**Gold and Silver Medals at the Expositions of Paris and Lyon.**

**COMMISSION.**—Careful manufacture, first class house.—**EXPORTATION.**

Besides the large instruments, built for churches and cathedrals, the **Chas. Mutin** factory has just placed on the market a really new organ, of which the following advantages render it indispensable.

It is no larger than a good harmonium, its tone is sweet yet as powerful as the large organs. Owing to its skillful arrangement of pipes, it does not get out of tune, and its tone accompanies the voice better than any other instrument. It is expressive by means of a knee-swell, acting like the large organs, to allow of the *forte* and piano. The organ is self-pumping. The key-board can be transposed. The mechanism of this instrument, being the same as the large organs, is of wonderful durability. Each piece being securely fixed in its place makes transportation as easy as that of any harmonium, and the organ of which we speak is ready for use when it arrives.

**SIX DIFFERENT MODELS,**

From 3 Stops and 6 Draw-Stops to 7 Stops and 13 Draw-Stops.
