

Lines of Anglo-French Army Unbroken Official Statement From French War Office

Allies Fall Back at One Point Germans Within 58 Miles of Paris Statement of Reverses and Successes

GERMANS PILLAGE TOWN.
London, Sept. 1.—(Special)—A despatch to the Reuter Telegram Agency from Ostend reports that refugees from Aerschoot, 23 miles northeast of Brussels, accused the German troops, before they evacuated that place, of having pillaged and burned half the town.

SAILORS TELL OF FIGHT.
London, Sept. 1.—(Special)—The Harwich correspondent of the Telegraph gives an interview with wounded sailors, and speaks of the plucky way in which the English handled five shells. Many of the German shells which made hits, it appears, did not burst.

"There were five shells in the boiler of one of the destroyers," he quotes one of the sailors as saying, "and if one had burst it would have been all up with the ship."

"What did you do with them?" was asked.

"Oh, just shied them overboard. There was no room for such rubbish aboard our yacht."

RICHEST MEN WILL PAY WAR TAX.

London, Sept. 1.—(Special)—A despatch to the Express from the Hague says that the four richest men in Belgium have guaranteed the payment to Germany of the war tax which the Germans levied against Brussels. The four men are Ernest Solvay, the Alkalking; Baron Lambert, the Belgian representative of the Rothschilds; Raoul Warocque, the mine owner, and Baron Empain, the railway magnate. "Had not this guarantee been given," says the correspondent, "Brussels would probably have been treated as Louvain was. Big guns were mounted in front of the palace ready for bombardment."

BELGIAN COMMANDER A PRISONER.

Paris, Sept. 1.—(Special)—The Antwerp correspondent of the Petit Parisien gives this explanation of the presence of General Leman, the Belgian commander at Liege, in Magdeburg as a prisoner of war:

"On August 17 General Leman was summoned by the Germans to surrender the Liege forts. He refused, but as the situation was then desperate and it was impossible to hold out against another bombardment, he called his officers together in Fort Loncin and said, 'You have valiantly fought for your country, but the struggle has become impossible and it is foolish to try further. Honor has been saved and the hour is come when we must separate. I have decided to die here. Loncin shall be my tomb.' Just then the fort fell in ruins. When the Germans searched the ruins, General Leman alone of the defenders was found."

GERMANS DISGUISED AS ENGLISH SOLDIERS.

Paris, Sept. 1.—(Special)—A corporal in a convoy of wounded at Champigny says that in the fighting at Guise, a regiment firing on the line heard the signal to cease shooting. Immediately in front of them they saw soldiers wearing caps like the English. They advanced, cheering the English, and were met by a deadly discharge of rifle fire. The Germans, he declared, had used this subterfuge to draw the French on.

RUSSIANS CLOSING ON AUSTRIANS.

London, Sept. 1.—(Special)—A despatch to the Times from St. Petersburg gives the following comment on the Russian operations against the Austrians:

"The Russian operations against the Austrians are considered by recognized military writers to have reached the stage when decisive victories may be within reach. The capture of the railway centre forty miles south of Lemberg involves the rupture of railway communication with the Austrian fortresses on the Dniester and in Bukovina. Thust, southern part of Galicia, as well as Bukovina, is severed from the remaining portions of Galicia, except by a circuitous route across the Carpathians. As a result, the iron ring is closing around Lemberg."

"According to the Russko Slovo, the losses suffered by the Austrians in their desperate attempt to strike at the vitals of the Russian position in Poland, aggregate tens of thousands of men, including the Sixty

Austrian Corps, which on its retreat between the western Bug and the Wieprz Rivers was almost annihilated."

CHANGED NAME OF ST. PETERSBURG.

London, Sept. 1.—(Special)—A despatch to the Reuter Telegram Agency says that by imperial order, the city of St. Petersburg, capital of the Russian Empire since 1712, will henceforth be known as Petrograd. This change eliminates the Teuton construction in the name by which the chief city of Russia has been known since it was founded by Peter the Great in 1703.

GERMANY'S THREAT TO BELGIUM.

London, Sept. 1.—(Special)—In a letter to the Westminster Gazette, the official notification of the German quartermaster-general, General von Stein, on German measures in Belgium is quoted as follows:

"Any fear of the Germans that concessions will be granted the Belgians is unfounded. Since Belgium declined our advances, it will have to bear itself all the consequences of its action. The operations commenced have not been delayed one moment through communication to the Belgian Government, and are being carried out with ruthless energy."

LINE NOT BROKEN

London, Sept. 1.—(Special)—The Anglo-French Army Corps have had to give ground, but nowhere have they been broken through, is the statement given out at the French Embassy in London today.

NO GERMANS AT LILLE

London, Sept. 1.—(Special)—A despatch to Reuter's from Paris says that a member of the French Chamber of Deputies for one of the northern departments of France, has arrived at the French capital and makes the declaration that there are no Germans at Lille, Roubaix or Tourcoing.

The group of towns referred to are in the Department du Nord, and all within twenty miles of the Belgian frontier. Despatches last week said that they had been occupied by the German troops.

ALLIES TAKE UP THE OFFENSIVE

GENERAL ACTION IS NOW BEING FOUGHT, SAYS FRENCH WAR OFFICE

Paris, Sept. 1.—The following official statement was issued by the War Office last evening:

"The situation in general is actually as follows:

"First, in Vosges and in Lorraine—It must be remembered that our forces, which had taken the offensive at the beginning of the operations and driven the enemy outside of our frontiers, afterwards underwent serious checks. Before Sarreburg and in the region of Morhagne, where they encountered very solid defensive works, our forces were obliged to fall back and to reform, one part on Courmoulin de Nancy and the other on the French Vosges."

"The Germans then assumed the offensive but our troops, after having thrown them back upon their positions, resumed the offensive two days ago. This attack continues to make progress, although slowly. It is a veritable war of sieges, as each position occupied is immediately fortified."

"This explains the slowness of our advance which is, nevertheless, characterized each day by fresh local successes."

"Second, in the region of Nancy and southern Wavre—Since the beginning of the campaign this section, between Metz on the German side and Toul and Verdun on the French side, has not been the theatre of important operations."

"Third, in the direction of the Meuse between Verdun and Metz—It will be remembered that the French

forces took the offensive in the beginning, towards Longwy, Neufchateau and Paliseul. The troops operating in the region of Spincourt and Longuyon have been able to check the enemy's army under command of the German Crown Prince."

PARTIAL CHECKS

"In the regions of Neufchateau and Paliseul, on the other hand, certain of our troops have received partial checks which obliged them to retire upon the Meuse without having their organization broken up. This retreating movement has compelled the forces operating in the neighborhood of Spincourt to withdraw also towards the Meuse."

"During the last few days the enemy has endeavored to spread out from the Meuse with considerable forces, but by a vigorous counter offensive they were repelled with very great losses. In the meantime fresh forces of Germans advanced to the district of Rocroy (in Ardennes) marching in the direction of Rethel. Now a general action is taking place between the Meuse and Rethel, and it is still impossible to see definitely the issue of this."

