PREMIER MARCHAND.

HON. MESSRS. DUFFY AND DECHENE VISIT THE EXHIBITION.

Tendered a Banquet in the
Evening

Yesterday the city of Sherbrooke and the Great Eastern Exhibition were honored by a visit from the Hon. Mr. Marchand, premier of the province of Quebec, and two of his ablest and most popular colleagues, the Hon. Mr. Dechene, Minister of Agriculture, and the Hon. H. Thos. Duffy, Minister of Public Works and representative of the Eastern Townships in the provincial cabinet.

The honorable gentlemen were escorted to the exhibition grounds where they were entertained at lunch by the directors of the association. There were also present the members of the city council.

After lunch the distinguished visitors were escorted about the grounds and remained on the grounds during the afternoon.

Today Messrs. Duffy and Dechene, accompanied by a number of prominent Sherbrooke gentlemen, are paying a visit to the experimental farm at Compton.

The premier returned to St. Johns this morning.

Last evening at the Grand Central Hotel, the provincial ministers were entertained at dinner by the members of the Liberal Association of Sherbrooke.

Mr. McManamy, president of the Liberal Association, presided and on his right sat the Hon. Premier Marchand, the Hon. Mr. Dechene and Mr. Hunt, M. L. A., for Compton. On his left were the Hon. H. Thos. Duffy and Mr. Stenson, M. P., for Richmond. Ranging down the table were about forty of the prominent members of the Liberal Association, visiting gentlemen and members of the press.

When all had partaken of the bountiful repast, which was served in the elegant and tasteful style, so characteristic of all Mr. Gauthier's efforts in this line, the chairman rose and proposed the "health of the Queen," which was heartily responded to by the singing of the National Anthem. The chairman then proposed the "health of the Provincial Cabinet," coupling with the last the honorable gentlemen by his side, Messrs. Marchand, Duffy and Dechene.

As the premier rose to respond he was greeted with a storm of applause. He was happy to be present in Sherbrooke on the occasion of her great fair, and as he had gone over the exhibition grounds, he had admired the splendid exhibits in all departments and the energy of the officials in their arrangements for the public's entertainment. He was struck by the magnificent attendance and by the wonderful order of the people. This, he believed, was due to the representative Eastern Townships farmers, who composed a large portion of the assemblage, and who attended to their duties, and did not waste their time in dangerous and harmful indulgences. He was proud to be able to congratulate the association on having excluded from the grounds all alcoholic liquors and gambling games, which always led to disorder. Mr. Marchand said that he would not on this occasion speak of party politics, but would rather speak of the future prosperity of the province as considered by his colleagues and himself. The prospect was rather dark, but they would not despair. The people understood the situation and would help them restore to a sound basis the finances of the province. (Applause.) The people would help by allowing the Government to follow out its policy of economy, permitting no grants except where absolutely necessary, by striking from the current year's expenses all that can be struck out and curtailing all expenditure to the lowest possible figure, which they had already taken steps to do. If the people preferred that they should follow a course of extravagance they would step out of office, but he believed the people would uphold his government in their efforts to restore the financial equilibrium of the province. (Applause.) They were elected for this purpose and they would attain their purpose or go. He believed the way was clear and he could safely predict prosperity for the province. (Applause.) The liabilities of the province were great, but its latent resources were greater. These would be developed and the credit of the country restored. In government expenditure they would save where it was possible to cut down. Mr. Marchand closed his re-

marks by expressing in courteous words his appreciation of the reception given him and his colleagues on the occasion of their visit to Sherbrooke and resumed his seat amid great applause.

The Hon. Mr. Dechene, Minister of Agriculture, followed in French, dealing principally with the agricultural prospects of the country. He urged the importance of developing the dairy and agricultural industries of the province, which formed the foundation upon which our prosperity must be built. Mr. Dechene spoke fluently and earnestly, impressing all with his sincerity and conceived them of his thorough knowledge of the department over which he presides.

The Hon. H. Thos. Duffy arose amid prolonged applause. With magnetic eloquence and keen wit, he entertained the company. He was glad to have the privilege of visiting Sherbrooke Fair in company with his honored chief and colleague. And as he looked over that fine exhibition, the best in the province, Montreal not excepted, in company with the Premier and Minister of Agriculture, he was proud that he was an Eastern Townships boy, the Garden of the Province, which had rendered such an exhibition possible. (Applause.) In a glowing manner did the eloquent gentleman recall the resources, state the conditions and point the destinies of the Townships, the province and the Dominion. To-day the country had only four or five million people, but nature had given her half the American continent and blessed her with inexhaustible fertility and boundless resources.

