

THE DAIRYMAN

An affection which is variously known as hoove bloat, dew bloat, frog sickness, grass sickness, etc., is familiar to the farmers on grass farms. The principal cause of hoove is fermentation of the food and the consequent generation of gas in the rumen or paunch. The food most prone to undergo this fermentation is rich, succulent grass or that bedewed with moisture. All animals eat more or less greedily on being first turned into the pasture, and if it be a fresh one, particularly young clover, they rapidly and with scarcely any mastication gorge themselves. The passage of air into the stomach with the rapid and large gulps materially assists in the process of fermentation and adds to the accumulation of gas. This unnaturally overloaded condition of the stomach soon induces suspension of the parietal action of the organ and the digestive process being checked, active fermentation soon follows. Decomposed or frosted vegetables, particularly mangolds, will also give rise to hoove. The symptoms are most distressing. The paunch is blown up like a bladder and when struck with the hand sounds like a drum. Probably there

OPERATION FOR HOOVE.

(The cross shows where to puncture for relief.) are few diseases in which the animal suffers such intense agony as in this. He gets up and lies down; respiration is difficult from the distended stomach pressing against the lungs; he evinces his pain by striking his belly with his feet; if no relief is given the brain soon becomes affected, evidenced by the animal becoming unconscious; the breathing becomes more difficult, and the poor animal falls, unable to rise. The disease runs its course very quickly; hence the necessity of prompt and decided measures.

Ohio Farmer, in which the foregoing account of this trouble occurs, advises treatment as follows: The first object is to get rid of the accumulated gas, and if the paunch is very much distended and the danger of death immediate recourse should be had to puncturing that organ. The puncture should be made on the left side at the point indicated in the accompanying diagram. The usual directions for finding the proper place are to measure a hand's breadth from the last rib. More definite directions are to locate a point equidistant from the hip bone, the last rib and the lateral processes of the backbone. The proper instrument for puncturing is what is called a trocar, the cannula or case of which should be left in the wound for some time so that the gas generated may escape as fast as formed. It is not often that the farmer possesses an instrument of this kind, or if he does it may not be at hand when it is most needed. A dose of one to two pounds of epsom salts or a quart of raw linseed oil after puncturing is beneficial.

New Creamery Law in Iowa.

The legislature of Iowa has passed a law requiring all creamery operators to pasteurize skim milk at 185 degrees before delivery to the patrons. The bill went through both houses with substantial majorities. It is understood that the moving cause of the law was the spread of tuberculosis among hogs that are fed on the ordinary creamery skim milk. If every farmer would do as he should do and tuberculin test his cows once each year he would soon have none of this disease to destroy our cows and hogs. When the pinch comes, maybe some of them will see it.—Hoard's Dairyman.

Water Content of Butter.

In experiments at the Wisconsin station working the butter immediately after washing slightly increased the water content of the butter over that obtained when granular butter was allowed to drain about half an hour before washing. Allowing the granular butter to stand in water for some time increased the water content of the butter as compared with working immediately after washing. Increasing the amount of churning in the wash water did not always increase the water content of the butter.

WAYS OF GREAT MEN

LITTLE TRICKS AND HABITS THEY HAD IN YOUTH.

Characteristics of Famous People Which You May Have But Which Are Hardly Likely to Win You Name and Fame in the World—Carlyle, Goldsmith, Dickens, Lander, Sir Walter Scott, Keats and Thackeray.

Does your fond nurse remember that you came by speech prematurely, you may plume yourself on your resemblance to Carlyle, who, at the age of eleven months, having till then been as inarticulate as he wished the world to be, amazed the crying of another child, by asking, "What ails wee Jock?" Were you a roarer in infancy, take comfort from Carlyle again, for he told Prof. Masson that he was almost always crying. Goldsmith is a decidedly equivocal example. All his youthful contemporaries pronounced him "a stupid, heavy, blockhead, little better than a fool, whom everybody made fun of." Whence the majority of aspiring men might take a lesson. Yet Goldsmith was capable of repartee from a very early age. Once when he danced a hornpipe for the amusement of a party at his uncle's house, his poor, seamstress-faced aunt, who moved the unmanly fiddler to call out, "Aesop!" whereupon little Oliver promptly retorted: "Here Aesop, proclaim aloud this saying, 'See Aesop dancing and his monkey playing.'"

