NOTES OF THE WEEK

In keeping up the fight for the existence of non-sectarian schools in this province four amendments to the education act are desirable. The law regarding consolidated schools is not as definite as it should be and so it is asked that it be amended to leave no doubt as to the power of commissioners or trustees to join two or more weak schools and to pay conveyances for scholars who live at a distance. Then the law as to the power to dissent is loose. There are farmers who have no children attending school and non-resident owners of real-estate who dissent and pay their tax to the Catholic board because their rate is lower. That there are Protestants who do this in order to save money may seem incredible, but it is a fact. The amendment sought is, that the practice be stopped. Third, it is desirable that Protestant trustees be given the power to levy a special tax without having to get permission from the Catholic commissioners. Fourth, that authority be given the Protestant committee to distribute its share of government grants without exact regard to the population of municipalities; the object being to give larger assistance to weak school districts. These four changes are proposed to be made in a statute enacted by the Quebec legislature. Why do the officials who control our schools not go to the legislature and ask that it make these four simple amendments? The answer to that question lays bear the humiliating position both of non-Catholics and of the legislature regarding education. Many years ago the archbishop of Quebec exacted a pledge from the government that amendments to the laws affecting education be first submitted to the bishops, and unless they received their approval were to be dropped. Thus it comes that Dr Shaw and his confreres instead of going to Premier Gouin and saying, "Here are four slight changes in the law which we desire and which we find necessary to keep the schools of the minority in existence," they go to the hierarchy, and, hat in hand, humbly ask their permission to submit these amendments to the legislature. The bishops graciously say they will take them into consideration and give their answer two months hence. Which is the supreme ruling power in Quebec—the hierarchy or the legislature? It cannot be the legislature, for if it was, why should Protestants have to get leave from the bishops before they can even ask the legislature to amend a public statute? Is there in that subcommittee of public instruction not a single member to take the stand that, as British subjects, we have nothing to do with the hierarchy, that we acknowledge no other rule than that provided by the constitution, and therefore, as a matter of right, we go to the legislature direct and ask for these amendments?

Sir Wilfrid Laurier has completed his Ontario tour and will now speak at a few points in this province, beginning with his own constituency in the city of Quebec. Mr Borden is holding meetings daily in western Ontario, which are described as large and enthusiastic. They are taking the contest seriously in the west, the air being filled with hot words. Were the charges made against each other accepted as true, both parties should have many prominent members in the penitentiary. It is a disgraceful campaign of personalities and of sweeping accusations. Mr Doherty became a lawyer Lawyer Doherty was made a judge by the political party he supported. Judge Doherty as soon as qualified for it asked for and obtained his pension. Pensioner Doherty has accepted the Conservative nomination for St. Antoine division of Montreal, and if elected, Member Doherty will draw \$2500 in addition to his pension and profess to be a free and independent representative. Is not all this degrading to the bench and to our system of government? Grain is being moved from the west to the seaboard unprecedentedly early and in large quantities. 4000 cars, laden with a million bushels of wheat, had passed Winnipeg up to Saturday night. So far the railways have had no difficulty in moving all the grain offered. The quality is good, better than expected, most of the wheat going No. 1 Northern. The price at Winnipeg ranges from 95c for No. 3 to 99c for No. 1. The western farmer is being compensated for last year's trials.

Charles Gordon of Fertile Creek has sold his property to John Holmes, and purchased from Andrew Hunter his residence in the village of Howick. Mr Hunter has purchased a lot on the bank of the English river from William Gebble, and has commenced to build another dwelling-house for himself, which he expects to have ready for occupation in three months. A donation social was given by the W.C.T.U. in the temperance hall Tuesday evening, presided over by Rev. J. M. Kellock, M.A., a fair audience was present. After listening to an instructive program, refreshments were served. A good quantity of vegetables, fruit and clothing was received for the benefit of the Old Brewery mission and the Salvation Army. The stone crusher will be working this week, when macadamizing of the mill road will commence starting from the G.T. railroad. Heavy rain fell here on Monday night, lowering the temperature from summer heat almost to freezing point, partially quenching the fires and clearing the air of smoke.

The market fee has been raised from 7 to 10 cents, and beside that those coming to market are forbidden to sell their produce from house to house, as they have done heretofore. When not sold out in the market square they must now either sell what they have left to the grocers, butchers, etc., at their price, or carry it home. Both line and market boats have been faring badly from the recent smoke and fog. Almost every night some are heard whistling at intervals to save a collision and a number have run on shoals and rocks near here. The Chateaugay and Beauharnois have been very irregular in their trips.

