Attached to the same floor an up-to-date gymnasium has been fitted up. This room which is capable of accommodating two hundred people will also be fitted up with a stage and dramatic and musical performances will be given during the coming winter, at regular intervals, under the supervision of a committee presided over by Mr. W. On the upper flat the Reading Room has been placed, in which the principal Canadian daily papers are to be obtained, as well as numerous periodicals, magazines, etc., and likewise, a number of English illustrated and readable papers. A resident janitor has been appointed so that meals and refreshments can be served during the time the Club is open from 11 a.m. to 11 p.m. The club has the support of the principal mine owners and the managers thereof, who have not only taken an interest in the undertaking by giving liberal donations but have devoted their personal time to a cause which they feel convinced will prove of immense use and benefit to the community.

The Board consists of representatives of all the English-speaking denominations, and will be a strictly "Union" corporation. It is understood that a convenient site for the new cemetery has been obtained between Thetford Mines and Black Lake on the new road.  
CALL FOR FIRE BRIGADE.  
No little excitement was created at Thetford Mines Saturday on the receipt of telephonic communication that a large fire was raging in a neighboring town, that the water supply was limited and asking for the assistance of the local fire brigade. Immediately on receipt of the news, Mr. W. H. Smith, manager of the Bell Mine, and Mr. E. J. Bennett, of the Amalgamated Mines Co., organized their volunteer brigade, and armed with buckets and fire extinguishers repaired to the railway station preparatory to departing by train to the scene of the conflagration. The mid-day train from Sherbrooke was somewhat late and during the interval news was received that the fire was under control, thus avoiding the necessity of further action. Too much praise cannot be awarded to Messrs. Smith and Bennett for the admirable way in which they handled their men and the promptitude in which they prepared to render assistance to their unfortunate neighbors.

## CAR COLLIDED WITH BUS.

Driver Was Thrown From His Seat and Slightly Injured.

HE WAS FOLLOWING LOAD OF HAY AND DID NOT HEAR OR NOTICE CAR.

An accident which might have been very serious occurred in front of the Record office about 10.30 this morning.

The Sherbrooke House 'bus was coming down from the Megantic train carrying three passengers, a gentleman, lady and child. The driver of the 'bus was following a load of hay, and when in front of this office he went to pass. Just as he did so a street car came along and he had just barely time to get the horse of the track. The car struck the front of the 'bus, throwing the driver, Jos. Beausoleil, from his seat. His head struck first and he sustained a painful bruise on his forehead.

The occupants of the 'bus were also badly shaken.

According to the injured man's story the motorman was not sounding his gong as he came along the street and, as the load obstructed his view, he did not know the car was approaching.

Had there been a few feet nearer when he turned out the horse, would likely have been killed.

**RAISING OF SHEEP IN CANADA.**

Commission Will Enquire, Why Industry is Backward.

DECLINE OF NUMBER OF SHEEP HAS BEEN OFTEN COMMENTED UPON.

The Department of Agriculture has issued the following note on "The Development of the Sheep Industry in Canada":

For a number of years it has been evident and it is now a matter of common knowledge that the sheep industry in Canada, particularly as regards the general production of market sheep and of high class wool, has been in an increasingly decadent condition. Not only has the number of sheep owned in the country been gradually lessening, but the interest in sheep-growing has itself been on the wane. The census of sheep in Canada reveals the fact that the Dominion as regards the number of sheep kept, compares not at all favorably with other great agricultural countries of the world. Indeed, as compared with them it has permitted sheep-raising to become a somewhat insignificant phase of its agriculture, notwithstanding its great adaptability both as regards soil and climate for the growing of mutton and wool. In 1909 according to agricultural returns there were in the United Kingdom 31,838,833 head of sheep, in Australia 87,043,266 head, in New Zealand 23,480,707 head, while the latest returns for Canada place the number at not more than 2,705,390 head. In view of the fact that sheep have not only a direct and primary value through the actual financial returns which they make to their owners, but because they represent as well in themselves a peculiarly important asset in agriculture, owing to their ability to increase soil fertility and to check and destroy the growth of weeds upon the land, the situation which the above figures suggest, appears to be a rather critical one and one which may well receive careful consideration.