Absent-mindedness has been characteristic of many great men; it is one of the surest tests to the hand of him who seeks to know whether his habits give him promise of distinction. Once Goldsmith, always "distracted," you can't acquire the trick of dreaming. So, if you are scatterbrained, you may know that it is possible for you in the making of a Darwin or an Adam Smith. The author of "The Origin of Species" was not a sportive boy. According to one schoolfellow, at least, he was reserved, frequently lost in thought, and fond of long, solitary rambles. It is recorded that he once had a fall from old Shrewsbury wall, when he was walking in a brown study. The case of the late Sir John Lubbock, who was more desperate, for he added to a precocious absence of mind a disquieting habit of speaking his thoughts aloud. He was never cured. Once, when he was invited to dinner at the Duke of Devonshire's, he fell into a reverie after dinner and began to discourse audibly upon the demerits of the distinguished guest. Some one woke him, but in his confusion he straightway, relapsed, and was heard to mutter: "De'll care, de'll care; it's all true." Delicate lads may cherish the hope of a "bounder." Dickens was, as he says, himself, a "very queer small boy."

LOVE LETTERS TO KING.

Sold at Auction, 300 of Them Fetch Five Dollars Each.

Recently there was witnessed the sale at a collection of 338 love letters written to an English King. They were written by Dorothy Jordan, the once famous actress, and the recipient of the missives was the William Clarence, known to history as the "Red Rover." These letters were given to Lord Frederick Fitzclarence by Queen Adelaide on her taking possession of Bushy House, the residence of the Duke of Clarence, and they give a full and minute description of Mrs. Jordan's theatrical life, as well as much other of court life of the period. They abound with expressions of her attachment to the Duke and her solicitude for the welfare of her children.

WAYS OF FAR EAST.

Indian Princess and Western Nurse—Hamilton and Geisha.

A British trained nurse in the Far East writes as follows about a "case" on which she has been engaged recently. It was on a case now, and am writing from the palace of —. I am nursing Her Highness the Maharani of —. She is suffering from fever and rheumatism, and two doctors are also in attendance. She is a most trying case to manage. I have such trouble! She suspects we wish to poison her so that the Government may seize her estate. She has to taste every dose of medicine before she will take it. The palace is gorgeously furnished, and she lies on a golden bedstead. My own room is a simple affair. I do not know the golden (not gilt) mirrors; but, alas, no bathroom. I have to go out in the garden and wash at the pump!

Death of a Noted Divine.

Prof. Thomas Smith, an eminent Indian missionary, and the father of the United Free Church of Scotland, died in Edinburgh the other day at the age of eighty-nine. Dr. Smith was for a short time chaplain to the Black Watch during the Indian Mutiny and was invalided home in consequence of an attack of cholera. For some years he edited religious papers in Calcutta, and he originated the scheme of Zenana missions. From 1890 to 1893 he was professor of Evangelistic Theology in New College, Edinburgh, and he was secretary of the General Assembly in 1891.

Fortune For Laborer's Wife.

Mrs. Maclean, of Harrington, near Worthington, Cumberland, whose husband earns \$14 a week as a laborer, has come into a fortune of \$85,000. It is her share of \$50,000 left by a bachelor uncle in Australia. Maclean was earning only \$4.75 a week a few months ago, when he obtained his present employment at the Moss Bay Steel Works. The couple have had nineteen children, which he made a practice of handing the shilling back to the astonished fare. "But I can't sell him, gov'nor, 'n' that's a fact. Yer 'andsome offer'd me a rich job like, but I tell yer, I can't sell 'im."

THE READY REMEDY.

When trouble after you doth chase, Why, turn and stare her in the face And she will hurry from your sight; A smile will fill her full of fright. So smile.

When worry hushes after you, And dyes the world a sombre hue, A grin will drive her far away. So let your wretched muscles play. And smile.

INSATIABLE PLAYGOERS.

Curious Patrons of Theatres in "Dear Old London."

The managers and box-office keepers of London theatres are struck with the stories of the eccentricities of their patrons. A certain gentleman, for instance, has never missed a single performance at the Vaudeville theatre since the first day of "The Belle of Mayfair." The curious point about him is that he always takes two stalls, reserving one of them for his own use. At Day's theatre there is also a patron who for many weeks has never missed a performance, and has intimated that he would like to see the theatre closed, reserved until his leave of absence from his regiment in India expires.

