## DEFINITION OF THE PROGRAM

|                                          |   |                                                                 |
|------------------------------------------|---|-----------------------------------------------------------------|
| <b>Program title</b>                     | : | Social Science – International Baccalaureate                    |
| <b>Type of program</b>                   | : | Pre-university program                                          |
| <b>Program code and version</b>          | : | 300.Z0 (2013)                                                   |
| <b>Type of certification</b>             | : | Diploma of College Studies                                      |
| <b>Specific conditions for admission</b> | : | Secondary IV Mathematics: Cultural, Social and Technical option |
| <b>Number of credits</b>                 | : | Between $56\frac{2}{3}$ and 58                                  |
| — General education component            | : | $26\frac{2}{3}$                                                 |
| — Program-specific component             | : | Between 30 and $31\frac{1}{3}$                                  |
| <b>Number of periods of instruction</b>  | : | Between 1 365 and 1 410                                         |
| — General education component            | : | 660                                                             |
| — Program-specific component             | : | Between 705 and 750                                             |

## The Program

The Minister of Higher Education, Research, Science and Technology recognizes the *Social Science – International Baccalaureate* program leading to a Diploma of College Studies, though not established by him, as being equivalent to the *Social Science 300.A0* program.

Detailed information about the program can be obtained from the institutions authorized to offer the program.

The program is made up of a general education component and a program-specific component.

## Program Objectives and Standards

### General Education Component

**26⅔ credits, 660 periods of instruction**

#### Common Objectives

- 002U\* Discuss critically the role and nature of knowledge in the context of the core requirements of the international baccalaureate program
- 002V Develop an appreciation of literary texts from different periods and of various genres in the language of instruction in the context of the group 1 requirements of the international baccalaureate program

#### Optional Objectives

- 00H8 Discuss critically an issue related to the nature of individuals and societies in one or more of the group 3 subjects of the international baccalaureate program
- 00H9 Communicate in a living language in a range of contexts and for different purposes in one of the group 1 or group 2 languages of the international baccalaureate program
- 4EP0 Analyze physical activity from the standpoint of lifestyle behaviours that promote health
- 4EP1 Improve effectiveness when practising a physical activity
- 4EP2 Demonstrate the ability to manage health-enhancing physical activity

## Program-Specific Component

Between 30 and 31½ credits, between 705 and 750 periods of instruction

### Common Objectives

#### 1. Mathematics (201)

|      |                                                                                                                                                                                                              |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0043 | Apply concepts and principles of differential and integral calculus in the context of the group 5 mathematics standard-level requirements of the international baccalaureate program, a minimum of 4 credits |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

OR

|      |                                                                                                                                                                                                                                     |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0044 | Apply concepts and principles of mathematics other than differential and integral calculus in the context of the group 5 mathematics standard-level requirements of the international baccalaureate program, a minimum of 4 credits |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

OR

|      |                                                                                                                                                                          |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 069J | Apply concepts and principles of statistical techniques in the context of the group 5 mathematics standard-level requirements of the international baccalaureate program |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

OR

|      |                                                                                                                              |
|------|------------------------------------------------------------------------------------------------------------------------------|
| 022P | Apply statistical tools to the interpretation of data related to contexts of study in the field of Social Science, 2 credits |
|------|------------------------------------------------------------------------------------------------------------------------------|

#### 2. Social science

|      |                                                                                                                                                                                                              |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 069K | Apply theories, concepts and arguments associated with the nature of individuals and societies as well as their activities in one or more of the group 3 subjects of the international baccalaureate program |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Optional Objectives

0038\* Apply concepts and principles specific to global issues, according to the profile of a student in the international baccalaureate program

0039\* Apply methods specific to carrying out a research project in the context of the core requirements of the international baccalaureate program

069L Develop an appreciation of the diversity of arts across time, place and cultures through one or more of the group 6 subjects of the international baccalaureate program

069M Communicate in a living language in the context of the social sciences, through the group 1 or group 2 language subjects of the international baccalaureate program

069N Apply concepts, theories, models and techniques associated with the experimental sciences in one or more of the group 4 subjects of the international baccalaureate program

- 022K Explain the foundations of human behaviour and mental processes, 2 credits, Psychology (350)
- 022L Recognize, from a historical perspective, the fundamental characteristics of Western civilization, 2 credits, History (330)
- 022M Explain the economic foundations of society, 2 credits, Economics (383)
- 022V Explain the cellular and systemic regulation and the reproductive system of the human organism, 2 credits, Biology (101)
- 022W Apply advanced statistical tools, based on probability theory, to decision making in contexts of study in the field of Social Science, 2 credits

\* Objectives that can be achieved with courses comprising less than 45 periods of instruction.

*Enseignement supérieur,  
Recherche, Science  
et Technologie*
