Shawville Fair Record-Breaking Event

Splendid Exhibit in all Departments
Large Crowd Both Days
Fine Program

—o—

Shawville Fair, the 77th annual exhibition of Pontiac Agricultural Society, held on Friday and Saturday of last week came off under ideal auspices, with a record breaking exhibit, large attendance, fine program, favourable weather conditions—in fact all the favours necessary for a successful outdoor event

Friday, as usual, was free day for children under 14 years of age, and a large number from far and near filed through the gates to enjoy the day's program, which was specially designed for their amusement.

Skies clearing about noon on Saturday attracted another very large crowd to the grounds, which included many former residents of the village and surrounding townships.

Main Hall

The Main Hall, which is the chief attraction for the ladies and the industrial and artfully inclined gentlemen, was filled although the absence of the elaborate exhibit of the Dominion Experimental Farm made a noted difference in the appearance of the ground floor. The central space held an extensive exhibit of the products of the Renfrew Machinery Company in charge of their Pontiac representative Mr. Herb Mitchem, To the right entering, Mr. Mitchem, local agent had also on display a large sap evaporator, manufactured by Small Bros., this was in charge of Mr. Edmonds, of Smiths Falls. The exhibit of electrical appliances by the Gatineau Power Co., occupied the next space, under the care of their local representative, Mr. Truman Lynch. A display of De Laval Cream Separators and Milking Machines was found in the next booth, which was in charge of Mr. Geo. Robitaille the local agent and the remaining mercantile space contained a fine showing of fur coats and wraps by Mr. N. D. Budd, of Renfrew. The horticultural section was well filled, a great increase being noted in the exhibit of grains which possibly over doubled that of last year. An increase was also observed in showing of potatoes and vine crops, such as cucumbers, squash and pumpkins.

Keen competition was very evident in the dairy compartment on the ground floor, which reflected greatly on the dexterity of the housewives of the town and district.

Ladies' Department

The lay-out on the second floor of the various articles of needle work, appeared to be as heavy as last year and the same may be said of the exhibits of paintings and taxidermy, while a slight decrease was noticed in the showing of plants and flowers.

The annex, with the colorful and attractive displays of the Woman's Institutes, was again the centre of much observation, each of the six booths being very attractively decorated and containing articles used in Pontiac's pioneer days. The remaining portion of this section of the building served as a tea room under the management of the Women's Institutes.

Horses

The various classes in the horse competition were filled almost to over-flowing in both the road and agricultural sections and a very remarkable improvement was noticed in the way the exhibitors—particularly in the heavier classes— had their animals groomed for the show ring, and it is doubtful if a Shawville show ring has ever presented finer types in the various breeds in the farm classes.

Cattle

Entry in the cattle department was far beyond the largest in the history of the Society and gave evidence that farmers in this community are gradually turning to the breeding of higher class stock. The Boy's and Girl's Calf Club had a classy exhibit of young animals in all the popular breeds, which reflected the interest that is being taken in pure bred stock by the members.

Sheep and Swine

A very remarkable increase in the showing of sheep and swine was noticed, all available space was insufficient to house the entries, Pens were divided and even at that some entries had to be judged on the waggons in which they came to the grounds.

Poultry

The poultry building was again crowded to capacity with an exceptionally splendid showing in the table and laying varieties and it was plainly seen that this community is going in for the breeding of higher class birds to a much greater extent and that more care is being taken in the choice of birds for show purposes.

Amusements

Midway attractions were more numerous than at any previous event and included everything from a six-legged lamb to a merry-go-round and ferris wheel, and all appeared to be getting a fair patronage. Each afternoon a one-legged acrobat performed in front of the grandstand.

A Pipe Band supplied music during both days.

Friday night a play "The Colonel's Maid" was presented in the Theatre by the Morewood Dramatic Club, under the auspices of the Society, which did not get the patronage it deserved owing, no doubt, to the fact that the various allurments on the midway were running wide open and that a round dance was being held under the auspices of the Society in Wilson's hall.

Sports

A fine program of athletic sports was run off on Friday afternoon. Most of the events were keenly contested and attracted the interest of a large audience. In the forenoon a soft ball match between Shawville girls and the girls of the surrounding district was staged, the locals winning by a score of 18 to 7, and in the afternoon Shawville went down to defeat to the base ball nine from Beachburg by a score of 5 to 3. On Saturday the sports program commenced with a base ball game between local junior teams and was followed by a lively soft ball attraction between Bryson and Shawville, the former taking the honors by a score of 12 to 11, and at three o'clock the base ball teams of Chapeau and Shawville took the diamond, the locals taking the decision by 12 to 7.

Track events included a Classified race, open to county horses, on Friday afternoon and on Saturday a 2.22 and a 2.14 class, was run off which attracted an extremely large crowd of exhibition visitors. Results of the race events will be found elsewhere in this issue.

The main dining hall was catered to and managed by the ladies of the community, under the auspices of the Society, and netted satisfactory financial returns.

Judges

HORSES— Society Class — Alex Bothwell, Lachute.
HORSES—Specials — W. P. Hurdman, Ottawa.
CATTLE—R. S. Hamer, Live Stock Branch, Ottawa.
SHEEP AND SWINE—F. F. Baird, Live Stock Br., Ottawa
POULTRY—Prof. W. A. Maw, Macdonald College.
DAIRY AND COOKING — Jos. Burgess, Live Stock Branch, Ottawa, and Mrs. Whiteman, Ottewa.
LADIES USEFUL AND FANCY AND WOMAN'S INSTITUTES DISPLAY—Mrs. Elliott and Mrs. Toply, Ottawa.

Prominent Visitors

Prominent Argiculturists and county representatives visiting the Fair were :—Dr. H. Barton, Deputy Minister of Agriculture ; Prof. Hamilton, Macdonald College ; R. M. Elliott, Chief Agron., Hull ; H. Robitaille, Poultry Promoter, Gatineau Point ; Robert Stewart, Supervisor of Calf Clubs; D. D. Gray, Exp Farm, Ottawa ; H. H. McElroy, Sect'y Ottawa Exhibition ; Bower Henry, Producers' Dairy ; Geo. J. Bryson, Ottawa ; Hon. Geo. Bryson, M. L. C., Ft. Coulonge ; Chas. Belec, M. P., Ft. Coulonge ; County Warden, H. McCann, Quyon, and County Sec.-Treas , Dr. H. T. Hurdman, Bryson.

Chicken Supper

A chicken supper and program will be held in the Austin Community Hall, on Thursday evening, October 5th. Admission 25 and 15 cents.

Mrs. Thomas Stark Dies at Vancouver, B. C.

The death occurred at the home of her daughter (Louisa) Mrs. K. E. Young, Vancouver, B. C., on August 31st, 1933, of an old Clarendon resident in the person of Margaret Lockard, wife of the late Thomas Stark, in her 78th year. She is survived by two sons and three daughters.

Service Announcements

Shawville United Churches

REV. A. F. FOKES, B.A., B.D., PASTOP

Sunday, Oct. 1st

11.00 a. m. Rally Service at Shawville.
1.30 p. m. Rally Service at Zion.
3.00 p. m. Rally Service at Starks Corners

Rally Day and Go-to-Church Sunday will be observed at all of the above services. Special printed order of services entitled, "Serving Jesus Today", in which both congregation and Sunday school will unite. Illustrated address by the Pastor on "Lifted or Dragged Down".

7.30 p. m. Monthly popular song-story-picture. The theme is to be "Mercy"; illustrated by two stories ; one from the "Life of Jesus", and the other from Shakespeare's "Merchant of Venice". These are illustrated by about 75 beautiful colored slides, many of them done in oils, and adding materially to the interest of the theme.

YARM UNITED CHURCH

PREACHING MISSION

REV. E. DARLINGTON, PASTOR

On Sunday evening begins in Yarm United Church a Preaching Mission held by the United ministers of the Pontiac section. The general theme for the meetings is to be "The Call of Jesus". The Pastor will preach on Sunday night, October 1st. The subjects and speakers for each night are to be :—

Monday : Rev. Geo. Goth, of Quyon, "Jesus is Calling".
Tuesday : Rev. F. W. Taylor, of Bristol, "Jesus Calls to Repentance".
Wednesday : Rev. C. C. Gilbert, of Ft. Coulonge, "He Calls to Surrender"
Thursday : Rev. A. F. Fokes, of Shawville, "He Calls to Service".
Ffiday : Rev. E. G. Warren, of Campbell's Bay, "He Calls to Sacrifice".
Sunday : Rev. E. Darlington, pastor, "How Shall We Answer the Call".

The whole community is invited to these services. Meetings are to begin at 7.30 p. m.

Lantern lecture on the Church in Canada

Shawville Decoration Service

On Sunday afternoon, a great crowd of people gathered in the cemetery at Shawville to join in the Memorial Service and decoration of the graves. The cemetery, part of which is the property of the Anglican Church and the other part the property of the United Church, was looking its very best, as for several days previously friends of those buried in the cemetery had been beautifying the various graves.

The choirs of the two churches led in the singing of appropriate hymns, accompanied by Messrs. Brome Fokes and Gordon Paul on saxophones and Mrs. E. Hodgins at the organ. Rev. A. F. Fokes of the United church read the scriptures and gave a brief address on "The Life Here" ; while Rev. T. E. R. Nurse, of St. Paul's Church, offered prayers and spoke on "The Life Hereafter." The offering received is to go towards the fund for further renovation of the cemetery, which was $53 68.

Much credit is due to the Woman's Institutes of Clarendon and Shawville for the excellent leadership they have given in cleaning up the cemetery and putting it in such excellent condition. They have employed all summer, Mr. John Story and there was to be heard on every hand high commendation of the work done; The fences have been painted, the underbrush and weeds cleared away, the grass kept cut ; and the cemetery has become an object of pride to the village. The committee will be glad to receive further donations so that the good work may go on, and these donations should be sent to the treasurer Dr. D. J. Campbell.

Dr. R. G. Docks, who has practiced dentistry in this county for the past nine years, and since 1929 in Campbell's Bay, takes his departure from the county town on Friday of this week to open an office in Montreal.

Gowling Business College *It's a good school.*

Smiling Service

"Service with a smile" may have been overdone as a slogan in some cases, but it's a mighty good one just the same. The store that is bright and cheerful and whose personnel from president to office boy is frendly, accommodating, optimistic, is the one more likely to win out—especially when general business conditions are not up to the mark and something more than ordinary merchandising is demanded.

We have never been able to understand, of course, why all businesses shouldn't be run in that way. It's much easier and much more pleasant to be cheerful and friendly than to take the opposite attitude. A smile costs nothing and usually means a lot. A cheerful, accommodating atmosphere is invaluable in practically every line of business. Why don't more people cultivate it?—Border Cities Star.

Can't Remember

We can't remember a girl of 20 marrying a man of 60 at all—rich, poor or anything else. In Ontario in 1931 there were 8,020 girls of 20 and under who married, and only four of them married a man in the 70-74 class. One boy under 18 married a woman of 38.—Toronto Star.

Not Basis of Patronage

There was only one passenger killed for every 3,000,000 carried on Canadian railways last year, according to the Dominion Bureau of Statistics. Obviously patronage of the railways is not determined by the attractions of safety.—Kingston Whig-Standard.

Music and Happiness

Perhaps nothing so brightens the day as the sound of band music in the streets or the parks. There is at once something stirring and soothing about open air band music, and those who have the public welfare at heart might well take time to consider its benefical effects, especially in times of business worry.

Those who come here from other lands miss the fine open air concerts. Even in one-time gay, now sad Vienna, the citizens end their Summer days by listening to lovely music in historic gardens. In defiance of the times, the Germanic peoples appeared to have retained a part of their faculty for happy living. Music and pleasant surroundings can do much to offset a day of stress.—Saskatoon Star-Phoenix.

Sign of Civilization

Millions of people in India watched in fear and trembling when they saw an eclipse of the sun. Of course they are not civilized like we are, otherwise they would have been around selling a two-cent bit of smoked glass for 15 cents.—Stratford Beacon-Herald.

Too Much Interest

Of a pedestrian who was struck by a motor car on Main Street the other day, it is stated that he was walking diagonally across the intersection, reading a newspaper. This is what comes of making newspapers so interesting.—Hamilton Spectator.

