
"A spirit of defeatism has swept over part of the country since razor blade rationing bobbed up among the restrictions that now are being applied or projected. Men who since the start of the war have been fancying themselves as the backbone of the nation are succumbing to a wave of mental depression, and already are mumbling some brave nothings through their anticipated whiskers."
—Windsor Star

ONE RAY OF HOPE
An aviation expert says that neither side in this conflict can build warships as fast as aviation can destroy them from the skies. Looks as if the day of the great navies is gone. The encouraging part of it is that no country in the world can build planes as fast as the United States when it gets going.
—Chatham News

LAUNDRY LANGUAGE
"They say Chinese laundrymen on the West coast, north and south, have adopted a scorched shirt policy towards their Japanese customers."
—Woodstock Sentinel-Review

COMPLICATIONS
Any incursion of Japs in India would merely complicate the caste system, as a place would have to be found below the untouchables for the unpeepables.
—Stratford Beacon-Herald

SPRING TIPS
Labeling the garden helps you to remember what it is that isn't coming up.
—Ottawa Citizen

In The Garden

By GORDON L. SMITH

Big Vegetable Garden
A good big vegetable garden is both patriotic and commonsense in wartime. Provided he is willing to devote all his spare time to it, one person can handle a quarter acre of vegetable garden and grow more than enough vegetables to keep a family the year round. But a quarter of an acre is a big garden.

As a matter of fact, all experienced gardeners advocate a small, well cultivated plot in preference to one larger and receiving less care. If the original digging is followed promptly and regularly with from two to four thorough cultivations, about a week to ten days apart, the weeds will get discouraged.

Leave Wet Soil Alone
Nothing is to be gained from working soil before it is ready. In wet with heavy ground, according to garden authorities, too early digging is about the worst possible thing one can do. Not only is it a messy job, in the first place, but the sticky clay is quite likely to bake later into hard lumps, suitable perhaps for temporary building material, but not for growing flowers and vegetables.

One should curb the natural impulse to be out digging in early Spring and wait until the surface water has completely disappeared and one can walk and work in the garden without getting the shoes muddy. When the soil reaches this stage it is fit to work, and not before. Good garden soil in the right working condition crumbles and breaks into fine, tiny pieces; it does not pack into lumps.

WHO SAID WE WOODEN HAVE BIKES?

Two Los Angeles youngsters demonstrate a bicycle built of wood to meet the shortage of bikes. Three metal bolts hold the vehicle together and it runs on tires of reclaimed rubber.

A Weekly Column About This and That in The Canadian Army

Well, when Col. Ralston got back to Ottawa recently and announced the formation of groups of "Rangers" on the Pacific Coast he rather changed the complexion of this column. Or, perhaps it would be more truthful to say that he set this columnist's thinking working in a new and less circumscribed channel.

The Individual Citizen's Army today isn't all uniformed in khaki. It consists of—or should consist of—all of us.

A year ago last Christmas His Majesty, King George, said, "We are all in the front line." At that time, I'm afraid, most of us thought of that statement as being applied to the citizens of Great Britain. Somewhat complacently, too, we laid the flattering unction to our souls that the King also included our little purchase of War Savings Certificates and Victory Bonds as our front line contribution.

Today there are many branches of the Individual Citizen's Army in which all of us may serve in one way or another: men, women and children; old soldiers, young soldiers, men who are exempt from military service.

I don't like that term, "exempt from military service." Not one of us is, or can be, exempt. So, for the purpose of this column let's translate the phrase to mean, "exempt from legal compulsion to serve."

To follow the biblical injunction that, "the last shall be first," let's look at the opportunities for service offering themselves to old soldiers, young soldiers and the legally exempt. For them the Reserve Army offers the ideal opportunity to serve in two ways—as a soldier preparing himself for home defence if that should become necessary, and, you heard what Prime Minister King said on the radio,—as a producing citizen continuing his ordinary tasks.

No need to go into detail about this—it has all been in the daily papers recently—but there is no doubt that once the new set-up gets well under way the men who jump at the opportunity of spending 45 evenings, 10 week-ends and 15 days (in camp) learning the ways of a modern army will have an interesting and useful spare time occupation that will stand them in good stead if it has to become a full time job.