The reasons for the decline in the sheep industry in Canada have been the subject of much comment in various ways, and while these need not be discussed in this note, it may be well to state that the Live Stock Branch has had its attention very urgently directed toward the present unsatisfactory status of the business, and in recognition of its importance to the country generally has now decided that the time is ripe for the Canadian Government to consider a comprehensive policy and to undertake definite and extended measures likely to operate toward the encouragement, improvement and development of the industry as a whole.

As a preliminary to the adoption of any settled policy and in order that the Live Stock Commissioner may inform himself thoroughly as to the details of the sheep and wool trade in Great Britain and the United States and as to conditions as they actually prevail in Canada the Minister of Agriculture has authorized the appointment of a committee of two competent men to investigate the sheep situation in general in the three countries named. At the same time, in view of the expectation that without an actual visit, they will gather as much information as possible concerning the trade of the other great sheep producing countries in so far as it may be of interest in the development of the industry in Canada. It has been thought advisable to have this committee consist of, in the first place, a wool expert, whose special training has made him familiar with all the technical and practical phases of wool markets and woolen manufacture in the United Kingdom and Canada, and in the second place a capable Canadian sheep breeder, whose experience has given him a somewhat extended knowledge of sheep farming in this country. These gentlemen have already been appointed and are at present pursuing their investigations in Great Britain. The personnel of the committee consists of Mr. W. T. Ritch, of Manchester, England, and Mr. W. A. Dryden, of Brooklyn, Canada.

Mr. Ritch, though perhaps unknown to the members of the Sheep Breeders' Association, has had familiar and honorable relationship with tradespeople in Canada for a period of years, having represented while in this country certain English cloth manufacturers, whose interests he served efficiently and acceptably. Mr. Ritch's experience has made him thoroughly familiar with the woolen industry in England and Scotland, with the wool markets and manufacturing districts of that country, and has besides given him a general knowledge of the woolen trade, including that in staple and shoddy articles in the manufactured product both in England and America. He has visited also in a business capacity Australia and New Zealand and had made careful observations concerning the growing and marketing of wool in these two countries. Combined with his technical knowledge, Mr. Ritch has acquired a practical understanding of the growing and handling of wool on the farm and together with this has evidenced an enthusiastic and intelligent comprehension of what may be expected from the development of the sheep industry in Canada, thus commending himself to the attention of the commission in connection with the appointment to the committee. It is felt that Mr. Ritch will be able to place such information at the disposal of the minister, his officers and of all interested in sheep breeding in this country as is likely to be particularly valuable in the furtherance of the scheme for the upbuilding of the industry which is now in contemplation.

The other member of the committee Mr. W. A. Dryden, of Brooklyn, Ont., is very well known to the stock breeders of Canada. The present owner of Maple Shade has fallen heir to many of the qualities which gave his property so large an influence in his own province, and, although as yet a compar-

atively young man, has acquired a knowledge of the stockman's art which has already brought him to the fore amongst Canadian breeders. Mr. Dryden's collegiate and agricultural education has been such as to bring him into demand in a more or less public way, and, in recent years, he has been about Canada a great deal in connection with judging and other work under the supervision of the Live Stock Branch. Mr. Dryden's judgment is practical and his recognition of popularity speaks well for the confidence which may be expected from his fellow breeders in his ability to perform with credit to himself and them the work which he has now undertaken. In combining the services upon this committee of a practical sheep man with that of a technical expert the department has reason to believe that the problems of production and of marketing, both as regards wool and mutton, will be studied and discussed in such close relationship that the results of the inquiry will most successfully serve the purpose for which it is undertaken.

As a result of the inquiry the Live Stock Commissioner the members of the committee have, of course, been allowed the liberty of depending largely upon their own initiative in planning their route and in evolving the details of their investigations. The general procedure will, however, be as follows: Mr. Ritch will precede Mr. Dryden to England in order to attend a number of important wool fairs, in progress during August and September. There he will be in close association with wool merchants and with men interested or engaged in the woolen trade in its several branches and will thus be enabled to discuss with them in all its phases the various details of the industry in connection with both home and foreign markets.