London and Rural England

Fred C. Kelly, a New York journalist, has been spending a holiday in Europe, and has this to say about London and rural England:

"Only a day in London this trip, and I spend most of the time just walking around taking in the rugged, substantial beauty of this grand city. Half the windows are filled with playthings for grown-up boys—saddles, bridles, fishing tackle, hunting outfits, and the best-looking shoes on earth. If I were vulgarly rich, I would come to London at least once a year just to buy shoes, shirts, and tweeds. It is a man's town. During a four-hour train ride from London to Hull, up toward Scotland, I haven't seen a rank weed, not one wire or board loose on a fence, not one fence post leaning out of line, and not a single eyesore of any kind. All England is kept like a neat little private estate."—St. Thomas Times-Journal.

Port Arthur Celery

A market gardener of this neighborhood has been sending celery to Sault Ste. Marie. Celery is another of those things which it was supposed this district could not grow. The day may come when many centres which obtained their supplies from Southern Michigan wil get them from here.—Port Arthur News-Chronicle.

The Return of Prosperity

Without wishing to indicate an exaggerated optimism, without being tempted to mistake wishes for realities, one can and one should recognize that there are many signs that business is picking up a little bit from day to day. Prosperity is not yet within our walls; but it is coming steadily towards us.—L'Etoile du Nord, Joliette.

Dangerous Kitchens

The kitchen doesn't ordinarily seem like a dangerous place—except perhaps, when a truly inexpert cook concocting indigestible dishes is hot and the cook doesn't wish to be disturbed.

But there were 28,000 deaths last year from accidents which took place in the homes of the United States and fully 34 per cent. of these occurred in kitchens. Falls and scalds seem to be the most prolific sources of home accidents. And while it is a bit difficult to see just how a safety code can be devised and enforced for the home, a little care and forethought in the midst of the daily round of activities ought to save a good many lives each year.—Chatham News.

On the Streets

Vancouver pedestrians may congratulate themselves upon having had at least one of their rights confirmed in court. A motorist has been fined for having failed to give a pedestrian the right of way on a crossing, as required by the traffic by-law. The by-law is quite specific on the question. Where the traffic at an intersection is not controlled by police officers or lights, the pedestrian has the right of way. Where the traffic is controlled, a pedestrian crossing or starting to cross in accordance with a signal has the right of way over all vehicles, including those making turns.—Vancouver Province.

THE EMPIRE

Kindred Spirits

The luncheon to the members of the Canadian Authors' Association will be remembered by the Scottish journalists perhaps as agreeably as by the Canadians for the Spirit of comradeship that prevailed.

"One touch of nature makes the whole world kin," but there is more than a touch of Scottish blood and sentiment in the majority of Canadians, who are still inspired by Scottish love of adventure, Scottish grit and Scottish history, romance and literature.

Dr. Howard Angus Kennedy struck the right note when he said that the story of Scottish explorers and discoverers in Canada would fill an Odyssey, and that of the humble Scottish pioneer settlers would provide an epic greater than the Odyssey and the Iliad combined. Whilst modesty forbade Canadian authors to dilate on the achievements of their intellect, imagination, and literature he declared that the quality of their celebrated wheat and apples was no higher than the quality of their best productions in poetry and prose.

Nova Scotia also has a link with Glasgow, which, too, has now been strengthened. A hundred years ago some Scottish heather, sent overseas, was planted and flourished wonderfully in Nova Scotian soil. Some of that heather was brought back last week to be planted in the Glasgow parks. May it take kindly to the soil of its progenitor!—Weekly Scotsman.

Conceited

I cannot tell you the best story I have heard this week. It concerns a well-known London actor who is so conceited that he bows whenever he hears a clap of thunder.—Critic in London New Statesman.

Rail and Road

It may be said that the gradual deflection from the rail to the road has now been arrested Last year passengers carried by the buses were slightly more numerous than those by railway. That "wastage" from the rail to the road is ceasing. There is no likelihood, however, that the railways will ever recover much of the lost short-distance traffic. Long-journey traffic is still the field in which the railway remains supreme. The attack on its supremacy by the newer form of transport, aided by novelty, and especially by cheap fares, is now being successfull countered by the new policy of the railways in offering a fare which bears a closer relation to the economic capacity of the potential traveller than the high fares which have prevailed since the War. Had this policy been boldly adopted ten years ago, railway history would have been different in character.—Leeds Yorkshire Post.

Britain's Heaviest Cat

Peter, a six-year-old black Persian of Weymouth, claims to be the heaviest cat in Great Britain. I should like to bring my cat, James, to your notice. He is a short-haired ginger cat, seven years old and weighs 22 pounds.—Letter to London News-Chronicle.

THE UNITED STATES

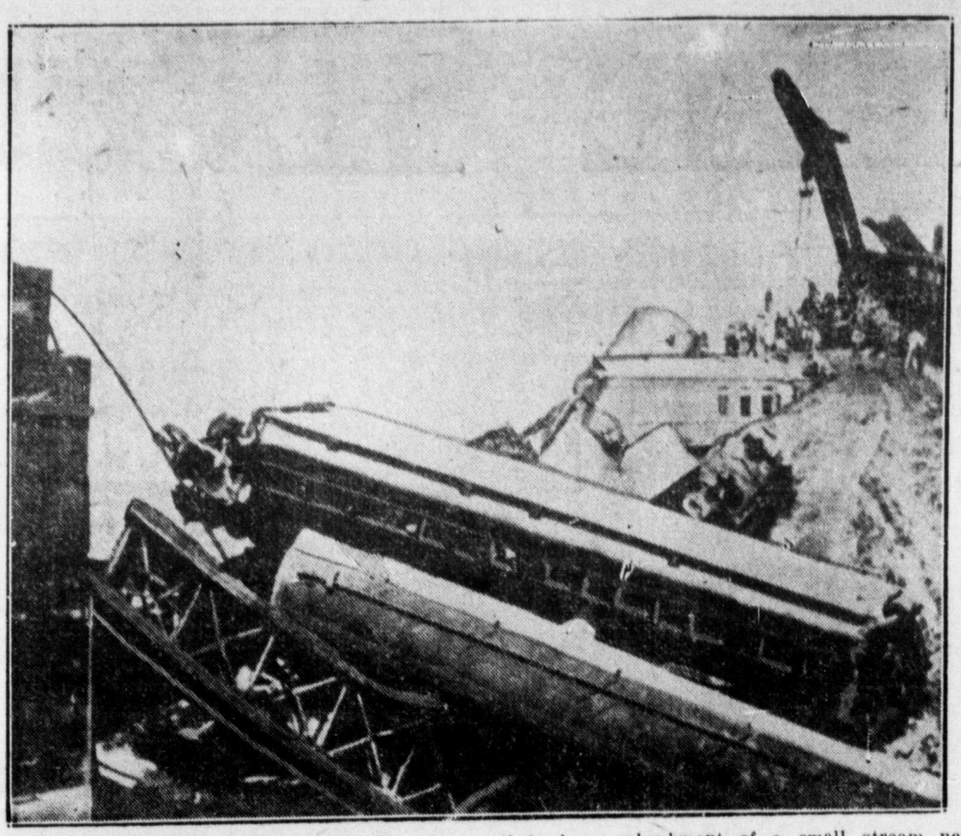

Planting Money

Australia, strange as it may seem, is teaching its young people that money grows on trees. Under adult guidance, state school children of Victoria have set out 4,000 acres of saplings that will be worth $3,000,000 on maturity. Profits from the sale of bark and timber will be used to provide scholarships, libraries, radio and sports materials.—Christian Science Monitor.

Labrador Huskies For Antarctic Trip

Quebec.—Norman Vaughan, executive officer of the second Antarctic expedition of Commander R. E. Byrd, is in Quebec supervising the shipment from here of 20 Labrador huskies, which arrived on board the SS. Sable I from the north shore. It was the second shipment to arrive from the Lower St. Lawrence, more than 70 having been brought here a fortnight ago.

Bridge Collapses — Eight Killed

Wreckage of the Golden State Limited is shown piled along enbankment of a small stream near Tucumcari, New Mexico, after a bridge gave way under the locomotive during a recent storm. Eight were killed and many injured.

First Woman to Enter Finals in Stiffest Test of Marksmanship

Connaught Rifle Ranges, Ottawa.—Mrs. J. Neal Dow of Saint John, clear-eyed and petite sharpshooter, won the distinction of being the first woman to get into the final stage of the Governor-General's match in the Dominion of Canada Rifle Association's great annual meeting. Her husband, one of the best shots in Canada, didn't place in the finals. But Mr. and Mrs. Dow don't argue about that.

Mrs. Dow, whose trim, five-foot six build of femininity is the anti-thesis of the veteran marksmen who clamber to the ranges loaded with guns, telescopes, and heavily padded uniforms, scored 99 out of a possible 105 in the qualifying stage. In the final stage Mrs. Dow wound up about half way, with a score of 151 out of a possible 175, getting $5.

Lieut. J. Neal Dow shoots a mean bull's eye but he is very much concerned these days about the youths he is coaching in the Cadet Corps in Saint John's.

One of them, Donald McLeod, won the grand aggregate, which is very nearly the stiffest test of marksmanship that there is in Canada—bar none.

Small Island Near Australia Has Treasury Surplus

Canberra, Australia. — Nauru, a little Pacific island, can afford to laugh at the depression. Its financial state, as described in an official report, shows: Public debt, none; revenue (at par), $98,342; expenditures, $75,014; accumulated funds of administration, $124746.

Nauru has an area of 8.43 square miles and a population of 2,316. Phosphate exportation is the only important local industry.

Germans to Set Own Styles for Clothes

Berlin.—The all-pervading nature of the activities of Germany's Government is illustrated by the creation of a German fashions office to endeavor to substitute home for foreign leadership in connection with clothes for both men and women.

This organization is to be presided over in an honorary capacity by Frau Joseph Goebbels, wife of the Propaganda Minister.

Board Rumored To Study Report

St. John's Nfld.—Premier F. C. Alderice may call a special session of the Legislature early in October to consider the report of the Royal Commission making an economic survey of Newfoundland, according to unconfirmed reports in the capital.

The commission, headed by Lord Amulree, is expected to have its report ready for presentation before the end of September. It was appointed last winter after Great Britain and Canada assisted the islanded Dominion in meeting interest payments on Newfoundland bonds.

Madame Curie Refuses Interviews

Madame Curie, the co-discoverer with her husband of radium, is the most inaccessible notability ever to attend League of Nations meetings at Geneva.

During all the 11 years she has been attending the meetings of the League Commission on International Co-operation she has never once been interviewed. She refuses even to chat with newspaper representatives.

Although diligent in attending the meetings of the Commission, and taking an active part, she rarely makes a speech.

Canadian Coal Chosen to Heat Oshawa Schools

Oshawa, Ont.—For the first time, Canadian coal will heat Oshawa schools during the winter months. The special fuel commission appointed by the Board of Education has let a contract for 1,150 tons of Nova Scotia coal at $5.85 a ton. The lowest tender for American coal was $6.10 a ton. The contract is divided among four local dealers.

Married in Hospital

Philadelphia. — Society note: the bride was attired in a tea-rose nightgown with lace-cuffed sleeves and had a bouquet of tea roses pinned over her shoulder.

Undaunted by an appendicitis operation, Miss Margaret Laux, of Westfield, N.J., was married at the time she had set before she was stricken. Grill Williams, of Cranford, N.J., was the bridegroom who stood beside her cot in a hospital and nearby was her bridal party.

Cabbagetown Was Early Toronto's Name

Cabbagetowners—three generations of descendants of original Torontonians—made a grand treck to Hanlan's Point one day recently, for the first time ever to gather en masse for a picnic.

The limits of Cabbagetown of the sixties were from the east side of Sherbourne street over to the west bank of the Don River and from the lake front to the south side of Carlton street. This area lay northwards and east from the business section of the day, and east of the residential Jarvis-Sherbourne district. There seems to be unanimity of opinion that its title was conferred by virtue of the growing of cabbages and other vegetables for domestic consumption.

Despite its vegetarian cognomen, Cabbagetown was most of early Toronto, when Toronto was inhabited by fewer than 40,000 persons.

