

THE EQUITY

No. 40, 55TH YEAR

SHAWVILLE, PONTIAC COUNTY, QUE., THURSDAY, MARCH 31, 1938

\$1.50 per annum in Advance
2.00 to the United States.

The Editor of The Equity requests especially at this time that all back subscriptions be settled up. The paper at this time is kept going under trying circumstances and your fullest co-operation in this matter will be deeply appreciated.

Zion Women's Association will hold a food sale on Saturday, April 16, at 2:30 o'clock, in W. J. Hayes' Block, Main St., Shawville.

ROUND DANCE in the Theatre Hall on Easter Monday night, April 18, with Ernest Ready's Renfrew orchestra. Refreshments served. Admission, \$1.00 per couple, extra lady, 25 cents. Under the auspices of The Shawville Tennis Club.

Trail Rangers Hold Successful Father and Son Banquet

The local Trail Rangers held a successful Father and Son banquet in the United Church parlor last Wednesday night. After a sumptuous repast a program of toasts was run off with Mr. J. Tolhurst acting as chairman. Earl Garrety proposed the opening toast to the King, and this was followed by a toast to the Church proposed by Uruquhart Campbell and responded to by Rev. T. E. R. Nurse. Other toasts were to the Sunday School proposed by John Howard and replied to by T. C. Wilson and W. A. Hodgins; to the School proposed by Grant Eades and replied to by Jas. Gordon and C. L. Douglas; to the fathers proposed by Dean Fokes and replied to by Dr. J. D. Campbell; to the sons proposed by Dr. S. E. McDowell and replied to by Cameron Rowat; to the ladies proposed by Alwyn Dale and replied to by Marjorie McTiernan. Several enjoyable recitations were given by R. P. Eades during the evening. Rev. A. F. Fokes acted as song leader. The C. G. I. T. served under their leader Mrs. A. Draper, assisted by Mrs. D. J. Campbell, Mrs. R. P. Eades, Mrs. A. F. Fokes and Mrs. H. Hayes.

New Organ at Shawville United Church

Much interest has been aroused through the installation in the United church of a new Hammond organ, which was played for the first time on Sunday morning by Mrs. Edgar Hodgins. This organ, which has neither reeds nor pipes, but produces tones by a newly discovered method of sound production, has all the qualities of an expensive pipe organ. Volume of music can be produced so heavy that the church shakes under the power of it; or can be toned down so that sweet but almost inaudible music can be heard. All the instruments of an orchestra are to be produced, there being literally thousands of possible combinations of sounds or instruments capable of being produced. The organ is only about four feet square, with two sound outlets concealed at the front of the church. It will be used for the services next Sunday for choir and congregational singing. A special feature on Sunday evening, as well as the organ, will be a message presented by the Pastor, with 75 slides beautifully coloured, telling the story from the films of Dickens "David Copperfield" and featuring such artists as Freddie Bartholomew, Maureen O'Sullivan and John Barrymore.

Fine Lecture Series Given Campbell's Bay

The provincial department of agriculture held a series of lectures at Campbell's Bay on Wednesday evening, Thursday afternoon and evening, under the direction of N. A. Drummond, county agronomist.

On Wednesday evening Mr. C. B. Dalton, agronomist of Hull, dealt with farm management. Banking as applied to the farmer was very well covered by Mr. G. A. Mowat, Manager of the Bank of Nova Scotia, changes in the civil status of women in the province and the farm mortgage moratorium were dealt with by Mr. J. P. Noonan, attorney, and Dr. S. J. McNally gave a very instructive lecture on diseases and their prevention. Rev. E. G. Warren closed the meeting.

Thursday afternoon was a general agricultural meeting, and marketing of agricultural products was fully covered. In the evening the farm part of the meeting dealt almost entirely with poultry problems, and Mr. H. Robitaille, poultry expert for the provincial government, fully covered the problems of raising them, while Mr. E. R. Hooley, of the Dominion government, covered the marketing of them and the eggs.

Prevention of highway accidents was covered at length by Mr. J. O. LaFlamme, attorney, and Dr. J. J. Kelly gave a talk on health and microscopic studies.

PERSONAL MENTION

Mrs. Gerald Howard, of Fort Coulonge, was a recent guest of friends in town.

Miss Florian Brough, of Ottawa, was a week-end guest at the home of her parents, Mr. and Mrs. A. G. Brough.

Mrs. J. G. Stephens returned to her home in Quyon last week after visiting her sons, George and Burly, of Noranda, Que.

Mr. Wm. Hobbs, of Walkerville, Ont., spent the week-end with his mother, Mrs. R. Hobbs, and other friends in town.

Mr. and Mrs. George Smith, of Fort William, Ont., visited recently at the home of the latter's sister, Mrs. Jas. Riley, in town, and also with other friends and relatives in Thorne, Aldfield, Sudbury, North Bay and Ottawa.

Shawville United W.M.S.

The Women's Missionary Society of Shawville United Church met in the church parlor last Thursday night with the president, Mrs. C. N. Woodley, in the chair and a good attendance of members. Mrs. D. J. Campbell's group were in charge of the program, which consisted of a reading on Christian Stewardship given by Mrs. R. P. Eades, the Bible reading by Miss Edith Currie-Mills, a solo by Mrs. S. E. McDowell, a piano selection by Miss Lois Hayes and a play entitled "Great Possessions." Those taking part in the play were Mrs. D. J. Campbell, Mrs. E. C. Hodgins, Mrs. T. C. Wilson, Mrs. N. Kilgour and Mrs. R. P. Eades. Rev. A. F. Fokes closed the meeting with prayer.

Wm. Elliott Dies Aged 82 Years

William Elliott, bailiff and high commissioner of the Supreme Court for the County of Pontiac, died at his home in Shawville last Thursday after an illness of nearly a year. Born within two miles of the village in 1856, a son of the late Mr. and Mrs. Alex Elliott, of Clarendon Township, he was practically a life-long resident of this community. Besides his other duties, he was caretaker of the local post office for the last 15 years. He was married 60 years ago to Della Golden, of Moose River, N. Y., who is left to mourn his loss. There are also left two sons, John W. and Earl, both of Shawville; one daughter, Florence, predeceased him by a few years. Five brothers, Walter, of Shawville, Joseph and James, of Scranrear, Sask., Alex and Adam, of Clarendon; four sisters, Mrs. Jos. Brownlee and Mrs. J. B. Corrigan, of Clarendon Township, Mrs. Robert Corrigan, of Shawville, and Mrs. S. Wilson, of Beech Hills, Sask., are also left. The funeral service was held on Saturday afternoon to St. Paul's Anglican church of which Mr. Elliott was a member, with Rev. T. E. R. Nurse officiating. Interment was in the parish cemetery.

The pallbearers were Hillard Hodgins, Wilfred Howes, Wiltred Cecil, Herbert and Harold Elliot.

Little Damage Done By Spring Floods

Although Shawville did not suffer adversely from the sudden departure of the snow during the last two weeks many other towns did not share the same good fortune.

A story comes from Quyon that six men, marooned by the swirling waters of the Quyon river at the east end of that town on the Hull-Chapeau highway, had to make their way to safety by a rope strung from their almost submerged truck to a telephone pole. The men, facing an all-night session in the stalled truck, gained the attention of a boatman, who carried a rope to them through the swiftly rushing water with great difficulty. The Quyon river was at a higher level this year than it has been for some time.

In the Winchester district valuable cattle standing in water filling the outbuildings, suffered from swollen legs and many were seized with pneumonia. Richmond, Kemptville Carp and many other towns report serious property damage from the unusually high Spring water levels.

However, the thaw has opened road traffic, and already several cars have made the journey to Ottawa. The roads are comparatively good for so early in the season with little snow, and few bad holes as yet. Sleighing is over for the year, and the creamery trucks are already making their daily runs. After last winter's heavy snowfalls spring certainly came quickly.

BORN

MOUSSEAU — At Shawville Community Hospital on Wednesday, March 23rd, 1938, to Mr. and Mrs. Thos. Mousseau, of Bristol, a son.

MARRIED

GREEN-HODGINS

A pretty wedding was solemnized at 3 o'clock on Saturday afternoon, March 26th, by Rev. David A. Gallagher, at the home of Mr. and Mrs. Armen J. Hodgins, of Oakville, Ont., when their eldest daughter Avela Guest Hodgins, was united in marriage to Ernest Gerald Green, son of Mrs. Ruth Green, of Brockville, Ont.

The bride given in marriage by her father, looked charming in turquoise blue imported Alpaca crepe. She carried an arm bouquet of pink and white spring flowers, and wore white flowers in her hair. Evelyn Hodgins, sister of the bride, attended her wearing an orchard triple sheer gown. She wore a corsage of yellow Joanna Hill roses, and yellow roses in her hair. Ernest Busby, brother-in-law of the groom was best man.

The bride's mother, received the guests, wearing black crepe, and corsage of yellow roses and mauve sweet peas. She was assisted, by the groom's sister, Mrs. Ernest Busby, wearing powder blue floral crepe gown and a corsage of pink and blue sweet peas.

The living room was tastefully decorated with spring flowers and pink and white streamers. The table was centred with a three-tier wedding cake. After a buffet luncheon the happy young couple left by motor for New York, Buffalo and other points. The bride travelling in a brown crepe dress, brown hat and accessories, topped by a beige coat with brown trimming.

On their return they will reside in Oakville.

Guests from a distance were, Mr. and Mrs. Garnet Hodgins, of Buffalo, N. Y.; Mrs. Wm. Green, of Galt, Ont., and Mrs. Robert Scelfield, of Toronto.

Miss Jeannette Seaman Passes

On Tuesday, March 22nd, there passed away at her home in Thorne township, Jeannette Cecilia Seaman, in her 65th year. She had been ill for some time with pneumonia. The funeral was held to Wesley United Church at the church cemetery. Rev. R. G. Newman, of Yarm, was in charge of the service, assisted by Rev. B. Wilson, of Bristol Ridge Pentecostal Mission. Mr. Wilson gave the funeral address. Left to mourn are two brothers, Joseph and Samuel, both at home.

Mrs. Robert Hickson Dies at Campbell's Bay

The death occurred last Saturday at Campbell's Bay of Mary O'Meara, wife of Robert Hickson. Her passing came as a shock to her family and friends.

Born in Quyon 45 years ago, she was a daughter of the late M. O'Meara and the late Hannah Mulligan. Orphaned at an early age, she made her home with her uncles and aunts, the O'Mearas in Bryson, where she lived for many years. Some twenty years ago she married Robert Hickson, station agent at Campbell's Bay, and had resided there ever since. The late Mrs. Hickson was very prominent in church work, and was a member of the Campbell's Bay Catholic Women's League.

Left to mourn are her husband; four daughters, Rita, Margaret, Sheila and Elizabeth; two sons, Robert and Michael, all at home; two sisters, Mrs. Josephine Ryan, of North Bay and Mrs. Laurette Caron, of Montreal.

The funeral was held Monday morning at 9 o'clock to St. John the Evangelist church, where the parish priest, Rev. Father E. J. McNally, chanted requiem high mass. Interment was in Campbell's Bay Catholic cemetery.

News Parade

Commentary on the Highlights of the Week's News . . . By Elizabeth Eedy

THE FINAL GOAL: An editorial in The Yorkshire Post, influential British newspaper which is owned by the family of Mrs. Anthony Eden, we believe is well worth quoting from:

"Germany's final goal in the drive inaugurated by the Austrian coup, the newspaper declared, is the total destruction of France, 'not to gain French territory, but, as 'Mein Kampf' (Adolf Hitler's autobiography and political testament) sets out, to remove Germany's last serious Continental military rival and thus free her hands for the seizure of as much territory eastward as she may desire."

"The military occupation of Austria will be followed by an attack on Czechoslovakia in order to clear the eastern route. Assurances to the contrary are worth just as little as have been all the rest of Germany's assurances."

NO MORE HAZING: Those hair-raising days of the annual freshman-hazing season are gone forever from the University of Western Ontario. The Student Government there voted last week to abolish initiation altogether, the general opinion being that for the past couple of years the legendary hazing has been getting pretty anaemic anyway.

All very well to do away with the crueler aspects of the sophomore-freshman conflict, but we do not wish to see the color and glamor depart from college life entirely, nor the students become a bunch of stuffy crepe-hangers, old before their time.

94,000 UP: In the five months since October last, Ontario's relief rolls have increased from 166,000 to 260,000, up 56 per cent.

Now, the fight is on between the Provincial Government and the Federal Government over the relief grant policy. Ottawa has been making steady reductions in relief appropriations to Ontario while unemployment figures have been rising. Premier Hepburn's cry is that the Federal Government went in on the promise of making relief a national problem.

Ontario municipalities, too, claim to be overburdened by relief costs.

HEAD WITHOUT A BODY: On November 12, 1918, the Austro-Hungarian Empire officially came to an end. Hungary was made into a separate country. Austria was proclaimed a Republic, and the constitution later adopted provided for union with Germany. The Republic was predominantly Germanic, but the subsequent peace treaties prohibited such a union, took steps to see that Germany and Austria were kept apart with not even a customs union allowed.

In the light of these facts, it is not hard to understand the attitude of the Austrian people, who, although temperamentally different from their German cousins, appeared last week to welcome Adolf Hitler as their new head of state.

For the past twenty years the great city of Vienna with its 2,000,000 inhabitants has been like a huge head on a tiny body. All the industries, commercial institutions, etc., of the country have been concentrated within its confines while the rest of Austria (population 4,000,000 more) has contributed little but scenery. Vienna stood ready to service a much larger countryside, with plenty of natural resources. Toronto would be in the same position if it were cut off from all the rest of Canada except for what lies within a 75-mile radius.

The tourist industry alone could not keep Austria going forever.

BEHIND THE VICTORY: Simultaneously with news of Hitler's Austrian coup came reports of a big insurgent drive in Spain meeting with such successes that the Government armies were being driven eastward toward the sea and that the civil war was rapidly drawing to a tragic close. Genevieve Tabouis, the noted French

Red Cedar Finds Favor In Britain

Pre-fabricated Walls In Houses; Highly Resistant to Weather

HULL, Eng.—A selling point of two "show" houses constructed here in 11 working days is that the British Columbia red cedar used is dry-rot proof and highly weather-resistant.

The method of construction is based upon the use of pre-fabricated cedar wall sections. The first-floor walls of both houses were in position within eight hours of starting work.

The wall is of three-inch plank finished externally with weather-boarding, with under-felting and an interior finish of a three-quarter inch airspace and three-quarter-inch plaster board. A wall of this type has greater insulating qualities than a nine-inch brick wall, it is contended, and as there is no need to wait for it to dry out, the house is habitable as soon as it is erected.

political observer, commenting on the Franco victories declared that by them she could see that Hitler had already begun to repay Mussolini for Italy's acquiescence in his seizure of Austria. The repayment, she said, consisted, in part, of shipment from Germany to Spain of heavy artillery, aeroplanes and munitions, giving Franco enough equipment to guarantee success of his drive against the Government.

CONSULTANTS ONLY: What President Roosevelt said off-the-record at a press conference in 1933 throws a light on the policy the United States is likely to pursue in the present world crisis. At that time Mr. Roosevelt declared:

"If all the nations agreed to set up some kind of machinery for consultation in the event of an act of aggression, we will be very glad to have somebody there to consult with. I consider that to be a step forward."

"Do not get the idea that it means that we bind ourselves in the first instance to agree with the verdict. . . . We agree to consult. Therefore, it does not tie the hands of the United States in any shape, manner or form and leaves our final action entirely up to us."