"Fourth, operations in the north—The French and British forces originally took up positions in the Dinant and Charleroi country and at Mons. They endured several repulses, and the forcing of the Meuse by the Germans near Givet, upon our flank, compelled our troops to retire."

GERMANS MOVE WESTWARD

"The Germans seek continually to move toward the west. It was under these conditions that our English allies, attacked by the enemy in greatly superior numbers in the region of Le Cateau and Cambrai, have withdrawn toward the south at the moment that our forces were operating in the district of Avesnes and Chimay. The retreating movement was prolonged during several days."

"In the meantime a general battle took place in the region of St. Quentin and Vervins, and at the same time in the Ham-Peronne district. The battle was marked by an important success by our right, where we have thrown back the Prussian guard and tenth army corps into the Oise."

"Owing to the progress of the German right wing, where our adversaries have united their best corps, we have had to mark a new retirement. On our right, after partial checks we have taken the offensive and the enemy is retiring before us."

"In the centre we have had alternative checks and successes, but a general action is now being fought."

"On our left by a series of circumstances which turned in favor of the Germans and despite plucky counterattacks, the Anglo-French forces were obliged to give way. As yet, our armies, notwithstanding a few incontestable checks, remain intact. The morale of our troops is excellent in spite of considerable losses, which are also being rapidly filled from regimental depots."

ADVANCE IN PRICE OF HORSES.

Chicago, Sept. 1.—(Special)—Heavy demand for horses and mules, suitable for army purposes for nations engaged in the European war, has caused prices to advance from \$5 to \$100 per head higher than a year ago, it was said at the Chicago Stock Yards to-day.

FAILED TO REACH NORTH POLE

London, Sept. 1.—(Special)—A St. Petersburg despatch to the Reuter Telegram Agency reports that surviving members of the Arctic expedition, headed by Lieut. Sedoff, which left for the North in 1912, have arrived at Archangel. The survivors stated that Lieut. Sedoff died in a vain attempt to reach the North Pole.

ALTHOUGH WEATHER HAS BEEN COLD MEN HAVE NOT SUFFERED—PLENTY OF WORK.

Magog, Sept. 1.—(Special)—A resident of Magog was in Valcartier on Sunday on a visit to the great camp. He was amazed with the whole development of the place. The white city with the trim soldiery and the bugle call sounding from one limit to the other presented a sight to the visitor never to be forgotten. The St. Lawrence County contingent looked healthy and happy and represented the following towns throughout the county:

Magog—12 men.
Hatley—9 men.
Stanstead—2 men.
Coaticook—1 man.
Tatouy—1 officer.

Although the weather has been cold the men have not suffered and are receiving the best of attention from the administrative unit. "Plenty of work but no kick coming," is the sentiment expressed by all grades and ranks.

Racing against the flames, the steamer made for the Government Breakwater, just off the harbor, and all the passengers were landed safely a moment before the boat sank.

The Gold Dust Twins' Philosophy

THE Village Sewing Circle met to gossip, in their little set, but one opinion seemed to hold despite the tendency to "scold." When vexing problems, such as say, "What shall we do on Cleaning Day?" confront the Housewife, she may feel that Gold Dust tackles them with zeal.

The Envid Housewife

formly took a "bit" from household work and argued it, while all in turn were loud in praise of what a part their Gold Dust plays.

The pennies count, as you must know, and cleaning makes the pennies go. If Gold Dust cuts the tell in two and makes economy come true, why not adopt the "Cleaner way" and join the "Gold Dust Club" today?

The Gold Dust Twins

School will commence here on Tuesday with Miss Butler as Model teacher and Miss Ward as Elementary teacher.

GERMANY'S GREAT NAVAL BASE—The above cut shows the scene of the recent Naval Battle, off Heligoland, and the North Sea entrance to the Kiel Canal. The following particulars regarding Germany's great Naval base, will be of interest, as it shows how the Kaiser's Ships keep away from the British Navy which stands in defiance at the entrance of the Canal and at the entrance to the Baltic Sea.

The sketch map shows the great German naval base where the rivers Elbe and Weser empty into the North Sea and indicates clearly the immense strategic importance and the immense network of defence works on which Germany now banks all she has of naval importance. Wilhelmshaven and Kiel, with Kiel Bay and the Baltic beyond, are admirably designed for both launching an attack or receiving one. The Kaiser Wilhelm Canal—commonly called the Kiel Canal—is shown on the map in exaggerated proportion to the scale on which the map is sketched in order to render its naval importance more apparent. From Kiel harbor by means of the canal the force of warships at Wilhelmshaven can be quickly reinforced, or the entire German fleet can be massed at either end, should any foreign fleet attempt an attack from the North Sea or Baltic side. A glance at the map will show why the North Sea defences are considered impregnable—adding mines to defences marked on the map. Kiel harbor is fortified and in addition to the built defences on the North Sea, nature has added shoals and islands, Heligoland, given up to Ger-

many by Lord Salisbury, being a first protection of immense strength. As the map shows, Heligoland has on its bluff shores a fortress of very high class, mounting long-range disappearing coast guns of heavy calibre, and three very large hangars or sheds for war aircraft, on pivots to turn the open side to wind from any quarter. Similar accommodation for Zeppelins and smaller aircraft exist at Kiel, Hamburg, Cuxhaven and Wilhelmshaven. A great deal has evidently been expected by Germany to be gained from airships in disposing of British and French men-o-war. Bremerhaven, Wilhelmshaven, Cuxhaven, the island of Newwerk, Brunsbuttel, Gluckstadt and Kiel are fortresses. Additionally there are forts facing each other across the entrance at the mouth of Kiel harbor, eleven more on the shores of the Elbe, ten forts and batteries behind Wilhelmshaven and on its sea front. All these works mount the heaviest ordnance made by Krupp. Many of the guns are protected by Gruson turrets stationed to be impervious to gun fire. In addition to works of defence, as a naval base Wilhelmshaven and Kiel are, from a naval point of view, admirable. The Brunsbuttel entrance is

1500 feet by 328 feet, that at Kiel six miles by one and a fourth miles wide. At Kiel are immense docks, both large and small, a drydock sufficient to take their greatest ship—the Moltke—and every sort of storehouse. At Wilhelmshaven, as at Kiel, are large docks and repair shops. The canal is sixty and one-quarter miles long. It begins a mile and a half east of Brunsbuttel, follows first a northeasterly course, then east and then a little to the southeast, ending at Wik, two miles from Kiel town. The canal is crossed by two high level permanent bridges, 137 feet above the water, six drawbridges and sixteen ferries; there are six turnouts. There are two locks, one two miles from the mouth at Brunsbuttel, the other about two miles from Wik. They are 492 feet long, 82 feet wide, 31.3 feet deep; their necessity was occasioned by the difference of levels in the Baltic and on the Elbe, occasioned by winds and tide. The canal cost Germany \$100,000,000. In its operation for war purposes, torpedo boats to the number of fourteen have passed through the locks in ten minutes. Torpedo boats make the passage of the entire canal in 6

hours, cruisers 7 hours, battleships of the Sachsen class, 12 hours, and the Great Moltke in 13. Four battleships have made the passage a thousand yards apart in 10½ hours, average speed five knots. At the time these battleships made the passage the transit of merchant steamers continued with but slight interruption.
The strategical value of the German naval base is the whole of the German naval war proposition—against England first and then against France. From the canal to Hull on the English coast is 382 miles, to London 381, to Dover 368. As the value of the canal increases for Germany's offence, so, in case of blockade, as now maintained by British and French fleets, are increased the difficulties of successful blockade. For a western fleet observing the Elbe or an eastern fleet observing Kiel would be liable to be taken in the rear by a German fleet that has passed the canal and sailed round Denmark—600 miles—always supposing that Danish and Swedish policy admitted of an unopposed passage through the Sound or the Belt. Without the good will of these countries the canal makes Germany independent of them.