Canadian Exports to U.S. on Increase

Ottawa. — Reported industrial recoveries in the United States appear to have influenced Canadian exports to that country. The July export, valued at $17,343,000, was the highest since December, 1931. It was $12,481,000 in July, 1932, so that the increase is 43 per cent.

Exports to the United States reached their lowest point in April, when the total was $8,382,000. This was followed by $13,857,000 in May and $14,847,000 in June.

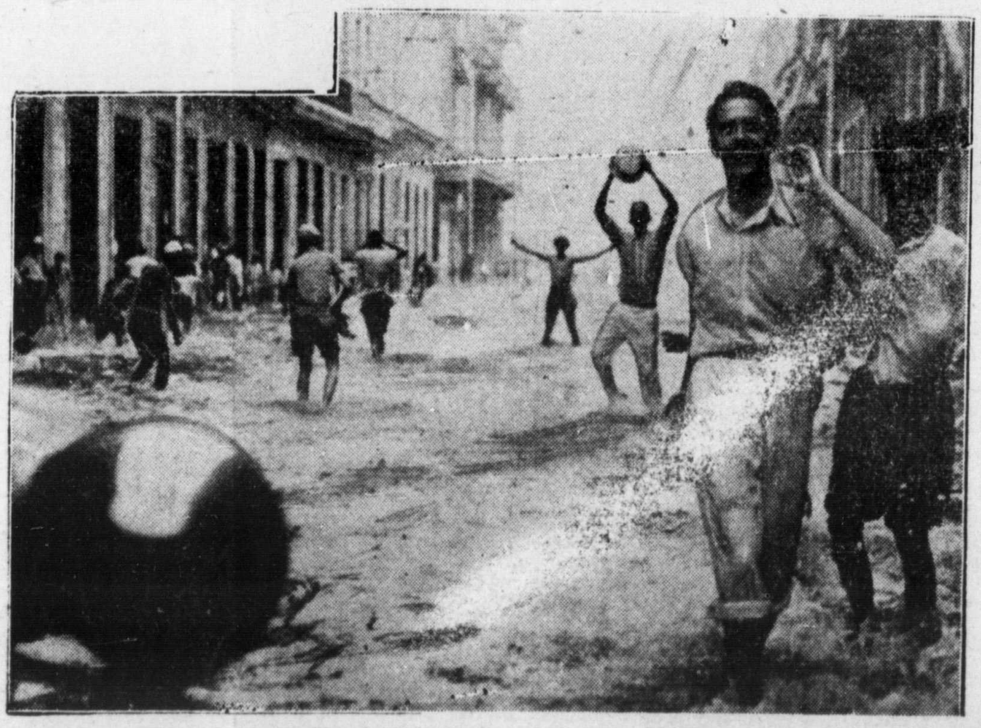

The increase in the export of electric energy was from $166,000 to $266,000, but the gains were along almost the whole line of Canada's exports. The largest were in wood, woodpulp, shingles, planks and boards, nickel, asbestos, raw hides, grains, fish, furs, raw wool, and acids.

Eleven Families Plan Co-operative Community

Calgary.—Eleven families with 15 children will form a co-operative community if the Alberta Government will grant them some land. Heads of the families have been out of work for some time.

The families ask for relief grants for a year, their rent allowances to be applied to the purchase of lumber and building materials.

Tidal Wave Follows Revolution

It it is not one thing it's another, down in Havana Cuba. They just get over a revolution and then a tidal wave threatens the city. Photo shows the streets flooded by seawater that swept through the city after the tropical hurricane that took a toll of six lives and injured sixty persons.

'Canadian' Becomes New Language

Linguists Offered New Field to Conquer New Course Introduced

London.—Linguists searching for new hosts to conquer now can turn their talents to learning "Canadian".

For the laughter of a Canadian University has caused a London company which teaches languages by phonograph to give its official recognition to this new "language."

The company, the Linguaphone Institute, has had to withdraw its special spoken course in English, with which it was presumed to teach French Canadians how to speak the English language, and supplant it by a new course on which the accent is firmly American.

The original course, in which two of the most popular English broadcasters participated, representing all that was best in the language of the educated Englishman, was greeted with roars of laughter when played to a large class in a Montreal university.

It was firmly pointed out to the company's secretary that Canadianh in Montreal and visitors from abroad, had no wish to be taught English with an Oxford accent. They wanted to learn Canadian English.

In Central Europe too there is an increasing demand for the teaching of English with the American accent by the numberless people with business relations in America, as well as by those who are about to go across the Atlantic.

To meet these demands the new course has been made. In place of the alleged "haw haw" of the English voices has been substituted the strong flavor of America in the persons of Mr. Cesar Saerchinger, European manager of the Columbia Broadcasting System, and Mr. Gladstone Murray, a Canadian radio speaker now in England.

British Industry Gaining Ground

57,000 More Workers Secure Jobs August Figures Reveal

London.—With improved business conditions felt by more than half a dozen key industries, 650,000 British unemployed have found work during the past year, according to statistics just made known.

During the month ending August 21, unemployment figures have shown a drop of 31,038, with the total number of employed having increased 57,000. Unemployed in England now total 2,511,137.

Improved conditions have been experienced chiefly by iron, steel, general engineering, shipbuilding and repairing, shipping, electrical apparatus, wool and textile, coal mining and building industries. Hotels and boarding houses are also reporting a pick-up in business.

Woman Trusty "Brings Saws Into Jail"

Hugo, Okla.—A woman "trusty" is a paradox, not to say anathema, in the eyes of the Hugo jailer.

Martha Wright, the "trusty," was sent to town on an errand, which she performed, and returned to the jail all right. But, in addition to her "trusty" self, she brought six hack saw blades.

Her fellow prisoners declined to tell where the saws were hidden and now are on a bread and water diet. Officers said, however, they had found five of them.

Thresher Catches Hand Two Fingers Taken Off

Belleville, Ont. — Charles Stewart of Rawdon Township, was assisting about a threshing machine when his right hand was caught in a gear. Two fingers were so badly crushed as to cause amputation.

James Horrigan, 10, son of James Horrigan, of Marlbank, while visiting William Rush, near Tweed, was severely injured when he fell from a wagon, a wheel of which passed over his head. His skull was fractured.

Has 200,000,000 Jobless

Peiping.—Half the population of China, some 200,000,000 persons, are unemployed, a survey reveals. The ministries of finance and industry are in conference to consider relief in the regions stricken by the recent Sino-Japanese warfare.

Twins Play One Film Role

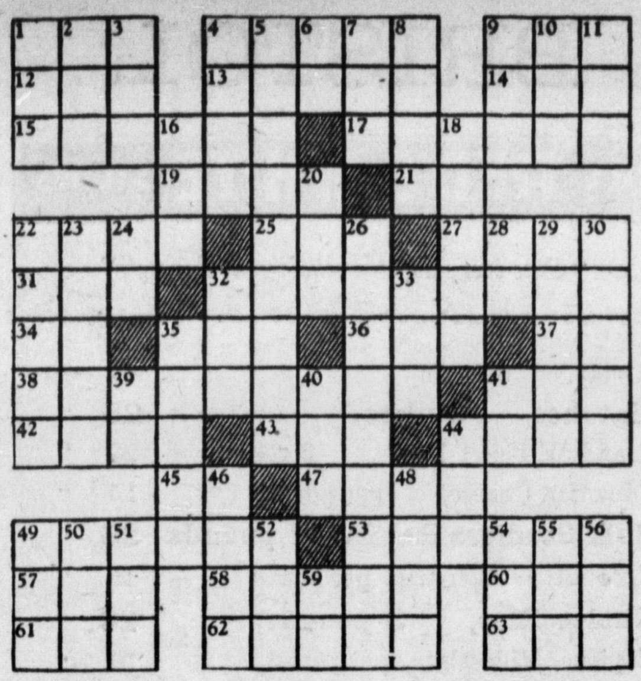

Hollywood.—In order to comply with the California law which limits the working time of a baby to two hours a day, twins have been hired by the Fox studio to play the same role in a picture now under production.

Inventor of Vaseline Passes at Age of 96

Spring Lake, N.J.—Robert Augustus Chesebrough, the man who invented vaseline, is dead at the age of 96.

He succumbed after a short illness. For 50 years he had manufactured the product he invented.

OUR CROSS-WORD PUZZLE

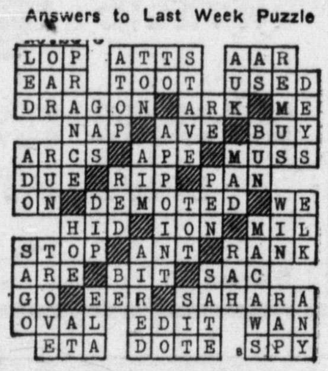

Horizontal

1—Foot-like part

This Week's Science Notes

Character of Cancer—Experiments Lead Scientists to New Theory—Other Notes

First reports on the results of hundreds of experiments in the course of nine months at the Cancer Research Laboratory, Graduate School of Medicine, University of Pennsylvania, are printed in the German scientific publication, Zeitschrift fur Physiologische Chemie. The work, conducted by Dr. Ernst Waldschmidt-Leitz, one of the world's leading authorities on enzymes, of Prague, Czechoslovakia, and four of his assistants, is stated to have opened up new fields in the study of the chemistry of cancer, so promising as to lead the investigators to believe that the nature of the cancer problem is largely enzymal in character.

Enzymes are regarded as catalysts of biological origin which are formed in all living cells. Catalysts are minute quantities of certain inorganic substances by means of which the rate of chemical reactions are speeded up tremendously. An example of an enzyme is the ferment in the common yeast cell, known as zymase, which brings about the fermentation of sugar. Another enzyme, known as ptyalin, is formed in the cells of the salivary gland, from which it is discharged in the mouth where it acts on the starch of the food.

It is now realized that most of the changes going on in the living cells are due to chemical agents similar to the ferment in yeast. In many cases the enzymes act inside the cell, while in other instances they carry on their chemical changes outside the cell which forms them, after being discharged. Their chemical structure is as yet unknown.

ENZYME CHARACTERISTICS.

Enzymes are highly specific; that is, one particular enzyme will act only on a single substance, or a group of closely related substances. In some cases this specificity is so extreme that it has been suggested that there is a "lock and key" relationship between the enzyme and the molecule, or the substrate, on which it acts. Each particular enzyme seems to fit only a particular molecule, just as a particular key fits its own lock and no other.

Enzymes are active in extremely minute quantities. For example, the enzyme known as the invertase can hydrolyse 1,000,000 times its weight of cane sugar without appreciable loss of activity. Most of the reactions in which enzymes take part involve the presence of water, as in the case of the enzymes in the alimentary canal, which break down the foodstuffs by hydrolysis. Other types of enzymes, known as oxidases, are the active agents in processes of oxidation. The color changes that occur when a sliced apple or potato is exposed to air are due to this type.

Applying the general knowledge of enzymes gained within the past few years, it is now found, according to this group of scientists, that these little ferments play an important role in the development of cancer. So far the type of enzymes known as proteolytic, namely the protein-digesting enzyme, have been studied. The researches show, according to the report, that there is a definite correlation between the presence or absence of certain proteolytic enzymes and the various stages of cancer development.

ENZYMES AND THE TUMOR.

It was found that some enzymes steadily decreased with the increased growth of the tumor, while other types, such as arginase, a ferment found in the liver, showed a decided increase after the growth of the tumor had continued for some time.

Should cancer be found to be caused by a special enzyme, or a preponderance of certain enzymes, the problem will then be to find an anti-enzyme or anti-catalysts.

GAS POISON ANTIDOTE.

Discovery of a new antidote to carbon monoxide and cyanide poisoning, more effective, it is believed, than any other means of counteracting the effects of these deadly poisons, is reported in Science by John H. Draize of the Agricultural Experiment Station, University of Wyoming. The antidote consists of a solution of sodium tetrathionate, and was first applied to cyanide poisoning by B. Foresti, an Italian scientist.

A dose of three to four milligrams of a hydrocyanic acid solution per kilogram of body weight is fatal to a rabbit when administered through the mouth. But the intravenous injection of two to three milliliters of a 2 per cent. solution of the new antidote per kilogram of body weight, Mr. Draize reports, is "effective in saving rabbits having received orally three times the minimal lethal dose of hydrocyanic acid."