Polio Caused By Lack Of Vitamin B

Is Latest Theory—Compares Infantile Paralysis With Beri Beri

A new theory of the cause of infantile paralysis, published in the journal of the Canadian Medical Association, attributes the child scourge to lack of Vitamin B.

Vitamin B (usually called B-1) is the nerve vitamin. Only in the last three years has it been available for medical experiments. It has already been found to prevent the nerve disorders and forms of partial paralysis caused by too much alcohol with too little food.

Similar Symptoms
Dr. W. J. McCormick, of Toronto, who offers the vitamin theory for infantile paralysis, finds his justification in a comparison of this disease and beri beri. The latter is the Oriental disease which led to discovery of vitamin B. It is caused by a lack of this vitamin.

Infantile paralysis, writes Dr. McCormick, shows much the same symptoms as beri beri, such as flaccid leg paralysis, digestive disturbances, and muscle pains and tenderness.

He finds that the susceptibility of children to infantile paralysis can be explained by the fact that they do need more vitamin B than adults. He explains the summer-time occurrence of the infantile outbreaks by asserting that the summer vacation increase in children's physical activity depletes their vitamin B.

Eggs and Spinach Have It
He says the average American diet is lacking in this vitamin.

His theory also harmonizes, he points out, with recent discoveries about virus diseases. Infantile paralysis is one of the diseases caused by viruses. The latter have been identified in some cases as non-living protein substances, which could come from deranged metabolism.

Vitamin B is found in tomatoes, egg-pollinated rice, spinach, legumes, eggs, yeast, kidney and other glandular tissues.

Why Music Soothes The Savage Breast

It's a Wonderful Release From The Cares of the Day

During the first two months of this year, a slender, white-haired Italian has been the subject of more newspaper columns of ecstatic praise than has been bestowed on almost any American in recent years. Arturo Toscanini, brought back to this continent by NBC to conduct ten concerts over the radio, became almost an object of worship to American music lovers.

Music is a wonderful release from the cares of the day. That is one reason why it has won such a commanding position here during the past ten years. Other reasons are the availability of the victrola and radio.

Its Healing Value
Even the ancients realized the healing value of music. The Romans believed that sciatica could be relieved by the tones of a flute. Today music is used to quiet excited mental patients, and as a stimulant and tonic to brace up those suffering from melancholia.

The waves of music, the vibrations of applause, affect the nerve centres and influence the heart and the circulation. This produces a reaction in the brain which gives the spirit new strength and courage. Music thus becomes an emotion-food, and a concert a banquet for the starved and sick at heart.

Style Forecasters Say People Will Wear Less

Latest Predictions Have It That The Sports Girl Will Be Fashion Leader — Men Becoming Less Self-Conscious.

NEW YORK.—Fashion experts who are not afraid to go out on a limb to forecast the future clothing styles are predicting that:

1. Women will wear less and less clothing, the simplicity and the comfort of sports apparel becoming more and more popular.

2. Men, too, will be wearing far fewer clothes 25 years hence. (The hot weather town suit of 1963 may well be washable shorts, shirt and jacket like the Tyrolean mountaineer's costume.)

3. The familiar collar and tie may be supplanted by a less-binding, modernized tunic, with perhaps a soft, soft neckerchief for prominent Adam's apple concealment.

4. Fabrics which resist rain, perspiration or spilled drinks, will be in common use.

5. Glass raincoats may serve also as protectors from lightning.

Streamlined Clothes
Style observers say Empress Eugenie may pop up here and there to put their fleeting stamp on the fashion world but it is the sports girl of the future who will set the pace for the long pull.

Garments are becoming more streamlined. The slim silhouette dress is in vogue from bungalow boudoir to Biarritz ballroom. Baby rompers are going more Hollywoodish. As the flair for sports and play clothes becomes stronger among girls, an increase in the percentage of more natural, healthy figures is expected.

Abbreviated Sportswear
Man, however, is becoming less self-conscious in abbreviated sportswear and is appearing in shorts on the tennis courts, at the beach and at the lawn mower. Accustomed to showing off his shanks at summer colonies he may become emboldened to expose more or less knobby knees in office and shop.

Further improvements are expected in water-repellent fabrics. Materials made from glass, glass and milk are here. Crownless hats are made of cellophane. In the future we may be wearing glass raincoats to shield us from lightning.

New casual clothes of the softy-tailored or spectator sports types will be important in spring fashions for 1938. Popularity is forecast for suits and jacket costumes.

Designers predict new versions of the fitted waistline, modified so that it is easier to wear.

CANADA'S PEANUT IMPORTS

From 1929 to 1936, Canadians ate 106,000 tons of peanuts. The amount of peanuts imported in 1936 was 15,000 tons; in 1935 practically a similar amount, and 17,000 tons in 1934. Also known as ground nuts and earth nuts, peanuts are used for human food, for feeding live stock, and as an oilseed, yielding oil for culinary and industrial purposes, and oilcake for stockfeeding and fertilizers. The bulk of peanuts in world trade is made into oil. Canada imports a small amount of peanut oil for soap-making and canning fish. India and China are the chief peanut growing countries.

PINK SANDWICHES

A Manchester (England) catering firm has started baking brown, white, pink and green loaves — mainly for cocktail parties. You can have a sandwich to match your drink, or even your dress—for there is hardly any limit to the colours obtainable.

Magnetic Storms Are Predictable

Usually Accompanied by Large Sunspots

Scientists are trying their hand at making predictions concerning the coming of magnetic storms, the disturbances that blank out communication on certain wave lengths of radio channels, make the magnetic needle erratic and are accompanied by the aurora borealis.

They are usually accompanied by a large sun spot, but this is not necessarily so because the disturbance on the sun may exist below the atmosphere, or surface level, and not be visible to astronomical observers. Magnetic and radio observations may, therefore, furnish astronomers a means of tracing sun spots before they have reached the visible state and after they have disappeared from view.

Aurora Borealis
A strong magnetic storm is usually accompanied by a display of aurora borealis. This happened a month ago, when these northern lights were seen as far south as Florida.

News In Review

Ask Czechs Be "Reasonable"

BERLIN.—News commentators this week-end posed Germany's absorption of Austria before Czechoslovakia as a warning of the need of "an early and satisfactory solution" of her minority issue.

The German press, apparently on instruction, told the neighboring war-created republic with 3,500,000 Germans to be reasonable about meeting German demands.

New Pulp Industry

TORONTO.—Establishment of a \$7,000,000 pulp industry in Northern Ontario within the next few weeks was forecast this week in the Legislature by Hon. Peter Heenan, Minister of Lands and Forests.

Body Is Recovered

RENFREW, Ont.—Body of Mrs. R. A. Hoffman, 42, mother of three children, was found in the Bonnechere River a few hours after an employee of a nearby powerhouse reported he saw her drop from the powerhouse platform into the water.

Advance On Suchow

SHANGHAI.—Reinforced Japanese troops fighting southward along the Tientsin-Pukow Railway advanced this week on the strategic Lung-hai rail junction at Suchow.

Three bodies of troops strongly supported by aircraft, mechanized equipment and artillery started the new offensive from Llanghsiatien, where desperate Chinese resistance halted the initial drive in this sector early in January.

Russia Will Aid

MOSCOW.—Soviet Russia, fearing that Germany's annexation of Austria has brought the danger of war close, is ready to fight with France as an ally if Fuehrer Adolf Hitler attempts any invasion of Czechoslovakia, it was stated authoritatively here last week.

SPAIN LOSES OLIVE OIL MARKET

Spain, before the civil war, used to supply Canada with olive oil. Now the Dominion gets its supplies principally from France (12,000 cwt. in 1936) and Italy (4,000 cwt.) World trade in olive oil has declined in recent years.

VOICE CANADA THE EMPIRE

of the PRESS THE WORLD AT LARGE

CANADA

Within One's Debts

A survey of municipalities shows that many cities, now in need, have borrowed to their limit. It is sure tough when you can't live within your debts.—Winnipeg Tribune.

Forgotten Provinces

Sir Evelyn Wrench speaks of the Maritimes as "Canada's forgotten provinces." It is evident that he has never been in Ottawa when the House was in session.—Peterborough Examiner.

Speed Is Expensive

If an automobile is driven at a speed of thirty miles an hour, its life will be three times the life of the average car. Economically as well as every other way, speed is expensive.—Chatham News.

Canada Should Take Heed

The decision of the British Broadcasting Corporation to deny Right Hon. Jostah Wedgwood the radio air to comment on Hitler's or Mussolini's policies is a sign of which the Parliament of Canada should take due notice. We may as well admit now that there is in certain parts of this free Dominion a sinister growth which unless curbed may, sooner than most people think, become malignant. Much has been said about the Government-controlled radio commission in this country of late. Objection to an increase of the annual fee by fifty cents is, comparatively speaking, an insignificant matter. The fact is the Canadian people distrust control that may result in suppression of views of public men whose sole interest in their country's future is her welfare and the preservation of her free institutions.—Victoria Daily Times.

No Help to Villages

The Montreal Star says that "country towns with good highway connections tend to develop and prosper." Experience in the case of Ontario villages is probably the reverse. When good roads arrive, the trade that formerly went to the village stores more often passes their doors and is received by establishments in the larger centres. Dozens of Ontario villages are actually poorer, in point of business done, for the better road communications that they now possess, while larger towns and cities are enriched by the same development.—Brockville Recorder and Times.

Deadly Houses

This housing problem is a matter that is financial, social, humanitarian, moral. For six months, in a good or a bad year, it makes our courts resound with quarrels between tenant and landlord or simply between tenants—a fact which brings out another aspect of the situation. It takes, in our Province of big families, an added importance and an appearance that is often dramatic. In Montreal it creates an endemic evil in given zones that contaminate the human capital of the nation. If the State votes millions for the hypothetical defense of our coasts it should be able to find money to save lives, which are not vague ideas, but which wither and fade, like poor forgotten flowers, from lack of space, or air, or sun.—Montreal La Patrie.

THE EMPIRE

Youth and Politics

An interesting point remarked by Earl de la Warr is that, for a country which still thinks of itself in terms of youth, Australia is curiously prone to prefer government by older men. The age of Parliamentary representatives in Australia is well above the average. Why should a relatively young country distrust youth in its political councils? Why do not our young men choose politics as a vocation? Or is it that the existing party machinery discourages the enlistment of youth and bars the way to preferment to all except the mature in years? These questions are well worth asking and better worth answering. The youth of the Fascist countries is being fired with ideals and enthusiasms which we do not share, but democracy ought equally to inspire its young men with the ambition to serve and excel in the political sphere. Otherwise, the restless and ambitious among them may be attracted by other ideologies, to the detriment of the democracy whose spirit is being extinguished in so many lands. No more than in the days of the Pitts is it today an "atrocious crime" to be young. The political education of youth, and the search for talent in leadership in its ranks, is surely an appropriate task for a country which is young in traditions and outlook, even if it must now be reckoned mature in years.—Sydney (Australia) Herald.

Canadian Eggs Winning Favor

Complete With Danish Project On British Market

LONDON.—Again Canadian exporters have launched a successful challenge to Denmark's long-standing domination of the United Kingdom's egg market.

Experimental shipments of Canadian eggs, sponsored by the Dominion Department of Agriculture and co-operative organizations, have met with such success that steps have been taken to establish the scheme on a permanent basis.

Direct negotiations for a regular and increased supply have already been opened between a leading firm of London importers and the Quebec authorities.

Supply Quickly Exhausted
It was originally intended to carry on the experimental shipments for a period of eight weeks only, each shipment consisting of 50 cases of 150 eggs. The demand was so keen for the Canadian product that the supply was quickly exhausted.

A member of the importing firm of John Loudon declared there was no doubt Canadian eggs were fresher than most other countries, were better packed and handled, thus commanding higher prices.

"Although there is little possibility Canada will capture the market outright from Denmark," the importer declared "it is certain if negotiations are successful Canadian eggs will demand a good place on the London market."

Indian Remains Are Identified

Toronto University Professor Interested In Theory of Plague—Studies Bones Found Near Brantford.

BRANTFORD.—Professor J. C. B. Grant, head of the department of anatomy at the University of Toronto, said last week that examination of the skulls and bones found near His Majesty's chapel of the Mohawks, on the borders of this city, last week, were "definitely" those of Indians and were characteristic of those found all over the country. He expressed interest in the theory advanced here that the remains are those of members of the Tutelo Indian tribe—incorporated with the Six Nations.

Nearly 200 of the Indians, or virtually the whole tribe, were wiped out in a cholera or ship fever epidemic which swept this part of the country less than 100 years ago. The mode of burial appeared to preclude possibility of their being the remains of the older Attiwandaron or neutral Indians whom the warlike Iroquois exterminated nearly 300 years ago.

IMPROVING DRESSED POULTRY

"It is apparent that all the Canadian exporters of dressed poultry are responding to the representations of the Poultry Services, Dominion Department of Agriculture, to improve their export packs of chickens and a continuance of this policy will eventually land us at the objective we are all trying to attain," states W. A. Wilson, Animal Products Trade Commissioner for Canada in London, England, in a recent letter to the Department.

Huge Cypress Garden in South Carolina Thrown Open To Public

The 250-acre cypress garden owned by R. B. Kittredge, Jr., of Charleston, S.C., is again the source of much satisfaction to nature lovers, who have been invited to spend leisurely hours paddling through the immense park. Forty tons of bulbs have also been planted to add to a floral display.

Send for Tweddle Catalogue and read all about Tweddle Extra, Priddy and Special Matting Big Egg Chicks. These chicks are born with a head start and weigh when hatched, 2 ozs. more than the Government requires weight. Tweddle Chick Hatcheries Limited, Box 10, Fergus, Ontario.

CHICKS BARRED ROCKS AND White Leghorns; all breeders blood-tested and under Government Approval; L. J. Ardagh, Streetsville, Ontario, Box E.

TRENT "BIG-REVENUE" CHICKS are fast becoming a Buy-Word and Standard for Superior Chicks among poultry minded people, because they quickly turn feed and labor into "profits". Ready now. Trent Electric Hatchery, Trenton, Ont.

POULTRY EQUIPMENT, HIGH QUALITY at low cost. Made in Canada for Canadians. Write for our new catalogue. Model Incubators Ltd., 196 River St., Toronto.

BETTER BABY CHICKS FROM OUR large Leghorns. Wonderful winter layers of big, white eggs. Write for literature and catalogue, Shadybrook Poultry Farm, Aylmer, Ontario.

WHY PAY MORE WHEN YOU CAN purchase Government Approved Chicks from blood-tested breeders at these prices? Cockerels as low as 24c, pullets, 19c, non-sexed chicks, 12c. Write for circular. It tells all about Baden "Big Egg" Chicks. Baden Electric Chick Hatchery, Box 59, Baden, Ontario.

L. W. W. RAISED ALL BUT 5 OF 860 Bray Rock and Leghorn chicks last year. Laying at 5 months. 130 Rock pullets averaged 140 eggs per day in November. Free catalogue. Bray Hatchery, 130 John St. North, Hamilton, Ontario.

A. H. BOUGHT 312 BRAY CROSS-BRED pullets last year. Lost only 8. Only 2 cockerels. Housed 302. Laying at 4 1/2 months. At 7 months laying 175 eggs daily and 80% grading large and medium. Write for catalogue. Bray Hatchery, 130 John St. North, Hamilton, Ontario.

HIGH PRODUCTION — BIG EGGS. L. G. 56 Bray New Hampshire pullets, 8 months old in September, averaged 21 eggs per day from September to December 1937—less than one pullet egg per week. See catalogue. Bray Hatchery, 130 John St. North, Hamilton, Ontario.

