MONTREAL, September 19.

—The Allans mail SS. "Circassian," from Quebec, arrived out on Monday.

—The Rosshire SS. "Erl King," from Liverpool on the 8th instant, passed Father Point, inwards, at 6.40 p. m., Sunday.

—The Allans S. S. "Prussian," from Glasgow for Boston, *via* St. Johns, Nfld., arrived at Boston to-day, bringing 23 cabin, 83 intermediate and 98 steerage passengers.

—The Marine Department says:—It has been necessary to change the duration of the blasts sounded by the Fog Trumpet recently established at Lark Islet Light Station, in the River St. Lawrence, at the mouth of the Saguenay River, Province of Quebec (*Vide* Notice to Mariners, No. 17, of 1881). In future, the Trumpet will sound blasts of twenty seconds duration, with intervals of forty seconds between the blasts.

—The following is the statement of Flour inspected for the week ending the 17th September, 1881, as furnished by Mr. L. A. Boyer, Inspector:—

| | Brls. |
|---|---|
| Superior Extra | 4,638 |
| Extra Superfine | 270 |
| Fancy Superfine | 60 |
| Spring Extra | 1,197 |
| Superfine | 225 |
| Fine | 99 |
| Polland | 1 |
| Rejected | 19 |
| | 6,509 |

N.B.—375 barrels of the above were short weight.

—The foreign commerce of New York, as shown by the official returns just published for the month of August, varies but little from that of August, 1880. The total imports last month were valued at $48,166,881, against $48,924,596 in August 1880, while the total exports last month were valued at $36,186,699, against $36,849,376 in August, 1880. It is to be said, however, that the import figures are made up of different items. The foreign goods entered for consumption last month were valued at $23,686,448 against $20,804,135 in August, 1880, while those entered for warehousing were about $1,500,000 less. The free goods imported amounted last month to $11,841,129 while a year ago they were only $9,939,602.

—The Cotton movement in England is assuming the aspect of an organized and powerful opposition to the Liverpool cotton workers and the corner they have manipulated. A London cable despatch of the 17th says:—"The cotton movement has now assumed a more important aspect than hitherto. There was a meeting at Manchester yesterday of manufacturers of North and North-east Lancashire to consider the position of the manufacturing branch of the trade, which is represented to be in an unprofitable state in consequence of the action of the spinners. The meeting unanimously favoured running only three days weekly for a month, or during such time as the spinners stopped, provided manufacturers to the extent of two-thirds of the looms are willing to adopt that course. The meeting adjourned until Tuesday."

## FINANCIAL.

The week has opened with an easy Money market. There is an abundant supply of loanable funds and loans on Call and short date are made at 4 @ 5 and time loans at 5 @ 6 per cent., as to the nature of the collaterals and other considerations. There is a fair demand for accommodation to mercantile borrowers, and prime paper is discounted at 6 and the ordinary run of bills at 6½ @ 7 per cent., as to name and date. The market for Sterling Exchange is dull and nominally unchanged at 8¼ premium between banks, and 8⅜ @ 8½ cash over the counter, demand bills being steady at 8⅞ @ 9. Currency is scarce and drafts on New York are a shade firmer at 3-16 @ ¼ premium. The Stock market was dull for both bank and miscellaneous shares, the dealings being small and confined to a few stocks. The course of share speculation savours strongly of what is termed a broker's market, lacking, as it does, that animation which accompanies general buying by the outside public. Montreal were strong at 200 @ 200¼, closing quotations 200½ asked, buyers at 200. Ontario were placed in small amount at the first Call at 79 down to 78½, and closed latter bid, 79 asked. A few shares of Merchants were placed at 125, and the close was ½ up from the opening at 125 @ 125½. Commerce were dull at 144¾ @ 144, small transactions at both figures. Montreal Telegraph were dull but firm at 131½ @ 131¾, the only sale being at the outside figure. Richelieu sold in very small amount at the first Call at 57 @ 57½ bid, and closed firmer at 57½ bid, 58½ asked. City Passenger closed firmer at 131 @ 132, and City Gas steady at 148 @ 149. The transactions were:—

MORNING BOARD.

Montreal, 260 at 200, 23 at 200¼; Ontario, 13 at 79, 100 at 78½; Richelieu, 6 at 57, 5 at 57½; Montreal Harbour 5 per cent. bonds, $3,000 at 107½.

AFTERNOON BOARD.

Montreal, 148 at 200¼; Peoples, 80 at 90½; Merchants, 35 at 125; Hochelaga, 50 at 85½; Commerce, 115 at 143¾; Montreal Telegraph, 100 at 131¾.

The statement of the average condition of the New York banks for the six days ending with the close of business Friday, shows comparatively small changes. A week ago the banks held $971,050 lawful money above 25 per cent. reserve; they now so hold $454,155; a year ago they so held $5,302,825. The following shows the changes in the various items:

| | | |
|---|---|---|
| Loans | Dec. | $ 466,100 |
| Specie | Inc | 478,000 |
| Legal Tenders | Dec. | 514,000 |
| Deposits | Inc. | 1,921,300 |
| Circulation | Inc. | 3,600 |

The market for Sterling Exchange in New York is steady, the posted rates being at $4.81½ for sixty-day bills and $4.85 for sight.

The New Stock market was rather firmer, and the leading shares closed ⅛ @ ½ per cent. up from Saturday; the speculation, however, not being very brisk. Compared with the closing prices Saturday, the following changes appear:—Advanced—Western Union, ¼; Lake Shore, 1⅞; Pacific Mail, ¼; Erie, ½; North-West, ⅜; St. Paul, ¾; Michigan Central, ¾; New York Central, ½; St. Joseph, preferred, 1; Wabash, ⅜; do., preferred, 1; Union Pacific, 1; Manhattan, 1¼; St. Paul & Omaha, preferred, ⅛; D. R., ¼; Northern Pacific, preferred, ⅛; L. & N., ⅛. Declined—Ohio & Mississippi, ¾; Kansas & Texas, ½; Canada Southern, ½. Money on Call was loaned at 3 per cent. The following table gives the quotations, compared with the closing prices Saturday, and the sales:

| Closing Saturday. | | Op'g | 1.30. | Cl'g. | Sales |

| Manhattan | .... | Yellow Jacket | 5⅝ |

## DOMINION SECURITIES.

We have mail advices of the quotations for Canadian Government and Railway securities on the London Stock Exchange to September 8th. Government securities have ruled dull but steady, a comparison with the previous week showing no alteration. Dominion fours sold at 104½, quoted at 104 @ 105, and Province of Quebec fives at 110, quoted at 108 @ 110. The Quebec French loan changed hands at par. The Railway securities have been about steady, but not particularly active. Except Grand Trunk, Atlantic & St. Lawrence are 1 per cent. off at 130 @ 132. Buffalo & Lake Huron 5½ per cent. 1st and 2nd Mortgage bonds are quoted at 117 @ 119, ex-dividend, in place of 120 @ 122 regular. Chicago & Grand Trunk and Canada Central are steady and unchanged. Grand Trunk 2nd Equipment Mortgage bonds are 2 per cent. off at 120 @ 122. Grand Trunk 1st and 2nd preferences are steady, and 3rd preference is ¼ up at 38½ @ 39. Great Western securities have ruled steady, with the ordinary stock ⅝ up at 13¼ @ 13⅝. Midland of Canada has declined 1 per cent. to 85 @ 87, and the remaining securities exhibit no alteration from the previous week. The following table gives the quotations on September 8:—

## THE AMERICAN WHEAT SURPLUS.

The following respecting Wheat reports is taken from the *Daily Commercial Bulletin*:—

The following shows the exports of Wheat and Flour in August and in July and August, compared with those for the same periods of 1880:

| | Wheat. | Flour. |
|---|---|---|
| August, 1881.....bush. | 14,378,024 | bbls. 598,876 |
| | $17,764,165 | $3,562,674 |
| August, 1880.....bush. | 21,796,151 | bbls. 548,921 |
| | $23,779,163 | $3,142,128 |
| July & Aug., '81 bush. | 23,550,759 | bbls. 1,142,323 |
| | $28,278,035 | $6,275,990 |
| July & Aug., '80 bush. | 39,541,023 | bbls. 1,172,655 |
| | $44,078,100 | $6,716,404 |

It will be seen from this comparison that we exported last month 14,378,024 bushels of Wheat, against 21,796,151 bushels in the same month last year. For the two months, July and August, which may be regarded as really the first two months of our cereal year, we exported of Wheat and Flour 29,413,000 busbels, against 45,404,000 last year. In the first one-sixth of the cereal year, we have thus a decrease of 15,991,000 bushels, or at the rate of 35 per cent. This reduction is not equal to the estimated ratio of decrease in the exportable surplus. For illustration: On September 1 last year we had exported about 25 per cent. of the whole of last crop year's shipments; according to the same rule, supposing that we have this year 110,000,000 of exportable surplus, we should have shipped, up to September 1st, 27,500,000; the official figures, however, show that we have exported 2,000,000 over that quantity, while we have within the same period also increased our "visible supply" 3,500,000. These facts from experience do not afford much support to the estimates of an excessive shortage so zealously put forth in certain quarters.

## THE CABLE COMPETITION.

The London *Daily News* of last week says, regarding the new American Cable Company and its tariff:—"The new American Cable Company, which have established a London office, have sent out a circular announcing a tariff of one shilling and six pence per word, which is six pence above what the existing Atlantic Companies charge, and this is taken to mean that the competition will not be severe. Last year, when the Anglo-American Cable took messages at six pence per word in order to cut the ground from under the feet of the French Company, which had then started in opposition, the latter struck in at two shillings per word, at which it got a profitable overflow of business. The new Company apparently hope in the same way to get as much traffic as the cable can carry quickly at the superior charge above mentioned. We should doubt its being permanent, and circumstances will determine whether it is to be advanced or reduced."

## LONDON WOOL SALES.

LONDON, September 16.

At the Wool sales to-day 11,700 bales were offered, chiefly New Zealand and Sydney. There was a fair competition, and prices are unchanged.

The following are the Wool sales of Thursday in detail:—2,746 bales Cape and Natal—Fleece at 10½d @ 1s 10½d, scoured at 1s 3d @ 1s 9½d, greasy at 5d @ 10d; 2,541 bales Sydney and Queensland—Fleece at 1s 2½d @ 1s 9d, scoured at 1s @ 2s 2½d, greasy at 6d @ 1s, locks and pieces at 10½d @ 1s 6d, lambs' scoured at 1s 1d @ 1s 4d; 1,604 bales New Zealand—Fleece at 1s 6d, scoured at 1s @ 1s 11d, greasy at 5d @ 1s 0½d, locks and pieces at 11d @ 1s 7½d; 1,507 bales Port Phillip—Fleece at 11½d @ 1s 10½d, scoured at 1s @ 1s 9½d, greasy at 5d @ 1s 1d, locks and pieces at 11d @ 1s 4d, lambs' scoured at 11d @ 1s 6d; 126 bales Adelaide—Scoured at 1s 4d @ 1s 6½d, greasy at 5d @ 9½d, locks and pieces at 1s 2½d @ 1s 6d; 39 bales Tasmanian—Greasy at 5d @ 1s 3d.

## THE CATTLE MARKETS.

MONTREAL, September 19.

The British Cattle markets are dull and show no improvement. The quotations for cattle on the hoof are nominally unaltered at 7¼d @ 7½d Liverpool, and 7½d Glasgow. Sheep are steady at 8d @ 8½d in both Glasgow and Liverpool. A cablegram from Glasgow reports middling Canadian Cattle as unsalable there and every where, middling home Cattle being plentiful. Boston exporters complain that there is no margin left in shipping, not that the fault is with the English markets, but because prices at home are too high. Freights from Boston continue at 40s. The freights in this market are at £3 @ £3 10s, though space has been re-let at £4 by the exporters who control the bulk of the September space. We understand that some Ontario cattle are being shipped *via* Boston, engagements for 200 head of Canadian live stock being expected at that Port at 45s. The market for shipping cattle at Point St. Charles was extremely dull. The shippers were not disposed to operate, except at a concession from drovers, which was made in some cases, a few lots passing into exporters' hands at 4c @ 5c, the outside price being for the very choicest. The drouth in the West has seriously affected pasturage and Ontario farmers are said to be anxious sellers. Viger Market was fairly well supplied with Beef Cattle to-day, about 400 head being offered. Cattle in anything like good condition met with a fair demand at from $35 @ $50, while inferior quality were slow of sale at from $15 @ $30. Very few Sheep were offered, but the demand was brisk for a quality fit for shipping. Lambs were liberally offered in very limited numbers at steady prices. Messrs. A. @ T. Tiernan's circular, dated Glasgow, September 8, says:—Our numbers at market to-day consisted of 1,381 Cattle and 15,256 Sheep and Lambs, compared with 1,357 Cattle and 15,635 Sheep and Lambs last week. The supply of really Prime Cattle on offer was rather limited, and met a fair demand at about former rates; secondary and inferior kinds met a very stiff trade at lower prices; and at the close of the market a clearance of the latter class would scarcely be affected. The demand for Sheep and Lambs was rather dull, and prices a shade weaker than on last Thursday. Foreign arrivals this week consisted of 320 Cattle from the States, and 1,150 Cattle and 830 Sheep from Canada; States Cattle making about 70s. per cwt.; Canadians, which on the whole were a rather inferior lot, making from 62s. to 65s. per cwt.; Sheep barely 8d. per lb.

## THE HAY AND STRAW MARKETS.

MONTREAL, September 19.

The market was lightly supplied with both Hay and Straw to-day, only some twenty loads being offered. First quality brought from $10 @ $12.50 and inferior quality from $8 @ $9. Straw was steady at from $4 @ $7 per hundred bundles.

## PRODUCE AND PROVISIONS.

MONTREAL, September 19.

The Flour market opened very firm, but on the whole quiet. There is a temporary scarcity of Spring Extra which has stiffened the price, sales of very choice being effected up to $6.37½. At the Call Board, 300 brls Superior Extra for this week's delivery weresold $6.55, and 400 brls ditto offered at $6.50 and afterwards withdrawn. The sales reported on 'Change embrace 125 brls Superior Extra at $6.50; 375 brls ditto at $6.50; 350 brls Choice Spring Extra at $6.37½; 250 brls Strong Bakers' at $6.60; 250 Ontario Bags at $3.12½, bags included, and 250 bags ditto at $3.15. The quotations are:—

| | | |
|---|---|---|
| Superior Extra | $6.50 — | 6.55 |
| Extra Superfine | 6.40 — | 6.45 |
| Fancy | 0.00 — | 0.00 |
| Spring Extra | 6.20 — | 6.25 |
| Superfine | 5.60 — | 5.75 |
| Strong Bakers' | 6.00 — | 6.75 |
| Fine | 5.20 — | 5.25 |
| Middlings | 4.60 — | 4.70 |
| Pollards | 4.25 — | 4.30 |
| Ontario Bags | 3.00 — | 3.15 |
| City Bags (delivered) | 3.45 — | 3.55 |

The tenor of the advices from the British Grain markets was strong. The cable quotes floating cargoes Wheat firmer; Corn firm, and cargoes on passage and for shipment, Wheat steady and Corn firm. Mark Lane Wheat is also steady, and Corn a turn dearer. The markets on this side, on the other hand, were easier, and closed 1½c @ 2c down from Saturday. The Chicago market closed weak at $1.26⅜ September, $1.27⅞ October, $1.30⅜ November, $1.32⅛ December. The local market was steady in the early trade, but closed with an easier feeling in sympathy with the American markets. We hear of the sale of two cargoes of Canada White on the spot at $1.42 @ $1.42½ and a cargo of 13,000 bushels of Canada Red at $1.45. The quotations for Western Grain are entirely nominal. The sale was reported of a cargo of Peas on the spot at 98½c, and 97c is bid to arrive. Oats are quoted at 41½c @ 42c in car lots on the spot, and at 39c @ 39½c in round lots to arrive. Rye is nominal at 98c @ $1.00.

PORK—The Western Provision markets were weak, and closed lower. Pork in Chicago sold down at the close to $18.70 September; $18.77½ October; $19.82½ January. The local market is very lightly supplied, and dealers will shortly be obliged to replenish stocks. Prices are very stiff, and we quote Western Heavy Mess, inspected, at $23 @ $23.50, the sale of a few 10-brl. lots being reported at the outside figure.

LARD—The Chicago market was easier. The local market continues firm, but quiet. City Rendered sells in jobbing lots at 14⅞c @ 15c, and Fairbanks' is nominal at 15½c.

EGGS—Are steady, but on the whole quiet at 16c @ 16½c per dozen.

BUTTER—As usual on Monday, the trade was quiet and the market without any special feature. Fancy Creamery is strong, and sales of really gilt-edged have been effected a shade above 25c. Finest Townships Dairy sells at 22½c. We hear of the sale of a carload of Morrrisburg at 21½c. Western is steady at 18c @ 19c. We quote as follows:—Creamery, finest, 24½c @ 25c; Medium to fine, 23c @ 23½c; Eastern Townships, finest, 21½c @ 22c; Medium to fine, 20c @ 21c; Morrisburg, finest, 20½c @ 21½c; Medium to fine, 18½c @ 20c; Brockville, finest, 19½c @ 20c; Medium to fine, 17c @ 18½c; Western, finest, 17c@19c; Medium to fine, 15c@16½c.

CHEESE—There is very little stock in receivers' hands to operate upon, and any lots in the market are held at extreme prices, notwithstanding the cable being down to 61s. The July make is pretty well cleared out, and quotations are more or less nominal at 11½c @ 12c. At the close of last week sales of fancy August were effected at 13c, and we quote 12½c @ 13c. There is some medium August that ranges from 12c @ 12⅜c.

BEERBOHM'S ADVICES.—Floating Cargoes Wheat, firmer; Corn, firm. Cargoes on passage and for shipment—Wheat, steady; do, Corn, firm. Mark Lane—Wheat steady; do, Corn, turn dearer. English and French Country Wheat markets, steady; Farmers' deliveries of Wheat during the week, 40,000 to 45,000 qrs. Liverpool—Wheat, spot, steady; do, Corn, strong; do, American Western Mixed Corn, 5s 11½d; do, Canadian Peas, 7s 3d. Wheat and Flour in Paris, steady.

Barque Active, Jacobsen, Sunderland, F A Falkenberg, coal.

Steamship Otter, May Mingan, A Fraser & co, general.

Steamship Karo, Tindall, Antwerp, C Pitl, general.

Steamship Erl King, Leggatt, London, for Montreal.

Steamship Polino, Delisle, Cow Bay, for Montreal.

CLEARED—September 19.

Barque Dunrobin Castle, Milne, Aberdeen, R R Dobell & co.

Steamship Lake Champlain, Jackson, Liverpool, Carbray, Routh & co.

Ship Lennie Burrill, Murphy, Liverpool, A F A Knight& co.

Barque Tinten, Otzen, London, Price Bros & co.

Steamship Cynthia, Eaton, Montreal, John Ross & co.

Steamship Brooklyn, Lindall, Montreal, Wm McPherson.

ITEMS—September 19.

On a warrant issued out of the Vice-Admiralty Court this afternoon the steamship Bothal was seized for damages by collision. The suit is taken by the owners of the barque Nelson, and the amount claimed is £1,250 sterling.

A survey was held to-day on SS. Bothal and barque Nelson, before reported of having been in collision. The steamship will have to make some slight repairs, and will probably be ready to proceed to sea to-morrow.

Steamships Earl King and Polino proceeded to Montreal this p.m.

Tug Boston left for Montreal to-night, with a tow of barges.

RAFTS ARRIVED—September 19.

J McAllister, black walnut, Ottawa Cove; R Campbell, white and red pine, Cap Rouge; J Burstall & co, waney pine, Spencer Cove.

The vessel had a heavy list to port, and appeared to be by the head, foremast gone at the deck. Could not make out name. Apparently not long abandoned.

FOREIGN PORTS.

LONDON, September 17. — The steamer Sidonia, from New York, in Bordeau, arrived at Falmouth this morning towing steamer Rochester from Boston to London. The Rochester was taken in tow by the Sidonia, on the 6th inst, in lat 40 deg. 5 min.; longtitude, 32 deg. 32 min. with the propeller loose on the shaft.

MOTHERS! MOTHERS! MOTHERS

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it. There is not a mother on earth who has ever used it who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the presciption of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. tts

* Not 5.30 a.m. as previously advertised.

SALOON PASSAGE.
New York to Liverpool and Queenstown, $80 and $100 gold. Return Tickets, $144 and $180 gold. Tickets to London, $7, and to Paris, $20, gold, additional. Children between one and twelve years, half-price. Infants free. Servants, $60.
THESE STEAMERS DO NOT CARRY CATTLE SHEEP OR PIGS.

STEERAGE PASSAGE.
From Montreal to Liverpool, London, Londonderry, Queenstown, Glasgow, Belfast, Bristol, Cardiff, $28.50. To Montreal from above places, $28.50 prepaid.
Passengers taking the "White Star Steamers," as a rule, arrive in London in 9½ days from New York.
Passengers booked, via Liverpool, to all parts of Europe at moderate rates.
For further information and passage apply to R. J. CORTIS Agent, 37 Broadway New York. Or to

J. COGHLIN,
SOLE AGENT,
413 St. Paul Street, Montreal.

TUESDAY MORNING, SEPT. 20.

APPOINTMENTS.

Academy of Music—Performance at 8 p.m.
Theatre Royal—Performance at 8 p.m.
Albert Hall—Performance at 8 p.m.
Queen's Hall—Concert at 8 p.m.

AUCTION SALES THIS DAY.

BY JOHN J. ARNTON

Real Estate—Sale at 11 o'clock, at his rooms.

BY BENNING & DARSALOU.

Goldring Phosphate Mine—Sale at 11 o'clock, at their rooms.

## THE "WORLD" AND CANADA.

It is only recently that English journals have turned their attention to Canadian affairs, the last two mails having brought us somewhat remarkable criticisms on the financial position of the country. Had *Truth* and the *World* confined their criticism to the mere question of government, we would have been disposed to go all the length they dare venture. But traducing our public institutions and the most prominent of our business men, is something we cannot afford to let go unnoticed. The *World*, in an article elsewhere, warns the British public against "a raid," in which Mr. George Stephen, President of the Bank of Montreal, is "the moving spirit." Everybody in this country knows that Mr. Stephen declined re-election as President of that Institution last June, and that Mr. Smithers was elected a Director, and subsequently President in Mr. Stephen's place. And as to the financial relations of the latter gentleman and others—when the question was asked at the public meeting of shareholders the statement was made from the Chair that instead of being under obligation to the Bank there were hundreds of thousands of dollars at their (Mr. Stephen's and his friends) credit. We are naturally jealous of the reputation of our foremost monetary institution, and when journals conducted like those named, having but limited knowledge of the financial and commercial position of the country, undertake to review the course of our public concerns, they should, at least, acquaint themselves sufficiently with the facts, which would save them from making such loose and injurious statements. It must be news to the Directors of the Bank of Montreal that they are engaged in wild speculation, that the funds of the institution are being used to promote schemes which are unworthy of public confidence. It is, we understand, a matter of fact that the Bank of Montreal has taken one-fourth of the five per cent. gold mortgage bonds of the Canadian Pacific, and in that they are joined by several of our strongest monetary concerns, including some whose chief place of business is in the vicinity of the *World* newspaper. The Bank of Montreal might take as much more of these bonds, and it would not cripple its resources. Our readers must have observed in our money article a few days ago, the statement that the Bank had transferred to their London office $3,000,000, anticipating a rise in the Bank of England rate of discount. *Truth* and the *World* need have no anxiety about our banking business, least of all that of the Bank of Montreal; and we may say, also, as little about Mr. Stephen, its late President. And as to the bank, like every thing else; they will soon have their value established, and without forcing them on the London market. Our own impression is that, had these bonds been offered for negotiation on Lombard street, there would not have been much exception taken to them; but, since the Company can do their business on this side of the pond, it will not be so agreeable to those who depend so much upon floating Colonial securities. To treat the Railway at this stage as a mere scheme is simply absurd, and it is yet too soon to drag the Atlantic & North-West into the larger undertaking, though the promoters, we understand, are taking active measures to give effect to the terms of the charter, which embraces practically that the *World* lays down as the course of the line, including the bridge or tunnel, probably the former, though we notice that the latter Company have deposited, according to the terms of their charter, the required amount with the Government. It is not necessary to start with the Bay of Fundy and end at Kamloops, to establish the value of the bonds which the Pacific Company propose issuing. And, as we have already stated, these bonds will be taken by capitalists at their fair market value in this country. We do not propose to go into a history of the Railway connecting us with the North-West. Nor do we think it necessary to go over a ten years *resume* of the efforts made to build the road through that country which we are hoping will be one of the great feeders of our canal and railroad systems in the future. We have some interest in Montreal, the largest contributor to every department of the public service, and in point of fact the very heart of the country whose pulsations are felt from one extremity to the other. Her position is not second to that of any on this continent, and if the country has anything to be proud of it is in the fact that she is aping at floating her own bonds. This branch of the discussion we will leave in the meantime. But in justice to those who have undertaken to construct the Pacific Railway on the Government terms, the facts should be known. The Company have to-day 680 miles in working order, including, of course, the eastern wing, and 200 miles more graded; add to this the Government obligation from Fort William to Rat Portage, which is to be completed next August, and the Onderdonk contract, from Yale, we think, to Kamloops, 127 miles, 1,301 miles are shown to be in active working order and course of construction. We give these figures to shew that the *World* is wrong in attempting to shew that the building of this huge road is a mere scheme: it is now on hundreds of miles in active operation; and as to the question of settling, the writers in these journals referred to have not the least conception of the volume of immigration which has already set in, and without, up to this point, any special effort. The evidence of Col. Lefroy, Sir J. Richardson, and Sir George Back, must, long since, have been forgotten; and though the HERALD opposed not only Confederation, but the purchase of what was known then as Rupert's Land for $1,500,000, it was forced upon us by public opinion in England at a time when we could not well afford to be burdened by such obligations. So strong was the feeling for the consummation of the scheme, that nothing against it as many of our readers know, could find circulation in England. The assertion about summer frosts no one who knows the country will accept. Those who believe in the theory of *Truth* and the *World* should have started earlier. The development of the Great North-West venture cannot be a mere scheme with 1,301 miles under way. The climate is as fine as any in the world, and our banking facilities will not be impaired by the amount which our financial institutions purpose putting into our own bonds—this great public enterprise might be handled in a more matter-of-fact manner, and the disclosure of its defects, if it have any, come through more reliable sources. Just fancy living in a country with "summer frost at night in all months of the year." These words carry their own answer. The *World* says:—"The lands on the banks of the river is good, but a mile in the interior is worthless." The very reverse is the case. No harm can accrue from an intelligent discussion of the affairs of the Dominion, but *Truth* and the *World* had better get a good starting point before making more statements.

## MUSIC AND FIRE WORKS.

A good deal of indignation is expressed at the action of the Citizens' Committee in charging an entrance fee to the Montreal Lacrosse grounds on the evenings when fireworks are displayed there. A certain sum of money was voted for an exhibition of fireworks, on the understanding that such exhibition should be free. If the Committee think their friends are likely to run short let them apply for an additional grant. It is certainly improper for them to make good the probable deficit by charging visitors for the privilege of viewing the fireworks. We trust, therefore, that the next pyrotechnic exhibition will be absolutely free, so that the families of poor artizans and labourers as well as visitors from abroad may be able to visit the grounds. Complaint is also made that though a large appropriation has been made for music in the public squares in the evenings during the Exhibition, no music of any description has yet been provided. We trust that the gentlemen who have this matter in charge will not prove remiss in their duty.

## TO RETURN AT ONCE.

Owing to the death of President Garfield, the Military Corps which arrived from Troy last evening will return home this morning. The trip down the Rapids will therefore be abandoned.

## THE DEATH OF THE PRESIDENT.

Once more "bloody treason has triumphed," and a good man and great public official has been sent to his grave by the act of a fanatical villain. A great nation mourns for its dead, not unaccompanied by the sympathetic regrets of the world at large, on account of the crime of a ruffian, excited doubtless by the baser kind of political passion and desire for personal distinction, even in a bad cause. Outside of the United States we can have nothing to do with party quarrels, or with the quarrels between the sections of parties. We must regard the deceased President mainly as the chosen Chief Magistrate of the great nation over which he lately presided; but, at the same time, we may properly feel that Mr. Garfield was a worthy and fitting occupant of the office from which he has been so cruelly, suddenly and wantonly cut off. To us he seems to have been a type of the best class of the public men of America. Born with few or no advantages from fortune, he educated himself to be not only an American politician, which is consistent with very inferior moral character and utter ignorance of political science; but to be a gentleman, in its true sense, a scholar of classical learning, a good lawyer, and an accomplished publicist. With that versatility, which is thought by some to be a peculiar characteristic of our neighbours, but which is the result of the circumstances of time as well as of country, when the Republic was in danger, he temporarily abandoned the gown for the sword. It is not given to many men to be equally successful in careers so different as these, and we are not aware that General Garfield distinguished himself greatly in that capacity. Yet, he earned the reputation of a good and reliable officer, always attentive to duty and always especially careful for the comfort and health of the men under his command. The history of his election is too recent, and too little remarkable to make it worth while to devote much space to the subject in a Canadian newspaper. The turning point of the nomination, which was subsequently followed by his election, was the opposition of a large part of the predominant Republican party to the re-election of President Grant for a third term. Past efforts had previously been made, during a long period, to secure the re-election of the great General; but the sense of the country and of the majority of Republicans was, rightly or wrongly, opposed to this perpetuation of power in the hands of an individual. Mr. Garfield's nomination was made in spite of the so-called machine politicians; but his election was no doubt the result of the general exertions of the party, including those of Grant himself, and of his special supporter, Mr. Conkling. The breach between the two sections of the party, which declared itself at the nomination of the candidate, subsequently broke out again over the question of appointments. It is possible that, from American points of view, much may be said in favour of the pretensions of both the parties to this dispute; and taking into consideration the intrigues of the election for the successors to succeed Mr. Conkling and his colleague, when they resigned their seats in the Senate, together with the poor reputation of the men who at last were chosen, it cannot be said that any one came very creditably out of the struggle. Yet Garfield's stand to retain the practical control of the appointment of officers for whom he was responsible, and his resistance to the pretensions of members of Congress to exercise all the patronage of their respective districts, seems to us in the main to have been dictated by a proper reading of the Constitution, and a just respect to the public service and the interests of the whole people whom as President he represented. His death will, of course, gratify the desire of his assassin that his seat should be filled by Vice-President Arthur, unless, indeed, it turn out to be true, as some allege, that he is of Canadian birth and so disqualified. Whether that will bring about those changes in the Administration, which Guiteau also took for granted as a consequence of his crime, is more problematical. It would seem likely indeed, at first sight, that the new President will replace Mr. Blaine in the office of Secretary of State by Mr. Conkling, and so turn the tables upon the more decidedly Ministerial wing of the Republicans. But the special circumstances under which Arthur comes to his kingdom may possibly make him consider it decent to move slowly, and so, at least, to postpone any violent changes of the kind in question. In any case, there is no reason to suppose that the fabric either of Government or of society among our neighbours will feel any shock from this tragic event. Assassinations have not often made any serious change in the course of national events, which usually depend on other than merely personal influences; and they are, least of all, likely to do so in countries governed on constitutional principles. There will be one question, however, upon the solution of which the influence of Guiteau's bullet will be looked for with much curiosity. As to the fate of that scoundrel there is probably little doubt; but it is not beyond the bounds of reasonable imagination that he may escape before execution and take refuge say in Russia. In that case, would the pretension that his crime was a political one, which in some sense it certainly was, be held to afford him a just security against extradition? We hardly think that would be the contention of American publicists, and the circumstances make the question a very pregnant one, as respects murderers from other countries who have sought asylum for their crimes in the United States.

In the meantime the civilized world will be filled with sorrow for the dead, with sympathy for those dear to him who still survives him, and with execration for him who has brought about the calamity.

The removal of the President to Long Branch availed nothing, though much was hoped from the change of air and surroundings. It now becomes evident that the suspicion entertained by many that the real condition of the wounded President was for a long time concealed from the public. The wisdom of such a course may be called in question, now that he has been carried off unexpectedly, and before provision had been made for swearing in his successor. The general opinion seems now to be that the President declined gradually from the day he was shot, and at no time was there any reason for declaring that his conditon had improved, or that there were reasonable hopes of his recovery.

THE redistribution of seats in the British House of Commons which the Farmers' Alliance demands, and which is likely to be taken up by Mr. Gladstone, will be a task of no little difficulty. Cromwell's plan, which resembled the *scrutin de liste*, of abolishing borough representation and giving the counties representation according to population, would be easy enough, but British statesmen have always contended that by giving representation to small constituencies the national character of the House of Commons is more efficiently maintained than would be the case if the voice of numbers alone were heard. The Reform Act of 1832 put an end to the scandals of the rotten boroughs, but the system is still full of anomalies. Thus the thirty-one boroughs in Ireland, with less than 60,000 registered electors, return thirty-seven members, while Manchester, with over 81,000 electors, returns only three. It would be manifestly absurd, however, to attempt to base the representation on the population, for in that case the representation of Ireland and Scotland would be reduced and the peculiar institutions of those countries left at the mercy of English members, who as a rule know little about them.

COMPOSITION OF THE FRENCH CHAMBER.—The composition of the new French Chamber will be a curious study to the lover of statistics. Of the members already elected 27 are journalists, 39 doctors, 3 chemists, 7 notaries, 7 solicitors, 2 ecclesiastics, 2 Israelites, 7 professors, 2 academicians, 4 bankers, 15 manufacturers, 5 shipbuilders, and over 100 barristers. The doctors and barristers carry off the palm as regards numbers. Both, as a rule, are what are called *fruits secs*; the one have no patients, and the other no briefs. The pay of a Deputy, 25 francs a day, is, therefore, a consideration to them. There will evidently be no lack of talking members in the House.

HON. JUDGE OLIVIER died at Joliette at four o'clock on Sunday.

# THE EXHIBITION

## A Satisfactory Display of Canadian Products, Agriculture, Mechanism, and the Fine Arts, Cattle, Horses, Sheep, etc.

## An Immense Attendance and Perfect Order

## A BIRD'S EYE VIEW OF THE EXHIBITS.

The Provincial Exhibition, which has not yet reached its meridian, bids fair to outshine anything which Montreal has yet had of the kind. The only drawback so far has been the laggardness in the forwarding of exhibits, but all the lines are now well filled. The rush of visitors the past two or three days has been immense, a large number travelling a long distance to see Montreal in its gala garb. Happy is the stranger who can now get the half night's loan of half a bed, divinely happy he who can have a whole one to himself. The hotel keepers of every grade, are at their wits' end to accommodate their would-be guests, and it may be expected that for some days yet the inflow from without will continue. The storekeepers generally are satisfied with the liberal custom of these visitors, and the street cars are taxed to their utmost capacity. Already the financial results of the Exhibition are satisfactory, and there is reason to expect that there will be a handsome balance at the close of the Exhibition.