The results obtained suggested a trial of the effectiveness of the salt in other types of poisoning, particularly that due to carbon monoxide. Rabbits were gassed to a point "from which recovery was impossible without treatment." It was found that the sodium tetrathionate was more effective than methylene blue in reviving the animals poisoned with carbon monoxide.

Carbon monoxide will always be more or less of a source of poisoning so long as the gasoline engine, illuminating gas and coal-burning appliances are used by man, Mr. Draize observes. He expresses the hope that the effectiveness of sodium tetrathionate "may be given further study and trial by those who are called upon to treat human cases of carbon monoxide poisoning."

Engine Again Fails To Beat Horse in Race

Chicago.—"The old gray mare is still what she used to be, still what she used to be . . ." is the new version inspired by a repetition of the historic race of Aug. 25, 1830, between the "Tom Thumb," the first locomotive built in America and a horse-drawn coach. The horse won originally, and the horse won again, which surprised many on-lookers,(but not the promoters of the race, for reasons best known to themselves.

It was on tracks adjoining the Century of Progress exposition that the historic race was staged again. Everything was the same except the scene and the mare. The same horse-drawn coach. Surprisingly enough the same mishap which occurred to the little engine in the original race, preventing it from winning, occurred again. But then, history has a way of repeating itself, especially when human hand exerts a sufficient amount of pressure.

The "Tom Thumb," Peter Cooper's pioneer steam engine, is used daily in the transportation pageant, "Wings of a Century," and so is the horse-drawn coach

"Is Tom conceited?"
"Very. He even imagines that he looks well in his bathing suit."

Botanical Terms Explained

Aid for persons puzzled by the mysterious sounding botanical names of various plants is offered by The Bulletin of the Arnold Arboretum, Harvard University. Some of the names indicate the habit of the plant, others its origin; the great majority refer to the peculiarities of that particular genus and species, The Bulletin points out.

Some of the terms that occur most frequently and which are useful in that they tell something about the plant are: scanden, climbing; repens, creeping; fruticans or frutescens, shrubby; palustris, marsh loving; rupestris, rock loving; arenarius, of sandy places.

The choir of Old Trinity church, New York, first appeared in vestments on Sunday, October 14th, 1860, when the services were attended by Albert Edward, Prince of Wales.

...SMILES...

"The real marriage," we read from Dorothy Dix, "is when a man finds a beautiful girl and a good housewife." Sounds more like bigamy.

Bloofus—"I wonder why rich folks so often marry rich folks?"

Obfuscus—"Because they have so much interest in common."

Try a Cyclone Cellar

Husband (while house-hunting)—"Let's try a bungalow, my dear—then you won't always be hearing burglars moving about down-stairs."

Smoothing Her Plumage

Old Aunt (despondently)—"Well, I shall not be a nuisance to you much longer."

Nephew (reassuringly)—"Don't talk like that, aunt; you know you will."

Kink Lady—"And how would you like a nice chop?"

Weary Tramp—"That all depends, lady—is it lamb, pork, or wood?"

Too Expensive

And then there was the Scottish father of twins, who only had one of them photographed.

Woman—"People sometimes tell me I talk too much, but I always believe in saying what I think."

Husband—"Of course, darling—but—er—where do you get all the rest from?"

The reason so many of us do not want to learn is because a lot of the facts we'd pick up in the process would be very unpleasant.

Wife (to husband, upon leaving a good eating place)—"I hope you gave the waiter a big enough tip."

Husband—"I did, but it wasn't."

Suitor—"Well, since you don't want to marry me, perhaps you will return the ring I gave you."

Sweet Young Thing (snapping)—"If you must know, your jeweller has already called for it."

Doctor—"Give up smoking, captain, and you will prolong your life by 20 years."

Captain—"But isn't it too late now?"

Doctor—"It's never too late."

Captain—"Then I'll start in ten years' time."

Trouble really never starts in a family until the time arrives when father and son can wear each other's clothes.

"You have admitted Smith to your club? But he is such a bore."

"Yes—we wanted somebody to grumble about."

Grocer—"Do you want white or brown eggs, ma'am?"

Pretty Bride—"The kind I want are white with a yellow polka dot in the middle."

Country Doctor(calling to see female patient)—"I supose you consider me an old humbug?" (laughing, as he felt the woman's pulse and trying to put over his very best bedside manner).

The Patient (gasping incredulously)—"Well, I never. I had no idea you could ascertain a woman's thoughts by just feeling her pulse."

Blessed is the husband who is an unhandy fellow. He reads his newspaper while his neighbors are mending carpet sweepers.

Tactful Tot

Minister (calling)—"And what does you mother do for you when you've been a good girl?"

Margery—"She lets me stay home from church."

He'd Never Get Rich

Victim (sadly)—"I got that watch from a former employer after I'd been with him ten years."

Footpad—"Lumme, Guv-nor, you was slow, wasn't you?"

Homeopathic Recipe

Diner—"What on earth is this broth made from, waiter? Surely it isn't chicken broth?"

Waiter—"Well, sir, it's chicken broth in its infancy. It's made out of the water the heggs were boiled in."

Bans Photographs In Italian Papers

Rome. — Publicity - seekers who make their presence at public gatherings the occasion to get their names and photographs into public print have been called to order by Achille Starace, secretary of the Fascist party. Starace has issued an order prohibiting the publication of photographs and names of persons attending meetings. The order affects Starace himself and all others except Premier Mussolini and a few other Government officials.

Detective Stories Declared Sedative

Tired Business Men Relax Tensed Nerves Reading Thriller

New York.—The psychological reason why great men and others like detective stories is out—the tales are soothing.

They cut the pulse rate, lower blood pressure, and steady motor nerves. Furthermore, women re-act to them like the men.

These experiments are published by Ray Mars Simpson, psychologist at the Institute for Juvenile Research, Chicago. His test readers were 40 university students, 24 men and 16 women. Their ages were 18 to 41.

While wearing attachments to record their physical status, they read detective stories, history, psychology and geography, in 15-minute periods, for six successive days. The first, third and fifth days were devoted to detective stories.

The instruments showed that the rate of breathing was consistently faster while reading detective stories, but the longer they read the slower it became.

"Reading detective stories," Dr. Simpson states, "tends to reduce the pulse rate more than reading academic material. The blood pressure falls to practically the same final level at the end of 15-minute periods devoted to either detective stories of geography. Motor steadiness is improved more by reading detective stories than by reading history.

"In short, the great majority of detective stories are soothing rather than exciting. They act as a sedative for tired business men."

The Better Day

Harsh thoughts, blind angers, and fierce hands,
That kept this restless world at strife,
Mean passions that like choking sands,
Perplex the stream of life.

Pride and hot envy and cold greed,
The cankers of the loftier will,
What if ye triumph, and yet bleed?
Ah, can ye not be still?

Oh, shall there be no space, no time,
No century of weal in store,
No freedom in a nobler clime,
Where men shall strive no more?

Where every motion of the heart
Shall serve the spirit's master-call,
Where self shal be the unseen part,
And human kindness all?

Or shall we but by fits and gleams
Sink satisfied and cease to rave,
Find love but in the rest of dreams,
And peace but in the grave?

—From Lyrics of Earth by Archibald Lampman.

The summer fallow is by no means a modern institution but has come down through the ages. The practice apparently was not always for the purpose of conserving moisture as the ancient injunction "Break up your fallow land and sow not among thorns" suggests the use of the fallow as a means of weed eradication.

SOURED ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile —No Calomel necessary

Many people who feel sour, sluggish and generally wretched make the mistake of taking salts, oil, mineral water, laxative candy or chewing gum, or roughage which only move the bowels and ignore the liver.

What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liquid bile into your bowels. Get your stomach and intestines working as they should, once more.

Carter's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. 25c. at all druggists. 51

DAUGHTER HAD CRYING SPELLS

"Nerves" Brought On by Worrying

AFTER KRUSCHEN "A DIFFERENT GIRL"

A mother wrtes:—"Early this spring my eighteen-year-old daughter had a nervous breakdown. She had crying spells and fits of the blues. So I decided to give Kruschen Salts a trial, starting with a large half-teaspoonful in hot water first thing in the morning, and the little daily dose in her tea for lunch and supper. In less than a week the crying spells had stopped and she began to sleep better. That was three months ago. To-day she is full of pep, and sleeps and eats well. She is a different girl. I am still giving her the little daily dose."—(Mrs.) M. L.

The commonest cause of depression is partial constipation—an insidious complaint, because the sufferer is seldom aware of it. It means the gradual accumulation of body poisons which dull the mind, damp the spirits, sap the nervous strength and lower the whole vitality.

Kruschen Salts make constipation impossible. They help the liver and kidneys to perform their natural duties in a natural way; they clear away gently, but completely, all poisonous waste matter, and ensure an uncontaminated blood-stream. Therefore, if you keep to Kruschen, you need never know the meaning of melancholy; never feel "nervy" or depressed.

Kruschen Salts is obtainable at all Drug Stores at 45c and 75c. per bottle.

High School Boards and Boards of Education
Are authorized by law to establish
INDUSTRIAL, TECHNICAL AND ART SCHOOLS
With the approval of the Minister of Education

DAY AND EVENING CLASSES
may be conducted in accordance with the regulations issued by the Department of Education.

THEORETICAL AND PRACTICAL INSTRUCTION
is given in various trades. The schools and classes are under the direction of AN ADVISORY COMMITTEE.

Application for attendance should be made to the Principal of the school.

COMMERCIAL SUBJECTS, MANUAL TRAINING, HOUSEHOLD SCIENCE AND AGRICULTURE AND HORTICULTURE are provided for in the Courses of Study in Public, Separate, Continuation and High Schools, Collegiate Institutes, Vocational Schools and Departments.

Copies of the Regulations issued by the Minister of Education may be obtained from the Deputy Minister, Parliament Buildings, Toronto.

THE EQUITY

SHAWVILLE, SEPT. 28, 1933.

Fire Prevention Week

The Government has appointed the week of October 8—14 as a special fire-prevention week. A proclamation to this effect has been published in the Canada Gazette. The proclamation says that 80 per cent. of the fires in Canada are chargeable to ignorance and neglect.. It is said that the annual fire toll in Canada by fire is 300 lives and $45,000,000 in property damage. It is recommended that all dwellings be inspected for fire hazards during the week, rubbish cleared from stores, warehouses and factories ; that hotels, theatres and public buildings be inspected for fire-traps, and that fire drills be held in schools, stores, factories and public gathering places.

How Motorists Pay

Motor vehicles operated in Canada ran their owners into a tax bill of $56,700,000 last year, according to an estimate released by the Dominion Bureau of Statistics. That ment over $50.00 for every registered motor vehicle—to say nothing of the fines. The provinces collected $21,126,271 for registration fees on vehicles and operators and another $27,083,316 in gasoline taxes. The Dominion took in $4,508,471 on import duties and excise taxes. In addition there was the sales tax on cars sold, estimated at $2,500,000 and the import duty on gasoline estimated at $1,500,000.

Minutes of Clarendon School Board

Shawville, Sept. 20, 1933

Clarendon School Board met on the above date. Present, chairman F. A. Horner, commissioners, J. W. Horner, J. Dean, A. G. Brough, J M. Argue.

Minutes of last meeting read and adopted on motion of comr. Brough.

Motion by comr. Horner, that the Y. P. S. be allowed the use of 2 rooms in the Shawville High School for their convention to be held on October 21st next.—Carried.

Motion by comr. Dean, that the following bills be paid :

Gatineau Power, sockets	$ .96
James Howard ½ cord light wood	1.25
Newsome & Gilbert, receipts	9.80
Provincial Blank Forms receipts	13.17
J. L. Hodgins, white wipers	5.00

National Drug Co., chemicals	17.31

—Carried.

Motion by comr. Argue, to adjourn.—Carried.

E. T. HODGINS
SEC.-TREAS.

COUNTY COUNCIL MINUTES.