Those four or five millions would be increased to forty millions. (Applause.) Some believe that the racial division of Canadian people, French and English, would hinder the growth and retard the prosperity of the country. He believed that the race problem had been solved. They would dwell together in harmony and their outcome would have as its outcome one of the most glorious countries the sun ever shone upon. (Applause.) He often recalled those pages of English history which tell the story of the Anglo-Saxon and Mormons. After the Mormon conquest the two peoples lived together for centuries and from them sprung the mightiest and grandest nation the world ever saw. We in Canada were sons of those Mormons and would carve out a future equally as great and prosperous. (Applause.)

In speaking of the policy of the government, the honorable minister said that there were three things to which they would give special attention: education, agriculture and colonization. In a able manner he dealt with each branch separately, and pointed out the glorious condition which the developed intellect, the cultivated fields and the increased population would bring the country.

Mr. Duffy sat down amid prolonged applause. The chairman now proposed the toast of the Dominion Parliament which was replied to in an interesting manner by Mr. M. T. Stenson, M. P. for Richmond.

The Hon. Mr. Marchand, as the chairman was about to dismiss the gathering, rose and proposed one to be closing. "The City of Sherbrooke," coupling with it, the name of Mr. McManamy, the gentleman at his left. This was fittingly acknowledged by the chairman when the company dismissed after a pleasant two hours with the honorable ministers from Quebec.

VACCINATION.

The Public Vaccinators Keep Unprecedentedly Busy.

Montreal, Sept. 1.
The public vaccinators are kept unprecedentedly busy, and private physicians all over the city are applying for vaccine points from the board of Health. Since the issue of the Mayor's proclamation on the 27th ult., up to three yesterday afternoon, no less than 15,402 vaccine points had been distributed. This morning 2,930 more points were received from the vaccine farm near Quebec, and by noon the last of them had been issued.

The goal physicians are in communication with the Provincial Government with a view of having the prisoners vaccinated. The local health authorities take the ground that the cost of vaccinating the prisoners should be borne by the Government, and not by the city.

No new cases of smallpox were reported today.

H. C. WILSON & SONS' Announcement for Exhibition Week.

We have a grand assortment of Pianos and Organs at the Fair this week. The styles are new and "up-to-date," with latest improvements known to the piano makers' art. We think our exhibit is a little ahead of anything shown in former years. We wish to dispose of the entire lot during Exhibition week, and will offer these superb instruments at a very small advance on actual cost, for delivery at the close of the Fair. This means that you can secure a particularly choice Piano or Organ at a moderate price, and on easy terms of payment, if desired.

We are also showing a very complete stock at our large warerooms, 63 Wellington street. Pianos and Organs, Band Instruments, fine Violins, Guitars, Banjos, Mandolins. Best quality strings for all instruments. Special discounts on all goods sold this week, and a large stock to select from. Prof. Clark (the blind pianist), will play our Pianos each day at the Exhibition, and at our store in the evening. We shall be pleased to see all visitors who will favor us with a call.

Perverted Judgment. The cause of a wrong taste is a defect of judgment. And this may arise from a natural weakness of understanding (in whatever the strength of that faculty may consist), or, which is much more commonly the case, it may arise from a want of a proper and well directed exercise, which alone can make it strong and ready.

AMERICAN VISITORS' DAY.

Fourth Day of Sherbrooke Fair.

Weather Continues Perfect, and Crowds Immense--Success Beyond all Expectations--Prize List Continued.

This is American visitors' day, and as such all trains from the south have been literally packed. The special over the B. and M. R. R. had seventeen car loads, while the Maine Central and Grand Trunk brought like crowds.

The morning was cloudy, but it soon cleared off and by ten o'clock it could be seen that the fourth day of the fair would be all that could be desired so far as weather goes. The stream of people for the exhibition grounds has been as large as that of yesterday.

The directors have had everything in readiness from day to day, so that there has not been a single hitch, while weather has been perfect. Every one who has attended, returned home more than pleased with the fair, and the words of approval to be heard on all sides, exceed anything of the kind ever expressed in this city before.