We have nothing to say of the general arrangements, except in the way of praise. Every reasonable precaution seems to have been taken for the prevention of disorder, and the police force employed within the grounds have had very little, if anything, to do. Possibly the expected rush may make their work more arduous.

One fair is so much like another in its general features that to be minute in description would be to be dull. The grounds are skirted with the usual variety of side-shows; the opportunities of being cheated are announced in bellowing tones; papers a year and a half old are passed off by innocent-looking newsboys as the latest edition; cabs collide and create a momentary scare, and a hair-brained evangelist delivers her conscience to a mocking crowd. Still, it must be said, that without as well as within the walls there has been no disorder or any approach thereto. Within the enclosure there is the very perfection of arrangement. There can be no uncomfortable crowding anywhere. The restaurants are commodious and easily accessible, and the same may be said of other necessary accommodations. Outside the main building the scene is pleasing and lively; turn where you may there is some object of interest, a subsidiary department of the show, a newspaper office tent, a fire escape or windmill—something or other to keep one's interest alive.

As to the Exhibition itself, it need only be said that it is pronounced by those whose experience of these annual displays gives weight to their opinion, decidedly the best that has ever been held in Montreal. The receipts up to last night, the end of the fourth day, were about $3,000 more than for the first five days of last year's Exhibition.

## Agricultural.

### THE LIVE STOCK.

The show of live stock is very fine, both in number and quality, the general run of the animals shown being much in advance of those exhibited at any previous Exhibition in this Province. The arrangements for housing the stock are also very good; exhibitors have, we think, very little cause to find fault with the manner in which the animals are cared for. To the show of stock Hon. M. H. Cochrane, of Compton, and Mr. Whitfield, proprietor of the Rougement stock farm, contribute largely, many of the animals being imported.

### THE HORSES.

The show of horses is quite as large, if not larger than that of last year. The horses shown in the ring on Saturday were objects of general admiration. All the classes are pretty well filled, and it is gratifying to note that the efforts of our Canadian stock raisers to improve the character of the stock are meeting with marked success. Many valuable imported animals are shown this year, and those who have watched the progress of horse-breeding in Canada of late, there has been a decided improvement in the quality of home-bred horses. As it is almost impossible for exhibitors to remain in the stalls all day for the convenience of visitors who may desire to examine the various animals, it is, in most cases, difficult to obtain information, but we think part of the difficulty might be obviated if each stall was labelled with a card, descriptive of the contents, with the name and address of the owner. In the absence of the persons in charge of the animals many stalls are closed up and inspection prohibited.

THOROUGHBREDS.

The show of thoroughbreds is comparatively small, but includes some very fine animals. As usual, Messrs Dawes, of Lachine, are foremost in this class, with four entries, viz.: The splendid stallion "Tubman," one yearling colt, one brood mare with her foal, and one two-year-old filly. These animals were all greatly admired. Mr Joseph Hickson shows a fine brood mare with her foal, a two-year-old filly, and a yearling filly. The other entries include a stallion owned by Mr Robert Craig, and another the property of Mr B E Bourke, of Sorel.

THE CLYDESDALES.

This class is pretty well represented, many very fine specimens being shown. Of stallions the principal exhibitors are Messrs Wm McGibbon, Montreal; P Baudin, St Urbain; E L Normandin, Beauharnois, who shows two fine four-year-olds; James Henderson Petite Cote; Andrew Scott, St Laurent; Hon M H Cochrane, Compton; P Lane, Lachute; Robert Ness, Howick; Pierre Lussier, Vercheres; H McDonald, Cote St Luc, and the Agricultural Societies of Napierville and Chateauguay. Hon M H Corchrane's entry in this class is the thoroughbred imported stallion "High Commissioner." Messrs. William McGibbon, Montreal, and J & S Ness, of Howick, show some very pretty yearling Clydesdale colts. There are quite a number of fillies entered in this class, the exhibitors being Hon M H Cochrane, Messrs Dawes & Co, William and J & S Nesbitt, C McEvoy, Thomas Brown, Petite Cote; and William McGibbon, Montreal. Brood Clydesdale mares with foals are shown by Messrs Andrew Scott, St Lambert; H McDonald, Cote St Luc; and Thomas Irving, Montreal. Matched teams of Clydesdales are shown by Messrs Joseph Hickson, Wm McGibbon, and Hon M H Cochrane. Mr R J Latimer, of Compton, shows a fine Percheron stallion, and Suffolk stallions are shown by Messrs James Henderson, Petite Cote; Alex Brosseau, Laprairie; and Amable Prevost, Varennes.

ROADSTERS.

Of this class of horses there is a large exhibit, particularly of stallions. Hon G B Baker shows a handsome pair of matched geldings, which look exceedingly well in harness. They are of exactly the same colour, jet black, and there is but ten pounds difference in the weight of the two. Mr Baker also shows a neat-looking dark-brown carriage gelding. Mr H D Moore, of Moore's Station, Missisquoi County, shows in this class a four-year bred stallion, a filly two years' old, and a brood mare with foal. The leading exhibitors of roadster stallions are Hon M H Cochrane, Messrs H D Moore, Noe, Truleau, St Isadore; J H Leblanc, St Dorothea; A Hebert, Ste Martine; J C Brazier, Montreal; Norman McPhee, Dundas Centre; M Caron, Three Rivers; J Charlebois, Pointe Claire; Hugh McDonald, Cornwall; J B Peloquin, Back River; N Lachapelle, St Paul d'Hermite; H Lussier, St Vincent de Paul; J Poirier, St Remi; R Elliott, St Jean Baptiste Village; J McGee, Lachine; Geo H Moir, St Laurent, and J A Lapailleur, Varennes. Messrs Dawes & Co show a fine two-year-old filley, and brood mares with foals are exhibited by Messrs Andrew Scott, St Laurent; S J Wylie, Longue Pointe; J and S Nesbitt, Petite Cote, and H McDonald, Cote St Luc. Here quite a number of single roadsters, including those shown by Messrs John Carsley and Cossitt & Bros, Montreal, and E David, Petite Cote.

CARRIAGE HORSES.

In this class there are also quite a large number entered. Mr H McDonald, of Cote St Luke, shows a fine four-year old stallion and a three-year old filly. Hon J J C Abbott's bay stallion "Raymond" is also entered in this class. Mr R P Ginnis, of Iberville, shows a splendid black stallion, "Stonewall Jackson," and the animals owned by Messrs Joseph Groie, St Remi; J Burke, St Columbian; Rev C Poulin, St Dominique; Geo Kamboth, Alymer; John McDougall, Montreal, and Joseph Loiseau, of St Ambrose, are also fine specimens of horse flesh. In addition to the stallions quite a number of carriage fillies and harness geldings are entered. Brood mares, with foals, are shown by His Honour Lieutenant Governor Robitaille, and Mr P G Charlebois, of St Vincent de Paul.

DRAUGHT HORSES.

In this class there is this year quite a large exhibit, many of the animals being imported. The Village of Petite Cote figures very respectably in this class, no less than eleven horses being shown by farmers of that village. The exhibitors are Messrs. James Henderson, C McEvoy, Geo Kidd, J & S Nesbitt. Mr N Gosselin shows the handsome bay stallion "Prince," and "Dan," a chestnut, is shown by Mr A Valle, of Ste. Martine, Chateauguay. The other exhibitors of stallions are Messrs. O Lave, Lachute; Jos St Sarny, Varennes; F Turner, St Etienne; B Lavigne, Jolliette; F McKenna, Ottawa; H St Aubin, St Laurent, and O Paquette, St Vincent de Paul. Messrs Dawes & Co show a fine three-year-old filly, and draught brood mares are shown by Messrs James Doran, Lachine; E Benoit, St Hubert; A Bea and C Hodge, St Laurent; Thomas Irving, Montreal; James Henderson and C McEvoy, Petite Cote. Messrs Henderson and Young also show matched farm teams. The Shedden Company have on the grounds a noble looking pair of grays, each weighing over 1,800 pounds, and in fine condition. Light draught stallions are shown by Messrs Robert Benny, Montreal; William Knox, F. McKenna, Ottawa; Thos Stanley, Granby; A Lefebvre, St Remi; L Trudeau, St Michel Archange. Of light draught brood mares there are quite a large number, Messrs William Stuart and James Henderson, Petite Cote; William Nesbitt, Longue Pointe; Hugh McDonald, Cote St Luke, A and J Somerville, Lachine; O Paquette, St Vincent de Paul, and Thomas Irving, Logan's Farm, being exhibitors. Light draught matched teams are shown by Messrs Henderson, Stuart, R Benny and Wm Nesbitt.

HUNTERS AND SADDLE-HORSES.

In this class Hon M H Cochrane's bay cob mare, the only one of the kind on the grounds, is entered. The other exhibitors are Messrs B J Coghlin, R Blackwood and R A Vennick, Montreal; Tozer & Co, Quebec, J A Duncan and Messrs James Henderson and John Morrin, Belle Riviere, show farmers' saddle-horses.

PONIES, &c.

To the great delight of juvenile visitors there is quite a large number of ponies on the grounds. These with the donkeys and mules form quite an attractive feature. Mr. Joseph Hickson is the principal exhibitor of ponies. He has a neat-looking Shetland stallion, and three Shetland mares. A Shetland mare and stallion are also shown by Mr. Jas. Doran, of Lachine, and two Shetland stallions by Mr. William McGibbon. Messrs. Thomas Irving and Archibald Hedgson, Montreal, show Shetland mares. Two ponies, other than Shetland, are also exhibited by Mr. Hickson, and one by Mr. J. E. Somerville, of Lachine. Mr. George Whitfield, of Rougemont has some mules on the ground, and Mr. Hickson is the only exhibitor of donkeys.

### THE CATTLE.

The gentlemen who have charge of the cattle say that the show is fully 50 per cent better than that of last year, both in number and quality. The animals are almost all in good condition. The Ayrshires, Herefords and Durhams are the most largely represented, though there are some fine specimens of Devons, Polled Aberdeen and Angus, and Jersey cattle. The largest exhibitors of cattle, this year, are Hon M H Cochrane, and Mr. Whitefield, of the Rougemont Stock Farm. These gentlemen have entries in almost every class. The Rougemont exhibit is a particularly good one, numbering 60 fine head in all, including some fine herds. Mr Cochrane shows about forty cattle, many of them imported. Messrs Dawes, & Co, W T Benson, Cardinal - J L Gibb, Compton; Joseph Hickson, Montreal; Hon Louis Beaubien, Outremont; William Rodden, Plantagenet, and Thomas Irving, Montreal, also contribute largely to the show.

THE HEREFORDS.

It has long been customary to rank the Durhams first in the cattle class, but the Herefords seem of late to be superseding the Durhams somewhat in the favour of Canadian breeders. It it considered by many that the Herefords are the best cattle for general purposes, though the Durhams, of course, hold precedence as beef producers. The chief merit of the Herefords is that they are easily kept and very prolific. They are a hardy race and excellent grazers under difficulties, and are therefore well adapted for small farmers in such a cold climate as ours. In colour the Herefords are generally a rich red, while the face, mane, throat, belly, and lower parts of the legs are white. In England they are known as the white faces, and their marked regularity of colour give an impression of purity of breed. The show of Herefords this year is not particularly large, but includes many fine animals. The principal exhibitors besides Messrs. Cochrane and Whitfield are Messrs. W. T. Benson, Dawes & Co., and Joseph Hickson.

Hon. Mr. Cochrane's imported Bull "President" is a splendid animal. He has taken prizes at the Bath, or West of England Show, at the Shropshire Show and other English fairs. Fifty bulls of this class have already been forwarded to the Bow River Ranche and fifty more are to follow soon.

THE DURHAMS.

The Durhams or Short-horns are the great beef-producing breed. In colour the Durhams are generally of a dark red piebald, with the white portions sometimes decked or sanded. Their capacity to accumulate flesh is enormous. The Short-horn crosses with native Canadian breeds are said to form good milkers and in the hands of ordinary farmers prove better than the pure breed of Short-horns. The show of Durham bulls is unusually large. Messrs. Cochrane & Scott show fine herds consisting of a bull and five cows. The other exhibitors are M J Hagan, Plantagenet; W T Benson, Cardinal; Andrew Scott, St Laurent; J L Gibb, Compton; Joseph Hickson, F R Batterbury, Dawes & Co, J B Masten, Lacolle; K A Vawnick, Montreal; O Paquette, St Vincent de Paul; W A Neilson, Cap Sante; S B Derick, Cap Sante; B Parent, Charlesbourg.

THE DEVONS.

The Devons have long sustained a superior capability of improvement among breeders wherever they have been bred with care. The hide is soft and mellow indicating an aptitude to fatten, the bones small, and in colour, grace and carriage they are great favourites. It is as workers that the Devons are most sought for, and in days when oxen did the draught work on primitive farms the Devons, on account of their docility, unfortunately for themselves, had the work to do. From this circumstance they stand higher on the leg, are more bony, and are not so compactly put together as the Herefords or the Durhams. The beef they produce is, however, well mixed, as to fat and lean, juicy and tender. The Devons are easily kept, and though not classed as dairy cattle they have the recommendation of being early ripe, and of being fit for the butcher at a little over two years old. The are rare feeders, and carry a great amount of meat with them. The only exhibitors of Devons are Messrs George Whitfield, of Rougemont, and J. Wotherspoor, Montreal, who make a very creditable show.

AYRSHIRES.

The Ayrshires are the most numerous of the breeds exhibited this year, and the general quality is considered good. The Ayrshires bear a high character as milkers, and being a hardy stock they seem to prosper well in this country. They are generally of small size, but excellent producers of butter and cheese. In Ayrshires there is quite a large competition, the chief exhibitors being Messrs Dawes & Co, George Whitfield, J L Kidd, Thomas Irving, Hon Louis Beaubien, Thomas Borron, Lachute; Geo Kidd, Petite Cote; R Doig, Lachute; Thos Irving, Wm Rodden, Plantagenet; D Benning, Williamstown; J Hay, Lachute; J A Simpson, Coteau Landing; Thos Brown, James Henderson, J Jeffrey and D Drummond, Petite Cote; Jas Sangster, Ormstown; J H Lesage, St Jacques; J Archambault, L'Assomption; Bazile Pepin, St Michel; A Mousseau, Berthier; Hon J J C Abbott, J B Lachapelle, J & S Nesbitt and William Stuart.

POLLED CATTLE.

Of polled cattle the Aberdeen and Angus and Galloways are represented. The former breed seem to be growing very popular in Canada, and it is contemplated to place a large number of them on the North-West ranches. The herd shown by Mr. Whitfield are in fine condition. They are jet lilack in colour, and attract a good deal of attention. Hon. Mr. Cochrane also shows a large number of polled Aberdeen and Angus cattle, and Mr. Hickson also makes a very fine exhibit. The Galloways do not seem to grow in popularity. They are generally looked upon as rough, and in many respects closely resembling the Buffalo. Though not highly prized as dairy cattle, their beef is generally of a superior quality.

JERSEYS AND ALDERNEYS.

There are quite a number of these on the ground, and they seem to be much admired. They are generally regarded as profitable stock. They are small in size, but good milkers, and fully equal to the Durhams and Herefords for beef. They have beautifully formed bodies and heads, and are fawn coloured. Any one who appreciates good milk appreciates the Alderneys and Jerseys, and any one who likes good butter knows that their butter cannot be surpassed. They are very prolific, and breed young. In this class the principal exhibitors are Hon M H Cochrane, who shows a very fine herd, and Messrs F R Batterbury, G Boulter, Montreal; W A Reburn, St Anne; J M Browning and F. Dion, Ste Therese.

GRADE CATTLE.

This class is pretty well filled, and there are many fine specimens, showing that farmers generally are beginning to appreciate the value of improved stock. The exhibitors of grade cattle are Messrs. W T Benson, D Drummond, J & S Nesbitt, E David, C McEvoy and Wm Stuart, Petite Cote; J Griffin, Laprairie; Tozer & Co, Quebec; W A Reburn, Ste Anne; J Jenning, Lachine; W Rodden, J Archambault, L'Assomption; Hon M H Cochrane, Hon G B Baker, Miss Linley, Mount Royal Vale; P Gagnon, St Michel, and P G Charlebois, St Vincent de Paul. In fat cattle are shown by Hon M H Cochrane, and Messrs Tozer & Co, of Quebec, and E David, Petite Cote. A yoke of working oxen are also shown by Hon G B Baker, Sweetsburg.

WEST HIGHLAND AND KERRY CATTLE.

The only specimens of these on the ground are those from Mr. George Whitfield's stock farm, Rowgemont. The West Highlands are a hardy race, and may prove profitable in this country. The little Kerry cow of Ireland, termed the "Poor Man's Cow," is better known. The Kerry cattle are not large animals, but have round plump bodies, and are very handsome.

THE SHEEP.

The display of sheep this year is a great improvement upon that of last year. All the pens seem to be taken and there is a brisk competition in all the classes. Leicesters, Cotswolds, Shropshire, Hampshire, Oxfordshire, and South Downs, together with quite a number of fat and long wooled sheep are shown. It is encouraging to find so many French-Canadian farmers among the exhibitors of sheep.

THE LEICESTERS.

This breed still appears to be a general favourite with our farmers, and the show is unusually good. The Leicester may be generally recognized by the clean head, without horns, lively eyes, straight broad and flat back, round body, small bones, thin pelt, and fine wool. They gather fat at an early age, and yield a fine-grained and well-flavoured flesh. The wool of the Leicesters is highly prized, being used for combing purposes and in the manufacture of delaines and similar cloths. In Great Britain this breed was formerly known as the Lincolnshire, but a great improvement has been effected, and the Leicesters are now raised extensively in the South of Scotland, where they are kept by every small farmer. There also a valuable breed has sprung from the mixture of Leicesters and Cheviots. The leading exhibitors of Leicesters, this year, are Messrs Wm Rodden, Plantagenet; Jas Cowan, Allan's Corners; D Elliott, Grafton; Thos Cameron, Acton; T Verdon, St Laurent; L Rivet, St Paul l'Ermite; Geo Smith, Lachine; V Coupal, St Michel; L Forget, St Francis de Sales; John Hay, Lachute; Geo Fraser, St Andre; E Poulin, St Andre; A Sicotte, St Hubert; E M Judah, Richby; Robt Ness, Wm Knox and R Robertson, Howick; E C & M Brousseau, Laprairie; Geo Kydd, Petite Cote, and D Baxter, North Georgetown.

COTSWOLDS.

This breed is also highly esteemed, and the entries are numerous. The Cotswold has been highly improved. The animals are usually larger and stronger than the Leicesters. They fatten quickly and yield heavy fleeces, being among the most profitable of breeds. It seems impossible to combine in a single breed all the good qualities, and, therefore, each are admired for their special merit. The Cotswolds present a fine appearance. In the best specimens the neck is arched, and the limbs clean and straight. Among the exhibitors of Cotswolds are Messrs H Sorly, Guelph; F Barnard, Beleil; V Coupal, A Mouchamps, St Michel; J Boileau, St Phillippe; Tozer & Co, Quebec; J P Ouimet, St Francois de Sales; F Permault, L'Assomption; P Robinson, Lacolle; D Phaneuf, St Antoine; J R Lowden, Montreal; J Woodworth, Lacolle; E Dion, St Therese; E C Brousseau, Laprairie; W F Mussen, J B Masten, Lacolle; A Mousseau, Berthier, and S Evans, Guelph.

OTHER LONG WOOLS.

In this class also there is a lively competition, the exhibition of Leicesters and Cotswolds being generally competitors in this class also. The variety of long wools is very large. Messrs F Desjardins, Ste Rose; Thomas Hare, Geraldine; Louis Morin, St Ours; A Walker, Lachute; James Cowan, Allan's Corners; Isaic Monet, St Martine, and B Pepin, St Michel, are among the owners of sheep entered in this class.

SOUTHDOWNS.

The Southdowns are a favourite breed with many. They are large in body and yield good mutton. They are also said to be very prolific, while the wool is generally large in quantity and fair is quality. The Southdown is capable of subsisting on short pastures, and can go over a deal of ground in search of food. The wool is so closely matted on its back and about its head and neck as to be almost impervious to rain and snow; therefore as soon as a storm ceases it appears dry and comfortable. The Southdown derives its origin and name from the chalky downs of the south of England; but it is now common everywhere. The colour is generally white, but black is not rare; and the face and legs are generally dun, black or speckled. Both sexes are hornless. The show of Southdowns this year is highly creditable, the exhibitors being Messrs H D Moore, Moore's Station; M C Dawes, Montreal; G H Jones, Bedford; D Phaneuf, St Antoine; F Dion, Ste Therese; and Louis Brousseau, St. Hubert. Some very fine Shropshire, Hampshire and Oxford Downs are also shown by Hon. Mr. H. Cochrane Messrs W T Benson, F Dion, C A Campbell, St Hilaire; D Phaneuf, St Antoine; and J Featherston. Mr George Whitfield, of Rougemont, is the only exhibitor of West Highland sheep. This is a very hardy breed, almost goat like in its climbing habits, with a compact shape and bright wild-looking eyes. The males are generally horned, the wool long, coarse and shaggy, and the face and legs black. The flesh is fine grained and of excellent flavour; but the wool is said to be comparatively unprofitable. Of fat sheep some good specimens are shown by Messrs William Rodden, R Ness, and R Robertson, Howick; D Elliot, Grafton; Thos Desjardins, Ste Rose; Geo Smith, Lachine; J Woodworth, Lacolle; and H Sorly, Guelph.

THE PIGS.

A visit to the pig house reminds one forcibly of the story of the little girl, who, on being told how all the animals had received their names from Adam, expressed the opinion that he was not entitled to much credit for naming the pig, because "anybody would know what to call him." No animal displays the changes arising from domestication so much as the hog—the savage wild-boar contrasting strangely with the docile, plump and meek-looking Suffolk, Essex or Berkshire. The hog occupies so prominent a place in domestic economy and commerce that every improvement in the breed, which increases the yield of flesh, fat and hair, must conduce greatly to the benefit of the farmer. It is therefore gratifying to note that in no department of stock-raising has the advance been so marked of late as in the breeding of pigs. The show this year is excellent, both in quality and numbers—much better than that of last year. As usual,

THE BERKSHIRES

are the most numerous; and include many fine specimens. Berkshires are either black or white, with square plump bodies and short noses. They fatten easily, but the pure breed is not considered so profitable as its cross with the Suffolk, the Chinese, or native Canadian breeds. The hams and bacon of the Berkshire are highly esteemed, but the cross-breeds generally weigh heavier with lighter feeding, and are of a more docile disposition. Messrs. Dawes & Co., of Lachine, are extensive exhibitors of hogs, and have eleven Berkshires entered. Mr. Thomas Iriving and William Rodden also show quite a number. The remaining Berkshire exhibitors are Captain Campbell, St Hilaire; Messrs D Phaneuf, St Antoine; E Kenny, St Vincent de Paul; M A Reburn, St Anne; P Henrickson, Dr Drummond, Petite Cote; J R Louden, William Evans, Montreal; J Griffin, Laprairie; A Hislop, T Verdon, St Laurent; M Moody, Terrebonne; A Dubois, Oka; Joseph Featherston, Credit; A Mousseau, Ber-

thier; H Sorly, Guelph; D Smeal, Mile End, and Z Ouimet, St Francois de Salle.

THE SUFFOLKS.

The Suffolks, though of good quality, are not very numerous. This breed has been a great favourite in England, being named from Suffolk County, from whence the London market was long supplied. The present breed is believed to be a cross from the old Suffolk with the Chinese and Berkshire. The pure Suffolk is white in colour, remarkably symmetrical, small and compact, short legged and small headed, the exact opposite of the long-snouted, lank and lean hogs which were too long in vogue in this country. Their early maturity, small composition of food, and tendency to fat compensate for their want of size. Messrs. Joseph Featherston, of Credit, shows no less than fourteen Suffolks, Mr. Thomas Irving five, the other exhibitors being Messrs. J. P. Ouimet, St. Francois de Salle; William Rodden, Plantagenet, and D. Drummond, Petite Cote.

ESSEX PIGS.

In the Essex class there is quite a respectable show. These pigs are black in colour and grow to a large size, are well proportioned, of mild disposition, not hard to fatten, yield meat of excellent quality, and are said not to be subject to cutaneous diseases. There are some very fine sows with litters shown, and all seem to be in prime condition. Nothing delights the eye of the farmer more than the sight of a good round fat hog. Mr H Sorley, of Guelph, shows eight specimens of Berkshires; Mr T Verdon, of St Laurent, five; Messrs A Hislop, St Laurent, and H Lussier, St Vincent de Paul, are also large exhibitors.

YORKSHIRES AND OTHER LARGE BREEDS.

In this class there is quite a variety of animals entered, chiefly by Messrs. Joseph Featherston, Eloi and J. P. Ouimet, St. Francis de Salle; E Longley, Waterloo; P Dore, Laprairie; S R Whitman, Knowlton; P Hennekson, Petite Cote, and J Verdon, St Laurent, Six extra swine are shown by Mr. J B Masten, Lacolle.

## POULTRY.

Those who take an interest in the propagation and improving of breeds of poultry will be gratified on visiting the building devoted to this purpose. The different species of domestic and imported fowls, geese, ducks, pigeons, &c., are all well represented, though not so largely as might be desired. What is lacking in quantity, however, is made up in quality. Some of the exhibits, especially the pigeons, are very fine. Among fowls the dorkings and Aylesbury ducks are in the first rank, as regards number and excellence. These are sent by several gentlemen, among whom are J. Hickson, Robert Benny, and Thomas Irving, of Montreal.

The show of geese is not large, but those exhibited are superior. The breeds are African and Egyptian. It would be difficult to find finer birds than these. Some excellent Embden geese are also shown. The principal exhibitors are Wm. Clark, Thos. Irving, J. Hickson.

In the section devoted to ducks we find several good breeds, noticeable among which are some pure strains of Pekins. The Aylesbury, Muscovy and Rouen, also look well. D. Smeal and Thos. Irving exhibit Rouens. Thos. Irving, M. Jeffry, D. Smeal and J. Simpson are among those who send Aylesburys.

Some beautiful guinea fowl are also to be seen, raised by Ed. Fiddes.

The display of pigeons is exceptionally good. In this line the principal contributor is Mr. R. G. Taylor, of Montreal. An admirer of these birds, might find in the cages occupied by this gentleman's exhibits a vast fund of interest. Among the varieties bred by Mr. Taylor, who is simply a fancier—are two pairs of bearded and Agatha tumblers, yellow, black and bearded baldheads, red and yellow fantails, several pairs of English and African owls, and some yellow and solid turbits. Some of these birds are of choice and valuable breeds. A very handsome pair of performing parlour tumblers are labelled $15.00 These birds were imported by Mr. Taylor at great expense. The name is derived from the fact that they cannot fly six inches from the floor without turning two complete sommersaults. A pair of white fantails can be purchased for the small sum of $12. A fine pair of English carriers are among the show of pigeons.

Of light and dark Brahma fowls there are four pairs. J. Hickson, G. Macneider, Chas. Lapierre, send each a pair of light, and J. Hickson one pair of dark.

Cochins are not largely represented. J. Hickson has a pair of partridge cochins, and also exhibits some fine birds of other colours, in appearance at least.

In spangled and pencilled Hamburgs Mr. Hickson is the only exhibitor.

White and brown Leghorns are tolerably well represented by several city gentlemen, amongst whom Mr. Hickson is again prominent.

There are some beautiful specimens of game fowl, black-breasted, red, brown, duckwing, pile, and other varieties.

Black white-faced Spanish—fine specimens of the breed—are shown by Messrs. Hickson and Irving. In bearded and golden Polish there are also some very fair exhibits.

The diminitive bantam crows more lustily, and receives more attention from the throng of visitors than his larger brother. The breeds represented are in game, black-breasted, red, duckwing and pile, and in the ordinary breeds seabrights and rosecombs.

Three pairs of pea fowls are shown by J. Doran, T. Verdon, and F. Dion.

In game fowls R. G. Taylor is the only exhibitor. He sends checkered Antwerps and dragons.

In the extra series we find a small show of rabbits. Of these there are three only. lop-eared young, female Angora, a very pretty animal, and a lop-eared female.

Although the season during which our Provincial Exhibitions are held is very disadvantageous for showing poultry in a completely healthy state, we cannot but say that the time devoted to the careful seeing of this exhibit will be well spent. Taking the above circumstance into consideration, it must be admitted that the birds, in almost every instance, looked remarkably well.

## THE AGRICULTURAL IMPLEMENTS.

That the culture of the soil will be, in the near future, one of the most scientific pursuits, every one will admit. This fact is especially evident to those who have visited and carefully inspected the Agricultural Exhibitions of the last few years. The strides that have been made in the invention and perfection of all kinds of labour-saving farming appliances are wonderful, and the increased supply in this respect seems to be proportional to the improvements made. Everything from the most simple work on a farm, up to the most exacting, is performed by machinery. The distribution of manure, and the reaping, gathering and storing of the crop, with all the numberless intermediate operations, are independent of the manual exertion the farmer was wont to apply to the same objects. Time, money, labour is thus saved, and the resulting benefit is great in proportion to farmer, soil and market.

As an index of the continual progress in Agriculture, the Exhibition of 1881 may be looked upon as an eminent success. It is complete and perfect in every respect. Everything connected directly or indirectly with farming interests, is worthily represented.

This year ample provision has been made for showing Agricultural Implements. A large square, on the opposite side of the road, south of the Main Exhibition Ground, has been enclosed with a high board fence, and spacious buildings have been constructed for protecting the various machines from the sun and rain. Unfortunately, manufacturers and exhibitors of Agricultural Implements were obliged to leave their exhibits exposed in the open field during the entire ten days, and on this account many refused to attend at all. Now, however, this difficulty has been overcome. Another great advantage now is that the various machines can be shown in motion, portable engines being placed outside and shafting run under the floors of the several buildings. The engines now working in the Dairy and Agricultural Implement Departments, are from the Leonard Works, London, Ont. The Agricultural Implement Department is reached from the main grounds by a temporary high arched bridge, a very neat looking structure, which will probably be taken down as soon as the Exhibition is over.

A Potato Digger is the first thing to attract the attention as the visitor enters the west building. It is exhibited by Moody & Sons, Terrebonne, and digs, cleans and collects the roots.

A "Hoosier" Drill is the next apparatus. In effectiveness and construction this machine is evidently worthy of its name.

A fine collection of Ploughs, about 20 in number, and from the works of different makers, is shown in this building. Some of these implements are extraordinarily good. One bearing the card of J. Maille, of St. Francois de Salle, is a splendid article. The blade, coulter, and other of its working parts, are polished like silver, and the rest of its parts are painted and finished in first-class style. The next noticed is a Manure-Spreader, exhibited by Messrs R. & W. Kerr, of our city. By this machine, which is intended to be used with stable manure, the fertilizer is distributed in a manner unattainable by fork and harrow.

A very useful contrivance, striking one as just the thing for a farmer-lumberman, is the next exhibit. It is a combination of a hay and lumber waggon, strongly made, well painted and admirably finished.

Larmouth & Sons show a very fine collection of Harrows, Pulverizers and Drills. They make a variety of Drills adapted for every soil and purpose. Among these we noticed a spring-steel Harrow, calculated to prepare the ground in a most thorough manner

A. Vanier, Sault au Recollet, and Louis Lavoie, St. Martin, make some very fine Threshers, which were shown in actual operation.

We come next to a very fine Reaper and Grain-Saver, from the works of L. D. Sawyer & Co., Hamilton. This machine occupies the whole end of the building. It allows comparatively none of the grain to escape. Its exhibitors may reasonably be be proud of this article.

Prominent amongst the display of the Brantford Iron and Dairy Manufacturing Company we see an ingenious machine called the "Figure 8 Churn." It is worked in such a way that all the points of the Churn describe a complete figure 8, during one revolution of the crank. To show the manner in which cream is churned by this, one was filled witu water, and set in motion. After a few minutes the contents had the appearance of milk, so thoroughly were they agitated.

In the same section a Butter Worker, is shown by Emory & Walker which saves a great amount of hard work in a dairy.

Geo. Cutter, Sutton, P.Q., shows a fine Sap Evaporator Every process in the manipulation of the sap is exhibited, from tapping the tree to the bottling of the syrup.

Another Patent Churn, which its exhibitor claims to be the best made, is shown by John Campbell. It is an oscillating one, suspended by four cords from a stand, and swinging to and fro. This was operated by Mr. Campbell himself.

Mr. Dingle, of Oshawa, sends a Patent Fanning Machine from his manufactory, which cleans the grain in an admirable manner.

A really splendid collection of smaller Agricultural Implements are exhibited by Mr. Wm. Evans, Montreal. Everything is perfect in make and finish. Mr. Evans deserves additional praise for the manner in which these articles are displayed. He evidently knows that the simple sending of goods to the building is not all that is necessary, and has paid commendable attention to appearance as well as excellence.

J. W. Mann, Brockville, brings a perfect broadcast Grain Sower, which spreads the grain as evenly as though each kernel had been laid in its place by hand. The machine is for two horses. Both the iron and wood work about it are thoroughly well made and finished.

About the best display of Ploughs is made by Mr. Evans, as the agent of the celebrated Wilkinson Plough Company. They are really unsurpassable in style, finish and strength. Every variety is here, from those made chiefly of wood, to the more elegant steel article.

We come now to the second building, and come first to a number of carts and market waggons, some finished in oil and others finely painted.

Several Beet Seed Sowers, of various degrees of perfection, are exhibited by different makers. All are good; but one, the invention of Latruvier, of Montreal, seems to be the best.

Mr Vessot, of Joliette, makes a very good exhibit, in the shape of a Patent Drill, Roller and Sower combined. By this machine the ground is drilled, the seed sown and covered, and the soil rolled over it. This is a very good article, and would be of inestimable value on a large farm.

The Rollers and Straw Cutters from different factories are, as usual, numberless, and we cannot go more deeply into these exhibits than to say they are all good. A roller is a roller, and in itself is not capable of a very great amount of perfection. Attachments certainly may be made, as in the case of several exhibits; but all are of almost equal excellence, and we will not particularize.

A machine which attracts a great deal of attention is shown by P. Lord. It is an elegant little model of a patent hay press. Owing to its small size, moss is used to show its operation. The moss is done up in compact little bundles of about three inches in length by two in breadth, securely wired and prepared for shipping in an incredibly short time. The miniature press was the centre of a crowd during the whole day, and its exhibitor was kept perpetually employed in explaining its excellences and merits to an admiring audience.

Among a large number of reapers, we notice as especially good one shown by R. & W. Kerr, of Montreal. These gentlemen, as the representatives of the Massey Manufacturing Company, and some other firms make a very fine display of different machines, the merits of which we will explain in detail.