"Sam" Browne, usually known in print as Major-General E. W. Browne, D.S.O., M.C., has been named commander of the Reserve Army and he has had a long ac-

quaintance with the problems of a part time militia. In peace time that is a heart-breaking job—it will be simpler now that authority has been given to equip the Reserve Army with modern guns, weapons, equipment and training facilities.

You know the classes who are eligible? Let's repeat them. Men between 35 and 50, men between 17 and 19 who will thus be able to fit themselves for active service before they reach service age and men who are not subject to conscription by reason of their occupations or for other legitimate reasons.

Before this column gets too long let's look briefly at the expansion of the Individual Citizen's Army. This is an army now in which abstention from buying another pair of shoes if half-soles will do is the equivalent of a clip of machine-gun bullets. It is an army we all belong to and in which we can all fight.

It is an army that trains us all to do all we can for the defence of our country or for attack on the Axis.

It is an army in which the physical training necessitated by doffing an elastic girdle will result in a stronger race of women who will be ready for any tasks war may impose as well as the conservation of rubber for war purposes.

Not very romantic? War hasn't been romantic since the days of knights in armour—and if we knew the truth it probably wasn't very romantic then.

Solves Gas Problem

Bill Pinch, Hardgrave Mountain farmer, has a solution to gasoline rationing. It's his four-year-old steer, "Bossy," which he hitches to an old-time buggy for the five-mile trip to town.

When someone commented on the slowness of the rig, Bill replied, "Bossy" just acts sedate in town. You should see him on the way home. He does a good five miles an hour."

Nazis To Conscript Greeks For Service

All males in Greece between the ages of 16 and 60 are liable to compulsory military or other service for the German authorities, an Exchange Telegraph said in a dispatch from the British island of Cyprus in the Eastern Mediterranean.

DESTROYER RATING

by Wm. Howard Pugsley

Our destroyer carries a proud ship's company.

They have a right to be proud. A year ago a torpedo ripped into the forward part of the ship's hull, blowing away the bow, but her crew kept the ship afloat and brought her safely into port where the damage could be repaired.

Then she went back to her convoy job.

Recently, this same destroyer ran into a hurricane while homeward bound. Battered and leaking, her boats smashed and her life-rafts gone, short of provisions and fuel, and her crew exhausted, she still came through and steamed smartly into her base port.

Not a man had been lost overboard in the storm, nor even anyone seriously injured.

How many of our O.D.'s (ordinary seamen) newly come to the ship and for whom this had been their first introduction to the real meaning of life at sea, how many of them longed for a draft on shore after this experience? Not one.

The complement of a destroyer is about three times that of a corvette or minesweeper. We carried eight officers and one hundred and sixty-six ratings.

Most of the O.D.'s were new in our ship. During the shore refit, many of the old crew, now rated A.B.'s (able-bodied seamen) had been drafted off, some to leave with their experience the crews of new ships just commissioning, others to take courses to qualify for higher specialist ratings.

As replacements, a flock of "jeeps", ordinary seamen who had just finished their shore trimming, had been drafted aboard.

All of these lads were young, keen, willing, enthusiastic, hard-working and ready for anything. Never, even under the most trying circumstances—of which there were many—were they anything but cheerful.

The "fore lower" is where you begin your life at sea in a destroyer. As it is so far forward and so far down in the hull, the motion of the ship is very pronounced.

Because this location is so un-"de luxe", it is reserved for the least important of all ratings, the O.D.'s. When you've done your nine months, (including the four month-sea-time), and can pass professionally in the things a seaman must know, you too will be rated "A.B.", and graduate to the more spacious upper mess deck.

When I first went on board, I, too, was assigned to the "fore lower", being an ordinary seaman.

The first ten days after I joined the ship were spent in harbor. During this period we worked about the ship in the morning and afternoons, and were allowed ashore two or three nights out of four, depending on how the watches were being run. We turned out each morning at 6.30, lashed and stowed hammocks, sat down to breakfast at seven, and fell in for work at eight.

All the seamen ratings, that is those who worked principally on the upper deck, then mustered in the waist of the ship, along the port and starboard sides.