FOR BETTER CHICKS, BETTER livability, larger eggs, better production, buy Pletsch's Government Approved Chicks at lowest prices in years. Leghorns, Rocks, Minorcas, Sexed Chicks, Pullets. Write today. Pletsch Hatchery, Stratford, Route 5, Ontario.

BIG, VIGOROUS, SELECTED CHICKS from Blood-tested high production breeders, Leghorns, 8c, Rocks, and Red 8c. Collins' Hatchery, Wales, Ont.

HATCHING EGGS NEW HAMPSHIRE AND RHODE ISLAND Reds. Heavy layers, exhibition winners. Fifteen eggs, \$1; Fry, \$2.00. M. Fisher, Enterprise, Ontario.

SPORTING GOODS

WE CARRY A LARGE ASSORTMENT of fishing tackle from the world's oldest and largest manufacturers. Send for free catalogue. E. Manis, 171 Craig St. W., Montreal, Quebec.

Rolling Hospitals Assist Chinese

Chinese hospitals are now mounted on wheels to keep pace with the rapid movement of Chinese troops making offensive thrusts on the weak, spread-out Japanese defense lines in northern and central China.

There are thirty-seven of these mobile hospital units in use on the various fronts, with a corps of more than seven hundred doctors and nurses forming the staff. Supplementing the rolling operating rooms and first-aid dressing stations are fleets of ambulance trucks to transport medical supplies and to move severely wounded soldiers to base hospitals far in the interior.

The successful man is one who keeps his feet on the ground at all times, but who is never afraid to look up and ahead . . . Our immediate task is to do the work at hand the best we can . . . But we should still find time to dream of the plan for tomorrow.

"I am the Wind"

I am the wind that wavers,
You are the certain land;
I am the shadow that passes
Over the sand.

I am the leaf that quivers,
You the unknown tree;
You are the stars that are steadfast,
I am the sea.

You are the light eternal,
Like a torch I shall die . . .
You are the surge of deep music,
I—but the cry!

—Zoe Atkins.

HE SUFFERED AGONY IN WET WEATHER

Rheumatism Attacked Limbs and Body

He had been bothered with rheumatism for years. The pain in wet weather—to use his own expression—was "Indescribable." But all that is gone now—thanks to Kruschen. Read this letter:—

"I suffered with rheumatism for years. I dreaded wet weather, for during such periods the pain was continuous and indescribable. To begin with, it was confined to my limbs, but in time I began to suffer as much agony in my body as I did in my limbs. When I began to take Kruschen Salts, I found it did me more good than all the other medicine I had taken put together. Today, I have peace and freedom from pain, even during wet weather, and can heartily recommend Kruschen Salts to anyone who suffers from rheumatism."—N.M.

Rheumatic conditions are often the result of an excess of uric acid in the body. Two of the ingredients in Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients in these Salts assist Nature to expel the dissolved crystals through the natural channels.

Spring Music!

If you like opera, that's your dish. Here's hoping that you get your wish; But as for me, now that it's spring, I'll listen while the bullfrogs sing.

He approached the judge with all kinds of politeness. He wanted a favor done. The judge asked what it was. "Your Honor, I'd like to get out of jury duty."

Judge—"Why?"
Man—"I can only hear with one ear."
Judge (smiling and patting him on the back)—"It's all right. We only hear one side of the case at a time."

READ IT OR NOT—A \$4 turkey recently flew through a \$70 plate glass window in Grandfield, Oklahoma.

Host—"Those are my grandmother's ashes over there."
Guest—"Oh, so the poor old soul has passed on."
Host—"No. She is just too lazy to look for an ash tray."

Then there is the yarn about the hill-billy who was so dumb he didn't know the difference between a squirrel and a hair brush. The only way he could tell which was which was to place them both under a tree and see which one climbed it.

An inspector was examining a class in geography, and, addressing a small boy, he asked:
Inspector—"Now, sonny, would it be possible for your father to walk around the earth?"
Small Boy—"No, sir!"
Inspector—"Why not?"
Small Boy—"Because he fell down and hurt his leg yesterday."

If you are a golfer, don't overwork your golf vocabulary.
Dear Old Aunt—"Did you have a good time, Gilbert?"
Gilbert—"No. The seventh tee was sloppy and all the greens were in a terrible state."
Dear Old Aunt (shuddering)—"You mustn't lunch there any more, Gilbert. You know how easily you get indigestion."

One of our grocerymen had a lot of explaining to do this week. A lady walked into his store and asked for some spuds. The grocerymen handed her a package of cigarettes. The lady happened to be a devout W.C.T.U. member and the poor grocerymen is not sure yet whether his explanation was all right or whether he lost a customer.

The successful man is one who keeps his feet on the ground at all times, but who is never afraid to look up and ahead . . . Our immediate task is to do the work at hand the best we can . . . But we should still find time to dream of the plan for tomorrow.

Describes Spanish Refugee Children

Writer Tells of Little Victims of Spanish Conflict—Finding Them Foster-Parents

Langdon Davies, British newspaperman and writer, who organized a camp of 300 refugee children in Spain, was in Montreal last week, the Montreal Star reports. The children are of all ages. Some are ragged, some well-clothed. Some are ill, but most are in excellent health.

Agos ago in the Spanish conflict Langdon Davies, as a member of the Duchess of Athol's Refugee Committee, organized the Children's Village of Peulgerda on the French border.

Parents Are Dead
"There they are, 300 of them," he said. "They are all refugees from those parts of Spain which are now held by General Franco. All have lost their parents. In some cases the parents are dead, in others they have been separated from the children."

"Well—" he continued, "we teach them and look after them with a small staff of helpers. We try to arrange foster parents for them in other countries."

"To a Spanish child family is tremendously important. And the knowledge that they have an adopted family in some other country helps to brace those who have lost their own people."

Now There is Discipline
Langdon Davies was a news correspondent in the early days of the Spanish Civil War. He was in Toledo at the time the Alcazar was being vainly besieged by Loyalists. He was in Barcelona during Anarchist outbreaks and during the first of the terrorist bombings by Fascist planes.

"The great difference between the Loyalist side of today and that of 1936 when the revolt first broke out, is that there is perfect order and discipline with the Loyalists now," he said. "In the early months it was just chaos."

Four Million Jobs Lost in Depression
Recession of Past Four Months Made Heavy Inroads on Employment in United States

WASHINGTON.—The business recession has taken a total of 4,300,000 jobs in the United States during the last four months, Federal economists estimated, bringing the nation's unemployed to a total of about 10,450,000.

That total, based on a revision of figures prepared for President Roosevelt's committee on economic security, is the highest in three years.

After reaching a peak of 16,071,000 in March, 1933, unemployed in the United States dwindled to a minimum of 6,132,000 in July, 1937.

In October, the jobless numbered 6,145,000, jumping to 7,177,000 in November, 8,080,000, in December, and 10,181,000 in January.

The Federal statisticians expect the coming of Spring weather will stimulate seasonal outdoor work sufficiently to offset any new increases in industrial unemployment in the next few months.

Bullets Open Oil Channels
Drilling oil wells by shooting bullets into the ground is a new process for mining oil pools. It has been developed in order to reach beyond areas tapped by ordinary drilling methods, creating small lateral shafts, like the horizontal shafts that branch out from the main vertical shaft in ordinary mines.

The lateral shafts in the oil sands are made by lowering a gun down the well to the desired distance and discharging a bullet through the metal casing, or pipe, that lines the well. When wells are drilled they frequently pass through oil bearing sands but are driven further to reach larger pools.

When the deeper pools are exhausted the pools at the higher levels which the well passed through would be lost unless another well was drilled at heavy expense.

Since careful records are kept of everything through which a well passes, it is known at what levels the oil sands exist. By lowering a gun into the well and shooting holes in the casing a channel is made by which the oil can flow into the well. The gun is about ten feet long and has fifteen barrels through each of which a bullet is discharged.

CROOK SAMARITAN
An American burglar was told that his victim had a weak heart. He put down his gun, gave the invalid a massage, then asked where the money was and went off with the loot.

STOP Itching
TORTURE In A Minute
For quick relief from the itching of eczema, blotches, pimples, athlete's foot, scales, rashes and other skin eruptions, apply Dr. Dennis' pure, cooling, antiseptic, liquid D. D. D. PRESCRIPTION. Along Canada's Mining Highway

The Golden Gate mine, originally known as the Lucky Cross property, located at Swastika a few miles to the west of the Kirkland Lake camp, is reported to be developing important ore in high-grade and low-grade veins in underground work. Mill construction is well advanced.

Tovarich Larder Gold Mines is a new incorporation covering properties to the west of Omega and bordering on the town of Larder Lake. After years of effort, numerous small owners have been brought together. Hollinger Gold Mines at one time tried to negotiate a satisfactory deal on part of the consolidation.

Cheminis Gold Mines has obtained good grade ore over substantial widths in its deep drilling campaign.

Barber Larder shaft is down over one hundred feet. Next month should bring reports of first underground ore developments. Kerr Addison mill construction is rapidly nearing completion.

O'Brien Mines in Cadillac Township, Quebec, reports excellent depth results.

Lacoma Gold mines in Tavernier Township continues to obtain favourable results in its extension drilling. A mining plant capable of deepening the shaft from the present 250 foot level to depth and to allow for aggressive underground development will be installed shortly.

GARDENING

Spread Plantings

Most people realize that all vegetables deteriorate in storage. The early potatoes are always tastier than those coming out of frosty cellars this month. The former taste better because they are not ripe. To get this quality in all vegetables experienced gardeners spread their seeding season over a period of weeks. They realize that vegetables deteriorate in the garden just as they do in storage and so they always have a few feet of lettuce and a row or two of spinach, corn, beans and practically everything else coming on rather than the whole garden maturing at one time.

To have a succession of really tender vegetables, one is advised to make at least three sowings from one packet, at intervals of ten days to two weeks, and to still further extend the season by using early, medium and late varieties. For instance, by using leaf lettuce for the early crops, head lettuce for June and July and again in the Fall, and Cos lettuce for the very hot weather, a fresh, tender supply of this salad material is available all season.

Change
There are some people who are afraid to make a change once a garden or home is laid out. But with most plants a shift is not only perfectly feasible but is good for the plants themselves. This does not mean that permanent trees and shrubbery should be dug up and replanted each spring, but with many of the perennials and annuals only confusion, over-crowding and deteriorating growth will result from too long residence in one spot. True, there are certain species which do better in one location than another. Some flowers must have full sun, and other partial shade. Any seed catalogue will list these different tastes. But there are usually a score or more which have these special preferences and one may be used one season and one another.

Sesame seed, also known as "til", "gingelly", and "benneiseed", is an important source of edible oil in the countries of production, where it is also used as an article of food. India and China account for more than nine-tenths of the world production of sesame seed, other minor producers being the Anglo-Egyptian Sudan, Turkey, Mexico, Greece and the Soviet Union. A small quantity of sesame seed oil is imported by Canada for industrial purposes.

MAKE YOUR LIVER Produce its bile
Your liver has a big job to do. Make it do what it is supposed to. Its job is to produce 18 to 24 fluid ounces of bile every day and send it through the system. If it falls down on its job you suffer. AND HOW!
The most effective stimulant for the liver known to medical science is calomel, which in small doses is of the highest use in congestive conditions, especially those due to over-eating, over-indulgence in alcohol, lack of exercise, etc. Fanoel Tablets contain a certain proportion of calomel, blended with cascara and other medicines. They are mild and harmless. But your liver understands and takes the hint. For sale at all druggists, 50c.

APPETITE gone?
BUILD UP YOUR NERVES
It's nerves—starved, weakened, upset nerves that usually are the cause of failing appetite. Build up your nerves with the great nerve tonic—PHOSFERINE—and see how quickly your appetite improves, and strength returns. At druggists, 50c, \$1.00 and \$1.50. 71

8 MONTHS VICTIM OF RHEUMATIC ACES
Now back at work again

No one with a spark of human sympathy could fail to be touched by the experience of this victim of rheumatic pains who had spent months in hospital. He had tried various remedies without result until . . . But read his own words:

"I had Rheumatism so bad, I was as helpless as a child. Then my wife suggested Fynnon Salt. I am on my third package and believe me the relief I received in the first week was surprising and now I am back at work again. I was told I should not be able to follow my regular employment, only a light job, but there I am back at my work, just as if it had not happened."

After an experience like that to inspire them, Rheumatic Sufferers can turn with confidence to Fynnon Salt. What Fynnon Salt did for this sufferer it should do for you. Fynnon Salt works because it combines many natural salts of the earth. Take a dose every day, and you will soon be singing the praises of this famous British remedy. 75c a large package at your druggist's. If you have any difficulty in getting supplies write: The Laurentian Agency, 55, Gabriel Street, Montreal.

POULTRY RAISERS
Check ROUP (Bronchial Flu)
With a Few Drops of

MINARD'S "KING OF PAIN" LINIMENT

THE EQUITY

SHAWVILLE, MAR. 31, 1938

Domion Government passes bill giving Saskatchewan \$14,500,000 and Alberta \$1,900,000 for seed grain distribution loans.

Quebec Government Ready to Pay \$10,000,000

At a meeting of the Legislative Council held at Quebec on March 24th, Premier Duplessis declared the Government is ready to pay up to \$10,000,000 on re-housing projects in Montreal if the Federal Government will provide an amount equal to the provincial contribution.

He told the Legislature's private bills committee re-housing for the metropolis as a "good plan" and expenditures of \$20,000,000 would ensure its success.

The committee suspended for further study a clause in the bill which would empower Montreal to borrow \$3,300,000 for construction of sanitary dwellings in slum areas.

During the sitting the Premier announced the appointment of Anatole Carignan, mayor of Lachine as head of provincial commission to study tax commutations and industrial assessment.

New Fair Wage Order in Quebec is Issued

Labour Minister Tremblay issued on Thursday night the Quebec Fair Wage Board's re-drafted Ordinance No. 4, providing minimum wages for nearly all occupations from that of delivery boy to canvasser.

The ordinance, replacing the original, which was withdrawn after much criticism, divides the province into four zones instead of three as in the original, and minimum wages are divided into three classes, based on hourly, weekly, monthly and yearly rates instead of hourly only.

Under the new ordinance, submitted to the cabinet for approval, experienced workers in Montreal district, not provided for under existing legislation, will receive a minimum rate of \$12.50 a week. The minimum rates for Quebec district and towns of at least 10,000 population will be \$11.50 and for the third and fourth zones, which include smaller municipalities, \$10.50 and \$9.50 respectively.

The ordinance provides time and a half pay for work over the general maximum work week of 48 hours.

There is provision for office workers, messenger boys, chauffeurs and taxi-drivers, store employees, waiters and waitresses, garage employees, hotel domestics, porters, teachers, janitors, building watchmen, shoe-shine boys and even housemaids. About the only type of work not touched is farming.

Main revisions contained in the new ordinance are in the re-zoning of the province, according to population, industry and economic conditions and wider classification of workers.

Special provisions of longer hours of work are made for occupations like butchers' and bakers' employes and the board rules that tips are the "exclusive property of employes."

Uniformed bell-boys and porters will be dressed at their own expense as long as the cost of uniforms does not exceed fixed prices. Even laundering of the uniforms is taken care of.

The ordinance makes exceptions to the general minimums in such types of work as domestic employment or messenger service because of special conditions and requires that all workers are given a full day's holiday a week.

During its study by the cabinet the revised ordinance is subject to modification before it goes into effect.

Minutes of South Ouslow School Board

March 19, 1938

A meeting of South Ouslow School Commissioners was held on above date at the usual place of meeting. Members present, J. H. Henderson, chairman, and Commissioners Inglee, Burden and Young.