One of their finest mechanisms is the Toronto Reaper, claimed to be the best made. This is a new machine, and for general use must supersede all others. A special feature is that its cutting bar works "out of gear," or, in other words, in any position. If, for example, the bar meets with any obstacle—such as a stone or brick—it can be raised to an almost perpendicular position without stopping the motion of the knives. This in itself is a great advantage, as when lowered it begins cutting again immediately it touches the grass or grain. The cutting bar can also be adjusted at any distance from the ground, and at any angle, simply by moving a lever at the driver's right hand. All the working parts are adjusted with the greatest nicety, and work easily with the least possible expenditure of horseflesh. Altogether the advantages combined in this machine render it one of superlative excellence. For Folton Bros., Messrs. Kerr exhibit a Pea Harvester, an excellent machine. The peculiarity of this harvester is that it can be readily attached to any ordinary mower by removing the cutting bar. With this attachment, and a mowing machine, the farmer has two complete implements at little more than half the cost of a mower and harvester.

The next of Messrs. Kerr's collection, a Wheel-Plate Pulverizer, is particularly valuable on account of the thorough manner in which it incorporates the manure with the soil.

Hitherto, it has been a matter of some difficulty for an ordinary farmer to purchase Seed-Sowers, on account of the large price demanded for these articles. This obstacle has been surmounted by Messrs. Kerr, who show a Patent Seed Sower, warranted to do good work for the small sum of $15.00.

Next, we come to several specimens of Gray's mills, from one to two-horse power. These mills are made to run so easily, that a child might work them. As a proof of their excellence, we have Mr. Kerr's statement that during last season he shipped no less than thirteen to St. Petersburgh.

A "Chicago" two-horse power machine for farm work, is also exhibited by Messrs. Kerr.

Last among the implements shown by these gentlemen, we have a magnificent Horse Rake, called the "Sharp." This is the best in use. The teeth of the Rake are wrought iron and curved, so as to hold a large quantity of hay. This lead is raised by a lever which requires only four pounds pressure to work. As the hay is raised, a wooden bar drops across the rake, causing the hay to fall to the ground. The fixture of this rake is the slight power necessary to work the lever.

Reapers are represented by several other firms. Nociceable among these, for its handsome appearance, is the "South Falls Reaper."

The two firms of G. M. Cossit & Bros., and Forrest & Wood, also show a very good selection of Mowers, Rakes and Harvesters.

In this building, the machines are kept in motion by a Leonard Farm Engine.

Coming to the last of the four buildings, we have another variety of reapers and harvesters from the Brantford Works. It is unnecessary to state that these are all of superior quality and workmanship.

Haggert Bros. Manufacturing Company exhibit a new steam grain saver, which is guaranteed to save the grain without dust.

David Maxwell, of Park, Ont., make a fine straw cutter and root pulper.

On the grounds near the buildings, a Frederick's perpetual baling press was shown in operation. With this machine a quantity of hay is baled and wired ready for export in a very short time.

The display of farm engines is not large, consisting, exclusive of those in operation, of two simply. W. Gray & Sons' engine is a very serviceable article.

The Agricultural Department should, undoubtedly, be the most important in every Exhibition. But it is not every year that we see one so thoroughly encouraging in every way, as that to be seen in these four buildings.

## THE DAIRY EXHIBIT.

The Exhibition of Dairy Produce in the Manitoba building has attracted its full share of visitors, and may well be regarded as one of the most important Exhibits on the grounds. Looked at in a material sense, it represents one of our greatest sources of national wealth. Canada has long been famed for the excellence of its dairy products, which commands a price second to none in foreign markets. It is but a few years since the manufacture of cheese on the factory system was first undertaken, and now the whole country is dotted with cheese factories whose product is one of our most important articles of export, by which the farmers are enriched to no small extent. It would be an easy matter, had we the time and space at our disposal, to trace at more length the great benefits accruing in greater or less degree to all classes of the community from our large production and export of dairy produce. The exhibit made this year is so large and comprehensive as to impress every one who sees it with some sense of the importance of the Canadian dairy interest. Eminent authorities pronounce it the best exhibition of cheese, taking everything into consideration, that has ever been made on this Continent, and that is saying a great deal, when we remember what our American neighbours have done in the way of dairy fairs. The department is in the hands of Mr J H Ireland, than whom no one could be better fitted for the task of making an excellent display, and affording the thousands of visitors every opportunity of viewing the exhibit to the best advantage, and with the least possible inconvenience. Mr Ireland throughout has been assiduous in his attentions to the general public, and rendered the Judges very valuable assistance, which they handsomely acknowledge in their report. The large exhibit of Cheese is ranged round the entire hall, and on Saturday the names of the successful competitors were attached to their entries. The Butter exhibit—which is also very fine, but relatively behind that of Cheese—is displayed in two large glass refrigerators, with the hundreds of tubs "canted" towards the wide aisle along which the visitors pass, affording the most excellent opportunity for examining the display. The entries are very numerous, and comprise many exhibitors from Vermont, New York and Ontario, besides representatives from over half the counties in the Province of Quebec.

Class 37, section 1, open to the Province of Quebec, three tubs of Factory-made Butter, not less than 50 lbs each, made at any time. Three prizes—$50 to first $20 to second, $10 to third. The exhibit'ors in this class were:—

W E Todd, Geneva; Saunders & McGill, Stockwell, Ont; St Bazile le Grand, butter factory; Robert McGee, Pigeon Hill; Chicoine & Demarais, Alexis Chicoine, St. Marc; E. Desmarais, St. Lin; Boden & Wilson, [two entries], Montreal; Seminaire de Ste Therese; J M Joslyn, St Denis; Eugene Prefontaine, Longueuil; Napoleon Daigneault, Chambly; St. Bruno butter factory; William D Curran, Corbin; St. Julie butter factory; Louis Verroneau, Boucherville; Robert Hobbs, Odgensburg; A E French, St Bruno; Beaver Creek Creamery Co, Dundee; Chas Langelier, Montreal; Marcotte & Beaupre, St. Antoine; Robt Middleton, N Y; A Collete, St. Julie.

The Successful competitors in this competition were:—1st, A E French, St. Bruno; 2nd, Boden & Wilson, Montreal; St. Bazile le Grande Factory, Chambly.

In Class 38, Section 2, for the best two tubs of dairy made butter, not less than 50 lbs each, made at any time, three prizes are offered:—$35 to 1st: $10 to second, and $5 to third. No less than seventy-eight exhibits are made in this section, and the quality of cheese shown is very good. The list of exhibitors in this Section is—Olivier Beaudry, St. Alexis; H P Halls, Richmond Station; Olivier Clairemont, Louisville; J Fraser, St Andre; Robert Doig, Lachute; O Marion, St Jacques; C Telmore, St Armand; Robt Todd, St Andre; N P Emerson, Emerson; Geo Kydd, Petite Cote; Boden & Wilson, Montreal; S N Blackwood, Shefford; J G Papineau, Montreal; J C McOuet, St Andrews; Thos Morrin, Lachute; Jas Drummond, Cote Visitation; Cyrille Joly, Ste Rose; Robert Wood, Geneva; Duncan McGregor, St Andrews; W L Fagen, Frelighsburg; C R Whitman, Knowlton; W A Reburn, St Anne; J Evans, St Henri; B Smith, Ways Mills; Nelson Allwight,, St Andrews; Wm Logan Chateauguay; Jas McLaughlin, West Bolton; Robert Crozier, Lachute; W D Curran, Corbin; A Holden, St Armand; Urgel Cormier, L'Assomptihn; C W Lyster, Kindale; Geo Garvis, Pointe aux Trembles; J C S Carle, St Ursule; W S Baker, Durham; Fidele Perrault, L'Assomption; Andrew Walker, Lachute; Isabella Morgan, Bedford A Batchelor, Bedford; Thos Hunter, Venice; John Hay, Lachute; J A Dunning, Freligsburg; Chas Meunier, Rougemont; Louis Brosseau, St Hubert; James Dickinson, Trenholmville; Silas Baker, Danville; E A Davies, West Bolton; Thos Bell, Frelighsburg; A B Cushing, Danville; W H Martin, Wareham; W P Hillhouse, Knowlton; J A Parker, Barnstown; Isaac Balchoin, Coaticook; E Cleveland, Barnstown; Pat Brady, Walton; G C Hanson, Barnston; J R Bridge, South Stukely; Samuel Kowinton, Abercorn; Geo Howley, Abercorn; J B McDonald, Hammond Corners; T B Degrosbois, Boucherville; R E Fay, Abercorn; P Ekers, Coaticook; E C Feltmove, St Armand.

The successful competitors in this competition were:—1st, W D Currran, Corbin; 2nd, W A Rubin, Ste Annes; 3rd, G C Hanson, Barnston; 4th, Geo Howley, Abercorn.

Section 7 of this class is for the best three tubs factory-made butter, made at any time and place, not less than 50 lbs. each, and is open to Canada and the United States. The unusually large prizes of $100, $50 and $25 are offered for competition, and, will have the effect of attracting a marvellously fine show of the best butter. The exhibitors in this section are:—Saunders and McGill, Stockwell; Boden and Wilson, Montreal; W R Haise, Barrington; Eugene Prefontaine, Nap Daignault, Chambly; St Bruno Butter Factory; W D Curran, Corbin; E L Brintwell, Belleville; Robt Hobbs, Ogdensburg; A E French, St Bruno; Beaver Creek Co, Dundee; J M Joslyn, St. Denis; N E Clement, Maskinonge; H Austen, Lansdowne; G N Keeler, Malone, N Y; George May, Escott; A Purvis, Brockville; W H McKenzie, Pointe Fortune; A Chicoine, St Sauveur; Blex Thomson, Landsdown.

The successful competitors were:—1st, W R Haire, Barrington, Que; 2nd, A E French, St Bruno, Que; 3rd, Boden and Wilson, Montreal.

Section 8, same class, is for the two best tubs of dairy-made Butter, at any time or place, not less than 50 lbs each, $100, $50 and $25 prizes. The exhibits here are good, and the display affords another proof of the extent of the show in the dairy line. Boden & Wilson, Montreal; Thos Lorrin, Lachine; L B Whitman, Knowlton; W A Reburn, St Annes; W D Curran, Corbin; J O Carle, John Doight, Lachine; John Martin, St Andrews; Samuel Robertson, Abercorn; T A Parke, Barnston; W P Hillhouse, Knowlton; A B Cushing, Dixville; E A Davis, West Bolton; J R Bridge, South Stukely; Olivier Clairmont, Louisville; A Batchelor, Bedford; Andrew Walker, Lachute; H S Baker, Durham; E N Lyster, Kirkdale; Artemus Halden, St Armand Centre; Robt Crozier, Lachute; W J Hagar, Plantagenet; W L Fagers, Frelighsburgh; J C McOuet, St Andrews; W J Richard, Pigeon Hill, were the exhibitors.

The successful competitors were:—1st, W D Curran, Corbin, Que; 2nd, George Hawley, Abercorn, Que; 3rd, John Martin, St Andrews, Que.

The Judges on Butter were Messrs. Thos. Leeming, Alfred J. Brice, and Wm. Scrimgeour, who performed their arduous duties in the most creditable and painstaking manner.

The Judges for Cheese were Messrs John H Hodgson, N Y; T M Wells, DeKalb Junction, St Lawrence County, N Y; and Horton Chandler, Montreal. These gentlemen, who are unquestionably well qualified for the position, spared no trouble in arriving at the respective merits of the numerous exhibits upon which their awards were based, and their decisions were regarded as very satisfactory.

In Section 3, of Class 37, for five best tubs of coloured factory cheese made in the Province of Quebec, prizes $40, $20 and $10, the entries were numerous and the competition keen. The entries were 18 in number as follows:—E R Prieur, Coteau Landing; C D Jewell, Sweetsburg; K Crawford, Gentilly; Lemire & Proulx, Labaie; Lemire, Lahaie; Duguay, St Zephirin; Charles Langlois, Montreal; Joseph Tasse, St Jacques; L M and F A Blondin, St Francois du Lac; Boden and Wilson, Montreal; St Jacques Cheese Factory; W Tremblay, St Hubert; Franklin Cheese Factory; Chas Meunier, St Hubert; D O Bourbeau, Victoriaville; N S Clement, Maskinonge; P H Warrington, Montreal; H Field, Lyn. The successful competitors were:—1st, Charles Meunier, St Hubert, Que; 2nd, Jacob Ellison, East Farnham, Que; 3rd, Lemire & Proulx, La Baie.

Section 4, of the same Class, is for five best boxes of factory-made cheese [white], for which $40, $20 and $10 are offered. The exhibitors were:—E E Prieur, Coteau Landing; L M and F A Blondin, St. Francois du Lac; Boden & Wilson, Montreal; J B Tache, St. Pascal; Horace Herd, Huntingdon; Jno Riggs, Trout River; Durham Cheese Factory, Durham; Dewittville Cheese Factory; Huntingdon Cheese Factory; J W Toof, St. Armand.

The prize-takers were:—1st, L M and F A Blondin, St Francois du Lac; 2nd, Robt McKee, Pigeon Hill, Que; 3rd Newfoundout factory, Newfoundout, Que.

Section 5, same Class—best five cheese, dairy made, not less thaa 8 lbs. each. The exhibitors were:—J Brodie, North Georgetown; M Barier, Richelieu; N. P. Emerson, Emerson; J O McOuet, St Andrews; J Drummond, Cote Visitation; B Smith, Ways Mills; C M Lyster, Kirkdale; And Walker, Lachute; L Davies, Peterboro; J M Bridge, South Stukely; M Brenier, St Bazile le Grand; J W Todd, St Armand.

The prizes were awarded as follows:—1st, Moise Bernier, Richelieu, 2nd, A P Emerson, Brome; 3rd, James Drummond, Cote Visitation.

The Judges recommended in their report that the winner of the second prize in this class be requested to declare under oath that his exhibit was dairy make.

Section 9 were for five best boxes cheese made at any time or place, white or coloured, and open also to Canada and United States. The prizes offered were $100, $50 and $25. The exhibits were made by Joseph Masse, St Jacques; J Ellison, Lancaster; George Patterson, Lancaster; St Jacques Cheese Factory; Kelso Butter Factory; Kelso, Quebec; Walker Cheese Factory, Walker; Lakeview Factory, Lakeview; Selby Butter Factory, Napanee; Thos Empey, do; Robert Thompson, do; Boden & Wilson, Montreal; D Kennell, do; Chas McDonald, Cookshire; Franklin Butter Factory; Robert McKee, Pigeon Hill; J Moore, Dungarvan, T H Hodgson, St Antoine.

The successful competitors for the sweepstakes prizes were:—1st, Charles Meunier, St Hubert, Rougement, Que; 2nd, Walker Factory, Walker; 3rd, T H Hodgson, Cote St Antoine, Que,

The exhibition of Butter and Cheese, as we observed at the outset, was as fine as could be wished for, and of the latter probably as good as any exhibit ever made on the Continent. It will be noticed that our French-Canadian fellow-citizens are well to the fore in the manufacture of Cheese, the sweepstakes being carried off by Mr Charles Meunier, Rougement, in the County of Rouville, who also was awarded the first prize for Colored. The advantages of the Dairy Exhibit can scarcely be over-estimated, and, we may be allowed to add, that we trust the Permanent Exhibition Committee, next year, will see their way clear to offer even more liberal inducements to Exhibitors of Dairy Produce, than at the present Exhibition.

# Horticultural.

## OTHER FARM PRODUCTS.

THE FRUIT DISPLAY.

The exhibits in the Horticultural Department, according to the opinion of competent judges, surpass greatly in quality, as they certainly do in quantity, the shows of the three previous years in this line. This is especially observable in the fruits, which might successfully compete with the products of any part of the world.

Beginning with this class of exhibits, we are first struck with the really magnificent display of Grapes from the Beaconsfield Vineyard, shown by Messrs. Gallagher & Gauthier. The collection comprises about thirty varieties of this delicious fruit, and it has rarely fallen to our lot to see a display of the kind so thoroughly and uniformly satisfactory as this is. If this exhibit be taken as an example of the grape-growing capabilities of Lower Canada, we may expect in the near future to be independent of the world in this respect. Not the least noticeable feature is a quantity of fine Blackberries, the result of a second growth. Messrs. Gallagher & Gauthier, though not competing for a prize, have reason to be proud of their splendid collection.

We come next to the Professional Fruit Growers, exhibits. Among these Mr. Van Duzer, of Grimsby, shows a very fine collection of all kinds of apples, peaches, grapes and pears. Then comes Mr. R. J. Donnelly, of Rochester, with a show of the same fruits, very similar in quality and variety.

Messrs. Morris, Stone & Wellington, represent the Fronthill Nurseries, of Welland County, Ontario, and show another very fine collection of grapes in several classes. First we have a group of twelve kinds of red, white and blue fruit. Then comes a smaller group of black, and another of blue, forming altogether a very complete display.

Last among the professional exhibits, is that entered by the gardener of Mr. T. J. Hudson, of Montreal, another fine array of Grapes.

The next Department comprises the fruit shown by amateur growers, which compares favourably with the above mentioned professional exhibits.

Messrs. W. H. Nelle, A. H. Pettit, and W. Van Duzer, these gentlemen representing the Fruit Growers' Association, of Grimsby, send thirty kinds of pears, peaches, apples and grapes.

The Grimsby Fruit Growers' Association in conjunction with the Niagara District Fruit Stock Company, ship from Niagara to Grimsby daily about a carload of fruit. They also do a large forwarding business to Great Britain during the winter season. The section represented by this efficient Association is one of the most productive and profitable in Canada, a statement in which any one who carefully examines their collection will concur.

The next exhibit we come to, however, is by far the finest display of grapes, grown by amateurs. They come from the hands of Mr. Graham, of Ottawa, and are the object of universal admiration among the visitors.

Although the collections consist solely of Grapes, Mr Graham has forty different varieties, of every imaginable quality.

W T Taylor, of Rochester, and Mr Lewis, of Lockport, own an excellent stand, consisting of about twenty varieties in Apples and Pears. They show some very fine Bartletts, and are especially luscious fruit, called the B Hardy. Mr Taylor has the distinction of exhibiting the only specimen of a very rare Pear—the Goodale. Of Quinces, also, Mr Jas Taylor, and Mr Lewis are the only exhibitors.

The specimens of Apples,—Alexanders, Fameuses, St Lawrences and Duchesses, raised by gentlemen in or near Montreal, in the enthusiastic words of a judge in the Department, "could beat the world."

Mr Brodie produces some twenty samples of fine Apples, most noticable among which are the Empress Alexander and Duchess. Mr. Brodie shows one of the former, which measured 15 inches around. The Duchess is a variety especially suitable for growing in Quebec.

Mr. Edwards exhibits some very fine specimens of winter, summer and spring fruit.

These comprise, in all, one of the very best exhibitions of native fruit ever exibited in Montreal. The exhibits throughout are so generally good, and the defferent degrees of excellence so finely drawn, that to give one any great amount of praise above another would be unfair.

ROOTS AND VEGETABLES.

We next come to the Section allotted to Roots and Vegetables, which, though not so attractive to the eye and pleasing to the taste as the preceding Section's exhibits, are equally thorough and excellent. Mr. Edwards shows a collection of Roots which bear strong testimony to the efficiency of his gardening system. To particularize would be impossible, so numerous are the products of his industry. Every imaginable edible root needed for table use is here represented, and admirably represented, too.

Mr. Evans, confining himself to Potatoes, makes an exhibit of 32 varieties of the root. His collection is calculated to meet the most varied and fastidious tastes, and is pronounced the finest shown for a number of years previous to this.

Mr. Davidson's display of Garden Vegetables is also very fine. The collections of Mr. Edwards and the latter gentleman are by far the two finest in the hall.

A TREE COLLECTION.

We come now to a very novel display sent by John G Jack, of Chateauguay, consisting of complete specimens of every kind of tree seeds from our native forests. They are admirably arranged and carefully labelled, including about twenty species, which must have cost their collector a great amount of time and trouble, amply repaid, however, by their appearance on the table.

NATIVE WINES.

The Canada Vine Growers' Association make another exhibit almost without precedent, in an assortment of wines made from grapes grown in their vineyards. It consists of about twenty specimens, and in appearance compares well with the vintages of the wine-producing countries in the Old World.

SEEDS AND GRAINS.

The next department claiming our attention is that of Seeds and Grains. These, the most important products of any country, are numerously represented in every section. As the great number of these prevents our giving a very full description of each exhibitor's display, we will simply give the number in each Section, and the names of exhibitors whose contributions seemed to be more deserving of praise, until the official report of the judges is made public. Section 1—White winter wheat is represented by seven exhibitors. The best in this Section are those samples shown by D. Drummond, Petite Cote, and Thos. Irving, Montreal.

Section 4.—Red spring wheat is represented by 13 entries, which are all very good.

Section 5.—Two-rowed barley brings H McDonald, of Cote St Luke, and T. Irving, of Montreal, to the front.

Section 6.—Six-rowed barley is well represented by E V Judah, of Richby, and four other competitors.

Section 7.—Rye, embracing 7 exhibits, of which the best are those shown by Ed. Ferland, Berthier, and D Martin, sr, St Esprit.

Section 8.—White Oats has 18 specimens, of which the best are shown by Ant Lamarche, St Esprit, and H Papin L'Assomption.

Section 9.—Comprise black oats, of which the best shown are sent by D Martin, Sr, St Esprit.

Sections 10 and 11.—Different varieties of Peas. The best shown are by Jean Gagnon, Cote St Michel, and D Martin, Sr, St Esprit.

Section 12.—Tares has five exhibitors. Section 13.—White Field Beans has 7. Section 14.—Indian corn, in the ear, white, has 13. Section 15.—Indian corn, in the ear, yellow, has 11. In all these sections the exhibits of Ed. Ferland, Berthier, are remarkably good.

Section 16.—Timothy seed; and Section 17, clover seed, are well represented by Messrs. Marion and Beaudry.

In Section 18.—Alsyke clover seed, O Beaudry is the only exhibitor.

In Flax Seed the best exhibits are those by O. Beaudry and O. Marion.

In Hops there is a very fine show of five bales, all of excellent quality. The principal exhibitors in this line are Dawes & Co., Lachine, and B. Smith, Ways Mills. These more important sections under the department of seeds and grains are in every case well worth seeing, and in the less important sections the closest interest is maintained.

SUGAR BEETS.

In competition for the three medals offered by the "Un'on Sucriere Francaise," we have a very large contribution, from several competitors, of sugar beets, the excellence of which will be tested by chemical analysis. This department is most interesting and thorough in every respect, and the exhibits generally seem to be greatly appreciated by the vast crowds of visitors that throng the Hall.

# Industrial.

## SEWING MACHINES.

If anything could illustrate more strikingly the importance which this labour-saving contrivance has gained for itself, it would be the fact that in an exhibition as vast as the one now in progress, in which there is an almost variety of interesting objects displayed, it claims a distinct department for itself and a generous allotment of space. At the start it was up-hill work to make the public fully appreciate its utility and avail themselves of it; but now no one thinks of saying one word against its right to rank among the most useful inventions of the age, and in hundreds of thousands of families and thousands of manufacturing establishments its hum is daily heard. Several impediments which at first barred its way to public favour have been removed. At first it was an expensive article for a family of moderate means to acquire; now it is within the reach of persons of very scanty resources, and the arrangements for payments are made so elastic and easy that almost any one may make the investment without misgivings. Then, the increased demand has called out a spirit of rivalry among the various manufacturers, who, in their eagerness to excel not only cut their prices down as low as possible, but strain every nerve to introduce special improvements. Then, again, the introduction of the machine into factories, some of which have hundreds running constantly, has quickened the spirit of invention, and the general public get the advantage of this, as also in the cheapening of the cost of production which, as a matter of course, accompanies its extension.

The increasing progress that is going forward in the way of improved construction is well shown in some of the exhibits now on view. Two or three of the firms are inviting the attention of the public to changes which are only a fortnight or three weeks old—some intended to spare the operator, others to spare the machine, some to give the latter increased strength, and others to render its action smooth and quiet. And these improvements are not the result of a "spurt" induced by the approach of the Exhibition. They are going on all the time, and when one is beginning to think that surely perfection has at length been reached, something new and better is offered.

The leading manufacturing Companies are all well represented at the Exhibition. The space allotted to them is on the right hand side of the gallery of the main building. The visitor will have no difficulty in finding out where the department is, if, on reaching the head of the stairway leading from the principal entrance, he will pause for an instant and listen, for the not unpleasing whirr of a dozen or more busy machines will reach his ears and guide his steps. The several Companies, to whose vigorous competition allusion has been made, seem to get on very amicably in their present close association. They are all represented by gentlemen who have the good taste to content themselves with courteously pointing out to such as are curious what they claim as the distinctive merits of their respective machines. Not a word of depreciation of other contrivances escapes any one of them. So pleasant are their relations that it would not surprise us to see A lending B a sample machine on an emergency.

In noticing the several exhibits, it seems proper to begin with those which are native, and to take them in order of seniority. We believe that what is now known as the

THE LAWLOR MANUFACTURING COMPANY

is the development of the oldest Canadian establishment in this line. Mr. J. D. Lawlor, the founder of the concern, is well known in the trade throughout the world as one of the pioneers in this branch of manufacturing industry. The machines which are placed on the market are of his own invention and secured by letters patent. Though there are several classes they are all covered by the common name of "Canadian Singer Sewing Machine." The Company have their office and factory in this city, the former at 374 Notre Dame street, and the latter at 56 and 58 Nazareth street. At this stand there are about a dozen specimen machines, either working or in working order, and some of them are models of taste and elegance. But people do not buy sewing machines for their prettiness, although that is a desideratum in what has come to be an article of furniture—but for their sewiceability, and in this respect those who buy the "Lawlor" are not likely to be disappointed. It is equal to all the requirements of the household, we were assured by the gentleman in charge, and from the specimen of work done while we were collecting our information we should be inclined to fully credit the statement. One of the machines, the one most in favour for family purposes did marvels in the way of fine work, unriting two pieces of very fine gauze, so perfectly that the seam was scarcely apparent, and also did marvels in the way of heavier work. The Lawlor Company are now manufacturing a machine, with an improvement which will be highly appreciated in the household. It is on the Singer principle, but the arm is raised so as to admit of bulky materials being more easily handled. This improvement will be of immense value in machines intended for tailoring and general manufacturing. A further recommendation for the latter purposes is their astonishing strength. It is hardly credible that a thin needle should penetrate through three thicknesses of tin and three of rubber, placed in alternate layers, the whole being from three-eighths to one-half of an inch in thickness. Still more astonishing that it should not only pierce them but attach them with rows of stitching as even as the deft hands of a skilled needlewoman would execute. As the reader, perhaps, knows, tin and rubber are the very last substances which should be selected for an easy test. The Lawlor can perform feats like this, and we do not suppose that a machine equal to a demand of this sort would. The special merits claimed for the Lawlor Family Sewing Machine are:—Simplicity of construction, easy control over the upper tensions, dispensing with change for any kind of ordinary family work; light running and almost complete noiselessness; adaptation to any kind of work; the best treadle ever attached to a sewing machine; durability and adjustment for taking up the "lost motion" in all the wearing parts; an arrangement for filling the bobbins without running the entire machine; adjusters for shortening or lengthening the stitch, to all which may be added ornate design and skillful workmanship throughout. Another machine of Canadian origin, as regards its special features, is manufactured by the

C. W. WILLIAMS MANUFACTURING COMPANY.

The stand occupied by this concern is one of the most tastefully arranged and decorated in the Exhibition, and well repays the pains and expense which its adornment must have involved. The establishment has its headquarters at 347 Notre Dame street, in this city, and is under the management of Mr. D. Graham. The factory is situated at St. Henri, and is always fully worked. There are twelve specimens of the work turned out by the Company, and all that we have said in commendation of the exhibits of other firms may be repeated here, that is to say as to strength of construction and beauty of finish. The Company, we were informed, manufacture several styles of sewing machine. One is named the Genuine Williams Family Machine, of which there are several varieties—the plain, the improved with case, the double drop leaf, the improved half cabinet. These are all intended for family use, and from so large a scale a buyer who approves of the principles on which the machine is constructed should have no difficulty in making his choice. In addition to those named here, is the Williams No. 2, which is mounted on a strong iron stand, and is adapted to all kinds of heavy work, such as tailoring, boot and shoemaking, carriage trimming, saddlery, bag-making, and so forth. There is another, the Improved Medium, which is suited for heavy work, but equally so for fine work. Larger than this is the Williams No. 4, which is pronounced one of the best tailoring machines offering. The Company are not behind their rivals in availing themselves of the latest improvements that are presented. Among these are the self-threading, take-up and needle clamp, by which this machine is self-threading, thus avoiding the necessity of passing the thread through several small eyelets or holes. What is specially claimed for the Williams' in all its varieties is:—The best material and that only; the use of finely tempered English steel in all essential working parts; durability; self-threading; the bobbin winder; light and noiseless running and superior cabinet work. Another of the stands is occupied by the

WHEELER AND WILSON MANUFACTURING CO.

The name of this firm is not only familiar in every part of Canada in connection with this industry, but is well known in every part of the civilized world—a fact which speaks for itself as an evidence of the excellence of the machines with which the name is identified. Their factory at Bridgeport, Conn., is an immense establishment, and is all the time in full blast. There are branch offices in all the large centres of population. The one in this city is under the management of Mr. Kruse. There are seven specimen machines displayed at the Company's stand at the Exhibition, and they attract a good deal of attention from passers-by; in fact, so continuous was the call for information, that the obliging representative of the concern was kept busy the whole time. He found opportunity, however, to direct our attention to the leading features of five machines which are specially in favour with the manufacturing and general public. One of these, No. 10, is adapted best to tailoring work and the like, and can be operated either with or without steam. No. 3 is a machine of lighter construction and suited for family use. The new No. 8 is a popular machine of the same class. No. 6 cylinder is made specially to meet the wants of leather-workers.

R. M. WANZER & CO.,

for which firm Messrs. Willis & Co. are the Quebec Province agents, with offices at 404 Notre Dame street, are also in the field. They need no words of introduction to the Canadian public, for their machines—stretching a time-honoured maxim a trifle—may be said to have been scattered broadcast over the world, and gained exceptional honours at many of the leading competitive exhibitions, to one or two of which reference may be made later on. They are now manufacturing a variety of machines, only one of which is constructed on the old cog-wheel system, the one that was once so popular, the "Little Wanzer." In all others the firm have completely done away with the cog-wheel gear and cams, which results in the machine running without noise. Additional strength is also given by the use of steel fixings. One great feature of the machines now manufactured by the firm is that all the parts are adjustible, so that they can take up the "wear," or as it is technically termed, the "lost motion;" in other words, by simply giving a turn to a screw the power lost by wear and tear is made up. The arm is also placed higher so as to give larger space between it and the table, a convenience which will be highly appreciated by those who have been using machines of the old type. An oil cup is attached to the needle-bar, which effectually prevents soiling from that cause when white material is being operated upon. An automatic bobbin winder is another feature of machines of recent make, a contrivance which the Company have patented in Canada, the United States and Great Britain. It is an invention of much value, as it insures perfect accuracy in the paying out of the thread. Among the most popular of the Wanzer family of sewing machines, are the C, which is best suited to family use; the D, which is largely in use in tailoring establishments, and the E, which is made for use in leather working. Six of the machines are worked by treadle and one by hand. As an illustration of the strength of the machines constructed for heavy business we may say that we had the handling of a specimen of what had been done by one of them, which consisted of half an inch of lead and two thicknesses of leather, which were firmly stitched together; it was a marriage past all possibility of divorce. A less convincing proof of the power of these machines was the exhibition of the lid of a cigar box, which had been sewn through till it looks more like a piece of ladies' work than anything else. Another noticeable feature is the introduction of the reversible feed, which admits of its working backwards and forwards so as to do the most astonishing darning that ever eyes rested on. Mr. Wanzer has received, in addition to other honours, the unique distinction, so far as British subjects are concerned, of receiving from the Emperor of Austria the honour of Knight Cross of the Order of Francis Joseph of Austria. The firm gained the only gold medal given at the Philadelphia Exposition for sewing machines.

## TEXTILE FABRICS.

This is one of the most complete classes

in the Exhibition. A view of it in a general way gives the visitor an idea of the amazing magnitude and extent of our manufactures of woollen and cotton fabrics. The products of some of the mills, as shown by the large and varied assortment of tweeds are equal, at least so experienced judges have asserted, to those that are imported from Scotland and the west of England, and might fill the heart of any Canadian with pride.

**MESSRS. D. MORRICE & CO.**

have a very large exhibit in this department, 160 feet of space having been allotted to them in the west wing of the main building. Their exhibit comprises a great variety of cotton goods from the Valleyfield, Hochelaga and Stormont Cotton Mills, and also the products of about thirty woollen mills, consisting of tweeds, flannels, blankets, yarn, men's ladies' and children's knitted underclothing, tucques, mitts, gaiters, shawls, hosiery in all styles, etc., etc. Hanging on the walls are a number of quilts, the centre of each having a representation of the Main Exhibition Building at Toronto. Among the manufacturers represented by Messrs. Morrice & Co. are the Auburn Woollen Company, of Peterborough; Moorhouse, Dodds & Co., of Glen Tay; W. H. Wylie, of Carleton Place; Thomas Despond, of Credit, Ont.; John Penman, of Paris, Ont.; the St. Hyacinthe Manufacturing Company, and D. Kitchen, of Canning, Ont. The display of shawls from Messrs. Wylie & Co's establishment, at Carleton Place, is the only one of its kind on exhibition, and is well worth an inspection by all visitors to the Exhibition. The assortment is a very large and choice one, and comprises the Donald, Victoria, Campbell and Mackenzie plaids. The assortment is, without doubt, the finest we have ever seen. Messrs. Morrice & Co's. exhibit of cottons, from the Victor Hudon Cotton Company, are also worthy of special mention.

**THE PATON MANUFACTURING COMPANY OF SHERBROOKE.**

The exhibit of this Company is one that not only reflects credit upon the Company itself, but on the entire Province of Quebec. A close examination of this exhibit will show to the astonished visitor tweeds of such a variety and excellence as few were aware were produced in this Province. There are about 200 pieces of tweeds, all their own manufacture, including nap coatings, beavers, presidents, diagonals, royal yachting cloths, indigo blue and black. In addition to the tweeds, there is a very handsome display of railway rugs, such as are used in the Pullman cars. They manufacture all the rugs for the Canadian railways. They also display a fine assortment of plain, twilled and coloured shirtings, as well as shoe felt cloths for boots. This firm employs about 600 hands, and Messrs. F. Stephens & Co., of St. Helen street, are its agents in Montreal.