The "Buffer"—a petty officer whose official status was that of Bos'n's Mate—mounted the walkway over the torpedo tubes, called us to attention and reported us all present to the First Lieutenant, who then gave the Buffer any special instructions he might have regarding work he wanted done.

Make no mistake, they could always find something for you to do, and when you had done it you were supposed to come back and ask for more. Otherwise you were liable to be "run in" on a charge of "skulking", that is, not working.

Other ships, then on convoy assignments, frequently did a month or more at sea, broken only by a day on one side refueling and at most three to four days in port at the other

Says Mr. Charles Elclair, Arvida, Quebec: "KELLOGG'S ALL-BRAN has long been a favorite in our home. Mother used to serve it to us when we were young... and since my wife started making ALL-BRAN muffins three or four times a week and serving ALL-BRAN as a breakfast cereal, we have had no more use for pills or powders. ALL-BRAN keeps us regular... naturally." Why don't you try ALL-BRAN'S "Better Way" to correct the cause if you are troubled by constipation due to lack of the right kind of "bulk" in your diet? But remember, ALL-BRAN doesn't work like harsh cathartics. It takes time. Eat it regularly and drink plenty of water. Get ALL-BRAN at your grocer's, in two convenient size packages, or ask for the individual serving package at restaurants. Made by Kellogg's in London, Canada.

THE WAR - WEEK — Commentary on Current Events

British Mission To India Fails Nazi Demands Reinstate Laval

Indian leaders rejected Great Britain's plan for self-rule and co-operation in the war effort. The plan brought from England by Sir Stafford Cripps met its defeat on the question of India's defence. Great Britain contended that this responsibility should rest in experienced British hands; the all-Indian Congress leaders held that the responsibility was India's.

United Against Invaders
It is considered that, although Sir Stafford Cripps' mission to India has failed in its main objective, its work has not been wasted. The discussions which were held drew together the various units of India, and their leaders expressed determination to resist "to the death" the invasion that appeared imminent. Volunteers rushed to join the armed services and work in Indian munition plants and shipbuilding yards was speeded up.

Even Mohandas Gandhi, arch-Pacifist, pledged himself to complete passive resistance against the Japanese and said: "I and my followers will refuse any help, even water, for the Japanese even if it should cost us our lives."

Importance of India
Great Britain may make a new declaration of Indian policy soon in the hope of getting India fully aroused to the danger of the Japanese menace. For the United Nations the loss of India would mean the collapse of their defenses throughout the Far East; for Japan a land road would be opened to a possible juncture with Germany in the Middle East.

India is vital to the United Nations: (1) as a barrier to the westward march of the Japanese, and (2) as a growing source of war supplies and vast manpower. Without India the war may well be prolonged for years.

Epic of Bataan
The whole world of free men will join in paying tribute to the magnificent stand made by American and Filipino troops in the Philippine Islands. They have written a chapter of stubborn heroism that will never be forgotten.

The delaying action in the Philippines has been of the utmost importance to the Allies and may have altered the whole course of the Pacific War. It has kept a large force of Japanese assault troops tied up which might have been used for striking at Australia before the defenses there were ready.

But the fall of Bataan means that now the enemy will be able to divert a large body of troops to the Battle of Burma and to the projected attack on India. The Japanese position is thus materially improved and is further

strengthened by the British loss of two battle cruisers and an aircraft carrier off India's East Coast.

Laval Reinstated
The sudden dramatic shift that brings Pierrri Laval back into power as "Chief of the Government of France," can only mean, according to the New York Times, that Hitler is through with halfway measures and ready to take personal command. Petain remains as "Chief of State," but there cannot be much doubt that he now becomes a figurehead. Laval is a traitor to France and is Hitler's creature and his accession to power is the opening signal for Hitler's Spring offensive.

Hitler is about to make a supreme effort to win the war in an all-out drive for victory, and for that drive he must have all the power he can muster among the conquered nations of Europe. He evidently expects to get from Laval that aid which Petain had refused to give.

Game With France Ended
Hitler's long and cruel game of cat-and-mouse with France is ended. For nearly two years—with intrigue, bribery, cajolery, displays of German military power—Hitler has sought to win over the people of France. In that effort he has failed and failed so utterly that in order to achieve his will in France he has put into power a renegade Frenchman who is hated and despised by his own countrymen. The proof is clear that France has rejected Hitler.