Both members of the committee are arranging to be present at the big late summer and autumn sheep sales which are unannounced in the latter part of August, during September and in October. They will visit Smithfield and the larger meat markets of London and of other important cities. It is possible also that they will be present at the annual ram sales at Kelso and at one or two other leading centres. This will bring them into contact with the sheep breeders, mutton raisers, dealers, butchers and provision men in all the important localities. It will give them an insight into conditions and methods as they prevail upon the farms throughout the country. It will direct their attention in every stage of the business. It will furnish them with information concerning prices, profits and as to the extent and nature of the trade, and in short, give them a knowledge of the great sheep industry of the United Kingdom and of the import trade in dead mutton and lamb. It is hoped that the investigation in Great Britain will put the branch in possession of such information, and of such facts and statistics, as may enable it to intelligently assist in building up a great Canadian business in the raising of sheep and also in finding a place for the Canadian products of wool and mutton in the commerce of the world.

The members of the committee will visit all the provinces and interview prominent men and manufacturers in order to familiarize themselves with the difficulties, drawbacks and defects in connection with conditions as they now prevail, and which have hitherto operated to retard the advancement of the sheep industry in the country. It is expected that they will gather information as to the injury inflicted on our agriculture through the decline of interest in sheep raising, that they will take note of the localities, where the growing of sheep could be most easily and profitably encouraged and that, bringing to bear the suggestions gleaned from their general inquiry upon the various phases of the situation as they find it in Canada, they will draft recommendations for the guidance of the commissioner in framing, in the very near future, such a policy as will prove in the best interests of the industry.

If time permits, Mr. Ritch and Mr. Dryden will also visit the United States. In many states of the Union as compared with Canada, a most uniform conditions prevail, particularly as regards the advantages that are possible and which may be derived from an extensive sheep trade. Many single states own more sheep than can be found in the whole of the Dominion, and although to the south of the line there may be some discouraging features in the general situation, nevertheless there may be much in the way of suggestion to be learned from that country. Further trade relations between the two countries must always be more or less intimate, and as the United States, notwithstanding a severe duty, imports annually from Canada a goodly quantity of wool, it would seem to be of direct advantage to have some specific information concerning the status of the trade in the former country and also as to its availability as a future market.

Canada has undoubtedly wonderful possibilities and large opportunities in connection with the development of its sheep population. The present investigation is preliminary to the adoption of a permanent scheme for the encouragement and upbuilding of the industry. In the belief that Canadian agriculture must of necessity suffer severely while sheep remain so few in number in the country, the minister and his

officers will not be satisfied until statistics show a return of at least ten times the present estimate and until sheep raising has established itself as a recognized factor in promoting the national prosperity.

PRICE OF ADMISSION TO SHERBROOKE FAIR.

Editor Record.  
Sir:—Please allow me space to reply to Adherent of County Fair's note in Record of last Friday. He begins, "In the wailing cry of Exhibition," with a flourish. Now, Mr. Editor, the weeping and wailing was done by "Adherent" and associates who did not attend the Sherbrooke Fair when they learned what a splendid Fair was held there. "Adherent C. R." also stated that most of the prize money went to someone to read the full report of that in our little village twelve horses were exhibited, all of which took prizes, among them six firsts. One gentleman here exhibited two horses only and took sixty-five dollars in prizes. Take this village as an example and I think the Eastern Township did well and got the lion's share of prizes at the great Sherbrooke Fair. "Adherent C. R." also states that the visitors were all Eastern Townships people. Another mistake. I wish to inform him that large number came from New England States, New York and other places outside the Townships. I never said a word against the county fairs. But I will say here that the Sherbrooke Fair is worth a dozen of them to see and visit, and I would advise "Adherent C. R." to employ someone to read the full report of the result of the Sherbrooke Exhibition, which he will find in the Sherbrooke Daily Record. He will then see the error of his ways, and the mistakes he has made.

EXHIBITOR.  
Waterville, Sept. 26, 1910.

POOR ROADS AND SOME OF THE CAUSES.