**MESSRS. GAULT, BROS. & CO.**

show a fine assortment of Canadian tweeds of all styles and varieties, included twilled, hair lines, diagonals, Halifax make, trouserings, fancy Scotch suitings, buckskins, etc. One hundred and thirty different patterns are exhibited. They have a very fine central space in the main building, and have arranged their goods in the form of two pyramids which have a very fine effect, and sets off the exhibit to good advantage. It is a thoroughly representative exhibit of the fine woollen manufactures of Canada, and would be taken anywhere for real Scotch tweed. This firm took first prize silver and bronze medals at the Paris Exposition in 1878, first prize gold medal at the Dominion Exhibition at Ottawa in 1879, and first prize at the Dominion Exhibition at Montreal last year.

**MESSRS. MILLS & HUTCHINSON.**

The exhibit of this firm is attractive and well arranged. They display an excellent variety of tweeds from the finest to the more medium qualities. They exhibit the first piece of worsted goods ever made in Canada, which was manufactured at the Rosamond Woollen Mills, Almonte, Ont. Its manufacture was attempted more as an experiment than anything else, but as the experiment has proved so successful its manufacture will be continued. The display also includes a roll of fancy etoffe, and a general line of tweeds and fancy goods.

**MESSRS. CANTLIE, EWAN & CO.**

exhibit a splended line of flannels, manufactured by Messrs. A. Lomas & Son, of Sherbrooke, for whom they are agents. They comprise white, grey, coloured and fancy check flannels of all kinds. This firm took prizes in Toronto in 1880, at the Centennial in 1876, and four prizes in this city last year at the Dominion Exhibition for these flannels, which is not to be wondered at, for certainly a finer exhibit of flannels, both as regards price and quality, we have never seen. Messrs. Cantlie, Ewan & Co. also display a fine assortment of woollen blankets, manufactured by the Cornwall Manufacturing Company. The assortment includes white blankets of fine Saxony wool, which is manufactured in Cornwall out of imported wool, and the medium or Canadian wool blankets, which are very superior, in fact, one of the finest line of blankets on exhibition. There is also the Union and the Mackinaw blanket, the latter of which the firm have been supplying to the Hudson Bay Company and Canadian Government, and lumbermen's blankets. They also exhibit a magnificent selection of tweeds from the establishment of Messrs. Elliott, Shirieffs & Co., of Almonte, Ont., which were entered only for exhibition, being received too late for competition. They were only taken from the Toronto Exhibition at 6 o'clock on Thursday night, and arrived in Montreal only Friday morning. Every one visiting the Exhibition should not fail to visit the exhibit of Messrs. Cantlie, Ewan & Co., in order that they may see and judge for themselves to what a high state of perfection our manufactures have attained.

**MESSRS. H. SHOREY & CO.**

exhibit a large and varied assortment of ready-made clothing, comprising men's, youths' and boys' overcoats, ulsters, and suits. They also show a splendid line of flannel shirts, and a large assortment of ladies' ulsters, jackets and dolmans. They display some of their trophies and medals won at Philadelphia in 1876, at Paris in 1878, at Sydney, New South Wales, in 1877, and last year at the Dominion Exhibition in this city. This firm employ over 1,500 hands in the manufacture of ready-made clothing. With this exhibit there are a couple of military head-dresses made by D Morgan & Co., Quebec. The leading qualities of these head-dresses are that they are not cumbersome in weight, and will serve for both fall and winter wear. Messrs. Shorey & Co. occupy a space of thirty-five feet by fifteen feet, and have the top of their show frame set with flower pots, which sets off the exhibit exceedingly well.

**MESSRS. T. J. CLAXTON & CO.**

exhibit a magnificent assortment of corsets, manufactured by the Crompton Corset Company, for which they are agents. The display is beatifully arranged on plaster Paris busts of all sizes. They show fifteen different lines, including the patent of flexible hip corset. The stitching of these corsets is all done by hand, the satteen and couture being very richly finished. The Crompton corsets received a gold medal at the Exhibition in Toronto last week. This firm also exhibits a fine assortment of silk and wool hosiery, skating mitts, &c., manufactured by Messrs. L. Buck & Son, of Farnham, for which they are also the authorized agents.

**MR. WILLIAM SAMUEL**

makes a magnificent display of manufactured furs, ladies' and gentlemen's garments, sleigh robes, caps, etc. This is one of the finest exhibits in furs that has ever been made in Canada. The show of mats is very large, on some of which are placed with much taste, fox, lynx, bears and wolfs' heads, especially noticeable being a large Persian lamb mat, in the centre of which is a fine leopard with stuffed head. The whole of the work of this mat was done in the workshop of the establishment, and reflects much credit on Mr. Samuel. There is a fine assortment of gentlemen's overcoats in Persian lamb, plucked beaver, seal, South Sea seal, trimmed with otter, cloth trimmed with sea otter, with civit cats' lining, and one (which attracts much attention) in natural South Sea seal, trimmed with raccoon. A seal dolman, trimmed with sea otter, looks very pretty. There is also a dolman of Satin de Lyon, trimmed with silver fox and lined with royal ermine, a circular of the same with grey squirrel lining, a Sicilian silk circular, lined with squirrel lock and trimmed with snowflake Chinchilla, a Sicilian silk Dolman, lined with grey squirrel and trimmed with black fox, a silk circular lined with royal ermine and trimmed with sable, and a lady's mink sacque. A lady's sacque in Persian lamb, with cap and muff to match, makes up a very neat set. There is also a large assortment of ladies' and gentlemen's fur gauntlets, and children's fur clothing. A fine Chincilla muff and boa is very pretty. This collection includes also royal ermine, South Sea seal, Canadian mink, Alaska sable, &c. A glass case contains military caps and hats for summer and winter wear. The exhibit of ladies' fur caps is very fine. Some idea of the value of this magnificent collection may be had from a statement that they are worth about $10,000.

**MESSRS. LORGE & CO.**

display a fine assortment of hats of every description, including French silk, plush beavers, felts, pullovers, and waterproofs. The manufacture of the waterproof hat is something new in this Province. They also exhibit some military head-dresses of their own manufacture, which are specially adapted to Canada. The whole assortment is most artistically arranged in a beautiful glass case, and is one of the best displays in the Main Building.

Mr. C. F. Beauchening, of Marieville, P.Q., exhibits a case of ladies', gentlemen's and boys' hard felt hats, and also ladies' and gentlemen's soft felts. An interesting feature is a display of felt in a raw state, before being put through the compressing process.

**THE DOMINION OIL CLOTH COMPANY'S EXHIBITS**

is such as will astonish Canadians as a class, and many Montrealers who are not aware that this important branch of manufacture has attained such perfection in their midst. Particularly noticeable in the display are two magnificent pieces of oil cloth, 24 feet wide. They also exhibit oil cloth, one yard wide, of every description, there being over 100 pieces altogether, at prices varying from 27½c. to 95c. per square yard. The lignoleum which they manufacture for floors is eight yards wide, which is the widest piece of goods manufactured in this country. The largest pieces are made in twenty yards in length and eight yards wide, without a seam, the thickness varying from good thin paper to one-quarter of an inch. The whole exhibit is displayed in pyramid form and makes a good show.

**THE BRITISH AMERICAN DYEING COMPANY**

make a really splendid display of re-dyed goods. They show silk dresses, rugs, ribbons, brocatelles, &c, dyed in all imaginable shades, even from a darker to a lighter shade The Company do a large amount of garment and piece work, and have recently made a new departure in the business by undertaking the dyeing of piece goods. It is without doubt the best exhibit of this class of goods that was ever made in the Dominion, and it serves to show what wonderful progress has been made in this important industry. The Company have been awarded a bronze medal for wholesale work, and succeeded in carrying off the first prize for job work at the Toronto Exhibition this year. They have also received seven diplomas at previous exhibitions.

**MR. J. J. MILLOY,**

of St. Joseph street, has a fine exhibit of ready-made clothing. The garments, which are set up on figures and most tastefully arranged, present a finished and artistic appearance. A suit made from Canadian cloth was much admired, as was also an overcoat made from Canadian cloth. He also exhibits a lady's cloak, gents' and boys' suits, woollen goods, etc. The material chosen, and the style and finish of all these garments are such as to mark the goods as first-class. His exhibit faces the main entrance and attracts the attention of every passer-by.

**MR. I. A. BEAUVAIS**

also displays a fine assortment of ready-made clothing and gents' furnishings. He shows a large variety of gents, youths' and boys' suits, overcoats, etc., of splendid make. A boys' kilt suit and an evening coat, of first-class manufacture attracted much attention.

The Boston One-Price Clothing Store makes a creditable display of ready-made clothing, in which good finish and economy of manufacture are the leading features.

Mr. A. Grundler exhibits a few articles of gentlemen's clothing which are of excellent make. The overcoat and dress suit are fitted on dummies.

Messrs. Turnbull & Co., show a fine assortment of cotton wool and merino hose, ribbed and plain. A special feature of the hose is that they are made double at the toes and heels, the misses' and boys' hose being double at the knees. Their exhibit is nicely arranged in a large glass show-case, and looks exceedingly well.

Messrs. Rankin, Beatty & Co. who are agents for the Richelieu Woollen Mills, Chambly, Que., exhibit a very nice display of grey and coloured flannels.

Mr. John S. Shearer, agent for the Sorel Wadding Company, displays a variety of wadding.

Mr. E. W. Mudge, who is the Montreal representative of the Arlington Rubber Works and the Boston Rubber Company, exhibits a variety of rubber goods, including overcoats, zephyr circulars, etc.

Messrs. Adams, Hackland & Co., of Paris, Ont., exhibit a really fine assortment of gentlemen's under-clothing of every description.

Messrs Lowd and Draper, of Moss River, Compton, show a variety of driving gloves and mitts and a number of well finished buck-skins. Their agents in Montreal are Messrs. L. I Boivin & Co.

Mr. M. Maloney, of Montreal, exhibits an assortment of buck-skin gloves and mitts. The kid gloves are very handsome and in great variety. The skins are also shown from which the gloves are manufactured. The whole exhibit is very tastefully arranged in a glass case.

Messrs. Collins & Co., of Montreal, display an assortment of cotton, linen and jute bags, salt sacks, etc.

Messrs. J. M. Corliss & Sons, of Troy, New York, make a beautiful display of gentlemen's collars and cuffs. These goods, for excellency of finish and beauty in design and shape, have been specially noticed by the Judges.

**MESSRS. WILLIAM PARKS & SON,**

of St. John, N.B., exhibit a splendid assortment of white and coloured cotton yarns, from the coarsest to the finest grades, comprising manufacturers' knitting cotton, fancy wool shirtings, bleached white and coloured double yarns, ball knitting yarns, beam warps for woollen mills, fancy shirtings, etc., etc. They have been awarded prizes for their exhibits for many years, including a gold medal in Montreal in 1880, and they continue to make every improvement that the advancement of the business requires.

Mr. John Wardlaw, of Galt, Ont., also makes a fine display of cotton yarns, including four-ply white and dyed, merinoes, foreign wool, stocking yarn from Canada wool, hosiery, tweed yarn, etc., etc.

**THE CORRIVEAU SILK MILLS**

make a splendid exhibit of their manufactured silks, handkerchiefs, ribbons, and silk goods of every description. The exhibit is placed in a beautiful glass case, handsomely fitted up near the front entrance to the main building, and looks very pretty. It attracts the admiration of all visitors, as they enter the building. The process of manufacture can be seen in the Machinery Hall.

**J. M. DOUGLAS & CO.'S EXHIBITS.**

A very noticeable feature in the present Montreal Exhibition is a display of carpets and rugs from Turkey, Persia and Hindostan, contributed by Messrs. J. M. Douglas & Co. However great may be the differences in quality amongst the carpets and rugs from the countries mentioned, they are for the most part all made upon the same principle, and that one of great simplicity; but which yet affords the means of producing a more perfect, beautiful, and durable description of carpeting than any other mode of manufacture recently discovered or introduced. The manufacture is not carried on in any large establishments like those of London, Wilton and Kidderminster in England, or like those of Aberdeen, Glasgow and Kilmarnockin Scotland, where carpets are designated by the names of "Brussels," "Velvet-pile," "Axminster," "Kidderminster" and Tapestry; but it is carried on in pastoral districts, where it is combined with operations of that nature, and engages a portion of the time of the families employed in agricultural and pastoral pursuits. The work is done entirely by hand, and each tie passes across the face of two warp threads round the back, and has the ends drawn up between them. When a row of ties has been completed, a shed is formed in the warp, and the shoot is then passed across from right to left, and returned, binding the whole together, and is beat down to a horizontal level by the hand-beaters. Upon this plan carpets of the largest dimensions are made in one piece. No intricate machinery is employed. The loom simply consists of two perpendicular pieces of wood, fixed at some distance apart, which support a beam or roller; at the top, upon which the warp or chain is wound, and about two feet from the floor, is another similar beam, upon which the carpet is rolled as it is made. The most costly and magnificent European carpets are made upon the same principle as those above described; those sent out from the manufactory of the Gobelins are made by the same process of weaving as the ordinary Turkey carpets. We may be pardoned if we halt in our description, but we are impelled to do so, when we consider the total absence of such an industrial pursuit in the Province of Quebec. Surely in point of education, intelligence and handicraft, the Canadians are not one whit inferior to the Turks, Persians and Hindoos, who, like the dwellers on the banks of the St. Lawrence, are exercised in pastoral pursuits during the months devoted to agriculture. Again, the climate of the Province of Quebec is not so enervating as that of the rural districts of Turkey, Persia and Hindostan. And, although the Canadian farmer may not have such large flocks of sheep as the pastoral tribes of the East, neither wool of so fine a quality as that produced in Persia, nor as that of the celebrated Kashmir wool, yet, judging from the marked superiority of woollen fabrics now made in Canada compared with those exhibited at the great Exhibition, 1851, which brought forth from the Jury of Class XII. the following terse and laconic notice: —"Canada shows but few woollen goods" —there ought to be wool of a sufficiently good quality for the manufacture of hand-made carpets. Is there an absence of energy and industry upon the part of our pastoral population? Is it for the want of some guiding spirit to lead them into the paths of home industries, or of some economist to encourage them in other handiwork than spinning? It cannot be for the lack of machinery, such not being required. It cannot be for the lack of schools of design, the carpet and rug makers of Turkey, Persia and Hindostan have neither Art Galleries, Boards of Arts and Manufactures, nor Decorative Art Societies to guide them, yet the design and colour of their carpets are especially worthy of notice, and may be studied with a view to imitate their beauties by the carpet manufacturers of England and France. The different shades and colours used in the various rugs exhibited by Messrs. J. M. Douglas & Co., is almost unlimited, yet they are sober in effect by contrast, for when the bright reds are introduced there is such a just and harmonious introduction of other colours which make them beautiful in taste; again their patterns are infinite, no two exactly alike, and are much preferable from an Æsthetical point than the elaborately coloured designs with large flowers and scrolls which we too commonly see in our houses and shop windows, possessing no contrasting and harmonizing tints, no negative colouring; but possessing novelty which is fashionable, though all true principles of art are outraged thereby. Not that we desire to suppress novelty, since true novelty is not an extreme characteristic of the present time, but we do not want novelty at the loss of simplicity, and where the principle of flatness is totally disregarded, and the broken texture of surface entirely done away with. Amongst the exhibits of Messrs. J. M. Douglas & Co. there are some "*Bokharas*" peculiar in pattern, low in tone, adapted to almost any surrounding or position. As the light falls upon them they change colour like the cameleon. From the cost in labour and the extra quality of the material, these are necessarily costly, nevertheless they are enduring in texture, their beauty will not fade, neither will familiarity with their design excite a wearisomeness or loathing. Some of the large rugs are beautiful beyond description, and are sufficiently large to come under the designation of carpets The "*Onchas*" and "*Daghestans*" are deserving of especial commendation. In the limited nature of a newspaper review, it is impossible to give a detailed description of these carpets; they must be inspected and studied, the more so the better will they be appreciated. About 500 of them will be offered at public auction at the old Bonaventure Hall, Victoria square, on Wednesday, the 28th inst.

**SPOOL COTTON.**

One of the most prominent features of the present Exhibition, is the taste and tact with which exhibitors display their wares. In some cases, very surprising and pleasing effects are produced by the ingenious disposing of unpromising materials. For example, there is nothing less likely to lend itself to artistic effect than a saw; yet one of the most striking objects of this year's show, is an arrangement of saws—straight, circular and of divers and sundry descriptions, in devices which attract the admiration of all by their ingenuity. But, even surpassing this display, in tastefulness, is the large glass case—we were about to say pagoda—which contains the exhibits of Messrs. John Clark, Jr., & Coy's almost endless variety of Spool Cotton, popularly known as Clark's M. E. Q. Spool Cotton, for which the firm of Messrs. Walter Wilson & Co., acting as agents for the manufacturers, have established so high and solid a reputation in Canada. There is nothing less pliable for the uses of decoration than a reel of cotton, let its quality be what it may, yet Clark's M. E. Q., is a perfect trophy, of which every passer-by takes notice, and is pleased. The design is hard to describe in words, but an idea of it may be had when it is said that from the four corners of the case slender columns of spools of cotton, arranged so that the colours harmonize, bend in graceful curves to a common meeting point at the top, a height of over four feet. The effect is really beautiful The central space is occupied with a tasteful decorative arrangement which, pleasing to the eye, defies description. The case is one of the most attractive objects in the Exhibition, and reflects great taste on its designer. As to the merits of the article to which attention it thus pleasingly drawn, it is unnecessary to say one word. It has fully established itself, firmly and lastingly, in the public approbation. To trace the history of this manufacture would be too long, but not uninteresting.

Among the first of the large manufacturers that engaged extensively in this industry was the late Mr. John Clark, Jr., the founder of the firm of which we are speaking, who came to Glasgow, Scotland, in 1816, in consequence of his mills at Paisley being destroyed by fire. He there, by his great business ability, experience and skill as a manufacturer, laid the foundation of the large and extensive business that now, under the style of John Clark, Jr., & Co., extends, through the sale of their six spool cotton, to all the markets of the world. The mills at Mile-End, Glasgow, are extensive and imposing in their dimensions, and stand on an area of many acres of ground. Some idea of the extent of the business here being done may be gathered fr m the fact that their trade requir s the production of 80,000 thread-twisting spindles, and the daily employment of 1,100 hands.

Among the Coloured Threads of this firm are Spanish linen, linen drab, clover drab, steel drab, mid, quaker drab, dark quaker drab, steel slate, Saxon blue, light slate, new, mid slate and blue slate. Their White Thread is a staple article. The time cannot be far distant when this will be one of the staple manufactures of Canada.

### PIANOS.

**THE NEW YORK PIANO COMPANY**

have a pavilion in the centre of the Crystal Palace, which is prettily decorated with bunting and flags. On this pavilion stand some of the celebrated Weber pianos, and it is on the Centennial Grand Weber, which is placed there, that the daily recitals, by Mme. Carreno, Oliver King, Miss Muller, and Mr. Septimus Fraser, take place, by special authority of the Exhibition Committee. The Weber Piano was chosen over all others as the one on which these daily recitals should be given. The same preference was given to it at the Centennial in Philadelphia in 1876. The Weber Pianos were not placed for competition this year, having attained a world-wide reputation. The other exhibits of the New York Piano Company are placed up stairs, at the north end of the building. They show several different styles of the Weber Pianos—Grand, Square and Upright, Baby Grand, and one Cabinet Grand, which is very handsome. They also show specimens of their cheaper Pianos, including two instruments from Mr J P Hale, of New York, in handsome rosewood cases; one from Mr R S Williams' manufactory at Toronto, which is acknowledged to be the finest Canadian Piano made; handsome Upright in Ebony and Gold, from Heintzmann & Co.; two fine Pianos, a Square and a Cabinet Grand from the old established and reliable firm of Vose & Son, of Boston, and also some of Decker & Son's Pianos, of beautiful finish and refined tone. They also show a variety of Organs comprising three specimens of Bell & Co's [Guelph] Cabinet Organs, which took a first-prize at the Dominion Exhibition at Montreal last year, and the Doherty & Co Organ, which is now shown for the first time. The New York Piano competed last year, and took first-prize for Grand Pianos, first-prize for Up-right, Special Diploma for Square, also first-prize for Cabinet Organs. This year, at the request of Mr. Shaw, Mr. Weber supplied several of his Pinos, merely for exhibition, not for competition, having competed last year and taken first-prize on all. The central pavilion attracts an admiring crowd every day, especially when the melodious strains of the Centennial Grand Weber are heard.

**MESSRS DE ZOUCHE & CO**

show Decker Brothers instruments—now so famous—in all their glory.

Decker Brothers manufacture the three varieties of the Piano-forte, namely, the Grand, the Boudoir, or Upright, and the Square. Their Concert Grands are deemed unsurpassed in power and beauty of tone, and faultless in action. The splendour of their tone, and other prominent qualities, have been made the subject of many appreciative articles in the public press. A magnificent specimen is on exhibition. The Parlour Grands are reproductions of the Concert Grands, differing only in size. Symmetrical in form, and elegantly finished, the Grands of this pattern constitute a most attractive addition to the tastefully furnished drawing-room. The Upright or Boudoir Piano has of late years become exceedingly popular. It is admired on account of its tasteful appearance and compact construction, occupying as it does the least space of any of the four styles of piano-forte now in vogue A splendid sample of this is also on view.

The Square Piano-fortes, introduced by Decker Brothers in 1862, possess patented improvements not found in other pianos. Their superior merits first brought the name of Decker into favour with the public, many have been sold within the past few years, and have given the fullest satisfaction. This style, too, has a very fine specimen to represent it.

THE PONY GRAND, as the last creation of Decker Brothers, and being the youngest born, is a pet. The action is the same as the Concert Grands, and is under such complete control of the artist that he can graduate the power and volume of tone to the utmost limit of expression. We cannot close without a word of praise to the fair girl who played so charmingly on the Decker Brothers Pianos. She had not the sledge hammer force and muscle of some of her neighbours, but for soul and sense and beauty of interpretation Miss Saxe showed that she is following in the footsteps of the great artists.

**MESSRS. LAVIGNE & LAJOIE,**

are Agents for Messrs Sohmer & Co.'s Pianos. They exhibit one of these Instruments, which are all handsomely finished, and, judging from the crowded state of the avenue leading by their space, when any person is performing on the Sohmer semi-grand, they have a great many admirers. Messrs Lavigne & Lajoie receive first prize for their Upright Sohmer, and Diploma for the Semi-Grand, as being of special excellence.

**MESSRS. LAURENT, LAFORCE & CO.,**

of Notre Dame Street, are Agents for Wm Knabe & Co's Pianos, and also for the Pianos manufactured by Messrs J & C Fischer. They show two Square and one Upright of the Knabe Pianos. These Pianos have been before the public for over forty years, and in that time they have been steadily growing to a prominent position among the best Pianos made. The firm of Knabe & Co claim that their Pianos unite every advantage of the best Piano produced, and, also, that they contain every valuable improvement science has suggested, including a number of their own inventions. Two Uprights, manufactured by the Messrs Fischer, are exhibited. A special Diploma, for general excellence, has been awarded to Messrs Laurent, Laforce & Co, for their Fischer Uprights, and a first prize for their Knabe Pianos.

### THE ARTS DEPARTMENT.

The appointment of Lord Lorne to the Vice-Royalty and his being accompanied to his new and vast field of labour by his wife, the daughter of our gracious Queen, has given a salutary impetus to Art. Their personal and earnest efforts to make the Fine Arts a special feature of Canadian life, the countenance and encouragement they have given to Canadian talent, the desire always shown by them to make the outcome of Canadian skill with brush, pencil or crayon, conspicuous to all the world in its full excellence, have had a wonderful effect already. Till of recent years the Art of Canada has been accidental in its birth, sporadic in its manifestations. Now, through the assistance furnished, there is a cohesion among the "limners," and, though perhaps remotely, the chance of the erection of a Canadian school which shall vie in distinctness and probably in actual artistic excellence with the other schools which are too familiar to all who take an interest in such matters to be named. We do not say that the indications of such a glorification of Canadian Art are very brilliant as yet, but there is enough in the subject of the exhibit made to suggest the thought that those whose works are shown are generally verging towards one point, and that in course of time what we have spoken of will be transformed from a prediction into a fact. The homogeneity of Canadian Art is sure to keep pace—true and steady—with the growth of Confederation, and the blending of the many races of which our nationality is made up. This drawing together is a natural result in the world of Art, when a drawing together of a political nature has taken place or is in progress. What we took forward to, and we do so with great confidence, is the creation of a school as entirely distinct from every other as that of Rubens is from that of the Van Eycks, or that of Raphael from that of Vandyke—a school which shall be Canadian pure and simple, not semi-Flemish, or semi-anything else—but Canadian. The best of the exhibits displayed on the present occasion are in subject treatment, and all other respects Canadian, a fact of which we are glad to take note, and one indication that we shall not fail in our expectations, or rather our predictions of the future in this our land of promise.

Oil Paintings by professional artists occupy the post of honour in the Gallery, and we are glad to see among the exhibitors so many who have long stood high in the public regard. We miss a few names, but their absence must be taken as a thing of necessity. Death is unsparing with the votaries of Art, and the necessities of individuals of a class so disposed to wander as artists are, and, for the matter of that, should be—causes the lapses of which we complain Still in this class there are a number of those among us who have devoted their lives to Art and for the most they have sustained previously well-earned reputations Among those we miss are Messrs. Sandham and Fraser. The exhibits of Oil Paintings by professional artists is very good. It is impossible to praise too highly Mrs. Edwards' choice exhibits. Of these we give the preference to the panel painting of lilies, the delineation of which, both in leave and flower, are simply perfect. Mr. A. Boisseau gives three specimens in the portrait class, two of which are really and one fairly good. Mr. J. F. Fresch is not over and above successful in this class; the delineation is somewhat stiff and the execution not what might be expected in a portrait intended for exhibition. Mr. Van Luppen offers for criticism a beautiful little painting which he christens "A View at St. Rose." Mr. Bompas furnishes a small Marine Sketch in the same class. Its merits lie chiefly in the distinct, we would almost say the perfect, depiction of the vessel which has passed through the turbid waters well depicted in the foreground. It is not an ambitious piece; but withal well depicted. Mr. Sawyer, of Kingston, shows two pictures, neither of which is in our judgment, worthy of his deservedly high reputation. One of them, "Morning Prayer," represent a pretty boy on his knees, but it is utterly devoid of either life or beauty. If the youngster was hard at work praying to be made to look like a young human being, well and good; he looks as unlike it now as it is possible to imagine. He looks just a juvenile hypocrite crystalized in the supreme act of hypocricy. Mr. Sawyers "Sherbrooke Scenery" is infinitely more pleasing. Before quitting this department we would make mention of the really fine contributions made by several of the professional contributors. Among these Mr. J. Weston takes the lead, closely followed by Boisseau. The reason for giving the preference to the former lies in the superlative excellence of a portrait of a young lady who, it was hinted, is the artist's daughter. If so, perhaps paternal affection may have had something to do in the creation of a picture so beautiful. But we are willing to accept it, as we are all things beatiful and true, and to thank the artist for his work. The portrait is remarkable for the individuality of character indicated, the suggestiveness of pose, and the brilliancy, without any approach to glaring, of the colouring. The portrait is in all respects "a thing of beauty." Mr. Weston also contributes a small Oil Painting depicting the opening of the Dominion Parliament by the Marquis of Lorne. As a picture there can be no fault found with it, but as an attempt to portray those present on the occasion it is a failure, and in one or two instances a bad one. His Excellency looks as old as Methuselah at the point of death, and there are few in the distinguished throng who could possibly be picked out without the aid of a "key." The artist's "Misty Morning" is a work far worthier of him, and the remarks made by strollers—by spoke well for its popularity. Mr. Boisseau is a large exhibitor this year. Among the most conspicuous of his displays are there excellent portraits of adults, and one of a little child, the last-mentioned being a perfect gem. Mr. Boisseau is also an exhibitor in other departments. There is also in this class a rather interesting picture of a love-sick youth strumming away on a guitar on the worse side of the wall of a Spanish mansion. If the artist had only thought of painting in the nose of a downright good old English bull-dog, it would have enhanced the interest of a picture which, if mirth-provoking in subject, is by no means bad in execution.

This seems to be a proper point at which to make some more general remarks about the department as a whole. And, in the first place, a compliment should be paid to Mr. Stephenson, the custodian of the Gallery, both on account of the care he exercised, in the first instance, in the placing of the exhibits where they could be viewed to the best advantage, and, secondly, for his courtesy to those who have made the round of the room. Artists are peculiarly sensitive people, and hard to be accommodated, but if those who are showing here now have any cause of complaint, Mr. Stephenson is not the party with whom they can reasonably grumble.

One of the most striking features of the department is the excellence of the exhibits in the Photographic branch. The rivalry has evidently been intense in earnestness, and the result is correspondingly satisfactory. Without going into details at present as to what is shown, we may refer with satisfaction to what is not. There are few exhibits either in this or any other section of the department of Canada's wintryness. There was here and there an intimation that we did enjoy a winter, but Arctic privation and discomfort are not made typical of Canadian existence. Another thing which we notice, as an advance in the direction of National Art culture, is the number of lady exhibitors, in both the classes of amateur and professional artists, especially the former, and the higher merit of their work. We cannot help regarding this as a hopeful sign of the times. If the easel superseded the music-stool it would be a good thing for the sex, since for one girl to whom thrumming at piano-keys is a torture, and a means of torturing, there are scores to whom the use of brush or pencil would be a source of and a means of giving pleasure. It would be vastly better if fewer hours were spent in our female seminaries in piano strumming and more in the Art classes; for every young person who can distinguish herself in music there are a hundred fit to compete in the other art.

Analyzing the Exhibition, we notice the fact that almost all the objects offered are Canadian and the bulk of them of this Province. In the Confederation of Canada there is no provincial monopoly of art, but we are pleased to see that our own Province is richest in its offering of Art products. It might be expected that in a Quebec Provincial Exhibition Quebec exhibits should vastly preponderate, but it was not to be expected that the preponderance of Quebec talent is remarkable. Among the professional artists who exhibit, without any reflection upon those whose names are omitted, we would mention Mrs. Edwards, and Messrs. Pell, Weston and Boisseau.

Mr. Pell in the Water Colours class presents a number of works, all of which detain a stroller through the Gallery. "On St. Helen's Island" is a beautiful sketch of a shady nook, cool yet bright; the sunlight glinting pleasantly through the trees; the execution of the work is perfect to minutest detail. He has another landscape, and, with other exhibits, three very interesting pictures, the subjects of which are a thatched cottage half-unroofed, a yard scene (a very truthful picture, apparently done in a hurry), and a homestead scene, of which we cannot speak in too high terms. Mr. A. Graham is a liberal contributor this year, and all that he shows is worthy of praise, some of his least ambitious efforts yielding the most satisfactory results. Mr. H. Irvinning, of Halifax, offers two pictures for inspection, the locality of the subject being the same. The one is Mabou Bridge, and the other Point Mabou; both of these show excellent work. Before quitting the professional class we should have made very special note of Mr. Weston's "Squall on the St. Lawrence," which we should feel disposed to place very near the first in the exhibits of this department. It is a fine picture in every respect. Any one who has skirted either side of Canada's grand water way, say about Gaspe, will appreciate this picture to the full.

There are two or three illustrated addresses scattered through the room and they are all worthy of extended mention. The architectural drawings are of varied merit. J. F. McKenna, W. H. Hodgson & Son, W. M. L. Walbank and W. W. Scott are the chief exhibitors in this line. There is a fair show of Paper Designs—small, but upon the whole, good. The designs for Stained Glass Windows are good, the best being sent in by Mr. J. C. Spence, of Montreal, for a memorial window for Bishop O'Brien.

In Photography, as we have said already, the exhibit is exceptionally good. Messrs. Field & Co. occupy almost a fourth of one of the sides of the gallery, and what they show will be one of the great attractions to this department. They have over fifty specimens of their art on exhibition. The whole of the western end of the building was occupied with the exhibits of Mr. W. G. Martin, whose display delighted all who viewed it. Mr. Lafricain also furnished many specimens from his studio.

Mr. G. H. Elliott gives us, with other works of merit, two very pleasing things, a bullfinch and an indigo bird, the former fluttering from a branch and the latter hovering above her nest. The execution is exceedingly good. Mr. Wiseman shows a variety of well-executed wood engravings ranging from the simplest cuts up to the most ambitious works, of which the gravers implements are capable. Some of the exhibits he displays are exceptionally fine in execution. Among the miscellanea of this department, we would notice, without designing any discourtesy by the postponement of the mention, the skill and taste displayed by the ladies in their contributions in the way of painting on silk, porcelain and other unpromising materials. In this class Miss Eloise Watson, Mrs. J. M. Pollock and Mrs. G. G. Smith distinguish themselves, the latter lady furnishing many specimens of her skill in other departments of the Gallery.

### MISCELLANEOUS.

**MESSRS. JOS. BARSALOU & CO.**

make a fine display of soaps and shoe blacking. Their exhibit of soap comprises Blue Mountain, Marseilles, Imperial, Domestic, Universal, Oxford, Cambridge, housekeepers, &c., &c. They show a very fine line of French shoe blacking and also concentrated lie, and an assortment of tallow candles. They have a space in one of the corners of the eastern wing, and have arranged their exhibit very artistically. Two pyramids of Marseilles soap have the appearance of marble. They have also in the corner a life-size representation of Jacques Cartier, which is made of Imperial soap, manufactured in Montreal. The qualities of the soaps manufactured by this firm are of a very superior excellence.

An extensive exhibit of Canadian shoe blacking is made by Messrs. John Watkins & Co., which is manufactured by them and of a superior quality.

An exhibit of ebony lacquer and acme blacking, manufactured by Wolf & Randolph, Philadelphia, is exhibited by their agents, Messrs. J. A. St. Marie & Co., of Montreal. This blacking is water-proof, and to prove its merits they have a fountain playing on a newly-blacked pair of boots, which seems to have no effect on the polish.

Messrs. Perry Davis, Son & Lawrence, who have a fine central space, next to the pavilion, where the Grand Weber piano stands, exhibit a large and varied assortment of their pharmaceutical preparations. At one end of their space is a neat little summer-house, constructed of bottles, filled with their preparations, between small wires, the dome being completely covered with these bottles. At the other end of their space is a square pyramid, built of toilet soaps, fluid extracts, perfumery, &c. Alongside this pyramid is a round column of toilet soap of various colours, which stands seven feet high. Their exhibit of soaps is from the manufactory of F. S. Cleaver & Son, London, England, for whom they are agents. They are also agents for Messrs. Wyeth's & Son's extracts, Burnett's flavouring extracts and perfumery, and Messrs. Murray & Lanman's Florida water. They also exhibit a large assortment of teeth preparations. The name of Perry Davis, Son & Lawrence is a household word.

Messrs. Emil Poliwka & Co. make an extensive exhibit. They show a variety of glues from almost every country in the world, sponges, American and Canadian oils, Excelsior bird food, the Girondin deodorizer and disinfectant, gelatine, continental and laundry blue, axle grease, a composition for preventing iron from corroding, Imperial borax (guaranteed chemically pure), and a large number of other articles. In the centre of this space is a gothic show case with the portrait of President Garfield in the centre.