On motion of Comr. Young the minutes of last meeting were confirmed as read.

Motion by Comr. Inglee, the resignation of Comr. Draper was accepted, and Harry Ann appointed in his stead.—Carried.

On motion of Comr. Inglee, the following bills were ordered paid:

J. H. Henderson, 10 cds wood... \$25 00
E. Hamilton, work at No. 3... 6 70
Dove's Transport... 1 25
W. C. Clark, work... 6 20
Reta Mulligan, cleaning No. 3... 2 00
I. Merrifield, supplies... 8 15

Motion by Comr. Young, that Irma Miller be re-engaged for No. 1 at \$60.00 per month.—Carried.

Motion by Comr. Burden, that Edna Curran be re-engaged for No. 3 at \$60.00 per month.—Carried.

Motion by Comr. Inglee, that May Scott be engaged for No. 4 at \$60.00 per month.—Carried.

Motion by Comr. Burden, that the Sec. Treas. notify Bessie Murdock, that her services will not be required after June 30th.—Carried.

On motion of Comr. Ann the meeting then adjourned.

Jos. A. STEELE,
Sec. Treas.

Planets and Norse Gods

Gave Names to Week Days

The week was unknown to the ancients. It was gradually adopted under the later Roman emperors, with the growth of Christianity and under the influence of the seven-day creation of Genesis.

It was a principle of the ancient astrology that seven heavenly bodies presided in succession over the hours of the day. The seven so credited were the sun, the moon, Mars, Mercury, Jupiter, Venus and Saturn.

From these, observes a writer in the Cleveland Plain Dealer, the Latin designations given to the days of the week have been directly derived; and from the Latin names, in turn, have been chiefly formed the modern names used in various countries—either by literal translation or, as in the Teutonic tongue, by the substitution of the corresponding deity of the northern paganism for the Latin god.

Sunday is derived from "sunnandaeg," day of the sun, the first day of the week having been dedicated to the sun by the pagans.

Monday is derived from "monandaeg," day of the moon.

Tuesday, "tiwesdaeg," from "Tiw," the god of war.

Wednesday, "wodnesdaeg," from Odin, the god of storms.

Thursday, "thunresdaeg," day of Thor, the god of thunder.

Friday, "frigedaeg," day of Freya, goddess of marriage.

Saturday, "saterdaeg," Latin, "Dies Saturnus," day of Saturn, the god of time.

Many Legends Concerning

Origin of Fairy Crosses

According to Stimpson's "Nuggets of Knowledge," fairy crosses are crystals of staurolite, a dark silicate of aluminum and iron. They are found in Maine, New Hampshire, Massachusetts, North Carolina, Georgia, Virginia and a few have been reported in Minnesota and other states. Although the best specimens are perhaps found in Patrick county, Virginia, they are more abundant in other localities, particularly Fannin county, Georgia. Nearly perfect crosses have been found, but most of them must be trimmed to some extent.

There are various legends among the Blue Ridge mountaineers concerning the origin of these crosses. The legend from which they receive their name is as follows:

When Jesus was crucified, elfin messengers carried the news to all parts of the world. When the tidings reached the Blue Ridge mountains, they began to weep and as they wept the tears fell upon the earth and crystallized into little pebbles, on which was formed a beautiful cross.

Tahitians Swim

The Tahitians are wonderful under-water swimmers and love to swim out to their coral reefs, where magnificent under-water ferns and plants grow in profuse kinds and fantastic shapes. The Tahitians can stay under some time to gather these tropical flowers; they like to wear them in their hair. There is only one place that they are forbidden to swim. That is the Sacred Blue Grotto of the Gods near Paapee, the capital. The water here is an amazing bright blue and very beautiful. The Tahitians have been told by their medicine man that they would immediately be pulled down by a deathly swift current in this deep pool, wading to find themselves in an open field full of flowers and surrounded by beautiful peaks where the gods live.

Spice Trees

Our foods are often flavored with nutmeg and mace, and both these spices come from the same plant, the nutmeg tree, which grows in the East and West Indies and Brazil. The tree reaches a height of about 30 feet, and has large leathery evergreen leaves which give out a rich odor, and small, pale yellow flowers. The pear-shaped fruits open into two nearly equal halves, and the nutmeg is then disclosed, surrounded by a fleshy fibrous covering, which is the mace. Like the nutmeg, it is very fragrant. The nutmeg tree begins to bear fruit when it is eight years old, and goes on for about 60 years. Nutmeg and mace are used not only in cookery as a flavoring for custards and puddings, but in medicine as a stimulant and to disguise the taste of unpleasant drugs.

The Hoop Snake

There is a small and harmless snake of the south Atlantic states, popularly called the hoop snake because of the notion that it curves itself into a hoop, takes its tail into its mouth and rolls along at a merry clip. This notion is purely mythical, although it is believed by many, especially the backland negroes. That any snake could perform such a feat is absurd, and taking into consideration the anatomical peculiarities of the vertebral column it is clearly impossible. The hoop snake does much of his traveling underground, burrowing deeply into the soil. He is a rather good looking snake, with a blue-black back, marked with three red lines, and an underside of the shade called nude, dappled in black.

Judge Millar as Our Judge

The following is a clipping of the outstanding personalities of the Ottawa district, taken from the Ottawa Citizen. The people of Pontiac refer frequently to His Honor Judge J. R. S. Millar, as "Our Judge" and perhaps that suggests as well as anything that might be said how close he is to the people he has long served, is indicative of the place he fills in their lives.

Probably if Mr. Millar hadn't become a judge he might have been a politician; in fact in earlier years when he looked out upon life as a great adventure, he was so inclined. Now in the autumn of his days one fancies he is much happier, more content, in his important judicial role and amid the impressive tones and legal references that surround him plentifully in his headquarters either at Campbell's Bay or Hull than he ever would have been in the maelstrom of political life.

But he would probably have gone a considerable distance in politics, because he speaks English and French with equal fluency, is what the world terms a good fellow, doesn't take himself too seriously; yet his studied approach to matters of particular concern leads the observer to regard him as a student of philosophy that guided Gladstone in his public career. "Be not careless in deeds nor confused in words, nor rambling in thought".

It was in 1905 that Judge Millar first came to Pontiac as a young and hopeful lawyer. He opened an office in Bryson, then the county town of Pontiac and a place of optimism until the fire in 1914 when more than seventy buildings burned, and subsequently the county seat, and the young lawyer Millar moved to Campbell's Bay.

Three years later, or just twelve years after he left the classroom in Montreal, Roland Millar had attracted the attention of the Quebec government. The late Premier Lomer Gouin sent for him one day, looked him over and declared, "well your pretty young, but they tell me you are dependable and sound. We are going to give you a chance. You are to be one of our twenty-one district judges of Quebec with special jurisdiction in Pontiac. My one word of advice is that once you ascend the bench forget friends, politics and a man's religion.

Neither Quebec nor Canada ever had reason to regret that appointment. He has presided in every county court within the district of Montreal, his bilingual attainments served him well, he it was who held the first magistrate's court in Rouye.

Ruby First Jewel Made

for the General Trade

The ruby was the first precious stone to be manufactured commercially, according to a writer in the Washington Post. It is simply oxide of aluminum with a small amount of oxide of chromium, which gives to it the brilliant red color. Many methods of making the ruby were tried from 1870 to 1890, all more or less successful from the chemical standpoint, but failures from the commercial point of view. It happened, however, that rubies appeared on the market of Geneva, whose origin could not be accounted for.

As a matter of fact, a curate of Geneva had succeeded in fusing chips of natural ruby given him by the lapidaries into large stones. This brought about a revival in the synthesis of the ruby, for it was argued that if ruby chips could be fused, the oxide of aluminum, of which they are composed, could be fused.

Professor Verneuil, the famous French chemist, finally succeeded in making the ruby, though only after many years of painful research and hard toil.

King Could Not Speak English

George I, king of England from 1714 to 1727, could neither speak nor write the English language, notes a writer in the Indianapolis News. He was the son of Ernest Augustus, elector of Hanover, and Sophia, granddaughter of James I, of England. The German became the nearest heir to the English crown on the theory that the blood of James II in the direct line was corrupted. When he succeeded Queen Anne as sovereign of England he was fifty-four years old and he made no attempt to learn the language of his kingdom. William of Orange, who reigned jointly with his wife, Mary, from 1689 to 1694 and as sole sovereign from 1694 until 1702, was Dutch in nationality, knew very little English, and was not sufficiently master of that language to address the house from the throne in his own words. On important occasions, it was his practice to write his speech in French, and to employ a translator. French was the native language of the English kings for many generations after the Norman conquest.

Inhabitants of Shells

Classified as Mollusks

All inhabitants of shells, from garden snails to "gosler clams" are mollusks. There are two main classes, univalves and bivalves, easily to be distinguished by the one or the two-part shell. Many hundreds of individual species exist in each class, but the orders most commonly found are comparatively few, and not too difficult to recognize, according to an authority in the Rural New-Yorker.

As for the crustaceans, this class includes all crabs, shrimp, lobsters, beach-fleas and even barnacles. The funny little fiddler crab is to be found in salt marshes everywhere, from Florida to New England, and cannot be mistaken, since no other crab possesses that huge right claw, which it waves about as if it were a bow. The females do not possess this distinction. The horseshoe crab is not properly a crab at all, since he has an order all to himself, and not a single living relative.

Echinoderms are creatures having a prickly skin. The Greeks used the same word (echinos) for hedgehog and for sea-urchin. Some members of this division wear long, sharp spines, large enough to be used for slate pencils! Others have a plucky surface, like the sand-dollars, or a rough one, resembling a kitchen grater. One class, the sea-cucumbers, show only a granular skin. All echinoderms live in salt water.

Kipling's Autographs

The late Rudyard Kipling once was asked by his grocer to pay his bills by check. Mr. Kipling did so, then noticed the checks never came back from the bank. He investigated, found the butcher was selling the checks as autographs. Since the author rarely autographed anything, his name on a check was worth more than the check itself!

First Lamp Patent in 1798

In 1798 the first lamp patent was issued to John Love, of South Carolina, for a tallow lamp. The earliest patented lamp known is the nursery lamp made by William Howe, of Boston, dated 1812. The second earliest example appeared nearly two decades later, in 1831, and the patent was issued to John W. Schulz and William Trull. Between the granting of these two patents twenty others had been issued.

Ulster Is One-Sixth of the Emerald Isle's Area

Ulster, northern province of Ireland, comprises one-sixth of the total area of the Emerald Isle, and one-eighth of the total area of the British Isles.

There is a long seaboard to the north and east extending 245 miles, while the land boundary to the south and west measures 260 miles. The waters of the southern portion of the coast are shallow, but the eastern and northeastern shores are flanked by the deep North channel, and good natural harbors are found in many places. Three estuaries—those of the Lagan, Foyle and Newry rivers—run for considerable distances inland, and so greatly facilitate trading with the hinterland. The Lagan estuary is the principal goods port for Belfast and for an extensive inland district.

Topographically, Northern Ireland is chiefly hilly or rolling country, the highest levels being reached in the Mourne mountains in the south, where the greatest height is 2,796 feet above sea level.

The country as a whole is famed for the wide diversity of its natural scenery, ranging from the loveliness of Lough Erne and the Glens of Antrim to the rugged grandeur of the Gaint's Causeway and the Coast road from Larne to Portrush.

Maelstrom Described by

Poe on Norwegian Coast

The Maelstrom's existence, as described by Edgar Allen Poe and other writers, is indisputable, although its dangers are often exaggerated, states a writer in the Cleveland Plain Dealer. It is a remarkable whirlpool on the Norwegian coast, just southwest of Lof-foden islands. The strong currents rushing between the Great West fjord and the outer ocean through the channels of these islands produce a number of whirlpools, the Maelstrom being the largest and strongest. The name means "grinding stream," and the grinding is done between the island of Mo-shones and a large solitary rock in the middle of the straits.

Such extravagant stories have been told of this great eddy—how everything that enters the border of its current is instantly sucked down to a bottomless abyss—that its very existence has been doubted. Its perils, of course, were greater in the days of smaller ships and no steam power.

As a matter of fact, steamships may cross the Maelstrom in calm weather, at any state of the tide, without difficulty. And in the summer, at change of tide, the current is comparatively calm and even small boats may venture upon it. But in winter or in a storm it is highly dangerous for any vessel to try to pass. During a storm from the west the current runs continually to the east at the rate of six knots, without changing its direction for rising or falling tide, and the stream boils with such mighty whirls and eddies that a vessel of any size would have great difficulty in getting through. The danger is not of suction into the heart of the whirlpool, as legends have supposed, but of being dashed to pieces against the rocks. Dead whales are sometimes thrown up on the coast, killed in this way. The depth of the whirlpool is only 20 fathoms, but just outside the straits soundings reach from 100 to 200 fathoms.

Pearls Cannot Be Given Life

Pearls are things which never die. They are either born still-born and dead, or living. Still-born pearls with their dull, dead look can never be revived, according to a pearl specialist. This doesn't mean that all pearls that look dead are really so, though it takes a real expert to know when looking at them just after they have been extracted from the oyster. In most cases, the upper layer, or layers, of an oyster are not at all pretty. Having been built by the oyster in successive layers of congealed fluid, each layer has its own characteristic. The expert pearl jeweler's job is to see what layers lie below those which are uppermost, and to decide what tint and what layer will give the greatest value to the pearl. And then to remove the less beautiful layers without damaging the lower, richer ones.

"Jai-Alai," Ball Game, Rivals the Bull Fight

"Jai-alai," better known as "pe-
lota" (meaning ball in Spanish), is
a game somewhat similar to hand-
ball, which originated in the Basque
provinces of France and Spain. In
parts of Spain, it rivals bull fights in
popularity, says a writer in the De-
troit News. Originally "pelota" was
played with hand, naked or gloved,
or with a stick, but now a stout
basket-work gauntlet, called a "ces-
tus" or "chistera" is used. This
basket, a Basque invention first
used at Ascain, France, revolution-
ized the game by increasing the pro-
pelling power of the players and the
carrying force of the ball.

The game may be played either
indoors or outdoors and requires a
cement court, 200 feet long and 65
feet wide, with at least two walls
36 feet high. Four walls may be
used. There are usually four play-
ers and among the professionals are
men who have done little else since
boyhood. The ball is of solid rub-
ber, small and weighs about four
ounces. During play, the ball is
bounced from wall to "cestus" and
must be kept in motion. The game
is very popular in the Basque prov-
inces, Spain, Cuba and South Amer-
ica. According to the Americana
Encyclopedia, "It is claimed for this
game that it requires a better eye,
more speed, activity and surer con-
trol over every muscle of the body
than any other sport."

Original Glass Bottles Valuable

It has been commonly acknowl-
edged that glass bottles, shortly
after their invention, were "worth
their weight in gold." But an item
in the American Magazine indicates
that these transparent containers
were valued much more highly than
the yellow metal in old Egypt,
where a price of \$3,500,000 was set
and paid on one glass bottle. Orig-
inally made only by master craft-
men and used in the packaging of
rare attars and cosmetics, glass-
ware required 40 centuries of study
and refinement to reach its present
superiority and inexpensiveness.
The common foodstuff bottles on
our shelves today are more perfect
by far than the crude bottles of
long ago—yet they cost us practi-
cally nothing!

Ancestry of Cameo in Doubt

The earliest ancestry of the
cameo will always be a matter of
conjecture, according to Cyril Dav-
enport of the British museum whose
book, "Cameos," is the illuminating
result of extensive study and re-
search. But for really skilled work,
we need not go farther back than to
the Egyptian scarabs, which were
seals with the backs cut into the
semblance of the sacred beetle. The
outline of the scarab cameo persist-
ed for a long time.

