How to acquire an enduring fortune is a very interesting subject for consideration, and there are great truths, when perfectly understood, that are very plain and simple. All the goods that we can possess are either directly or indirectly derived from the earth, and we should neglect to possess a portion of the most interesting treasure, close beside the beautiful City of Montreal, where the product of an acre of more value than that of fifty acres in the West. Simply for want of will.

To possess the land where the product of an acre is the richest land on terms nearly equal to supply, for one dollar parties can take possession of the land, and in the life of a man some ten or twelve number of weeks, they will be able to acquire a fortune. With building material at very low prices, and with taxes of any consequence, with miles of macadamized or any considerable, extending to the city, omnibuses to the city, and five cents each way, passing through the best part of the city, and one hundred lots from \$1,000 to \$1,500.