**BISCUITS.**

There were two exhibitors of manufactured biscuits, Messrs. Christie, Brown & Co., and Messrs. Viau & Frere. These exhibits are both on an extensive scale, each having an assortment of about 350 different styles of crackers, arranged in boxes which extend for about 12 tiers in height.

The show of Messrs. Christie, Brown & Co., comprises fancy gingerbread, oatmeal, and charcoal, in fact, all kinds of biscuits from the coarsest to the finest, from the size of a pea to the large Jewish Passover bread, and from 4c to 75c a pound; also a large assortment of cakes.

Messrs. Viau & Frere's exhibit comprises macaroni, vanilla cream, etc; also Paris makes. On one box of biscuits they have the words "Competition is the life of trade," worked-in sugar, and on the other boxes "Marquis of Lorne" and "Princess Louise." The name of the firm is also worked in large letters, with sugar and biscuits over the top of their exhibit They also display some of their self-raising flour. This firm employs about 90 hands.

**MESSRS. WINNING, BURCH & CO'S**

exhibit is one that attracts general attention. They display a great variety of the beverages which they manufacture, including both heavy and light wines, temperance drinks, fruit syrups, etc. Their well-known goods are shown to great advantage. In the centre is a beautiful arch, being a fac-simile of the coat of arms of the State of Pennsylvania. Their exhibit should not be missed by sight-seers, as, apart from the excellence of the goods displayed, it will repay the visitor from an artistic point of view. Their lime fruit juice is an especially fine beverage. Their exhibits are tastefully decorated with living grape vines from the Beaconsfield Vineyard, upon which are bunches of grapes, which were removed by permission of Messrs Gallagher and Gauthier, at great risk. Messrs. Winning, Burch & Co. have again been succesful as at Paris in 1867, and every Canadian exhibition where these goods have competed, in obtaining first prizes, and we can bespeak for them an increased volume of their already large business. They also exhibit some of their celebrated Carratraca water.

The Canada Distillery Company, of Quebec, make a fine display, arrayed in pyramidal form of all kinds of French liquors, brandies, gins and wines, etc. They also exhibit their anti-dyspeptic bitters. They are represented in Montreal by Mr. L. E. Morin, Jr.

Messrs. Michel Lefebvre & Co. exhibit an assortment of pure English and white wine vinegar, etc. This firm have already taken prizes for their vinegars in Paris (France), Sydney (Australia), and all through Canada.

The Montreal Brewing Company have a very artistic display of their ciders, ales and porters, which are arranged in pyramidal form, with large casks at the bottom, and gradually growing smaller to the top. They have also a tent on the ground near the poultry house.

A case of sparkling apple cider is shown by Mr. F. Kingston.

**MR. J. L. JOHNSTON, OF MONTREAL,**

exhibits a large quantity of his celebrated fluid beef which is now extensively used in British and Continental institutions, hospitals and asylums, and has been prescribed by the medical faculty wherever it has been introduced. Mr. Johnston now puts this fluid beef up for use in Germany under the name of *flussiges ochsenfleisch*. He has a large number of orders at the present time from the German, French, British and United States Governments for large consignments of this article. He has also 100 hands engaged in canning tomatoes. Mr. Johnston is one of our liberal minded manufacturers, who believes that Canada can compete with the United States without a high protective tariff. As for himself, he says he can beat the American even without the N. P.

Mr. Allan Cameron, of Montreal, makes an excellent display of his washing powder. He also exhibits Baron Von Liebig's Liquid Extract of Beef, and tonic invigorator, the merits of which is recognized the world over.

The well-known firm of Messrs. Alex. McGibbon & Co., Montreal, exhibit a collection of canned beef manufactured by the St. Louis Beef Canning Company.

In pickles, preserved meats, sauces, etc., there are quite a number of exhibitors. Mr. John Robertson displays some of his excellent canned tomatoes. Messrs. Gareau & Fatry, agents for the Dominion Pickling Company, show a fine assortment of pickles of all kinds, fruit sauces, tomato catsup, etc. They have taken prizes in both Ottawa and Montreal for these pickles. G. L. Richardson, of Montreal, also shows a variety of pickles and sauces. Messrs. Johnson, Russell & Co., of Montreal, make a good exhibit of pickles and sauces, manufactured by Messrs. Carter, Hales & Co., for which firm they are agents. W. Clark, of Montreal, shows a fine assortment of preserved meats of all kinds. He is also the manufacturer of Clark's celebrated Cambridge Sauces. Albert Turner, Montreal, shows tomato ketchup, preserved jams, etc.

Messrs. Alex. Mill & Co., of the Globe Coffee and Spice Mills, Montreal, are showing mustards as a specialty. This mustard is used in some of the best houses in England and the United States, and has been approved of by some of the best judges. They also exhibit their pure celery salt for flavouring soups, cold meats, etc. They are the only manufacturers in the Dominion of this salt.

The North American Chemical Company make a fine display of all kinds of salt, including fine bakers; and dairy salt, coarse bakers salt, medium coarse, etc. Mr. Jos. Lamoureux also exhibits dairy, pickling and table salt. A display of salt is also made by the Dominion Pickling Company.

The American Swiss Milk Company, of New York, have their exhibit placed in the form of three pyramids, one of which is built of boxes of condensed milk, the second of chocolate and milk, and the third of milk food.

Dame F. Marais shows a patent machine for reducing potatoes, beans, peas, &c., for soup; also a machine to press berries and obtain the juice.

The only exhibit in tobaccos is that of the Campbell Tobacco Company, who make a very fine display of about thirty-two different brands. The exhibit is artistically arranged in a semi-circle about three feet in height, an arch of tobacco boxes setting it off in front.

A varied assortment of foreign and domestic cigars of every description is exhibited by Messrs. Dufresne & Mongenais, the prices ranging from 5c to $1 each, and comprising all the well-known brands which are the delight of smokers.

Mr. J. M. Fortier has various tents on the grounds, where his imported and domestic cigars can be seen.

In smokers' materials there are only two exhibitors, except those using the articles outside. Messrs. Walsh, Lefort & Co., display, in a glass case, a large variety of wood and briar-root pipes, including the "G B.D." They have taken prizes for these pipes since 1855 at various exhibitions. Mr. Edouard Huard, also, of St. Charles de Bellechasse, makes a very artistic display of rustic pipes, made out of the wood of different Canadian trees. The bowl of one of the pipes is made like an alligator's head, and the stem is made from the limb of a tree, and is 13 feet long. The stem of another pipe is 11 feet.

An exhibit of fire and water proof paint is made by Messrs. A. A. Wilson & Co., Montreal.

Exhibits of honey in comb and strained

are made by Henry Brown, Havelock, Que.; E. E. Spencer, Freleighsburgh, Que., and C. H. Carpenter, West Enosburg, Vt.

An exhibit of maccaroni and vermicelli is made by Mr. Charles H. Catelli, Montreal.

Mr. Wm. Rodden, of Plantagenet, Ont., shows some of his celebrated seltzer mineral water.

An exhibit of maple syrup and maple sugar is made by Mr. M. A. Morrison, of Frelighsburgh, Que.

Near the centre of the main building, Messrs. J. J. Ford & Co., have a stand, where they expose for sale all kinds of candies, sweetmeats, etc.

At the left-hand side of the front entrance to the main building, is the pop-corn exhibit of Messrs. Joslin Bros., where they sell fresh pop-corn as fast as it can be popped.

There are a few exhibits in baking powder, Mr. M. D. McLaren coming first, with Cook's Friends' Baking Powder, which has attained an undisputed reputation in this class of articles. The genuine Cook's Favourite Baking Powder is exhibited by Messrs. J. J. Duffy & Co., and Mr. C. M. Putney shows some baking powder of his own manufacture, and Messrs. W. Lunan & Sorel, some of their Princess baking powder.

An exhibit of self-raising flour is made by Messrs. Brodie & Harvie. For this flour they obtained prizes at Philadelphia in 1876, Quebec in 1877, Paris in 1878 and Toronto in 1879. Messrs. Fish & Ireland, of Lachute, Q., show some of their Baravina Milk Food, manufactured from oats, barley, wheat and condensed milk, double baked; also oatmeal granulated wheat, pastry flour, etc. The well-known firm of Messrs. A. W. Ogilvie & Co., Montreal, exhibit an assortment of pastry flour, cornmeal, pot and pearl barley, etc., and Mr. Jas. McMartin, of St. Eustache, Q., makes a similar exhibit.

MESSRS. M'COLL BROS. & CO.,

of Toronto, have an exceedingly good exhibit of machinery and illuminating oils, comprising about 100 varieties. The assortment includes benzine, neats' foot oil and other animal oils, linseed and other vegetable oils, crude and refined fish oils, refined petroleum, parafine oil, lubricating oils, and petroleum and its products. They make a specialty of "lardine oil" and are also the manufacturers of machine oils. They have a sample of "headlight oil," which has stood a fire test of 175 degrees. They won a medal at the Toronto Exhibition a few days ago.

Messrs. Samuel Rogers & Co., of Toronto, have also a varied assortment of oils of all kinds, including coal, signal, parafine and machine oils, petroleum hoof ointment, Pennsylvania crude petroleum and petroleum wax. Their space is surmounted by the British arms moulded in wax, on each side of which is a bust, also in wax, which sets off their exhibit very nicely.

Messrs. R. B. Murray & Co. make a fine display of petroleum and its products. They show parafine wax candles, parafine wax before it is manufactured into candles, lubricating oils, fish oils, etc. A very interesting feature of the exhibit is a pyrometer for testing the combustibility, and a petroleometer for testing the gravity of refined petroleum.

Messrs. Thomas Leeming & Co., of Montreareal, make an exhibit of Nestle's milk food and Reckitt's Paris blue,. They make a fine display,

Messrs. E. W. Hoyt & Co., of Lowell, Mass., display a choice selection of perfumery, of which Cologne water is the specialty.

Mr. Charles Martin, of Montreal, shows an assortment af French ball blue, "True Blue," in squares, "Sunbeam," stove polish, Royal black lead, etc. He also displays a large quantity of rice starch, manufactured by Heumannn & Co., Antwerp, Belgium, for which firm he is the sole agent.

Messrs. Simpson, Hall, Millar & Co., show a very elegant glass case of silver plated ware, the designs of which are very handsome. Their exhibit includes an assortment of water pitchers, cake baskets, cruet stands, goblets, epergnes, etc., etc.

Mr. H. R. Stevens, of Boston, exhibits a pyramid of his well-known vegetine.

Mr. J. J. Mackey exhibits a variety of Florida curiosities, including a couple of live alligators, which are the general object of admiration.

Messrs Charles Gard & Co. exhibit a full assortment of mineral waters, lemonade, cider, Belfast ginger ale, soda water, etc.

Messrs. Devits & Armand make a good display of wigs, false hair, etc.

Mr. F. R. Cole makes a splendid exhibit of coal oil chandeliers, table lamps, lamp fittings, coal oil stoves, etc. His goods are very tastefully arranged in a space at the left-hand side of the middle entrance from the old Crystal Palace to the Annex. Near by, is Mr. A. E. Voter's stand, where he manufactures his "Old Orchard Beach Taffee."

MESSRS. L. P. SIMS & CO.

show a great variety of paper boxes of all sizes and patterns. The bon-bon boxes for ladies' collars are very pretty. The large assortment of fancy boxes which are exhibited are all manufactured by the firm. This is a new business for Canada, as these boxes have heretofore been imported from France. A lace pocket-card for dry-goods travellers is a noticeable feature, the laces being secured in compartments, and the whole opening out like a folding map, and, though some are five yards wide, they fold up in a pocket-case. They also exhibit lace and brace cards, millinery, shoes, jewellery, druggists', confectionery and perfumery boxes; in fact, everything in the shape of a paper box.

MESSRS. FOGARTY & BRO.

have evidently spared neither time nor expense in making their exhibit this year attractive. They have displayed in a fine glass case a splendid assortment of ladies' shoes of all description, which are made up not only for show but for wear. including the children's Compeau shoes, They also exhibit a pyramid of Nubian Blacking, and Messrs. G. H. Wood & Co.'s ladies' blacking.

The only other exhibitor in boots and shoes is Mr. Alex. Douglas, who shows a fine assortment of boots and shoes of every description, including some beautiful pairs of ladies' kid and silk shoes.

Messrs. Hearn & Harrison display a great variety of spectacles, eye glasses, barometers, engineers' instruments, thermometers, opera glasses, pocket and parallel rules, architects scales, chain or plotting scales, protractors, combination chynometer rules, etc. They also displayed a barometer attached to a clock by which the air pressure is self-registered every hour.

A large exhibit of surgical instruments and appliances is made by Mr. F. Gross, Montreal. His exhibit comprises artificial legs and arms, invalid chairs, crutches, dental instruments, trusses, Indian clubs, an electric battery, veterinary instruments, a hygienic skirt-supporter, etc., etc.

The exhibit of the S. S. White Dental Manufacturing Company of Philadelphia, New York, Boston and Chicago, is a very varied one, and includes false teeth, dental engine and dental instruments of every description. Mr. S. A. Craig was in charge of the exhibit, and displayed its wonders to the crowd that gathered round. A special feature of the exhibit is a dental chair, which may be adapted to every position the patient may take with the greatest ease.

MESSRS. ROBINS & SADLER'S

collection of leather belting attracts a great deal of attention, and, as it is situated near the front entrance of the Crystal Palace, very naturally there is always a crowd around the stand inspecting the different mammoth belts that are exhibited. One particular feature of this collection is that these belts were not made for exhibition, but for different large manufactories of the Dominion. A belt made for the main driving wheel of the Stormont Cotton Manufacturing Company is shown. It is 146 feet long, and thirty-six inches wide. There is also another for the Stormont Cotton Company, which is in two pieces of 151 feet in length and twenty-four inches wide. Both these pieces are made to run on one pully. They also exhibit some belts made for the Cornwall Manufacturing Company. One is 143 feet long by thirty-six inches breadth throughout, and the other ninety feet in length and thirty inches wide. The main driving belt of the Campbellford Woollen Mill, fifty-three feet long and twenty-four inches wide, is shown. An 18-inch double driving belt for Messrs. Adams, Hackland & Co., of Paris, Ont., is also exhibited. But the largest belt shown is the main driving belt for the Victor Hudon Cotton Company, which is 170 feet long and thirty inches wide, double, being riveted and sewn throughout. They also manufacture lace leather, harness leather and fire engine hose of every description. This firm are supplying all the driving belts in the Machinery Hall free of charge.

The Gibson Leather Company, of Gibson, N.B., exhibit a fine lot of patent and enamelled leathers for shoe and carriage purposes. A noticeable feature was a whole cowhide about 60 feet square. This Company shows a speciality of dressing leathers in the whole hide.

Messrs. J. L. Goodhue & Son, of Danville, Que., make a fine display of harness, moccasin and lace leather and leather belting, amongst the exhibits being a large leather belt already prepared for use.

Messrs. Jackson Bros., of St. Paul street, make a very creditable display of lasts. This is quite a new industry in Montreal, and has been largely developed by this enterprising firm. They also exhibit some harness leather and French calf shoe leather. They are agents for Button's Raven Gloss shoe and leather dressing, which softens and preserves the leather. An exhibit of this dressing is displayed.

The Dominion Leather Board Company make a fine exhibit of leather board of their own manufacture, which they make into chair seats and counters. An exhibit of the counters is also made.

The Cote Counter Company, of Boston, display an assortment of leather boards and counters.

Mr. E. Charbonneau, of St. Henri, exhibits a splendid assortment of lace leather.

Messrs. J. H. Mooney & Son make an exceedingly fine exhibit of fancy leather, including morocco leather, and sheep and goat skins. About 70 pieces of leather are exhibited, and the whole is placed in a neat show-case and displayed to great advantage.

Mr. P. Jacobi, of Toronto, exhibits an assortment of wild horse leather, all ready prepared for the uppers of boots.

Mr. J. J. Bourassa, of St. Phillippe, shows an assortment of sheep rugs in all colours.

Messrs. Goudron Freres show a varied assortment of bolts and nuts. They also exhibit a specimen of finale forging, which looks almost like a tree, and is made out of one piece of iron.

Mr. J. M. Martin has a neat display of force pumps.

MR. GEORGE R. PROWSE.

makes a fine exhibit of hall stoves and cooking ranges of his own manufacture. His Ideal hall and parlour stove is a perfect beauty. It is square, and so constructed that you can see the fire from three sides, and altogether makes a very cheerful looking stove. He also shows his patent family range and broiler, with dumping and shaking grate, and his hotel range, eight feet long, with patent broiler and shaking grate. An assortment of ordinary hall stoves, full nicolled, are also displayed, including the Radian Home.

MESSRS. BURNS & GORMLEY

exhibit a very large hotel range, 16 feet in length, which they have manufactured for the Russell House, Ottawa. A large patent broiler which is shown, was made for the Grand Trunk Railway. They manufacture all kinds of rought iron ranges for hotel and family use.

THE OSHAWA STOVE COMPANY,

represented in Montreal by Mr. Henry R. Prowse, display a great variety of their stoves. The Argand hall stove, with patent cleaner and cutter, is worthy of notice. They a'so exhibit a coal oil stove that will broil beef in ten minutes. One of the judges tasted some of this beef and remarked that it was too well done. They show a variety of wood stoves, noticeable among which was a parlor stove, in which the smoke passed clear round the space between the inside and outside of the stove, before ascending to the chimney, thus averting the danger of the fire going up to the chimney, as is the case when the latter burn out. The Boynton furnace is also shown. An assortment of castings and unbreakable stove covers are exhibited, the stove covers being so hard that they can be heated red-hot and then put in cold water without breaking.

MESSRS. COPP BROS.,

of Hamilton, display a select assortment of their stoves, Mr. W. Bingham being in charge of the exhibit. The assortment includes the Berwick family range, the Acorn range, Forest Beauty hall stove, Minerve parlor stove, and many other varieties. These stoves were finished in a very superior style, and highly burnished, a particular feature being a space between the inside magazine and the outside cylinder, so that the nicolling will not tarnish.

Messrs. Cooper, Fairman & Co. display an assortment of their patent elbows, which are an improvement over the ordinary elbow.

Messrs. Hughes & Stevenson exhibit the American Globe Ventilating Chimney Cap, for which they are agents for the Dominion. They show also a large variety of other articles, such as Jennings' porcelain double seal water closet, ventilating trap, urinal, wash basin with marble top, bath, speaking tube, and an assortment of sanitary goods, such as piping, etc.

An exhibit of jewellery cases is made by Mr. James Norris, Montreal.

Duprats' improved nut lock is shewn by Mr. F. X. Cochue. A combination lock is exhibited by Mr C. K. Adams. Mr. Joseph St. Germain shows a combination lock adapted to doors and fronts of public buildings. Messrs. Doray, Doray & Langlois exhibit their patent nut lock, which is applicable to carriages and machinery where jarring or motion causes nuts to loosen, as well as to railway joints and cars.

Messrs. John Martin & Co., of Montreal, are exhibiting dark lanterns. These lanterns are the same as those used at present by the Metropolitan police, of London, Eng., as being the best dark lantern obtainable. Either sperm or sweet oil can be used for the lamp. The firm hopes that the police authorities will see fit to supply our police force with these lamps.

MESSRS. OSTELL & CO.

exhibit a splendid assortment of general fishing tackle and sporting goods of all kinds. The display is tastefully arranged in a fine glass show case, and offers a good bait for the multitude that pass through the avenues surrounding it. The exhibit comprises fish-hooks and lines, salmon, bass and trout flies, patent reel which dries the line in eight minutes, artificial baits, patent adjustable sinkers, fishing spoons, unbound cork floats, &c., in fact every requisite that the disciple Izak Walton can require for his amusement. At the Dominion Exhibition in 1880 they obtained three prizes and a special diploma for the best assortment of fishing tackle.

Mr. T. W. Boyd also exhibits a variety of fishing tackle and a quantity of skates.

Mr. R. Thomson, jr., shows the new Dominion skate.

The Star Manufacturing Company, of Halifax, N.S., exhibit a large assortment of Forbes' patent Acme Club Skates.

A patent lever washing machine is shown by Mr. F. Godin, Montreal, which he claims can wash nine white shirts in ten minutes without injuring them in any way.

Messrs. M. B. & H. Jewell show an assortment of malleable goods for reapers and mowers.

A case of iron planes is exhibited by Mr. William Long, of Sherbrooke.

Mr. John Brooks, of Lye, near Stonebridge, England, who is represented in Canada and the United States by Messrs. Drummond, McCall & Co., of Montreal, exhibits an assortment of blacksmiths' tools, including Soho shaped anvil, patent spherical washer, vice and stand, picks, hammers, etc. They also exhibited a joiners' bench screw.

A fine assortment of axes and adzes are exhibited by Mr. T. J. Mocock, of the Montreal Axe Works. These axes and adzes are of a very superior quality.

A patent safety railway switch is shown by Messrs. Laberge & Larocque.

The Allen-Tenny railroad station pre-indicator, is exhibited by Mr. J. Coghlan, who is the agent for it.

A car coupling which enable cars to be coupled without risk, is shown by Mr. C. F. Sinn. He also exhibits an improved car brake, by which five cars can be easily stopped by one brakeman.

An assortment of lead traps is exhibited by Mr. J. M. Reid, Moncton, N.B.

Mr. J. Thompson makes a display of scroll saw works, and some pure iron ore. Mr. N. Gelinas, of Yamachiche, also shows some scroll work.

A model of a scale cart is shown by Messrs. Murphy & Lynet.

Specimens of silver lead ore are exhibited by Messrs. King Bros., of Quebec.

The Comet Mica Company, of Montreal, exhibit some fieldspar and other economic minerals, cut mica, phosphate lime, etc.

A collection of over 500 copper coins is shown by Mr. Joseph Lavoie.

Specimens of prepared peat are exhibited which were taken from the property of Mr. D. Morris, of St. Therese, Que.

The Canada Horse Nail Company exhibit an assortment of their horse nails. The qualities of the nails manufactured by this Company are well known, and the nails that are shown are, as a matter of course, of very superior excellence.

An assortment of common, moulded and bevelled bricks are shown by Mr. T. M. Clark, of Ottawa. A collection of fire bricks are exhibited by Messrs. Bulmer & Sheppard, of Montreal. Mr. S. Dion, of Quebec, also exhibits a variety of bricks.

A collection of ordinary pottery and earthenware is exhibited by Mr. F. L. Fraphin. Mr. A. Dion, of Quebec, also shows some pottery and earthenware, including some pretty styles of flower dishes and tobacco holders.

Mr. Gregory Glassford, of Montreal, displays a variety of hollowware for stoves.

Mr. Walter Allan, of Yorkville, Ont., shows a patent stove-pipe clothes dryer.

A spinning machine is exhibited by Mr. LaPerches, of St. Hyacinthe.

A Grand and Baby Grand Refrigerator, which attracts much attention, is exhibited by Mr. Joseph Sissons.

An assortment of corn brooms are shown by Mr. C. A. LeBaron, of Sherbrooke.

Mr. J. Versailles, jr., exhibits some of his pitch, felt and coal tar in a tent on the grounds.

Messrs. McNevin & Cole, of Sault au Recollet, show an assortment of good straw leather and roofing felt of their own manufacture.

A family range, bricked in and ready for use, is shown by Mr. C. Ryan.

An assortment of patent wrenches and tongs is exhibited by Mr. P. A. A. Dorion.

Messrs. Castle & Sons, Montreal, decorators, show a number of samples of fine panelling at the north wing of the Crystal Palace building. They are hung on the wall over the north-east stairway, and include grained panels and imitation of various woods and marbles, and house decorations of all kinds, some of which are very tastefully got up.

Mr. J. Murphy exhibits an assortment of his sign and fresco painting, which are hung on the wall at the right hand side of the front entrance to the Crystal Palace. They show Montreal is not behind the age in this class of work.

MESSRS. L. WATKIN'S & SONS,

boot upper manufacturers, of Wellingbrough, England, exhibit a fine assortment of boot and shoe uppers. The exhibit is placed in a nice glass show-case, and very tastefully arranged. The uppers manufactured by this firm are of very superior quality, and have a large sale in Canada and the United States. They have been awarded the first prize and a diploma. Messrs. Whitley Bros., of Montreal, the well-known manufacturers of leather and shoe findings, represent this firm in Canada and the United States.

MESSRS. RAMSAY, DODS & CO.,

of this city, exhibit a large and varied assortment of stove pipe, carriage body, and furniture varnishes; Winsor and Newton's artists' colours and material, (for which the firm are Canadian agents), Sharrat and Newth's glaziers' diamonds, "Crescent Star" and "Warranted Genuine" white lead, white leads and colours ground in oils, samples of all kinds of dry colours, glaziers and painters' knives, vegetable and fish oils, refined linseed oils, glue and gelatine, methylated spirits, mixed paints of all kinds, and numerous other articles. The exhibit is most tastefully arranged, and attracts the attention of the interested visitor as he passes by.

MESSRS. A. RAMSAY & SON

display an extensive assortment of their manufactures, which include putty of all colours, paints of different kinds, but all of first-class quality, including their well-known railroad paint, clarified and raw linseed oils, white leads, etc. They show a specimen of their "N. P." white, a substitute for white lead and zinc, which combination it greatly supersedes, both as to body and colour, and for which it is already extensively used. They also exhibit a magnificent pane of English plate glass, 15 feet by 8½ feet. The reputation and standing of this firm is a sufficient guarantee that all their manufactures are of a very superior quality.

FIRE ESCAPES.

Mr. C. A. Gregory has a temporary structure put up at the right hand side of the Crystal Palace, where he exhibits his patent Universal Fire Escape. This fire escape may be briefly described as follows:—At the end of the building, under the eaves, there is a box, about two feet square, placed, which contains about sixty feet of a galvanized chain-ladder. This box is connected with a smaller one about four feet from the ground by an iron rod. The box near the ground has the appearance of a fire-alarm box, and is locked and unlocked in the same manner. The watchman of the building is supposed to have a key, the fire brigade another, and the police a third; when a fire breaks out, the box is unlocked and the rod falls from the upper box, which then opens out into a ladder, at the same time sounding an alarm inside the building, which awakens the inmates. Another rod is run along the top of the building, so that the ladder can be placed in front of any of the windows, and the inmates are thus enabled to escape. As soon as the lower box is unlocked, the alarm sounds inside the building, so that if a burglar should happen to get a false key he would be unable to get into the building without alarming the inmates. The apparatus has attracted a large crowd of visitors each day of the Exhibition, and the small boys take evident delight in imagining themselves escaping from a burning building.

Mr. J. Coles also exhibits a fire escape, which consists of a rope, at one end of which is attached a leather apparatus, which is strapped around the person to be saved. This rope is placed round a pulley. A number of persons can be saved at descension.

Mr N R Leach displays his hydraulic fire-escape on a temporary building which he has erected at the left-hand side of the main building. This fire-escape works with cylinders containing glycerine and acid, the latter liquid keeping it from freezing. An endless chain passes through these cylinders, by which persons can descend as fast as they like, and without danger, as the interval linking of the cylinder is such that it can only go so fast and no faster.

CARRIAGES.

Leaving the Agricultural Hall, we cross over to the building devoted to the exhibition of carriages, harness, carriage and horse furniture, robes, &c. Here we find a large display of every imaginary vehicle. From the two-wheeled bicycle to the stately family chariot, every means of conveyance is represented.

Immediately opposite the main entrance, in the centre of the Hall, is the magnificent display from the factory of F. Ritchot, Montreal. Next comes B. Ledoux, Berard & Major, P. Dansereau, and Lajeunesse. Around the sides of the building are arranged the exhibits of harnesses, velocipedes, and the various parts employed in manufacturing sleighs and carriages.

The display in this building is one of the most interesting in the whole Exhibition, and although the building is not large, nor the number of exhibits very great, considerable time may be agreeably and profitably spent in inspecting the different inducements to ease presented by these elegant exhibits. One feels as though it would be a pleasure to drive forever in some of the splendidly finished carriages and waggons, but as we pass on, and come to a handsome sleigh, almost covered with magnificent bear robes, we are inclined to forget the charms of summer, and wish for the snow-covered road and the merry peal of the sleigh bells.

To save confusion and to describe the contents of this building in a more easily digested manner, we will take each description of vehicle, and the contributions made by the different competiters in each class.

Taking the more seasonable exhibits first, we will begin with the wheeled vehicles. First comes the stately two-horse family carriage, modestly but neatly painted, and plainly but luxuriously lined and trimmed, the very *beau ideal* of a comfortable conveyance. In these we have exhibits by F. Ritchot, R. Ledoux, and N. & A. C. Lariviere, all of Montreal. These carriages are got up in first-class style, combining at once elegance, durability and comfort. They are fitted with the best steel axles, patent tires and hubs.

We next have a more modest form of the same kind of family vehicle, adapted for one horse, and finished in the same style. N. & A. C. Lariviere and F. Ritchot exhibit in this section also.

A very stylish barouche is shown by L. Brendannaz & Co., of Montreal, in the construction of which beauty has been somewhat more aimed at than in the case of the sober family vehicles.

In broughams, we have two very superior articles by N. & A. C. Lariviere and F. Ritchot. A noticeable feature in all the carriages and sleighs turned out by these two firms is the extremely neat and appropriate painting of the wheels and bodies, and the perfect fittings and trimmings, which could not possibly offend the most fastidious taste. As we pass up the right aisle of the building, the eye is caught by what at first seems to be a noble iron-grey horse, harnessed in a very finely made dog-cart, the work again of N. & C. A. Lariviere. Closer inspection reveals the fact that the horse is simply a wooden model, serving the doubly useful purpose of displaying a very fine set of silver mounted harness, the work of J. B. Senecal, and of drawing attention to the splendid vehicle to which the passive steed is harnessed. The whole has a very fine effect, and in every case the "turn-out" secures a thorough inspection. This is the only dog-cart exhibited, and its maker deserves great credit for the manner in which this, as well as his other manufactures, are finished. Leaving these dashing equipages, we turn to the commoner and more generally used buggy, which is presented by different makers in different styles. Berard & Major exhibit a double-seated covered buggy, a very comfortable and elegant vehicle for travelling, at once light, strong and handsome. N. & A. C. Lariviere has also a double-seated buggy, differing from the above only in being uncovered. Lajeunesse, N. & A. C. Lariviere. and Berard & Major exhibit single-seated covered and uncovered, buggies,

Among these finely painted carriages are noticeable one or two which are entirely destitute of paint, and show plainly the materials employed in their construction. Of these F. Ritchot and Warner & Co. show one each.

The sporting element is represented by a solitary racing sulky, of exceedingly light workmanship, painted and finished in really first-class style, by Lajeunesse, Leaving the wheeled vehicles an equal variety of sleighs await inspection. A magnificent, roomy, family sleigh for two horses, fitted up ready for the road, with handsome bear robes, and presenting a most comfortable appearance, bears the card of Lariviere. Two one-horse hack sleighs are exhibited by Dansereau and Lajeunesse, and a single cutter by Lajeunesse, Lariviere, and Berard and Major The useful as well as the ornamental element is maintained by a handsome express sleigh, painted and ready for the purchaser's use.

A very ingenious carriage top, suitable for sleigh or waggon, is shown by Dansereau. It is used in the same way as the top of an ordinary barouche, but differs from it in being made wholly of wood.

A large variety of carriage timber, spokes, hubs, felloes, and everything necessary for the construction of carriage, waggon or sleigh is shown by Perry & Cook, Galt, Ontario, and G R. Fabre, Montreal.

A series of patent gear, for light and heavy work, comes from the factory of Warnock & Co. The Dexter Queen is adapted for use in light waggons, rendering them by a combination of strong springs much more easy on the road. The Ludlow gear is intended for express waggons, the object being to retain the power of the spring and to lower the body of the waggon within easy loading reach. The last of the number, for use with heavy or lumber waggons, is called from its great strength the Hercules. L. Bredannaz & Co., show a new method of tireing wheels without bolting. So effectual is it that it is impossible to remove the tire from the wheel without cutting, even when the spokes and hub are removed.

J. B. Senecal's exhibit of harness, whips, and everything seen in a harness establishment, is very complete, and finely finished.

Mr. A. T. Lane has a good collection of bicycles and velocipedes, manufactured by the Coventry Machinists Company. He exhibits also the use of the bicycle on the Exhibition Grounds.

Those who have not already visited this department should do so at the very earliest opportunity. It will well repay an afternoon devoted to it alone, and cannot fail to be at once interesting and instructive.

MESSRS. TEES & CO

are by far the largest exhibitors in the classes which include office and school furniture, in both of which their pre-eminence in this section of the Dominion is undisputed by the public at large. They have been liberally dealt with in the apportionment of space, but this was necessitated by the variety of exhibits which they were desirous of inviting judicial and general opinion upon, and not an inch of the room allotted is lost, for the several objects are so numerous that there is only a narrow channel left through which the visitor can steer his way. To begin with the school desks and seats, most who have reached the age say of forty can remember, and hardly in any case without a tendency to writhe, the sort of provision which was then in vague for pupils in the school room. Comfort was the last thing that was thought of, even in the very best of schools it seemed to meet all requirements to furnish a backless seat, an inclined plane, the jingle of inclination to be—well, whatever the carpenter who got the job chose to make it. But times have changed a trifle and the tide has set strongly in in the direction of making the child as happy in its educational stage as possible. Messrs. Tees & Co. have seized hold of this wholesome truth and are turning it to practical account. Among their exhibits are no fewer than seven patterns of school-desks for children, and they are all designed with a view to physical comfort, which simply means good school work. They also show a teacher's desk, which would amaze the Squeerses of the last generation. The speciality of the firm would, however, appear to be office furniture, in which class they have numerous excellent exhibits. Among them we notice specially the specimen of their accountant's desk, as they style it, which combines, with the utilization of every inch of space, the utmost degree of security and the simplest means of obtaining it, one turn of a key locking the whole *instanter*. There is a large variety of desks designed to meet special requirements, such as the cylinder, the roll, etc., all of which are flitted with the combination lock arrangement referred to above. The Press Stand is one of the gems of this firm's large exhibit, and will be both a convenience and an ornament to any office on which it may be placed. The Cylinder Desk now on view has, we are informed, been purchased by the Canadian Pacific Railway Co. Messrs. Tees & Co. have introduced to the public a variety of revolving book-cases, a number of which are on view at the Exhibition. They are of all sizes and shapes and internal arrangements. Among those on view are the Champion Table Case; the No. 4 Standard, which will hold as many as 150 large books, yet revolve at the touch of a finger; the Cabinet case, the Legal case, the Office case, the Louise, and akin to these the Revolving Music Stand. These are all valuable accessions to modern comfort and convenience, but by no means exhaust the list of objects which will interest visitors to the stand occupied by Messrs. Tees & Co.