Yesterday was a great day for Sherbrooke. Nearly 20,000 people visited the exhibition, the largest number in the history of the society. The immense grand stand was filled to its full capacity (5,000) at noon. It was a magnificent sight, that vast sea of human faces. Everybody in the best of humor and highly entertained by the interesting programme.

The association have added to the stand year by year, and it would be money well spent if they would add another fifty feet before next exhibition, for on a day like yesterday they could fill a stand double the size of the present, and with increased accommodation, all could reach a vantage ground from which to view the great attractions.

The racing and special performances yesterday were of a nature to give eminent satisfaction to all, and the balloon ascension, by the lady aeronaut, Miss Carleton, was perhaps the finest ever witnessed on the ground.

The parade of live stock was very attractive, though only a few of the fine cattle exhibits were shown. The displays in the main building continued to attract much attention from the visitors.

THE RACES.

Never before in the annals of the Sherbrooke exhibition, have there been as many entries in the different races as this year. Yesterday the contests were very exciting, and the number of horses starting almost too many. Fourteen starters makes a bunch that a man in the rear can hardly get through. The results of yesterday's contests were as follows:—

2.40 Class— Lucy B. J. H. Lane, 13 9 9 6; Ben Vi, M. Archambault, 5 5 13 dr; Notman, Highland Stock Farm, 6 6 3 4; Henry's J. Clyde River Stables, 11 8 11 dr; Glenfield, A. Lebeau, 8 11 6 5; Hazel B. J. N. Jourdain, 3 1 1 1; Jack Page, J. Bothwell, 12 12 12 9; Sleepy Joe, F. Webster, 4 3 4 3; Belle W. D. D. Bean, 14 4 10 dr; Rock Farm Grace, G. K. Foster, 10 7 8 8; Wager, H. Ingram, 1 2 2 2; Exchange, T. A. Pailing, 2 16 7 11; Alice B. J. Lefebvre, 9 14 11 10; Miss Eclair, C. T. McNally, 7 13 5 7.

Time, 2.31, 2.29, 2.29, 2.30. Money divided as follows: Hazel B. 1st; Wager, 2nd; Exchange, 3rd; Sleepy Joe, 4th.

2.25 Class— Commissary, R. H. Pope, 7 4 4; Marionette, J. C. Cox, 2 5 7; Daisy S. J. Charest, 11 10 dr; Enrocydon, Highland Stock Farm, 8 6 6; Solon, F. Webster, 9 7 5; Panett, A. Tetreault, 3 2 5; Bessie Wood, H. Stewart, 10 11 8; Polly, W. A. Richardson, 12 9 dr; St. John, W. Marshall, 8 6 9; Corbett, H. J. Ball, 4 3 2; Clayceps, Mt. Wash. Stock Farm, 1 1 1; Pea Picker, Jos. Girard, 5 9 dr.

Time, 2.24, 2.23, 2.25. Money divided as follows: Clayceps, 1st; Corbett, 2nd; Panett, 3rd; Marionette, 4th.

Running handicap— Bonnetfield, W. McBride, 1 1; Play or Pay, J. P. Dawes, 2 2; Judge Lynch, dis.

Time, 1.20, 1.19.

H. C. WILSON & SONS' ATTRACTION.

One of the busiest places in the whole fair is at Messrs. Wilson & Sons Exhibit in the main building. They have been thronged with visitors each day and report sale of several of their fine pianos. Among the large assortment shown is a group of three Heintzman & Co. pianos. A parlor grand at \$900 and 2 very handsome large uprights in oak and Spanish mahogany cases, with hand carved panels. These are the original Heintzman pianos, established 1850, and only Canadian piano used by Madame Albani and other great artists. The Mason & Risch pianos are also greatly admired, as well as ever popular Dominion pianos with "harp and mandolin" attachment. Messrs. Wilson & Sons have some 25 instruments in

the exhibit, which is the largest ever made at the Great Eastern Fair and would be a credit to any exhibition in America.

SHERBROOKE YARN MILLS have an attractive display of their fine productions. The exhibit consists of yarns and hosiery, selected from the large variety of stock manufactured at these mills, and its shows up well the fine quality of the mills' output. Everybody, who has ever used any of their yarn, is aware of what this quality is, and who in this part of the country has not? They use nothing, but the purest Eastern Townships wool. They manufacture three lines of yarn and hosiery all of the first quality, ranging in grades from very fine to coarse, and of all shades and colors. These yarns are handled by all the traders in the country, but any one may order direct from the mill.