Editor Record.  
Sir:—It is strange that a township like Dudswell, with the amount of tax levied on it, and the fact that it should still continue to adhere to the old and ineffective system of statute labor, for through such a system no one need look for much if any improvement in our roads, and why? Simply because it has arrived at the stage where the most of the ratepayers look upon the road work as a sort of recreation where they tell and listen to stories, leaning on their hoes and shovels, and on the whole having a jolly good time, not earning fifty cents, and for which they receive \$1.50 to apply on their tax. The ratepayers are not to be blamed for this, but the road tax is paid out for road machines every few years, which are put on to repair the roads, with from four to six horses, which suits the ratepayers to a nicety, as they can soon get rid of their taxes in this way. The roads are not fitted or not, which in nine cases out of ten they are not, but oftentimes are injured by bringing back on to the roadbed the dust and dirt, loose muddy stuff, which the rains have washed out and should be allowed to remain on the road, but they do form more mud. Generally those working will avoid all the hard work they can. I have watched men working the machine to turnpike a new piece of road often where the grass was a foot and a half or more high. Not a spear of it would be cut, but with a scythe, but would run the machine into it, the result of which was the knife became clogged underneath and could do no cutting, but all the same it was hauled along a half dozen times to do what it might have done in one. The mud on the ground being prepared as it should have been. To do that would require some muscular labor, which would interfere with their play spell. Under the present system of statute labor a great deal of money is pretended to be laid out where none is needed. The township is divided up into road districts, and all tax belonging to each district must be laid out there in some fashion or another, whether needed or otherwise, and in the districts where the heaviest taxes are raised the roads are good, and in the districts where the roads are bad but little tax is available, but the old rule must be followed. It will not do to depart from what our grandfathers and great-grandfathers did, and by adhering to this old system, which should have been abandoned long ago, the municipality by following up this old, worthless system debars itself from receiving the assistance offered by the Government to help put the roads in proper condition. The offer the Government makes is a most generous one, provided the old obsolete statute labor system is abolished and the money tax established in its place. The township does not receive more than fifty per cent. value for the tax levied for road purposes under the present system. It is high time that this miserable system of statute labor was done away with and something more effective adopted in its stead.

**The Real Bargains Go To Those Who Read The Ads.**

Ninety-nine per cent. of the real bargains in the stores go to those who read the advertisements. The other one per cent. go to those who casually drop on the bargains in the rush of shopping. If you can't afford to be one of the "one-chance-in-a-hundred" people, read the store ads. and learn of the bargains straightway. And as 99 per cent. of the bargain getters are ad. readers, so 99 per cent. of the real bargain givers are advertisers. When you read all the advertised bargains, you know about all the bargains in town that are really worth while.

### DAILY NEWS FROM TOWNSHIPS.

(Continued from page 1.)

ding took place at the parish church of St. Marie, Manchester, N.H., on Tuesday last at 8 o'clock, when Miss Marie Alice Demers was married to Mr. Eugene Antonio Labadie, of Sherbrooke, railway mail clerk. The bride, who was accompanied to the altar by her father, Mr. Onesime Demers, was gowned in ivory white silk, with the white veil and wreath of white flowers of the Children of Mary, to which society she belonged. The bridal bouquet was of white roses. The groom was supported by his brother-in-law, Mr. Edward J. Desruisseaux, of Sherbrooke. Mass was sung by the Rev. Abbe A. O. Poirier, assisted by the Abbes L. P. Routhier and F. X. Durette, as deacon and sub-deacon. At the entrance of the wedding party the organist rendered the Bridal March from Loheingrin, and at the close of the ceremony "Nuptial March," Engelmann. During mass Mrs. Z. Lemire sang "Ave Maria" (Millard) very beautifully, and "Sancta Maria" (Frey) was effectively sung by Miss Josephine Boucher.

The reception was given at the residence of Mr. and Mrs. Onesime Demers, Cartier street. The happy couple left at noon for their wedding journey to New York, Hartford, Boston and other points. They returned to Manchester at the end of the week and will shortly leave for St. Hyacinthe, Montreal and Sherbrooke, where they will take up their abode. The bride received a large number of handsome gifts, including silver, cut glass, furniture, etc. The gift of the groom was a pretty gold watch and chain.

### THROUGH RAPIDS IN A BARREL.

BOBBY LEACH MADE SUCCESSFUL PASSAGE AT NIAGARA FALLS.

Niagara Falls, N.Y., Sept. 26.—Bobby Leach of Sherbrooke, Ont., Saturday afternoon made a trip through the Whirlpool Rapids in a barrel, starting from the Old Maid of the Mist landing, near the cantilever bridge. Except for a few scratches and bruises, Leach, who claims to have made the trip several times, was unhurt.