Mr. J. L. Phillips, of St. Joseph street, city, has a stall which will probably attract more attention from young eyes than any other in the show—bar the candy stalls. He has a wonderful exhibit of toys of all descriptions. These are grand days for the little ones if a conclusion may be safely drawn from the show this exhibitor makes. There is a doll so big that a girl who had not got beyond the doll-stage could barely hold it, and so magnificent that she would have been terrified at its superbness. The variety of choice toy animals will delight many a boy's heart. Most of these goods are imported from Germany, which is not only the land of weird legend, but of devices to make child-life a thing worth having. There is a rather small display of hollow wooden-ware, but what is shown is very good.

The specialists in the line of spring mattrasses are out in force, and in such numbers and with such a variety of sleep-inducers that the wonder of the future will probably be not how to obtain sleep but how to evade it. Among the competitors for favour in this direction are the Dominion wire-work mattrass, the spiral lock-spring mattrass, manufactured in this city, and the palace combination, which includes a folding-bed, washstand, wardrobe, mirror, desk and book-rack—all in one compact piece.

Mr. W. Peacock is to the fore with an excellent exhibit of his famous bats, and other requisites of the cricket field. It is hardly necessary to say that when he appears there is no competition. Any one interested in this noble old English game will derive pleasure from a passing chat on the subject with the gentleman who has charge of this stall, and who knows all about it.

Messrs. H. J. Shaw & Co. have a truly Mes[illegible] display of parlour and bed-room splendid [illegible] Two suites of the former will furniture. [illegible]miration of all persons of excite the ad[illegible] Queen Anne's style, is taste. One, in the [illegible] raw silk upholst- of ebony and gold, wi[illegible] gold, with green ery. The other is all [illegible]rving in this satin embroidery. The ca[illegible] two consist, suite is extremely rich. The [illegible] pieces. respectively, of seven and six [illegible]nlaid. There is also an ebony music stand, [illegible] One of the most striking objects in this exhibit is an easel, ebony and gold, seven feet high, with three painted panels. representing "The Daisy Girl," "The Angler" and "The Dancing Girl,' all of which are exquisite in conception and in execution. The finest exhibit, however, is a superb ball room suite. The same artistic idea runs all through, even to the most minute details. The carving of the several pieces—the bedstead, wardrobe, dressing case, wash stands, etc.—is chaste and rich. There are also in this exhibit four very elegant cabinets in ebony and inlaid; two piano stools which look almost too dainty for use, and a cylinder office desk, very finely finished.

Mr. C. Brouillette, of this city, shows a marble top sideboard enriched almost to superfluity, with finely carved representation of animals, foliage and fantastic designs of all descriptions. It is in black walnut and gilded, but in our judgment would have been more effective if the gilding had been omitted. It is an excellent exhibit notwithstanding, and its execution must have involved a deal of patient labour, and it certainly displays great artistic skill.

The exhibits in the Gallery, as one enters it, by the staircase leading from the principal entrance of the main building are, with the two exceptions of pianos an sewing machines elsewhere noted, and the Art gallery a cursory view of which is elsewhere given, of the most heterogeneous character. It is a bewildering admixture of baby linen and honey, of silk quilts and stuffed birds, of floor-cloth and fine linen, of insects which have been carefully preserved, and birds which have been ruthlessly destroyed that their beauteous plumes might enhance the charms of the fair sex. Many of the exhibits are of a serviceable sort; for example, those made by Messrs. J. C. Wilson & Co., who offer for examination the largely varied products of their extensive mills at Lachute. They show an almost endless assortment of paper bags, suited to various uses, and envelopes of all sizes, and shapes, except the circular and oval which may be all the rage sometime, when this enterprising firm will, no doubt, rise to the occasion. These exhibits of general stationary are numerous and excellent.

Messrs. J. Lovell & Son, of this city, have on view, a full series of their admirable school books and other products of their press.

Natural History is represented by two cases of finely stuffed Canadian birds prepared respectively by Messrs. William Price and John Mellin, both of this city. These are really admirable specimens of scientific taxidermy, the animals thus pilloried for public admiration having passed through hands which could preserve without distorting them. Mr. Price has also on exhibition a large case of entomological specimens, grouped as butterflies, though there are far more of the pinned and dried up victims of curiosity than any Naturalist would dream of classing with the lepidoptera. It is a pity this case was hung where it was, for it contained specimens which many would derive great pleasure from inspecting.

Though arranged with a view to gain and not to competition, the confectionery store of Messrs. W. T. Tester & Co. is an object of perennial interest, especially to the young folks, to whom the wealth of candies is as bewildering as it is enticing.

Mr. J. H. LeBlanc, of Craig street, has an extraordinary fine display of feathers. It savours of cruelty to exhibit such a collection to the eyes of the fair sex, who are privileged only, under the circumstances, with a tantalising view of objects so really beautiful.

Letendre, Arsenault & Co., of Montreal, have a large collection of objects interesting to the fair sex. Their show cases and tables are among the most attractive in the gallery. There are several groups of wax flowers and fruits of very high merit, and as commendatory terms may be used with respect to the millinery displayed.

It is almost impossible to catch from a cursory inspection of the thousand and one beautiful objects on view in this portion of the building, even a faint idea of the skill with the needle of which feminine fingers are capable, or of the many other arts by which the fair sex take pleasure in promoting the happiness of home-life. To the masculine mind it is the most extraordinary trial of life to sit in judgment on the beautiful and wonderful works which ladies' hands are capable of producing. The section of the gallery set apart for works of this kind is a labyrinth through which such a mind meanders in vain. We never yet met with an average adult who had a craze for crochet, or an enthusiasm for wool work, or an insatiable desire to put so many assorted scraps of silk or wool together to make a mat or a quilt, when the one might be dispensed with, and the other bought for a mere bagatelle. These are the ideas, no doubt, which course through the minds of nine out of ten men who escort the ladies through that portion of the gallery to which we have now come; and we sympathize with them, for a finer collection of ladies' artistic work we have seldom seen. Delle M. L. Bourgoin, a pupil of the Convent St. Laurent, Q., exhibits a group of wax flowers of matchless beauty and delicacy. The execution of this work of art—for it is truly such—must have been a long labour of love, and, at the same time a tolerably severe trial of patience to the talented young lady. Mrs. Constant, of Montreal, furnishes another work, less striking, but equally beautiful, a group of water lilies exquisitely fashioned and artistically arranged. One of the prettiest things on view is a baby's dress, embroidered in silk, the exhibitor being Miss Marie Paradis. It would need be a very pretty infant indeed to be so robed. Our papooses now-a-days are in clover. It would be impossible to give anything like an adequate discription of the beauty of the many cushions exhibited. They are worked in every variety of material, and the designs are as original as the method of the treatment is diversified. Some of the Berlin wool is excellent, and there is hardly one exhibit which does not deserve to be where it is.

Turning from this department, or, rather, it should be said, passing under an arcade of beautiful articles—the overflow from the crowded tables, and inaccessible for the purpose of criticism, except with the aid of a tall step-ladder, we come to one of the features of the Exhibition which attracted the notice of every one who passed by. We refer to the stand occupied by Messrs. Boisseau Bros. It would take a belle of the season to do justice to the millinery on exhibition within the enclosure; there is, as a lady of first quality was overheard saying, every novelty of the season and half the novelties of the next. But what attracted the greatest degree of attention was the automatic performance of two birds in a gilded cage, whose warbling, when they were screwed up to pitch, was a wonder. It was almost impossible to believe as their little throats swelled and their breasts distended and their tails drooped as the song went on, that the music was mechanical. But a more interesting automation is an Oriental maiden, about a foot high and black as midnight, and decked out in all the splendours of Eastern attire, twangs her guitar to her own music, gracefully bowing to the admiring throng meanwhile. The little houri is simply a marvel of mechanism.

Mr. J. C. Spence, whose establishment is unrivalled in the Dominion for the excellence of the work proceeding from it, displays a number of choice specimens of stained glass, suitable for private residences and public buildings.

Messrs. Ligget & Hamilton, of this city, have a numerous circle of lady admirers of the handsome toilets which they have on exhibition.

Messrs. J. B. Rolland & Son show an extensive assortment of general stationery, ten[illegible]so a number of French maps, educa- and a[illegible]d religious works, and some very tional an[illegible] volumes, including an illum- finely-boun[illegible] which is deserving of high inated missal, commendation. [illegible]t Paper Co. show a The Canadian Wa[illegible] wall papers of the fine collection of choice [illegible] no reason why, best quality. There seems [illegible] be produced when goods of this quality can [illegible]ufactures here, we should go abroad for man[illegible] for to in the same line in no respect super[illegible] them.

The Dominion Type Foundry Co. make an exhibit of their jobbing and ordinary type.

In the transept on the left side of the building there is a collection of articles which are as remarkable for their fineness of execution as they are as illustrations of feminine patience and faith. It savours of something near akin to heroism for a woman to start out to make a patchwork quilt which will not be a finished article until close on ten thousand little bits of miscellaneous stuff have been stitched together. No man living would be equal to such a terrible strain on his powers of endurance. Several ladies this year show that they are equal to it, and the display of handsome quilts in silk and other materials is both large and choice. As it is impossible for the ladies who inspect the articles to determine which carries off the palm in this line, it is as well not to venture an opinion in print. The display of home-made hosiery and stocking yarn is commendable, which may also be said of the native cloths and flannels, as a whole, though some very inferior stuff has been sent in. By some mysterious dispensation, the bread, maple sugar and syrup and wine exhibits have found their way into queer juxtaposition with the classes of goods just named. The bread is not inviting now, whatever it may have been when the gude wives packed it up with pride. The maple sugar exhibits are decidedly good. There is a very fair show of home-made rugs, rag carpets, etc.

Mr. Van Luppen is the principal exhibitor in statuary. Among other things he shows a series of three, illustrative of the games most popular in our land—lacrosse, cricket, and snow-shoeing. The figures are anatomically true and full of life.

Mr. Mathews is an exhibitor as an amateur. One of his two exhibits is a pleasant landscape, well depicted. The other is a more ambitious effort—an Indian brave in all the panoply of war, halted to scan the horizon for a possible prey or foe. There is good work in this picture.

The Siddon Stove Pipe Dryer is a domestic contrivance which every housewife will fully appreciate. Its range of usefulness is not so limited, however, for it is as well adapted to the shantyman's or the lake navigator's needs as to those of the household.

Burrell's four-pointed steel barb wire fencing attracts a good share of attention. It is manufactured by the Canada Wire Company.

Messrs. Mitchell have a magnificent display of Gasalier and Chandelier work, and other lines of goods in respect of which they have a wide reputation. The lamps shown are of all descriptions, Standard, Bracket, Pendant and Portable. They are all of unique design and the best workmanship.

Mr. Noel Pratt, of this city, exhibits a fine bed, in the Arabian style. It consists of siz pieces, done in bird's-eye maple and black walnut. The arrangement of the woods is peculiar, but satisfactory to the artistic eye. It is a fine piece of work, and Mr. A. LeCaire is to be congratulated upon his purchase of it even on the high price demanded. The suite comprises a bedstead, writing stand, bureau and rack There are also shown a parlour set, seven pieces, black walnut, with upholstering in raw silk and plush, and a most convenient Windsor combined chair and lounge.

J. R. McLaren, Jr., shows a good exhibit of wood-work.

J. Wright & Co. have a rich exhibit of wood-work,—mosaic flooring, panels, screens, etc. This stand is one of the features of the Exhibition.

Doherty Bros. are among the leading exhibitors in the furniture line. They show, among many other exhibits, a Japanese what-not of pretty design, a gilt flower stand, and another in black walnut, fire-screens, and divers other articles of parlour adornment.

Messrs Rubenstein, Bros., of this city, have a fine exhibit of silver plating and other kindred lines of decorative art. They show a fine display of harness trimmings, carriage fixtures, metal spinning, chandelier work, rosettes for bridles, dog collars, door and window plates, taps, castings in pure and German metal, and in yellow and red metal. The firm claim to be the only one in Canada which has succeeded in manufacturing solid nickel plates for use in nickle plating.

Mr James Robertson has an extraordinary display of Saws. His exhibit looks less like a samples of the wares of a firm than than the trophy which one would be likely to see in the hall of some old baronial seat. It is a trophy of another kind, and one both indicative of and creditabte to our age. It is a trophy of man's supremacy over Nature, instead of his discomfiture of man. This exhibit is a beautiful one, illustrative of the great activity of our land. A photograph of it would cause somewhat of a stir in the field. The Canada Saw Works manufactures an all but endless variety of tools for cleaving materials asunder. They have Saws which range from half an inch to six feet and a-half in diameter. These are Circular Saws which are manufactured to meet demands of all kinds. Of these, the Emerson and Spalding Saw is the firm's specialties. There are also the one-man Cross-cut, Mill and Gang Saws, Cross-Cut of all descriptions, Concave, Pit, Jig, Buck and Surgical, and others too numerous to mention.

Mr. L. J. A. Surveyer shows a variety of useful exhibits, among which are match boxes which limit male avarice to one lucifer at a time, a gridiron which saves all the gravy, a bread-cutter which was besieged all day by respectable old ladies—manifestly landladies—and a patent curtain-stretcher, which is an undoubtedly useful invention.

Duval's patent ironing table is to the housewife one of the most interesting objects of the show. It would be a comfort to any family whose means necessitate the doing of the ironing at home.

Craig's Invalid Bed is a wonderful contrivance for the comfort of the sick. The invalid can be slowly raised by the turning of a crank at a foot of the bed, and a change of bed-linen be made, not only without discomfort to him, but to his great relief.

J A Egginton, of this city, has a fine display of glass work, bevelled plate glass, stained glass, etc.

Messrs. Henault Bros & Co show a Refrigerator of great merit. It has folding doors, to each of which are attached several wire shelves, on which dishes can be placed. The peculiar merit of this machine is that its contents are kept dry as well as cool.

Among the life-saving apparatus on show is a life-boat exhibited by M Elysee Jacques of R Jean Des Chaillons. It is of necessity impossible to judge of the merits of a thing of this sort in a hot-house, and the Exhibition Hall is little else. But the boat, as far as an opinion could be fairly formed and wisely expressed, is one which should have the attention of the authorities, and of the proprietors of seaside hotels.

Messrs Rogers & King have a large exhibit, the most conspicuous object of which is a sample of Spence's Hot Water Boiler, Sewer and Waste Pipes, Cast Iron Screens for heating apparatus, heaters, bands, &c.

R. H. Ives & Shns, have a large variety of exhibits. Inside the hall, they show a variety of copying presses, umbrella stands of various design, furnishing material, etc., and particularly Mrs. Potts' patent ground, cool handle, double pointed polishing and smoothing irons, for which it is claimed that they heat sooner and cool later than any other iron in use. On the grounds this firm have a rare display of decorative iron work. The exhibit includes an octagonal summer house, seated to accomodate a party numbering up to a score. It is an elegant structure constructed after an original English pattern, with galvanized roof, and ornamental cornice, with trellis work of an [illegible]sty design surmounting each of the very pr[illegible]ngs. There is also a large variety eight open[illegible] other work, nearly a score of of fence and [illegible] class being an exhibit. patterns in this [illegible] There is also a pair of small but massive and highly artistic wrought iron gates, and a variety of exhibits of castings and finials is also on view. There are also, some elegant designs for desk, counters and railings and some specimens of fencing artistically constructed with crimped wire. Among the other exhibits of this firm, are stable fittings a combined rack and feed box, two portable forges a novel design for a railway switch, etc.

Mr. A. B. Stewart, Craig street, shows a fine exhibit of Gilding. The principal article offered for inspection is a frame for a fine mirror, which, with the frame measures seven feet nine inches in height, by six feet. It is in the Egyptian style, and a worthy setting for the fine French plate glass, which was especially imported for it. He also shows a magnificent gold cornice, grape pattern, and two bird brackets which have readily found purchasers.

In the Machinery class, the most numerous exhibits under one firm's name, are those of Messrs. R. A. Buchanan & Co., who show a great variety of appliances tending to expedite work and do what is required to be done economically. They show a Surface Planer, a Planing and Matching Machihe, a Turning Lathe for iron work, a machine for foot morticing, a turning machine, steam pump, a portable forge, a windmill, which is in operation on the grounds, a full line of mechanics' tools, and

a variety of other connivances for the saving of labour.

There is also in this department a large exhibit by the Consolidated Purifying Company, which attracts much attention Among noticeable contrivances are a combined smutter and separator, an oat and cockle separator, an adjustable brush and wheat polisher, and a middlings purifier. This exhibit attracted a good deal of notice from persons evidently interested in milling operations:

Newell & Chapin, a New York firm, show what is designated "The Patent Universal Grinder." This is one of the most interesting exhibits in the Machinery department It is not "a thing of beauty," but if all that is said of it is true it will be one of the most serviceable implements this age has. The following are among the substances in the reduction of which it has been successfully used: quartz rock, slag, coal, ores, gypsum, borax, limestone, shavings, shells, phosphate rock, brick clay, turmeric, rubber, cork, bone, rosin, oil-cake, and all cereals The firm do not sell their mills, but simply lease for che term of ihe patent.

Shand & Mason had one of their fire-engines in this department· A detailed description of it is unnecessary.

The portable forges exhibited by Messrs. Buchanan attracted a good deal of attention, and naturally so, as a more necessary and convenient apparatus could hardly be contrived for the use of settlers in new territory, of whom we are promised no one knows how many thousands.

E Leonard & Sons, of London Ont, show a semi-portable engine on skids, which was admired by mechanies, who examined it critically,

The Brown & Williams Manufacturing Company, of Stratford, Ont, show a variable cut-off engine, in addition to other exhibits. The engine is 60-horse power, and was pronounced by all who who were competent to pass jucgment on it excellent in all respects, simplicity of construbtion, durabibility, speed aud economy.

W. M. Mooney & Co., who have an office here, but whose head-quarters are at Au-Sable Chasm, are large exhibitors in the line of horse nail shoes. The variety of the display in this lite isa stounding. There are no fewer than forty-two different descriptions of this class of goods shown by this firm alone. This would be a revclation to our old country village blacksmith.

Mr. Frank Wand, of Montreal, shows a magnificent Bird-cage, fine enough to be a model for a seaside hotel. Happy is the bird that has such a home.

The Canadian Rubber ere larger exhibithrs in their line of manufactutes. There is no stall in the Exhibition which has such a variety of goods for inspection, all of them of interest. A pyramid of belting ranging from one to seventy-two inches in width. Among the exhibits are the Standard, Steam, Brewers', Petroleum, Cotton and Linen Hoses, Sieam Packing, flexible Branch Pipes, Vacuum Brakes for Cars, Hose, Clothing, Hospital Sheets, Waggon and Car Springs, Valves of all descriptions, mats of every kind, subsitute for corks, etc.

One of the most interesting objects in the Machinery Hall was the Diving Apparatus. The figure encased within it had a hard time of it, as every man, woman and child that went by seemed to be under a moral obligation to shake hands with the effigy or pinch his legs.

The Wellington Foundry H Prevost & Co, City, have a choice exhibit of Chandeliers and Lamp Fixtures. One of their specialties is a lamp which can be turned upside down or in any other direction with perfect safety.

Mr Homer Baker, local agent for the Babcock Fire Extinguisher, has some specimens of that useful apparatus on show.

The File and Spring Co, Montreal, not only exhibit their goods, of which they have a large display, but also have an experienced operator on the spot to show how the work of file-making is done. This is an art with which machinery can never compete. The hand made file is superior to anything machinery has yet been able to turn out.

A crowd is always on hand at the stand of the Sand Plaster Company, where operations were in progresf. There are few modern inventions, of more interest than this, and it ranks high in point of serviceability on a small scale, but was sufficient to illustrate the principle on which immense work is done by this instrumentality.

Messrs J W Tester & Co, who have a fine Confectinery Store in the Gallrry of the Main Building, show, in the Machinery Hall, some of the processes of the manufacture of their toothsome-wares. The stall is simply beseigned the whole day through by youngstcrs who are anxious to know how their favourite Candies are made, and far more anxious to sample the manufactures.

Mr Noel exhibits a rare display of Arabien Furniture. His Bed Room Sets are exceedingly fine.

The Belgian exhibit is one of great interest, and every one who visits the Exhibition should be careful to give it a call. There is a fine display of fancy woollen shawls. It would drive a crazy person, skilled in tartan lore, to classify the patterns. They are not "plaidies," though at the first glauce they may seem to be. But this is not all the Belgian exhibitors have to show. There are on the counter some of the most beautifully bound prayer books one could find on any shelf; some of the covers, in carved ebony, are very rich. There are also chirurgical instruments, and other similar appliances of evident value.

Senecal, Frechon & Co., have a magnificent Lisplay of Church Ornaments, lamps, censers and images. Mr. R. Beullac also makes a similar exhibit.

Messrs. Fairbanks, show a variety of their well-known scales, a full description of which is impossible. The specimens on exhibit, though by no means fairly representing the range of the firm's manufactures, is both large and interesting. There are scales suited to every line of businesss, some of them so finely adjusted that error in weighing the lightest article is impossible.

The exhibits of Mr. G. Byivin, attracts considerable interests. He fhows, among other things, a snow-shoe mocassin without strings, lacrosse shoes and bathing shoes, the last of which have the special merit of effectually keeping out gravel and sand. The mocasiin referred to is patented, and was awarded an extra prize at the Dominion Exhibition of 1880.

The hotel refrigerator shown by J E Baril is contrivance of exceptional interest. It has a handsome exterior, but that is the least we say can of it. The interior arrangements are on a novel principle. The external air is entirely excluded, and there is a continuous cool current throughout.

Adams & Westlake exhibit through their agent, Mr E A Kemp, their wire-gauze, non-explosive oil stoves, which took the first-prize at the Melbourne Fair. These Stoves are adapted to a variety of purposes—cooking of course—but also house-warming, laundry purposes, tailoring, etc. Another factory, for which Mr. Kemp is also agent, have some exhibits.

Messrs Kemp, Edy & Co have a good display of stamped tinware, planished ware, japanned ware, and everything in that line. The exhibit is one which catches the eye at once in passing by, and it is one which will interest every housewife.

Mr G W Reed is the Exhibitor of some very fine specimens of Marbelized Slate.

The Excelsior Window Shade, in various styles, is exhibited by Mr Cluton de Witt, of this city.

The show of Indian Work offered by [illegible] Watts, a very intelligent redman, is most interesting. It is astonishing the skill which our older brothers of the soil have acquired in the utilization of natural resources. On this stall there are dainty Bonnets, made of Brown Ash, Baskets in endless variety, festoons, etc.

### THE VISITING VOLUNTEERS.

The number of persons that filled the Bonaventure Depot last night to witness the reception of the Troy Citizens' Corps was a sure guarantee of the cordial greeting which they will receive from all our citizens. In the evening, a deputation consisting of Lt.-Col. Lyman and Capt. Cameron, of the Sixth Fusiliers, and Capt. Abbott, of the Victoria Rifles, left for St. Johns, where they welcomed the visitors. The train, which was due at 11.15, was somewhat delayed by the influx of traffic, and did not reach the station until 12.15 this morning. The Sixth Fusiliers, under command of Lt.-Col. Gardner, the Field Battery, under the command of Lt.-Col. Stevenson, and the kiltcd Company of the Fifth Royal Scots, under the command of Capt. Esdaile, had already arrived and were drawn up in line in front of the train. The visitors on alighting were also drawn up in line, the band playing the National Anthem. The physique of the visitors was especially fine, the corps being composed of a body of young and active volunteers. Their dress is black with helmets of the same colour. The men having been drawn up in line, His Worship Mayor Beaudry, who was present, addressed the commander Major Green, welcoming the corps to the city and granting them the freedom of the city during the visit. He alluded to the cordial feeling that had always existed between Canada and the United States which he hoped would long continue.

Mr. Hall, of Troy, briefly replied on behalf of the corps, thanking the Mayor for the hearty welcome which had been extended to them, and for the freedom of the city, which had so generously been offered them. The time was when such a visit would have raised a suspicion that war either existed between the two countries or was near at hand. All such feelings, however, had ceased, and he was sure that the sentiments expressed by His Worship had found a ready response in the hearts of all the men. The line was then formed, and the visitors, headed by the Fusiliers and Field Battery, marched through Bonaventure, up Beaver Hall, and along Dorchester street to the Windsor. Their reception along the route was most enthusiastic, crowds lining the way and cheering heartily as they passed. Fireworks were also discharged by members of the Fire Brigade on Victcria and Dominion squares as the party passed. While in the former square the fountain was set going and a stream of water thrown at a considerable height. On their arrival at the Windsor the men were drawn up to the rotunda and dismissed. The only thing that tended to mar the pleasure of the occasion was the sad intelligence that the President was dead. The visiting party consists of about 190 members, 100 being members of the corps, 20 of the Old Guard, 25 honorary members, and 20 invited guests, amongst the latter, General J. B. Carr and Staff Assistant Adjutant-General McCarn and General Stonchouse. This morning the members of the corps will be treated to a trip down the rapids on the steamer "Filgate" by the Sixth Fusiliers, and will also visit the steamship "Parisian." In the afternoon they will furnish the guard of honour to Lieutenant Governor Robitaille on the occasion of his opening the Exhibition. They will also give an exhibition of their drill on the grounds this afternoon.

The following received just as we go to press will indicate that the foregoing arrangements have been abandoned:—

MONTREAL, September, 20.

*To the Chairman of the Citizens' Committee of Montreal:—*

DEAR SIR,—At a meeting of the officers of the Troy Citizens' Corps, General Carr and Staff, the Old Guard and the Honorary members of the Corps, held at the Windsor Hotel in the early morning of this day, it was unanimously resolved that, by reason of the death of James A. Garfield, the President of the United States, those who participate in this meeting, and the corps, will return to their homes at the earliest practicable moment, and, further, it was resolved that our warmest thanks be returned to the citizens of Montreal for the kindnesses already shown us, and for those in which we have been invited to share; and that our keenest regret be made known that so sad an event has compelled us to forego so much anticipated enjoyment.

C. W. TILLINGHART, Pres.
W. E. KISSELBURGH, Secy.

### TO-DAY'S PROGRAMME.

Horse jumping and riding on the new course in the Park Side extension of the Exhibition Grounds, for the prizes offered by the Citizens' Committee, commencing at two p.m.

Grand reception on the Exhibition Grounds of His Honour, Lieutenant-Governor Robitaille, and other distinguished visitors.

Sale of thorough-bred horses at 10 o'clock by Mr. Thomas J. Potter, auctioneer.

THE FIREMEN'S TORCHLIGHT PROCESSION.

The procession will meet on Champ de Mars this evening at 7.30 sharp. When formed will march to Notre Dame street, thence to St. James, through Victoria square, up St. Antoine, up Windsor to Dorchester, up Mountain to Sherbrooke, thence to St. Denis, down St. Denis to Craig, and will then disband. All the reels and steamers ot the City Brigade will turn out, accompanied by the Brigades of St. Jean Baptiste, St. Louis, St. Cunegonde and St. Henri. The Salvage Corps, with head lights, will proceed first; then Holland's Silver Cornet Band; the divisions of the city will be kept together, East, Centre and West, so that there will be no confusion in case of alarm. Should any alarm occur, the division from which the call is given will at once leave the procession to where it is wanted. In such case the procession will continue without the division so called to duty.

### DOG SHOW.

A dog show opens in the store of ex-Sergeant Wilson, St. Lambert's Hill, this morning. The show will consist of the exhibition of a number of fancy dogs, besides various kinds of birds. No charge will be made for entrance, the show having been arranged expressly as a further attraction to the Exhibition.

### WORTHLESS STUFF.

Not so fast my friend; if you could see the strong, healthy, blooming men, women and children that have been raised from beds of sickness, suffering and almost death, by the use of Hop Bitters, you would say "Glorious and invaluable remedy."—*Philadelphia Press.*

THE GREAT Carreno-Donaldi-Ferranti concert at the Queen's Hall to-night should prevent any other engagement.

CATALOGUES of the Cattle and Horses to be sold on the Exhibition Ground can be had at the auctioneer's tent, near the large ring.

THE GREAT attraction of this evening is the Carreno-Donaldi-Ferranti concert at the Queen's Hall. Tickets at 226 St. James street.

DAMAGED WHEAT.—Mr. Potter, auctioneer, sold the damaged wheat, ex-barge "Arab," for 43c per bushel, buyer paying customs and auction duty, or 51½c in all.

# NEWS BY TELEGRAPH

FROM ALL PARTS OF THE WORLD

## CANADA.

OTTAWA—September 19.

PASTORAL CHANGE.—Rev. Father McCarthy, Parish Priest of St. Jean Baptiste Church in this city, left on Saturday for Plantagenet, having been appointed to the Pastorate of the latter place, which also includes the District of Wendover. The Rev. gentleman's successor in St. Jean's will be Rev. Father Dacier.

A FRAUD AT LARGE.—Since Friday night last Detective McVetty has been looking for a foreigner, who had been passing himself off for a priest in the city. The stranger claimed to be from Belgium, his name Lavienade, and said that he was a friar, and therefore gained the confidence of a number of people. He was a young man of pleasant appearance, being rather good-looking and having a pleasing address; his hair was dark and his face clean shaven, with the exception of the upper lip, upon which he has started a moustache; he wore a dark coat and light pants. He told several parties that he was on his way to Detroit, on a visit to his friends, having only recently came out from Belgium. The clerical stranger put up at Bishop's Hotel, on Wellington street, and made himself at home at the St. Jean Baptiste Bazaar, now in progress, making the acquaintance of Rev. Father Croteau, from whom he borrowed a dollar and a-half on Thursday last. It seems the stranger also got an introduction to the Vicar-General of the Diocese of Ottawa adn let him for quite an amount under false pretences. Friday morning he vanished from the hotel at which he was stopping. Mr. Bishop, the proprietor, had left for Bell's Corners Fair early that day, and on his return at night missed a lot of clothes from his room, also an overcoat. Suspicion at once set upon the missing friar, and the matter was reported to the authorities, when Detective McVeitty began work, but the man had evidently skipped the city without delay, after appropriating the goods, for no trace of him has since been had. The stranger's baggage consisted of a pair of blankets, which had been placed in Mr. Bishop's charge. Upon the parcel being opened, it was found to contain a pair of half-worn boots. It is thought that he went East.

SIR LEONARD TILLEY will leave the city for Manitoba on Wednesday next.

NEW CONSUL.—Mr. Anderson, jr., has been appointed Liberian Consul-General for Canada by the Government of the Republic of Liberia.

THE LUMBER TRADE.—Some twenty car loads of lumber arrived early by the Canada Pacific Railway, from Mackay's Station, for Grant Bros, lumber merchants. Perley & Pattie's mill will keep closed down all this week for want of logs. If timber arrives during the week the mill will resume work on Monday.

VICTORIA, B.C.—September 19.

MOST DISORDERLY SCENES are reported from Yale. One man is cut and dying and another stamped out of all semblance to humanity by a gang of forty men. The wife of the railway contractor was stoned while in a carriage, but not hurt. Rows are of daily and nightly occurrence. The unanimous verdict is that the police are inadequate. Great scarcity of labour prevails throughout the Province.

KIDNAPPED.—A child of a respectable Canadian settler named Hamilton, of Liltovit district, while playing at the door of her father's house on the fifth, disappeared, and is supposed to have been kidnapped. Chinamen are suspected, but no trace has yet been found.

## *GREAT BRITAIN.*

LONDON—September 19.

METHODIST MISSION WORK.—In the Methodist Conference to-day a communication from the Women's Temperance Society of New York, was read, asking the Conference to do its utmost to promote the cause of temperance. The Conference discussed the subject of foreign missions; of the press in the non-Christian countries for the promotion of the gospel; mission work required in papal and semi-infidel nations and especially Mexico; operative Methodism in papal and pagan lands, the resources of Methodism, in numbers, wealth, organization and spiritual life, for the work of the world's conversion, the best means of developing and employing men. The Conference expressed a very general feeling in favour of increased support to schools for training native converts in various Heathen countries to missionary work. Rev. Norman Southern, of the Episcopal Church, asked English support for training colleges in the South, so as to enable increased numbers of negro missionaries to be sent to Africa. Clark (Georgia), and Price (Carolina), spoke in the same sense.

### EXHIBITION "WHOPPERS."

A piano dealer on Notre Dame street has been advertising in the French papers far and near that at last year's Exhibition he took all the first prizes for pianos and organs, and having successfully beguiled his French *confreres*. he now has the audacity to try the same tactics on the readers of the English papers by similar advertisements, in which he says "*his instruments have been proclaimed superior to all others.*" Now there were only three styles of pianos entered at that Exhibition, viz., grand, square and upright, and there could have been but one *first* prize for each of these styles. The New York Piano Co. entered three styles of pianos, and one style of organ only. The record shows that out of these four entries they got three first prizes and one diploma of honour, viz.:—Weber Grand, FIRST PRIZE; Weber Upright, FIRST PLIZE; Weber Square, DIPLOMA OF POWER, and in Cabinet Organs, Bell & Co., of Guelph (represented by the New York Piano Co.), took FIRST PRIZE. This year, in pity to the cheaper instruments and small dealers, the Weber Pianos was restrained from competition, and were only sent for exhibition and for the use of the leading artists, who perform in the grand pavilion each day, from three to four o'clock.

This is on a par with a paragraph sent to a New York musical paper, last week, to the effect that another Notre Dame street house has the honour of having their pianos selected for the public performances of the artists, whereas it is well-known that this honour has been conferred on the pianos of Weber.

SHARP STICK.

SALE OF HORSES, by auction, on the Exhibition Ground, this morning at 10 o'clock, without reserve. Cleveland Bay Coaching Stallion, Suffolk Punch Stallion, Saddle and Driving Horses, &c. Particulars in catalogues. Thomas J. Potter, auctioneer.

# THE PRESIDENT DEAD

## After Eleven Weeks of Suffering He Sinks to Rest.

### VICE-PRESIDENT ARTHUR NOTIFIED.

## Telegraphic Communication With Elberon Suspended.

Special to the MONTREAL HERALD.

ELBERON, September 19, 10.17 p.m.—The President is sinking fast. All of the doctors have been summoned to his bedside.

PEACE AT LAST.

The President died at 10.35. From what can be ascertained, his death was from sheer exhaustion. Warren Young, assistant to private Secretary Brown, brought the news from the cottage at 10 minutes before 11. The first indication that anything serious had occurred was the appearance of a messenger at Elberon hotel, who obtained a carriage and drove rapidly off. It is supposed he has gone to summon the members of the Cabinet who left here about half-past nine to-night. MacVeagh has notified Arthur of the President's demise.

CABINET IN SESSION.

