Prof L. G. Heimpel to Lecture at Short Course in Agriculture

A complete program of the Short Course in Agriculture to be held March 16, 17, 18, 19 and 20, appears on page four of this issue. After this was in place Mr. Drummond received word that Prof. L. G. Heimpel, of Macdonald College, will be here during the course to give illustrated lectures on "Farm Mechanics"

On the closing night, Friday, the Hon. J. G. Gardiner, Minister of Agriculture, will deliver an address at the Theatre Hall.

Victory Loan In Pontiac Goes Over Quota

With some Districts yet to be heard from, the total subscribed in the County of Pontiac as of Monday evening was approximately $235,000, $10,000 over the quota.

However, it is thought that when the final returns are received at the Headquarters, this amount will be substantially added to.

The showing is considered satisfactory in view of the adverse weather conditions under which canvassers had to work and Pontiac County's showing compares favourably with other rural units.

The county was divided into five districts and reports from each of these was as follows;—

Quyon district	$32,000
Shawville district.....	92,000
Campbell's Bay district	50,000
Fort Coulonge district	41,000
Chapeau.....	20,000

Organized Banking in Canada Began in 1817

It was on November 3, 1817, when pioneer Canadians were doing practically all business by barter, that the Bank of Montreal opened its doors for business in a modest little rented office on St. Paul St., Montreal, with the formidable capital of $350,000.

Trading in the Canadian colonies of the early 1800's was carried on under great handicaps. Canada had no currency of it's own. American, British, French, Spanish and Portuguese coins were all in circulation and the ratio of exchange was subject to frequent wide fluctuations. As a consequence, domestic trade was carried on principally by barter and international business was on a very unstable basis. It was to ameliorate these chaotic conditions that the bank was established.

Founded by nine merchants of Montreal, the bank set about the business of giving some semblance of organization to the financial life of country and its first task was the issue of paper currency, that is the bank's own bills in small denominations, and later, copper coins. Specimens of this currency, which was in reality the first Canadian money, are preserved in the bank's museum in Montreal.

Not only did the bank provide a medium of exchange such as had hitherto been lacking, but it nursed along the early enterprises of the country, and straightened out the difficulties of interurban interprovincial and international trading.

Within the first year of it's establishment the young bank had opened up agencies at Quebec, Kingston and York, as Toronto was then known.

Continuing this policy of expansion, the bank was among the pioneers in the West and as the country was opened up and new communities formed, banking facilities were provided at strategic points. As the railway pushed its construction further West, so the branches of the bank were opened in the newly established districts, and the year following the arrival of the railway at the Pacific Coast in 1886 saw the establishment there of the Bank of Montreal and the completion of a coast to coast chain of branches Today the bank has 500 branches in Canada as well as its own offices in Newfoundland, England and the United States.

DIED

—o—

At Pontiac Community Hospital, Shawville, on Monday March 9th, 1942. Dilon Gauthier, of Sandy Creek, in his 33rd. year. Funeral on Wednesday morning to the Roman Catholic Church and Cemetery, Otter Lake.

PERSONAL MENTION

—o—

Mr. Robt. J. Tracy is visiting friends at Port Arthur Ont.

Miss Evelyn Wharrey, of Ottawa spent the week end with her aunt, Mrs. W. C. Stark.

AC 2 Walter E. Smith, R.C.A.F., of Manning Depot, Toronto, spent the week end at his home in town.

Mrs. Jno. C. Rielly, of Rupert, Que., has been visiting her aged mother and brothers in this district.

Mrs. Geo. Coles, and children, of Noranda, are visiting at the home of her parents, Mr. and Mrs. W. C. Stark.

Pte. Keith Corrigan, R. C. O. C Barrifield, Ont, visited his wife and other relatives here for the week-end.

Able Seaman Cecil McCagg, spent the week-end at the home of his grandmother, Mrs. Geo. McCagg, Austin section.

Mrs. Gordon Maxwell, and little daughter, Betty Ann, of Hull West, spent the week-end with her grandmother, Mrs. Wm. Elliott.

Mrs. Herman Emmerson has returned to her home in Charteris, after a three weeks' visit with her sister, Mrs. Jennie McCord, and other relatives in Ottawa.

Pte Robinson Hodgins, R.C.A.S.C., of Nipawin, Sask., now stationed at Lansdowne Park, Ottawa, was a week-edd visitor at the home of his uncle, Mr. Harold Hodgins. He is the youngest son of Mrs. Hodgins, and the late Lionel Hodgins, former residents of Murrell's. Que.

MARRIED

—o—

FINAN—LIBBEY

A quiet wedding was solemnized at the United Church Manse, Timmins, Ont., by the Rev. W. Mustard, on Wednesday, Feb. 18, when Miss Minerva Finan, of South Porcupine, Ont. became the bride of Mr. Arnold Libbey, of Timmins, Ont.

The bride was attractively dressed in an afternoon frock of Ocean blue crepe with matching accessories. Her blue hat bore a short veil and she wore a corsage of sweet peas and pink roses.

Miss Wilna Finan attended her sister as bridesmaid and she was attired in Ocean blue crepe with dusty rose accessories. Her corsage was of yellow roses.

Mr. Lloyd McKenzie, of South Porcupine, attended the groom.

Mr. and Mrs. Libbey will reside in South Porcupine, Ont.

SPECIAL

Phone 37.

Beauty Shop next Tel. Office

Junior Red Cross to Maintain Eight Nurseries in Great Britain

Members of the Junior Red Cross in Canada, 800,000 of them, have undertaken a new project.

They will provide funds for the maintenance of eight nurseries in Great Britain, at a cost of $3,500 each, for children under five years of age who have lost their parents or who have been injured in bombing raids.

This new project will be known as the Junior Red Cross British War Nurseries Fund and will require approximately $28,000 during the coming year.

Each nursery will house between 25 to 35 children and will be staffed by two trained nurses, a teacher and necessary domestic help. Most of the houses to be used for the project are country homes, loaned free of charge. The only cost therefore, will be that of maintenance. The government of Great Britain will provide a grant to take care of any expenses over the $3,500 being provided for each nursery by the Junior Red Cross.

Members of the Junior Red Cross in this province, more than 58,700 members in 2,031 branches, raised $28,000 during 1941 from which they purchased three mobile kitchens, one ambulance, and $10,000 worth of materials to be made into finished articles. Overseas shipments totalled 45,600 garments.

More than 500 children from all parts of the province received medical care and treatment during the past year.

Mrs. Jas H. Riley Celebrates Ninety-second Birthday

Mrs. Jas. H. Riley celebrated her 92nd birthday Monday March 2nd 1942, at the home of her daughter Miss Gertie Riley. Many friends and neighbours called to wish her many happy returns of the day. She received a number of lovely gifts, also five birthday cakes donated by kind friends, Mrs. J. L. Hodgins, Mrs. Donald Baker, Mrs. G. G McDowell, Mrs James Horner, Mr. H. I. Hobbs and Mrs. T. H. Riley.

St. Andrew's W. M. S.

St. Andrew's W. M. S. met at the home of Mrs. Melvin Stewart, Wednesday, March 4th.

The president, Mrs. W. J. Murray, presided and the meeting opened with a hymn and responsive reading from the Missionary Monthly.

Completed quilts and and donations of articles ready for the bale were reported on.

A letter was read by the president from Nellie Taries, and our prayer partners for 1942 are, Miss M. Kates, of Central India, and Miss M. Crieg.

Mrs. John Dods and Mrs. M. Stewart had the program from the study book.

Three sick vists were reported and the offering received. Mrs Murray pronounced the benediction.

Tea was served by the hostess.

SALVAGE CAMPAIGN

The radio service and the press are endeavoring to promote the collection of different lines of salvage material required for war supplies.

Those persons who were identified with salvage collection in this district last November, or through the High School in February, wish to thank the donors of salvage and the pupils and teachers for their services.

We are pleased to know that many report having salvage material at their homes ready for the first receiving date. We expect very soon to be able to announce further dates that will be arranged so that School Teachers and Pupils, the Red Cross groups, the Women's Institutes and other organizations may co-operate in an active and widespread effort, when transportation conditions are satisfactory for collection.

In the meantime SAVE what you have of the materials necessary to manufacture "the tools to help finish the job."

SALVAGE COMMITTEE

Hay and Straw Exempt from Ceiling

The Wartime Prices and Trade Board has exempted hay and straw from the price ceiling.

In December last, wholesale ceiling prices were fixed for baled hay at three central markets in Eastern Canada: Toronto, Ottawa and Montreal. Sales elsewhere were exempt.

Purchases and sales of hay and straw between farmers have also been exempt under the order covering transactions in farm products between producers.

The new order of the board extends the exemption to all uses of these commodities. It is effective from March 4,

Crushed When Poles Fall

James Douglas Baird, aged 21 years, died as a result of a logging accident at the Hidden Lake camp British Columbia, on Friday about noon. A chain which held the load of poles on the truck, slipped when he was tightening it and let a number of poles role off on to him, inflicting serious internal injuries, from which he died in the Enderby hospital Friday evening.

An inquest Saturday gave the cause of death as accidental.

Douglas Baird was born in Enderby August 16, 1920 and attended public school at Springbend, where he lived until November last when he moved into town with his mother and brother. He is survived by his mother, four brothers, Robert of Eburne, Wesley of Britannia, Osburne of Vancouver, and Audrey at home; two sisters, Mrs. Ella Myres, Burnaby, and Mrs. Ruby Davidson of Deep Creek.

Funeral services were held on Monday afternoon from St. Andrew's United church with Rev. W. J. Selder officiating, assisted by Rev. J. L. King. Pallbearers were Bob Davidson, Eric Grayston John May, Max weddick, Lewis Abbey and Cliff Harkness. The church was filled with sorrowing friends who had gathered to bid a last goodbye to "Doug" as he was known to his many friends. Interment was made in Lansdown cemetery beside the body of his father, who passed away about five months ago.

The sympathy of a host of friends goes out to the bereaved mother and brothers and sisters.

NOTE—This reference is from an Enderby B. C. paper, and was sent to Mrs. Jas. H. Caldwell, in town, an aunt of the deceased.

Oil, long thought the Achilles heel of the axis, may become the United Nations' weak point in the Far East as Germany and Japan begin to squeeze the allies in the world-wide oil blockade shown on map.