U. S. Attitude
It will become necessary now for the government of the United States to consider whether it will still attempt to maintain relations with Petain's successor or whether it will break off those relations. Much is at stake. Not only is the status of the French fleet and French bases uncertain, but there would be deep concern if France should turn over Madagascar to the Japanese and permit the use of her colonial bases by Axis submarines.

French Control Gone
With Hitler's new agent in power it becomes impossible to believe that any part of continental France will remain under the effective control of French authorities. No one can be better aware of this than the great masses of the French people, the Times says.

Through two long years of bitter misery and immense danger they have rejected Hitler's advances, only to have Hitler's creature forced upon them in the end. That they hope passionately for Hitler's destruction we may be sure. That we shall fight until we have achieved his destruction they may be certain.

current throughout Canada and will depict Canada's war effort and the contribution being made by this country to the cause of the United Nations," Hon. W. P. Mulock, Postmaster-General, said.

The new stamps are expected to be available sometime in July but Post Office officials meantime ask that philatelists refrain from sending in requests for them.

Details of the designs will be announced shortly, officials said. Some of the stamps, it is understood, will bear new portraits of King George, in uniform. Others will be pictures illustrative of various phases of Canada's part in the war.

● SERIAL STORY

ANOTHER MAN'S WIFE

BY DONNA ASHWORTH

LAST WEEK—At last Lita makes her decision. She tells Jerry. He tries to show her that she is just infatuated, that she will go over loving Ken, but she refuses to believe him. When it does end, Jerry promises, she will call for him and he'll come, not because he wants to, but because he loves her. Jerry leaves, Ken calls. Lita tells him she is going to Reno.

LITA MEETS A RIVAL

CHAPTER V

Lita walked down Fifth Avenue that January morning. It hardly seemed possible that eight weeks could change life so completely, that the apartment in which she and Jerry had lived and had been so happy could be occupied by someone else, that Jerry could have another dancing partner, that she could have gone to Reno, and was now quite free.

She walked briskly. A cold wind whipped through her fur

coat though the sky was clear and the sun made the morning bright. The windows were filled with advance Spring clothes and bizarre hats. She looked at her own reflection in the windows as she passed—slim and straight, a jaunty fur hat that matched her coat at just exactly the right angle.

As she walked along she was thinking of Jerry, the past; then brought herself up with a start. She mustn't look back. She must look forward.

Sally Green was going to Farmington with her and pretend to be her aunt, because Ken had insisted she must have a chaperone. He had come up from Farmington to help select the furniture for the house Lita was going to rent. She was on her way to meet Sally now. They were to see about a new dress for Lita, then go by Ken's hotel. Ken had a business engagement which would keep him busy all morning, and in the afternoon they would begin shopping for furniture.

"I thought I'd come to meet you."

"Oh, Sally," Lita caught the hand of the plump, middle-aged woman who came up to her. "You certainly do look the part of my maiden aunt, with grey hair, dignified glasses, your motherly way. It's a good thing you can play character parts."

"Yes, Lita." She could feel Sally's disapproval. "I'll help you all I can. I guess I'd better begin calling you Ann now, because I might forget."

"You know I don't approve of this wild escapade, of your getting a divorce from Jerry, or your going down to this crazy little town and pretending that you are an entirely different sort of person from what you really are."

"Now, Sally, please! Please! You've gone over that a dozen times already. I know you don't approve of me, but you love me, and that's enough. Ken has everything planned perfectly. It can't possibly go wrong. It's a new adventure. And you'll adore Ken."

"I've heard that before, darling. I won't adore Ken. I don't even like him. He's a ladies' man with a flattering line and he falls for every new face. I know his type exactly. They're always rich, too rich for their own good, and they always paint the right pictures."

"But he's taking another man's wife. He's a thief. I have no use for him. But I'll put up with him, because you're in love with him."

"That's fine." Lita squeezed her arm. "And now back to Jerry. Have you seen him since I've been gone? Have you talked to him? How is he doing?"