11.15 p.m.—The Cabinet have just arrived, and gone in a body to Francklyn Cottage. All are here except Blaine and Lincoln. MacVeagh has telegraphed the latter two, who are now *en route* to Long Branch, of the President's death. Great excitement prevails here and particulars cannot be obtained. The guard around the cottage has been doubled and no one is allowed to approach it. The Government has taken possession of the only telegraph wire which is connected at Elberon, and it will be almost impossible to get further details to-night, as we are shut off from all communication with the cottage and inmates.

THE KAST BULLETIN.

11.45 p.m.—The following official bulletin has been issued. The President died at 10.30 p.m. After the bulletin was issued at 5.30 p.m. this evening, the President continued in much the same condition as durtng the afternoon, the pulse varying from 102 to 106, with rather increased force and volume. After taking nourishment he fell into a sleep. About 30 minutes before his death, and while asleep, his pulse rose to 120, and was somewhat more feeble. At 10 minutes after 10 o'clock he awake, complaining of a severe pain over the region the heart, and almost immediately became unconcious, and ceased to breath at 10.35. (Signed) Bliss, Hamilton and Agnew.

THE DEATH SCENE.

LONG BRANCH, September 19, 1 a.m.—Previous to his death the only words spoken by the President were that he had a severe pain in the heart. It is supposed by the doctors that death was caused by cloth forming on the heart. Bliss was first notified of the President's expression of pain, and upon entering the room at once saw the end was near. The members of the family were immediately summoned to the bedside. All arrived and perfect quiet prevailed. Mrs. Garfield bore the ordeal with great fortitude, and, after death became evident, she quietly withdrew to her own room. There she sat, a heart-stricken widow, but with too much Christian courage to exhibit her grief to those about her. She, of course, was labouring under a terrible strain, and, despite her efforts, tears flowed from her eyes, and her lips became drawn by her noble attempt to to bear the burden with which she had been afflicted. Mollie Garfield was greatly affected, and bursts of tears flowed from the dhild's eyes.

M'VEIGH'S STATEMENT.

McVeigh has just come to Elberon Hotel from the cottage, and made the following statement:—I sent my despatch to Lowell at 10 p.m. Shortly before that Bliss had seent he President and found his pulse at 106. All the conditions were then promising for a quiet night. The Doctor asked the President if he was feeling uncomfortable in any way, and the President answered, "Not at all," and shorly afterwards fell asleep. Bliss returned to his room across the hall from that of the President. Swaine and Rockwell remained with the President. About 15 minutes after 10 the President awoke and remarked to Swain that he was suffering great pain and placed his hand over his heart. Bliss was summoned and when he entered the room he found the President substantially without pulse and the action of the heart was almost undistinguishable. He said at once that the President was dying and directed that Mrs. Garfield be called and also the President's doctors. He remained in a dying condition until 10.35, when he was pronounced dead. He died of some trouble of the heart supposed to be neuralgia, but that of course is uncertain. I notified Arihur and sent a dispatch to Blaine and Lincoln who are *en route* from Boston.

M'VEIGH TO ARTHUR.

MacVeigh has just sent the following to Arthur:—"It becomes our painful duty to inform you of the death of President Garfield and to advise you to take the oath of office as President of the United States, without delay. If it concurs with your judgment I wil be very glad if you will come here on the earliest train to-morrow morning.

(Signed) WM. WINDHAM, Sec. Tres'y.
T. JAMES, Postmaster-General,
W. H. HUNT, Secretary Navy,
W. MACVEIGH, Attorney-General,
S. J. KIRKWOOD, Secretary Interior.

THE FIRST NEWS.

While Boynton was conversing at Elberon Hotel a messenger suddenly appeared and spoke to the doctor in a monotone, when he immediately left the table at which he was sitting and started on a run for the cottage. Soon after Warren Young came to the hotel and announced that the President was dead. Now, at 1 a.m., the Cabinet is still in session at Francklyn Cottage.

ARTHUR SWORN IN.

NEW YORK, September 20.—In accordance with the despatch to Arthur from the Cabinet in regard to taking the oath of office, messengers were sent to different Judges of the Supreme Court. The first to arrive was Judge Brady, who was followed by Justice Donahue. A party composing the Vice-President and Judges named, besides District-Attorney Rollins, and the eldest son of the new President, assembled in the front parlour of Arthur's residence, where the oath of office was administered. The President has not signalized his intention as to when he would visit the Capitol.

SECURE TICKETS to-day at the office of the Queen's Hall, 226 St. James street, for the Carreno-Donaldi concert. Sig. Ferranti, one of the greatest comic singers of this age, will be one of the company.

# SIR JOHN INTERVIEWED.

## What is Thought of Canada in England.

### "TRUTH'S" FUTILE ONSLAUGHT.

OTTAWA, September 19.

The following interview between a reporter and Sir John A. Macdonald as published, in answer to a question as to what the feeling towards Canada in England is at the present time, Sir John replied:—

There is at present a very friendly feeling towards Canada among the English people. A great deal of attention has been directed towards us lately, and the country is every day becoming better known and understood in England. They know what Canada is now, In short, we never stood so well in England as we do now. Our credit is good and our resources and extent are becoming known. In consequence of this the people are anxious to settle and invest money in Canada. I mixed a great deal among different classes of people while in England and I found a very high opinion of Canada everywhere. Many of the best families are anxious to send their sons out here, and Canadian investments are looked upon as excellent.

"Had you much opportunity of judging of what is thought of Canada as a field for emigration among the agricultural classes?"

"Yes, and I can say from what I have seen and heard that they look upon it very favourably, and that Canada, in the future, will be the great field for English emigration. What was thought in England of the article which appeared in *Truth* ronning down Canada?" Sir John gave a little laugh as he replied: "Oh, nobody minds what *Truth* says about anything. The fact is nothing was thought of the article at all. It produced no effect, and was not even noticed. The object of it was too obvious, but it wont effect the credit of Canada in the least.

Did you see the Princess Louise while in England?

Yes. I met her Royal Highness two or three times, and she looked very well.

Did you enjoy your trip, Sir John?

Oh, yes, immensely. It was a very pleasant trip indeed. As he had interrupted Sir John in the midst of his work, and the Private Secretary was waiting at his desk for it to be recommenced, the reporter did not further prolong the interview, but took his leave of the Premier, who at parting said, "You can say that, on the whole, Canada never occupied such a good positien in the minds of the English people as she does at present."

### AMUSEMENTS

ACADEMY OF MUSIC.

LOTTA.

More than two hunfired disappo'nted people turned sadly away from the door of the Academy last night, unable to get even standing room. Lotta, the favourite of old and young, began an engagement here on this occasion in "Musette," and created as great a *furore* as ever. The little body seems greatly strengthened and improved by her summer of quiet rest and enjoyment at the Lake George Cottage, and gave all the merry points with which her part abounds with even more than her usual zest. She is the same bright, saucy, piquant little creature as ever, flying like a butterfly across the stage, and indulging in the wildest pranks with a rollicking relish that is indescribable. It has long ago been decided that dissecting a suubeam is as possible as analyzing Lotta's art, so we shall not undertake it. She can create more merriment than any lady of her size in the world, and that must suffice. As "Muselte," she was applauded to the echo, her banjo solo being particularly good. Her support was excellent Mr Bradelaw making an unctuous and excellent W A Bekus, while Messrs Anderson, Bainbridge, Wallis, Perce and Bradley. and Messrs Boniface, Noble and Jordoe, let efficient aid.

THEATRE ROYAL

"DEACON CRANKETT."

The Royal was densly packed last evening on the occasion of the first appearance of the "Deacon Crankett" Company, snd several hundred persons were unable to obtain admission. The piece is an excellent one, and the Compaay are of the strongest that has visited Montreal for a long time. "Deacon Crankett" is not the sniffling, canting deacon usually representing this class of New Englanders, but a jovial, big-hearted old man, who delights in doing good. Mr. Maginley, it is sufficient to say, fully maintained the reputation he has gained in this part. Mr. James O'Neill's sailor here "Joe Thatcher" was a powerful though somewhat stagegy piece of acting. Mr. E. J. Buckley as "Egbert Gray," the defaulting banker, was excellent, acted the part of the villian "Egbert Gray" in a very clever manner, and the character of the "Deacon's wife" was admirably filled by Miss Ware. The remainder of the supporting caste fulfilled their parts very creditably. "Deacon Crankett" will occupy the boaras at the Royal all this week.

ALBERT HALL.

"THE MASCOTT."

Little Corinne and her Company attracted a large audience to Albert Hall, last night, to witness the presention of the new and popular cpera, "The Mascott." It is not too much to say that the audience were highly pleased with the rendering of the oper as a whhle, and completely carried away by the simple wonderful performance of Little Corinne. Child as she is. Little Corinne gave as pleasing and and artistic representation of "Bettina, the Mascott," as could be imagined, completely outdoing some older artists we have seen essay tho part. Her acting was almost perfeotion itself, and in one so young excited both admiration and surprise. She also sang the part well, her alto voice being at once sweet, cultivated and strong. Well may "Little Corinne" be considered a prodigy. In that she does, she displays the intelligence of a metured woman in the person of a mere child. In her various characters she makes few or no mistakes, and enters into the spirit of the creation with a naturalness that charms the hearts of her audience, She was greeted with the most enthusiastic applause. We have space for but a word for the rest of the Company, which was excellent, Mr. Frank Hayden made an excellent "Pippo," and performed his most difficult part with grace, judgment and conscientiousness worthy of the highest praise. Mr. M. W. Fiske made a great deal of the low comedy *role* of "Lorenzo," his acting being most mirth provoking throughout. Miss Lizzie Hunt gave a pleasing representation of "Fiametta," both singing and acting in good taste. Miss Fanny Corey was an excellent "Frederick." The orchestration left no room for captious criticism. The costumes were rich and elegant. In a word "The Mascott," as given by little Corinne and her Company, is well worth seeing, and all admirers of good Opera Bouffe should not fail to witness it. The box plan is open at DeZouche's Music Store.

## THE FISHING WHEEL.

HOW SALMON ARE SCOOPED UP ON THE COLUMBIA RIVER.

The San Francisco (Cal.) *Bulletin*, in a recent issue, says:—From an English gentlemanwho has lately travelled overland from British Columbia to this city we learn that a new device, which has been patented, is now in operation takeing salmon on the Columbia river. This device, a machine, is known as "Williams' Patent Fishing Wheel," and is located on the Oregan side of Columbia river, about a mile and a half below the Cascades. This device consists of a jetty of rocks built out from a point on the shore of the river outside of which is a planked sluiceway, to which an undershot wheel with large tank buckets revolves. The sluiceway was built when the river was at its lowest stage of water, and the wheel is hung so that it can be raised or lowered, as may be desired, according to the stage of water. The instinct of the salmon is to run up the river alongside of the bank instead of midchannel. By this the fish can take advantage of the eddies below jutting points of land. On these projecting points of land the Indians have from time immemorial taken salmon in large numbers by using dip-nets. The jetty built out from the point above named makes a larger and longer slack-water behind it, and the salmon rounding the point rush into the sluiceway to get up the river. In the sluiceway, the wheel, which revolves in the current, is gauged so as to sweep within a foot of the bottom, and the salmon are scooped up in the tanks or buckets, which latter let out the water as they ascend. On the wheel descending the fish are thrown out into a through or gutter leading to a pen below, where they reman until taken away to be canned. The arrangement of the sluice, wheel, &c., is a most successful one, the catch of adult salmon, which are the only ones canned, running from 1,500 to 4,400 per day. There is virtually no expense in taking the fish save attending to the pen.

As the fishermen who take salmon in boats in the Lower Columbia river demand and receive from 50 to 60 cents per fish from the canneries, one can readily see what a vast profit the use of the wheel makes to the cannery connected with it. In fact, if the use of this wheel increases on the Upper Columbia river the Canneries located near Astoria and all others who depend on boat-fishing will either have to give up business or run at a loss from a reduction in price of canned salmon, while their rivals will get rich. There are about 3,000 men employed in the boats and making nets for salmon on the Columbia river which the general use of this wheel will throw out of work, and at the same time the permanent plant of the canneries, consisting of piers and buildings, estimated at more than $250,000, will become worthless. These two items, the non-employment of boatmen, &c., and the permanent plant of Canneries, are, however, the least of the evils which will come from the use of Williams' patent fish wheel.

Our informant states that the wheel scoops up all sizes of salmon from one pound weight upward. That all fish below six pounds weight are not used in canning, but are thrown back into the river dead, and float away. He states that at one emptying out of the pen, which he witnessed, several hundred of the young salmon were thrown away as above stated, and as this occurs three times daily many thousands of immature fiish are destroyed weekly, which would in succeeding seasons grow to a size fit for canning. In fact, it is simply a question of a few years, say five, with this fishing wheel generally in use, when salmon canning on the Columbia river, which averages $2,500,000 to $3,000,000 annually, will have to cease for want of adult fish to can.

The use of this fishing wheel means the rapid destruction of salmon-canning in all rivers that have a quick current and rocky shores. It is a patent that should be revoked on the ground of being "adverse to public policy," and its use, or kindred devices by which the immature fish are destroyed, should be prevented under heavy penalties within the limits of the United States. It is time that the interests of those who are to come after the present generation should be protected from wasteful devices, and especially in all matters relating to natural sources of fish and game food, which the cupidity of individual man would destroy with a view solely to his present gain. The taking of fish in public waters is subject to regulation by law, and the Legislatures of both Oregon and Washington Territary should take prompt action by forbidding the use of this fishing wheel if they desire that the industry of canning salmon shall continue on their rivers in future.

## FIRE REPORT.

BELLEVILLE, September 17.—Bush fires are still raging in the back country. The barns belonging to John Plato, John McNamara and R. King have been burned, and it is stated that some bridges near Cloyne have been destroyed.

PRESCOTT, September 17.—About nine o'clock this evening the alarm of fire was sounded. It was discovered to be a small frame dwelling owned by Mr. Benjamin Johnson on Edward street. The dwelling was totally destroyed; loss about $300; no insurance. The firemen succeeded in confining the flames to the dwelling, as the house was unoccupied. The cause is supposed to be the work of an incendiary.

STAYNER, September 17. — During the whole of the past week this village has been in a state of terror and dread from the presence all round it of bush fires which from every direction filled the village with smoke during the day and lighted up the atmosphere with a lured glare at night. About 9 o'clock last night a fire was observed to spring up in the west. It was soon seen, from its peculiar and stationary character, it was not a bush fire but evidently buildings burning, and all of our people who could get away and had conveyances at once started for the fire in the hope of being of some use, when it was found the greater part of the village of Duntroon was in flames. The fire commenced in a stable of Henry Watson, hotel-keeper, and rapidly communicated to the hotel, thence to the store of John Gray, which was also the office of the Montreal Telegraph Co. then across the road to the brick residence of Dr. Kirkland, thence to the store and dwelling of W. Campbell and the blacksmith shop of Mr. Cluson and two other dwelling houses, all of which were totally destroyed. Owing to the long dry spell, the village was without water. Mr. Watson loses barn and hotel, a large quantity of hay, and much of his furniture and a valuable horse. Mr. Gray saved a large part of his stock though badly damaged. Dr. Kirkland loses his house and considerable furniture. Mr. Campbell loses house and all his stock valued at $4000. The total loss is estimated at about $12,000. Mr. Watson has insurance of $2.000 on buildings. The other insurances are not known, but it is thought that most of the restare insured. The cause of the fire is supposed to be from a lamp left in the stable.

## A CARD.

To all who are suffering from the error and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a receipt that will cure you FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the Rev JOSEPH T. INMAN *Station D New York.*

## CORNS! CORNS! CORNS

Everyone suffering from painful corns will be glad to learn that there is a new and painless remedy discovered by which the very worst class of corns may be removed entirely in a short time and without pain. *Putnam's Painless Corn Extractor* has already been used by thousands, and each person who has given it a trial becomes anxious to recommend it to others. It is the only sure, prompt and painless cure for corns known. Putnam's Painless Corn Extractor is sold everywhere.

## REST AND COMFORT TO THE SUFFERING

"BROWN'S HOUSEHOLD PANACEA has no equal for relieving pain, both internal and external. It cures pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful." "Brown's Household Panacea," being acknowledged as the great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, should be in every family handy for use when wanted, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds, and is for sale by all Druggists at 25 cents a bottle. tfrs

CHAMPAGNE.

## WACHTER & CO., EPERNAY,

PURVEYORS TO

Her Majesty the Queen and His Royal Highness the Prince of Wales,

(*By Special Appointment.*)

MESSRS. WACHTER & Co. are the only holders of a Special Warrant for the supply of Champagne to the Royal Family.

J. M. DOUGLAS & CO.,
MONTREAL,
*Agents for the Dominion.*

EXTRACTS FROM LATEST LONDON (ENGLAND) NEWSPAPERS:

"Amongst the many brands of Champagne, good, bad and indifferent, it is often rather puzzling to know which to choose, but when a wine rapidly rises into fame and is acknowledged by connoisseurs to be of the highest quality, it may be inferred that but little risk can be run in ordering it. This is the case with the dry wines of WACHTER & Co., of Epernay, which have of late been so patronised by Royalty in this country, that they may fairly claim to be called Royal Wines."—*Morning Post.*

Referring to "The Queen's Last Ball" London *Truth* says:

"The supper is always most admirable at the Palace, and the wines unexceptionable, notably the dry champagne. In this respect the Queen sets an example which might very well be followed at other fashionable entertainments, at most of which the guests are ruthlessly poisoned with the cheapest abominations to be bought."

## SALE BY AUCTION

OF THE CELEBRATED

## Goldring Phosphate Mine

The Subscribers have received instructions from the Co-proprietors, Messrs. C. H. Letourneux, R. A. R. Hubert and Adolphe Ouimet, to sell at their Auction Rooms, No. 86 St. Peter Street, on

## Monday, 10th October next,

The celebrated Goldring Mine, with Buildings, Tools and Furniture. The Property comprises 1,600 acres of Land, more or less; the Lots join one another, and from an analysis made by J. Baker Edwards, of the Phosphate, on 4th September, 1880, yielded 90.10.

The Mine is situated in East Templeton County of Ottawa. This Township, according to the Geological Map, is considered the richest in Phosphate; only distant from Q., M., O. & O. Railway and the Ottawa River about ten miles, which makes the shipping, either by rail or water, easy: the roads leading to the Mine are good and the transportation of the Phosphate, at all seasons done at moderate rates; several large and substantial buildings are erected, boarding-house for Miners, dwelling for Superintendent, large buildings for Phosphate, powder magazine, store for provisions, forge and tools, office for the Company, tramway cars, and a line of telegraphy connecting direct with the Dominion Telegraph Co., at Montreal; a large quantity of tools of the best make. The property is wooded chiefly with hard wood.

Any one desirous of visiting the property can do so in the space of 24 hours, including going and coming from Montreal. There is a guardian on the property, who is there for the purpose of shewing the property. From the Station, at East Templeton, the public road leads direct to the Mine.

The conditions of the sale will be ¼ cash, ¼ in 6 months, and ½ in 12 months, with interest at the rate of 6 per cent. on the balance unpaid. Each bidder will have to deposit $1,500.

Further information to be obtained from the Auctioneers.

Sale at ELEVEN o'clock A.M.

# THE QUEEN OF THE COUNTY.

CHAPTER XLI.—Continued.

" Colonel Moffat loves me, sister, and I—I love him."

" You have told each other so, darling?"

" Yes; we said it to each other to-day; Lady Lanton gave me leave."

" You are happy."

" Yes, I am happy; yet again unhappy. She who lives up there—the woman who is called Countess—told me that you loved Colonel Moffat. Dulce his name is Frederick—I am to call him Frederick."

Dear, pretty child! she half-whispered this to herself.

" No, Lotty," I said; " I dislike Colonel Moffat."

" Dislike! what is that?"

" The feeling that you have towards her whom you call ' woman,' up at Mallerdean."

" And is that dislike? I simply feel nothing about her. She is to me like a dream, or cloud, that I forget, as it fades away. Why is he—Frederick—like that to you?"

" Because he is not a good man."

" That is what Buffy told me, Dulce. But Lady Lanton also said that you loved him; in short, Dulce, they both said to me, ' Your sister will not let you marry him.' "

" I do not wish you to marry him, Lotty."

" Ah, Dulce, am I to die, then?"

" Not if I can die for you," I said.

" Dear Dulce, when we were little things in the nursery, Dudu always gave up everything for us. She will do so now for me."

" Willingly, dear; but listen —you love him you call Frederick. Can you ever love another as you love him?"

" Oh! never! never!"

" Then you can understand, so did I love Peter, your brother. When he died, I besought God to take me also. I refused to be comforted—I lay down waiting to die —I uncovered his dead face, and looked thereon, waiting for my heart to burst; at that moment I heard a child's voice. Then I remembered that your brother had left a little child, and that I must live for the sake of Peter's child. When my son wants me no more, I shall go home to where his father is waiting for me."

" Why did they say you loved Frederick?"

" They say it that you might trust them, and not me. I wish you to put faith in me, and me only. I desire your happiness, dear child."

" What do you wish me to do, Dulce?"

" To see Colonel Moffat no more until he has spoken to our father and mother."

" I can promise that; but, Dulce, you will try to like him?"

" I love you so much, that if ever you are his wife, that love will suffice for both."

I wrote that evening to my father and mother. On the following morning the Mallerdean carriage came down for Lotty. I sent it back without her, and fearing the consequences, begged her to go and spend the morning with Lady Joyce. She had scarcely reached her house, when the doo of my sitting-room was thrown open, and Colonel Moffat was announced. He began by fulsome praise of myself. I received him coldly enough, but not one whit abashed, he began to propitiate me, as he thought, by the high-flown expression of his admiration for me. He said, if he could have flattered himself with the most distant hope of obtaining my favour, he would have left nothing undone to deserve it. He flung in amongst his remarks, with much skill, a catalogue of all his wordly advantages, his probable wealth and position. Suddenly, seeing my displeasure at this strain, he hastened to add that, seeing no hope of obtaining my affection, which, to him, would have been a priceless treasure, he had turned to my sister Lotty. The only thing left him was the hope of becoming my brother.

" Real love," I said coldly, " never wooes after this fashion. If you have no stronger affection for my sister than what is inspired by the wish to become my brother, our conversation is at an end."

" Pray don't be so hasty. It is impossible not to love the pretty impulsive creature."

" Impulsive!" I replied. " That word is offensive and disrespectful, as applied to my sister."

" I am unfortunate. Nothing I can say finds favour with you," he answered and tried to look humble.

" Because, sir, you are acting a part. You try to gain the love and affection of a young guileless girl, knowing that you do not care for it in reality. You care only for yourself, and your own amusement. You are thus acting in this affair from some double motive, either to oblige your uncle —who desires to see you married—in which case you had better choose some fashionable girl with a heart like your own; or else you are incited to endanger my sister's happiness, because you and your advisers know that you can give me pain through her suffering."

" Nay, madam, why should you think so hardly of me? I have offered my hand to your sister—she has accepted it. If I remember right, you gave away your heart in half the time that she has. It is almost a month since the happy day on which I first saw her."

His manner was flippant and coxcombical. He meant to offend me, to make it apparent to me that, as he must marry, he would select a little, foolish, loving thing, who was pretty enough to be his wife, and fond enough to give him no trouble.

I felt it was the best to be calm, so I said:

" I wrote last night to her father and mother, Until they arrive I must request you not to attempt to see my sister."

" Has she a father and mother? Where do they they live? I beg your pardon. I thought you were her sole protector and guardian."

My only reply was to ring the bell, and order his horse to be brought round.

The more I thought over the matter, the more convinced I became that there was some plot at the bottom of it. He had no intention of marrying the child. The tones of his voice had a ring of mockery, when he spoke of her, that was most galling. While his manner, his expression, the glow in his eyes, was more offensive and insolent when he alluded to me. It was easy to read that a conquest over me would be the most gratifying to his vanity—or was it malice? I felt sure that some animical feeling was at work; it might be either revenge or ambition. A marriage with me would be good in a worldly point of view, and he might feel a charm in the effort to subdue a proud woman who disliked and despised him. These motives combined would make him try every method to succeed. Did he think for one moment that to save my Lotty I would sacrifice myself?

CHAPTER XLII.

THE DIFFICULTY OF LIVING IN IT.

I had not much time to pursue my thoughts, for the rapid clattering of a carriage driving up prepared me for Lady Lanton. She entered, and I saw she was in the worst mood.

Should I now tell her of the Countess? It seemed disloyal to her to keep the secret longer. Or would she say something by which I should be justified in telling her that other secret? I was overwhelmed by both my secrets, and felt bewildered by both.

She scarcely greeted me, and before I could speak she asked haughtily for Lotty, and said she should not leave the house without her. She had brought her maid with her to pack up her things, to take her altogether away from my charge. The absurd jealousy of my disposition, the enviousness of my nature, the ill-temper that, not being happy myself, made me dislike that any other person should be so, warranted her in removing such a sweet creature from unkind care. She had heard of me at Harpendale—my airs, my pride, the arrogance with which I queened it; but I had done so for the last time—the whole country must hear the truth.

There is a certain limit to human breath and tongue. After searching the house, Lady Lanton left, but not before I told her that I had written to my father and mother, to tell them of the honour done to their daughter by Colonel Moffat's proposal, and that in six days at the latest I expected their arrival, and that until then the lovers must not meet.

She laughed scornfully as she departed; but I knew I could trust Lotty.

And I was right.

They tried all possible means to surprise her into an interview with him. The attempts that were open, and patent to her mind, such as letters or messages, she brought at once to me. When they endeavoured by stratagem to lead her to meet him, she did not understand them, and so did not obey. She had promised me not to see or speak to Colonel Moffat until our parents should arrive. In all this Buffy was of the greatest use. He warned me of every plot, and was at hand in every emergency. Poor little Lotty drooped and faded. She was like a little snowdrop blighted by a keen frost.

" I feel a foreboding," she said constantly.

" Do you feel no strength to battle against it?"

" No," she answered, shivering; " but it is from nothing you said about him. Lady Joyce spoke of Frederick as people speak of those whom we are not to love. If he is of that nature that I may not love him, how dark the world will be!"

Poor little Lotty! Love was awakening her reasoning powers. Would it be for good or ill?

It was on the fourth day after Lady Lanton's visit that we were sitting together talking. I encouraged her to speak of Colonel Moffat, and prepared her gently for what I was sure would be the decree of our father and mother. A carriage drove up to the door. Once more—without preparation—without the common civility of asking the favour of an interview—Mr. Cator and Adrian Levassue were ushered into the room.

After exchanging the usual salutations, he begged the favour of seeing me alone. As Lotty rose at this remark to leave the room, she plucked me by the sleeve. I followed her out.

" Is that Frederick's brother?" she whispered.

In an instant flashed upon me the likeness I had been unable to trace. A rush of joy —and overwhelming ecstasy—made me clasp her in my arms, and almost carry her to my bed-room. " Thank God! thank God!" I whispered to my heart.

" Answer me!" she pleaded; why do you look so glad?"

" Not his brother, I replied; " 'tis his son."

" Son! Was he married before?"

" No, that is why we think him not fit to be your husband; because he has a son and never had a wife. Do you understand, my Lotty?"

" Yes. There is that grave in the church yard always covered with flowers. Lady Joyce told me that the man who dresses it does so from remorse, because the girl, Mary Arcot, buried there, was disgraced by him, and could not live. Where is she that he—that Fre—that Colonel Moffat disgraced?"

*(To be Continued.)*

## Real Estate.

# REAL ESTATE AGENCY,

**Established 1863.**

TO PROPERTY OWNERS:

As I will shortly issue my new Catalogue of properties for Sale, parties desiring to sell are respectfully requested to give me their instructions immediately. My Catalogues have not only a very large city circulation, but are sent to all parts of the Dominion, England and the United States. Proprietors will readily understand the great advantage to be derived from having their properties appear in this Catalogue,

WHICH WILL BE INSERTED FREE OF CHARGE.

If parties prefer it, their property will be offered without publications.

No charge or advertising or commission will be made if a sale is not effected.

TO CAPITALISTS—MONEY PROPERLY SECURED ON MORTGAGE.

Notwithstanding the large amount of money invested in mortgages through my agency during the past sixteen years, none of my clients have found it necessary to buy in a single property or take legal proceedings for the recovery of either principal or interest.

**H. H. GEDDES,**

Real Estate and Financial Agent,
119 ST. FRANCOIS XAVIER STREET.

# PROPERTY FOR SALE

By H. H. GEDDES.

FINE RESIDENCE—That superior first-class and very commodious four-story cut stone residence, No. 696 Dorchester street, directly opposite the elegant mansion and beautiful grounds of the late Harrison Stephens, Esq. The house is constructed in the most substantial manner, and contains about 18 most conveniently arranged, well finished apartments; Plate Glass in the principal windows and doors, Elegant Marble Mantles, Wash Basins, with hot and cold water; handsome stone steps to front entrance, with frost proof Cellar underneath, two Coal Cellars, Furnace, &c., Stabling and other outbuildings, with lot 70 feet deep, and lane in rear. The whole constituting one of the finest terrace residences in the city. The beautiful and convenient position of this property is too well known to require comment. A large portion of the price can remain at six per cent. Perfect title

THOSE SIX PRETTY STONE COTTAGES. Nos. 4, 6, 8, 10, 12, and 16 on Lincoln Avenue, close to Sherbrooke, just the homes for men of moderate means.

THAT FINE RESIDENCE with 10 arpents of garden land belonging to Alex. Ramsay, Esq., situate on the Lower Lachide Road.

CADIEUX STREET—Those neat Brick Cottages, Nos. 36, 42, 64, 66, 108, 143. These houses are within the reach of small capitalists and paying investments.

A HANDSOME VILLA with pretty little Conservatory at Weredale Park, on Dorchester street West. Free from city taxes.

A NEW AND VERY PRETTY DETACHED DOUBLE RESIDENCE, with good stable, on Dorchester street West. No city taxation.

CHOICE INVESTMENTS—A charming corner residence, nearly new, built expressly for the use of the present owner, containing many additions and improvements rarely met with in this city. The house has an average frontage of 27 feet, and is 41-6 feet deep, nice little Conservatory, Coach-house and Stable. Lot 31-6x116. Also, adjoining the above and belonging to the same proprietor, two handsome Stone Cottages and vacant lot, suitable for two more similar houses. The position is one of the most salubrious in the West-End, and to any one seeking an attractive home or good investment this presents a rare opportunity. A large portion of the price can remain on the property at six per cent. The title is perfect.

CRAIG STREET PROPERTY—That very central and prominent corner property Nos. 517, 519 and 521 Craig street, corner St. Charles Borromee street, consisting of two cut stone front stores with dwellings. This property is situated on one of the greatest thoroughfares in this city, and in the hands of an energetic business man cannot fail to prove a good investment. Sheriff title.

Nos. 10, 12, 14, Drummond street—These houses are splendidly situated, well built and in perfect order, and being medium sized and central situated, are in constant demand by an excellent class of tenants, and are consequently a desirable investment. While to any one requiring a pleasant and economical home the amount of interest on the price demanded will represent but a very moderate rental. Will be sold separately, if desired, on liberal terms.

No. 8 Drummond street for sale. This commodious Stone residence was built expressly for the use of the present owner; thoroughly heated by hot water; conveniently arranged kitchen on ground flat, with Cooking Range, fine Fuel Cellar, and about ten other handsome apartments, containing every improvement necessary for convenience and comfort. Perfect title and moderate terms.

DETACHED RESIDENCE, 484 ST. LAWRENCE MAIN STREET—This very neat residence was fitted up expressly for the use of one of our leading architects, and contains every convenience, with excellent stabling and coach house, and lot of land 47 x 140. The site is not only pleasant and convenient as a place of residence, but is rapidly increasing in value for business purposes. Perfect title.

H. H. GEDDES,
119 St. Francois Xavier Street.

FINE CORNER RESIDENCE—I am instructed by Michael Donovan, Esq., to offer for sale that exceedingly well-built commodious Stone Residence, No. 235, corner of St. Antoine and Aqueduct streets. The house is three-story, 32 x 40, and contains about 15 fine apartments, fitted up in the most comfortable manner, and contains all the modern improvements. The Coach-house and Stabling is also commodious and built of stone. The lot is 52 x 173, enclosed by a stone wall, and has a lane in rear—the whole presenting one of the finest homesteads in that convenient and pleasant locality. Perfect title and liberal terms.

THE ELEGANT VILLA AND GROUNDS, containing 57,800 square feet, No. 81 Redpath street, belonging to the Estate late Peter Robertson, Esq.

A most attractive Semi-detached Corner residence, size 42 x 44; two-story; fitted up with all modern improvements and handsomely finished, and is situated on one of the most favourite streets in the West-End. Any person desiring to secure a really attractive and comfortable house should not fail to examine this property.

The two Stone residences, with bay windows, 88 and 90 St. Famille street; only $1,000 cash required down.

The McClellan property, fronting on Wellington, Young and Mupray streets, 31,845 superficial feet; a splendid chance for speculation.

Nos. 119 and 121 Panet street, very cheap.

Nos. 18 and 20 Wolfe street, brick cottages.

Building lots on Peel, near Burnside street.

Three Cut-Stone, conveniently arranged houses, 621, 623 and 625 Sherbrooke street.

Brick cottages, Nos. 36 and 42; Coursol street, close to C. P. Railway

Substantially built double tenement, 67, 67½ Victoria, near Sherbrooks street.

Neat brick residence, 258 St. Antoine street, close to Lusignan street.

Five first-class Houses, Windimere Terrace, McKay street, above St. Catherine street.

Cut stone semi detatched Cottage, heated by steam, No. 74 Aylmer, close to Sherbrooke street.

First-class Stone residence, 268 University street, near Prince Arthur street.

Two good solid Brick houses, Nos. 149, 151 St. Dominique street, opposite St. Lawrence market.

Two first-class Cut Stone residences, 28 and 30 St. Famille street, near Sherbrooke street.

Valuable business site, 595 to 601 Craig street, opposite the *Gazette* office.

The excellent property, known as McCready's, Nos. 81 to 285 and 93 to 101, corner Bonaventure and Mountain streets.

Lot 72 x 109, and tenements 7 to 13 on Hermine street, near Craig street.

Villa lots, 44 x 120 and 62 x 120, Nos. 84 and 91 Durocher street.

Commodious double tenement, corner lot No. 12 St. Denis street, opposite the Garden.

First-class residence, latest improvements, on Peel street, near Sherbrooke street.

Building lot, 48 x 120, on University street—a pretty site for a villa.

Commodious residence, 856 Sherbrooke street, opposite the College grounds.

Valuable business property, corner St. Joseph and St. Martin streets.

Corner villa lot, 54 x 119, on Sherbrooke street, free from city assessments.

MAGNIFICENT SEMI-DETACHED RESIDENCE FOR SALE—I am instructed by Robert Brown, Esq. (who is about removing from the city), to offer for sale his splendid residence, No. 1,149 Dorchester street. The size of the house is 42 6 x 46, built of stone, interior division walls built of brick, three stories and basement, galvanized iron roof, wide verandah on side and in rear; contains about 20 elegantly finished apartments, numerous wardrobes and linen closets, baths and W. C., &c.