Leach started at 3.55, his barrel being towed out to the middle of the stream by a tugboat. He entered the rapids at 3.57, and three minutes later was in the whirlpool. The barrel went through the rapids holding to its course and riding the tremendous waves smoothly. The great wave caught it and hurled it clear of the water, but the barrel righted itself nicely and went into the whirlpool without mishap.

Five times the barrel circled the whirlpool, keeping on the outer edge, away from the vortex. At the south end it was caught by an inshore eddy and floated in close enough to be caught at 5.05.

### A DISCOVERY AT POMPEII.

(London Morning Post.)

I have taken the opportunity of a visit to Pompeii to inspect the newly found villa outside the walls of the buried city, the discovery of which has aroused considerable comment in the Italian press. The villa is the property of a local hotelkeeper, who has made the excavations and is now seeking to sell the site to the Italian Government at a high figure. The villa bears little resemblance to the ordinary Pompeian house; in fact, it was a large country residence rather than a town abode, for it stands some fifteen minutes' distance from the city gate. The walls are covered with beautifully preserved figures, nearly life size, representing apparently male and female personages of the ancient mythology, the whole being at a depth of from five to ten feet beneath the surface of the surrounding vineyards. The excavation of the rest of the villa has now been stopped pending a settlement of the proprietor's claims according to the terms of the new archaeological law, and in view of an arrangement with the owners of the two adjacent vineyards beneath which the remainder of the villa lies concealed. Meanwhile the villa is guarded night and day by two custodians sent out from Naples. Excavation is proceeding briskly within the walls of the city.

### Deaths Reported.

SIMEON MARCOÛTE, STANSTEAD

Stanstead, Sept. 27.—(Special)—The death occurred on Sunday at the Royal Victoria Hospital, Montreal, of Mr. Simeon Marcotte, of this place who had gone there about two weeks ago for treatment for cancer of the stomach. Mrs. Jos. Roy and Mrs. Alex. Lacasse had been with him and had only returned home on Saturday. Mr. Roy was 68 years of age, and was very active, having been at his work three weeks before his death. He leaves one son and five daughters, his wife predeceasing him only three months ago. The remains were brought to Stanstead on Monday.

Much pleasure was expressed that the school should be continued under the able supervision of Miss McDonald and Miss Mayhew who proved last year their interest and ability for the work. We wish for them another successful year.

A sad feature of the programme was the calling of Miss Ida Taylor's name for several prizes, and the mention of the fact that the girl who had been so faithful in her school duties now lies on a sick bed critically ill, and the wish was earnestly expressed that she might be restored to health and school again.

### WOMEN ARE KIND TO HORSES.

Paris suffragettes are taking particular pleasure in the announcement of the Society for the Protection of Animals of offering a medal to the public coachwoman of Paris who shows the greatest kindness to and consideration for their horses. The suffragettes point to this fact as proof that women can meet men on the same plane in many fields of work which men have occupied exclusively and comparatively recently, and be as successful as men have been, for they argue, if women were not regarded as having established their competency as drivers the Society would not now be taking official notice of their existence.

Truly, those who witnessed the trials and sufferings of body and soul endured by the first woman public cab-driver in Paris and who saw how she was jeered at and humiliated on all sides by those who should have known better and shown more consideration for a woman who was merely trying to make an honest living, would never have believed it possible that the number of women engaged in such work would have increased to hundreds. Thousands of persons engage cabs driven by women rather than men, for they realize they will escape the unpleasantness of a drunken driver or of one who will use rough language if their "tip" is not sufficiently large, and at the same time receive quite as good service. With the kindness of heart which is innate in woman, these female drivers give their horses far better care than do men drivers.

### SHE WAS SURPRISED.

**When Dr. Morse's Indian Root Pills Cured her Chronic Liver Complaint**

Mrs. R. Smith, of Winnipeg, Man., tells an interesting story of relief from almost insupportable suffering. "I can hardly tell you how great my sufferings have been. Chronic liver complaint accompanied by biliousness was a daily source of trial to me. Every day I experienced the sickening effects of these ailments, longed for some medicine that should permanently drive them away.

Hearing of Dr. Morse's Indian Root Pills, I thought they were worthy of a trial. My surprise was indeed great. From the very first I experienced relief. Continuing with them I found my troubles were slowly but surely leaving me, and before long I once more knew what it was to be free from the harassing effects of the ailments that had long sickened and weakened me. So great is my faith in Dr. Morse's Indian Pills that I shall never on any account be without them.

