PARC NATIONAL DU MONT-MÉGANTIC

Protected area. Enriching nature experiences.

A national park, an astronomy museum, and an International Dark Sky Reserve, this protected territory invites you to experience nature in all its splendor. Throughout the year, follow hiking trails to the summits; when night falls, look up and let yourself be awed by the beauty of the sky.

At the Parc national du Mont-Mégantic, every visit is a journey from Earth to the stars.

OUR TEAM'S FAVOURITES

A

Visite de jour de l'ASTROLab et de l'observatoire

Discover fascinating activities when you visit the ASTROLab in afternoon: movie Emergence: Cosmic Evolution, 4K projection system, Virtual Reality experience in the Solar System! Pursue your visit at the Mount Megantic Observatory, located at the top of the mountain, for explanation on its operation as well as the work and research accomplished by the astronomers.

The activities are conducted in French.

B

Exoplanètes : en quêtes de mondes habitables

Are there other planets like Earth in the Universe? It's a millennia old question... We now estimate that there are several billion planets in our galaxy. Our vision of the cosmos has been transformed. But have we truly discovered planets like Earth, as the headlines suggest? Join us to celebrate the ASTROLab's 30th anniversary and dive into the thrilling world of exoplanets!

The presentation is conducted in French only.

C

Mount St-Joseph Micro Museum

Discover the new micro museum located in the former Abri du prêtre. A place of remembrance bearing witness to the history of the chapel, immerse yourself in important moments in the history of the Canton and of the site and relive the journey of people who have visited the site, and of the French Canadian colonization of the territory.

D

Escarpements Trail

This 6.7 km loop, situated in the Franceville sector, opens on new landscapes and never seen before rocky caps of the massif: numerous cliffs, rocks overviews, luxuriant lichens, vertiginous points of view. The Pain-de-Sucre hill will reveal itself in its entire splendor.

E

Little Dragons and Little Suns, to your Nuggets!

Stimulate curiosity in your family hikes by browsing the Trail to the Dragon Rest so that your little explorer brings a gold nugget to the reception in exchange a surprise. In the Observatory sector, it is at the Belvedere Sun he will find a lunar nugget. Good discoveries to future great hikers!

F

Astronomie l'hiver

To top off a memorable day of outdoor activities, enjoy a late afternoon visit of the ASTROLab or an evening of stargazing at the ASTROLab every Saturday nights during winter. To learn about the celestial movements and to travel inside our Universe!

The activities are conducted in French.