Two young men of the town helped themselves to two bags of grain lying on the wharf, sold them for whiskey, and invited a friend to help drink said whiskey. On finding trouble brewed from the act they left for parts unknown, but the fellow who helped them drink it was taken to Valleyfield and got a month in jail for drinking the fruits of theft. Mr Ellis, Jr., of Melocheville was found drowned last week. Confirmation service was held in the Episcopal church the 10th of this month.

We have had little rain during the last two months, and the weather still continues dry, foggy and smoky. Pastures are completely destroyed and vegetables are small. All we hear at present in our little city is the election cry. Citizens are grouped at every corner discussing politics. The electoral campaign is now in full swing. Committee rooms have been opened by both parties and much canvassing is being done. Mr Bergeron on Sunday was at St Timothy, where he addressed the electors. The case of J. B. Aumais vs Arthur Plante, protesting the latter's election, came before the court on Monday. Mr Plante's objections were dismissed, so the case will now come before the court on its merits. Mr Howard, president of the new foundry, has commenced laying the foundations for the new works. Quite a number of hands are employed. The building is to be of cement construction. Mr Howard expects to have it closed in before the cold weather. A memorial service was held in St. Mark's church Sunday evening for the late Bishop Carmichael. J. H. Dunn, an engineer, has taken out an action for \$10,000 against the N.Y.C., for loss of an eye, caused by a defect of the locomotive given to his charge. A child of a habitant, aged 18 months, in the absence of the mother, sucked enough poison from a fly pad to cause death.

From the beginning of the month fire has lurked in the bush between Clinton Mills, N.Y., and the Gulf rock, gradually extending to the Shannon sideroad, south of Curran's store. People had been fighting the fire on both sides of the line to keep it from spreading, but when the gale from the south sprang up Monday afternoon, their efforts were of little avail, and it looked as if the buildings of Samuel Lamb, Chas. Barr, L. Verroneau, John Jackson and the Waddells would be reached by it, for it was in places within one or two acres. In spite of every effort the fire got across the road at Reuben Lamb's. Neighbors on hearing of the danger flocked in from a distance, and there was a large force at work striving with might and main to check the encroaching flames. There was no relaxation in their efforts until the wind edged to the west followed by the long wished for rain which ended the danger. Had it not been for that change of wind and rain nothing could have stopped the fire, and it would have swept down the hill, to the ruin of scores possibly taking the centre in its course, for everything being like tinder the fire ran over pasture and meadow. The fire went through the Pettis woods to the north and it is reported two cows were overtaken in pasture and burned. The loss in timber is great, many farmers having no green bush left. It is reported the afternoon and evening of Monday was equally exciting in St. Clothilde, where fire had been put in the mucky land and spreading threatened to sweep the better part of the parish. Fifty Johns were drawing water.

FRANKLIN CENTRE From the beginning of the month fire has lurked in the bush between Clinton Mills, N.Y., and the Gulf rock, gradually extending to the Shannon sideroad, south of Curran's store. BEAUHARNOIS The market fee has been raised from 7 to 10 cents, and beside that those coming to market are forbidden to sell their produce from house to house, as they have done heretofore. When not sold out in the market square they must now either sell what they have left to the grocers, butchers, etc., at their price, or carry it home. The Chateaugay and Beauharnois have been very irregular in their trips.

THE BEAUHARNOIS AGRICULTURAL SOCIETY Held its annual exhibition at St. Louis de Gonzague on the 15th September. Weather and roads favored, so that the attendance was large. The number of entries in all classes of live-stock except horses was smaller than usual, indeed, the show of pigs and sheep was so small that there was no adequate competition. In cattle Ayrshires led. Grade 2-year old heifers was a remarkably fine class. Horses formed the feature of the day and they were excellent. In the aged Clydesdale stallions the judges gave first place to a notably well-built 3-year old. Without disputing his excellence, the owners of the competing stallions considered it was not fair to place a young animal first in an aged class. The heavy teams were also of great merit, while the carriage and single drivers were the best ever seen on this ground. Of poultry there was a large exhibit, and a fine one. The building was well-filled with an interesting competition of everything called for in the prize-list. At the close of the show the directors and their guests dined together, the president, Mr Laurendeau, K.C., in the chair.