NORTH THETFORD.
Another of the old respected citizens passed peacefully away on Sunday August 23, in the person of Mr. L. Loughrea at the age of 80 years. During his illness of only nine days he was surrounded by his family and friends, and everything that medical aid or loving care could do was done, but it proved of no avail, and on Sunday evening he passed away. Mr. Loughrea was a man who spent his life in doing good. He loved everything in life that was good and true. He was loved and respected by every denomination, was an exemplary Christian and was missed from church only when compelled by sick-

EARLY SUMMER IN ENGLAND.
(Boston Transcript)
Now is the sweet o' the year when every one who has the chance moves outward like an eddy-wave in a pond to that most arduous and gorgeous country in which London is set. North and west in Middlesex and Herts and Bucks the wild cherries make every wood and spinney into an orchard. In Surrey the orange is aflame and every house up into the suburbs is set in white blossoms like a daisy in its petals. Kew gardens beyond its expected garden beauties, is now in the wilder parts, as wisely preserved by Queen Victoria, an aviary of singing birds. You may

STANBRIDGE EAST.

A tea and lawn party will be given
on the Rectory lawn on Tuesday af-
ternoon, Sept. 1. Amusements will
be arranged for, and a pleasant time
is anticipated. It is under the aus-
pices of St. James' congregation.

The Willing Workers of St. James' church gave an entertainment in the
Parochial Hall on Saturday of last
week, and the programme, which was
much enjoyed, opened with "Rule,
Britannia," in which the audience
joined in the chorus. A farce, Sew-
ing Circle of the Period, came next
and there followed: song by Mrs.
H. Baker; recitation by Miss Isabel
Moore; violin solo by Mr. Montague
Rice; song by Mr. W. Henderson; re-
citation, "England Calls," by Mas-
ter Clifford Richeard; piano solo by
Miss Isabel Moore; song, Mrs. S. P.
Knight; recitation by Mrs. A. E. Moore;
"Soldiers of the King," in which
the audience joined in the chorus;
"God Save the King," closed this
part of the proceedings, after which
refreshments were served. The Re-
ctor thanked the Willing Workers
for their services, and specially the
visitors who helped, including Mrs.
A. E. Moore, Miss Isabel Moore and
Mrs. M. Rice. Mrs. M. A. Cornell
was the accompanist. The proceeds
amounted to \$30.

The Rector of St. James' Church
hopes that it will be understood that
St. James' Church is always open, and
at the present time may be con-
stantly used by people who wish to
pray for those engaged in the war
and for the blessing of a righteous
and abiding peace. Suitable pray-
ers, intercessions and hymns will be
used at all the public services during
the present grievous war.

SUTTON.

The last meeting of the W.C.T.U.
was held at the residence of Mrs.
Wm. Seal. At the conclusion of the
devotional exercises the president,
Mrs. Catter, opened the meeting for
the transaction of business. At the
conclusion of the usual routine work
a letter was read from Mrs. Seal,
county president of the Stanstead W.
C.T.U., giving some interesting de-
tails of the campaign in that county,
the subject matter of which was
highly appreciated by the listeners,
who voiced a strong hope that Brome
county would soon see the prohibi-
tion banner floating over it as it
proudly waved for twenty years in
the past. Fair work being the topic
for discussion, the superintendent of
that department, Mrs. C. Mudgett,
gave a report of work done in get-
ting a booth ready where the differ-
ent unions of the county could find
a rallying point on the grounds of the
county fair. Money was voted to
purchase 200 tracts, 400 leaflets and
other temperance literature for
distribution at the fair. The chief
topic was the coming meeting of the
Brome County No-Licence League for
the opening of a prohibition cam-
paign if it was thought advisable
for Brome County. The following la-
dies were elected delegates to attend
the meeting held in Knowlton on the
27th inst.: Mesdames H. Allen, T.
Jordan, C. O. Smith, alternates,
Mesdames F. Robinson, C. Woodard,
M. Oliver.

The banner which Mrs. Oscar West-
over offered to donate to the union
in memory of her mother, the late
Mrs. Alvin Tupper, was gratefully
accepted by an unanimous vote. The
meeting closed with the usual cere-
monies, after which a delicious lunch
was served by the hostesses, Mes-
dames William and John Seal. There
was, despite the very bad weather,
a very good attendance, thirty-
five members being present. The next
meeting of the W.C.T.U. will be held
at the residence of Mrs. S. Tryhorn,
in the Olmsted neighborhood, on
Friday next at 3 p.m. Seven large
bouquets of flowers were sent to Mon-

URGED TO PUT IN CROP OF FALL

RYE AND FALL WHEAT—A
PATRIOTIC ACT

Do you wish to serve the Empire
and at the same time secure an ex-
cellent return from your labor? Then
adopt the following plan which is be-
ing widely advocated by Mr. John
Fixter of Ottawa.

Mr. Fixter says:—There is an ur-
gent call for farmers to sow Fall Rye
and Fall Wheat all high and fair-
ly well sheltered land.

Owing to the war condition of our
country, wheat and rye are bound to
be scarce and high priced next spring.
Farmers should plow their land im-
mediately and keep it thoroughly cul-
tivated till the end of the first week
in September then sow either fall
rye at the rate of one and a half
bushels to the acre or fall wheat at
the rate of one and three quarter
bushels to the acre.

On poor soils a peck extra per acre
should be sown.

Farmers having breakable stubble
land which they wish to seed with
timothy, for a hay crop next year,
should seed down with 12 pounds of
timothy seed per acre along with
their fall grain.

C. H. Hodge, the Agricultural De-
monstrator at Richmond, will send
in orders for the seed, or it may
be obtained direct from the follow-
ing seedsmen:

For fall wheat, send for Dawson's
Golden Chaff, from Geo. R. Barrie,
Galt, Ont.

For fall Rye send to A. M. Col-
lier, Simco, Ont.

Probably any demonstrator in the
Eastern Townships would be perfect-
ly willing to render the same service
in his own county.

URGED TO PUT IN CROP OF FALL

RYE AND FALL WHEAT—A
PATRIOTIC ACT

Do you wish to serve the Empire
and at the same time secure an ex-
cellent return from your labor? Then
adopt the following plan which is be-
ing widely advocated by Mr. John
Fixter of Ottawa.

Mr. Fixter says:—There is an ur-
gent call for farmers to sow Fall Rye
and Fall Wheat all high and fair-
ly well sheltered land.