The exhibit is in charge of Mr. John McDonald, a member of the firm. The output of the mills is very great, and is constantly increasing, owing no doubt, to the genuine quality of the goods, which retains for them every customer that they get. This is worth the inspection of all. From the crowds around it yesterday, it appears that it is, at least, receiving a portion of the attention it deserves.

THE GERHARD HEINTZMAN PIANOS

exhibited by Mr. G. A. LeBaron, were viewed by thousands of people yesterday. The crowd before the exhibit did not diminish during the day. People would pause for a time before the beautiful display, then tear themselves away to see other exhibits in the hall, only to be drawn back again and again to LeBaron's space, to view again the beautiful instruments and listen to the rich music. Mr. Gerhard Heintzman, the famous manufacturer of the pianos, was present a portion of yesterday and must have felt pleased with the attention the display of his instruments were attracting from the visitors to the Eastern Townships Fair. Though it is but a specimen of the interest which the whole country is feeling in them and which must be the best there are going, when a city chose one of this make as the choicest present they could offer to the first lady of the land, Mr. LeBaron has the sole agency for the Eastern Townships.

Today (Thursday) the crowds about Mr. LeBaron's display continue. All want to see and hear the wonderful Gerhard Heintzman pianos. Mr. LeBaron's exhibit has always attracted much attention, but never before has the spot been so much the centering point of attraction as this year. Everybody seems to think that what is good enough for Lady Laurier is good enough for them. Mr. LeBaron has received several orders for Gerhard Heintzman pianos during the past few days, and it looks very much as though the Gerhard Heintzman piano was entering upon a flight of greater prosperity.

KELLY BROS., MARBLE AND GRANITE WORKS,

which are situated at 192 and 200 Wellington street, in this city, make a fine exhibit, consisting of monuments, tablets, head stones, &c. The splendid work of this firm is showed up to advantage by the magnificent and latest designs which they exhibit in Barrie, Scotch and Gouverneur marble. The whole exhibit is attracting much attention, though, owing to its heavy character, it necessarily represents but a small part of their extensive display at their city head quarters. Kelly Bros., by the fine quality of their work, their artistic lettering, and beautiful finish, have won for themselves an enviable reputation throughout the country, and have gradually extended their business until now they stand without a rival, and receive the great patronage of the city and surrounding country. All who are seeking for something artistic and first class in their line should place the order with this firm. Many are recognizing this, and Mr. Kelly, who has charge of the exhibit, is receiving many orders on the grounds.

F. L. BEAN

has a fine exhibit of agricultural implements in machinery hall. The fine line of Wilkinson, Vilas and Percival ploughs shown are attracting much attention and many orders are being taken. His exhibit is not very large, just enough to remind the public of his great store on Wellington street, which is crowded all day by people who want something in

the agricultural or carriage line and know that he can supply it.

W. N. IRWIN'S

exhibit, in machinery hall, continues to attract much attention from the public. The harvesters, mowers, ensilage cutters, etc., are kept constantly running, the power being furnished by a special steam engine placed in the building by Mr. Irwin for that purpose. The Verity ploughs are much admired by the hundreds who stop to inspect them. The adjustable handles, which can be arranged to suit the length and convenience are among the special features of this plough. Also the new patent clevis, which is a great improvement over other styles.

The ensilage and root cutters and pulpers, exhibited by Mr. Irwin, are also of the latest 1897 improved style. He has taken many orders for these machines, for their merits are too conspicuous to be overlooked, and therefore no one who is in need of a machine and inspects the Massey-Harris Co's makes, exhibited by Irwin, goes away without buying. They all have the new roller bearings, which supplies the two great requisites required in all machines of their nature—ease in running and rapidity in work.

The limited space in the hall permits Mr. Irwin to exhibit only a small part of the extensive line of goods, which he carries in his large store in the city.

There's always Some excuse

for the fellow who insists upon having his shirts made by the exclusive shirter. "Money to burn" fits his case. The smoke of burning money is an unpleasant odor. Maybe when he gets a whiff, he'll realize his folly. Our way of making shirts is remarkable for the scantiness of price.

LEFT FOR CANADIAN GOLD FIELDS.