DISCOVER OUR TRAILS

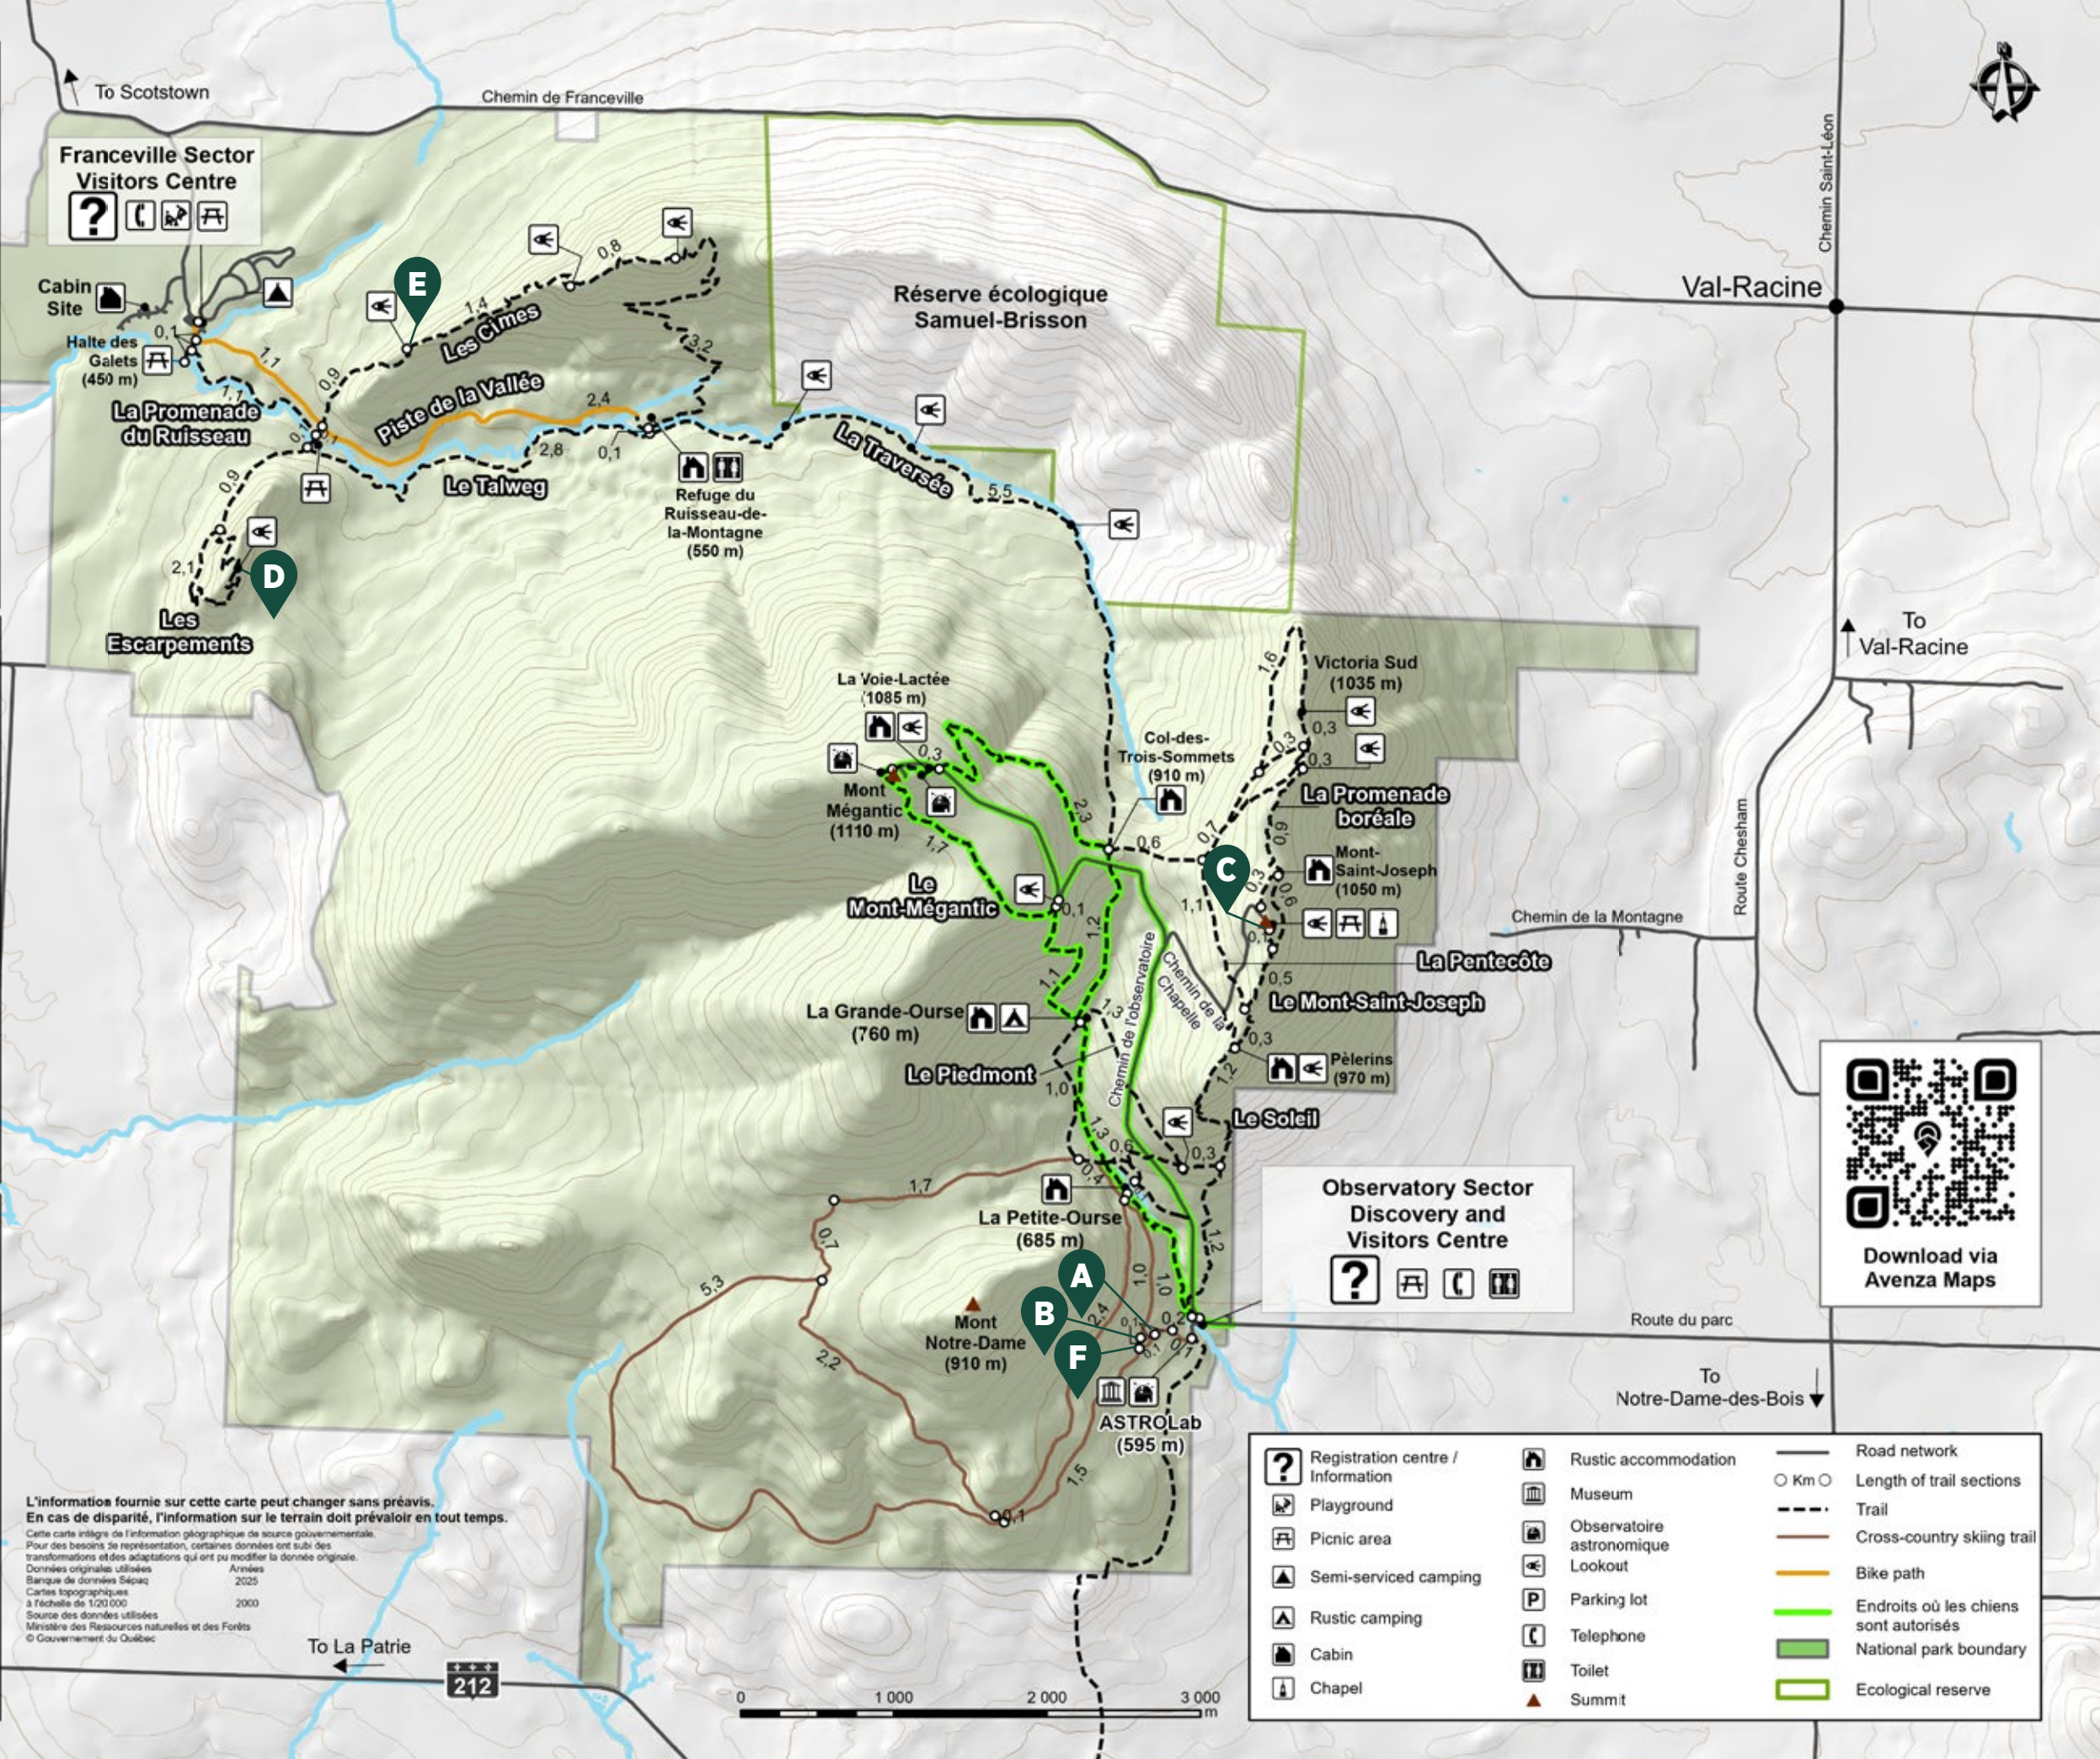

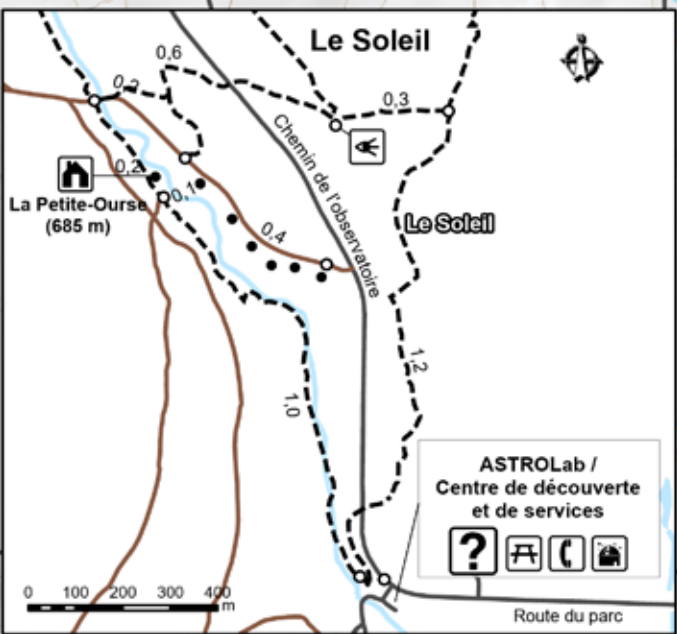

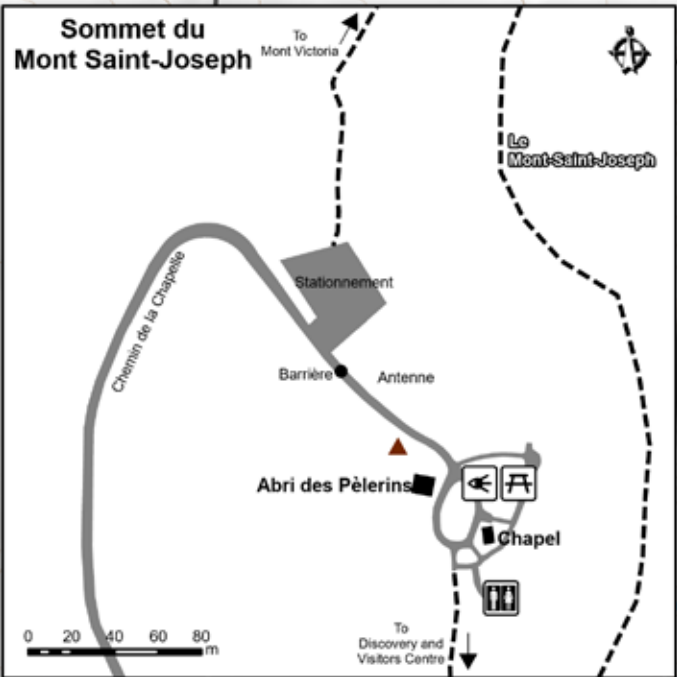

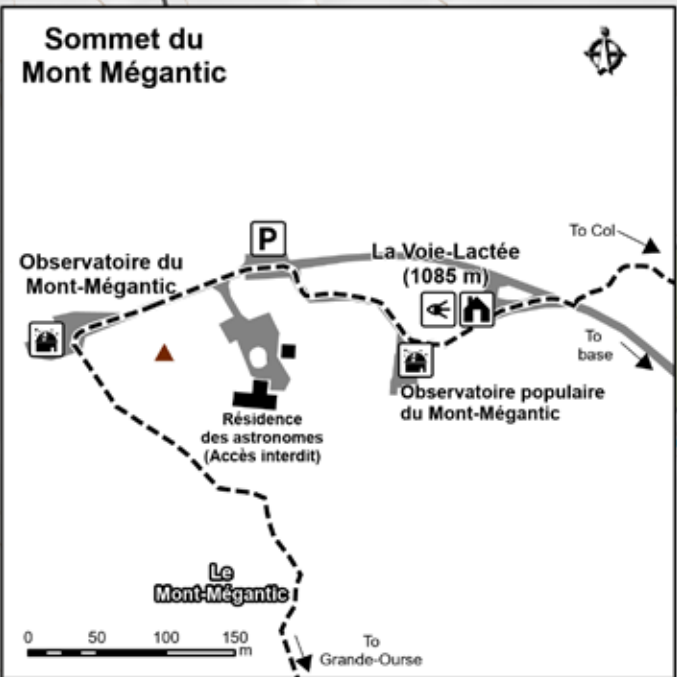

OBSERVATORY SECTOR COURSES		LENGTH AND DURATION*		DEGREE OF DIFFICULTY
  	Le Parcours du Soleil – Short hike with great reward: beautiful view on the surrounding mountains. Discover a sugar maple/yellow birch forest. Go on a lunar nuggets hunt!	3,4 km / loop	1h30 - 2h30	E
  	La Promenade Boréale – Short hike at high altitude between Mount St-Joseph's summit and Pic des Crépuscules viewpoint. Discover a high altitude forest of common wood and sorrel fir and amazing scenery.	2,4 km round trip	45 min	E