Owing to the war condition of our
country, wheat and rye are bound to
be scarce and high priced next spring.
Farmers should plow their land im-
mediately and keep it thoroughly cul-
tivated till the end of the first week
in September then sow either fall
rye at the rate of one and a half
bushels to the acre or fall wheat at
the rate of one and three quarter
bushels to the acre.

On poor soils a peck extra per acre
should be sown.

Farmers having breakable stubble
land which they wish to seed with
timothy, for a hay crop next year,
should seed down with 12 pounds of
timothy seed per acre along with
their fall grain.

C. H. Hodge, the Agricultural De-
monstrator at Richmond, will send
in orders for the seed, or it may
be obtained direct from the follow-
ing seedsmen:

For fall wheat, send for Dawson's
Golden Chaff, from Geo. R. Barrie,
Galt, Ont.

For fall Rye send to A. M. Col-
lier, Simco, Ont.

Probably any demonstrator in the
Eastern Townships would be perfect-
ly willing to render the same service
in his own county.

There is much speculation as to what the air craft are doing in the Eastern Townships. An airship was seen at Noyan and another is reported from Richmond. Besides, fully a dozen people declared they saw an aeroplane hovering over Sherbrooke the other night. Where do they come from and what is their mission? It may be recalled, however, that a few years ago there was a similar mystery, regarding a supposed airship, which proved to be the evening star, which is particularly bright at this season of the year.

THE SPENDTHRIFT

The above drama from the pen of Porter Emerson Browne was presented at His Majesty's Theatre, last evening, and proved one of the best attractions of the season. Few productions have been staged in this city, where the characters were so clear cut and distinctive.

As the title implies Mr. Browne's play deals with financial extravagance, set in the framework of a modern household. It is the story of an extravagant wife, who lives far beyond her husband's income. Louise Price realized to perfection the role of the luxury-loving extravagant wife, and Murray Barnard, as the husband, was a tower of strength to the company.

The only regrettable feature of the evening was the very small audience.

RICHFORD BOY HAS HAND CRUSHED

Richard Currie, Sept. 1—(Special)—Harold Currie, employed in the Richard Mig. Co.'s furniture factory, had a narrow escape from possibly fatal injury on Thursday of last week. He was running a "sander," a machine for smoothing furniture stock, when his right hand was caught between the rolls and he would have been drawn into the machine but for the opportune nearby presence of J. R. Nichols, another operative, who heard the boy's scream and quickly reversed the machine. The hand was badly crushed to the wrist.

ISSUE WARNING

Editor Record,
Dear Sir:—The farmers of Moulton Hill have combined to protect themselves from the hunter. Horses and cattle have been killed, and children wounded. Houses have been struck and many farmers can tell how it feels to have a bullet whistle by, close to their heads. When the young tough from the city goes to the country he is "Big Injun" and such things as stoning cattle, seriously injuring them, breaking windows, tramping down grain, opening pasture gates, and robbing orchards is fun for him.

Advice is said to be cheap, but some of the hunters may learn that Judge Mulvenga's isn't.

Yours, etc.

WHERE THE ENGLISH CHANNEL FLOWS

Richmond, Sept. 1—(Special)—The following song composed by Mrs. Genevieve Jimenez, of Coaticook, was sung by her at the local opera-house, last night, and made a great hit. It is sung to the tune of "Where the River Shannon Flows." Mrs. Jimenez was heartily encouraged.

There's a little fleet waiting
Where the English Channel flows,
And why Germany wants to pick on her

The Good Lord only knows.
But we'll be there to meet her,
With shot and shell we'll greet her,
And to cannon balls we'll treat her,
Where the English Channel flows.

CHORUS

England may call on Ireland, Scotland, Australia too,
But she won't forget her Canadian boys for she knows what they can do.
In South Africa they won the day
Against Old England's Foes.

Now we'll show the world what Canada can do—where the English Channel flows.

Now there is trouble brewing
Where the English Channel flows,
And their call for men we've answered.

As everybody knows,
In bravery we'll never lack
And before our boys come back
They'll win victories for the Union Jack.

Where the English Channel flows.

CHORUS

In each heart that's gone to battle
There are letters written fair,
C-A-N-A-D-A—and they're proud that they are there.
Oh mother, wife, that's left behind,
Just dry the tears that flow,
And be proud the boys have gone to fight
Where the English Channel flows.

MARRIAGES

MOTTRAM-SEARLE.

A quiet but pretty wedding took place at the Church of the Advent, East Sherbrooke, on Saturday afternoon, August 29, when Miss Florence Searle, of Sherbrooke, was united in marriage to Mr. Sidney Mottram, of East Angus. The ceremony was performed by the Rev. Vere Hobart. The bride, who was given away by her stepfather, Mr. William Henderson, was charmingly gowned in white silk covered with shadow lace and white hat with white ostrich feather. The bridesmaid, Miss Rose Mottram, sister of the groom, was prettily gowned in crepe dress of Alice blue, and white hat trimmed with roses. The groom was attended by the bride's brother, Mr. George Searle.

Those present were Mrs. W. Henderson, Miss E. Henderson, Miss Martha Mottram, Mr. Frank Smith, and others. After the ceremony the young couple and party motored to the home of the bride's mother, on Ball street, where supper was served and a very enjoyable evening spent. The groom's gift to the bride was a crescent shaped gold brooch set with pearls. They received very many useful presents, including silverware, cut glass, mantel clock, checks, etc. The young couple left over the Q.C.R. on Monday morning for their future home in East Angus.

week tea will be served by Mrs. Otis Sburttell and Mrs. Thos. McCurdy. The players of the Club expected to go to Waterville on Saturday to play a match there but were prevented by the rain.

RUSSIA'S LAND FORCES

(Army and Navy Journal)
It would be too long a task to enter into a detailed account of the measures taken by Russia to bring up her land forces to what might be expected of her. However, some salient features among these are worth noting at this time. The new recruiting law of 1912, cut down greatly the number of exemptions from military service. Another law that went into effect last December was a response to the increase in the effectiveness of the other great powers. This increased by three months the legal service of the soldier and gave more of solidarity to the army by virtue of the fact that the recruits which began their term in the autumn finish their instruction on April 1, instead of January 1 as formerly. Without in any way modifying law of 1912, it was decided also to increase the efficiency of the troops. Beginning with 1913 each year was to see 25,000 more men called to the colors than formerly, and when the result of this augmentation would begin to be felt Russia could proceed to the creation of great military units. Hence it had recently been announced that Russia would soon form three new army corps.

The instruction of the troops has been made the object of incessant study since the Japanese war. All the drill regulations have been revised since the close of that war, and the most recent. All are inspired by the very modern military ideas. In all these regulations the dominant idea is that everything should be subordinated to preparation for war, and the entire new Russian system tends to develop the desire for the offensive and the initiative, characteristics of Russian military activity that have not been conspicuous in previous campaigns. Russia has gone in heavily in the improvement of her war material. The financial sacrifices which the country has made in the last few years prove the concentration of its thought upon well-defined military object. The ordinary war budget of 1914 reached 1,600,000,000 francs, an increase of 128,000,000 over the preceding year. The expenditures were designed to renew little by little the firearms of the service, to give more pieces of modern calibre to the field artillery, to increase the material for the fort artillery and of the engineers, to build forts along the western border and to create or to increase the technical.