Sault St. Marie, Mich., Sept. 2.—The steamer Telegram departed for the Michipicoten gold field's last night. She left with 400 passengers, 20 of whom were from the Canadian Soo, including the official surveyor, who has several claims to stake out.

Among the prominent citizens who went are ex-Mayor Hurstey and Thos. R. Harvey, agent C.P.R. here.

CANADA'S WHEAT CROP

Winnipeg, Sept. 2.—Official estimates place the wheat crop yield for Manitoba and Northwest Territories, this year, at 30,000,000 bushels.

MASSAWIPPI STATION BURNED.

B. & M. R. R. Meet with a Loss by Fire this Morning.

Massawippi, Sept. 2.—The railroad station, including freight shed, of the B. & M. R. R., at this place, was burned to the ground this morning at one o'clock. No one lived in the building, and the fire was not noticed until well under way. Everything was a total loss. Mr. O. Amy, the agent, done a small jewellery business in addition to his duties as agent, and his loss is about \$600. The cause of fire is unknown.

NEWS FROM THE ORIENT.

Brought by S.S. Empress of China.

(Special to Record.)

Vancouver, B.C., Sept. 2.—The S.S. Empress of China arrived from the Orient today, bringing the following advices:

The rebellion in the Philippines is not by any means crushed, and several conflicts have taken place which, despite the glowing official accounts, do not seem to have been altogether Spanish victories. Advices from Seoul report a serious locust pest in Corea, while people everywhere are dying from cholera. About a third of a mile east of Seoul the people of the township have nearly all been carried off by the disease. Chemo-pa is also affected, though in a slighter degree.

A SUPPOSED MURDERER.

Arrested this Morning in Nova Scotia.

(Special to the Record.)

Halifax, N.S., Sept. 2.—Henry Davidson, of Tracadie, Antigonish county, has been taken into custody, for his supposed connection with the death of another man named Chas. Bowman, who was killed by shooting with a gun.

MILBY.

August 31.—Mr. Macoy, of Hoboken, N.J., who has been visiting his daughter, Mrs. Robert D. Jamieson, has returned home.

The Ladies' Guild of St. Barnabas Church held a bazaar at the residence of Mrs. Allen Cole, on Thursday evening.

Mr. and Mrs. J. E. McDonald, of Waterville, are visiting their uncle, Mr. J. Orr.

NOTICE TO EXHIBITORS.

The Canadian Express Company will run a special car for exhibits for Three Rivers fair, leaving Sherbrooke Friday night, arriving at Three Rivers Saturday morning, thus avoiding all transshipment. Tariff, 75 cents per 100 lbs; or shipments of 500 lbs and over, 60 cents.

KNOWLTON DISTRIBUTING HOME.

Mrs. and Miss Birt, of the Distributing Home, Knowlton, returned to England last week. At the present time there are in the Home one little girl, aged 5, and about a dozen boys from 4 to 10 years of age, for whom homes are desired and applications, with minister's recommendations and rail fares, invited.

POLICE NEWS.

There were five men taken in charge at the exhibition grounds, for being drunk and incapable yesterday, also five arrests in the city for the same cause.

FALL MILLINERY.

All the latest novelties in fall and winter millinery can be had now at Mrs. McKenzie's, 20 Commercial square.

CORRESPONDENCE.

At about 6 o'clock yesterday, Sept. 1st, the wire of one of our subscribers was cut down by order of L. B. McFarlane, Esq., general superintendent of the Bell Telephone Company of Canada. These wires passed through the air lately acquired by the Bell Co., in the immediate vicinity about their new building in this city, but in no way interfering. The act was prompted by a "wounded spirit," who could not bear it.

C. SKINNER, General Manager People's Telephone.

SERIOUSLY HURT.

Wm. Perry, hostler in charge of Dussault's horses on the exhibition grounds, was kicked in the side at 2 o'clock this afternoon and seriously injured, necessitating his removal.

WE ARE NOT MORMONS YET.

In the address of Hon. Mr. Duffy, to be found on the first page of this paper, the word "Mormons" should read "Normans." Anyone reading the article would, of course, see the mistake, and derive the proper meaning without our calling attention to the same.

AMERICAN PLOWS.

Now Sold Pretty Much Everywhere All Over the World.

There are in the United States hundreds of plow factories, including some immense establishments that produce plows in great numbers, besides various other agricultural implements. The plow has long since ceased to be just a plow. There are made nowadays plows especially designed for the most advantageous cultivation of all the various crops and for use in all sorts of soils. American plows are now made in hundreds of styles. There are single concerns in this country that make 50 styles or more.