Session held at Campbell's Bay on Wednesday 13th of September, 1933. Members present Warden McCann and councillors Hayes, Landon, Allard, Pleau, Labelle, Lawn, Carswell, Dagg, Merchant, Milliken, McCleary, Barr, McLellan, Kennedy, Dolan, Jolicoeur and Howard.

The minutes of last session were read and adopted as correct on motion of crs. Pleau and Lawn.

All correspondence, copies of resolutions, petitions etc. in connection with the disputed part of the Bristol-Clarendon town line were read, and a long discusssion on the matter, during which several resolutions were brought forward and withdrawn, continued until an adjournment until 1.30 p. m. was moved by crs. Kennedy and Pleau.

After the session resumed at 1.30 p. m., the discussion on the Bristol-Clarendon line continued until it was moved by crs. Labelle-Dagg, that the recommendation in the resolution passed on the 14th of June last, that the work of repair on said line be done under the supervision of Herbert Moore be rescinded, and that such work be done under the supervision of the local officials of the two municipalities ; that all other provisions of the resolution passed on 14th of June last remain in effect, without prejudice to the legal rights of either local municipalities concerned, and that the county council advises and urges that the work begin with the least possible delay. This resolution was carried.

Warden McCann gave a verbal report of a meeting of the committee appointed at last June session to further the undertaking of building a highway in the county of Pontiac from Sheenborough to Temiscaming, which was held at Campbell's Bay on the 2nd of August last, at which every member of the committee was present and also Mr. W R. McDonald, M. L. A., and Mr. Charles Belec, M. P. and the sec-treas. read all correspondence sent and received in connection with the project, reporting that nothing had been heard from any of the parties addressed in the Temiscaming district. A long discussion on the unemployment situation ensued without anything definite being decided on.

The report of the "Cremation" Committee appointed at last June session to arrange and manage the ceremony in connection with the burning of the bonds or "Bonus" was read, and it was moved by crs. Labelle-McLellan, that a vote of thanks be tendered to said Committee by this council and an expression of appreciation of the very creditable and enjoyable manner in which they carried it through.—Carried.

The following bills were presented and ordered to be paid on motion of crs. Lawn-Howard, viz :—From Thomas J. Moorhead for $62.50 for meals served at the Cremation Banquet on the 1st of July last, from W. G Cowan, for $5.00 for printing invitations and tickets to said banquet, and for $7.50 for printed stationery for the secretary's office, and from James Hope & Sons for $4.35 for stationery.—Carried.

On the annual revision of the valuation rolls being taken up it was moved by crs. Lawn-Dagg, that no changes or amendments be made to the same for this year.—Carried.

The matter of the deviation in the town line road between North & South Onslow at lot 19 was now taken up, and all special and public notices, copies of resolutions, etc. were read. Mr. Daniel Farrell and others addressed the council, and after a long discussion it was moved by crs. McLellan-Labell, that this matter be left over until this council meets again, and that in the meantime the two local councils are requested to prepare a specification of the manner in which the proposed road on the true town line is to be constructed and secure tenders for the work, each tender to be accompanied by an accepted cheque for 10 per cent. of the amount of the tender, and addressed to the sec.-treas. of this county council, to be in his hands before the 5th of October next, the lowest or any tender not necessarily accepted.—Carried.

On motion of crs. Landon-Labelle, a vote of condolence to cr. Andrew Judd on the death of his wife, and to Hon. Geo. Bryson on the death of his wife was passed and carried.

The secretary read correspondence with South Onslow re a refund of its county rate for 1933, owing to a reduction in its valuation roll by an arrangement with the Ottawa Valley Power Company, and read a resolution of its council agreeing that the overplus of $84.60 be credited on its assessment for 1934.

A communication from the Farmers' Club of Calumet Island asking for a grant of $300.00 towards the salary of a stenographer for the Agronomist at Campbell's Bay was read, but no action taken thereon on motion of crs. Labelle-Dolan.

A communication from James C. McCuaig referring to the importance of tourists traffic, good roads, unemployment measures, etc. was read but no action taken.

On motion of crs. Carswell-Merchant, council adjourned until Thursday the 5th October next at 10 o'clock in the morning.

Bryson, Que., 14th Sept., 1933.
H. T. HURDMAN
Secretary-Treasurer.

HALF A TON NECESSARY TO PRODUCE ONE POUND OF SOME KINDS OF GRAIN

One of the most interesting studies about nature is the part water plays in the development of plant life, practically all plant life being the result of the "transpiration" of water drawn up by molecular action, induced by the sun in plant cell structure, from the ground, carrying in solution the nutrients which are transposed by chemical action in contact with air and its elements into the various forms of plant structure.

Studies carried out at the Dominion Experimental Station at Swift Current, Sask., since 1922 show that it takes from 869 pounds to 1,351 pounds of water to produce one pound of Marquis wheat; 753 pounds of water is utilized in the production of one pounds of oats, while it takes 310 pounds of water to produce one pound of barley; and 1,328 pounds in the production of one pound of spring rye.

In connection with the production of other crops it was found that it required the transpiration of as much as 1,593 pounds of water to produce a pound of alfalfa; 1,108 pounds of water to produce a pound of white sweet clover, and from 260 to 377 pounds of water to produce one pound of potato (tuber); 566 pounds of water were required to produce one pound of tumbling mustard; 529 pounds of water were used in the production of one pound of stinkweed; and 206 pounds of water were used in the production of one pound of Russian thistle.

The results of the studies referred to are summarized by classification into three main groups: corn, potatoes and Russian thistle are produced with a minimum transpiration of water; a large group containing whole grains use a greater quantity of moisture; while grasses and clovers are relatively extravagant in the use of water.

The application of this information is pertinent to the district in which the farmer resides, particularly in areas where the moisture supply is deficient. Because of its relatively low consumption of water corn will produce a greater amount of fodder than grain crops, and considerably more than grass or clover crops with an equal amount of available water.

BLIND OR NOT?

Strange Difference of Opinion Between Miner and Doctors.

The strange case of Tom Kupina, who, according to doctors thinks he is blind but is not, occupied the court at Sudbury, Ont., where Kupina was suing an insurance company for compensation under a group insurance policy. His suit was dismissed when Mr. Justice Nicol Jeffrey ruled Kupina had not suffered "total and irrevocable loss of sight of both eyes" as the result of an accident in a mine.

Medical testimony of both complainant's and defendant's experts was that he is suffering from a form of hysteria akin to shell shock, which actually prevents him from seeing. This condition, doctors agreed, may improve suddenly at any time.

Chick Feeds

We now stock the three leading brands of chick feeds :

Royal Purple, Pioneer, Ful-o-Pep

Priced to suit the times at from $2.25 to $2.90 per cwt.

Money cannot buy better feeds than these

Winnipeg Civic Employee Spent Over Quarter of Century in Them.

After 27 years of walking up and down Winnipeg's sewers, inspecting them, repairing them and doing other odd jobs on and about them, "Alf" Steele has retired on pension.

"Alf" is a little man, not much over five feet high, but if he's little, he's wise in sewer matters. He has the reputation of being one of the best sewer workers Winnipeg ever had. But for the rest of his life "Alf" is going to keep chickens and devote himself to his little garden.

Alfred Steele, to give him his full name, was born in Lincolnshire, England, and before he came to Canada he worked at Middlesborough and other places in the Yorkshire iron and steel belt.

You wouldn't think it, but there's lots of romance in sewers. A lady patient of the General hospital once lost a $1,000 ring when she was washing her hands. There was panic and despair, and the city authorities were approached to see if the sewer could be searched. "Alf" spent a night in the sewer, but the ring was never found.

All sorts of things get into the sewers and "Alf" has recovered a wide variety of them. He has restored keys to automobilists and other careless citizens. Usually these articles are lost on the street and get into the catch basins, at the bottom of which is a foot or so of genuine muck.

Eye-glasses and spectacles have been rescued by "Alf" from catch basins. And among the strange objects which sometimes get into the sewers are false teeth.

BALBO AVENUE NOW

Chicago honoured the intrepid leader of Italy's air armada by naming a street after him. Here is Ann Croustos pointing with pride to the new Balbo Avenue marker.

INDIAN FOUGHT BEAR

Narrow Escape of Man Armed Only With An Axe.

A thrilling, hand-to-hand battle with a maddened bear was described by Jim Toney, an Indian basket-maker of Wolfville, N.S., as he lay in bed with severe lacerations. The Indian was cutting trees in the woods when a young bear cub ran up to him. With an eye on the Government bounty for bears, Toney felled it with a blow of his axe.

The cub had scarcely fallen when its mother appeared. The big bear took one look at her cub and with an enraged bellow charged the man. Toney, unarmed except for his axe, ran.

The bear was close on his heels when he tripped over a deadfall in the path. As he rose to his feet, the animal was upon him. One lightning-like blow raked his back and tore off his coat; another stripped skin from his leg.

Toney leaped back and lunged ineffectually at the bear with his axe, to which he still clung. The bear turned the blow aside easily with a huge paw, and was closing in again when the Indian's two brothers, attracted by his calls, rushed into view with guns. A volley of shots frightened the animal and she made off into the forest.

INCREASE OF ILLITERACY

Figures Show About Same Proportion, However, Over Ten Year Period.

Illiteracy is increasing in Canada, but only in proportion to the increase in population, according to figures made public by the Dominion Bureau of Statistics.

The census in 1931 revealed that there were 660,505 persons in Canada over the age of five years unable to read or write. In addition there were 51,936 who could read but not write. A great proportion of these would, of course, represent children just starting school.

The census of 1921 revealed 615,167 over the age of five unable to read or write. That year the total population of Canada over the age of five years was 7,730,833, while in 1931 the number had increased to 9,302,371.

SEVEN-FOOT SKELETONS FOUND

Skeletons of Indians, estimated to have been more than seven feet tall, have been unearthed by explorers of Catahoula parish, Louisiana. A search for locations for study by members of the Smithsonian Institute disclosed from 15 to 20 of the skeletons in a grave on a mound at Larte Lake.

SYNOPSIS.

"Five minutes after midnight he'll have the rest of the proof—unless we get the five grand. That's all." That is what Benny Rufano, hanger-on at Emma's night club, told Peter Wayne, who had been waiting to keep an appointment with Detective Sergeant Charlie Mitchell. This was less than 24 hours after Martha Thayer had found her husband, Tack, murdered in their penthouse. She and Evan Ross were suspected by Inspector Connolly and Benny was threatening that Connolly would learn who killed Tack Thayer and where the murderer hid the pistol. Martha, disheartened by the drunken Tack, had fallen in love with Ross, and Peter was in love with Martha. Benny had previously demanded $500 from Martha after Tack, while drunk, had lost heavily in a crap game at Emma's.

CHAPTER XXII.

"It don't fit in, Pete—and it don't add up right," said Charlie.

Peter, leaving Emma's, had walked east, and between Sixth Ave and Fifth Charlie had loomed up beside him in the darkness.

"You think Benny was bluffing?" asked Peter. He had, after a moment's hesitation, told Charlie of his talk with Benny. It was, he was afraid, risky; Charlie was, after all, a policeman, and, presumably, if he became convinced of Martha's guilt, he would turn against her. But that was a chance, it seemed to Peter, that, at this stage of the game, he had to take.

"Not bluffing, no—lying," said Charlie. He scowled. "I don't get it yet, Pete. But I will. What was you and the doc gabbing about?"

"Zahn?" said Peter. "How did you know I'd been talking to him at all?"

Charlie chuckled.

"Told you I'd be at Emma's didn't I?" he said. "I could tell you things about that dive that'd surprise you; and some of them'd surprise Benny, too, bless his fat Dago heart."

"But why's he threatening Mrs. Thayer?"

"For five grand," said Charlie. "He told you. It's easy so far. He's got some dope like as not. Pete, you ain't on to it, but this night club racket's organized like some big corporation. They all work together. What one knows they all know. It stands to reason. They got to be lined up together against the Federal crowd—you'd be surprised, but some of them Federal dicks is on the level about gettin' evidence and goin' after convictions for sellin' hootch.

"I guess you was out of town when it was goin' strong, but there was a racket a while back that was good while it lasted. High class janes would show up with a lot of ice and go 'round among the night clubs—and be stuck up later. Sometimes it'd be in the lobby—once or twice it was after they got into their flats. An' blackmail—baby!