St. Giles Cathedral Historic

St. Giles cathedral, standing on
the line of the "Royal Mile"—that
medieval street which leads from
castle to palace in Edinburgh—has
been the scene of many important
events in the past of the Scottish
capital. The walls have echoed the
thunderings of John Knox, the re-
former, and it was here, according
to tradition, that one Jenny Geddes,
in 1637, flung a stool at the Dean of
Edinburgh as a protest against the
introduction of Laud's Liturgy.

THE LARGEST SELLING TEA IN THE WORLD

TEXAS GUNS . . . by L. P. Holmes

CHAPTER I
Silas Spelle gripped his black stogie more firmly between his yellow teeth and, leaning across Ed Starbuck's desk, pounded a huge first upon the oaken top to add emphasis to his words.

"By Heaven, yuh've got to do something, Starbuck," he snapped. "You know and I know and everybody else knows yore damned bank is on the verge of going under. Yuh couldn't pay off yore depositors now, not four-bits on the dollars. I'm offerin' yuh a fair proposition. As I told yuh before I'll buy up the mortgages yuh hold and I'll pay every cent yuh loaned on them plus interest to date. That's a damn good offer—yuh know it is."

"Perhaps," replied Starbuck quietly. "But it ain't enough, Spelle. Those mortgages represent more than just collateral to me. They represent faith—faith in me and my bank by the men who gave them. In time they'll all be taken up. Present conditions won't last forever. The price of beef is beginning to climb. The drought is broken. No Spelle, yuh or no other man has got enough money to tempt me to double-cross my friends."

A Week to Think It Over
"Faith—faith hell," snorted Spelle. "Yuh'll starve to death while yuh're rantin' about faith. Yuh're a hell of an excuse of a business man. Yuh better consider my proposition, Starbuck. If I have a tip off the bank examiner in Westhaven he'll put the skids under yuh pronto. But I don't want to do that. My offer stands. I'll give yuh until this time next week to think it over. I'll be back for an answer then."

Spelle stood up, a big, thick-set man whose loose, thick lips and close set eyes mirrored plain the consuming passion of his life. Greed! Greed and selfishness.

"Remember," he bit out, stepping to the door of Starbuck's office. "By this time next week I'll expect yuh

to get back to common sense. If yuh won't talk turkey then why—" He finished with a significant gesture, which consisted of holding out one grimy, hairy hand then closing it slowly as though to crush whatever lay within it.

"Wait!"
Sound Right Arm
Ed Starbuck was now on his feet, a tall, gaunt, leathery faced man, whose drooping tawny moustache bracketed a pair of grim, tight lips. Beneath his faded, bushy eyebrows his eyes looked out clear and blue and cold. His left sleeve hung empty for the arm was off at the shoulder, a reminder of an old rustling war when he himself had been a cut-throat. But the lean right hand was sound and with it he lifted a heavy, worn Colt revolver from the drawer of his desk and laid it on the scarred surface before him.

"Yuh've had yore say, Spelle," he drawled, his words dripping contempt and scorn. "Now I'll have mine. What I just told yuh stands, this week, next week or any other week. Yore damned money ain't worth hell room in this bank. Faith—no, yuh don't know the meaning of the word. Greed is yore war-cry."
Thick blood congested Spelle's beefy features. His lips parted in a snarl. He tried to match looks, but failed. Those icy blue eyes of the valiant old banker seered like live flames and the implacable courage behind them was unmistakable. Spelle cursed venomously and left.

Had To Have Cash
Ed Starbuck stood for a long time after Spelle had gone. The fire in his eyes slowly faded and hopelessness took its place. He sank back into his chair like an old man who was suddenly very weary. Ed Starbuck had always been a man who faced facts squarely, regardless of what those facts might be. He faced them now. Spelle had told the truth. The Cattleman's Bank of Carillon was on the narrow edge. True, Starbuck held mortgages that would more than put him on his feet, should he sell them out. But this, according to Starbuck's standards, would be breaking faith with men he had known all his life and who trusted him. Still he had to have money—cash. There was only one thing to do. He would ride around to the different cattle outfits and put his problem squarely up to the owners. They all stood to stand or fall together. If they could somehow help his bank to weather through they would have Spelle whipped. If they didn't—Starbuck sighed, reached for his hat and went out into the street.

The little cowtown of Carillon was drowning in the heat of midafternoon. The single, dusty street lay white and glaring in the sun, and was deserted save for a bare-foot Mexican or two and a pair of cow-ponies slouching at the hitching rail before Jake Butterfield's Emporium. Starbuck angled across the street towards the livery stable and corral at the northern end of town.

A few moments later he emerged from the livery stable, leading a saddle horse. He swung into the saddle and headed south along the street. As he did so two punchers clanked out of Butterfield's and forked the two cowponies. They also headed

south. The horses of the two strangers looked somewhat jaded and Starbuck soon overtook them. The elder of the riders looked up. He was a wiry, leathery faced man, past middle age; clean shaven and with innumerable wrinkles about the corners of his mouth and eyes. The mouth seemed harsh yet a humorous quirk lingered about it somehow. The eyes were clear, fleckless gray, capable of either warmth or abysmal chill. The wide, weather beaten sombrero rested on a mane of silvery hair. One of the real old timers, decided Starbuck.

Swedish Breads Favorite Food

Eating Is a Loved Pastime In The Scandinavian Countries

In Sweden, the favorite indoor sport is eating; eating brought to the level of a fine art and practiced ordinarily five times a day. The average citizen of Sweden indulges the year around in strenuous outdoor sports. Quite naturally, this continual activity and exercise, carried on in the bracing climate which is Sweden's, builds up in him, and maintains, a robust appetite. The first course of a Swedish meal is the smorgasbord, in English, the "bread and butter board." The smorgasbord often consists of as many as 40 distinctive items. There are arranged in order. After many types of butters presented in various shapes and patterns, comes the array of breads; breads hard, breads soft, breads large, breads small, breads black, brown and white. From this course they proceed to partake of many other types of foods.

Rye Bread Predominates
The people of Sweden make many odd types of bread: i.e., flax bread, godt flad brod, jefse, and black bread, and others, but at the present time rye bread predominates, and is now in the most general use among the Swedish householders.

The oldest of Swedish bread, known as unleavened rye bread or knackebroed was used by the Swedish sailors in olden days, due to its quality of keeping indefinitely under proper conditions, and was in former years stored in piles for future use. In times of famine, too, it proved to be of great benefit to the whole nation.

Little wonder is it, that the Swedish people have not been at war for more than a hundred years. They have been too busy baking bread.

Things Happen Too Swiftly

Nowadays For People to Keep Their Diaries Written Up To Date

EDMONTON.—The day of the diary is virtually past. This is the consensus among Edmonton citizens.

No longer do romantically inclined girls or methodical boys pen their daily doings under the heading "Dear Diary." And why? Because things happen far too fast in this day and age to attempt to record them.

Time was, pioneers recalled, when questioned by a reporter, when Aunt Sophie's lawn social or the first fleeting glimpse of the new "heart-throb" who just moved in next door were enough to fill at least one page of a chronic-keeper's log.

Crowded Modern Life
But today? "Gosh, I have too much trouble trying to keep track of one day's dates, let alone jotting down an account of them," flashed a college girl with a smile.

"It would be kind of nice to look back over the year's happenings," said one girl. "I've started a diary several times, but after a week or two I dropped it. Too much trouble."

Nearly all the people interviewed had at one time in their life undertaken the task, but had later abandoned it. Crowded modern life has transmuted the old-fashioned diary into the more businesslike memo pad.

Should Iron Along Thread Of Goods

Ironing clothes is sometimes quite a problem, but when the best method is understood, everything becomes much simpler.

The iron should always be moved along the threads of the material, either lengthwise or crosswise. Clothes except pongee, should be ironed damp.

Sheets are usually folded in half. Table linen is folded in half and again in fourths. These folds should be changed occasionally.

When filling cracks in a floor preparatory to painting, putty or prepared crack filler may be used. Before using putty, apply linseed oil to the edge of cracks with a small brush. This will prevent the dry edges of the boards absorbing the oil from the putty and leaving it to dry and crumble away.

SAUCES

Much of the art of world renowned chefs depends on their ability to choose a sauce appropriate to the dish being served—a tart sauce for a bland fish, a rich sauce for a lean meat—always a sauce to complement the food it accompanies. These high priests of the kitchen seem to have dozens of delicious sauces in their repertory, each a little different in flavour and consistency, each giving new possibilities and variety to the menu.

Actually, nearly all these sauces are variations or derivatives of a few simple recipes. Their difference is in their seasonings and ingredients that are added. Armed with the basic recipes, the Canadian housewife can create perfect flavour in even the simplest meals by using sauces that emphasize the flavour of the food they accompany or supply flavour which the food may lack.

Here are two of the master sauces with variations. The others will be in next week's issue.

White Sauce
2 tablespoons butter
2 tablespoons flour
1 cup milk
½ teaspoon salt
Dash of white pepper
Melt butter in saucepan. Add flour and stir to a smooth paste. Add milk gradually, stirring constantly, and continue cooking and stirring until thickened. Season with salt and pepper. Use for creamed and scalloped dishes. Makes 1 cup sauce.

Cheese Sauce
To White Sauce (above) add ¼ cup grated Canadian cheese and a few drops of Worcestershire sauce. Stir until cheese is melted. Serve with egg or vegetable dishes. Makes about 1½ cups sauce.

Pimiento Sauce
To White Sauce, add ½ cup pimiento, forced through sieve. Season to taste. Serve with egg, cheese, or fish dishes. Makes about 1½ cups sauce.

Parsley Sauce
To White Sauce add 1 tablespoon finely chopped parsley and season to taste. Serve with potatoes or other

vegetables, or with fish. Makes 1 cup sauce.

Egg Sauce
To White Sauce add 1 chopped hard-cooked egg and season to taste. Serve with fish. Makes 1½ cups sauce.

Pea or Asparagus Sauce
To White Sauce add 2/3 cup cooked beans or asparagus, cut in small pieces. Season to taste. Serve with omelet. Makes about 1½ cups sauce.

Brown Gravy
After removing roast from roaster, pour off fat in pan. Measure 4 tablespoons fat, add 3 tablespoons flour and mix well in saucepan. Stir over medium fire for 1 minute to brown flour. Measure juice from roast left in pan, and add enough boiling water to make 2 cups. Add to flour mixture, stirring constantly, and continue cooking and stirring until thickened. Season if necessary. Makes 2 cups gravy.

Brown Sauce
3 tablespoons butter
½ small onion, minced
2 tablespoons flour
1 cup beef stock
Dash of salt
Melt butter in saucepan. Add onion and saute until well browned. Add stock and continue cooking until thickened, stirring constantly. Add salt to taste. Makes 1 cup sauce.

Brown Mushroom Sauce
To Brown Sauce, add 1 cup fresh mushrooms, thinly sliced and sauteed in butter. Serve with roast beef, steak, croquettes, or omelet. Makes about 1½ cups sauce.

Sauce Piquante
To Brown Sauce, add 1 tablespoon vinegar, 1 tablespoon capers, 1 tablespoon chopped pickle, and dash of Cayenne. Serve with veal, beef, or fish. Makes about 1½ cups sauce.

Russian Sauce
To Brown Sauce, add 4 teaspoons heavy cream and 2 teaspoons lemon juice. Serve with boiled corned beef. Makes 1 cup sauce.

Sauce Mephisto
To Brown Sauce, add ¼ teaspoon Worcestershire sauce. Serve with steak or meat balls. Makes 1 cup sauce.

Pepper Sauce
To Brown Sauce, add ¼ cup diced green pepper, sauteed in butter until tender. Serve with omelet, meat loaf, veal, or pork. Makes about 1½ cups sauce.

Hamper in Bathroom
A hamper for soiled clothes may be built into the bathroom when a new home is being planned. This facility is a convenience which removes the necessity of having an individual hamper in the laundry room. It has been found practical by many homeowners to build a laundry chute from the bedroom floor into a storage recess well ventilated in the basement. The laundry chute also saves the housewife a good many steps in her daily work.

Filling Cracks
When filling cracks in a floor preparatory to painting, putty or prepared crack filler may be used. Before using putty, apply linseed oil to the edge of cracks with a small brush. This will prevent the dry edges of the boards absorbing the oil from the putty and leaving it to dry and crumble away.

Stucco House Motif
A color scheme for a stucco house combines ivory for the body trim, blue shutters and pale green for the window sash. Doors are painted rich green. A deep green band circles the top of chimney which is painted the body color.

Freeing Windows
When windows stick in winter weather that alternately freezes and thaws, a little salt sprinkled on the window sill will do much to relieve this inconvenience.

Doors Add Note
A new note of interest may be given to your living or dining-room by removing the old bay window and replacing it with full-length French doors.

WORKS IN 2 WAYS ON DISCOMFORT OF

COLDS

1. Take 2 "ASPIRIN" tablets and drink a full glass of water. Repeat treatment in 2 hours.

2. If throat is sore from the cold, crush and stir 3 "ASPIRIN" tablets in ½ glass of water. Gargle twice. This eases throat rawness and soreness almost instantly.

No family need neglect even minor head colds.

Here is what to do: Take two "Aspirin" tablets when you feel a cold coming on—with a full glass of water. Then repeat, if necessary, according to directions in each package. Relief comes rapidly.

The "Aspirin" method of relieving colds is the way many doctors approve. You take "Aspirin" for relief—then if you are not improved promptly, you call the family doctor. "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Summer, Autumn, Winter

Man is the only animal (except Woman) to enter a trap with open eyes.

There sits that spider, Time—there are the flies

Climbing the sticky ladder, always swept

Upward by thought of progress, while inept,

The busy beetle, ever thwarted, tries To reach the perfect center before it dies

To nourish the spider that has never slept.

The trap is love, as you have heard before—

But we, unlike the insects, know our doom;

That lends mankind a certain dignity. Myself, entangled, unable to restore Autonomy, anticipate the broom

That, sooner than the spider, sets me free.

Man-Eating Shark Killed By Kissing

Missionary Tells Amazing Story of Incidents During Hunt

A Roman Catholic missionary last week told a story of Fiji Islanders killing man-eating sharks by kissing them and changing the courses of rivers by sorcery.

As proof, Rev. Arsene J. Laplante of the Society of Mary, in the United States on a brief visit after 10 years in the South Sea islands, exhibited a sound movie of the shark-killing rite.

The film showed five sharks from three to four feet long drawn into a net, picked from the water and then stiffened by the touch of the captor's lips on their bellies.

Four or five men who inherited the right to kiss sharks participate in the roundups.

HOW ARE YOUR KIDNEYS?

FOR the relief of minor kidney irregularities Dr. Pierce's A-nuric Tablets have been found very beneficial. The action of this stimulant diuretic in flushing the kidneys, diluting acid, and relieving irritation has given relief to men and women in every part of Canada. Read what Mrs. C. Wilson, 612 Park St., Niagara Falls, Ont., said: "My kidneys didn't function properly and my rest was often disturbed at night. Dr. Pierce's A-nuric was the medicine that helped me. I certainly had a trying time of it before I used 'A-nuric' but since I have started to take these tablets I have improved beyond my expectations."