At the Gaiety theatre there is a pit customer, who, ever since the theatre was built, occupies the same corner seat Friday night, and for some years before did the same thing at the old Gaiety. When the old Gaiety was in existence, the Duke of Devonshire, every night until a certain lady in the company left to go on tour, when he, too, left to follow her silently round the city. Recently, the Duke appeared at another London theatre for a short engagement, and a devoted admirer appeared in the gallery.

Another well-known patron of the play-houses is a young man who goes to every matinee of the newest musical comedy. He arrives without fail, and punctually at half-past four leaves the theatre and drives away in his carriage. This continues every week until another musical piece is produced, when at once he transfers his customer's seat to another theatre.

Last year during the Covent Garden opera season a colonial ex-Premier arrived one evening, in ordinary walking costume, and when he found the theatre empty, he was indisposed to borrow a white tie from the management, and keeping on his overcoat took his seat. He went to the opera every evening, and always insisted on borrowing the white tie.

Australia Has Deepest Gold Mine.

Australia now possesses the deepest gold mine in the world. It is the Bendigo mine, situated at the New Chum Railway at Bendigo, Victoria, where has been sunk to a depth of over 4,300 feet, and the quartz there topped has been analyzed and found to contain gold to the value of \$1,500,000.

THE Victorian Director of Geology.

It was seen of the portion of the picture thus removed, when it fell into the hands of a dealer, who restored it to the then head of the Victoria Museum. A student of the Victoria Museum was practicing on a valuable painting, "The Field of the Cloth of Gold," the property of Charles I. When Cromwell negotiated the peace of Westminister, the king's royal picture was found there. The picture was found there, and the king's picture was found there.

Gerard's Singing Lesson.

Stories of Manuel Garcia, the famous cantarina musician, who died a few days ago in London, are in order. An indomitable will power gave him great ascendancy over each pupil; his science and cleverness enabled him to know at once if he had to deal with a pupil of ordinary or of extraordinary talents. He was not allowed to waste his time and theirs. An acquaintance describes a typical incident: "I remember a notable case in point. A very rich woman offered the master any price if he would only teach her daughter. He refused, knowing well he could never obtain serious work from her; but, when the mother persisted, he hit upon a compromise. He asked the woman to be present during a lesson, and he undertook, if the girl still wished to learn singing after hearing it taught, to teach her. The lesson began. The pupil, who seemed to the listeners an al-pupuly finished singer, had to repeat passage after passage of the most difficult exercises before the master was satisfied; he insisted upon the minutest attention to every detail of execution. Mother and daughter exchanged horrid glances, and looked on pityingly. The lesson finished, the master bowed the woman out, and in passing the pupil, the young girl whispered to her, 'It would have been so much better, returning from the door, said contentedly: "They will not come again. Thank you, most infant; you sang well!"'

Vanishing Sea Coast.

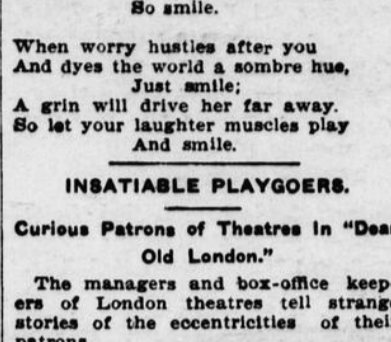

A letter was read at a meeting of the Walton-on-the-Naze Urban District Council recently from the Great Eastern Railway Company, directing attention to the need of the sea defense works near the railway line being further strengthened. At one point the sea is stated to have succeeded in within about sixty feet of the railway, and the erosion is still going on.

Strange Places Where Famous Works of Art Have Been Discovered.

The recent discovery of a valuable fresco in the mountain home of a Moroccan, bears remarkable resemblance to the romantic vicissitudes of old masters, many of which are at least as strange as fiction, says London Tit-Bits.

If pictures had tongues what curious stories of wandering and adventure some of them could tell! Take, for instance, that magnificent picture of Titian, a canvas sixteen feet long and seven feet high, representing the entombment of Christ, which was lost for centuries, only to come to light in a church in the heart of Mexico; or that portrait of Neil Gwynne, by Sir Peter Leij, which was discovered not long ago by a doctor in a Birmingham slum.

