

7 Superior, Assistant Superior,  
fine, and the Rev. Mr. Langer.

The Superior, Assistant Supervisor, Fine, and the Rev. Mr. Laurzon building was inspected, and it needless to say that it was found to be in good order. All the numbers 72 were posted up at the sewing machine, others around, the remainder knitting, etc. It is unnecessary for us to describe the building, as we have done so, a short time since. They were made by which means

**PUBLIC ACCOMMODATION**

provided for the Protestant female under the supervision of Mrs. J. R. Peirson, the architect of the proposed hotel, by the completion of the East wing.

tirely independent from the  
a separate entrance, and have  
following accommodation: A  
for the chapel, a large work-  
rooms for dormitories, 10 cells,  
a kitchen, one parlor, a room  
bain and two for the matrons.  
number of Protestant prisoners  
more than 15, this prison  
ple, and could conveniently  
double that number. The

men and unfortunate women, when they were under as prisoners, but in every instance when their punishment was completed, the means of finding or procuring employment or of procuring a return to their old home might be said of Catholics, or that the Catholics were Protestants. She knew many Protestants better than Catholics, but she was of opinion that Catholics could not take such good women as the sisters could, she said, devoted their lives to education, and especially to

marked Sister Celestine, as of neither the one or the other is fitted for the supervision of the sisters. Another argument was that the prisoners do not respect and regard for the authorities for any one else. I do not think they have been in this matter, having originated when they made the petition to the late Government that they have

**THE FEMALE PRISONERS.**

Information we received from the prison at Lezon, it appears that the authorities are not able to make the two ends meet, and the allowance they get from

They state that from estimates they have made they do not receive more than \$7,000 in Government, while the fuel and cooking amounts to \$2,000; guards and firemen, \$1,800. Rates and clothing bring this except to over \$5,000, and leaves for maintenance expenses.

THE DELAY

The Statestans removed to Fulw were informed, was caused by the following circumstances: It was the policy of the Government to have the female prisoners under the same discipline, according to the treatment the Government has with these ladies, but upon the

presentations being made by Protestants to the Government of Montreal would include unless a Protestant minister, the Government determine them in the old jail under Mrs. Hull. The Government of this was not considered an arrangement to the Protestants determined upon the policy they inaugurated. We that the Solicitor-General, Baker, has been most diligent in Protestant interests in this that instead of laying out money, he deserves the thanks of Protestant community for this arrangement which has been

SCIENCE.

hundred and sixty-six employees  
on the railway, sixteen were  
found to be color-blind, by an  
examination of the authorities institut-  
ed for the purpose. You are not similar  
to us in our own country tend to  
the degradation of human life?  
A election shows the liability to  
accidents might arise from the in-  
competence of an engineer or switchman  
of color; and it is certain  
that accidents have been thus

use on machines, lately published by Professor F. Reuleaux, of the author's desire to trace the development of machinery from the beginning. He thinks that the pointed drills whirled about to make the first form of machines used the notion of rotary motion as exemplified in various sorts and was followed by the adoption-wheel to keep up the motion. Reuleaux's theory, though the mechanism is more complex than times, the number of pieces on a machine is considerably smaller. As to the social machinery, he pronounces the stem of the present day to be

interesting fact, to which Sir C. Monson has lately called attention, is that the commander of the first returned British Arctic expedition, the last of the few navigators who crossed the Antarctic Circle, died the *Challenge* early in 1874, and that the *Challenge*, the vessel, with the English government expedition on board, visited about the south pole. The ice-bergs high southern latitudes appear to be all tabular originally, and generally being perfectly level with the ocean's surface; and at Glasgow lecture, Sir C.

onson said there could be no  
 doubt that the great table-  
 tops which they saw were  
 blocks from the edge of the great  
 sheet, or wall of ice, which has  
 by English and American na-  
 vigoes or two points. No trace  
 of any other substance necessarily  
 in the land was noticed upon  
 the icebergs soon in the Southern