Your Spring Tailleur . . . For Town or Country—In Plaid And Plain Tweed

You'll find this plaid and plain tailleur the most useful thing in your Spring wardrobe. It's such a youthful casual suit for town that's just as smart for the country. The fitted jacket closes with a single button. However, it may have two or three buttons to suit your taste. The two big patch pockets are an important detail. What variety and fun it is to "match and mix" them! Home-spun, flannel and men's wear worsted with diagonal check stripes are other popular materials. The same pattern may be used for a two-piece wool hopsacking, rayon crepe or linen dress. It buttons up to a sports vee neck, which may have an Ascot scarf. The pattern may also be used for separate linen and cotton print jackets and skirts. It's so easy to sew; the saving in cost enormous.

Style No. 2821 is designed for sizes 12, 14, 16, 18, 20 years, 30, 32, 34, 36, 38 and 40-inches bust. Size 16 requires 1½ yards of 54-inch material for skirt; and 1½ yards of 54-inch material for jacket.

Send Fifteen Cents (15c), for this Pattern to Peerless Patterns, Room 421, 73 West Adelaide St., Toronto.

Sunday School Lesson

LESSON XIII. CORRECTING WRONG IDEAS OF RELIGION—Mark 7:1-13.

Golden Text—This people honor me with their lips, but their heart is far from me. Mark 7:6. THE LESSON IN ITS SETTING. Time.—A.D. 29. Place.—Capernaum.

1. And there are gathered together unto him the Pharisees, and certain of the scribes, who had come from Jerusalem. The reason Mark does not say "certain of the Pharisees and of the scribes," but only "certain of the scribes," is most probably because these scribes were especially selected for their learning to match that of Jesus. The Pharisees formed the Jewish sect or party which laid utmost stress on the strictest outward observance of the law. They were utterly self-righteous, and cultivated a hollow formalism that was ostentatious to a degree, especially in observing ceremonies, fastings, etc. Jesus exposes them as arrogant hypocrites. The scribes were the professional students of the law (Old Testament).

The present delegation was sent up from the capital to spy upon Jesus, to discredit him with the people, and to find cause for legal action against him.

Ceremonial Cleanliness

2. And had seen that some of his disciples ate their bread with defiled, that is, unwashed hands. It will be noticed that in the margin of the Revised Version the word here translated "defiled" is there translated "common." The Pharisees did not seek by these washings to remove dirt, but the defilement by contact with profane things.

3. (For the Pharisees, and all the Jews, except they wash their hands diligently, eat not.) Washings are frequently referred to in the Old Testament, especially in the regulations regarding ceremonial cleanliness. Holding the tradition of the elders. The elders were the leading Jewish teachers who expounded the law and applied its precepts to actual life. According to their views, the law of Moses was a system of precepts which surrounded the whole of man's life and enveloped each part of human existence in its embrace. Every action was thus looked on as legal or illegal.

4. And when they come from the marketplace, except they bathe themselves, they eat not. Because Jews would necessarily have to mingle with Gentiles in such public places as the markets. And many other things there are, which they have received to hold, washings of cups, and pots, and brazen vessels).

5. And the Pharisees and the scribes ask him, Why walk not thy disciples according to the tradition of the elders, but eat their bread with defiled hands? These men leave the disciples alone; they hold Jesus responsible, hence "thy disciples," they who follow thy teaching and thy spirit. These men are keen, they see that this one act of the disciples really sets aside the entire tradition of the elders.

Hypocrisy Exposed

6. And he said unto them. Hardly anywhere else in the Gospels is the absolute pre-eminence of the Lord Jesus Christ as a teacher so clearly revealed as here. In the few short sentences which now drop from his lips our Lord pierces the shell of all this outer formalism, and reveals a deadening hypocrisy in the depths of the Jewish heart. Our Lord here smashes to pieces forever the whole humanly constructed system of the wooden traditions of men, giving back to true, living, deep, religious life the pre-eminent place originally given to it by God. Well did Isaiah prophesy of you hypocrites. All of us have to watch ourselves continually, as disciples of the Lord Jesus Christ, that by words or gifts or actions we do not become ourselves guilty of hypocrisy.

As it is written, This people honor me with their lips, but their heart is far from me. 7. But in vain do they worship me, Teaching as their doctrines the precepts of men. 8. Ye leave the commandment of God, and hold fast the tradition of men. Such an indictment as this can be applied only to religious people. The Jews were religious. By teaching and preaching, by saying prayers out loud in the synagogues, by joining in the songs to Jehovah, they were pretending to honor God with their lips. While they worshipped God, they did not obey the law of God.

9. And he said unto them, Full well do ye reject the commandment of God, that ye may keep your tradition. Directly a precept made for an occasion becomes a binding tradition to be subsequently obeyed, it is evil. The first movement toward the mastery of the soul by tradition is the movement of that soul away from immediate, direct, first-hand fellowship with God.

We should apply this teaching of our Lord to our present day, and before condemning these Pharisees too severely we should be sure that we ourselves are not somewhat guilty of the some blind worship of human tradition. How many things today in our churches are not commanded by the word of God? What our Lord was getting at was that the Pharisees made these more or less artificial rules to be absolutely authoritative, and gave them an importance greater than the importance of the word of God. Now there may be many things in our churches today which the word of God does not commend.

The Lord now proceeds to give these men a powerful illustration of what he is talking about, showing them how, from their own mean tricks, they are guilty of dishonoring the law of God, pretending to be true to the tradition of the elders.

10. For Moses said, Honor thy father and thy mother; and, He that speaketh evil of father or mother, let him die the death. Of course the reference here is first to the Fifth Commandment.

11. But ye say, If a man shall say to his father or his mother, That wherewith thou mightest have been profited by me is Corban, that is to say, Given to God; 12. Ye no longer suffer him to do ought for his father or his mother. 13. Making void the word of God by your tradition, which ye have delivered: and many such like things ye do. The word "Corban" is a Hebrew word, which means, fundamentally, "dedicated," i.e., "dedicated to God." When once a Jew had dedicated any possession of his, any piece of property or any money to God, calling out the word "Corban" over this particular object, that money or property or object could never be used except in some religious way; the vow of dedication could never be broken. What our Lord is saying here is that some Jews would be so mean that when a hour came when their parents were in need, and they had the means to help their parents, rather than give them out of their sufficiency, they would pronounce "Corban" over these very things which they could have used to help their parents. That the case with the Fifth Commandment is only a single illustration, Jesus declares by adding that the Pharisees keep doing many things that rob the divine word of its authority for the conscience. Thus these men, who imagined they had a case against Jesus, not only have their answer, a complete vindication of Jesus and his disciples, but have an indictment launched against themselves, one fortified by absolute proof against which no defense is possible on their part.

Won't Accept Lift In Radioless Car

"Comfort" according to one bewildered motorist of Wingham, Ont., is the latest fad to be requested by would-be hitch-hikers who travel by means of the "thumb route."

One good hearted motorist upon passing two of the fairer sex while enroute to business was hailed and asked his destination. Upon receiving their information and much to the chagrin of the motorist, one girl, the more witty of the two remarked: "Have you a radio in this car?" "No madam," "How about a heater?" "I'm sorry, miss. These modern inventions are too modern for my mode of travel." Whereupon both refused to accept the lift, and slammed the door, much to the amazement of the astonished motorist, who continued on his way, leaving the "Queens of the road" awaiting the next victim, who no doubt would receive the same query.

Fearing the doctors would kill the patients, natives of South Rhodesia have been concealing smallpox cases.

IS THIS YOUR BIRTHDAY?