ATHELSTAN The Rev. A. L. Burch, financial agent of the Presbyterian college, Montreal, preached here on Sunday, and is canvassing the congregations for funds on behalf of that institution. David McCracken has finished the concrete foundation for the addition to Munro hall. G. Rowe, our enterprising blacksmith, is building a shop on the site where McKay Bros. used to have a shop. Mr Rowe has bought Harry Hampson's residence, which was formerly Robert Lamont's. There is a likelihood of having a general store at the station. Thomas MacFarlane is at work and intends having the building up this fall. KELS0 The contract made by the council with O'Connor & Dinneen for macadamizing close on 4 miles of road has been practically completed, and to the satisfaction of all concerned. For the past fortnight the crusher has been at work on the Trout river road at Kensington. HAVELOCK At the recent show, Mrs Thos. E. Graves took 1st prize on rhubarb jelly; Alex. Waddell 1st on old turkeys, and Simon Rennie 1st special on squash. ST. ANTOINE ABBE When losses come to be counted up, the fire here on the 23rd was one of the most disastrous our county has known. Mr Stephen, who went to act as judge at the exhibitions held at St. John and Sussex, N.B., reports splendid displays of stock and produce at both. The drouth set in on the 17th August and ended on 28th September. The only rain of any account that fell in this locality during those six weeks was the showers that accompanied the thunderstorm of Sunday, Sept. 6.

The drouth was intensified by an unusual degree of heat and high scorching winds during the first fortnight. While the showers of Monday night did a world of good, they did not affect the supply of water and many farmers are drawing from a distance.

Teafield has received the worst scorching in its history, the fire having overrun all of it that is not swampy and still smouldering, has gone in smoke is going to in. The depth of peaty matter that crease the extent of arable land.

The paragraph in last week's paper regarding the Condensed milk factory was misleading in so far as it did not correctly represent what was done at the meeting. The majority of patrons asked for \$1.50 from 1st October to 30th April, which Mr Woodley explained he had not power to concede. On Tuesday, having received advice from headquarters, he announced the following terms, which are better than the original offer and are designed to secure a supply of milk during the two most difficult months for the dairyman—

per 100lb October \$1.40 November and December 1.50 January and February 1.50 March and April 1.70

Dr McLaren, collector of revenue, has had a round-up of breakers of the law. The following persons have been convicted of selling liquor without license: J. Bte. Cote, Valleyfield, \$50 fine and \$15.00 costs; Toussaint Le-fevre, Huntingdon, \$50 fine and \$21 costs; F. Burgess, Trout river lines, \$50 fine and \$51.90 costs; Joshua Patterson, Cook's lines, \$50 fine and \$49.80. Went to jail instead of paying fine. E. O'Neil, Franklin Centre, \$50 fine and \$25.70.

There were four persons who sold liquor on the Huntingdon fair ground. Two have yet to be dealt with. The man who had the gambling-wheel exposed.

A. W. Fraser, of Ottawa, has admitted in court that he got a cheque for \$1,000 and sold it for \$100.

To the Electors of the County of Huntingdon: Gentlemen.—Having been honored with the nomination of the Liberal party as their candidate or representative of Huntingdon county in the Dominion parliament, I am before the Electors of the County to solicit their approval and support in the general elections which take place October 26th inst.

It would give me great pleasure, to meet personally each elector, but, as you know, Huntingdon is a large county and a visit to each and every home would require more time than we have at our disposal before the election.

However, though forced to deny myself that pleasure, I will endeavor to hold a meeting in each locality, where I hope to meet the electors and discuss with them the political issues of the day.

Believing that the representative of a County such as Huntingdon, composed as it is of a people who want honest and progressive administration, should go to parliament free to advocate and uphold such legislation as is most beneficial to his constituency and to the nation, I do not appeal for support as a party man but, if elected, wish to be free to criticize and censure my own party, if in my judgment their administration fails to promote and maintain honest government.

I do not hesitate to state frankly, that I am an admirer of Sir Wilfrid Laurier, whose lofty ideas of Statesmanship have won for him the admiration of eminent men of both parties in Canada, and also in the Mother country. With such a leader, respected, trusted and beloved by the whole people of Canada, supported by a government ready and willing to protect the rights of the people against the demands of combines and monopolies, the trade of Canada will continue to grow and to prosper.

The people of a county are judged by their representative, and Huntingdon held a proud position in the Parliament of Canada when so ably represented by our lamented and dearly loved fellow-citizen, Mr Julius Seriver. Tho' feeling unworthy the mantle which has so ably carried, if honored by your confidence and support, I will devote my best energies and abilities toward the interest of our county and country.