### "A SCOURGE OF CORDS FOR MONTREAL."

REV. F. J. DAY, FORMER SHERBROOKE PASTOR, SPEAKS ON TONE OF MONTREAL'S AMUSEMENTS.

That the tone of Montreal's amusements had not kept pace with their material development was the view expressed by Rev. Frank J. Day, pastor of Zion Congregational Church Montreal, and a former Sherbrooke pastor, in his sermon Sunday evening entitled "A Scourge of Cords for Montreal." It was no bright picture of pristine innocence that Rev. Mr. Day drew of this city, nor on the other hand did he paint Montreal as a modern Sodom. He pointed out, however, that the character of the amusements provided had steadily degenerated in proportion as the city's wealth and importance grew. The amusement caterers were to-day providing worse fare than they did twenty years ago, when the main street, whatever its other failings had no glaring picture shows to offend the unscrupulous mind. But the rush of immigration had brought the era of prosperity and the unscrupulous had found in it their opportunity to make money by any possible methods.

Then came a flash on the "red light" quarter question. It pointed out, however, that, despite all attempts to repress it, the evil was still active. The white slave traffic was still with us. The gambling hell was still flourishing in our midst; the purveyor of opium still sold his wares with brazen effrontery; the liquor traffic was still working havoc among countless victims.

People said that we must have amusement and recreation. It was certainly true that these were needed, but to walk through the main thoroughfares to day was to note a change for the worse in the kind of recreation provided. The purveyors of amusement to-day were catering for a lower craving than formerly existed. Much of the amusement now provided was depraving the public mind.

These were dangers to be faced by Christians to-day. The ideals of Christ must be made to prevail and Christians must not rest until this end was reached. It was the Christian ideal that had moved Montrealers to clear out the gaming, that misgoverned so long at the City Hall. Now the remaining evils must be faced in a similar way. The Christian congregations of Montreal must see to it that the city was cleansed of the blots that marred its life.

### KING GEORGE AND HIS MAIL.

King George is receiving about one hundred letters per day. A great number of these letters are in the case of private letters he is even more particular than was his father in personally answering each missive on the day it is received. On an average King George receives six hundred letters a day. Many of them are from admirals who write giving advice on affairs of state. A great number come from charity organizations requesting subscriptions or patronage. Queen Mary receives about three hundred letters a day, and she, too, is very punctilious in the matter of replies. At the General Post Office there are two waiting clerks always on duty attending to the Royal correspondence, and letters to a member of the Royal Family are delivered by special messenger.

King Edward, who wrote voluminous letters to his many "cousins" and nephews in Europe, carried on much of his writing from the writing room of the Marlborough Club. When he was away abroad he wrote regularly to his grandson, now Prince of Wales, and the boy replied once a week.

A tremendous stimulus has been given to stamp collecting by King George, who has the finest collection probably in the world. His latest acquisition was one of the penny stamps lately printed with King Edward's portrait upon them. The issue was destroyed the other day and only six stamps remain. One of them was presented to the King, another to the Prince of Wales, and a third will be preserved at the British Museum. Mr. Henry, the fisherman, who was the first to find the resting place of the other three but they are believed to be in the hands of Government officials.

The new stamps with King George's portrait will be ready in a few weeks hence, and are stated to be a distinct artistic improvement on the present ones.

### CATHERINE DE MEDICI.

(Scribner's Magazine.)

Catherine de Medici has been falsely accused of a score of crimes. And those accusations have grown out of one prodigious wickedness for which she was responsible. The massacre of St. Bartholomew, when the Huguenots who had gone up to her daughter's wedding were slaughtered at night in hundreds, some of them by the guards of the King in the very palace where they were feasting as his guests was intensely disliked by all who knew the truth about it, had not profited by it, or were not blinded by bigotry to the principles of honor. Even the gay chronicler of the time, Voltaire, whose writings show he had little religion and less morality and who thought blood feuds perfectly natural, called it a very dirty massacre. The single act of fierce hate suddenly let loose by fear and ambition, showed a nature so free from moral restraint as to be capable of anything. And there gathered in the hearts of the friends of the dead a hatred so intense that the most violent words of passionate calumny could not give it vent. Therefore, during the rest of her life, her enemies found pleasure in laying at her door every death that could by any possibility be supposed to profit her, and these wild accusations of hate have become part of the popular tradition of Catherine de Medici. The truth is that aside from the great killing of August, 1572, which she thought a stroke of statecraft need- to keep her power, there is no evidence that would warrant a judge in even holding her on a criminal charge.