 	Le Piedmont – Hike that extends the challenge of the Parcours du Soleil by connecting it in the Grande-Ourse sector. It follows a contour curve at the foot of the mountain, without much effort, and allows to walk along the stream on the way back.	5,1 km / loop	2 h - 4 h	I
 	La Pentecôte – A journey that offers a great reward for a short effort! After the 1st spectacular viewpoint on the Appalachians, it allows a quick return towards the Col, passing through areas of chablis, softwood and beard lichen.	7,8 km / loop	3 h - 5 h	I
 	Le Mont-Saint-Joseph – Discovery loop focussing on forest transition and on the history of colonization of the region. Elevation of 1 065 m, to Pic des Crépuscules.	10,1 km / loop	3 h à 5 h	D
   	Le Mont-Mégantic – Discovery loop focussing on forest transition. Highest summit in the Park. Elevation of 1 110 m.	11,2 km / loop	4 h - 7 h	D

FRANCEVILLE SECTOR COURSES		LENGTH AND DURATION*		DEGREE OF DIFFICULTY
 	La Promenade du Ruisseau – A short hiking trail that runs along a stream, part of Ruisseau-de-la-Montagne trail. You can stop at Plage des galets, Halte des Pruches and Halte du Vieux-Barrage rest areas; the walk is accessible even to beginner hikers.	2,6 km / loop	45 min - 1h	E
 	Le Talweg – Follow the trail along the mountain stream that sculpts patiently the landscape enjoying a breach in the rocky crown to evacuate tumultuous and particularly clear waters. Talweg, referring to a winding bottom where water flows, literally means valley path!	8,4 km round trip	2h30 - 4h30	E
 	La montée du Dragon – A short trail that will reward you with a view of nearby mountains. Discover a yellow maple sugar birch grove. Go in search of gold nuggets!	4,6 km round trip	2h - 3h	E
	Les Cimes – Walking along the syenite summits line (syenite being a rock of the granite family), you can witness the far-off history of magmatic intrusion that happened during the formation of the massif mountain.	11,9 km / loop	3h - 5h	D
	Les Escarpements – The smallest but not the least of the massif mountains, Pain-de-sucre, reveals numerous cliffs, narrow faults, overhanging rocks, moss and lichen, and also, vertiginous views.	6,5 km / loop	2h30 - 3h	I