An appeal to you on my record. The son of a farmer of this county, I learned early in life those lessons of thrift and economy that form the work of the farm so thoroughly instilled. As my father had two sons and but one farm, I learned a trade and my record in business, as well as in the administration of public affairs in Valleyfield, is my certificate of character. You are the jury, if you consider I can worthily represent the County of Huntingdon, I hope to be favored with your influence and support at the polls, and if elected will devote my best efforts to promoting and supporting such legislation as is in the interest of my constituents.

Having faith in the judgment of the Electorate, I am well content, fellow-citizen of Huntingdon, to leave myself in your hands.

Faithfully yours, James A. Robb

HUNTINGDON DAIRY BOARD Sept. 25.—Seven factories boarded 214 boxes white cheese; six factories boarded 141 boxes colored cheese; six factories boarded 273 packages salted butter. All offerings sold. Sales: White cheese 12c; colored cheese 12.3-16c; butter 24.1-8c to 24.3-4c.

Gunn, Langlois & Co. got all the colored cheese, namely: Fertile Valley 25, Lake Shore 25, Maple-rose 15, Mountain View 18, Riverside 28, St. Charles 30, White Cheese

Gunn—Kilbain 40, Lily Vale 20, Powerscourt 21.

Olive—Bayview 31, Delmont 32, Dwyer 30, Fulford 40, 24.3-4c.

Butter Mathews, Foster & Monnet—Clearview 20 boxes and Beaudin 175 boxes at 24.5-8c.

Crawford—Brooklet 20, Kensington 28, and Lily Vale 40 at 24.3-4c.

Montreal, Sept. 28.—Livestock of all kinds in large supply with little change in prices except for hogs, which are lower. Choice beefs sold at 4.1-2 to 4.3-4c, good at 4 to 4.1-4c, fair at 3.1-2 to 3.3-4c, common at 3 to 3.1-4c, inferior at 2.1-4 to 2.3-4c per lb. and canners at \$1.60 to \$2 per 100lb. Sheep 3.1-2c, lambs 4.1-2c.

Calves differed greatly, their value depending on size and quality. The market for hogs was weaker today, and prices declined 25 to 50c per 100lb. This was due to the increased offerings, these being fully 1000 head larger than a week ago. At the reduction the demand from dealers and packers was good and an active trade was done at \$7 to \$7.25 per 100lb. for selected lots, weighed off cars.

HISLOH & HUNTER MARKET REPORT Live Poultry—Receipts have been quite liberal, but as there was an active demand prices were well maintained, the only ones that dragged at all were small fowl 8lb. and under, which had to be sold in some instances for 9 and 10c. Large chickens brought 13 to 13.1-2c, and fowl 11 to 12c; young turkeys 12 to 13c, ducks 11 to 13c, and geese are slow at 10 to 10.1-2c.

Apples—No. 1 Fall apples have been sold during the week at \$3.35, with a good demand, but inferior grades, of which there has been quite a quantity offering, sold at \$1.50 to \$1.75; some fruit being so small and scrubby it is a wonder that shippers would send them to market. Such lots have to be sold at whatever price the buyer chooses to offer, as there is very little competition for them. Shippers should bear in mind that all apples should be marked according to grade, viz: No. 1, 2, or 3, to comply with the fruit inspection act, otherwise they are liable to be confiscated.

To be Sold by J. A. Ferguson, Auctioneer On THURSDAY, Oct. 8th, at residence of Henry Oulmet, quarter of a mile west of Waterson's Corners—7 milch cows, yearling Holstein bull, yearling heifer, 2 calves, 2 pigs, 1 working horse, 15 tons of hay, 10 bushels of potatoes. Sale without reserve as Mr Oulmet is giving up the farm. 10 months' credit. To begin at 1 o'clock p.m.

ABOUT M'GUGAN. Man Who Will Build Power Lines is Famous Railroad.

Frank H. McGuigan, otherwise "Big Mac," who is to build the Hydro-Electric Power transmission lines, is one of the biggest railway men on the continent. He is a big man every way, big in resources and big in execution. One of his monuments is the reconstruction of the main line of the Grand Trunk Railway between Montreal and the Niagara and Detroit rivers, and between Port Huron and Chicago—now one of the finest double-tracked roadbeds in America.

Of his last works was the doubling of three miles of track on the Grand Trunk between Elsdon and Chicago on the south side of that city.