Modern Etiquette

1. What is one of the most charming traits of one's personality?

2. What is the proper material for calling cards?

3. Is it necessary when writing for information regarding a trip that one expects to take or for the tickets, to enclose a stamp?

4. Is it proper for an office employee to hum or whistle while working?

5. What is the chief requisite of a good letter?

6. Does a woman ever wear a hat with full evening dress?

ANSWERS

1. To be a good listener, even if the stories one is forced to hear are not always interesting, neither are yours. The habit of polite attention is not a hard one to acquire and will win many friends.

2. White bristol board, glazed or unglazed, and of medium thickness.

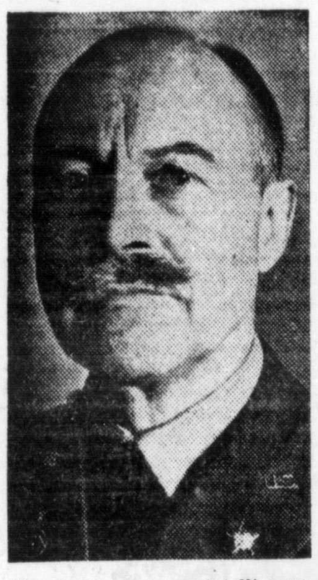

3. No. You are not asking a favor in this instance and in no way under obligation.

4. In most cases this is apt to prove rather annoying to the other employees in your immediate vicinity, who may be trying to concentrate on some problem. It is more thoughful not to indulge in any disturbing noises.

5. To have something interesting to say. One should never force himself to write when he has nothing of interest to communicate.

6. No.

G-2 Chief

New head of Army intelligence and press relations (G-2) is Brig.-Gen. Raymond E. Lee.

Blackout Toll

During December 1,024 persons were killed in road accidents in Britain, compared with 1,316 in December, 1940. More than half, 668, were killed during the blackout.

Ten thousand flashlights are being made in Britain every week.

In six Greek towns the Germans left not one house standing.

Army dispatch riders in America dashed off in search of a private soldier to give him a telegram saying "Cecilia's had triplets." Then they learned that Cecilia was the family cat.

Singapore's cathedral is built on ground shells, sugar, and white of eggs, the resulting mixture being stronger than granite.

During foggy weather, ships under way at sea must give signals by siren every two minutes.

Gas Rationing

A reduction of one-sixth in the basic gasoline ration for February, March and April has been announced in London, England.

Private owners of automobiles of 20 horsepower or over will receive 20 gallons for the three months.

What Science Is Doing

450 MILES PER GALLON—IF . .

Gasoline is sufficiently powerful to propel a car 450 miles to the gallon, petroleum technologists say, if means could be devised to obtain complete efficiency of consumption.

With fourteen gallons of gasoline a new model of any popular make could do 6,300 miles at twenty miles per hour on a perfectly level road, provided there were no power losses through friction, heat radiation, wind resistance, and a few other factors.

The trouble, it is explained, is not in the gasoline, one gallon of which contains 99,000,000 foot-pounds of potential power, but in the difficulty of building vehicles and highways which will permit complete advantage to be taken of this dynamic fuel.

Scientific progress will do much to improve operating efficiency of the motor vehicle, and also will improve the highway, it is believed, but the complete elimination of power losses cannot even be imagined at the present time—and probably not in the future.

FROST-CRACKED HIGHWAYS

A recently developed and effective method of preventing frost heaves from cracking and breaking pavements relies on rock salt as a road base, both in new construction and in repair work and patching. The salt reduces the freezing point of moist or waterlogged soil, but it is no substitute for adequate drainage, excavation or backfill with granular material. Highway engineers in the Northeastern United States, as well as in Canada, report that practically no frost heaving has occurred on salt-treated subgrades, even though the amount of salt incorporated in the soil is only five pounds per square yard of area.

HOW CAN I?

Q.—How can I make use of left-over oatmeal?

A.—The cup or two of oatmeal left from breakfast will make delicious muffins for luncheon. To one cupful of cooked oatmeal add one and a half cupfuls of flour, three tablespoons of sugar, four teaspoons of baking powder, a little salt, one egg, half a cupful of sweet milk and two tablespoonfuls of melted butter. Bake in buttered gem pans in hot oven.

Q.—How can I take proper care of the electric iron?

A.—Make a habit of rubbing the electric iron once a week with paraffin, applied on a soft cloth. This will keep the iron clean and smooth.

Q.—How can I avoid watery eyes when peeling onions?

A.—It is said that a cork held between the teeth while peeling onions prevents the eyes from being affected.

Q.—How should tissue paper be used for dusting?

A.—Tissue paper, slightly moistened, will remove dust easily. It is excellent for keeping a brass bed looking bright, also silver toilet articles, mirrors and windows. It leaves no lint, and does not, of course, need to be washed when the work is done, but simply burned.

Q.—With what should baked bananas be served?

A.—Baked bananas are delicious when served with pork chops or ham. After they are peeeld, place in a buttered dish, season slightly, then sprinkle paprika and butter over the top.

Drive out ACHES

Australia Mobilizes Men and Resources

Prime Minister John Curtin announced recently the war cabinet had been directed to mobilize all human and material resources in Australia for the defence of the commonwealth against the Japanese.

Austalia was put on a full war footing in answer to Curtin's call for mobilization of the island continent's manpower and resources.

"That means clearly and specifically that every person in this country is now at the service of the government to work for the defence of Australia," he said, in a mobilization statement.

"Only two things stand between us and the overthrow of everywe have and hope to have. These are the heroism and fighting power of our men going to battle and the industry, zeal and devotion of the men left behind."

In his statement on mobilization, Curtin said:

"We have reached the stage when a new way of life is impelled on us. All your leisure now—whether due to industrial regulation or your fortunate position—must be devoted to the service of your fellow men . . .

"The challenge has been flung down. Adversity has never cowed you, overwhelming odds have never intimidated you, and today I call on you to invoke all the best qualities of your ancestry. Go forth to the workshop and factory to work there as long as you can stand."

Marginal Mines Resume Operations

Since the price of mercury has gone up from $162 to $215 for a flask of 76 pounds in the last year, some of the marginal mines have been able to resume operations, states the Windsor Star. The prices have been the highest for any prolonged period since the last war.

Mexico produces about 18,000 flasks of mercury annually. Japan used to bid higher than the United States for the metal, but the Americans have been getting the total Mexican export for the last few months. Apart from production in the United States, the Mexican mines provide most of the mercury used by the Americans.

The way the Japanese were purchasing this Mexican mercury is another proof of the preparations that were made by Japan for the present war. Tokio extended a long arm to gather in the necessities for munitions, while other countries still hoped peace could be sustained.

Have You Heard?

The Negro sexton of a wealthy church had a stylish—and expensive — wife whose extravagance was creating an ever-widening gap between his income and his expenses. He decided to write the church officials and apply for an increase in salary. His letter, as a whole, was not a masterpiece, but its final sentence was. It read:

"It's mighty hard to keep a sealskin wife on a muskrat salary."

"Had you heard that Whatchacallit's daughter and Whosit's son—the boy that's in the army — were married the other day?"

"Yes," replied the other, "but this is the first time I've heard the real details."

A dapper little man applied for a separation order to be made out against his wife on the ground of cruelty.

When asked by the magistrate if he could prove his case, he replied meekly: "One night I dreamt I won $100,000, and the following morning my wife nearly killed me for not putting it in the bank before I woke up."

Traffic Officer: "As soon as I saw you come around the curve I said to myself, 'Forty-five, at least.'"

Woman Driver: "Well, you're off. This hat is what makes me look so old."

"I came across a characteristic example of the war joke trait, when I went into a London tavern for lunch the other day. On one wall was a big printed sign which said—"In the event of a raid, this house will remain open—in the event of a direct hit, it will close immediately."

Herbert: "Who was the smallest man in history?"

Jasper: "I'm ignorant, who?"

Herbert: "The Roman soldier who went to sleep on his watch."

Hugh had ridden around the pony track twice with the pony walking slowly. The third time his daddy decided to go with him and let the pony trot. After bouncing halfway around the track, Hugh said to his father desperately, "Daddy, I want to sit down."

Officer (examining recruit)—Have you any scars on you?

Recruit—No, sir, but I can give you a cigarette.

Farms and Homes Are Danger Spots

So you think you're "safe at home".

More than 30,000 persons lose their lives annually in the United States largely because of literal acceptance of that expression, the National Safety Council said in starting a new phase of a nation-wide emergency safety campaign.

Col. John Stillwell, council president, said: "It is within our power to change the conditions which permit 37,000 deaths and over 5,000,000 injuries annually in farm and home accidents. We must search out the formula for making our homes the havens of safety they are mistakenly believed to be."

W. H. Cameron, managing director of the council, asserted "in 85 percent of all accidents there is a human failure of some kind." National Safety Council records show home accidents are second only to traffic mishaps as the nation's chief killer, 32,000 and 40,000 respectively in 1941. Farm accidents fatalities totalled 4,500 in 1940, making agriculture the nation's most dangerous industry.

More than 10,000,000,000 containers were used by the United States canning industry in 1939.

RHEUMATIC SUFFERERS

Accept This Generous Offer!

Any druggist will return your money, if one bottle of Ru-Ma does not give you relief from rheumatic aches and pains, sore, swollen and painful joints. No matter how long you have suffered, you must get relief or "no pay." Try Ru-Ma and be convinced. Accept this generous offer now.

Here's The Answer

"Where in the world is our Pacific Fleet?" fumed a war-minded straphanger on a crowded bus.

Ray Lokey, Navy chief petty officer, had an answer.

He handed the man an enlistment application blank and suggested: "Join the Navy and find out!"

HOW TO RELIEVE PILE TORTURE QUICKLY AND EASILY

If you are troubled with itching piles or rectal soreness, do not delay treatment and run the risk of letting this condition become chronic. Any itching or soreness or painful passage of stool is nature's warning and proper treatment should be secured at once.

For this purpose get a package of Hem-Roid from any druggist and use as directed. This formula which is used internally is a small, easy to take tablet, will quickly relieve the itching and soreness and aid in healing the sore tender spots. Hem-Roid is pleasant to use, is highly recommended and it seems the height of folly for any one to risk a painful and chronic pile condition when such a fine remedy may be had at such a small cost.