300 Letters on Grain of Wheat

Perhaps the greatest feat of microscopical engraving was accomplished by a Jewish farmer in Alberta, who prepared an address of welcome to the Duke of Connaught. The address was inscribed in Hebrew on a grain of wheat and contained no fewer than 300 letters. So fine was the lettering that a microscope was necessary to read the inscription with any ease.

WANTED Rags!

Millions of dollars' worth
of Rags collected
annually

The General says:

My output of **Certain-teed** Roofing has grown to such enormous proportions that I am having difficulty in getting enough rags of good grade to supply this demand.

I also need a lot of rags of lower grade for making my standard quality roofing, and also a still lower grade for making my Competition quality roofing.

I will pay the best market price for roofing rags anywhere in any quantity. If they can be shipped in carload quantities and in assorted grades, we can have them shipped direct to any of our big mills, but if in smaller quantities or unsorted, we will arrange with one of our packers or sorters near you, to buy your rags and prepare them for our use in the different grades.

Churches, Societies, Charitable Institutions and others are making good revenue by collecting all kinds of old rags. We consume scores and scores of tons of these rags every day—in fact the total rag sales of the country amount to several million dollars a year. It's an easy way to make money. The rags are generally given to the collectors or at least sold for very little. Every kind of rag can be used for something. Use this plan to pay off your church debt or raise the minister's salary. The results are surprising.

PATRIOTIC ASSOCIATION

Announced That Total Col-

to \$2,844

AT MEETING OF WOMEN YES-
TERDAY PLANS ARE FUR-
THER ADVANCED.

A meeting was held yesterday afternoon in the Art Hall of the Patriotic Association of the women of Sherbrooke. Mrs. C. H. Bowen was in the chair and called the meeting to order, after which Mrs. T. M. Craig, the treasurer, reported the contributions to the Patriotic Fund up to date, the sum amounting to \$2,844.

After sending a cheque for \$1,000 to the Hospital Ship Fund, and with certain other expenditure, the balance on hand was \$1,613.18. Assistance had been given to the families of two men, one of whom had been called to join his regiment, and one who had volunteered, enabling them to return to England, where they had friends.

The chairman said that the report was most satisfactory and that the association owed a debt of gratitude to Mrs. Pilcher and Mrs. Craig, who had rendered all possible aid personally to the families mentioned. Letters were read from various officials in Ottawa and Montreal, in regard to the work to be undertaken by the Association, also a letter from Walter Blue & Co., placing all their power sewing machines and work-room any Saturday afternoon at the disposal of the work committee for making clothing, etc., also the services of their cutters. Mr. G. Richard, druggist, East Sherbrooke, expressed his willingness to fill all prescriptions free of charge for the families of the men of the Sherbrooke contingent. The secretary was requested to accept the generous offers with appreciation.

Two hundred dollars has already been subscribed by the citizens. The Ladies of the town have recently organized a Patriotic Association. The officers are: President—Mrs. P. A. Roy; 1st Vice President—Mrs. J. L. Roy; 2nd Vice President—Mrs. Fred. Start; Secretary-Treasurer—Mrs. J. A. Gifford. Over \$200 has already been raised.

COUNCIL MEETING WAS A FARCE

Two Aldermen Refuse to Take
Place at Council
Board

THUS BLOCK ROAD COMMIT-
TEE'S PLAN TO PROVIDE
WORK ON ROADS.

Citizens who went to the City Council chamber last evening to attend the City Council meeting witnessed a farce, as disgusting to the taxpayers as it was absurd. While five of the City Aldermen sat at the Council board, two of the city representatives remained in the outer chamber, refusing to enter the Council chamber, and thus preventing a quorum, and making it impossible to go on with the business of the evening.

It appears that the Road Committee, under the new chairman, Ald. Forest, had prepared a programme of necessary road work, to the extent of the appropriations available, and which would give employment to a number of men for some weeks. This was considered by the Road Committee as a whole and unanimously agreed upon.

A section of the Council, however, had formulated a plan to dismiss the road superintendent, Mr. Beaman, and was determined to put this through. The Road Committee was opposed to this, and, as stated above, had prepared a recommendation for certain road work to be proceeded with.

Had there been a meeting last night the Road Committee's report would have been put to work at once under the superintendence of Mr. Beaman. Aldermen Brault and Denault refused to take their places at the Council board, which, in the absence of one or two other aldermen, prevented a meeting.

Grand Rapids, Mich., Sept. 1.—(Special)—Many persons are believed to have been fatally injured, if not killed, shortly after four o'clock this morning, when the Grand Rapids and Indiana train, No. 19, known as the "North Land Flyer," went into a ditch two miles north of Kalamazoo. It is said the entire train, consisting of twelve coaches, left the track.

TO MOVE FRENCH CAPITAL

BORDEAUX, IT IS SAID, WILL BE
MADE SEAT OF GOVERN-
MENT

Washington, Sept. 1.—France is considering the advisability of moving the seat of her government from Paris to Bordeaux, as a precautionary measure, according to official advice received here.

The French foreign has discussed the idea of moving the capital, with foreign diplomats, so that they could make proper arrangements. It is considered most probable that Ambassador Herriek will remain in Paris in order to better care for Americans should Paris be invested by the German army.

Seven Wonders of the World

A voting contest has recently taken place in Germany to decide which are the seven wonders of the twentieth century. After the enormous volume of votes cast were counted, it was found that the majority had placed wireless telegraphy at the head of the list and the Panama Canal second.

The third of the seven wonders, it was decided, is the dirigible airship; next in order were the flying machine, radium, the cinematograph, and the steamship "Vaterland."

Good Times Ahead

THE sudden breaking out of war caused many to "run to cover." Like the chicken on whom the rose leaf fell, some of us became a prey to fear and were ready to declare "the sky is falling."

Now our vision is clearing, our alarm has fled, we have recovered our poise and our courage. We are seeing, also, our opportunity. Swiftly and almost overwhelmingly has come to us the perception of the fact that the competition of Continental Europe has been taken away. We are faced with a condition and an opportunity both tending to our advantage as a country of industry, agriculture and trade. Good times are ahead, if Canada and Canadians see and seize the present opportunity for enlarging their industries and trading.

We must be careful We must have courage

BIG BUSINESS BOOM IS ANTICIPATED

Likely Effect of War Upon
Canada and Britain

SUBJECT INTERESTINGLY DIS-
CUSSED IN OFFICIAL LET-
TER FROM CAPITAL.

Ottawa, Sept. 1.—(Special Official Letter)—Will the war necessarily ruin British and Canadian trade? Before we are quite certain that it will, certain considerations should be weighed. History furnishes certain examples which afford a distinctly cheerful augury.

Two main features need examination. These are:
1.—The question of sea transportation. Will British ships be captured, and shut up in harbors, will insurance rates run up, and will freight rates increase?