 Hiking  Hut  Family-Friendly  Dogs allowed sepaq.com/animaux **E** : Easy **I** : intermediate **D** : Difficult

The asphalted road towards summits is accessible in vehicle in daytime summer, between 9 am and 5 pm. In spring and in autumn, verify the accessibility with the welcome center of the park.

*The durations and the mentioned levels of difficulty are for information purposes and refer to the summer season.

DISCOVERY TIME

OBSERVATORY

SECTOR

Découvrir l'univers

Located at the foot of the mountain, the ASTROLab is a museum with two exhibitions and a multimedia hall with giant screen. The day tour includes the film *Emergence: cosmic evolution*, the virtual reality experience, and an animation dedicated to families on giant screen.

In the second part of the activity, you will visit the Mont-Mégantic Scientific Observatory, located at an altitude of 1,110 meters. Accompanied by a guide, you will discover the most powerful telescope in Canada.

DISCOVERY ACTIVITIES

Consult the program to enrich your visit. (in French only)

You will find entertaining activities to explore the park from every angle.

Family Experience

Yippee, it's absolutely free!

For kids 17 years of age and under, access, accommodations, and certain equipment loans are free of charge.

The offer varies from one establishment to another.

Observer les étoiles

On summer evenings, visitors are invited to astronomy evenings where the starry sky is in honour. When the clouds come, the presentations on screens reveal the movements of the sky, and different shows are presented such as *Exoplanètes* and the quest for the origins of the Webb space telescope. The nights of the Festival allow to look at the telescope of the Astronomical observatory, and Perseids are a unique opportunity to make dozens of wishes!

All astronomy activities are offered in French only

The ASTROLab turns 30!

For 30 years now, at the foot of Mont-Mégantic, the ASTROLab team has been sharing the experience of the night sky and the wonders of astronomy. So many magical moments under the stars!

The ASTROLab offers astronomy evenings, multimedia experiences, museum exhibitions, observatory tours, and school activities. It is also the driving force behind the Perseids celebration, the astronomy festival, and the creation of the world's first International Dark Sky Reserve!

Humble in its early days back in 1996, the ASTROLab has since grown into one of the leading destinations in astro-tourism. Today, we proudly recognize its impact on astronomical culture in Quebec. We can confidently say: mission accomplished!

But what if this is only the beginning? Long live the Universe and long live the ASTROLab!

Contemplate the sanctuary

At the end of the 19th century, pilgrims erected a cross at the top of Mount Saint Joseph, which would later become a sanctuary and a belvedere on the Appalachians. The landscape which is unveiled next to the centennial chapel is striking. On this ridge in altitude, the coniferous forest is characterized by a boreal type forest named the mountain oxalide fir. This forest is considered to be exceptional in Quebec due to its rarity and seniority.

It is possible to drive to the summit every summer day between 9 am and 5 pm.

Summer animation at the top:

Plein la vue : 1 pm to 4 pm, some afternoons. Animation posted.

Micro museum: place of memory testifying to the history of the chapel.

DISCOVERY TIME

FRANCEVILLE SECTOR

Cycle along the streams

The Piste de la Vallée offers a 7.4 km round trip bike ride. It leads to the footbridge of the fall and the refuge of Ruisseau-de-la-montagne. To prolong the pleasure, it is suggested to discover the **Regional Park of Marécage des Scots**, next to the park. Punctuated with stops, whether along Salmon River or McLeod Creek, which have several wildlife, flora, forestry and history interpretive panels and the famous Log hauler train history. Moreover, children will be able to board and make their own scenario! Two short walking trails offer beautiful views and picnic tables to the sound of waterfalls.