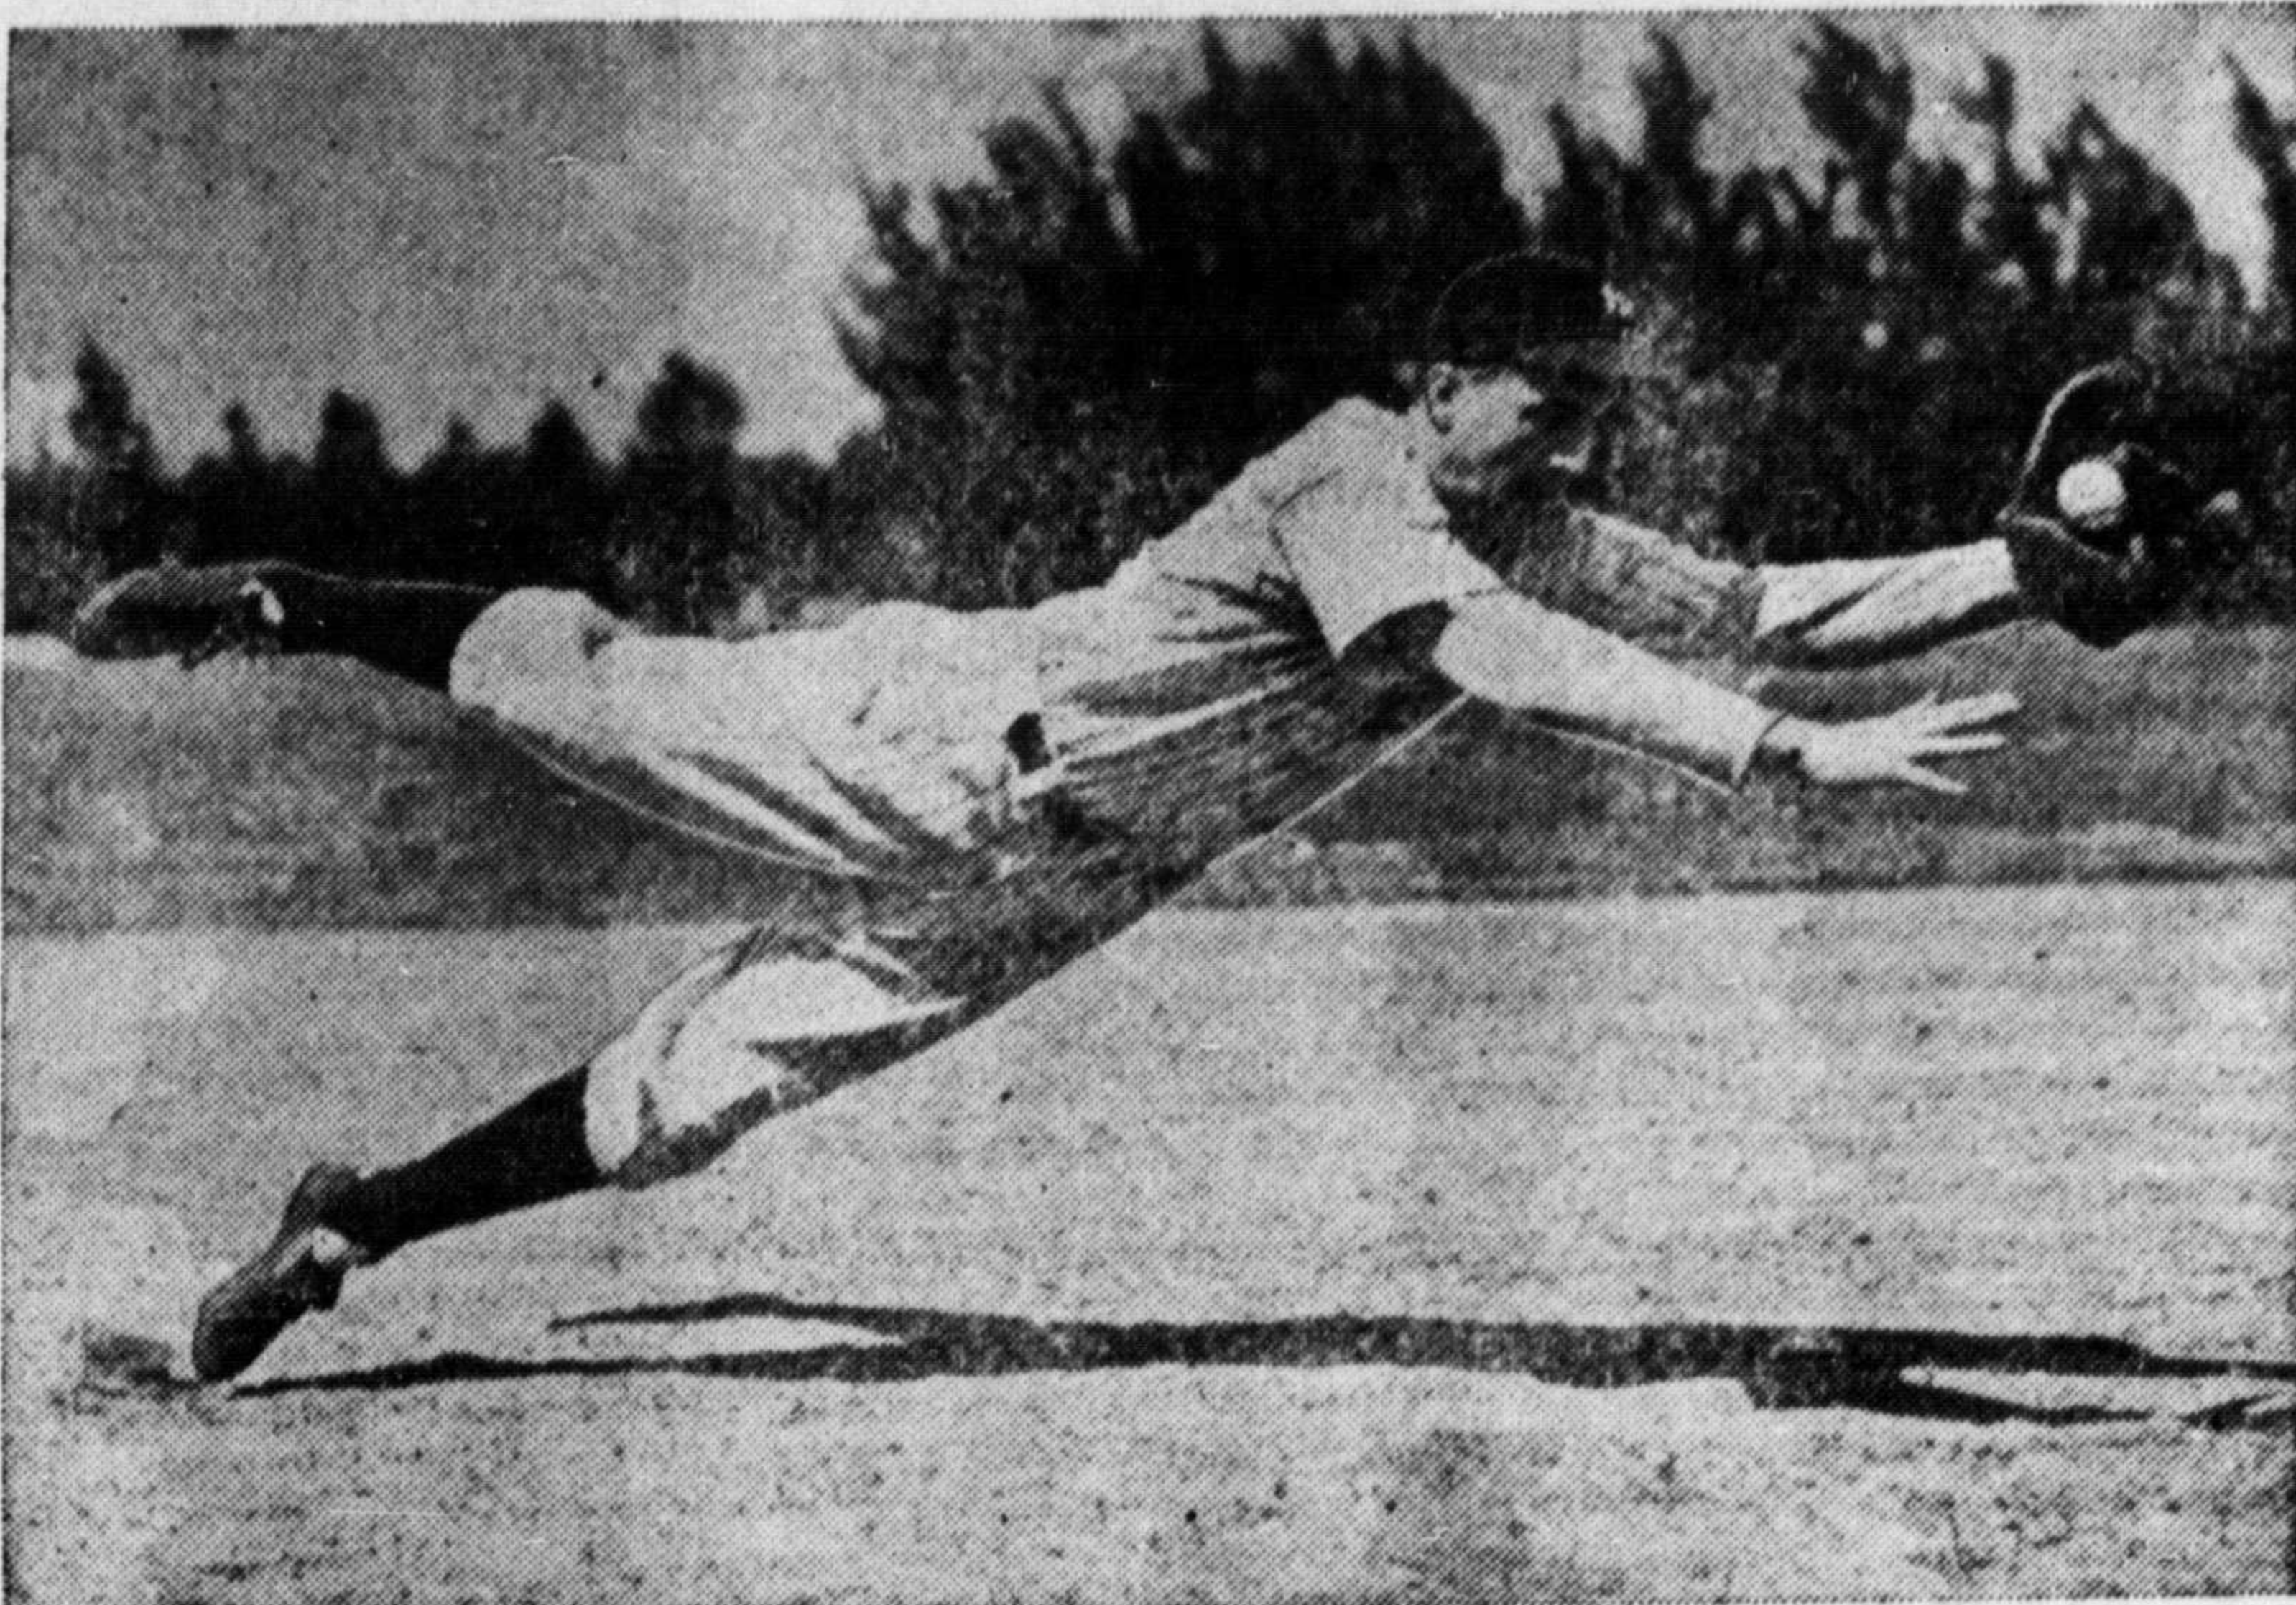

By A. R. WEIR

What the Stars Foretell for Those Born on March 26, 27, 28, 29, 30 and 31.

Those born on the above dates come under the Zodiac sign ARIES. This sign expresses itself through the head—giving you great mental energy and an enthusiastic but rather headstrong temperament. You have a strong constitution but overwork is your problem. You must avoid worry also. A journey is indicated and some benefit is indicated through elderly people. Your lucky color is red.

For complete birthday horoscope for any birthdate in the year, send 10c to A. R. Weir, 73 Adelaide St. W., Toronto. Please print your name and address plainly.

He Is Jolting To A Short Stop

Frank Crosetti, Yankee shortstop, will jolt to a short stop when he hits the dirt after having caught this one, during a workout at St. Petersburg, Fla., where the New Yorkers are training.

Telephone Voice Being Improved

That Elusive Something Called "Resonance" Is Taught By College Speech Department.

Akron University co-eds who are going about the campus these days murmuring such stately verses as:

"In Xanadu did Kubla Khan A stately pleasure dome decree" are not just rehearsing a lesson, or yearning for romance.

They are after an elusive something called "resonance" because recent tests have shown that they need this resonance in their voices since they are going to be secretaries and do a lot of telephone conversing.

The tests conducted by the speech department and the class in secretarial theory have proved that would-be secretaries need less make-up and more resonance.

Talk Over Loud Speaker

They have shown that when a girl gets on the phone she frequently talks too fast and with a nasal twang that is not altogether pleasing, that she cannot say "s," "the" and "z" correctly and that her voice is frequently too mechanical.

A unique equipment was rigged up for the tests by which the student talks into the telephone and a microphone at the same time.

Her voice then comes out over a loud speaker with all its defects amplified so that the entire class may hear it and criticize it if necessary. Very shortly the girls become convinced themselves that they need practice in resonance and plenty of it. Four class periods have been given over to the tests.

Source of Pyramid Material Is Found

Diorite Quarries Worked Under Tyrant Pharaoh Cheops Discovered Beneath Sands of Desert.

CAIRO, Egypt. — Diorite quarries worked when the tyrant Pharaoh Cheops made Egyptian multitudes build the Great Pyramid between 5,000 and 6,000 years ago have been found. The Egyptian Antiquities Department announced last week that the workings, about a quarter of a mile long, had been discovered last month under sands that had buried them since 1700 B.C.

Near Sudan Border

They were found in an unsurveyed part of the desert near the Sudan frontier by an expedition led by two

Britons, G. W. Murray and R. Englebach.

A black granite "stela," or stone slab, was found at the scene with a cartouche of Cheops—a figure bearing his name—and the name of the locality, "Hunting Ground of Cheops." A heavy copper chisel also was discovered.

Diorite is a hard, pale blue stone which early Pharaohs used for heavy statues.

Despite the quarries' distance from the Nile, the explorers found no trace of a well although they uncovered the remains of many workmen's huts.

An ancient 60-mile-long road, marked by large cairns and hundreds of centuries-old hoofmarks, led to the river.

Authorities said the quarry work must have cost thousands of lives. They deduced that the Cheops cartouche meant he had held sway over Lower Nubia.

Indians Depend On Fur Supply

There are more than 100,000 Indians in Canada, a third of whom would be on permanent relief if deprived of hunting and trapping occupations through lack of sound conservation of fur-bearing animals, Hon. T. A. Crearer, federal minister of mines, said last week at Toronto.

Speaking at the 12th annual Macdonald's Briar Tankard curling banquet, Mr. Crearer said that Canada's mineral and timber resources, fisheries and agricultural products surpassed those of any country in the world. He also predicted that Canada's gold production, within the next 10 to 12 years, would reach \$250,000,000.

Your Handwriting Tells The Truth About Your Character!

By LAWRENCE HIBBERT (Psychologist, Character-Analyst and Lecturer)

In deciding on marriage, should a girl choose security without glamour or should she marry a man who will give her real companionship, but who is somewhat lacking in steadiness? This interesting topic is suggested by one of the letters I received this week.

The girl's writing shows that she is very reserved. She is capable of much real affection, but she is not effusive when she meets people. There is nothing impulsive about her. She considers matters carefully, weighs the "pros and cons" before coming to a decision. Once she makes up her mind she won't be in a hurry to change it.

In sending me letters from her boy friends she says, "please tell me what you think of these two friends, both of whom seem very fond of me. I have my own ideas about them, but should like to check with your conclusions. I am particularly anxious to know as it is possible I may have to choose between them shortly."

Mr. A's writing shows a volatile nature, a little highly-strung and very expressive emotions. Unfortunately his enthusiasms are not lasting; they are like summer storms that sweep up in an instant, flash for a brief period, and then disappear. He will be "good company" but a none-too-sturdy tree to shelter beneath when trouble brews!

Mr. B's writing depicts a man who is solid and dependable but unimaginative. His energy is constant; not a matter of fits and starts. He pursues his tasks quietly but firmly, and whilst other men may surpass him in brilliance he will win races in the game of life because he always has "something in reserve" for the final pull.

There you have a picture of all three. If the girl marries Mr. B, she need have no fears for her future security, but she will hardly have the companionship that Mr. A would contribute. The above case is an excellent illustration of how a handwriting analysis can help. It does not relieve you of the final necessity of making a choice, but it is amazingly revealing of the innermost characteristics of people, especially the qualities which are often obscured by mere surface indications.

Readers are invited to send specimens of their own writing, as well as that of friends, sweethearts or relatives, for an unbiased analysis personally prepared by Mr. Hibbert. Enclose 10c for EACH specimen (coin or postal note preferred) to help defray handling charges. Enclose with stamped addressed envelope to: Lawrence Hibbert, Room 421, 73 W. Adelaide St., Toronto, Ont. Replies will be forwarded as quickly as possible.

Movie Star Dust Radio

By VIRGINIA DALE

The millions who have read and loved "The Adventures of Tom Sawyer" will rejoice that it has been brought to the screen almost intact. A few memorable scenes of the classic of boyhood had to be skipped, but the important ones are all there, the white-washing of the fence, Muff Potter under suspicion of murder, Tom's startling appearance at his own funeral.

Filed in Technicolor, the tones are subdued and pleasant, making the town and all its inhabitants of some sixty years ago look entirely natural.

There was a great to-do a year or so ago over David Selznick's country-wide search for just the right boy to play Tom. Finally, Tommy Kelly, son of a WPA worker, was found in New York. Everyone who sees the picture will surely be glad that Selznick passed up the precocious actors of Hollywood and waited until he found Tommy. For Tommy Kelly fits perfectly the character of Tom Sawyer.

All Hollywood is talking about the great change in Katharine Hepburn. The roustabout comedy that she indulges in for her new picture, "Bringing Up Baby," has affected her manner in private life. No longer is she aloof and haughty. No longer does she scurry away as if frightened, or very bored, when co-workers approach.

Lawrence Tibbett.

Lawrence Tibbett will come back to the screen if Warner Brothers have anything to say about it. They want him for "The Desert Song" and he will have time to make a picture soon for Grace Moore is going to replace him on his radio hour.