2.—The question of trade itself. Will the interchange of commodities be greatly lessened and manufacturing be cut down?

First of all, it must be noted that the first few weeks of the war will not represent the real characteristics of its commercial side. A certain paralysis is to be expected at the outset, due to uncertainty and change of conditions. It is a century since there was so serious a war, and since there was any widespread fighting on the high seas; and it is natural to expect that manufacturers, merchants and ship-owners, who all their lives have experienced peace conditions, and peace conditions only, for a few weeks will be excited, apprehensive, and uncertain as to developments. Once they have grasped the new conditions they will set out to adapt themselves to them, and a revival of activity is to be expected. Especially will they be ready so to adapt themselves when new opportunities are set before them.

Secondly, in the past the trade and shipping of the British Empire have not suffered, as a whole, from war. Instead they have thrived upon it. During the great war between Great Britain and France from 1793 to 1815, British trade and shipping increased enormously, and this in spite of Napoleon's continental system, which was an attempt to have Britain boycotted by the whole of Europe. Here, for example, is a statement by a contemporary writer:

"During all the operations of war and finance, the gains of our enterprising people were beyond all calculation, however the unproductive classes may have suffered from the depreciation of money and the inequalities of taxation. Our commerce has become more than double its greatest extent during the happiest years of peace."

Figures bear out this assertion. In 1792, in peace time, the imports and exports of Great Britain amounted to \$216,500,000. In 1796, after three or four years of war, they stood at \$261,000,000. In 1800 they had risen to \$358,000,000. Throughout the Napoleonic struggle the trade of the United Kingdom steadily increased.

These opening observations made, let us look at the two features of the situation just noted. First, as to attacks upon merchant ships by the enemy's warships or privateers.

In the great French war, from 1793 to 1815, there was almost incessant war upon the high seas, and for nearly all that period the French devoted their whole energy to commerce destruction. What followed? For one thing, French commerce itself disappeared. In the year ending 20th September, 1800, the whole of the direct trade between France and the three continents of Asia, America and Africa amounted to only some \$350,000,000, while that of Great Britain was \$350,000,000. For another thing, with all the activity of French war-

ships and privateers, the losses of British shipping were not more than 2 1/2 per cent. a year, and probably were under 2 per cent. Wherever full and skilful arrangements made, the losses were lower. One very perilous region in the East a particularly able officer, certain precautions and the loss from capture fell to a lower figure than those from the ordinary navigation.

GERMAN CRUISERS BUSY RU- NING AWAY.

The German cruiser which tries to do commerce destroying to-day has a difficult task. The seas swarm with British cruisers; many of them are slower than the very fast ships which Germany just now has in the Atlantic and Pacific, but most of them are larger and carry heavier guns. They are carefully placed, so that wherever, on the Atlantic at least, the German cruiser goes, she is likely to find waiting for her a ship too heavy to fight. Meanwhile, she is burning her coal. Hanging over her is the menace of the wireless, that ship long before she is taken, for the chase will take time, will have given notice to every British cruiser within a thousand miles of the German's whereabouts, and a ring of enemies will be converging upon the corsair before she has eluded her prey. The recent brush between the Karlsruhe and two British ships excellently illustrates the system. The Suffolk found the Karlsruhe coaling and chased her; the Karlsruhe outsteamed her and in a few hours was out of the Suffolk's sight. But the Suffolk had summoned by wireless the Bristol, and this ship was lying ahead of the fleeing German, waiting to take up the chase. Again the Karlsruhe, which is a very swift ship, outsteamed the protector of commerce and got away. But, apart from any damage done by the British ships, there is this fact to consider: that the Karlsruhe spent a day or two steaming at her highest speed, and must have used up at least four hundred tons of coal which it will puzzle her captain to replace, and all she carries is 1,200 tons. A very few weeks of this scientific hustling along, handling her over from one commerce defender to another, will see her with empty bunkers, a helpless hulk. The war is nearly three weeks old, and the German cruisers to the date of writing are not known to have captured one merchantman in the Atlantic ocean or off the Pacific coast of North America. The Karlsruhe, for example, has been too busy running away to do much chasing of merchant ships.

Even if a German ship captures a merchantman her difficulties will not be over. What will she do with it? If she sinks it she will have to take the crew on board, and high speed cruisers have little accommodation for passengers or prisoners. If she puts a prize crew on board she will weaken her crew—the Leipzig, for example, carries fewer than 300 officers and men—and then she will not know where to send her prize, which will stand little chance of navigating the North Sea into a German port. These considerations do not exhaust the difficulties which beset the attack upon British commerce of to-day. But they indicate this: that when conditions have settled down the risk of capture will be simply one more seafaring risk, probably considerably less than that of colliding with icebergs at certain seasons of the year.

STATE INSURANCE AND FREIGHT RATES.

And finally, so far as freight rates are concerned, there is the fact of State insurance. A system of this has been put in force in Great Britain, and if any captures do occur the public treasury will bear the greater part of the loss. If steamship rates rise, it will be due to press of business rather than to danger. The powerful competition of the German mercantile marine will be moved, and the British mercantile marine will have more business than ever on its hands.

VOLUME OF TRADE.

So much for ocean freight. The next great consideration is the volume of trade which will offer. Here the general fact is that Germany and Austria are cut off from the trade of the whole world. No small part of the goods which they

Prince Oscar.

One of the Sons of the German Emperor.

normally sell to other nations must be sold by others. Great Britain, for instance, will cease to buy huge quantities of goods from them; some of these the other parts of the Empire can supply. We in Canada shall cease to buy great quantities of German and Austrian goods—we shall buy them from Great Britain. The total volume of trading in the world will diminish, because so many men are withdrawn from industry, and capital will be absorbed in financing the war; but an immense amount of trade will continue, and this will be rearranged. The United States, Japan, China, and many other countries will be clamoring for goods which Germany has been supplying. So far as the British Empire is concerned, there will be redistribution of trade rather than diminution. Agricultural produce plainly will command higher prices, and if Canada's basic industry is kept prosperous the others will have an opportunity to steady themselves.

What is needed is a cool and steady frame of mind. The trade of the world is not going to stop. Ships still will furrow the sea, and men still will produce and buy and sell. A stout hearted determination to adjust our industry to new conditions is what the situation demands.

ALPINE MANOEUVRES.

(Boston Transcript.)
A correspondent in Zermatt notes that as late as the Fourth of July the season of climbing had hardly opened and that the Matterhorn was still unascended. Everyone was, however, daily expecting the major ascents to be accomplished, but till then only the Dome and Monte Rosa had had their early visitors. "The time just now seems favorable," the letter goes on, "although indeed the recent cold and snows have hitherto hardly been encouraging." Monte Rosa was climber by a skier with Joseph Knobel for guide, and there seems to be little reason why the Norwegian shoes should not be used more frequently. The ascent of the Dome was made from Randa June 30 by Baron von Neuringer with Joseph Taugwalder and Joseph-Marie Julien. It was in the midst of fine weather with remarkable prospects. The alpinists report here as elsewhere that there is an unusual amount of snow in the upper country.

COL. WORTHINGTON AT VAL-CARTIER.