If you try Hem-Roid and are not entirely pleased with the results, your druggist will gladly return your money.

HELP GET RID OF THAT COUGH-COLD THE QUICK EASY WAY

The Buckley way. The new improved Buckley formula now all medication—no syrup, not only brings quicker relief but gives you more for your money. But be sure it's the genuine . . . a-1

ISSUE 10—'42

IN MEMORY OF A GREAT MAN

The Late Sir Frederick Banting

A year ago Sir Frederick Banting was flying over the sea in the service of his country when he was killed in an airplane accident. His mission was to correlate the results of aviation medical research here in Canada with results obtained by scientific investigation in the Motherland.

Last week Sir Frederick's death was marked by a special service at the University of Toronto. In opening the service, Dr. H. J. Cody, president of the University, said "Sir Frederick Banting's life is a challenge to all Canadian youth to use imagination, energy and knowledge in the service of mankind." He was "one of the world's greatest benefactors — the discoverer of insulin, a director of research in many fields of medicine, a man of singular modesty, unselfishness and friendliness."

The University of Toronto has planned to hold a lecture on medical research each year on the anniversary of Sir Frederick's death. In delivering the first lecture last week, Dr. C. J. Mackenzie of the University of Saskatchewan said that Sir Frederick's success had been responsible for development of the whole field of medical research in Canada and had given it impetus all over the world. "It may well be," he said, "that future generations will reckon his contribution in this regard as even greater than his contribution of insulin."

Japanese Caused Real Emergency

We have ample evidence that the country is completely conscious of its danger and that sacrifices will cheerfully be made, Collier's relates. A friend of ours has a colored cook who, if she has any faults at all, may be somewhat too aggressively religious. The other night she addressed her employer as follows: "Ma'am, I been cookin' fo' you twenty years. I always done my best. I am a good church member. I don't curse. I don't use tobacco. I don't drink gin. I don't drink whisky. I don't bear no false witness against nobody. But, ma'am, the Bible say wine is comfortin' and these Jap folks is usin' me up so, I was wonderin' if you ain't got a drap of port wine."

Sowing Grass Seed From An Airplane

Sowing grass seed by airplane is the latest wrinkle out on the ranch.

Jack Frost and Roy Arledge, busy with a range improvement program, hired a pilot to scatter grass seed and Italian rye over their cattle lands.

The plane carries 300 pounds of seed on each trip and sows it in about 10 minutes. With ideal conditions, the pilot scatters around 12,000 pounds a day. He flies at 200 feet.

SUNDAY 8:30 p.m.

8-11

O'KEEFE'S BEVERAGES LIMITED

RADIO REPORTER

DIALING WITH DAVE:

"We did it before, we can do it again!" With this keynote of confidence and determination, O'Keefe's Show went on the air Sunday evening at their usual hour of 8.30. Merilyn Stewart, charming 16-year-old vocalist, delighted her audience with the ever-popular "Smoke Gets in your Eyes." Her second number, "Angels of Mercy" was written by Irving Berlin in honour of The Red Cross Society. Inasmuch as this program was dedicated primarily to this good cause, her delightful solo seemed a fitting part of the program. Throughout the entire concert, Freddie Davis' "Teen-Age Orchestra" formed the musical background, and certainly did a wonderful job of it.

The highlight of the Show was a short play with Nancy Carroll and Rai Purdy portraying the courage, determination and long patience of a suffering England, with a vision of a bright and glorious new world after its present trials. Nancy Carroll was on a visit to Toronto, doing all she could in aid of this worthy cause. Col. K. W. Langmuir, President of the Toronto Branch of the Red Cross Society, outlined in a few words the work of the Society, and expressed gratitude for the support given.

All the determination and conviction of war-torn England was sung into the popular song "We did it before, and we can do it again." In this fitting manner the All-Youth Orchestra closed a wonderful performance. Yes, we WILL do it again! So be sure to be with them again over CFRB next Sunday evening at 8.30, and enjoy the music and good times with these up-and-coming teenagers.

* * *

The Empire Air-Training Plan is the Empire's pooling house for personnel; and the development of the men, in every phase of air-force training, is a fascinating and thrilling story. And, the story of the R.C.A.F. and the Air-Training Plan comes to the air in a brilliant new series of programs, produced with the approval and co-operation of the Air Force. "Flying for Freedom" tells the story of four lads—a Canadian, an American, and an Australian and an Englishman who start out in the Empire Air Training Plan, complete their courses, and meet high adventure in operations overseas! Authentic in every detail, fictionized only where related incidents have to be tied together in story form, "Flying for Freedom" writes new pages in leading radio entertainment. Show will be aired locally from many Ontario stations, and CKOC in Hamilton, 1150 on your dial, broadcasts the program Wednesday nights at 8.00 o'clock. First show—March 4th!

* * *

Saturday, March 7th, at 9.45 a.m. from CKOC, a new Ontario milestone will be written in radio broadcasting, when the "Good Deed Radio Club," celebrates the completion of NINE CONSECUTIVE YEARS ON THE AIR! Designed for the young folks—using the talent of young people—and stressing the importance of always doing a Good Deed each week, the show has consistently kept its high standard of entertainment and its high ideals before the young folk of the Province. Membership is numbered in the tens of thousands, and on this Saturday's show, a special Theatre get-together in which 8,000 children will take part, is the highlight of the 9th Anniversary celebration! Mark a note on your radio calendar — Saturday, March 7th, 9.45 a.m.—CKOC—for the "Good Deed Radio Club" Anniversary Program!

* * *

1150 Notes in Brief:

Keep in tune with Victory—Listen to the Victory Loan National Radio shows—AND BUY THOSE BONDS OF VICTORY!

Sunday afternoon's treasure house of sacred song and immortal music, "The Cathedral Hour," heard at 2.00 o'clock on CKOC, will continue to be heard throughout 1942.

"For HE set them an example, that they should follow 'In His Steps' "—thus Charles M. Sheldon prefaced his great best seller of all times. Adapted for radio, and heard each Tuesday at 8.00 p.m. on CKOC, this powerful story of a man's great task is inspiring listening!

A new program is now being heard Sunday at one o'clock on CKOC—a program with its appeal definitely beamed for Englishmen, Scotchmen, Irishmen and Welshmen! Called "Melodies from the Isles," program is a songfest of melody by artists from 'over there,' singing the perennial favorites that have come from the homeland!

Record of the week: "Blues in the Night," by Artie Shaw and his orchestra!

SCOUTING . . .

That next to active military service itself there was no higher opportunity for serving the country at this time than helping youth become good citizens was the declaration of President Roosevelt during his radio broadcast to the Boy Scouts of America on their recent 32nd anniversary. "As one who has been interested in Scouting over many years," said the President, "it has been most heartening to have so many evidences of the practical value of the Scout training as we organize our armed forces for the task ahead of us. We must remember that next to active military service itself there is no higher opportunity for serving our country than helping youth to carry on in their efforts to make themselves physically strong, mentally awake and morally straight, and prepared to help their country to the full in time of war, as well as in time of peace."

A small group of British Boy Scouts who have distinguished themselves in fire fighting and rescue work during Nazi air raids over England and Scotland are to visit Canada shortly, to tour the Dominion, meet Canadian Scouts and leaders and address public meetings. They will tell of the experiences of English and Scottish Scouts while on duty during air raids, and will, it is expected, bring many valuable suggestions for Canadian Scouts preparing for possible eventualities in Canada.

The British Scouts are coming in response to an invitation extended by the Canadian General Council of The Boy Scouts Association following a recent special war service meeting of the Executive Board and a number of commissioners. The date of arrival of the Old Country boys is not known. In accordance with the present news restrictions regarding vessel sailings, it is expected that the first news will be the announcement of their arrival at an Eastern port. Detail plans of their tour will be announced later.

SUNDAY SCHOOL LESSON

LESSON X.

DISCOVERING WHY PEOPLE DRINK BEVERAGE ALCOHOL

Genesis 43:34, Psalm 104:14, 15; Proverbs 31:4-7; Ecclesiastes 2: 1-3, 10, 11; Isaiah 56:12; I Cor. 10:6, 7.

GOLDEN TEXT. — Wine is a mocker . . . And whosoever erreth thereby is not wise. Proverbs 20:1.

THE LESSON IN ITS SETTING.

Time.—The dates in this lesson are of no importance whatever, and the following are only tentative. The event referred to in the Book of Genesis occurred about 1700 B.C. Psalms, Proverbs and Ecclesiastes were written between 1050 and 1000 B.C. The prophecy from Isaiah was utterd about 712 B.C. The words quoted from the First Epistle to the Corinthians were written about A.D. 59.

Place.—The event referred to in Genesis took place in Egypt. Many of the Psalms, Proverbs and Ecclesiastes were written in Jerusalem, as was also much of the book of Isaiah. Corinth was a great Greek city of Paul's day, located in Southern Greece.

34. "And he toko and sent messes unto them from him: but Benjamin's mess was five times so much as any of theirs. And they drank and were merry with him." Joseph now prepares a great banquet for all of his brethren. The unusually large portion assigned to Benjamin was designed as an expression of his strong fraternal affection. There is not the slightest thing in this passage that what these men did met with any Divine disapproval.

God's Goodness

14. "He causeth the grass to grow for the cattle, and the herb for the service of man; that he may bring forth food out of the earth. 15. And wine that maketh glad the heart of man, and oil to make his face to shine, and bread that strengthens man's heart". God makes the soil respond to man's tillage with abundant produce. The word 'herb' here includes all vegetable products. God provides for man's enjoyment as well as for his sustenance. God appoints to the lowliest creature its portion and takes care that he has it. The herb is for man and he must till the soil, or it will not be produced. The wine mentioned had the quality of fermented liquors; it gladdened the heart. Thus, if taken to excess, it would have led to intoxication.

Day of Reckoning Postponed

4. "It is not for kings, O Lemuel it is not for kings to drink wine; Nor for princes to say, where is strong drink? 5. Lest they drink and forget the law, and pervert the justice due to any that is afflicted. 6. Give strong drink to him that is ready to perish, and wine unto the bitter in soul: 7. Let him drink and forget his poverty, and remember his misery no more." One well knows the temptations to which kings were subjected and how perverted and weak the life of a king could be made, when he allowed himself to grossly indulge in those things that took away his wisdom for governing. Those who thus drink forget the law, and thereby render false judgment. We are not commanded to give drink unto man; rather are we permitted to give liquor to other people if we are sure that they are perishing. It may be that a man when drinking does forget his poverty and misery, but this period of forgetfulness is very brief. Drinking only postpones a day of reckoning.