Take too Raphael's famous mosaic of the Innocents, which was found, after generations of disappearance, in the cottage of a poor widow at Compo. Piece by piece it was possible to reconstruct some of the history of this treasure of art, and a strange story it is. At one time it belonged to the celebrated Cardinal Ypobito d'Este, Aristotle's patron, from whose hands it passed into those of another cardinal, Luigi d'Este. At his death a priest of Reggio became its owner, and he, after refusing three times this sum for it, presented it to the Duke Alfonso d'Este, who in turn gave it to the Princess Margherita Gonzaga, his niece.

When the princess died the picture passed to the Duke of Urbino, and from that stage of its history nothing more was heard of until 1684, when the Duke d'Este employed a Franciscan monk to find it at any cost. For five years the monk sought everywhere in vain, and at the end of the time he returned to the duke, having travelled all over Italy on his quest and employing every means, both spiritual and mental, he was forced to procure the picture at a price of two and a half centuries later, the long lost picture has come thus strangely to light.

A few years ago one of Albert Durer's masterpieces was discovered, dust smothered and despised, among the lumber in a granary near Courtil. The farmer—a woman—took it into her rubbish, and for a few coppers she was glad to get the son of the local coach painter to remove it, including the "cherry piece" of the canopy of the painting was cleaned and submitted to an expert, who recognized it as a Durer which had been stolen from the National Museum of Munich many years ago.

Among some old canvasses which were knocked down for the equivalent of a few shillings at an auction sale at the end of the last century, a very less restorer of old pictures, was a very inferior picture of flowers which was practically worthless. The canvas, however, turned out to be a most valuable one, and was sold for a large sum.

There has been completed recently a very handsome pulpit for use in St. Catharines Church, and the peculiarity about it is that it runs on wheels. The structure is five feet long, and measures 9 feet between the wheels, which are covered with rubber, and are mounted on rollers on the stone floor. The system works very smoothly, and the pulpit is wound in and out before and after the sermon by turning a wheel about twenty times. The total cost was \$200. The pulpit was consecrated by the Bishop of Carleton Place. It is to be in perfect working order for Sunday next, and was used for the first time yesterday. It is the only pulpit on rails consecrated by a bishop.

NOTES OF THE WEEK

While a Montreal mechanic was returning home on the afternoon of the 15th July he was struck by an automobile and killed. The driver was tried for manslaughter, convicted, and sent to penitentiary for six months.

The annual bazaar in connection with the orphanage is to be replaced this year by a "popularity contest" among 28 of Valleyfield's most attractive and amiable young ladies.

The Guy Bros. gave a performance in the cercle Smark Friday evening. They presented an excellent program to a crowded house.

The second regatta of the season was held, under the auspices of the Valleyfield Boating club, Saturday afternoon. The principal event was the race for the cup presented by Mr. Bergevin, M.L.A.

A sharp demand for hay for export has sent the price up, and it is likely to continue high.

Affairs in Cuba are causing anxiety as to possible complications. The rebels continue to destroy railways and other property owned in Britain.

General Troppoff, the head of the Russian police, and the director of the severe course pursued, was found dead in his bedroom Saturday evening.

on which he would do so, was the surrender of the revolutionists. The leading men of the town, who composed the delegation, replied that was impossible for they did not know them but they were willing to be taken into custody as hostages for the good behavior of the citizens.

HUNTINGDON FAIR

Held Thursday and Friday, was the most successful, both in exhibits and attendance, the society has known. It proved Huntingdon fair keeps its old hold on the people, and that so far from going back it is advancing.

On the ground floor there was the largest competition in butter and cheese for a number of years, yet small when the number of factories is considered.

That furs are manufactured in the district is known among ladies, who have for years patronized Mr. Ostiguy of Valleyfield in getting repairs and garments made over.

The excellent demand for horses has stimulated their raising and the pre-eminence of the fair was palpable not only in heavy-draft, but in general-purpose and carriage horses.

In cattle Ayreshire continue to predominate, and the prizes were awarded to two as good judges as there are in the province.

Of sheep it can only be said they continue to hold their own. In swine the entries were fewer but the quality was well maintained.

The large building held a fine display of vegetables as in any previous year. The advantage of having an expert judge is being shown in the better choice of varieties.

In bread the competition surpassed all previous years. This was largely due to the enterprising firm of Hunter & Sons offering a barrel of flour for the best loaf, and half a barrel for

the best biscuit made from flour of their manufacture. Those who competed entered also for the society's prize, so that there was the surprising number of 30 entries. The judge said he had never met with so large a collection of fine loaves, and congratulated the district that had so many A1 bakers.