"We don't know how much of that there is, but there's plenty. The ones that's being stood up won't squeal, but there's enough jack in that racket to make the cover charges look like chicken feed. And you folks walk into these dives like they was Sherry's or the Ritz. You're as safe as a lamb would be if it went for a walk by itself in a jungle in Africa.

'Me, I don't get it. Here's you folks, that's got money, and that's well brought up, an' you head night after night for a lot of joints that make the honky-tonks they used to have on the Barbary Coast in 'Frisco look like a lot of Punch and Judy shows! You take a lot of nice young girls into places I'd crown my own sister with a nightstick for bein' seen in!

"Why wouldn't there be trouble, every so often? 'Tain't as bad as it is this time, mostly, I'll admit, but that's luck. Chances are it wasn't meant to be so bad this time, either. If I had to make a guess I'd say no one meant to croak this Thayer..... What'd the doc have to say, eh?"

Peter tried to remember, and, as well as he could, to translate Meyer Zahn's remarks.

"That's a lot of hooey," said Charlie. "High class way of sayin' a guy ought to be out for himself first, last and all the time, ain't it?"

Peter laughed. But Charlie took the message Zahn had told Peter to give Martha more seriously.

"Thinks she done it, does he?" he said thoughtfully. "Now that's a fast one. He gets a hundred dollars an hour for knowin' all about people, and I'm just a bull that's apt to be back in harness tomorrow pounding a pavement—and still, I'd bet a year's pay the madam didn't have any more to do with killin' Thayer than I did myself."

Peter was oddly relieved.

"Did you find anything out yourself in Emma's?" he asked.

"Maybe yes—maybe no," said Charlie. "I'm not tellin' anythin' yet anyway. You go on home and try an' get some sleep."

And, with that excellent advice, in his ears, Peter, reluctantly, had to part company with the detective. He went home and to bed. At eight o'clock Manuel woke him, and after a cold shower and a breakfast, he went to his sister Carol's.

Bouton arrived soon after he did and they both talked to Martha. She was wide awake and extremely nervous; as Watson had predicted, she was in much worse shape than she had been the day before. Bouton had failed completely, the night before, to learn what Ross had said; he was tight-lipped, and not disposed to give any hint of how he felt about the case.

Connolly turned up, truculent and full of asurance, at ten o'clock. Peter was excluded from his interview with Martha, although Bouton was present. It seemed to Peter that the net was closing more and more tightly about Martha every hour. And if what Benny had told him the night before had any truth in it at all, her arrest, and that of Ross, could only be a question of time.

Connolly, when he came from Martha's room had nothing to say to Peter, and with a curt nod took himself off.

"He knows about the business at the Fantomas Club," Bouton said. "Mrs. Thayer admits that she promised her husband to be home at half-past two—to meet him there. And she was, in fact, an hour later getting back, because she waited for Ross. He got nothing else out of her—nothing damaging, I mean. But that's bad—in the light of what we know."

"You agree with Mitchell that paying Benny the five thousand would be a mistake?"

"It would be suicidal!" Bouton snapped. "Do that and I drop the case—instantly. I'm afraid we must face the fact that Mrs. Thayer will be arrested and indicted—and probably brought to trial."

"It'll kill her," said Peter.

"I'm not afraid of a convicition—yet," said Bouton.

A maid came in. "You're wanted on the telephone, Mr. Wayne."

Peter went into the hall and took the call on the extension there, in a telephone closet.

"Pete?" It was Charlie. "I got to see you right away. Come down to the Biltmore. I'll be waitin' in the long corridor downstairs, between 43rd and 44th. Make it snappy!"

"All right—go ahead. And do whatever he tell you," said Bouton. "I'll be in my office all day if I'm needed."

Peter took a cab, but he jumped out the first time the traffic lights glowed red; he was too restless to sit still. Probably, he thought, he'd make as good time walking, anyway. He glanced behind him, but he wasn't he thought, being followed; there'd been no bodyguard waiting for him in Ninth Street that morning, either, when he went out. The chances were, he thought, that his own movements the day before had been so aimless and the developments about Ross so sensational that the papers had decided to drop him. He found Charlie buried in a leather chair, but the detective rose and led him outside. He didn't start talking about anything more important than the weather until they were walking up Vanderbilt Avenue.

"Connolly hasn't got any one on you," he said chuckling. "That's a bit of luck. Because here's where you go into action, Pete. Listen now—Connolly's ready to make his pinch. He's down at the D.A.'s now, and he's going after a warrant for the madam."

Peter swallowed hard. He'd been expecting it, but the actual news was a shock.

"And that don't suit my book—see? I want her loose a bit longer. And—the chances are if Connolly doesn't make the pinch today it won't be made."

"What do you mean?" Peter's voice rose excitedly. "Charlie—have you got something?"

"Wait and see," said Charlie. "How about you? Ready to take a chance—a big chance?"

"Yes!"

"Good! That's what you'll be doing. If anything slips up you'll be in mighty bad—and I'll be the first to go after you. I want you to get the madam away from your sister's."

"Right. But how—with detectives flocking around the place the way they are?"

"That's what I'm going to tell you. It wouldn't work for long—but it don't have to. I don't need but a few hours now. If I can't swing what I'm tryin' in that time—well, she'll have to take it and it'll be up to Bouton to beat the trial. You listen with both ears, now, and I'll tell you what to do—"

(To be continued.)

Egypt Will Educate Orphans as Crime Prevention Measure

Alexandria, Egypt.—"Prevention is better than cure" is the slogan of the Minister of the Interior, who hopes that by training the rising generation to be good citizens the tendency for crime will be diminished.

The minister, Mahmoud Fahmi El-Keissy Pasha, is drawing up plans whereby orphans and children of penniless parents will be educated in government homes and given employment when they attain a suitable age. About $165,000 has been set aside for the construction of reformatories, workhouses and medical stations in every province in Egypt.

Quick Slip Covers

Slip covers for chairs and sofas are now being made with slick, speedy slide fasteners. These are not only convenient, but it makes a better looking cover as it can be made firm and look more perfectly tailored.

Princess Elizabeth Is Growing Up

Is Now Seven Years Old — Resemblance To Queen Grows

Princess Elizabeth is growing up. The small, enchantingly grave baby who once christened herself "Lilybet" has vanished for ever, and her place has been taken by an equally charming young lady of seven years old.

Her likeness to the Queen grows more remarkable ever day, much to her Majesty's delight, and she combines, in a curious way, her mother's charm with her grandmother's dignity and purposefulness. Her gaiety, however, is all her own, and nowhere is it more apparent than in Scotland, where she is adored by all the tenants and ghillies around Glamis and Balmoral.

They love to see her starting off on a picnic with the Queen—one of her favourite treats, this!—particularly if the expedition leads to the new summer-house in the Pass of Ballater, which has been specially built for such occasions.

With a perfectly cut kilt of royal Stuart tartan and a hand-knitted pullover of green, she hardly ever wears a hat, but allows her fair, wavy hair to blow happily in the wind. That hair, to give away a secret, is the envy of her small sister, Princess Margaret Rose, whose curls sometimes need a little gentle persuasion!

Princess Elizabeth is always delightfully maternal towards this younger sister of hers, and no wonder, for she is a delicious child, rather more fluffy and frilly than "the fourth lady in the land," who is very severely and beautifully tailored nowadays, as befits one of her dignified age. Her military greatcoats and embrodered muslin smocks are at once the despair and inspiration of every mother in London.

These two royal sisters set nursery fashions everwhere.

If they are seen in red coats one morning, red coats are certain to break out all over the Park the next day, and they have done much to popularize the simple, streamlike type of dressing so becoming to the modern child.

They work and play, two charming and typically British little girls, in an atmosphere of perfect simplicity. Nursery teas in their airy pale blue and primrose suite at 145 Piccadilly are presided over by Mrs. Knight, their dignified nanny.

There is no formality—lucky children invited to share their fun never curtsy—and the time-honored rule of "bread and butter first" is always most firmly enforced.

One small guest returned home from a royal tea party, and plaintively asked her mother:

"What is the use of being a Princess if you can't start with chocolate cake?"

Princess Elizabeth is something of a tomboy, and so has much in common with her two cousins, Lord Lascelles and his younger brother Gerald. Another small companion, also a cousin, is "Jamie," the sturdy brown-eyed son of Lady Maude Carnegie, the King's favourite niece. Although he is only three, he is quite undaunted, and insists on taking part in all their games, however strenuous.

"The children next door," too, play a great part in the life of our birthday Princess.

Their mother, Lady Allendale, gives an annual Christmas party at 144 Piccadilly, which is always honoured by her presence. Nicholas Beaumont, nicknamed "Tupenny," the third son of the house, is a special favourite and this happy little group indulge in many thrilling bicycle races together, quite unconscious of the admiring crowd which gathers to peer at them through the railings whenever word goes round that "they" are out in Hamilton Gardens.

Lady Doris Vyner, one of the Duchess of York's best friends, has a pretty little Elizabeth of her own, named after her royal godmother, and she and her brothers, Charles and Henry, are all active members of this youthful circle.

Princess Elizabeth shares with them the joys of her gramophone, a present from the King, who understands his granddaughter's musical tastes perfectly, and keeps her well supplied with records of all the latest—and the loudest—military marches!

The Princess is not merely an admirable hostess. Her perfect dignity, remarkable power of forming quick decisions, and faculty for knowing what she wants, combine to make her the natural leader of the "Nursery Party."

So her days go by, filled with games and lessons and the other normal activities of little girls of seven, while all England watches with love and admiration this specially sweet seven-year-old, who is also their own Princess.

Undertakes To Explain Pickford-Fairbanks Trouble

New York.—Victor McLaglen, British-born motion picture actor and former soldier of fortune, analyzed the Mary Pickford-Douglas Fairbanks domestic situation for ship news reporters when he arrived on the Olympic.

"She loves Douglas Fairbanks and he loves her," said McLaglen, "but she attained everything she could ask for, and he did in his way, and the trouble was she didn't look up to Douglas. That's all.'

McLaglen, who was enroute to California after making a picture in England, said Miss Pickford "is the sweetest woman in Hollywood. None other can touch her."

Explaining he was "taking a chance" in saying so, he added that Marlene Deitrich is the "most intelligent" woman in Hollywood and Marion Davies is "the finest woman in Hollywood when it comes to the humanities of life"

"Hello, Bob. Glad to see you. I just got back from my vacation."
"Sorry, old man. I can't lend you a cent. I'm just going on mine."

"Shower" for Bridegroom Introduced by Men

Seattle.—A shower for prospective bridegrooms is the latest in social events.

Truman C. Cragin, who will marry Sally Crocker in Tacoma, Sept. 23, was honored at such a party by his male friends.

The gifts included dish cloths, boxing gloves and a mail order catalogue.

Granted!

Seeking a divorce decree, Mrs. Alida Doebler of Chicago said her husband was absent-minded. "He even forgot I was his wife," said she. "He criticized me for tring to flirt with him on the street." The decree was granted.

Champion Corn Eater

Thomas "Jake" Eaton, who by eating 52 ears of corn dethrones the former champion, Ed. "Korn King" Kottwitz, who held the record previously with 50 ears.

You be the judge

Sleeping Sickness In Two Types

Scientists Declare St. Louis Epidemic Different from Malady in Other Parts of Country

Baton Rouge, Pa.—Herbert Brown, 27-year-old ex-soldier, has offered himself as an experimental subject in the fight against sleeping sickness.

Brown described himself as a victim of tuberculosis, unable to work, and expressed the desire to "do something useful before I die." He asked that physicians in St. Louis, where encephalitis had made heavy inroads, should be made acquainted with his offer.

St. Louis, Mo.—Scientists studying the "sleeping sickness" epdemic here were of the general belief that the encephalitis outbreaks in other parts of the United States were of a different type than the St. Louis malady.

Two deaths, believed to have been caused by sleeping sickness, occurred in Kansas City, Kas., within 24 hours, and six cases have been reported over Kansas. Ten cases have developed in Kansas City, Mo. Another death was reported at Fort Smith, Ark. The death list rose to 47 in St. Louis.