The Heart Not Satisfied

1. "I said in my heart, Come now, I will prove thee with mirth; therefore enpoy pleasure: and behold, this also was vanity. 2. I said of laughter. It is mad; and of mirth: What doeth it? 3. I searched in my heart how to cheer my flesh with wine, my heart yet guiding me with wisdom, and how to lay hold on folly, till I might see what it was good for the sons of men that they should do under heaven all the days of their life . . . 10. And whatsoever mine eyes desired I kept not from them; I withheld not my heart from any joy; for my heart rejoiced because of all my labor; and this was my portion from all my labor. 11. Then I looked on all the works that my hands had wrought, and on the labor that I had labored to do; and, behold, all was vanity and a striving after wind, and there was no profit under the sun." The mirth, or happiness, to which Solomon thus addicted himself was the mirth of festive convivialty. It was not to solitary drinking but to the pleasure of the festive board that he resolved to "eat, and to drink, and to be merry." He determined at the same time to acquaint his heart with wisdom. Some, it is true, understand this, of wisely regulating his indulgences, enjoying without exceeding. But, after all, where was the charm in all this? It was merely novelty. His heart rejoiced in his labors but not after them. They were by and by completed; the novelty of them passed away; and with the novelty the pleasure which they had yielded.

False Sense of Security

12. "Come ye, say they, I will fetch wine, and we will fill ourselves with strong drink; and tomorrow shall be as this day, a day great beyond measure." Indulgence of this kind was habitual. There was an intention to continue it because they loved it, and meant to drink deeper and deeper.

Salvation Determined

6. "Now these things were our examples, to the intent we should not lust after evil things, as they also lusted. 7. Neither be idolaters, as were some of them; as it is written. The people sat down to eat and drink, and rose up to play." The matter of drinking is not a matter which determines salvation, but it is a matter which determines spirituality in that salvation and the usefulness of the life of the believer.

Or Lay Off

The six-year-old was seated at the breakfast table one morning, when, as usual, eggs were served. The little tot surveyed them for a moment and solemnly said: "I wish to goodness hens would lay something besides eggs."

POP— Exactly, Pop — **By J. MILLAR WATT**

THE EQUITY

Shawville, March 12th 1942

Shawville Council

Shawville, Que.
March 2nd, 1942.

The Regular Meeting of the Municipal Council of the Village of Shawville was held at Hynes' Hall on the above date.

Present: Mayor McDowell in the chair; Crs. Caldwell, Cotie, Schwartz. Rennick and Prendergast.

The Minutes of the last meeting were read and approved on motion of Crs. Cotie and Rennick.

The following bills were presented to Council for examination and approval:

Gatineau Power Company ...	$64 09
Gatineau Power Company	47 62
G. T. Paul, Bond premium ...	10 00
R. P. Eades	5 00
Ministry of Health	6 70
Labour	50 28
Shawville Creamery	1 00
Manley Seaman	2 00
Mrs. R. Howard	5 00
Mrs. L. E. Thompson	5 00

Moved by Crs. Schwartz and Caldwell that the above bills be paid.—Carried.

Fire Chief Chas. Imison appeared before the Council and discussed the question of Purchasing additional fire-fighting equipment. Considerable discussion took place and the Fire-Chief was instructed to obtain price quotations and report to the waterworks committee

The Auditor's report for the year 1941 was examined by the Council. Moved by Cr. Cotie, seconded by Cr. Schwartz that the report be accepted.—Carried.

Moved by Cr. Cotie, Seconded by Cr. Rennick that Crs. Caldwell Prendergast and Schwartz be appointed the Waterworks Committee for the year 1942.—Carried.

Moved by Cr, Caldwell, seconded by Cr. Prendergast that Crs. Cotie, Howard and Rennick be the Streets Committee for the year 1942.—Carried

Moved by Cr. Prendergast, seconded by Cr. Cotie, that Dr. Powles, A. G. Brough and J. E, Cowan be appointed the Committee on Health and Sanitation for the year 1942.—Carried.

Moved by Cr. Cotie, seconded by Cr. Schwartz that Harry McDowell be appointed dog tax collector for the year 1942,—Carried

Moved by Cr. Cotie, seconded by Cr. Schwartz that Andrew Daly be appointed auditor for the year 1942.—Carried.

Moved by Cr. Prendergast, seconded by Cr. Caldwell that R. G. Hodgins, G T. Paul and Thomas Hobin be appointed Valuators for the year 1942.—Carried.

Moved by Cr. Schwartz, seconded by Cr. Cotie, that Chas. Imison be reappointed Fire Chief for the year 1942. —Carried.

Cr. Prendergast gave notice that at the next meeting of Council he would introduce a new By-Law governing dogs in the Municipality,

Motion Crs. Caldwell and Prendergast to adjourn.—Carried.

H. C. ROWAT,
Sec.-Treasurer

Clarendon Council

March 2nd 1942

Clarendon Council met on the above date. Present: Mayor Barr, Councillors Smart, Hanna, Judd, Whelen and Macfarlane.

Minutes of last meeting were read and approved on motion of Crs. Mactarlane and Whelen.

Motion—Crs. Hanna and Judd, that the Mayor and Secretary be authorized to sign a deed to Earl Horner, of Lot. pt. 17 a Range 6, on payment of the Interest agreed upon by this Council from the date of the land sale till the amount paid by the Council was returned, namely $10.50—Carried.

Cr. Laughren took his seat at the Board.

Motion—Crs. Whelen and Hanna that Messrs. E. J, Barber and F. A. Horner be appointed weed inspectors, and also to supervise the cleaning up of corn fields in order to eliminate the corn borer, and in accordance with the following resolution adopted by this Council.

Whereas: a very injurious insect, known as the Europeon corn borer, has invaded the Province of Quebec and has become last year a formidable foe.

Whereas: the further the multiplication of this pest would make growing of corn impossible and ruin thousands of farmers.

Whereas: it is of public interest and urgent to stop the spread of this pest and that the collaboration of all concerned is essential to reach that end.

Be it resolved that the Municipal Council of Clarendon by authority of the Municipal Law, article, 404 paragraph 4 as ammended in 1929 enacts as follows.

The month of May shall be devoted to the cleaning up of corn fields with a view to exterminate the corn borer.

During said month it is compulsary for any person within the limits of this Municipality. who has grown any kind of corn in the previous year to :

Carefully gather and burn any part or whatsoever of corn plants which may be left in fields, around buildings, or anywhere else.

Destroy in the same way all weeds which grow in or around any corn fields (as they also may be attacked by the corn borer.)

Plow under all the corn remnants that might not have been destroyed and in such a way as to leave the surface of the soil perfectly clean.

Any person who shall not observe the present regulation to the inspector's satisfaction shall be liable toa fine of $25.00.

The inspectors have the right to enter upon any property in the exercise of their duties.

The following bills were presented for approval.

W. A. Hodgins	$ 13 78
Andrew Daly Auditing	35 00
Ministry of Health	340 37
Percy Elliott Road Bill	34 75

Motion—Crs. Judd and Smart that these bills be paid.—Carried.

The Auditors report was presented and discussed, the report showing a balance on hand and bank December 31st, 1941, of $3,294,12.

Motion—Crs. Whelen and Laughren that the Auditor's report be accepted —Carried.

Motion—Crs. Macfarlane and Smart that this Council purchase a $500.00 Registered Bond in the Victory Loan Campaign in order to further the war effort—Carried.

Motion—Crs. Judd and Hanna to adjourn.—Carried.

J. A. DEAN
Sec.-Treasurer
Municipality of Clarendon

South Onslow Council

Quyon, Que., March 2nd, 1942

A regular meeting of the Municipal Council of the Township of South Onslow was held on the above date at the usual place of meeting.

Members present : — S. Wyman MacKechnie, Mayor, and Councillors Young, Westbrook, Stanton and Muldoon.

On motion Crs. Stanton and Muldoon, the minutes of last meeting were confirmed as read.

Whereas at January meeting of Council no by-law was introduced regarding water course—no report being presented at that time—a report of S. E. Farley, engineer, on watercourse on Lot 24, R. 5, was read.

Motion—Crs. Stanton and Young—That the members of this Council meet Ste Marie & Ste Marie in their office for advice on report, and, if advisable, instruct the lawyer to prepare a by-law according to his advice.—Carried.

A bill from North Onslow re. work on town line presented for $233.10 ; South Onslow having performed the amount of $231.80.

On motion of Crs, Muldoon and Stanton, the following bills were ordered paid :—

Insurance Company

The Equity, receipt forms ..	4 00
Minister of Health and Social	279 51
Jas. Dougherty, measuring .	1 50
Bernard Farrell, cedars.....	104 80

—Carried

Motion—Crs. Armitage and Martineau—that Arthur Labelle be appointed Auditor for this Township for the year 1942.—Carried.

Notice of motion was given by John C. Dagg—That By-law No 103 to levy rates for the current year and a By-law to be known as By-law No 104, to levy a tax on all dogs in this Township for the year 1942 will be introduced at the next meeting of this Council

Motion—Crs Farrell and Armitage—that this council adjourn until April 7th 1942, at one o'clock in the afternoon—Carried.

Andrew Farrell,
Secretary-Treasurer

If every one of Canada's new army of wage-earners saves more, the country's effort toward winning the war will be greatly helped.

Every dollar you save means more labour and materials freed for making the war goods so urgently needed.

These savings, lent to the country in the purchase of War Savings Certificates or Victory Loan Bonds—lent to intensify Canada's war effort—will bring victory—and peace—nearer.

To Save is Practical Patriotism

THE CHARTERED BANKS OF CANADA

SHORT COURSE in AGRICULTURE

Under the auspices of C. P. A. S., No. 1

March 16, 17, 18, 19 and 20, 1942

MONDAY to FRIDAY

Monday, March 16, Ladysmith Hall

1 30 p. m.—Opening of the Course.
1 45 p. m.—Discussion on Seed Grain and Small Grain.
2 00 p. m.—Seed Judging Competition for Junior Farmers and Farmerettes, Oats, Barley, Alfalfa, Red Clover.
3 00 p. m.—Demonstration Live Stock Judging.
3 15 p. m.—Live Stock Judging Competition.
4 00 p. m.—Address—Animal Husbandry.
8 00 p. m.—Address—Agricultural Policies.
8 45 p. m.—Address—Farm Management.
9 30 p. m.—Address—Field Husbandry.