"He's getting along," said Sally as they walked along. "He has been giving Ruth Eustace a terrific rush. I wouldn't be surprised if he married her."

The words left Lita cold. When she had thought about Jerry's remarriage herself, that had been one thing; but for other people to think about it was something else. She didn't like the idea. It couldn't be that she was jealous.

"Yes. She has everything—beauty, wealth, social position. Any man would be crazy who didn't marry her if he could," continued Sally. "And everybody knows she is crazy about Jerry."

"I guess you're right." Lita felt suddenly tired. "But he can't do anything for six months. He insisted the decrees would not be final for six months before I could get my divorce."

"Maybe he thought you would change your mind."

"No." Lita shook her head.

"I think he thought it would irritate Ken, knowing that he couldn't marry me, even if he wanted to. Jerry acted as if he hated Ken, but I can't imagine Jerry really hating anybody."

"I'm afraid you don't know Jerry." Sally halted abruptly.

"There he is in his new car. Isn't it a beauty? Ruth Eustace is with him."

Lita looked out in the traffic. Jerry and Ruth. Just what she had planned. Now that she saw it, it made her perfectly furious. She didn't count any more. She was out of Jerry's life. And he had turned right away to another woman. He hadn't meant what he had said about caring.

He wasn't hurt, even if he had pretended to be. Hurt! Loved her! Jerry hadn't known anything about love, really, not a love like hers and Ken's.

"Let's get a taxi and go on over to Ken's hotel," Lita suggested abruptly. "I don't feel like looking for new clothes."

They hailed a taxi. All at once she had to see Ken, to be reassured that she was doing the right thing. Last night she had been certain, with his kiss against her lips, but now she wasn't. She wanted him to tell her again that this was the only thing to do. She had to see him.

The taxi stopped. As she started to pay the driver, she saw a couple coming toward the hotel entrance. It was Ken and one of the most striking girls she had ever seen. A slim, straight, dark woman who walked with the haughty assurance of a queen. Her suit was black, with a fur throw about her shoulders. An arrogant black hat with a bright red feather was perched on her head. Both the strange girl and Ken were laughing, entirely oblivious of the passing crowd. Lita was sure Ken had not noticed her, waiting under the hotel canopy.

They stopped by a grey coupe parked at the curb. Ken opened the door for the girl. They talked a moment. Ken smiled. The girl had started the engine. Suddenly Ken pulled the door open and, leaning in, kissed the girl, then slammed the door and stood on the walk, smiling, as the car eased into the traffic.

Lita paid the taximan and turned toward the hotel.

"What's the matter, darling?" Sally was looking at her curiously. "You look as if you've seen a ghost."

"Nothing," she tried to laugh, "except that the man who just kissed the girl in the car good-bye was Ken."

"Ken!" She moved toward him.

"Oh Lita—Ann." He said the two words at once as he hurried toward her. "I hope I haven't kept you waiting."

"No, we only came a moment ago. And I'm dreadfully curious. I suppose the young lady was the 'business engagement' you had this morning." Her voice was cool. "Who was she?"

"Haven't I told you about her, Honey? That was Janet Carstairs—a girl I used to be engaged to."

DUET IN 1, 2, 3, 4 TIME

MAT INCL.

3494 SIZES 1, 2, 3 and 4

For Pre-School Tots

By Louise Lennox

For the kiddie who's learning to dress herself, clothes that button down the front are plenty helpful. This beruffled frock and its companion coat both feature the front-closing.

Style No. 3494 is designed for sizes 1, 2, 3 and 4 years. Size 2, 1½ yards of 36-inch fabric for dress; 1¼ yards 54-inch fabric for coat and hat.

Send twenty cents for pattern to Room 421, 73 Adelaide St. West, Toronto. Write your name, address and style number. Be sure to state size you wish.

THAT'S ATS

Women buglers of Britain's ATS (Auxiliary Territorial Service) parade through Hyde Park, London.

Britain Training Glider Regiment

A War Office announcement March 24 on formation of an Army Air Corps gave Britons a new hint that their military leaders have carefully laid plans for streamlined offensive action against the Axis.

This newest unit in the nation's striking force, which one day will be used to sweep the enemy from occupied territory, includes a regiment of glider pilots whose existence was disclosed in the announcement which said all air-borne troops are being brought under one command.