### POLITICAL TURMOIL AT SARATOGA.

Progressives Claim They Will Win at Republican Convention.]

ROOSEVELT CLAIMS THAT THEY HAVE BEATEN OTHER SIDE.

Saratoga, N.Y., Sept. 27.—Saratoga seethed in a political turmoil, last night on the eve of one of the important Republican state conventions ever held. The old guard are making their battle on the issue, "Shall Theodore Roosevelt rule the party in the state of New York?"

Colonel Roosevelt reached Saratoga late yesterday and within five minutes had taken full command of the Progressive forces. The flow of the political tides finally set in for the Progressives. Last night, and Mr. Roosevelt, after a conference with his lieutenants, Lloyd C. Griscom, Cornelius V. Collins and Representative Cocks, of Oyster Bay, repeated his declaration made at Troy: "We have beaten them to a frazzle and the trophies are ours."

Vice-President Sherman came to the village yesterday from Utica. He had nothing to say, and spent most of the day talking with friends on the verandah of his hotel.

The Vice-President came in for a spirited demonstration last night, when a marching club of 200 members with a band, arrived from Utica. Mr. Sherman met the "boys" from Oneida," as he called them, and marched with them in and around the great court of the United States Hotel.

### ADMINISTERED "SILENCE" TREATMENT.

FOUR HUNDRED CADETS ARE NOW UNDER DETENTION.

West Point, N.Y., Sept. 27.—More than four hundred cadets, practically the whole Cadet Corps, of the United States Military Academy, at West Point, are under detention, as the result of the corps having administered the "silence" treatment to Capt. Rufus S. Longan, of the Eleventh United States Infantry, at supper in the Grant Memorial Hall, on Saturday night.

Major-General Thomas H. Barry,

U.S.N., superintendent of the academy, acted promptly. A board of army officers selected by him from the West Point detail, is investigating the case. The members of the board of inquiry are Lieut.-Col. Walter A. Bethel, Major Wirt Robinson, Capt. Charles E. Sommerall and Capt. Alfred A. Maybach.

There was singing and music during the evening and at midnight the guest of honor was presented with an address by Mr. Louis Codere and a well filled purse of gold. HAVE SECURED RIGHT OF WAY

SCOTSTOWN COUNCIL AND MR. POPE REACH AN AGREEMENT. Scotstown, Sept. 27.—(Special)—The Town Council has succeeded in making a deal with Mr. H. Pope, of Bury, for a right of way through his property, which is situated near the Salmon river, about three miles from here.

This right of way is for the Guelph Cask Company to put through its log road. All the road was completed with the exception of the part which was to run through the land owned by Mr. Pope. For a time there was a hitch in the negotiations between the town and Mr. Pope, hence the delay.

If this matter had not been settled in proper time it would have set back the Guelph Cask Company's operations here a whole year, which would have been a great loss to Scotstown.

BISHOP'S COLLEGE SCHOOL.

OUTLOOK FOR SUCCESSFUL YEAR IS VERY ENCOURAGING. Bishop's College School opened last week with an increased number of boys, and with a most promising outlook for the coming year.

Mr. J. Tyson-Williams, head-master is still in charge of the Preparatory School, and the changes that have been made have resulted in an exceptionally strong staff. The House Master in the upper school is Mr. J. Ramsay Montzambert, M.A., Bishop's College, and an old B.C. boy, who for many years was Senior Master, and French Master at Port Hope and for several years at Ashbury College, Ottawa.

Mr. Montzambert is well known throughout Canada as an excellent school master and has been especially successful in preparing pupils for the McGill and Royal Military College exams. He has been a fine athlete and still takes much interest in athletics. The House Master in the Preparatory School is Mr. H. R. Cattans, B.A., for some time Assistant Master of the McGill College, Quebec, S.A.; the leading school for boys in that country.

Mr. Cattans is a man of pleasing personality, and popular with both boys and parents. The Science Master in the Upper School is Mr. S. Percy Smith, B.A., late of McGill College, Quebec, S.A.; the leading school for boys in that country. He has been in Canada long enough to be in touch with the country, and is very keen on his work.