"There are two types of encaphalitis which make their appearance in many communities," said Dr. Paul Zentay, assistant health commissioner. "They are the sporadic type, which usually follows another illness such as measles, whooping cough or other types of body infection, and the lethargic encephalitis, which is a primary disease.

At Jefferson City, Mrs. Mary Edna Cruzen, State Labor Commissioner, said she had written St. Louis County health officials asking them to determine whether "filthy bedding" was contributing to the epidemic

Mrs. Curzen said she had closed several mattress firms, where inspectors found "filthy conditions," and that other firms voluntarily cleaned up when they "saw we meant business."

Washington.—The Associated Press has asked me for an article on epidemic encephalitis, the "sleeping sickness" which in the past month has resulted in 45 death, 320 cases, in St. Louis, writes Hugh S. Cumming, Surgeon-General of the Public Health Service.

My experience is that the Press is the most valuable adjunct of the Public Health Service in meeting such epidemics. It gives the people information for their protection.

Not since the poliomyelitis epidemic in New York in 1916 has this service been confronted with an epidemic in such imperative need immediate and intensive study. To further it, I am asking the Treasury Department for $25,000.

Inflammation of Brain

Epidemic encephalitis, or "sleeping sickness" is an inflammation of the brain itself, with a moderate involvement of the meniges, or coverings of the spinal cord.

It is one of the group known as virus diseases, the ultra-microscopic germ having thus far proven impossible of isolation. Its carriers remain unknown.

It usually starts wth a pain in the back of the neck and headache. Often there are gastro-intestinal symptoms—vomiting, diarrhoea, or constipation. The patient is apathetic, lying immobile. The temperature rises. Characteristic is the "facial mask"—no mobility or expression in the facial muscles. Accompanying this condition often are motor reflexes of elbow, knee, wrist, or ankle; or tremors of arms or legs—continuous shaking. Irregular paralysis may occur.

Postmortems show evidence of destruction of the brain tissue.

Minnesota Deaths

St. Paul, Minn.—The State Department of Health have announced that 20 of 28 cases of encephalitis or "sleepng sickness" reported in Minnesota since January 1 had resulted in death. There are four cases at present.

Dr. A. J. Chesley, department head, said the fatalities occurred in western and southern Minnesota. He asserted that the situation was no worse than n any other year since the first Minnesota case appeared n 1919.

Etiquette Up-to-date

1900—"May I have the pleasure of this dance?"

1933—"Hey, kid, lend me your frame fo rthis struggle."—Carstairs News.

A survey ship of the British Navy, the Challenger, is making charts of the dangerous coasts of Labrador; These charts are the first ever to be made of this coastline and the survey will require 50 years to complete, it has been estimated.

19th Motor Offense

English Mayor Sorry He Can Only Fine Titled Culprit

In inflicting two fines on Lady Aline Barnett of Sopwell, sister of the fourth Earl of Verulam, H. F. Gibbs, the Mayor of St. Albans, remarked:

"This is her nineteenth motoring conviction. I do not recall the name of another woman in the country who has had so many. Two distressing features of her cases are, that she is always summoned but never arrested, and that she consequently never appears in person, but is always represented by counsel.

"I am not suggesting that the constables who summon her do not do their duty, but it must be evident that if she were brought here on a warrant, she would then be obliged to listen to what we might wish to say and I would have the privilege of depriving her Ladyship of her license, which I cannot do under a summons."

Lady Aline Barnett is 26 years of age and the wife of Geoffrey Arthur Barnett. In the present case against her she was fine $100 for driving a car "without reasonable consideration for other persons," and $100 for failing to give her name and address after an accident.

Through her counsel, as usual, she pleaded not guilty to the first summons and guilty to the second. Her lawyer read out a statement prepared by her and strongly intimated that all the constables in the country were prejudiced against her driving.

In her statement she alleged that the accident in which she was involved was due to the other motorist not keeping a proper lookout. On the second charge, she said she was unaware that she had to give her name and address in a case where no persons were injured.

Knitting Competition For Women of Empire

Fifty organizations of Australian women, urban and rural, are making busy preparations for the Centenary Celebrations beginning in October next year. They are raising £50,000 by a shilling drive and hope to gain much more by selling little books and certificates giving biographies of women pioneers and graphic scenes from their lives. A bronze statue will probably be erected bearing memorial panels to women pioneers. Country nursing colleges, a cancer hospital ward, extensions of children's welfare work, a college of social science, civic beautification schemes—proposals like these make up an extensive program. One of the features will be an Empire Knitting Competition with Australian wool, for which there will be rich prizes open to every woman under the British flag. Full information can be obtained from Brigadier-General Jess, Town Hall, Melbourne, Victoria, Australia

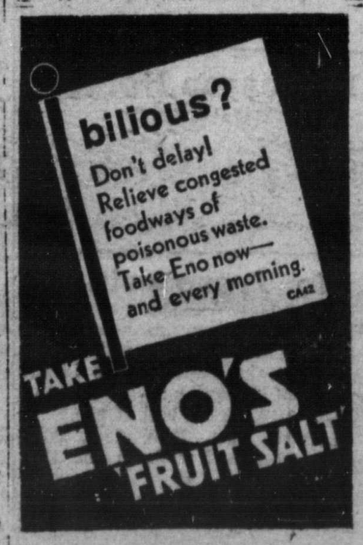

Oldest Town Crier in England

Sam Smy, of Orford, the oldest town crier, has just celebrated his ninetieth birthday. Mr. Smy was a powder-boy in the Crimea, and has 200 grand and great-grand-children.

He became town crier 70 years ago, and nearly all the inhabitants of Orford are his relatives.

Mr. Smy's duties are very varied. He must call the inhabitants to a fire when one occurs. He also takes visitors to the castle and tells them all about it.

In private life he is the village rag-and-bone man, newspaper man, chimney sweep and fisherman. He has a small holding on which he keeps pigs and poultry and grows vegetables and fruit

Bill Hay — Show Boat Sound Effects — Forbes Randolph To Present Novel Broadcasts

The Inside Story of Bill Hay.

"Here They Are . . . ."

That familiar voice with the Scotch burr presenting Amos 'n' Andy, is as well known to millions of listeners as the dusky characters themselves. And well it might be, for Bill Hay has been identified with the boys as their announcer as long as there has been an Amos 'n' Andy. He has been announcing Correll and Gosden, creators of the characters even before that, for he also officiated at the microphone for them, introducing San and Henry, predecessors of Amos 'n' Andy.

Hay's association with the two black-face comedians began with the creation of their first act, the afore mentioned Sam and Henry, in Chicago. He announced their first program, and the "Here they are" was an involuntary bit brought about because the boys had him laughing so hard before they ever took the air, that he was short of breath and couldn't gasp anything else. The broadcast went well and the phrase stuck.

No matter where the boys are, Hay introduces them on the air for their program, even though they may speak from New York and he from Chicago. In fact as an announcer he is a specialist, having only two network programs, Amos 'n' Andy and the Goldbergs. The sponsor of both programs liked his work so well that they decided he should announce their second program as well as the first, even though it was produced in New York. So Hay goes on from Chicago each night with the actors working before the microphones in the New York studios.

Sound Effects.

Have you ever wondered how sound effects are made during a radio program?

Let us take Show Boat for instance with the help of two men and enough gadgets, all the sounds of the actual docking of a Mississippi steamer are produced with faithful accuracy each time the Show Boat warps into her landing. The various noises of the water are so intricate, and so much an intregal part of the show, that the sponsors of the program hired two technicians to devise and operate the scores of contraptions necessary to make the sounds called for in the script. The thrashing and turning of the paddle wheels and most of the other sounds are artificial but the wheezy show boat calliope tune which inaugurates the program each week, however, is played on a life sized calliope, which is run by compressed air. It hasn't been tuned for years—purposely, so it will sound like a real show boat.

* * * * * *

We Hear That—

B. A. Rolfe goes yachting .. Ralph Kirbery goes fishing .. Vincent Lopez sings into the mike with his eyes closed .. Julia Sanderson is annoyed by badly dressed men .. Lanny Ross continues his musical tuition .. Wayne King flies his own airplane .. Ben Bernie plays a good hand of bridge.

Forbes Randolph, director of the "Theatre of the Air" in Toronto, is planning something different for radio broadcasting. Forbes promises big things in the way of entertainment for this Fall.

Jimmie Shields is being primed for his debut on Ed. Wynn's new network.

CFRB spent close to $5000 for their studio at the Exhibition to show how a program is actually presented.

Shorts in Favor With Tennis Stars

So Says Official of Referee's Committee at Forest Hills in Discussing Players' Dress

New York.—Much water has flowed over the dam since Molla Mallory appeared daringly on a tennis court in a skirt that reached less than a foot below her knees, and Mme. Suzanne Lenglen walked blithely up to the net without stockings.

The lady racquet wielders are now going in for shorts, or tennis panties, and whoopee socks. The English stars, Betty Nuthall, Dorothy Round and Mary Heeley have been wearing shorts at Forest Hills and so has Helen Jacobs, the United States champion.

"They provide much more freedom of movement," said Miss Jacobs. "Skirts are frightfully heavy on hot, perspiring days."

Mrs. L. R. C. Mitchell, captain of the English team, has refused to follow the vogue, but Miss Round, a Sunday school teacher, said she considers white shorts "both modest and sensible."

Tennis officials declare their judgment is not affected by the sight of bare legs flashing across the court.

"Costumes," said Kimber Seward of the referee's committee, severely, "never interfere with our watching the ball in play."

Let us have faith that right makes might; and in that faith let us to the end dare to do our duty as we understand it.—Abraham Lincoln.

Slimming Model

By HELEN WILLIAMS.

Illustrated Dressmaking Lesson Furnished with Every Pattern.

It's the coatlike or utility dress that is first choice for early fall wear, and is lovely in eel-gray faille crepe silk.

It can also be fashioned of satin crepe, worsted crepe or tweed.

It has many slenderizing features as the graceful cross-over closure, soft revers and wrapped skirt effect.

It's simplicity itself to make.

Style No. 2805 is designed for sizes 16, 18 years, 36, 38, 40, 42 and 44 inches bust.

Size 36 requires 4 yards 39-inch material with ¾ yard 39-inch contrasting.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 15c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Stockingless Women at Famous Cricket Match

For the first time fashionably-dressed young London women without stockings were seen at Lord's, classic cricket ground. And at Bisley, famous rifle ranges, a woman competitor wearing flannel trousers walked on to the platform where prizes were being distributed.

The origin of the ceremony of laying a cornerstone is of greatest antiquity, and according to some historians sacrificial rites were practised when laying the foundations of a building.

Bought First Copy Of "It's a Long, Long Way to Tipperary"

English Music Hall Singer Tells How Song Achieved Popularity with British Troops

The woman who bought the very first copy of "It's a Long Way to Tipperarp," and was the first woman artist to sing it, 21 years ago, has been revealed by a reader's letter to the London Sunday Chronicle.

She is Miss Winifred Ray, of Birmingham.

"I thought you would like to see the first copy of the song ever sold," she writes.

SALARY TREBLED.

Miss Ray, a well-known music-hall artist, bought the part rights of the "song that won the war" from its author, Jack Judge, for 11s 6d. This was in February, 1912, a few weeks after the song had been written.

"I produced the song first at the Grand Theatre, Gravesend, on March 12, 1912, and sang it with great success both in London and the provinces. It more than trebled my salary and lled my date book.

"By the end of 1912 the song was being sung all over the country, and at Christmas I sang it at the Manchester pantomime," she writes.

"Tipperary's" world fame came through a stroke of chance. When the Lancashire troops landed in France in the early days of 1914, they marched to camp singing the song, because at Blackpool and the Isle of Man that holiday season "Tipperary" was the song hit of the moment.

Plane Carries 128 Outstripping DO-X

Moscow.—An air liner which in size far outstrips all other land planes so far constructed made a short test flight recently at Kharkov, capital of the Ukraine, where it was consructed. The new plane, designed the K7, will have a carrying capacity of 128 persons, with sleeping arrangements for 64. Part of the 16 four-berth compartments will be constructed in the wings.

The only other plane which approaches the K7 in size is the DO-X flying boat. The largest land plane previous to the construction of the K7 was the Soviet ANT 14, with a capacity of 37 passengers. The ANT 20, which is scheduled to take the air this spring, is expected to carry 60 to 70 persons.