Lt.-Col. E. B. Worthington who was telegraphed from the Camp at Valcartier last week, has been placed in command of the 1st Battalion, 1st Brigade of Infantry, two thousand men. It is possible that Col. Worthington may go to the front.

THERE ARE ABOUT 130 MEN FROM SHERBROOKE AND VICINITY IN THE BRIGADE

Montreal, Sept. 1.—It is stated, semi-officially, that the second brigade field artillery which comprises the 4th, 5th and 6th field batteries, with an ammunition column, with units from Montreal, Westmount, Sherbrooke, Moncton and Sidney, under the command of Lt.-Col. J. J. Creelman, will go to India to replace the white troops there who will be called to the front.

The brigade is now in camp at Valcartier, and is almost at war strength, being 758 officers and men (and 744 horses) and armed with the latest 18 pounder guns.

ANNIVERSARY OF SEDAN

Forty-Four Years Ago To-Day

France Met Disaster at Hands of Germans

NAPOLEON III. WAS CAPTURED WITH 39 GENERALS AND 83,000 MEN

London, Sept. 1.—Today is the forty-fourth anniversary of the battle of Sedan, the disastrous conflict of the Franco-Prussian war of 1870, which ended in the capture of Napoleon III., Emperor of the French, and the entire French army under Marshall McMahon. In that battle, the most decisive of the great struggle of 1870, the Germans captured, in addition to the Emperor of the French, 39 generals, 230 staff officers, 2,000 line officers and 83,000 men. The fortress of Sedan was the centre of the struggle. The surrender followed a complete investment of the place by the Germans, who had occupied the surrounding heights, and whose artillery placed in splendid positions, raked the front into submission and surrender.

Today is the anniversary of that battle and France and Germany are once more at war.

ENGLISH FORCE AT OSTEND

ARE BELIEVED TO BE ON WAY TO STRIKE REAR OF GERMAN

Antwerp, Sept. 1.—Large numbers of troops were landed secretly at Ostend all during the night and marched through the town in a southerly direction.

The troops are believed to be English forces on their way to strike the rear of the Germans, a move which would presumably greatly weaken the German armies fighting the Allies in France and cut off the communications of the Kaiser's forces.

The landing of the troops took place under cover of darkness and it was not until four o'clock in the morning that the last man was ashore. It is said that several British transports have been lying off Ostend and that other troops will be landed tonight. No one is allowed to approach the wharves at Ostend, all who approach them being challenged by British marines.

The British press bureau announced last week that marines had landed at Ostend. Dispatches from London later indicated that the marines were the forerunners of a large British expeditionary force.

SUDDEN DEATH AT LENNOXVILLE

TAKEN ILL WHILE AT WORK—LIVED ON KIPPEN PLACE FOR MANY YEARS

Mr. H. V. Morgan of Lennoxville, died suddenly last night from heart failure following an attack of acute indigestion.

He was in his usual health until Monday afternoon when he was suddenly taken ill while at work. Mr. Morgan, who was a farmer, had lived in Lennoxville many years and was highly respected by all who knew him and his loss will be deeply deplored.

He was 56 years of age and leaves a widow and two sons.

Mr. Morgan lived on the farm formerly owned by Mr. Kippen.

The funeral arrangements will be made known later.

FOUR BRIGADES INSTEAD OF THREE

Reorganization of the Troops at Valcartier Has Been Made

MONTREAL AND TORONTO REGIMENTS WILL GO AS SEPARATE UNITS TO THE FRONT

Valcartier, Que., Sept. 1.—An official statement was given out by Col. Williams, camp commandant, last night, that the entire camp was being reorganized into four brigades instead of three. Up to the present there have been twelve batteries, but as Col. Sam Hughes announced in his speech to the officers yesterday afternoon, four additional batteries are to be established. This means the appointment of four battalion commanders and another brigadier, the present brigadier commanders being Col. Turner, V.C., D.S.O., and Lt.-Cols. Mercer and Rutan. With the reorganization of the camp, four regiments considered about the strongest numerically and in other respects in Canada, will be made separate units. These are the Queen's Own Rifles, commanded by Lt.-Col. Mercer, and the 48th Highlanders, commanded by Col. J. A. Currie, M.P., of Toronto, and the 5th Royal Highlanders and the 1st Royal Montreal Rifles, of Montreal, under command of Lt.-Col. Loomis and Lt.-Col. Meighen respectively. The fact that these regiments would remain intact was generally anticipated, but no definite information came out until last night.

ARTILLERY FOR INDIA

Semi-Officially Announced That Men of Field Artillery Will Not go to Front

THERE ARE ABOUT 130 MEN FROM SHERBROOKE AND VICINITY IN THE BRIGADE

Montreal, Sept. 1.—It is stated, semi-officially, that the second brigade field artillery which comprises the 4th, 5th and 6th field batteries, with an ammunition column, with units from Montreal, Westmount, Sherbrooke, Moncton and Sidney, under the command of Lt.-Col. J. J. Creelman, will go to India to replace the white troops there who will be called to the front.

The brigade is now in camp at Valcartier, and is almost at war strength, being 758 officers and men (and 744 horses) and armed with the latest 18 pounder guns.

Lieut.-Col. Penhale is in command of the ammunition column, and in both units there are about 130 men from Sherbrooke and district.

HORRIBLE STORY OF SLAUGHTER

Germans Are Reported to Have Butchered 300 Citizens in One Party

AMONG THE VICTIMS AT LOUVAIN WERE THE MAYOR AND OTHER PROMINENT MEN

London, Sept. 1.—A correspondent of the Daily News sends the following despatch from Rotterdam: "Further ghastly stories continue to reach me of events in Louvain last Tuesday and Wednesday. A Dutch gentleman of Louvain, one of the notables of the town, with his wife fled to Breda, stating that at 9 o'clock Wednesday morning when with a number of other prominent citizens he was standing around the railway station, a squad of soldiers drove a squad of about three hundred men and boys to the corner of Boulevard Vanthienen. They poured volley after volley into the crowd till all were dead."

"The sight was a sickening beyond all power of description. Among those publicly shot were the mayor, the principal of the university, and the heads of the police force."

Financial and Market News**DAIRY PRODUCE**

BUTTER TRADE BECOMING MORE ACTIVE

Montreal, Sept. 1.—The butter market throughout the week was rather quiet owing to the lull in the demand from outside sources, but the impression among the trade is that Vancouver buyers and English importers will have to replenish their supplies in the near future and trade will become more active. There has been some business done in round lots of finest creamery at 28c, 28½c and 28¾c per lb., but judging from the prices paid in the country, and at the auction sales, and at Gould's during the week there is a stronger feeling in the market and wholesale prices on spot will more than likely be advanced this coming week.

There was not so much excitement on the St. Hyacinthe Board, as prices were only advanced ¼c per lb. over last week to 28c, which is ¼c per lb. higher than a year ago. At the Quebec Cooperative Society auction sales this week there were offered 1,255 packages of creamery butter, of which the finest lots sold at 28c to 28½c, as compared with 27½c last week, and at Gould's 2,300 packages were sold at 27½c to 28c, as against 27c to 27½c last week. Owing to the increased receipts for the week the total shortage for the season to date has been reduced to 60,729 packages.