Tuesday, March 17, Stark's Corners Parish Hall

(Programme Same as Monday)

Wednesday, March 18, Memorial Church Basement, Bristol

(Programme Same as Monday)

Thursday, March 19. Shawville Agricultural Hall

1 30 p. m.—Seed Judging Competition.
2 15 p. m.—Live Stock Judging Competition,
3 15 p. m.—Bacon Grading Demonstration (Demonstrated with Wiltshire sides)—C. Coulter.
4 15 p. m.—Address—Bacon Grading Regulations—C. Coulter.

— At the Theatre Hall —

8 00 p. m.—Pictures by National Film Board : 'Tools of War' 'Battle for Oil' 'Hot Ice' and Show a Leg.'

Public Speaking Contest

Beginning at 8.00 sharp, two films will be shown Public Speaking Contest will then be held, and additional films will then be shown.

Friday, March 20, Shawville Agricultural Hall

1 30 p. m.—Address—Farm Management.
2 15 p. m.—Animal Husbandry.
3 15 p. m.—Address—Agricultural Policies.
4 00 p. m.—Demonstration—Farm Book-keeping.
8 15 p. m.—Public Address—Hon. James G. Gardiner, Canadian Minister of Agriculture, Ottawa Ont.

Subjects for five-minutes Speeches

Contestants, 14 years and under

1—Eggs For Britain.
2—Grain Makes Bacon.
3—A Challenge to a Country Boy'
4—My Cow must give 1000 lbs, more.
5—I can't Fight, but I can Farm.

Contestants, 15 to 20 Years, Inclusive.

1—A Salute to the United Nations.
2—Winston Churchill.
3—The call of the Seven Seas.
4—The Call of the Empire.
5—Each Cow must Produce 1000 lbs. More.

Contestants, 21 to 25 Years, Inclusive.

1—How I can best serve My Country.
2—I Prefer the Black and White Breed.
3—My Impressions of Macdonald College.
4—The Canadian Farmer can Help.
5—I must do the Job a Little Better.

PRIZES

1st—Silver Trophy, donated by the Agronomist, to the Student with the highest aggregate score in the course. (For Annual Competition)

2nd—Silver Cup, donated by the Shawville Creamery, to the student with the highest aggregate score in Live stock Judging.(For Annual Competition)

3rd—Silver Cup, donated by the Shawville Milling Co to the Student, with the highest aggregate score in seed Judging. (For Annual Competition)

4th—The usual Cash Prizes will be paid.

Vitamin From Molasses May Prevent Gray Hair

In sugar cane may lie the cure for graying hair. Scientists at the University of California revealed recently an improved method of extracting an "anti-graying" vitamin from cane molasses. They reported the vitamin effective on animals, but said they were not yet ready to try it on human beings.

Drs. Oliver and Gladys Emerson, Herbert Evans and Ali Mohammad, all on the staff of the university's institute of experimental biology, reported on the progress of experiments inspired by Dr. Agnes Fay Morgan's discovery of the presence of the potent vitamin in the "Vitamin B complex" last year.

Dr. Morgan split the complex vitamin into several groups, one of which prevented beri-beri in man, another pellagra, a third a skin disease in chicks. She determined that if one of these fractions was omitted from the diet of experimental rats the hair began to fade to gray. Fed the missing substance the rats regained their original color.

Dr. Emerson, his wife, Dr. Mohammad and Dr. Evans thereupon undertook to isolate the vitamin fraction which affected hair color.

Lessons In Love

by
JERRY BRONDFIELD

SYNOPSIS

Last Week: Standing on the edge of Larry Grover's swimming pool, Barbara is suddenly picked up by Dugan Blake and hurled into the water. Dugan explains he was just collecting his golf bet. Later, after everyone else is in bed, Barbara hears sounds coming from the kitchen. She investigates, finds Dugan preparing a late snack. After breaking a paper bag and frightening Dugan, Barbara is clasped in his strong arms and finds herself kissing him.

* * *

DUGAN IS CLEARED

CHAPTER X

Barbara clung to Dugan for a few seconds longer after he had released the pressure of his arms. She tried to collect her thoughts.

Dugan Blake had kissed her and she had returned his kiss. Why? . . . Why? . . . she asked herself over again.

As abruptly as he had taken her in his arms, he left her and went over to straddle a chair. His face was expressionless.

"According to the book, I'm supposed to say something melodramatic, like 'I shouldn't have done that.' Well, whether I should or shouldn't have is a moot point. I did it for only one reason. I'm always doing what my impulses dictate, and I suddenly got an impulse to kiss you then."

She felt disappointed. "Oh, is that the reason?"

He looked at her sharply. "I guess so."

"You guess so. For a minute," she said brightly, "I thought you finally were succumbing to my charms."

"You say 'finally' as though it were inevitable."

* * *

He got up and took her hand. She made a move as if to withdraw it, but he tightened his hold.

Dugan smiled tightly. "Maybe I shouldn't be a hypocrite. Maybe it was inevitable. Maybe it's me that's being fooled, and not you."

Something jumped inside of her —something she knew wasn't supposed to happen to her. She laughed nervously. "Quite a speech for you."

She turned to the stove. "Well, this is where we came in. How about those eggs?"

"I'm not hungry any more," he said. "Maybe we'd better go to bed."

She couldn't help saying what she did. It was too perfect a spot.

"Beating a retreat, eh, before you do irreparable damage to yourself?"

His mouth set for an instant. "Don't worry about me. I recover fast from something that isn't good for me."

* * *

Barbara hardly saw Dugan during the next four days. Once he practiced with Larry's Briar Hill polo team. Most of the time he spent in New York with Uncle Hank.

Uncle Hank came back from New York alone on Wednesday night.

"Dugan's having dinner with some people tonight, Barbara," he said, drawing her to a chair. "Sit down. I want to tell you something."

He took her hand in both of his. "I found out today what's at the bottom of this Midwest Oil business."

"Yes?" she said eagerly.

"Chap by the name of Bert Lipscomb was Dugan's roommate at school. Pretty close roommates, I understand. Well, Bert's father is president of Midwest. There was an attempt to squeeze Old Man Lipscomb out of the company, but he found it out just in time.

"Then he had to work fast. There had to be a reorganization, but things were in a mess. In order to swing it he had to get an awful lot done in a very short time. There was no one he could trust . . . until his son remembered Dugan."

* * *

Uncle Hank sat down beside Barbara. "Well, substantially, that's the story. Dugan couldn't turn down his old roommate, and he didn't dare breathe a word to anyone. Circumstances just put him smack in the middle . . . and we, like fools, jumped to conclusions."

"And I guess we jumped too far and too fast," she admitted.

He looked at her quizzically. "You like him?"

"He's frightfully handsome but he's too superior for his own good. I like men to be superior, but I like them more like—like, well, like Larry Grover. He's a superior type, too, but at least he'll bend once in a while."

Uncle Hank chuckled. "You're going to the country club dance with Grover Friday night, aren't you? How about Dugan?"

"He's stagging . . . as usual. And as usual he probably will need a bodyguard to protect him from the sweet young things."

"Oh, I daresay he'll manage to break away to dance with you at least once," Uncle Hank told her. "That is, if you don't wear that 'keep-your-distance' look you usually have whenever he's in the room."

She wanted to laugh. If only Uncle Hank knew what had happened last week-end.

Dugan brushed a spot of powder off his white jacket—powder which a "sweet young thing" had deposited while dancing — and leaned on the veandah railing with Rod Porter, No. 2 man on the Briar Hill polo team.

"Not a very good stunt, this dancing business, for gents who play a round-robin polo tournament in two days," Rod said.

Dugan laughed. "You're right. We won't be able to climb aboard a horse. With seven teams entered, how many games do you think the winner will eventually play?"

"About three," Porter guessed. "Unless there's a bye somewhere along the line. Anyway, we ought to beat that Spring Mountain outfit tomorrow morning."

Dugan nodded absently. He had just noticed Barbara and Larry walking off the terrace toward the garden.

* * *

From within the cluhbouse, the melodic throbbing of the orchestra floated out through the open windows. He could hear the laughter and all the sounds in the night which spoke of carefree gaiety.

Dugan knew suddenly that he was going to miss much of this. On Monday he would leave for Oklahoma, Oklahoma and the black dirt and the still blacker gold which rushed and gushed from the ground.

It was good to think of that too, because that was his life and he loved it.

His reverie was broken as another "sweet young thing" grabbed his arm.

"This is our dance, but I don't want to dance," she wailed. "C'mon, show me the garden and the moon."

He tried to protest but she dragged him off down the walk.

"Isn't this gorgeous," his companion breathed, but Dugan didn't notice.

All he saw was Larry Grover and Barbara behind a silvery birch tree.

Barbara was in Larry's arms and he was kissing her.

(Continued Next Week)

Danger

The danger is so real and so near that we must, of necessity, act as though we awaited hourly an attack of the invader."—Major-General L. R. LaFleche.

BLITZ-BUSTERS

These two-pounder anti-tank guns are being turned out in large quantities from a Canadian factory. This gun is only one of the ten types now being built in Canada.

A Wartime Prayer: "To Be Adequate"

A New York Times Editorial On Prayer In Different Forms

It would be surprising in these days laden with grief and danger if men did not pray more than ordinarily. In different times prayer takes different forms. If there is less of the formal saying of grace at meals, it does not mean of necessity that there is less giving of thanks. One pious man well remembered because when he prayed he sounded as though he were actually talking face to face with God once said: "Prayer is an attitude, an atmosphere, a state of mind and heart."

"There are times," says Victor Hugo, "when the soul is on its knees whatever may be the attitude of the body."

We do not know in how many homes today the family actually gets down on its knees to speak to God in daily worship. In other days a chapter of the Bible was usually read before prayer, in which the head of the house led. Sometimes everybody in the circle offered some petition.