Mr. McGuigan is come of a great parental combination—a Highland Scotch mother and an Irish father. He was born in Cleveland, Ohio, in 1850, four months after his parents left Scotland. He once told Andrew Carnegie what a narrow escape he had of being a Scotchman, a privilege of which the Skibo Castle man is very proud. There was a time, too, when Carnegie and McGuigan drew pay on the same payrolls as the library builder was much interested to hear, reminding him of his old days in the Pennsylvania Co.

Mr. McGuigan's father had taken up contracting and had the work of constructing the Grand Trunk from Hamilton to Port media, with headquarters at the latter place. This was in civil war times and when wages went up to ruinous limits, the profile of contracting went in the opposite direction to that of the wages. In 1859, four months after his parents left Scotland, he once told Andrew Carnegie what a narrow escape he had of being a Scotchman, a privilege of which the Skibo Castle man is very proud. There was a time, too, when Carnegie and McGuigan drew pay on the same payrolls as the library builder was much interested to hear, reminding him of his old days in the Pennsylvania Co.

Promotion came by degrees. In 1874 till 1880 he was roadmaster, and in 1880 he was in charge of the St. Louis & Omaha division, Washburn road. From July, 1880, till Jan. 1, 1885, division roadmaster of this road; Jan. 1, 1885, till 1887, general roadmaster of lines west of the Mississippi river; 1887 till Dec. 31, 1895, superintendent of western division of same road at Kansas City, Mo.; Feb. 15, 1896, till March 1, 1902, general superintendent, C. P. & N. Y. division, and then fourth vice-president of the system. Thence he went to the Great Northern Railway as first vice-president April 1, 1907. He left the Great Northern a few months later and took up contracting.

FOUND SUNKEN LOGS. Lindsay Men Make Find Worth From \$15,000 to \$65,000.

Some thirty or forty years ago great quantities of oak and elm timber were cut and squared in the Lindsay district, and floated to Quebec for shipment to England. When for any reason, such as low water, or a dispute as to prices with the prospective buyer, it frequently happened that cribs were held over for several seasons, the result was loss by sinking.

For a number of years past there has been a trade in among old timers who have been told that a fortune awaited the discoverers of a sunken crib of white oak timber said to have gone down in Goose Lake or in the bay near Pleasant Bay, in Sturgeon Lake. Various parties have been soundings, and last fall a Kingston man employed a diver, but without result. About two weeks ago Bert McGraw, Dave Watson and W. Raymond happened in the vicinity of Bruce's Island, Lake Sturgeon, while raising sunken logs, and a fishing net landed on a snag, which proved to be one of the lost cribs of white oak logs.

The discoverers at once took into their confidence Mr. I. E. Weldon, who visited the spot in a tug, satisfied himself as to the location of the case, and then proceeded to back the discoveries in the matter of preliminary expenses. Half a dozen men were sent to the scene, along with one of Rustard's stump-pullers, and it is reported that the work of salvaging the huge sticks of timber is proceeding apace. The value of the "find" is estimated all the way from \$15,000 to \$65,000.

Round the World For Seals. The sealing schooner Agnes Donahoe has left Halifax for a year's sealing trip around the world. She clears for points and places in the north and south Atlantic, the north and south Pacific, and the Indian Ocean. Her final port of discharge will be Halifax. It is expected she will sail 15,000 or 20,000 miles before she returns to Halifax, as new sealing waters will be explored. Captain Balcom expects to go via Cape of Good Hope to the Indian Ocean and southern Pacific, returning via Cape Horn. The Agnes Donahoe is the schooner which was seized by the Uruguay Government for alleged poaching three years ago when several of the crew were imprisoned. They were only released after strong representations had been made by the royal Government, although the charge against them was groundless.

Ocean Cruise Trip. Remarkable is the canoe trip upon which Mr. and Mrs. Henry A. Wood of New York are making. They have gone over the most difficult and dangerous part of a journey from Gloucester, Mass., to Prince Edward Island by a sixteen-foot canoe. Mr. Wood is speaking while in St. John, N. B., said they were 19 days on the water from Gloucester to St. John. They made the cruise by single day trips averaging about 25 miles a day, and spending the nights ashore, either in houses or making camp for themselves. The canoe is provisioned for a week's run in case of emergency.

Canadian On For Bus. J. D. Henry, in a recent article, states that the time is rapidly approaching when it will be a matter of course for Canada to be a part of the world's great business.