Cynical Views Held by Twelve-Year-Old Essayist.

"If women were in Parliament you wouldn't hear the men talk!" is the opinion of a twelve-year-old schoolboy of the L. C. C. school in Cromwell street, Gray's Inn road, who shows a knowledge beyond his years.

The subject, "Ladies of Love Met, and How They Impressed Me," was set last week for an essay, and the class of boys all under thirteen, has expressed some very novel views on the subject.

One can imagine that the master who set such a question is something of a humorist, and he has not been disappointed in the replies.

"Beyond me a character as being chatter-box," writes one budding Emile Relex, while another scholar, more gallant or more fortunate in his acquaintance, says, "Ladies are neat, gentle and an example for men."

Another twelve-year-old savant prefixes his views with the remark:—"Ladies are sometimes referred to as the 'queen of the world' because they never forget, nor ceased to be grateful for the kindly interest in me and the risk which she person was disposed to take for my sake that day. A great risk indeed it would have been, and would doubtless have cost him his life."

Delony! You have not bled him again, sir?

But Martin Jennings had no more blood to bleed than he had in a part of the prison wall, and indeed, I doubt if he ever bled any one who had not need of either his nostrils or his lancet, and after a last look at my bandages he went away.

Then Parson Downs and my brother's man looked at each other.

"It is of no use, sir," said the man, "if you want to see the doctor, you must go to the prison wall, and indeed, I doubt if he ever bled any one who had not need of either his nostrils or his lancet, and after a last look at my bandages he went away."

"Faith, and I believe he would fall off at the first motion of the horse," agreed Parson Downs, with a great scowl. I looked at him listened to them both, with a curious feeling that they were talking about some one else, such was my weakness and giddiness from that last blood letting.

Then Parson Downs, with an exclamation which might have sounded edifying enough if heard from the pulpit, but which may, after all, have done harm to his heart, fetched out a flask of brandy from his pocket and bade Will Wickett find a mug somewhere, which he did speedily, and he gave me a drink which put new life into me, though it was still out of the question for me to ride that fiery horse which was pawing outside the prison. And just here I would like to say that I never forgot, nor ceased to be grateful for the kindly interest in me and the risk which she person was disposed to take for my sake that day. A great risk indeed it would have been, and would doubtless have cost him his life."

misfortune. To be a convict of one's free will, to protect the maid of one's love from grief, was one thing, but to sit in the stocks, exposed to the fibres of a common crowd, was another.

And more than aught else, I felt the sting of the comedy in it.

To sit there with my two feet straight out, soles to the people, through those rude holes in the boards, and all at liberty to gaze and laugh at me, was indeed a worse fate than to be in the stocks, exposed to the fibres of a common crowd, was another.

Cicely Hyde, like two bridesmaids, came my love, Mary Cavendish.

And while I shrank back, thinking that here was the worst sting of all, like the sting of death, that she should see me thus, straight up to the stocks she came and gathering her blue and silver gown about her made her way in to my side and sat there, thrusting her two tiny feet, in their dainty shoes, through the apertures near mine, for the stocks were made to accommodate two criminals.

And then I looked at her and would have brough her to go, but the words died on my lips, for in that minute I knew what love was and how it could triumph over not only the tragedy, but that which is more cruel, the comedy.

And then I looked at her and would have brough her to go, but the words died on my lips, for in that minute I knew what love was and how it could triumph over not only the tragedy, but that which is more cruel, the comedy.

GUIMARD, THE SPIDER.

The Great Painter of the Great Days of the Belle Epoque.

The elder Vestris, who flourished in the middle of the eighteenth century, called himself the "god of dancing" and declared in all sincerity and without rebuke that his century had produced but three supreme men—himself, Frederick the Great and Voltaire.

THOUGHTFULNESS.

The Simple Way One Woman Won Widespread Popularity.

A popular woman is seldom able to disclose the secret of her charm, but one such person dropped a valuable hint the other day when she said she thought women liked her because she wrote them notes. It seems that whenever a joy or a sorrow comes to any of this woman's acquaintances she always writes a little note of sympathy or congratulation.

A popular woman is seldom able to disclose the secret of her charm, but one such person dropped a valuable hint the other day when she said she thought women liked her because she wrote them notes. It seems that whenever a joy or a sorrow comes to any of this woman's acquaintances she always writes a little note of sympathy or congratulation.