There are doubters who hold, to, their own misfortune, that prayer does not change anything; but any one who rises from a hearthstone communion of this kind knows that the participants are not quite the same afterward. A kind of peace has settled down on the room for a moment. The setting for such circles is usually rural, partaking of the majesty of the unfettered outdoors; the spirit always is. Simplicity has, for the time, replaced artificiality. You will often find these family prayers out in the country. Student pastors, who have traveled out from the seminary to practice-preach, are familiar with —and awed by—them. To bow under such circumstances is to make real the most abstruse theological studies and to refuel faith.

* * *

What can man pray for today? Both warring sides will be praying for victory. Of course, God will not answer all prayers. That would be illogical, and God's logic is terrifying even to the righteous in the depth of its justice. But every man and woman and child in this testing time can make one prayer: He can pray to be adequate. To be equal to the exhausting demands upon his courage in the great encounters. To be adequate in his patience for the daily drain of small annoyances. To be equal to the emergencies facing mind and body.

It will be recalled that Lincoln, on that rainy afternoon before he started from Springfield to Washington, said to his neighbors: "Without the assistance of that Divine Being who attends me I cannot succeed; with that assistance I cannot fail." There is a moving simplicity in the words that followed: "Trusting in Him who can go with me and remain with you and be everywhere for good, let us confidently hope that all will yet be well." He then bade his neighbors farewell.

* * *

Just before Gettysburg everybody seemed panic-stricken. It was feared that aonther Fredericksburg or another Chancellorsville could not be withstood. Lincoln related afterward that he went to his room, locked the door and got down on his knees. He told God that the cause was just. "I then and there made a solemn vow to Almighty God that, if He would stand behind our boys at Gettysburg, I would stand by Him."

So it was with all the great emergencies he met with in the White House. "I have been driven many times to my knees by the overwhelming conviction that I had nobody else to go to. My own wisdom and that of all about me seemed insufficient for that day."

We can assume that there is some praying going on in Washington today. Some of those prayers are unspoken. Some of them do not wait for the going-to-bed time for saying. They are said at desks, perhaps. But there is no reason to believe that God does not hear prayers said from behind desks.

Arm Chair Method For "Bailing Out"

St. Thomas Times-Journal Tells of Latest Idea For Parachutists

In the last war parachutes did not come into use until very near the end of the campaign, and then only in a limited degree, airmen having had very little instruction in this branch of aviation. If the parachute had been as much in vogue then as now, the lives of thousands of men would have been saved.

"Bailing out" has become commonpace today. Every man who goes up in any kind of plane has his parachute and knows what to do. Statistics of parachute accidents in the training of American airmen show that there is one fatality for each 20,859 jumps, a broken leg in one in 400, and minor injuries in the ratio of one percent. It must be remembered, however, that in actual warfare the number of men who have to bail out is relatively small. No man would have to make the leap 20,000 times during the war. On the other hand, the emergency circumstances under which these jumps are made increase the hazards of landing, and the percentage of accidents, fatal and nonfatal, would be higher. The development of parachute jumping, however, is a great boon to the air forces.

An American inventor has produced a device for passengers in commercial planes which he hopes will be generally adopted. Knowing that the general public is not educated to the use of parachutes, he has invented a chair to which the passenger is fitted. In event of an emergency, the pilot simply operates a lever and one by one the passengers are tumbled through a hole in the fuselage whether they want to go or not.

A few seconds after the passenger and chair fall out together the chair automatically opens like a parachute and he floats to the ground. This seems to be a good idea, but we are inclined to think that passengers might fight shy of going by plane if they thought they might be tossed out without being allowed the choice of sticking with the plane. There is no more reason, however, for being afraid of this foresight than ship's passengers are when they are called up on deck the first morning out and made to try on their lifebelts.

Yet the day may come when a passenger may use his parachute, not to make an emergency landing, but to step out at his destination. Instead of a plane landing at an airport, the passenger will merely ring a bell, as in a street car, and the pilot will let him drop off so that he can land in or near his back yard.

Phone Call Started Huns In Reverse

A mere telephone call by Joseph Stalin threw the German invasion of Russia into reverse, Sir Stafford Cripps, former Ambassador to Moscow, said recently. "On the night of December 12 the Soviet Premier personally telephoned down to the general in command and ordered him to attack," Sir Stafford related. "And that started the Germans to retreating on the whole of the front."

Fewer Fancy Socks And Hosiery Colors

People will need to get along with the simpler things and the simpler styles and expect more of restriction and deprivation according to further warnings from Ottawa. The policy is not new but of its intended amplification there is fresh evidence.

What is being planned by various boards working in co-operation is more "rationalization of production" by cutting down multiplicity of styles. This will conserve materials, labor and machinery without essential production being cut.

Every administrator has been asked to confer with his trade and advise where things can be eliminated. For example it is proposed to cut down from 20 to six the sizes of fruit baskets.

Men will have to get along with fewer fancy socks. In women's hosiery, in place of shades reflecting every color of the rainbow, they will be standardized. Four or five will have to do in place of 20.

The fundamental idea is to cut down the cost of production.

TABLE TALKS

A Marmalade Discussion

At this time of year most of us wish to see the empty jars and the bare shelves of the fruit cupboard being replaced with spring jams and marmalades. Probably most of us commence with orange and lemon or other citrus fruit marmalades. I have been requested to give to you again the marmalade recipe and a discussion on the same, for quite a number seem to be having failures, and marmalade making can be made very simple.

The first thing of importance is choosing the fruit. Do not think that fruit you have had in the house for sometime or that is not quite fresh enough for table use will make good marmalade. In order to have a clear marmalade with an excellent flavor you must have fruit from the finest selection. Now for the recipe:

Grapefruit, Orange and Lemon Marmalade

3 oranges
3 lemons
3 grapefruit

Extract juice from fruit and pare all white membrane from peels. With a sharp knife slice very thinly the fruit peel or chop very finely. Place juice and peel in an earthenware dish and add water, 3 times the amount of juice and peel. Allow it to stand over night. In the morning place on the heat and bring to a boil. When it reaches boiling point, boil from 5 to 15 minutes. I find the first boiling varies with the type of heat you are using. If using electricity or a good type of oil stove where the heat is the fierce steady type, five minutes is sufficient to boil after the boiling point is reached. If the heat is slower such as coal, boil from ten to fifteen minutes (never longer). After this boiling return it to the earthenware container and allow it to cool slowly and again remain over night. The next morning measure juice and pulp, cup by cup, and for every cup of juice and pulp measure the same amount of sugar. Place the sugar where it will get warm—not hot, but warm. Commence the boiling of the juice and pulp. When it has reached the boiling point stir in the sugar very gradually, stirring constantly until dissolved. Boil until, when dropped from a spoon, it will spin a thread. This should be from fifteen to thirty minutes, but never longer. Long boiling of marmalade makes it a dark color and spoils the flavor.

Pour into containers and cover with paraffin.

Now I have discussed with you the type of heat, the type of fruit, and the length of boiling. Just one thing more; when making this full recipe I never boil it all together. I divide it into three portions; a smaller amount is easier to make.

Occasionally for very special marmalade, I do add three tablespoons of white corn syrup to the above recipe, adding syrup about five minutes before removing from heat. If dividing into three boilings, add one tablespoon to each boiling. The syrup adds a little more of a honey flavor.

Miss Chambers welcomes personal letters from interested readers. She is pleased to receive suggestions on topics for her column, and is even ready to listen to your "pet peeves." Requests for recipes or special menus are in order. Address your letters to "Miss Sadie B. Chambers, 73 West Adelaide Street, Toronto." Send stamped self-addressed envelope if you wish a reply.

SIMPLICITY SPELLS CHIC

For This Soft Shoulder Dress

By Louise Lennox

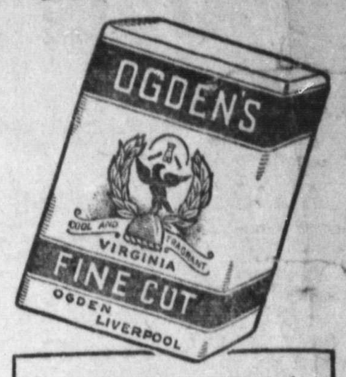

It's utterly simple, it's utterly chic, it's the best looking dress you ever owned, and it's right for almost any occasion. You'll love the very new soft shoulders and concentrated front skirt fullness. You'll dress it up or down with accessories to suit your mood.

Style No. 3437 is designed for sizes 12, 14, 16, 18 and 20. Size 16 requires 2⅞ yards of 39-inch fabric.

Send twenty cents (20c), (coin is preferred) for pattern to Room 421, 73 Adelaide St. West, Toronto. Write plainly your name, address and style number. Be sure to state size you wish.

A FAMOUS BRAND

Ogden's FINE CUT

One of the largest herds in Canada in its time, as many as 14,000 head of cattle bore this famous brand of the old Oxley Ranch, founded in Alberta in 1902 by the late W. R. Hull.

BRAND OF THE
OXLEY RANCH

Australia To Form Corps of Guerillas

War Minister F. M. Forde has announced that Australia will recruit a volunteer corps of guerillas to aid the army in case of invasion.

He said the Government plans to enlarge all volunteer forces immediately. Regular officers will instruct civilians in best ways to aid the army if invasion comes, while defence activities outside the jurisdiction of the Army and the Militia are to be directed by district commanders.

Forde cautioned against making a distinction between regular armed forces and guerilla troops or "people's armies." In Australia all armed forces must be regarded as people's armies, he said. (Civilians who take up arms against enemy invaders are subject to the death penalty under international law, at the invaders' discretion.)

The Government ordered arms ened coastal areas as Japanese bombers struck at Port Moresby, 400 miles from the Continent.

It was announced that army factories will be scattered among inland communities, with small plants and garage workshops making small items of defence equipment. Munitions manufacture is concentrated in thickly populated coastal areas at present.

Oceans

"The oceans which once separated the United States and Great Britain and the United States and Australia now join them."—Nicholas Murray Butler.

ISSUE 10—'42

VOICE of the PRESS

SIX WORDS

An unnamed young soldier out in Hawaii has a message for you.

He didn't know he had a message.

But he had. A correspondent touring the new defences of Hawaii found him [illegible] secluded dugout, where he was sleeping on the hard ground. Asked if that wasn't pretty tough, the young soldier grinned, spat, and delivered his message: "Was. Not now. Used to it."

The sooner we get into that frame of mind about how tough it is to undergo the thousand little inconveniences that go with war, as well as the real sacrifices, the better. The end of the war will be in sight when 11,000,000 people are saying about how tough it is to make their own sacrifices: "Was. Not now. Used to it."

