LIGNE DE COTEAU				LIGNE DE CONTOUR	— 62 —
DRAINS PROJÉTÉS				DRAINS EXISTANTS	- - - - -

The diagram shows a cross-section of a hillside. A dashed line indicates the projected drainage path from the top left towards the bottom right. A solid line marks the contour at elevation 62. A small circle with a cross inside represents a spillway outlet. A triangle symbol marks a leveling point. The terrain is divided into sections by changes in slope, indicated by short vertical tick marks. A road or path is shown crossing the hillside, with a manhole (regard) located near the crest. The area below the hill is labeled as the cotéau.