The German flying boat DO-X, on one of her first test flights over Lake Constance in 1929, carried 169 passengers.

Careless Trainmen Executed in China

Shanghai.—Three trainmen whose alleged carelessness resulted in a wreck between Kiukiang and Nanchang that caused between 30 and 50 persons to be killed or hurt were executed by provincial authorities.

The wreck occurred on a Sunday when the train jumped the track. Of the 500 passengers, 200 were military cadets.

Earliest references to the cigarette occur in the literature of 1842 and 1843, where it is stated that cigarettes were smoked in France and Italy.

Two Favorites

George Brent and Ruth Chatterton are shown holding two unlisted guests at the barn dance given recently by Kay Francis at a popular Hollywood night club.

Woman's Chatter...

By MAIR M. MORGAN

MEETING YOUR FUTURE PARTNER

It seems that nowadays, people are not so likely to have such unusual ways of meeting the one and only. Dr. Behler, a Viennese psychologist recently put this question to more than 5,000 Austrians in all walks of life: "How did you first meet your wife?"

And the replies revealed:

Most marriages—28 per cent of the replies—were the outcome of childhood friendships.

Fifteen per cent of the husbands met their wives through their parents or relatives.

Nearly 13 per cent disclosed romances that started in offices or factories.

Ten per cent found their future wives on the field of sport.

Nine per cent met on holiday trips.

Eight per cent met in "artistic circles".

Only seven per cent of the marriages were the sequels to meetings on the dance floor.

And 2½ per cent found their future wives through dropped handkerchiefs, unexpected showers, and other situations so well-loved by the film scenario writer.

How did you meet the partner of your joys and sorrows?

* * * * * *

ANY WOMAN — ANY COLOR

According to an authority on make-up "Any woman can wear any color if she chooses the proper cosmetics."

For example, you hear many girls say that they can't wear black and they can't wear white. They maintain that a combination of the two makes them look deathly. However, with proper shades of powder, rouge and lipstick, these combinations may be worn becomingly.

You should have a powder that is slightly rachel in tone. See that its creamy lights are high ones. Rouge should be red with a hint of orange in it, and your lipstick should match the shade of the rouge.

Green eye shadow will give your eyes the brightness needed to wear black and white, and black mascara will make your eyes seem larger and brighter.

Age isn't important. Young girls may wear black dresses in youthful manner and older women may wear all the vivid shades of green, red and blue without detracting from the beauty of their skins. The trick lies, not in the age of your complexion, but in the shades of cosmetics which you choose.

A LONDON TIT-BIT

An English columnist writes in a weekly periodical: Well, I think the following, from a fellow gossip, is one of those well-meant things which might have been put differently: "I climbed the stairs at Londonderry House. . . . As the guests walked up two by two I could not help thinking of Noah and the Ark. Lord Londonderry was the most magnificent of Noahs". A bit hard, say I, on the other guests.

* * * * * *

SCREEN SNAPSHOTS

The little things of life: With trunks full of imported creations, Norma Shearer, one of the screen's best-dressed women, is certain to be found wearing slacks and sweater during her recreation hours away from the studio.

John Barrymore's favorite home ensemble consists of tennis shoes and sailor dungarees, held up by a knotted piece of rope.

Marie Dressler wouldn't trade the homey comfort of a quilted kimono for anything.

Jean Harlow prefers an old pair of tennis trousers and beach jumper to all the glamorous styles in her wardrobe.

Although she has hundreds of pairs of shoes in her boudoir, Joan Crawford has had one old pair of mules kept in repair for years.

Robert Montgomery's wife keeps trying to throw away a frayed polo coat, but he always manages to get it back to make his long motor drives in perfect comfort.

* * * * * *

BOOKS

"Flight From The City" by Ralph Borsodi is a book that all of us whether city, country or in-between should read. The "Borsodi Experiment" has attracted national attention. With his family Mr. Borsodi moved to the country twelve years ago and established a self-subsistence homestead. The success of his experiment has been notable. And in this book he tells just how he has accomplished it. Capital requirements, costs, what are worthwhile domestic production projects and how to operate them are all discussed in this book. It is obtainable through the Musson Book Company, Ltd., 225 Jarvis Street, Toronto.

Infant Born on Boat Dies of Malnutrition

Little Rosemary Wilson died after two months of bare living on a Mississippi river boat. And the story of her short span of life may well parallel old narratives of the covered wagon days when the plains country first saw white men and women.

Her father, Fred Wilson, is an experienced vaudeville trouper. Both he and his wife were born at Louisville, Ky., and there he started his three-a-day career. Little Rosemary had six brothers and sisters

Trouping is a grand profession, Wilson says, but who wants troupers to play on hollow boards in empty theatres? The rent was due, the cupboard was bare, the "kids" needed clothing and shoes—and the booking offices offered nothing. An old automobile was the height of the family's assets. The car was sold and two boats purchased, and the Wilsons packed up—for a trip down the Mississippi from an Indiana city.

Rosemary was born on the river in one of the boats.

After two months, the little girl who through her short life had never known anything but hunger, was taken ashore at Fort Madison. Kindly police officers and a king's daughter nurse took her to a hospital where doctors said "malnutrition."

A few days later she died. Her body was buried in Fort Madison. Then, as the Wilsons said, they continued their trip downstream — "as dad looks for a job."

Bride Wheeled to the Altar

With a nurse for bridesmaid and a doctor within call, a frail bride was wheeled in a bed carriage to the altar of St. Stephen's Church, Salford, England.

The bride, Miss Gertrude Dixon, was taken seriously ill three weeks after every arrangement had been made for her marriage to John Lewers, also of Salford.

"Despite having to undergo an operation, Gertrude wished to go through with the ceremony," a member of the family said.

"To avoid having a crowd—which would have unduly excited her—the wedding was kept a secret."

Geranium Has 90 Blooms

Pontiac, Ill. — George Mann has found the perfect method for culture of geranium plants. Each fall he hangs the plant, which he purchased four years ago, upside down in the basement to dry. In the spring he re-plants it in rich soil, feeds it plenty of water, and cares for it tenderly. This spring the plant had ninety blooms.

A silver cake plate, donated by A. Kriff, local jeweler, for the fastest heat of the day, was tied by the winners of both events and in the draw was won by Mr. Mulligan, of Iroquois, Ont,

Gatineau Team Again Trounces Pontiac Riflemen

The second and final stage of the rifle shoot between Gatineau and Pontiac counties for the De Salaberry cup was shot-off on Wednesday of last week at the Somerville ranges.

The Gatineau team increased their former lead by 26 points over their opponents. Their lead in the first stage, put on at Kazubazua the previous week, was 43 points. Total for both stages, 69 points.

A feature of the shoot was C. Coyne's strong finish after a weak start. He put on a "possible" at the 600 yard range.

In Memoriam

In loving memory of our dear husband and father, William Thompson, who departed this life, Oct. 2nd, 1931.

The angel of death, so fair and white,
Called in our home in the morning light,
And gently led him by the hand
Safe home to Heaven's borderland.
And though two years have passed away,
We still remember him to-day.
In memory sweet your presence dear.
Is ever with us father here.

Wife and Family.

Mrs. Carlie D. Wilson Dies in an Ottawa Hospital

The death occurred at the Civic Hospital, Ottawa, on Sunday morning, Sept. 24, 1933, of Sarah Florence Helmer, aged 40 years, beloved wife of Carlie D. Wilson, of Kemptville, Ont., formerly of Shawville.

The late Mrs. Wilson had entered the Civic Hospital for surgical treatment about four week's ago and up to a short time ago seemed sufficiently improved to return to her home when other complication set in which proved more than she was able to endure.

Besides her husband and three children of tender years, Carleton, Margaret and Laura, she is survived by her mother Mrs. E. Helmer, of Shawville, one sister and several brothers.

The remains were conveyed from Ottawa on Sunday afternoon for the funeral which was held on Tuesday afternoon from the home of the deceased's mother-in law, Mrs. Jas. Wilson, to St. Paul's Church and cemetery.

CANADA'S RACIAL MIXTURE

Of the population of Canada 52 per cent. are of British origin; 28 per cent. French origin; 17.5 per cent. all other European races, and about four-fifths of one per cent. Asiatic.

LAWYERS IN PUBLIC LIFE

Although there is only one lawyer in Canada for every 1,600 people, there is one lawyer in the House of Commons for every four members of other callings. The ratio in the Senate is slightly higher, and in the Provincial Legislatures it is about the same. These figures were worked out by Mr. Justice A. F. Ewing of the Supreme Court of Alberta.

ALUMINUM IN CANADA

The aluminum industry has a history of over 30 years in Canada. It began in 1903 with the establishment of the first plant at Shawinigan Falls for the reduction of the metal from its ores.

No Trespassing

Hunting or trespassing on Lots 4, 5, and 6, on the 1st Range of the Township of Bristol, is strickly forbidden. Parties disobeying this order will be prosecuted.

RUSSELL BROS.

Our Schools all opened once more, twenty-three teachers must be paid their salaries monthly. Kindly assist by making payment of arrears of all school taxes and fees as soon as possible. We solicit your co-operation in this matter.

CLARENDON SCHOOL BOARD
E. T. HODGINS
SEC.-TREAS.

In Memoriam

In loving memory of a dear husband and father Samuel Horner, who died Sept. 27, 1927.

Though his loving voice is silent
And his true heart ceased to beat ;
Yet we miss his well known footsteps,
And his face we used to greet.

Wife and Family

Dr. D. J. Campbell, Treasurer of the Cemetery Committee acknowledges the following subscriptions to the improvement fund :—

A. S. Smart, Edmonton	$5.00
C. L. Dale, Huntington	5.00
W. J. Hayes,	5.00
Frank Armstrong,	5.00
W. J. Dagg, Ottawa,	5.00
Mrs. Lewis Hodgins,	2.00
David T. Hodgins,	2.00
Mrs. C. H. MacLean	2.00
Thos. A. Elliott,	2.00
C. A. L. Tucker,	2.00
Armstrong Bros., Elmside	2.00

A Test for Picking Maturity of Apples

(Experimental Farms Note.)

During the course of investigations by the Laboratory of Plant Pathology, Kemptville, N. S., conducted on the storage quality of apples from various spray plots it has been necessary to try to define the stage of maturity of the apples, both at harvest and at intervals during storage. A few years ago a mechanical pressure tester was used. This instrument registered the pound pressure necessary to force a plunger into the flesh of the apple a fraction of an inch. It was in reality the "thumb test" reduced to a mechanical basis. But like many machines, its accuracy depended on the operator's skill. Several types of these instruments have been tried and may still have a limited use but as a test for picking maturity they leave much to be desired.

Chemical analyses of apples have shown that certain changes are going on in the apple as it approaches maturity. One of these is the gradual disappearance of the starch which has accumulated in the fruit during the preceding two or three months on the tree. It has been found in Australia and New Zealand and confirmed by the Laboratory at Kemptville that the starch content at harvest of some varieties of apples has a decided influence on the development of storage pit as well as their general quality.

The two varieties Cravenstein and Cox Orange have responded exceptionally well to the iodine test for starch as an indication of picking maturity. The test is simple to perform and worthy of trial by growers who wish to market these varieties in their best condition.

To conduct the test a representative sample of 25 or more apples are picked. The fruit is cut in half and dipped for about half a minute in a potassium iodide-iodine solution. This solution is made up of 1 gram of potassium iodide, one-quarter gram of metallic iodine in 100 cubic centimeters of water. After dipping the cut surface of the fruit in the solution it is removed and placed with the treated surface up to let the colour develop. The iodine solution turns starch a blue-black. For the best picking maturity there should be no starch in the core area and one-half or more of the rest of the flesh of the apple should contain no starce. In other words, one-half or less of the flesh outside the core area should turn blue-black but if there is no blue colour the apple is over mature.

This method of testing is not offered as a cureall for our storage troubles of fall varieties of apples. In our experience, however, the fruit harvested at a time when the starch was present only in a part of the flesh, as suggested above, was superior in storage and quality and freer from storage pit to the earlier harvested fruit. Seed colour is not a reliable index of fruit maturity.