Bike rental at the welcome center. Free for 17 years and under.

Discover our neighbours at marecagedesscots.ca

Participate in animated activities (in French)

To get to know the park better, let us tell you its unique story, its amazing shape, adapted plant stands and diverse wildlife. Sit comfortably at the amphitheatre near the welcome center for a chat or turn your eyes to the starry sky.

Evening talks : Summer Evenings at the Amphitheatre.

Trolley of the curious: some summer mornings, on the edge of the stream at the Pruche halt.

See schedule at the welcome center.

IN THE WILD, YOUR SAFETY IS YOUR RESPONSIBILITY

Outdoor activities can involve certain risks.

Always be sure to have the skills and abilities required for the activity you choose. It is very important to find out about the risks involved in the activity, to know and respect your own limits and to use appropriate equipment. Preparing yourself adequately is the first step in the safe and enjoyable practice of your favourite activities.

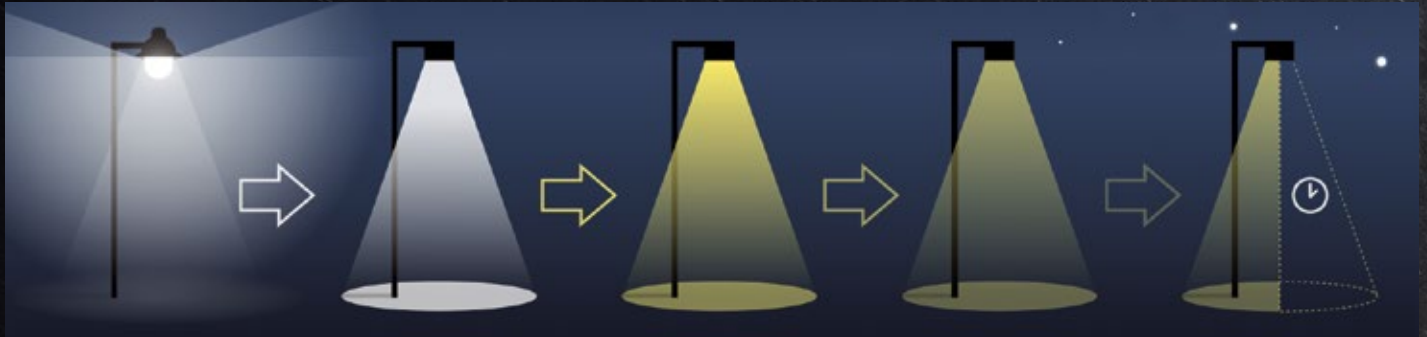

For more information, visit our website at sepaq.com/security

CONSERVE FOR TOMORROW

Eco-lighting

BY FOLLOWING THESE 4 SIMPLE PRINCIPLES, IT IS POSSIBLE TO GET ADEQUATE LIGHTING WHILE PRESERVING NOCTURNAL INTEGRITY.

Shielding

Choose luminaires whose luminous flux is oriented towards the ground, and do not spill light towards the sky and the horizon.

Color

Give preference to warm color and amber light sources in order to minimize the amount of blue light emitted and thus reduce negative impact on living beings biological cycles and starry sky visibility.

Dimming

Opt for low-keyed and constant lighting in order to reduce glare and excessive contrasts which jeopardize visibility.

Timing

Turning off outside lights in late evening is a simple and efficient way to reduce light pollution and energy waste.

5 ground rules to follow in nature

Our national parks

get millions of visits each year. Harmful behaviors can cause permanent damage to the environment and hinder other visitors' experience. Let's do our part to protect nature so we can all enjoy it for years to come.

Stay on trails and in designated visitor areas

Don't step off the trails or walk in the undergrowth to avoid trampling plants and compacting the soil.

Do not gather dead wood

Help preserve the undergrowth by leaving dead wood in place. It serves as shelter for wildlife and enriches the soil after decomposing.

Do not feed wildlife

Allow animals to feed themselves so they can follow their natural instincts. Keep all foods out of their reach.

Keep your distance when observing animals

Repeated disturbances can alter their behavior and affect their ability to find food, mate, and communicate with each other.

Be mindful of the peace and quiet and adhere to curfews

Noise frightens wildlife, and people visit national parks to enjoy nature. Please follow curfews and refrain from making noise at all times.