British glider troops have not been in action yet, but for some time have been in training. They are not to be confused with parachute troops which have been used twice—once in Italy and again recently when the radio location station was destroyed at Bruneval, France.

Together, glider troops and parachute troops will make a team hard to stop, observers predicted.

R.A.F. French Raid Major Tank Battle

The Air Ministry News Service said that the raids by British and Canadian bombers on the Renault and Matford motor works in France were the equivalent to destruction in battle of the entire equipment of five armored and mechanized divisions.

"In effect one of the major tank battles of the war has been won by the R.A.F. in about six hours at a cost of four bombers and 25 men," the service added. It declared this was "of immediate and paramount importance to the Allied armies on both the Russian and Libyan fronts."

The two factories were producing 70 motor trucks daily as well as many tanks and other vehicles for the Germans. This production was stopped, the service said, much of it for at least a year, some for the duration of the war because irreplaceable machine tools were destroyed.

Dutch Still Fight Japanese In Java

Two forces of considerable size still are battling the Japanese in Java, Lieutenant-Governor-General Hubertus Van Mook of the Netherlands East Indies told Gen. Douglas MacArthur.

The forces, under command of Generals Schilling and Pressman, are well supplied with food and munitions and should keep Japanese forces occupied for some time, Van Mook said.

The Netherlands official conferred at length with MacArthur on the role which the Indies are expected to play henceforth in the war in the Pacific.

Briton Invents "Shipwreck Suit"

A "shipwreck suit" is the latest British invention for saving seamen's lives.

It is made of a bright yellow rubberized material in two parts—combined trousers and over-shoes and a hood and coat. The coat sleeves are long enough to cover the hands, and slits in the trouser legs allow the limbs to be taken out easily for massage. The hood is used as a carrier for the complete outfit, which weighs 3 lbs., 6 ozs. It is to be worn in lifeboats or on rafts and its bright yellow color shows up the shipwrecked to rescue ships and aircraft.

The inventor is Thomas Metcalfe, O.B.E., who is administrative principal in charge of the lifesaving appliances of the Ministry of Transport. The electric light fitting now used for lifesaving waistcoats was also Mr. Metcalfe's idea: the light is clipped to the collar strap, and the watertight battery, lasting for 10 hours, is kept in a pocket.

Light and Tempting!

Lost appetites are found, and slow eaters speed-up, when tempting Christie's Premium Soda Crackers are served! That's because Christie's give most people more of the things they like in a cracker—tempting flavor, tender flakiness, dependable freshness. Serve Christie's Premium Soda Crackers with soups, salads, spreads—they're always sure to please.

TABLE TALKS

By SADIE B. CHAMBERS

Requests

I have had requests accumulating for quite some weeks; therefore we will make this week's column a request number, and hope that all of you will be able to use some of the recipes.

Apricot Bavarian Cream

- 1½ tablespoons gelatine
- ¼ cup cold water
- 1 cup boiling apricot juice
- ½ cup sugar
- Few grains salt
- ½ cup finely cut drained apricot pulp
- 1 teaspoon lemon juice
- 1 cup heavy cream
- ¼ cup drained canned crushed pineapple
- ½ cup slivered browned almonds

Soften the gelatine in cold water; add boiling apricot juice, salt and sugar; stir until sugar and gelatine are dissolved. Strain. Set aside to cool. Chill with occasional stirring until as thick as strained honey.

Prepare the apricot pulp; add lemon juice and pineapple. When gelatine mixture begins to set beat with an egg beater until frothy, then fold in prepared fruit, nuts and stiffly beaten cream. Pile lightly in dessert glasses or turn into wet moulds and chill until firm. Serve from dessert glasses or unmould on dessert plates.

Coffee Sponge

- 1 tablespoon granulated gelatine
- ¼ cup cold water
- 2 tablespoons lemon juice
- ¼ cup sugar
- ¼ teaspoon salt
- 2 egg whites
- 1½ cups strong boiled coffee

Soak gelatine in cold water and dissolve in hot coffee, add sugar, salt and lemon juice. Stir until sugar dissolves. Strain; then chill with occasional stirring until the mixture begins to thicken. Boil until frothy. Add egg whites; beat until stiff and continue beating until very well combined.