—Calgary Albertan

"IF WE CARE ENOUGH"

Miss Byrne Hope Saunders, speaking to women of Western Ontario on the price ceiling law, gave all of Canada a motto for this war. Women, she said, can be unbeatable, "If we care enough."

What better rallying cry could be coined for this country at war? In it lies the whole spirit that we must have to win. Canada has everything for victory, either in war or peace. Nothing on earth can beat us, "If we care enough." Thus far, there have been too many evidences that we do not care enough, do not care enough to serve, do not care enough to work, do not care enough to sacrifice, do not care enough to give.

"If we care enough," we can go forward without one worry for the future. If we do not, the struggle is lost right now.

OUR DEBT TO RUSSIA

Our debt to the Soviet is a hundredfold heavier than is the Soviet debt to us. For all we need to do is contemplate what would have happened to us had Stalin chosen to go along with the Axis—as so many writers predicted he would do just a year ago.

We have our hands full as it is, with Hitler and Japan—even when a million Russian lives have been sacrificed to help hold our lines. Had those lives been sacrificed to break us, we would not be arguing about the petty things which concern us in Canada today.

South African Sheep Help British Sailors

The skins of South African sheep are helping to save the lives of shipwrecked British sailors.

Sheepskin gloves, large and warm, are now included in a lifeboat's equipment. Fine gloves are got from each sheepskin and big quantities are being turned out by the makers.

They are also prdoucing a great number of other types of gloves, mostly for the Royal Air Force, not to mention leather flying helmets at the rate of a thousand a week.

The Army is getting from them gloves of ample size for protecting men at bayonet practice and they are also distributing quantities of boxing gloves to the forces generally.

The Amazon River is navigable for ocean steamers for 2,300 miles.

THE WAR - WEEK — Commentary on Current Events

National Unity Strengthened By Changes In British Cabinet

A wave of criticism has been slowly gathering force against Prime Minister Churchill's government as the British lost hold in Singapore, as the Imperials fell back in Libya, as the German ships of war escaped through the Strait of Dover. The nation was demanding explanation, insisting in changes in the cabinet in order to strengthen Britain's war effort.

Public opinion in Great Britain is a mighty force, and Mr. Churchill is a strong-minded man. Such, however, is the potency of British democracy that he bowed to the demands of an aroused people by making changes essential to the strengthening of his government. The shake-up was a thorough one and the present small group of cabinet members will now be able to devote all their energies to the conducting of the war.

Closer Ties With Russia

Sir Stafford Cripps, former Ambassador to Russia, was appointed leader of the House of Commons. His entry into the cabinet appeared to be a response to growing demands that his views on closer relation with Russia be given more authority. Sir Stafford knows Russia, her strength and her trends. Isn't Russia the only nation that has conducted a brilliant war aganist Hitler, and the only nation that has carried out a grand strategy? General MacArthur, in a greeting to the Red Army, said: "In my lifetime I have participated in a number of wars and have witnessed others, as well as studying in great detail the campaigns of outstanding leaders of the past. In none have I observed such effective resistance to the heaviest blows of a hitherto undefeated enemy followed by a smashing counter-attack. The scale and grandeur of this effort marks it as the greatest military achievement in all history."

Task of Red Army

The courage and endurance of the Russians must be backed up with the machinery of war, and Britain and the United States must supply all that is necessary to enable the Russians to sustain their offensive against the invaders and to drive them from their land. The task of the Red Army is clearly stated in Premier Stalin's speech to Soviet Russia's 200,000,000 people in the twenty-fourth anniversary of the founding of the Red Army of Russia. He said "statements appear from time to time in the foreign press to the effect that the Red Army aims at the destruction of the German people. This is a wicked, foolish libel. It is probable that this war will bring about the end of Hitler's clique. We would welcome this solution. But it would be ridiculous to identify Hitler's clique with the German people and the German state. History teaches that Hitlers come and go, but the German people and the German state remain . . . The task of the Red Army consists of liberating from the German invaders our Soviet land, in liberating from the whip of the German invaders the citizens of our villages and towns."

Responsibility For Defeats

It is important to understand that responsibility for the unsatisfactory conduct of the war does not fall on any one man, but on a system that made early defeats inevitable.

Before this war, the British Empire was a loose association of nations and colonies, relying on the mother country for protection. None maintained an adequate fighting force, not even Britain herself. Britain did, however, have a powerful navy which was considered sufficient to protect her possessions and commerce in all parts of the world. Reliance was also placed in the French fleet, particularly for control of the Mediterranean. Britain depended on the French armies—they failed. She depended on American naval superiority in the Pacific—that failed.

Task of British

The task of total war was too great for British preparedness. Britain was called upon to protect her island home, to safeguard the Mediterranean shores of Africa, to build up an army in the Middle East, to arm her forces in the Far East, to furnish war materials to Russia and China.

It was not so much a matter of faulty strategy on Britain's part but a case of sheer physical incapacity that caused initial reverses. The British Empire was not equipped for war and no government, whether headed by Churchill or any other man, could have hoped to achieve victories with the materials on hand.

In the reconstruction of his cabinet, Mr. Churchill retained the post of Minister of Defence but, to free himself of routine duties, appointed Mr. Clement R. Attlee to the new position of Deputy Prime Minister.

The changes made by Mr. Churchill should meet with the widest approval. There is a feeling of great relief that the Prime Minister has by his prompt action eased the growing tension in Parliament. Renewed confidence will now be felt in the cabinet and the national unity will be strengthened for whatever lies ahead.

LIFE'S LIKE THAT — By Fred Neher

"You dance heavenly, Mr. Bolt!"

WINTER CONVOY

By Lieut. E. H. Bartlett, R.C.N.V.R.

Behind closed doors a question of naval warfare was under discussion.

"If any enemy submarine is sighted, the sighting ship must open fire immediately," a quietly-spoken officer was saying.

"If you are not sure whether he's an enemy, open fire anyway," he continued. Then, grimly, "we must not waste opportunities."

There were appreciative nods from his audience. They were captains all, masters of ships bound for the war areas. Not captains of ships built for war, but men whose peacetime cargo carriers have been armed with guns against both submarines and aircraft, so that they will have some means of defence and so that "opportunities will not be wasted."

They were sitting in what the war has made familiar as a "convoy conference," getting their final instructions before their fleet sailed from a Canadian port, outward bound with food and supplies and vital necessities for those other parts of an Empire at war.

It was a formal conference, with formality natural to men bearing responsibility. There was nothing of the atmosphere of class-room or lecture-hall, though, for this was a conference of equals recognizing that each had his own duty to perform, and that each was dependent upon the other.

On the one hand were highly trained, keenly specialized Canadian naval officers, with all the experience and knowledge of the Navy behind them. And all the knowledge, too, of the hazards into which the conferees were going, and which they were to share.

On the other hand were the captains of the merchant ships. Each, in his own ship supreme. Each, after years of command, grown used to independent action and to making his own decisions. And each, at the dictates of war, abandoning his prized independence for the extra strength and the extra safety which come with the sending of ships to sea in closely guarded convoys.

They were veterans of the Atlantic Battle at the conference. Presiding was a "convoy commodore," the man who was to direct the fleet from the bridge of one of the merchant ships. Already, this war, he has many crossings behind him, and a reputation for "getting the ships through."

"Getting them through," he said bluntly, was the only thing which mattered to him.

"I don't intend to leave anybody behind, we all will get across together," he declared. "We don't want any stragglers, and we don't want anybody losing the convoy at night. If you are having any trouble, let me know, and we'll do something about it."

Calmly and confidently he outlined his plans. Each captain had a copy of the convoy orders, and a chart showing the cruising dispositions of the ships. Orders and charts were given close attention as the commodore went over them point by point.

This to be done if a ship was damaged; that if the enemy attacked. Precautions to be taken against making too much smoke, which would give away the convoy position in daytime; or against showing lights, the flare of a careless match or the glare of an improperly shielded lamp, which would draw danger at night. Smaller points, too, which these men of experience recognize as being important. The need for dumping rubbish overboard only at certain dark hours, so that no trail may be left on the sea's surface to guide the submarines which strike from below. Care that no slick of oil be left to provide yet another trail.

Carefully the captains noted each point as it was made. They wear no uniforms, and do not claim to be fighting men, but they are men wise in the ways of sea warfare and know the tricks of circumventing the enemy as well as the art of fighting him if he appears. To them this study of convoy orders was not an empty gesture, staled through repetition, but a meeting of their board of strategy, making sure that all was in order before their fleet put out to sea.

Sitting with them were uniformed officers of the fighting service, captains of Canadian escort ships which were to throw their shield around the merchant fleet. They, too, studied their orders in intent silence, completing their plans so that the protection they could give would be of the greatest.

The conference drew to a close. The commodore had given his last verbal orders, his next would be by signal from the bridge of the merchant ship in which he would lead the fleet. There remained only his good wishes.

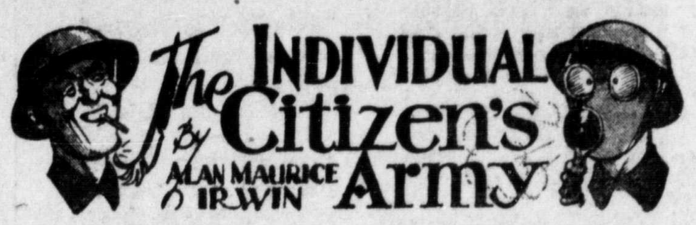

"A good and safe passage to you all," he said, "and the best of good luck. I hope we meet safely on the other side."

The wishes were echoed by the Naval Control Service Officer and by the Naval Officer in charge of the port where the fleet had assembled. Not effusive wishes, by any means, just a quiet but extremely sincere "safe and pleasant voyage."

There is no room for demonstrativeness in a convoy conference, and the men who take their part in it are not looking for kind words. More satisfying to these merchant ship captains was the knowledge that the naval authorities had bent their every effort to making their voyage "safe and pleasant." That they had watched over the arrival of their ships in Canadian waters, had cleared the way for them through the intricacies of unloading and loading, refuelling and taking supplies on board, arranged for minor repairs and been on hand to straighten away the difficulties and delays which beset a ship in port. And, in all this, had done their job under the cloak of secrecy with which they cover ship movements as one of the most important factors for safety.