American plows of all kinds are exported in considerable numbers, and they go pretty much everywhere all over the world. Bakers send, of course, to the several countries the plows best adapted to their crops and soils. They send some plows to Asia, of which the smallest proportion goes to China, many plows to South America, not a great many to the Central American countries and not very many to Mexico, which country, notwithstanding its contiguity to the United States, is slowest in taking American plows. The plows sold there go chiefly to the larger farmers, the cultivators with capital. The smaller farmers still stick mostly to the primitive methods of their fathers, but they, too, are now beginning to buy American plows.

American plows are sold in South Africa and in Australia and in Europe, in all the continental countries and in Great Britain as well. They are, of course, not alone in these various fields. They compete everywhere with the plows of Germany and England, finding their way by superiority of style and workmanship and greater adaptability to requirements.—New York Sun.

Causes of Fire.

On several occasions it has been found when buildings and machinery have been taken down that the wood placed in close contact to heating apparatus has become so charred that it is nothing more or less than charcoal. Sometimes this has ignited on exposure to the air. An expert declares that there are more fires caused in this way than the public ever suspect. By some means there is a crevice through which a current of hot air is drawn. This gradually oxidizes the wood and makes it as inflammable as tinder. It is estimated that wood ignites at about 600 to 800 degrees F. Wood containing much oily or resinous matter ignites much more easily, and great care should be taken in putting such wood in the immediate vicinity of great heat.

It is thought that very many fires attributed to defective flues are caused by resinous woods that are put into casings and other woodwork where there are openings more or less large through which stove or furnace heat can pass. Gradually these pieces become dry, then go through various chemical changes caused by intense and long continued heat, until on some occasion when the fires are unusually fierce they burst into a flame. In building houses there is nothing more important than the care of chimneys and flues. If possible there should be double guards placed between all woodwork and metal, with ventilation supplied by cold air. Attention to this would save much valuable property and might save life.—New York Ledger.

INTEGRITY NOT FOR SALE.

How a Farmer Played Euchre With a Lobbyist to Prove It.

A few years ago, when a United States senatorial election was impending in Ohio, one of the leading candidates needed another vote to make his election sure, and his campaign manager, after canvassing the situation, began work upon a buccle representative from one of the western reserve counties.

The old man grew very indignant at the first hint of money in connection with his vote. He fumed a great deal, swore a little and very melodramatically asserted that "his manhood was not for sale at any price." Gradually the fact was impressed upon him that the one necessary vote could be secured in another quarter, and that his obstinacy would have no effect upon the senatorial result anyway, while it might materially affect his pocketbook.

Thereupon the old fellow made an eloquent plea in his own behalf. He strongly asserted that he was an honest man whose reputation was as dear to him as his life and whose character always had been unspotted by contact with the world. "You will readily understand, sir," he added, "that having so much at stake as I do it would be impossible for me to entertain for one moment any proposition you might make to try to influence my vote in this matter. My vote is not for sale, but I have no ill feeling toward you for what you have tried to do, and as proof of that fact I'll go right over to your room now and join you in a social game of euchre just between ourselves."

"All right," assented the lobbyist. "I'm pretty busy, but I guess I can find time enough for a single rubber with you. How about the stakes?"

"Twenty-five hundred a corner."

"No; two thousand."

They played. The lobbyist lost. The man from the Western Reserve voted for the candidate who was elected senator.—Chicago Times-Herald.

BRIEFLETS.

Telephone us your orders for all kinds of cakes this afternoon. R. W. Darby & Co.

A large number of exhibits from Sherbrooke will go to Three Rivers, and thence to Ottawa.

Visitors will be pleased to know that they can see a fine display of expensive guns at A. H. Foss' exhibit in the main building.

It will pay you to visit A. H. Foss' exhibit, in the main building.

Fresh oysters, trout, dove, cod, haddock, white fish, halibut at Harvey's.

Your visit to the fair is not complete without visiting Z. P. Cormier's fur display, at his store on Wellington street, sign of the white bear.

Messrs. H. C. Wilson & Sons' large wares have been crowded with visitors, every evening this week, to hear Prof. Clark, the piano soloist. Mr. Clark plays again this evening.