GOOD EATING NEWS

Tastiest, most tempting of all bread puddings is a new one made with bran, bread cubes and chips of semi-sweet chocolate. After the batter is mixed the remaining chips are sprinkled over the top and the whole business is baked. Served warm with cream or top milk it's a dessert to be remembered! Directions follow:

- 2 cups bread cubes, without crusts
- ¼ cup All-Bran
- 3 eggs
- ½ cup sugar
- ¼ teaspoon salt
- 3 cups milk
- 3 squares semi-sweet chocolate
- ½ teaspoon vanilla extract

Place bread and All-Bran in buttered baking dish. Cut chocolate into coarse pieces and sprinkle half of it over bread cubes. Beat eggs, add sugar, salt, milk and flavoring. Pour over bread; sprinkle remaining chocolate over top. Set baking dish in pan of hot water and bake in moderate oven (325°F.) for 1 hour.

Yield: 6 to 8 servings.

HELP CANADA KEEP FIT

MAN! HERE'S MY DISH!

Every man on Canada's "Factory Front" needs the kind of nourishment and food-energy found in whole wheat. In Nabisco Shredded Wheat you get 100% whole wheat, ready cooked, ready to eat, retaining the wheat germ, bran and minerals that nature puts into unmilld whole wheat. For a breakfast treat include two of these tasty, golden-brown biscuits, with milk.

THE CANADIAN SHREDDED WHEAT COMPANY, LTD. Niagara Falls, Canada

NABISCO SHREDDED WHEAT

CUT BAKING COSTS

1. PAY LESS
Calumet is priced surprisingly low, probably less than the baking powder you are now using.

2. USE LESS
Calumet's double-action means double leavening—during mixing and in the oven—permitting you to use less.

3. BETTER RESULTS
Calumet's continuous leavening means finer, better textured results for all your baking.

YOU SAVE ALL 3 WAYS WITH CALUMET BAKING POWDER

Under the War Measures Act CREAM CANS ARE CONTROLLED

BECAUSE OF METAL SHORTAGE a Cream Can famine exists. As a war measure the Government has passed a drastic law providing that:

- 1.—All creamery-owned cans not in current use must be promptly returned to the owners, regardless of condition.
- 2.—Nothing but milk or cream shall be put into cream cans.
- 3.—Cream must not be delivered to any creamery in a can belonging to another Creamery.
- 4.—Any producer-owned can must be promptly returned to the owner by the Creamery.
- 5.—All cans must be clearly identified.
- 6.—Penalty for infractions: a fine up to \$50 for first offence and up to \$100 for subsequent offences with provision for imprisonment for not less than a month.

IT'S NOW A NATIONAL NECESSITY
GET ALL CANS BACK TO THE OWNERS

How The Creameries Can Help

To comply with the new and drastic war measure regulation and to avoid confusion, creameries will help you get "stray" cans back to their owners. For this purpose creameries:

- 1.—Will accept "foreign" or "stray" cans and loan you one of their own for use in shipping to them only.
- 2.—Will promptly return these cans to the owners. (It is equally an offence for a creamery to hold or use other creameries' cans.)
- 3.—Will have rusty cans repaired and made serviceable again for future use.
- 4.—Will not continue to accept cream in any other Creamery's can.

We ask your full co-operation in this
Essential War Measure

FOR SALE—1 spring tooth harrow, 1 Frost and Wood disc harrow. Will exchange for one-year-old cattle or cedar fence posts. Apply to R. J. CUTHBERTSON, Maryland.

'Lincoln Also Spoke'

In Hanover, Pa., a shaft was recently unveiled of Mary Shaw. The name is unfamiliar to most persons, but to her belongs the distinction of being one of the very few persons who had the power of analysis to acclaim the Lincoln Gettysburg address a great speech.

While other reporters fell into the mistake of playing up the "orator of the day" and paraphrased a race track expression by adding, "President Lincoln also spoke," Mary Shaw, a reporter on the Hanover, Pa., Spectator, reported what Lincoln said, word for word.