A strong Science Department is confidently looked for. Mr. A. B. Muddiman, B.Sc., of the Upper School, late Gisborne Scholar of University College, Durham, where he took first class classical honors. Mr. Muddiman is also a B.A. of King's College, Windsor, N.S., where he read law and was lecturer. He was a student at Emmanuel University, Germany, is a fluent French and German scholar, and has been for some time engaged in coaching pupils for the Army, the Diplomatic Service and the English Universities, is a frequent contributor to the London and other magazines. He stroked his university boat, and is a good football player.

In the Preparatory School, the Second Assistant Master is Mr. E. V. Iremonger, B.A., St. John's College, Cambridge, who took high classical honors, is a fine athlete and an accomplished organist.

Mr. F. G. Yardley, B.A., Queen's College, Oxford, is a good all-round scholar, and a capital athlete. The Rev. H. C. Burt, M.A., Trinity College, Toronto, is temporarily acting as chaplain, and Mr. R. G. Shires, of Bishop's College is assisting with the work of the Preparatory School. A permanent chaplain will be appointed shortly who will also be a master.

The Musical Department of the School has been placed under the charge of Mr. Irwin Sawdon, Hon. L. Mus., Member of the American Guild of Organists, Violin Virtuoso of the London and Provincial Concerts, and formerly Musical Director of the Yorkshire Union of Artists, and the Leeds Symphony Orchestra, a pupil of Herr Alt. Eckner, Herr Johann Muller and Mr. John Dunn, England's greatest violinist.

Mr. Sawdon will from time to time organize concerts in the School to which all friends of the institution will be cordially welcomed. All the masters are men of wide experience and have excellent reputations as teachers, and both masters and boys seem determined to do their best to maintain the reputation of the old school.

The Cadet Corps, which was highly praised for its efficiency last year by Lieut. Col. Fraser, and Captain Archambault has just been armed with the new Ross rifle, will be with the gymnasium, under the charge of Sergeant Major Harney, who has rendered long and faithful service in the School, and whose work has always received warm commendation. Every attempt will be given to the sports, but they will in no way be allowed to interfere with the work of the School. They will be in charge of the Head Master as President, and Mr. J. Ramsay Montzambert, Secretary Treasurer, of the Executive Committee, composed of the captains of the various clubs.

A fire brigade has been organized of the masters and older boys in the School, and there will be fire drill once a week both Upper and Preparatory Schools.

The Headmaster is starting a Debating Society, as he considers it a duty in public teaching of the greatest importance, and a Science Society has been combined with the Camera

Club now in existence.

The Reading Room and Library have been reorganized, and there is a tuck shop in the School building where wholesome sweets, etc., are provided.

The Domestic Arrangements of the Upper School are still in charge of Miss Jeffery, and the Preparatory School of Mrs. Holt, both of whom have every qualification for their special work, and have been very successful and deservedly popular and esteemed.

Dr. J. Winder, an old B.C.S. boy is school doctor, and the consulting physicians are, Drs. W. W. Lynch and E. J. Williams. Parents may rest assured that their sons will be well looked after and no effort will be spared to attend to them in illness, and to neglect nothing that can conduce to their physical well-being.

REMAINS MYSTERY.

PROVINCIAL OFFICERS HAVE NOW TAKEN MATTER UP

Goderich, Ont., Sept. 27.—Six days after the disappearance of seventeen-year-old Elizabeth Anderson from her home in Saltford, and one day after the finding of her mutilated body in the cellar of an empty house close by the Goderich Fair Grounds, the machinery of the law has been put in motion. Inspector Greer arrived here from Toronto, yesterday, and, besides examining the scene of the crime, conducted investigations elsewhere. Inspector Greer has decided that the young woman was murdered in the cellar of the house only a few feet from where the corpse was discovered. Coroner Dr. Holmes called the jury together yesterday but Inspector Greer decided that it was unnecessary for them to visit the house where the crime occurred. The inquest will be resumed tonight. A number of young men have been examined by Crown Attorney Seeger in the case where there was said to be a likelihood of their having been in the girl's company on Tuesday, the day of the tragedy. That officer states however, that nothing resulted to place suspicion on any one.