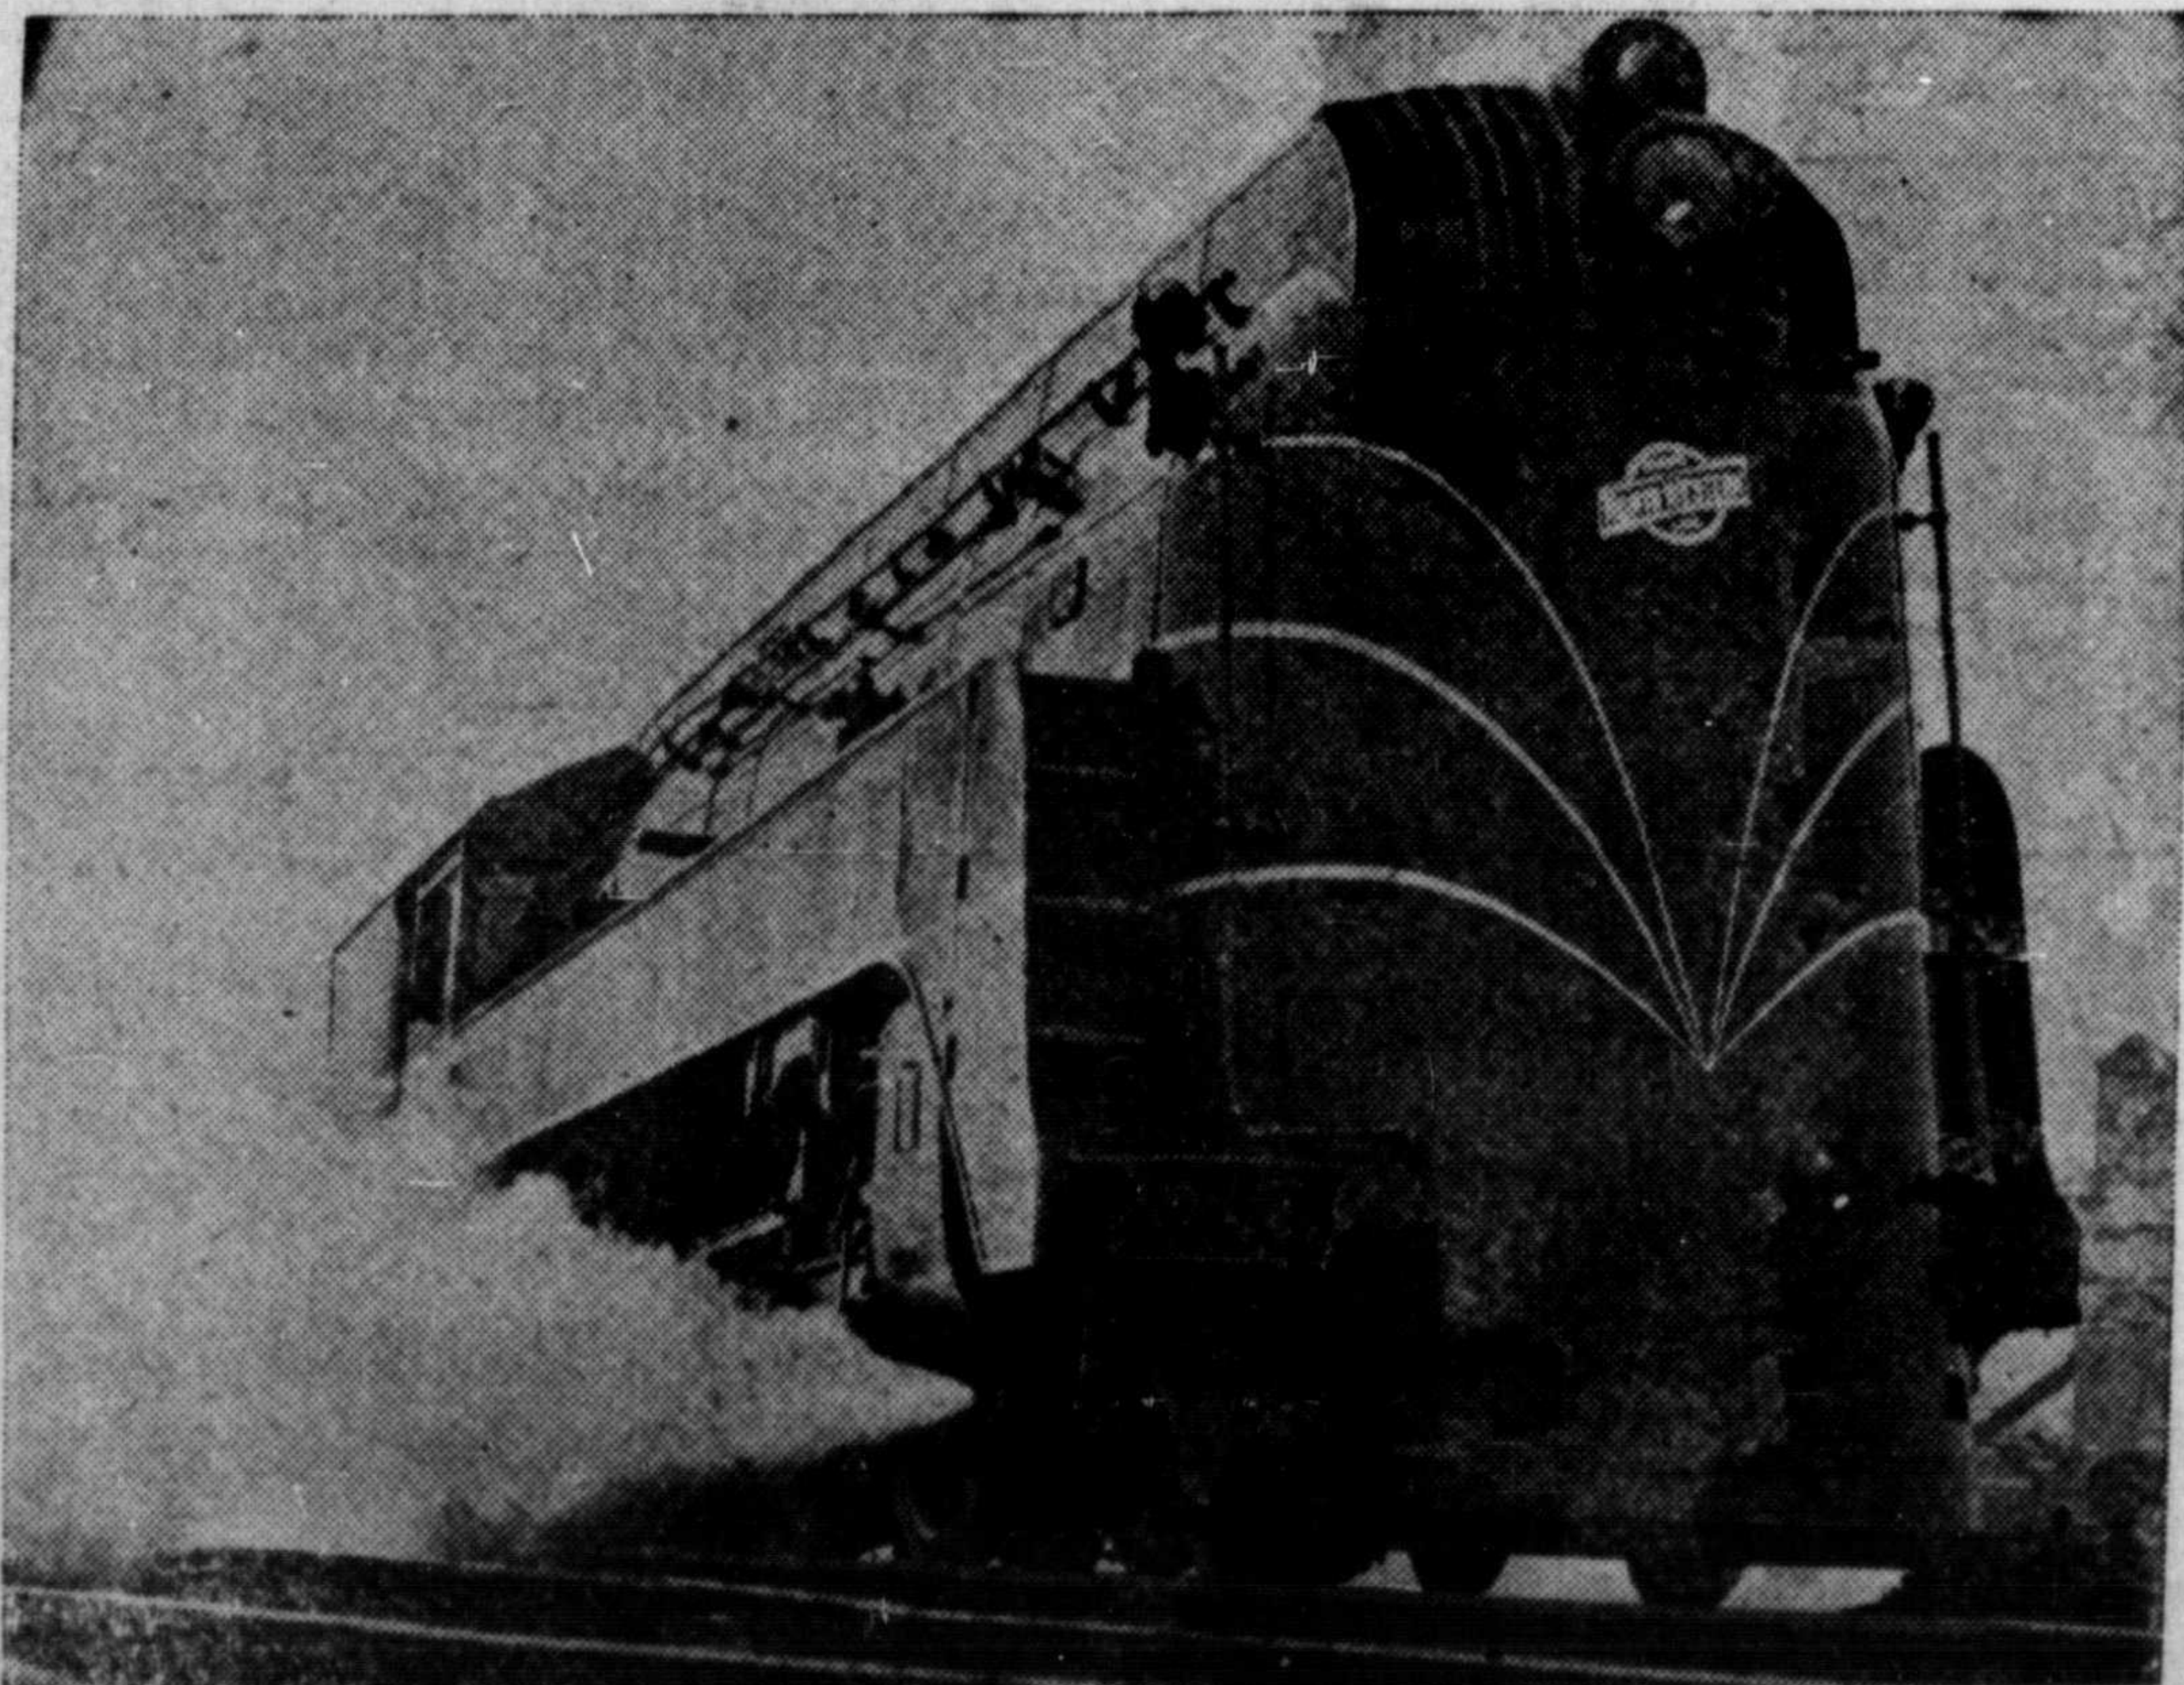

Joan Crawford was quite startled recently when she heard an early-morning news broadcast announcing that she had left her husband, Franchot Tone, and would soon institute divorce proceedings. She glanced across the breakfast table, and there was Franchot as usual. "Never mind, honey," he counselled, "they have been trying to separate us for three years, and I don't believe they can do it ever."

Hollywood casting directors deserve a vote of thanks. They have put back to work three popular actresses who have been playing hookey from the screen too long. Zasu Pitts was dragged out of her kitchen, where she has been busily writing opposite to Victor Moore in "Strictly Accidental" for R.K.O. Joan Bennett just returned from a stage tour and very happy to be settling down in her new house in Beverly Hills, was persuaded to go to Texas to film "The Texan" with Randolph Scott and several hundred long-horned cattle in support. And Claire Trevor, so well liked in her radio serial with Edward G. Robinson, was cast opposite him in a Warner Brothers picture.

Zasu Pitts

ODDS AND ENDS — "Bad Man of Brimstone" revived Wallace Berry's career which has been under a cloud of so-so pictures lately. He will follow that up with sequel "Bad Man From Arizona" Peter Van Steeden received congratulatory telegrams from several New York university professors on the fourteenth anniversary of his radio debut. It seems that in 1934 they excused him from his classes one day so he could audition for a radio program. He has been on the air ever since Martha Tilton who sings with Benny Goodman's Tuesday night swing school did the song numbers that Joyce Compton appeared to be singing in the film "The Awful Truth" When you see the "Goldwyn Follies" you may think that Andrea Leeds is singing, but your old friend Virginia Verrill of the radio really recorded those song numbers.

An Iron Horse That Can Do Two Miles A Minute

Along with the new streamlined diesel trains, this huge steam engine, weighing 772,000 pounds and having a 100-mile per hour speed capacity has been put into service.

Winter Roads to Shawville Should Be Kept Open

By W.A.H.

Shawville as far as motor traffic was concerned has been shut off from the rest of the world all last winter. Our neighbouring towns, Quyon, Portage du Fort, Bryson, Campbell's Bay and Fort Coulonge, have all had winter motor service, and surely this state of things can be remedied. Two months ago Mr. G. A. Howard personally opened the road to the Bryson-Portage highway, thus showing that even this late in the winter it could be done.

The front road from Brown's Mill east to Bristol and Elmside has been more or less open all winter and we are told with very little expense and trouble would have been passable all the time. And think the front road is only four miles away. Here is a practical suggestion—could not the road from Shawville south be widened and ditched so that it could easily be a good winter road, and be kept open at very little cost? This might be an inducement for the C. N. R. people to move the now unused station at Clarendon to Palmer's Crossing where it would be of some use both to the people and to the railway. Of course we admit the logical winter thoroughfare is the No. 8 Highway and sooner or later the Government will have to remake it and to have winter traffic it will require, like the Ontario roads, to be 60 to 80 feet wide with ditches wide and deep enough to hold the surplus snows of our Poniac winters. This may not happen for years, but in the meantime our local authorities should seriously consider the making and keeping up of a way to the front road.

James McLarnin

A resident of Clarendon Township for over 60 years, James McLarnin died on Wednesday evening, March 23rd, at the home of Mr. George Judd, Centre street, Shawville, in his 83rd year, after a long illness. He was born at Portage du Fort, in 1856, son of the late Mr. and Mrs. Robert McLarnin. He married Miss Bella Thompson, of Wakefield, who died last fall.

Left to mourn his loss are three daughters, Mrs. Fred Campbell, of Clarendon Township; Mrs. A. A. Tins, of Lakewood, N.J., and Mrs. Harry Hayes, of Brooklyn, N.Y.; one son, James McLarnin, of Kyle, Sask.; also three brothers, Edward, of Clarendon Township, and Thomas and Robert, of Duluth, Minn., and six grandchildren.

The funeral was held on Saturday afternoon to St. Paul's Anglican church, Shawville, where service was conducted by Rev. T. E. R. Nurse. Interment was made in the village cemetery.

George Elliott

The funeral of George Elliott, who died on Wed., March 23rd, took place on Friday from his home in Bristol to St. Edward the Confessor Roman Catholic Church with interment in the parish cemetery. Rev. Father J. Sullivan chanted requiem high mass.

The late Mr. Elliott, a son of the late Thomas Elliot and Bridget Hannaway, of Bristol, had been in ailing health for some time. Born in 1887, he lived all his life in Bristol. He was married 18 years ago to Lena Chevrier, of Quyon.

He is survived by his wife. A brother was killed overseas during the war.

The pallbearers were Jas. Campbell, Henry Gilpin, Jas. Graham, Peter Moyle, Arthur and Philip Chevrier.

Mrs. John Finan

The funeral took place last Tuesday from the home of her daughter, Mrs. Jos. Little, of Clarendon, of Mrs. John Finan, who died last Sunday. Rev. C. Armstrong-Sales, of Bristol United Church, conducted the service at the house, and Rev. D. Andrews, of Charteris Anglican Church, officiated at the interment made in Charteris cemetery.

Born in Portage du Fort almost 84 years ago, the late Mrs. Little was the former Susan Gorby. She lived in Thorne for about 30 years after she was married and when her husband died in 1912 she took up residence with her daughter at Clarendon Front.

Left to mourn are four daughters: Mrs. B. Workman, of Pembroke, Mrs. Thos. Tubman, of Greenmount, Mrs. J. Little, of Clarendon, Mrs. J. Lomme, of Virginia, U. S. A.; four sons, Edward, of Port Arthur, Ont., Ernest, of Toronto, George, of South Porcupine, and Jack, of Castleford, Ont. One daughter, Mrs. J. Workman, died seven years ago.

John Craig

Final tribute to the memory of John Craig, who died on March 23, at the home of his brother, Wallace, of Bristol Mines, was paid at his funeral last Friday. After a short service in the house conducted by Rev. Mr. Sharkey, of Bristol Presbyterian Church, interment was made in Norway Bay cemetery.

Born 67 years ago, a son of the late Mr. and Mrs. David Craig, he was a life-long resident of Bristol. He is survived by two brothers, William, of Winnipeg, Wallace, of Bristol; three sisters, Mrs. J. Kilroy, of Wyman, Mrs. Isaac Kelly, of Ottawa, and Mrs. A. Palmer, of Haileybury.

The pallbearers were John Ade, Hugh Ross, Archibald Sly, Milton Henderson, John and T. McNeill.

Polar Eskimos Friendly

Polar Eskimos are a friendly, happy people who live farther north than any other human beings. They rove the Arctic from Greenland to Alaska. Skin tents are their habitation during the brief summer; snow igloos their winter homes. Their food, save for a few birds' eggs and berries, is exclusively flesh—the seal, bear, fox, whale, walrus and reindeer being the provender. They are prodigious eaters, hence their plumpness and perhaps their good nature.

Silver Whitest of Precious Metals

Silver is the whitest of precious metals. It is susceptible of a lustrous polish and has excellent working qualities. In its pure state it is too soft for uses wherein it is subject to wear; so it is usually alloyed with copper. The terms "sterling silver" and "coin silver" indicate alloy proportions. Sterling silver is alloyed in proportions of 925 parts pure silver to 75 parts copper. Coin silver contains 900 parts pure silver to 100 parts copper—this is the standard for United States coinage.

In Memoriam

ORR—In loving memory of a dear husband and father, Wm. Orr, who passed away March 29th, 1935.

The face we loved is now laid low,
His loving voice is still.
The hand, so often clasped in ours,
Lies now in death's cold chill.
We often sit and think of him,
When we are all alone,
For memory is the only thing,
That grief can call its own
WIFE and FAMILY.

MULLIN—In loving memory of a dear wife and mother, Mrs. Jim Mullin, (nee Pearl Dean), who passed away March 28, 1937.

God knew that you were suffering,
He knew you were in pain,
He knew you never would get better,
In this world again.

He saw the road was getting rough,
The hills were hard to climb,
So He closed your weary eye-lids
And whispered peace be thine.

Ever remembered by
HUSBAND and FAMILY

FORD OFFERS TWO NEW CARS in the low-price field

THERE are two new Ford cars for 1938—the De Luxe and the Standard—differing in appearance, appointments and price—but built to the same high standard of mechanical excellence.

Both are big, impressive cars, and thoroughly modern in appearance. Both have the famous Centre-Poise Ride, Ford Easy-Action Safety Brakes, and the other distinctive Ford features.

Both bring you the basic advantages of the 85-horsepower Ford V-8 engine.

V-type 8-cylinder engines were used only in expensive cars before Ford made them available in The Universal Car. Eight cylinders give great smoothness and flexibility. Compact V-type construction leaves more room for passengers and luggage.

Both new cars are economical to operate. Economy has always been a Ford tradition. The facts of Ford V-8 economy are confirmed by the findings of owners, who report 22 to 27 miles per gallon of gasoline. Value is also a Ford tradition.

Both cars, in proportion to price, represent true Ford value. The De Luxe costs slightly more than the Standard but provides extra style. De Luxe closed Sedan body types have considerably more passenger room and luggage space.

More people bought the 1937 Ford V-8 than any other 1937 make. It was a good car. But these are better cars, because Ford improvement goes on constantly. You'll realize that when you see and drive either new Ford V-8 for 1938.

\$30 A MONTH, with reasonable down-payment,
buys any new Ford V-8 car under T. F. C. National Finance Plan.