Below her likeness is this inscription:

"Her firsthand report of Lincoln's Gettysburg Address bore witness to its greatness. In her account for the Hanover Spectator she garnered Lincoln's words from his own lips. She helped the world to long remember. Her fellow townsmen pay this belated tribute to her courage, enterprise and foresight that we may never forget."

Laps Up Blood

Some members of the bat family will eat fruit or bugs. In fact, the biggest bats in the world—the giant fruit bats of Java—have no interest in a blood diet. This is fortunate for the natives, for these bats measure three feet and more across their wings.

There is many a legend about the vampire bat, and not all of these tales are true. One persistent bit of lore is that the creature is a blood sucker. This is wrong. The vampire literally laps up blood with a tiny and amazingly efficient tongue. This tongue flicks back and forth at high speed when the flesh of the victim has been punctured and takes up the blood so fast that it seems the eating is done by sucking it up.

Labels Help Identify

A helpful idea in canning time is to label jelly glasses, fruit jars and other containers with the name of the contents and the date of preparation. Then it is always easy to identify and select whatever is wanted off the shelves.

One of the easiest ways is to hold the paper label on the jar with transparent adhesive tape which seals tightly at a touch of the finger and requires no moistening. This tape is transparent as glass so the label is easily read and is also protected against stain or dust. Tape and label are readily removed when desired.

Many housewives also label their storeroom shelves in the same way.

CARDS OF THANKS

Mr. Robert Little, and daughter, Leona, desire to express their sincere thanks to many friends and neighbours for many acts of kindness and beautiful floral tributes during their recent sad bereavement, in the death of their beloved wife and mother.

Your Hot Dog Hides

67 Separate Taxes!

When you're munching a hot dog, what do you think about? Probably whether you should have another. Certainly you don't open up your red-hot and start looking for hidden taxes. But an enterprising tax expert has done that for you—with surprising results!

Here's the dope on the tax problem as it relates to Coney Island red-hots: There are 67 separate taxes hidden in the average hot dog. And the foot-long bun the dog comes wrapped in has at least 53 tax payments milled and baked into it. The taxes, it seems, start with the farmer and continue adding up every step of the way from the producer to the consumer. The packing house, the retail butcher, two sets of supply houses, the railroads and the truckers all pay taxes that eventually are incorporated in the dog you love to eat. And a penny out of each nickel you pay, when you stand at the hot dog counter, goes to the tax collector, according to the expert.

What will you think about the next time you eat a hot dog? Well, probably just what you thought about before. That's why politicians prefer hidden taxes.

Report Proteins Used to

Build New Body Material

Successful test tube combination of amino acids, the so-called building blocks of protein, into more complicated body substances, has been reported at the Stanford university conference on protein research.

These amino acids were added to a solution containing a little salt and either some extract of the papaya fruit or of animal tissues. The result was the formation of a substance which was neither an amino acid nor a protein, but rather something in between.

This gives scientists a substantial "break" in the long-standing attempt to unravel the mysteries of proteins.

Animal and plant digestive systems break down their food into simple substances and rebuild them into the particular kinds of proteins needed in their tissues, but nobody ever has been able to duplicate this feat by laboratory methods.

Some amino acids have been put together by purely chemical means, but the results fell far short of being proteins.

New Egg Grading Station for Shawville, April 1st, 1942.

The Shawville Egg and Poultry Association has made arrangements to provide larger space, and more central location, in order to assist it in providing better service to more producers. The new station will be situated in the Show Room of Mr. J. P. Wilson, Centre Street.

The new grading station will be equipped with a modern cooling system, and the latest Egg Equipment and will be open for business on April 1st.

We hope our old customers will continue their patronage and we look forward to serving new ones, with pleasure.

ORLA YOUNG, Manager

HOLD HIGH THE TORCH OF FREEDOM

FUNDS AVAILABLE

FOR Increasing FOOD SUPPLIES

To increase food production for Great Britain and the Empire's armies many farmers are redoubling their customary strenuous efforts. It is not surprising if they have to borrow to help finance their increased task.

If you, a farmer, need credit for any constructive purpose, call on our nearest branch manager and tell him of your requirements. He understands farm problems and will co-operate with you as far as sound banking permits. Your business with the Bank will be held in strictest confidence.