Have you tried Kismet chewing candy? We have it. R. W. Darby & Co.

The Harmonie Band has secured a two day engagement for the Cookshire fair, September 7th and 8th.

We have a lot of bananas to sell at 10c, 15c and 20c dozen. R. W. Darby & Co.

White's Silver Band, from New Hampshire, played in front of the Sherbrooke House, this morning, and drew a large crowd.

A great number of the excursionists from the New England cities yesterday, remained over night, so as to take in the Fair again to-day.

"The Two Orphans" was played before a large and appreciative audience last evening. The acting was as good as on previous evenings, that is recommendation enough. The company have been somewhat handicapped on the two previous evenings by the non-arrival of their costumes and scenery. These, in part, arrived yesterday, and a great improvement was noticeable. The costumes are rich and beautiful and the scenery very realistic.

The following changes were made in the Judges, from the list first printed, owing to unforeseen circumstances: Ladies and Children's Department, Miss Smith, Ottawa; Art Department, Mrs. C. L. McDougall, Lennoxville.

The special over the C. P. R., arriving at noon, was accompanied by the band from Sutton, and the boys created a very favorable impression, as they marched through the streets on their way to the Fair grounds.

A slight accident occurred in front of the Sherbrooke House this morning. Mr. Jas. Morkill left his horse and carriage standing in front of the hotel in charge of a boy, and the horse becoming frightened at a passing train, began to plunge, throwing itself and turning the carriage completely over. Fortunately no damage was done beyond a few broken straps.

A Cure For Snake Poisoning.

It is very noteworthy that many nations, races and castes lowest in civilization have for a long time protected themselves against poisoning from snake bites by a method which never until the present time, the twentieth century, has been discovered by European scientists. The races of Psyller in Africa, Morser in Italy and Gumer in India, ages ago possessed a means to insure themselves against poisoning from snake bites, and today these are people who are not harmed by snake poison, if we may believe the descriptions of travelers. Such are the negroes on the Guinea coasts, the race of Eisower in Barbary, some fakirs and snake charmers in India, the inhabitants of Mozambique and some Kafirs in South Africa. The means used by all these peoples to secure immunity from snake venom consists in taking as medicine the venom, either fresh or dried, from the venom glands of snakes. The majority eat the venom, but in Mozambique the same result is gained by incubating with it. That these peoples really do make themselves proof against snake bites in this way seems to be sure beyond a doubt.

Although this method was made known long ago in Europe by travelers, probably secured to take any means of it until the experiments of Pasteur and his school had demonstrated the possibility of utilizing it. Then scholars began to study the effects on animals of feeding snake venom and of incubating with it and to convert into scientific capital the avowals of these fakirs.—Rochester Standard.

QUEBEC VS SHERBROOKE.

The intermediate lacrosse match Saturday afternoon, is being looked forward to with considerable interest by those interested. Sherbrooke expects to win their first game of the season, and they will if they put up a game equal to that played with the Capitals.

The question of profit estimates is now a burning one in life assurance circles. The public are learning to distrust all companies whose estimates are high, arguing that those which hold out only moderate and reasonable prospects are more worthy of their confidence than those which are reckless in their assertions.

MICE IN FOLKLORE.

A Bohemian Legend Declares That They Were Created by the Devil. Mice do not play a great part in folklore.

Even the legend of the "Pied Piper" associates them with rats, says the London Standard, but one recalls a few cases not uninteresting. A Bohemian legend declares that they were created by the devil, whereupon beneficence produced the cat.

In that very interesting island of Bali, also, where Brahmanism and Buddhism inextricably mingled, survive, while all the populations round have long been Moslem, some fortunate mice receive like honor.

How Celluloid is Made. A good deal of secrecy is maintained by the manufacturers of celluloid as to their respective methods of manufacture.

A method adopted by a Berlin firm is to pour 100 parts of ether on 50 of collodion wool and 25 of camphor and stir the covered mass in earthenware vessels with rubber sticks until a homogeneous gelatinous mass is obtained, which is then rolled.

Striped articles are obtained by superposition of plates of different colors and cross cutting of the compressed blocks. Celluloid cannot be exploded by heat, blows or friction.

Elopements. Elopements have entirely disappeared from fiction and almost entirely from high life.

The Destruction of Sodom. An attempt to give a scientific account of the destruction of Sodom and Gomorrah has been made by Dr. C. Diener of Vienna.