We quote prices as follows: Finest creamery, 28c to 28½c. Fine creamery, 27½c to 27¾c. Seconds, 26½c to 27c. Manitoba Dairy, 23c to 24c. Western Dairy, 24c to 24½c.

CHEESE MARKET FIRM

Montreal, Sept. 1.—There has been considerable strength and some excitement in the cheese situation this week, which may be attributed to the increased demand from over the cable and the keener competition between buyers here for supplies, consequently prices at the boards throughout the country were advanced ¼c to 1 ¾c per lb., the highest prices paid being 14½c to 14¾c at Van-klee Hill, and the lowest 13½c at Woodstock, but the bulk of the purchases were made at from 14½c to 14 9/16c. The demand during the week was principally from London buyers and quite an active business was done with this port, but owing to the stiff advance in prices exporters have been obliged to ask for shipments next week on account of the high prices paid in the country they dropped out but there was a more general enquiry from other English sources, which, however, did not result in much actual business at the advanced prices on account of the fact that cables received state that the Imperial Government have stepped in and fixed the price of cheese at what retail stores will have to sell at which does not permit importers paying the asked advance by exporters.

We quote prices as follows: Finest western colored, 14½c to 14¾c. Finest western white, 14½c to 14¾c. Finest eastern colored, 14½c to 14¾c. Finest eastern white, 14c to 14½c. Undergrades, 13½c to 13¾c.

COUNTRY PRODUCE

EGG PRICES HIGHER

Montreal, Sept. 1.—There is no actual change in the condition of the egg market, but the undertone is stronger, and prices are tending towards a higher level; in fact, dealers at country points are now asking an advance of 1c per dozen, but this up to the present has not been established. The demand is good for local consumption and an active trade is doing in all grades. Supplies continue to come forward freely, and show a good increase over last year for the same period.

We quote prices as follows: Straight receipts, round lots, 23½c to 24c. Straight receipts, single lots, 24c to 25c. Selected stock, single cases, 28c to 29c. No. 1 stock single cases, 24c to 25c. No. 2 stock, 21c to 22c.

MAPLE PRODUCE STEADY

Montreal, Sept. 1.—The tone of the market for maple product remains steady with no special features in the situation to note. The demand is about the average for the season of the year, and supplies are ample to fill all requirements.

We quote prices as follows: Pure maple syrup, 8 lb. tins, 55c. Pure maple syrup, 11 lb. tins, 75c. to 70c. Pure maple syrup, 11 K. tins, 75c to 80c. Pure maple sugar, per lb., 7½c to 9c.

HONEY MARKET UNCHANGED

Montreal, Sept. 1.—The condition of the market for honey is unchanged, prices being firm with a fair demand for small lots to fill actual wants. The supplies of all grades on spot are ample with the exception of clover white comb.

We quote prices as follows: Clover, white honey, 13½c to 14c. Dark grades, 12½c to 13c. White extracted, 10c to 11c. Buckwheat honey, 6c to 7½c.

GOOD DEMAND FOR POTATOES

Montreal, Sept. 1.—The first car load lots of potatoes from new crop have arrived, for which there is a fair demand and sales of cobbles were made at 90c per bag of 90 lb. extra track here, and in a jobbing way they are selling at \$1 to \$1.20 per bag ex-store.

SPECIAL EXHIBITS

A. TOWELL.
Plumber and tinsmith, Knowlton, has an interesting exhibit in the main building, neatly arranged, showing different lines of ranges and furnaces kept in stock at his store. Special attention is drawn to the Hecla and Gurney Oxford furnaces. The points of superiority are fully explained by Mr. Towell, who is an expert along lines mentioned. A complete bathroom outfit is also shown.

Intending purchasers visiting the fair are requested to consult Mr. Towell before buying.

THE BEST PAINT COMPANY, OF BEDFORD, QUEBEC.

This firm is exhibiting in the main building a full line of V BEST PAINT for exterior and interior work. In introducing these goods, which are of the highest quality possible to obtain, the company have adopted a system of direct from manufacturer to consumer, thereby saving the middleman's profit.

A close investigation will prove to the users of paint that this company is in a position to give the highest grade goods at the lowest possible cost.

Visitors at the fair are requested

to call at their booth for booklet of information.

GRIMM MFG. CO.

This company has as usual a large exhibit of evaporators and sugar makers' supplies. Mr. J. A. Letroy, general agent for Eastern Townships, is in charge. The superior quality of goods manufactured is well known to makers of maple products throughout the Eastern Townships. Nowhere in Canada is the work of Mr. J. H. Grimm in securing the passing in Parliament of pure food law on maple products more appreciated than in Southern Quebec.

For years Mr. Grimm has fought strong interests who were opposed to a law that would prevent adulterating the maple product. However, Mr. Grimm has finally won out, and January 1st, 1915, a new federal law will come into force which ought to increase the value of every sugar bush in Canada.

The farmers of this vicinity appreciate the work of Mr. John H. Grimm, who, under many sacrifices of time and labor, also financial loss, has been largely instrumental in bringing about the much needed protection to be given maple products. It is only reasonable to expect that he will be patronized to a large extent by the manufacturers of maple goods.

Recently the Quebec Government purchased three complete outfits from the Grimm Mfg. Co., placing the same on experimental farms for the purpose of instructing in the art of sugar making.

A full line of evaporators sap spouts, buckets and covers, gathering and storage tanks, maple sugar makers' utensils, will be on exhibition during Brome Fair.

An attractive exhibit will be shown at Sherbrooke Fair next week.

HORTICULTURAL SOCIETY OF SUTTON.

The Horticultural Society of Sutton is also holding a show of flowers, fruit, etc., under the auspices of the Brome County Agricultural Society.

The officers are:

President—C. T. Horner.

Vice-President—M. E. Darbe.

Sec.-Treas.—G. F. Hall.

Directors—H. J. Ingalls, H. C. Ingalls, H. E. Fuller, C. H. Brown, A. Johnston, Jas. A. Grubb, E. Caldwell, Arthur Allen, Geo. W. Taylor.

WHAT IS DOING IN COATICOOK

Former Residents Tell of War Times in England and on Pacific Coast

COATICOOK MEN ARE WELL SATISFIED WITH THE CONDITIONS AT VALCARTIER.

Coaticook, Sept. 1.—(Special)—Word has been received from the boys who went to Valcartier with the 26th Dragoons last Thursday saying that they had arrived safe at the first stage of their long journey and that they were well received and being well cared for. They were put with the contingent from the 13th Scottish Dragoons of Sherford and Brome and expect to remain with them until the end of the War. It is not yet too late for others to volunteer for the first contingent and as soon as the first contingent leaves Valcartier a second one will no doubt be called for.

LETTERS REFER TO WAR.

Mrs. Robert Akhurst has received two very interesting letters relating to War. One from relatives in England tells of the terrible anxiety and grief which is so greatly felt there at the present time. This letter spoke particularly of the high price of food, and says that in many instances, such runs have been made on stores that they have been left entirely without stock.