The conference broke up, and there was a general mingling of all those who had taken part. A senior naval officer (four rings of gold on his sleeve told of his captain's rank, and rows of coloured ribbons on his coat told of the service he had already given his country) was host, for the conference had been held in the ward room of his base. For that matter, he had been host to the captains for the time they had been in port, throwing the ward room open to them as a club, where they could relax in their short hours off duty. Business, for the moment, was over. The men who had met, on equal footing, as conferees at a board of strategy now were meeting as mutually appreciative friends.

There was good reason for their easy friendship for the bond between them, these captains in lounge suits and their brothers in uniform, has been forged strongly during the months they have been fighting — and winning — the Battle of the Atlantic together.

A Weekly Column About This and That in The Canadian Army

Funny how on thing leads to another, isn't it? Last week's column ended with a reference to the pronunciation of the word, "Lieutenant."

Two correspondents and a large volume of the Oxford Dictionary supplied information on the origin of British mispronunciation of an Anglicized French word. As the two correspondents (could they be the sum total of this column's readers?) also made some entirely irrelevant comments upon the writer's mentality we'll pass them by and concentrate on the dictionary's explanation.

Apparently both pronunciations are correct. The dictionary points out that the derivation is from the Latin "locum tenens" which became in French, "lieu"—in place of, "tenant"—to hold. In the 14th and 15th centuries English scriveners wrote the word variously as "lieu" and "liev"—tenant and the latter spelling later degenerated into "luv" or "luf"—tenant. Hence the British pronunciation—"leftenant."

Yes, I know the pronunciation doesn't match the spelling. But just think for a minute—how do you pronounce "plough," "cough," or "through," for example?

The foregoing isn't as irrelevant as it might seem for the subject of today's essay is—officers. Officers all the way from Lance-Corporal to Field Marshal.

You didn't know Lance-Corporals were officers? Sure they are—and very important ones, too! To be meticulous, he is a Non-Commissioned officer, one of the three types of officers to be found in the individual citizen's army. Another type is the officer who holds His Majesty's commission ranging in rank from Second Lieutenant to Field Marshal. There are more Lieutenants than Field Marshals!

And there are more Lance-Corporals than Lieutenants.

To get the record straight here is the infantry list. Lance-Corporal, Corporal, Sergeant, Company Quartermaster Sergeant, all these are Non-Commissioned Officers. Next comes, Company Sergeant-Major, Regimental Quartermaster Sergeant, Regimental Sergeant-Major; these are warrant officers. Commissioned officers are, Second Lieutenant, Lieutenant, Captain, Major, Lieutenant-Colonel, Colonel, Brigadier, Major-General, Lieutenant-General, General and Field Marshal.

And don't ask me why a Lieutenant-General is senior to a Major-General when a Lieutenant is junior to a Major!

Where does the Canadian Army get its officers? The answer is, from the ranks. Every candidate for a commission today, except in a few cases where civilian technical qualifications are the deciding factor in the appointment, is dressing in khaki serge at the time his name is considered.

He may reach commissioned rank in one of two ways. I almost said one is the hard way. As a matter of fact both ways are hard from the point of view of the outsider but quite possible of attainment by the soldier who has the necessary quality of leadership, educational qualifications, and guts.

Many an officer has worked his way up through the non-commissioned and warrant ranks. Others, and they are more numerous when there is a war on, have been selected as privates to go to the Officers' Training Centre for a strenuous course.

In each case the recommendation is made by the man's commanding officer who submits the name to the District Officer Commanding. If the latter concurs, the name is placed upon the eligible list and in due course, as vacancies occur at the training centre, the embryo officer goes up for training.

Appointments to the rank of Lance-Corporal and promotions to higher non-commissioned ranks are made by regimental commanders upon the recommendation of company or other officers. Warrant officers, with the exception of Regimental and Staff Sergeants-Major whose warrants are issued by the Minister of National Defence, are promoted in the same way.

Of one thing you may be certain—the man who leads your boy into action, or your boy, when he leads others into action, will be well-trained and thoroughly competent to undertake his heavy responsibilities.

Founders IN CANADA

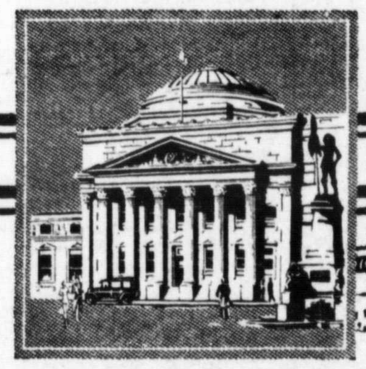

ON Place d'Armes in the City of Montreal stands a monument to Sieur de Maisonneuve who, landing near this spot in the year 1642, founded the settlement which is now the City of Montreal.

Facing Place d'Armes stands the Bank of Montreal —Canada's oldest bank—which opened its doors for business a short distance from the same spot more than a century ago.

From the settlement founded by Maisonneuve, civilization has spread to the east and west until to-day the Dominion of Canada extends from Halifax to Victoria.

Likewise the Bank of Montreal has grown, until after more than 124 years of steady and conservative progress, it to-day has branches in all cities and towns of importance in Canada, with offices in the principal financial centres of the world, and correspondents in every country.

ASSETS OVER ONE BILLION DOLLARS

Set Price Ceiling For Potatoes

The price ceiling on potatoes has been re-established, the Wartime Prices and Trade Board announced Sunday.

Fresh fruits and vegetables in general were removed fron under the price ceiling on December 11 last. Potato prices have since risen substantially, and the board states that recently there has been some evidence of speculative buying of this product, with resultant higher prices to consumers. Consequently action has been taken to stabilize potato prices at levels not higher than the highest prices prevailing during the week ending February 7th, 1942.

In effect, the present order establishes the period February 2 to 7 as the ceiling period for potato prices, in substitution for the basic period Sept 15th. to Oct. 11th defined in the original price ceiling order.

Muscle-Disease Treatment

A new treatment for a rare muscle-destroying disease which makes its victims so weak that they cannot swallow food was reported recently in Memphis, Tenn. The disease is known as myasthenia gravis, in which the nerve and muscles of the body are erdonologically weak and almost useless yet, when examined, they appear to be perfectly normal. The treatment is the administration by mouth of guanidine, a common drug closely related to urea, which is widely used as a farm fertilizer. Dr. Ann Minot, chemist at Vanderbilt university, Nashville, Tenn., declared in an interview that while the drug is not a cure for the disease, it has benefited the seven patients on whom it has been tried and has given them relief sufficient that they are able to take care of themselves.

Fireplace Heating

Fall and spring heating costs can be reduced by an efficient fireplace, and in extremely mild climates it is often found that no other heating equipment is needed. Factory-made fireplace units, designed to circulate heat throughout the entire room and even into adjoining rooms, are being manufactured and may be installed in the home. Fireplaces are also growing in popularity as a source of heat for basement recreation rooms.

Hawaii's 'Barking Sands' Puzzle Natural Scientists

The world-famed "Barking Sands," which were discovered in 1850, are on the Island of Kauai, in the Hawaiian group. W. A. Bryan, in his Natural History of Hawaii, describes them as consisting of a series of wind-blown sand-hills, a half-mile or more in length, along the shore at Nahili. The bank is nearly 60 feet high, and through the action of the wind the mound is constantly advancing on the land. The front wall is quite steep. The white sand, which is composed of coral, shells, and particles of lava, has the peculiar property, when very dry, of emitting a sound when two handfuls are clapped together, that, to the imaginative mind, seems to resemble the barking of a dog. When a horse is rushed down the steep incline of the mound a curious sound as of subterranean thunder is produced.

The sound varies with the degree of heat, the dryness of the sand, and the amount of friction employed; so that sounds varying from a faint rustle to a deep rumble may be produced. Attempts at explaining this rare natural phenomenon have left much of the mystery still unsolved. However, the dry sand doubtless has a resonant quality that is the basis of the peculiar manifestation, which disappears when the sand is wet.

That the Barking Sands are found in only a couple of the dryest localities in the group is also significant. Much of the shoreline of Kauai, for example, is lined with old coral reefs that have partly disintegrated 'nto sand that forms the beaches.

Central Montana Dinosaurs

Central Montana dinosaur beds are proving a treasure trove for amateur paleontologists. Oscar Mueller, Lewiston attorney, and his son George, recently discovered about 60 pounds of fossilized bones 20 miles north of Teigen. The bones were badly deteriorated, but the finders surmised that they once were part of the skeleton of a horned dinosaur or Certopian, which was about twice the size of an elephant. Young Mueller found, when he attempted to assemble the bones, that most pieces were from the head, which was equipped with a shield of bone. Horned dinosaurs were equipped with either two or three horns for fighting, Mueller said.

Music of Japan

Like most oriental music, Japanese music is very simple compared with its western counterpart. A thousand years or more ago was introduced from China and India the gagaku, or so-called elegant music, which was very complicated and played by large orchestras. This has disappeared and is played only as classical ceremonial music at the imperial court. The utai is a somewhat monotonous vocal music which accompanies the No dance and is used among the upper classes. The zokugaku or people's music is widely used. Its most common form is vocal accompanied by the samisen or three-stringed guitar.

IN MEMORIAM

OSTROM—In loving memory of a dear mother, Mrs. James Ostrom, who died March 7, 1941.

Two dear bright eyes, a tender smile,
A loving heart that knew no guile,
Deep trust in God that all was right,
Her joy to make some other bright,
If sick or suffering one she knew,
Some gentle act of love she'd do ;
No thought of self, but of "the other" ;
I know, He said "Well done, dear mother."

JAMES, JANET and FAMILY

MEGRATH—In loving memory of our dear wife and mother, Mrs. John Megrath, who died Marth 14, 1941.

Time speeds on, one year has passed,
Since death its gloom, its shadows cast
Within our home, where all seemed bright,
And took from us a shining light,
We miss that light and ever will,
Her vacant place there's none to fill ;
Down here we mourn, but not in vain,
For up in Heaven we meet again.

HUSBAND and FAMILY

SMITH—In loving memory of dear sister, Miss Jessie Smith, who entered into rest, March 14, 1940

How sweet it will be in that beautiful land,
So free from all sorrow and pain ;
With songs on our lips and with harps in our hands,
To meet one another again.