The position is unexceptional. Size of lot about 76x230, 17,530 sup. feet. For permits to view and other information, apply to

H. H. GEDDES,
Real Estate and Financial Agent,
119 St. Francois Xavier Street, Montreal.

DETACHED VILLA FOR SALE ON UPPER UNIVERSITY STREET. — That handsome detached villa, 278 Upper University street, directly opposite Prince Arthur street. The size of the villa is 40 feet front by the same depth, most substantially built, and of strikingly handsome design, and contains every improvement necessary for convenience and comfort. Nice little conservatory, and good stabling, &c. The splendid position of this property is too well known to require much comment. Suffice it to say, the site being elevated, open on each side and in rear, and the front being directly opposite a wide avenue, the charming view can never be obstructed, and being surrounded by first-class properties, the value can never be depreciated. The lot measures 85 feet in front, and 136 feet in depth, with a 25 feet lane in rear. Terms of sale very reasonable. Perfect title. For permits to view and further particulars, apply at my office,

H. H. GEDDES,
Real Estate and Financial Agent,
119 St. Francois Xavier Street, Montreal.

DETACHED VILLA AND GARDEN, 50 Durocher street, for sale. This fine villa is built of solid stone, two stories, 50x40 and extension, kitchen about 20x16; spacious halls, and about 18 commodious apartments. Very fine hot water heating apparatus; frost proof cellar; wide verandas in front and on both sides of the house—in fact, every improvement necessary for convenience and comfort is to be found in and about this house. The coach-house is built of stone, with excellent stabling. Lot of land belonging to the house measures 108x138, or 14,989 superficial feet, with fine shade trees.

In Durocher street a first-class brick tunnel has lately been constructed, and is one of the most perfect drained, healthy and pleasant positions in this city.

EXCHANGE OF PROPERTY—Will exchange, two first-class houses, which are well rented, for Building Lots situated in the West End. To parties having unproductive property this presents a rare opportunity of securing an immediate revenue without the trouble of building.

FIRST-CLASS DOUBLE STONE TENEMENT—this fine property was erected by a practical builder for his own occupation. Size 28 x 50, three-story mansard roof, fine, bright basement and large cellar. Also, in rear, a good outbuilding which was formerly used as a dwelling. Lot 2 x 95, lane in rear. This house is situated on one of our leading West End, streets, close to Sherbrooke street.

TENURE OF BRICK HOUSES, opposite the Q., M., O. & O. R.R. Work Shops. This excellint block of solid brick houses is known as Nos. 56, 58, 60, 62, 64, 66, 68 and 70 on Colborne Avenue, corner of Dorchester street. Although this property has always rented well, the demand for houses and the revenue will be greatly increased by the new workshops of the Quebec, Montreal, Ottawa & Occidental Railway, which has just been built directly opposite. The houses are paying a good rate of interest, and are to be sold only in consequence of the advanced age of the present proprietor. The title is perfect. No incumbrance.

H. H. GEDDES,
119 St. Francois Xavier Street, Montreal.

Osborne street—Double Stone Cottage, 42 x 44, exceedingly handsome.

Metcalfe street — First-class stone residence, price very moderate

Durocher street — Handsome Brown Stone Front House, with Garden.

Dorchester street—Two splendid Residences, worthy of special attention.

University street— A most attractive Villa and Grounds.

Durocher street — Detached Villa and Grounds, most desirable.

Victoria street, corner Sherbrooke street—Finest Tenement in this city.

Sherbrooke street—Four first-class Cut Stone Houses.

Aylmer street, near Sherbrooke street—Cut-stone Cottage.

Weredale Park—Beautiful Stone Villa

Lower Lachine Road—Gentleman's Residence and Grounds.

University street, near Cathedral—An excellent House, cheap.

Lincoln avenue—Six pretty cottages.

St. Dominique street—Two comfortable solid Brick Houses.

Craig street—Two Stores and Dwellings, pays 9 per cent.

St. Famille street—Two first-class Residences.

Durocher street—Two handsome Stone Tenements.

Peel street—Three fine properties.

Drummond street—Four excellent Houses.

And a large number of other most desirable properties, of which particulars can be obtained at my office.

## Medical.

DR. ROBERTS'S
CELEBRATED OINTMENT,
CALLED
"THE POOR MAN'S FRIEND,"

is confidently recommended to the Public as an unfailing remedy for wounds of every description; a certain remedy for ulcerated legs, burns, scalds, bruises, chilblains, scorbutic eruptions, and pimples in the face, sore and inflamed eyes, sore heads, sore breasts, piles. It also entirely removes the foul smell arising from Cancer.

Sold in pots, 13½d., 2s. 9d., 4s. 6d., 11s. and 22s each; and his

**Pilulæ Anti-Scrophulæ or Alterative Pills**

Proved by more than sixty years' experience to be one of the best medicines for purifying the blood and assisting Nature in her operations. They form a mild and superior family aperient, which may be taken at all times without confinement or change of diet.

Sold in Boxes at 13½d., 2s. 9d., 4s. 6d., 11s and 22s. each.

Prepared only by BEACH AND BARNICOTT, Bridport, Dorset, England, and sold by all Medicine Vendors.

January 31 M 6m 26

LOCKYER'S SULPHUR HAIR RESTORER is the best for restoring grey hair to its former colour. It produces a perfectly natural shade, and is absolutely harmless. Recommended for destroying scurf and encouraging growth of new hair.

LOCKYER'S SULPHUR HAIR RESTORER will darken grey hair, and in a few days completely bring back the natural colo The effect is superior to that produced by an instantaneous dye, and does not injure th skin. Large bottles, 1s. 6d.—Lockyer's is equal to the most expensive hair restorer.

LOCKYER'S SULPHUR HAIR RESTORER—Sulphur being highly prized for its stimulant, cleansing, healthful action on the hair glands, LOCKYER'S RESTORER is strongly recommended. It is most agreeable in use, and never fails in its action on the colour glands, always restoring and maintaining that which has been lost. No other hair dressing is required. Large bottles, 1s 6d. Sold by Chemists, Hairdressers and Perfumers in London, the Country, and throughout the world.

Lockyer's is equal to any of the high-priced preparations.

PEPPER'S QUININE AND IRON TONIC rouses and developes the nervous energies, enriches the blood, promotes appetite dispels languor and depression, fortifies the digestive organs. Is a specific remedy for neuralgia, ague, indigestion, fevers of every kind, chest affections, and in wasting diseases, scrofulous tendencies, &c. The whole frame is greatly invigorated by Pepper's Tonic, the mental faculties brightened, the constitution greatly strengthened, and a return to robust health certain. Bottles, 32 doses, 4s 6d; next size, 11s. Sold by Chemists everywhere. The name of J. Pepper, Bedford Laboratory, London, must be on the label. There is no Tonic so certain in effect as Pepper's Quinine and Iron. It is strongly recommended to residents of India and the Colonies, and should always be kept ready for use in every case of fever or febrile condition.

PEPPER'S QUININE AND IRON TONIC strengthens the nervous and muscular system, improves digestion, animates the spirits, recruits the health. For debilitated health from the effect of hot climates this tonic is invaluable.

PEPPER'S QUININE AND IRON TONIC contains an unvarying amount of quinine and iron. It possesses all the powers of these valuable tonics in banishing diseases and symptoms traceable to weakness, a low state of the nervous system, enfeebled condition of the body, and derangement of the general health.

LIVER COMPLAINT

DR. KING'S DANDELION AND QUININE LIVER PILLS (without Mercury.)

The BEST REMEDY for BILIOUSNESS STOMACH DERANGEMENT, FLATULENCE, PAINS BETWEEN THE SHOULDERS, BAD APPETITE, INDIGESTION, ACIDITY, HEADACHE, HEARTBURN, and all other symptoms of disordered liver and dyspepsia. Acknowledged by many eminent surgeons to be the safest and mildest pills for every constitution.

In boxes at 1s 1½d, 2s 9d, and 4s 6d.

Sold by Chemists and Medicine Vendors throughout the world.

Prepared by Jas. Rorke, London.

Specially valuable Pills for residents abroad and travellers.

February 6 31

TARAXACUM AND PODOPHYLLIN.—Prepared only by J. Pepper, London. This Fluid combination, extracted from medicinal roots, is now used instead of blue pill and calomel for the cure of dyspepsia, biliousness, and all symptoms of congestion of the liver, which are generally pain beneath the shoulders, head-ache, drowsiness, no appetite, furred tongue, disagreeable taste in the morning, giddiness, disturbance of the stomach, and feelings of general depression. It sets the sluggish liver in motion, very slightly acts on the bowels, giving a sense of health and comfort in 24 hours. It is the safest medicine. Taraxacum and Podophyllin is a fluid made only by J. PEPPER, Bedford Laboratory, London, whose name is on every label. Bottles, 2s. 9d. and 4s. 6d. Sold by all Chemists. A most valuable and essential medicine for India, Australia, the Cape, and Colonies generally.

## PARISIAN GOSSIP.

From our Special Correspondent.

PARIS, September 2, 1881.

KING KALAKUA

has paid another short visit to this capital, of which he is said to appreciate very fully the peculiar charms and objects of interest. He has seen nearly all the "lions," and finds them so interesting and amusing that he expressed his intention of coming back for a lengthened stay, and bringing his Queen with him. On Monday, he visited the Chamber of Deputies, where he was duly received by one of the questors and by a Secretary of the Presidency. After visiting the Salle des Pas Perdus and the Salle du Trone, he entered the Chamber itself and seated himself in the Speaker's Chair, to judge of the *ensemble*. His Majesty was shown the places filled by the different political groups, and the seat occupied by M. Gambetta when not presiding; and after an exploration of the Library, the Polynesian Monarch returned to his hotel. On Sunday evening he attended the Besselievre garden concert in the Champs Elysees, and professed himself delighted with the lovely garden and the excellent music. He has been most assiduous in his visits to the Electrical Exhibition and in his efforts to comprehend the explanations given him of the marvels there displayed, including the Telephonic Saloons, in which one is only allowed to remain ten minutes, so numerous are the relays of visitors, eagerly awaiting their turn to listen to the play at the Francais, or the music at the Opera, all of which is heard as perfectly as though the listeners were in those buildings, much amusement being also derived from the carrying on of short but lively conversations between the people in the other telephonic rooms of the Palace. After winding up with the Gobelins, Pantheon, Museum of Arts and Trades, Hotel de Cluny, Louvre, National Library, &c., King Kalakua made calls on diplomatic personages, and then left for London, accompanied by his two chamberlains. It appears that the Queen of the Sandwich Islands bears the name of Kapiolani.

SIR CHARLES DILKE

and other notorieties, English, Irish, and others, have also passed through Paris within the last week; the Paris press has jumped to the conclusion that he has come to beseech M. Barthelemy St. Hilaire to use his influence in inducing the French Government to prolong the existing Commercial Treaty with England; but Sir Charles Dilke has taken pains to assure all about him that his passing through Paris has no political aim or intention, and that any calls he may make will be merely personal and friendly.

The Electrical Exhibition is still the main attraction of this region at the present time. The magnet, sufficiently powerful to raise a ton's weight, and the little cabinets, like sentry-boxes, containing a telephonic apparatus and connected together (in the upper gallery), are among the most visited of the exhibits. It is very amusing to speak from one of these boxes, and to obtain an answer from another one, the answer being probably from some unknown person.

ELECTRICITY.

M. Jamin continues to make great advances in the improvement of his electrical candle. He encloses his carbon loop in a carefully closed vessel containing air. The electrical action at first produces the combination of the oxygen and hydrogen of the atmosphere, and the usual coloured vapours are seen; these are soon destroyed by the oxygen combining with the carbon; nitrogen and carbonic oxide alone remaining in the glass globe. The phosphorescent arc then becomes quite fixed, giving light of a greenish blue tint. By this arrangement, each candle lasts 160 hours. But the interest now excited on the subject of Electricity is by no means confined to the Exhibition in the Palace of Industry. In addition to the experiments which are being carried on in the Exhibition buildings, for testing the feasibility of employing electricity as a means of traction, others, dealing specially with the question of employing the wonder-working fluid as the motive power on tramways, are now being made on the tram-lines going to the Place du Trone. The system now being tried on the line in question is not that of Siemens, the railway not being connected with the conducting wires, and the waggons themselves containing the electrical motors. The portion of the line on which electricity is thus being employed experimentally is two kilometers (about a mile and a quarter) in length.

PRESS SOIREE.

The soiree recently given at the Industrial Palace by the heads of the Exhibition to the Press was a great success. Only a thousand invitations were issued, and these were sent only to the notabilities of some kind or other; M. Gambetta, several of the Ministers, the Director of the Observatory, and some of the leading artists and writers of the capital, being among the favoured recipients of invitations. Interesting as the Exhibitton is in the daytime, it is immensely more so by night, the effulgence of the electric light throwing a sort of glamour over the scene, and lending thereto (and especially to the nave, arranged as a garden, with flowers, foliage, statuary, lake, winding paths in the temporary greensward, and so on), the weird charm conventionally designated as "fairy-like." The least successful part ot the exhibition will probably be the attempt to rear flowers and ripen fruit by electricity, to the exclusion of sunlight. The affair was begun too late; and the wonderful display will come to an end before the attempt can have had the necessary duration for settling the deeply interesting and important question it was designed to elucidate.

A TERRIFIC HAIL-STORM

has done immense damage in the Canton of Geneva and in Savoy. The storm, which came from the mountains of the Jura, appeared to have its centre directly over the town so whimsically favoured by the late ex-Duke of Brunswick. None of the hail-stones were smaller than hazelnuts; most of them were the size of pigeon's eggs; they fell in such quantities that the fields were as white as though snow had fallen; and after twelve hours of rain and of sunshine, they still lay on the ground in heaps. The vines and fruit-trees were utterly ruined, bruised, broken, shivered, and the ground was strewn for miles with leaves, boughs and fruit. The fatal effect of hail on vines is but too well known to all wine-growers; a grape, ever so slightly touched by a hail-stone, being utterly spoiled, and inevitably decaying in the course of a few days, so that it is of no use in wine-making. Although there was no wind, and the hail fell straight, skylights and conservatories were broken in, and all the roofs in the region of the storm were more or less injured. Birds perished by tens of thousands. At Collanges, for instance, 600 dead and mutilated swallows, chaffniches, and sparrows were picked up under three of the plane-trees of the Place de l'Eglise, in the branches of which the poor little winged victims had sought refuge from the storm. Bellerive and other favourite places were even greater sufferers; the lightning splitting trees and throwing their limbs to a distance of 50 paces, and intensifying the terror and mischief caused by the tremendous downfall of hail.

DECREASE IN THE WINE YIELD.

The last 15 years have so sadly diminished the yield of the French vineyards that, last year, they only yielded thirty million hectolitres, instead of the eighty-four millions they yielded in 1865, when these renowned vineyards were at the height of their glory, and produced a value of no less than two milliards of francs, or one-half of the enormous fine imposed on France by Germany at the close of the last war. Enormous quantities of wine are now imported into this country from abroad, mainly from Spain, which is now endeavouring to obtain better terms for the produce of its vineyards from the French tariff. When it is considered that, of the 2,300,000 hectares of vine-lands formerly in full bearing and of splendid quality, the phyloxera has utterly destroyed 500,000 hectares and all but destroyed 450,000 more, it is not surprising that some of the great aristocratic and clerical families, large owners of vineyards, are turning their attention bravely to the conflict with the microscopical ravagers who are destroying the principal landed properties of France. The Duchess d'Uzes and other great wine-growers in the south of France, whose ancestral wealth and position are so seriously menaced by the terrible insect, are experimenting and innovating, in the management of their infected vineyards, with the aid of scientific specialists, in the hope of both retrieving their own losses and of making the results of their labours available to their poorer fellow-wine-growers. Among the streets of Paris most intimately connected with the brilliant doings of pre-phyloxera days is the rue Boissy d'Anglas, noted for its mansions with wide frontage, and inhabited, for many generations, by wealthy families. The mansion possessing the most interesting historical recollections of those days is the one which stands at the corner of the Avenue Gabriel, now occupied by the Imperial Club, after having been the Turkish Embassy. Of vast proportions, sumptuously decorated, this house was built in 1768 by the Farmer-General, Grimod de la Reyniere, son of a pork-butcher, but who had acquired immense wealth, and got himself ennobled, as contractor for the army of Soubise and as Director of the Post. The successful financier built for himself this splendid residence and filled it with artistic riches The walls and ceilings were painted by Clerisseau, painter to the King of France and the Emperor of Russia. The fetes he gave in this mansion have become legendary for their splendour and brilliance. He had an excessive fear of thunder and devised various schemes for protecting himself against lightning. The little door in the wall, which, by a few steps, leads into a wineshop under the terrace, just out of the Place de la Concorde, was originally a cellar built by him, with enormously thick walls and roof, as a refuge in time of thunder. This cellar had but one door, the one just alluded to, and it was to be closed against the lightning by means of a mattress soaked in oil. His son was the first of the literary gastronomists who have achieved fame by their witty and readable dissertations on the pleasures of the table, solids and liquids finding their glorification in the pages of their books, in which descriptions of delightful dinners and memorable wines are mingled with spicy epigrams, anecdotes, reflections and generalisations, pourtraying often with wonderful vivacity and lifelikeness the personages, events and opinions of an epoch as completely vanished from the world of to-day as though it had preceded the Flood. As eccentric, after a different fashion, as the author of his being, this later Grimod de la Regniere was the hero of many freaks that made much noise at the time, and that are not yet entirely forgotten. Among others, he invited the dancers of the Opera, of both sexes, to a splendid banquet, an invitation which, owing to the old reputation of the house and its masters for splendour and for good cheer, was eagerly accepted and impatiently looked forward to. To the surprise of the guests, who arrived by invitation, arrayed in the costumes in which they had been figuring on the boards of the Operatic stage, they were conducted into a large saloon entirely hung with black drapery, and furnished entirely in the same lugubrious colour; behind the seat of each was placed, upright, an open coffin;

A LITTLE FUNEREAL COLUMN,

with his, or her, name inscribed upon it in the state of an epitaph, stood on the table beside the plate of each a guest, illumined by the light of sepulchral lamps. It needed all the excellence of the repast, and the *bouquet* of the wines for which cellars of the mansion were famous, to restore the equanimity of the poor butterflies of the stage, so rudely shaken by the dismal spectacle of the *memento mori* so unexpectedly forced upon their attention.

The Paris of to-day offers no contrast to the Paris of Grimod de la Regniere than that afforded by the enormous increase of movement in its streets. The rue Montmartre being the street through which the greatest number of vehicles pass in a day, the Municipality has set men to count and register the same, and it has thus been ascertained that 100,000 vehicles pass through this street in the course of every 24 hours, making 3,600 per hour, 60 per minute, one per second. The number of pedestrians being 10 times that of the vehicles, it follows that 1,000,000 of human beings pass through this street every 24 hours. The total for the year is 36,000,000 of vehicles, 50,000,000 of horses, 365,000,000 of pedestrians, or, during the last century, 10 times the entire population of the globe! No wonder, therefore, that the junction of this street with the Boulevard should have obtained its ugly, but well-earned nickname of *Le Carrefour des Ecrases* (the Place of the Crushed)!

# LOCAL NEWS.

THE ELECTRIC LIGHT.—A large number of visitors were taking in the glory of the electric light on the wharf last night.

VISITING GOVERNORS. — Messrs. Alfred Brown and Henry Hogan are the Visiting Governors at the Protestant House of Industry and Refuge this week.

BURGLARS AGAIN.—Burglars made an attempt to enter the residence of Mr. Galbraith, No. 140 Cadieux street, early yesterday morning, but were scared away by a revolver shot.

A PAINFUL ACCIDENT.—A shunter in the employ of the G.T.R. yards at Point St. Charles named Chenette had one of his legs cut off by one of the Company's trains on Sunday evening.

CHEAP PHOTO-ALBUMS.—Strangers should visit W. J. Clarke's, near to the Windsor Hotel, and look at his fine display of Photo-Albums, which he is selling off at fabulously low prices. 3m

SHIRTS AND COLLARS.—Strangers visiting Montreal will find one of the best assortments of shirts and collars at Claggett & Co.'s, St. James street. They keep a splendid shirt from 99c. upwards.

VISITORS TO THE CITY.—Over forty car loads of excursionists arrived at the Bonaventure Depot yesterday afternoon. The increase of traffic caused considerable delay in the outgoing of the Lachine trains.

ANOTHER ASSAULT.—A young fellow was badly beaten by a gang of roughs at the corner of St. Lawrence Main and Laguchetiere streets, about nine o'clock last evening. This corner seems to be a popular resort for loafers, and needs looking after by the police.

ORCHARD THIEVES.—Orchard robbers appear to be plentiful also in St. Lambert's. Yesterday Mr. Peters, of that village, made complaint in the Police Court against a number of youths who were in the habit of stealing fruit from his premises. Warrants were accordingly issued for their arrest.

BOATING ACCIDENT.—A fatal boating accident almost occurred at Chambly Basin, on Sunday evening. While Mrs. David Crawford, of this city, was out rowing with some friends the boat capsized and the occupants were thrown into the water from which they were rescued after some difficulty by a young man who accompanied them.

PROTESTANT HOUSE OF INDUSTRY AND REFUGE.—Statement for week ending 17th September, 1881. Number of permanent inmates, males, 33; females, 24; temporary, males, 32; females, 4; total, 93. Number of night lodgings given in Night Refuge, males, 136; females, 36; boys, 1; total, 173. Number of quarts of soup and extra meals distributed, Night Refuge poor, 500; outdoor poor, 36; total, 536.

NORDHEIMER'S PIANO ROOMS, 211 St. James street, have been rebuilt since the late fire and are now resuming their old pleasant look. The stock of pianos is most extensive and complete, comprising a vast variety from the factories of Chickering, Steinway, Gabler, Haines, &c., for whom they are sole agents. Organs and second-hand pianos for sale or hire. This firm is celebrated for their liberal terms.

AN EXTENSIVE FIRE.—The reflection which was noticed over the city early yesterday morning, was caused by the burning of a large shed on Robin street, Cote St. Louis, in which was stored some $3,000 worth of hay and grain used for feeding the animals on the Exhibition Grounds. The shed with its contents, which were owned by Mr. A. King, commission merchant, were completely destroyed. The loss was only partially covered by insurance.

THE BEST PIANOS IN THE WORLD.—It has been long conceded by European makers that the best pianos are made in America, and that the best American pianos are made by Chickering, Steinway, Gabler, Dunham and Haines—A. & S. Nordheimer, 211 St. James street, are sole agents for these splendid instruments, which they pronounce without hesitation as being superior to any others manufactured. *The most liberal terms are given by this firm for purchasing by monthly or quarterly investments.—Witness, December 30th*, 1880.

CHEAP STATIONERY.—We would call attention to Messrs. Geo. Horne & Sons' advertisement elsewhere. The firm, in consequence of the recent death of Mr. Horne's two sons, have decided on selling out their business. We have examined Messrs. Horne's stock, and would say that the stock of writing papers, envelopes and account books is of a very superior quality and in prime condition, most of the stock having been but recently imported. This is a chance which seldom offers to purchase an old established commercial business. Until a sale is effected *en bloc* they will sell in lots to suit purchasers at cost price. The trade, country buyers, railroads, banks and other corporations liberally dealt with.

A WARNING.—For some time past great nuisance has been caused on the wharf by the conduct of certain drivers who, instead of taking the ramp and driving along the street, drive straight along the wharf to their destination. The complaints of the Harbour Commissioners lately became so frequent that Chief Murphy, of the Water Police, gave his men orders to arrest any drivers seen driving along the wharf. Yesterday afternoon, as usual, several drivers were noticed by some members of the Water Police driving along near Allan's sheds, and, when ordered to take the street, they refused. On this the constables arrested them, and brought them to the Water Palice Station, where they gave their names as Charles Emond and Alphonse Beauchamp. They will be brought before the magistrate to-day. Their arrest should be a warning to other carters to stop this practice, which the authorities are determined to put down.

FEMALE EMIGRATION.—The first meeting of the Committee for the organization and Protection of Female Immigration was convened on the 16th inst at the Synod Hall. It was presided over by Madame de Roerber. The minutes of the preceding meeting being read, Madame de Kœrber reported the acceptance of Mrs. Elmenhurst into the Committee, as representing the German Women's Patriotic Association of this town. Mrs. Elmenhurst was unavoidably absent. Madame de Roerber unfolded to the ladies present her plan of co-operating with the Department of Agriculture, and showed plainly the relation which would have to exist between the Governments, Dominion and Local, and the Committees; at the same time she desires the latter to become permanent bodies, whose work would not be interrupted through political changes. Madame de Kœrber, particularly requested that the ladies may in furtherance of this object, converse with their friends, and take other methods in making the scheme known; also, that any ladies who may correspond on the subject in the press, might be instrumental in making it generally known. Madame Kœrber's address at Ottawa was circulated at the meeting, which comprises her views and propositions as to the general working of the scheme. She explained that this movement was not calculated to bring continental emigration only, but that corresponding Committees should be formed in Great Britain likewise. The ladies of Canada would have to make *their* experiments now and see what suits them best. However, as matters now stand, the question is not, *will* they *have* the women of such and such a country, but *can they get them?* Canada should remember that she is at a great disadvantage in comparison with the United States, as regards the wages offered, and should therefore modify her pretentions. At the next meeting of the Committee, the practical questions as to the conditions under which a certain number of emigrants might be obtained, *at once*, will be discussed—as to a uniform rate of wages for different classes of working women, etc., etc. There will also be held another public meeting, in a short time, so as to enable ladies to be present who had not returned from the country at the time of the last, and to add to the number of the present Committee. A Secretary has been selected, so as to commence work without delay, and 20 members have, so far, been enrolled.

## A STRANGE STORY.

Some four weeks ago a young English girl by the name of Helen Newland arrived in this city on board the SS. "Parisian," from Brighton, Eng. She was apparently about twenty-one years of age, and was of rather prepossessing appearance. On her arrival in this city she was engaged for service by a respectable family on Bleury street, and all went well until Saturday evening, the 11th inst., when, as she alleges, she was the victim of a dastardly outrage committed by four persons in this city. Her story is that while walking along St. James street with another female companion on that evening, she was met by four gentlemen, and, after some conversation, was enticed into an office on St. James street, near St. Gabriel street, where, as she says, she was outraged by all four. The Monday following she appeared in the Police Court to make a complaint against the parties, when she was told that she would have to undergo a medical examination. This she refused to do and the matter dropped for the time. In the meantime the young men who were accused of so serious a crime were not idle. They employed an agent who wrung from the girl a written statement that they were entirely innocent, and that it was her alone that was to blame. Not even satisfied with this they induced her to leave for Quebec, where they paid her passage on the steamship "Polynesian," which sailed on Saturday last for England. The St. George's Society, however, were resolved that so serious a charge should not go unanswered, and dispatched Detective Richardson to Quebec, who, as reported yesterday, brought the young woman back to the city on Saturday evening. She appeared again in the Police Court yesterday and made a complaint against the four parties, one of whom is a lawyer of some standing. Mr. W. H. Kerr has been retained by the St. George's Society for the prosecution, and the investigation is to take place before Messrs. Desnoyers and Dugas, Police Magistrates.

## A NOTED BURGLAR CONDEMNED.

The latest despatches from across the lines state that Ned Lyon, the noted burglar and thief, has been sentenced at the Windham County Court, to three years' imprisonment in the State prison. Ned Lyons and his no less celebrated wife, Sophie Levis, were well-known characters in this city a couple of years ago. Their residence was on Cadieux street, and Lyons followed the trade of a professional thief. Together with Captain Mackay, another noted burglar belonging to Chicago, he organized a gang whose depredations were numerous in this city some four years ago. One of their most daring attempts was the celebrated burglary of the Hochelaga Bank in the month of December, 1874. Lyons, though not an actual worker in this burglary, was well-known to the authorities to be the principal originator of the scheme, and fearing arrest he left the city a short time after with his wife for an extended tour through the States. He turned up again on several occasions, notably in a New York saloon, where he was shot in the body by a companion during some slight quarrel. His wife, during this time, was also busy, and the next heard of her was in connection with a daring attempt to blackmail a young husband in Chicago on a charge of unfaithfulness to his bride. The matter caused quite a sensation at the time in Chicago, and Sophie Levis was the hero of the hour. The last feat of Ned Lyons was his attempt, with several companions, to burglarize a store in South Windham, a short while since, when he was shot through the body and almost fatally wounded. He recovered, however, and, on being brought up in Court, pleaded guilty to the charge preferred against him, and was sentenced to three years' imprisonment. The authorities here express the opinion that such a term is far to short for so hardened a criminal.

## THE COURTS.

### POLICE.

Present—Mr. DUGAS, P.M.

The eleven sailors of the SS. "Viking," who were arrested on Saturday afternoon for refusing to do their duty, were sent back to their ship, and condemned to pay all the costs yesterday morning.

Two youths named Adolphe Gariepy and Dolphus Hague were each fined $10 and costs, for stealing a quantity of carpenters' tools.

Lucie Gagnon was charged with stealing a number of brass weights from the grocery store of M. E. Christin, corner of Ontario and Beaudry streets, and was sentenced to one month's imprisonment in the female prison.

### RECORDER'S.

Present—His Honour Mr. DEMONTIGNY.

There were no less than fifty-two names on the Recorder's sheet yesterday morning. The most of the offenders were charged with simple drunkenness, and received the usual fine of $5 or eight days. Several small assault cases were also disposed of, and the case of a woman charged with keeping a house of ill-fame was postponed.

John McKenzie and John Easton were accused with being drunk and assaulting the police on the Exhibition Grounds. These were the heroes of the fracas on the Grounds reported yesterday. They were each sentenced to a fine of $20 or twenty days' imprisonment.

EPPS' COCOA.—GRATEFUL AND COMFORTING—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast table with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built, up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*—Made simply with boiling water or milk. Sold only in Packets and Tins (½ lb. and 1 lb.) labelled—"JAMES EPPS & Co., Homœopathic Chemists, London, Eng."—Also makers of Epps' Chocolate Essence for afternoon use.

## THE EXHIBITION ECLIPSED,

The Exhibition of 1880 was acknowledged by all to have been a great success, and in no respect was it more so than in that portion of it in which we took part, our exhibit being acknowledged by all to have been the largest and finest that had been seen, not only at that Exhibition, but at any visited that season, and which opinion was endorsed by His Excellency the Governor-General, who delayed at our exhibit to examine the Goods and expressed himself as highly pleased with the display; then the Judges expressed their opinion in a most practical manner by awarding seven prizes and a diploma for the largest and best collection of Furniture, exactly the same as was awarded the Establishment 22 years before, showing that the progress is not that of a few years, but is being continued now into the 37th year.

In consequence of the great increase and unprecedented activity in every branch of our business, we are reluctantly compelled to refrain from exhibiting again at the present show. This gratifying position has not, however, prevented us from arranging our Warerooms so that they are at present a

**GRAND AND IMPOSING SIGHT!**

filled with a selection of Furniture from the highest class downwards, unequelled in extent or variety on this continent.

We would particularly draw attention to our PARLOR SUITES at $45, $55, $75, $100 and up to $350, in twenty-five different styles of covering, acknowledged the cheapest ever offered, quality and price considered. Our B. W., Ash and B. W. CHAMBER SETS, of 7 pieces, trimmed in Queen Anne and other new styeles, at $22, $28, $35, $40, $50, $60, $80, $95, $110 and up to $365, have, on their universally conceded merits, secured the largest sales known in the city.

Whilst drawing special attention to these lines, we offer equally good bargains in our immense choice of high or medium class of Furniture for Parlour, Chamber, Dining Room or Library use; in short any article in the furnishing line, be it great or small plain or ornamental.

We cordially invite our citizens and visitors during Exhibition time to view this the

MOST EXTENSIVE, BEAUTIFUL AND INTERESTING

free exhibit ever attempted by any house here, all of which is offered at special reductions, our motto being now as during the last 36 years, "Quick Sales and Light Profits."

## DOMINION EXHIBITION

**HALIFAX, NOVA SCOTIA,**

**September 21st to 30th.**

His Excellency the Governor-General

**PATRON.**

THE THIRD ANNUAL EXHIBITION OF THE DOMINION OF CANADA will be held in the

## CITY OF HALIFAX,

COMMENCING

WEDNESDAY 21st, ending FRIDAY, 30th Sept.,

The Exhibition will consist of two great Divisions. The first.

## INDUSTRIAL and MECHANICAL,

embracing Machinery in motion, Agricultural Implements, Metal, Wood and Textile manufactures, Forest and Fishery Products and Appliances, Naval Architecture, Minerals, Mining, and general Manufacturing Exhibits, will be opened to the public in the

**Royal Exhibition Buildings, ON THURSDAY, 22nd SEPT.,**

at TWO o'clock p.m., and will remain open to the final close on 30th SEPTEMBER.

The second division, embracing

**Live Stock, Agricultural and Dairy Produce, Fruits and Flowers,**

WILL OPEN ON

*TUESDAY, 27th SEPT.,*

at TWO o'clock p.m., when the

**Grand Public Opening Ceremonies**

will take place, and addresses will be delivered by HIS WORSHIP MAYOR TOBIN, Chairman, and other gentlemen. The Horses, Cattle, and other Live Stock will be shown in the spacious grounds surrounding the Buildings, where ample Cattle Sheds, Stalls, &c., have been erected, and a Horse Track prepared. The Fruits, Flowers, Roots and Vegetables, will be displayed in a special

**"Horticultural" Hall in the Public Gardens,**

near the general Exhibition Grounds, and for which Coupon Tickets will be issued without extra charge.

***Cash Prizes Offered, $15,000.***

**Reduced Rates on all Railways!**

The New Brunswick and Prince Edward Island Governments will refund freight on approved exhibits from these Provinces respectively. No charge for entry of Exhibits, nor for space.

Admission 25 cents each time on entering. Children under 12 years of age, 10 cents.

**Military and other Bands of Music will be in attendance.**

Every effort is being exerted to render the Exhibition attractive, and to utilize the resources, which Halifax, as a

**Great Naval and Military Station**

commands, to make the city worthy of the attention of Visitors from the other Provinces. The requirements of business men, holiday tourists and families will alike be provided for.

**A Suitable Restaurant**

will be erected on the Grounds, where Meals, &c., will be furnished at reasonable rates by Mr. Chas. Woolnough.

A Special Committee charged with the arrangement of outside attractions, including a

**Grand Military Display,**

Public Concerts, Highland Games, Athletic Exhibition,

**Firemen's Tournament,**

Artistic Swimming, Water Polo, Dramatic Entertainments,

**Fire Works, Illuminations.**

ALSO,

STEAMBOAT EXCURSIONS,

to give Visitors an opportunity of seeing one of the finest Harbours in the world.
