

THE EQUITY

No. 4,6 58TH YEAR

SHAWVILLE, PONTIAC COUNTY, QUE. THURSDAY, MAY 15th, 1941

\$1.50 per annum in Advance
2.00 to the United States

The Ladies Guild of St. Matthew's Church, Charteris, will hold a supper and sale of work in the Orange Hall, on Friday evening, May 23rd, from 4 to 8 o'clock. Admission, 25 cents. Everybody welcome!

A mixed dance and amateur contest will be held in the Town Hall, Campbell's Bay, on Wednesday night, May 21st. Music for Round and Square Dancing furnished by Mac Beattie's Orchestra, of Arnprior. Amateur contest from 9 to 10 p. m. Admission 35 cents per person.

Mr. John A. Dean, secretary-treasurer of the township of Clarendon, who recently bought the Turner home on Centre street, expects to have his office equipment installed and ready for the transaction of township and school board business by Thursday of this week.

The Shawville Women's Institute
The May meeting of the Shawville Women's Institute was held in the United Church on May 12th at eight o'clock.

The meeting opened with 'O Canada' and the 'Institute Ode.' The president, Mrs. Draper was in the chair and the minutes were read and approved.

Mrs. Edgar Hodgins reported a box had been sent to Graydon Masson.

Plans were made for the fall fair display. Four new members were added to the roll call.

A quartet including Mrs. McCredie, Miss Kay Woodley, Messrs G. Paul and Wilmer Hodgins was much enjoyed. Prof. Hamilton, of Macdonald College addressed the meeting.

Mr. N. A. Drummond gave three sets of movies which included the Gaspé Coast and London; they were instructive as well as enjoyable. Miss Shaw moved a vote of thanks for the United Church.

Delicious refreshments were served by the members.

Spring Stallion Show

This year officers of the C. P. A. S., No. 1 had arranged that the Provincial Stallion Inspectors make inspection, at this date, Friday, May 9th, of stallions not inspected for 1941 service.

The inspectors arrived in time to make the inspections required, but one of them had received orders for inspection work to be done near Montreal, Friday afternoon early and this forced them to leave without seeing all Stallion on the Fair Grounds or giving the expected address advertised.

There were about 10 stallions on show, Clydes, Percherons and standard Bred. Some changes were noted since 1940.

Owners for this year are B. C. Horner, J. A. Horner and Norris Horner, Irwin Woods, J. B. Strutt, and James Tracey who sold his stallion during the show to M. J. Stanton of Leitchfield.

Although the stallion inspectors were unable to remain to give the expected addresses the local and district agronomists, N. A. Drummond and J. W. Delaney were present to answer any questions asked.

The Fair was a success from point of interest taken in the event by a rather small turnout of farmers.

Organization for New War Loan Completed

An executive meeting was held at Campbell's Bay on Friday evening last to organize and promote the sale of Canada's new war loan in Pontiac South and which is known for organization purposes as Division No. 12, Unit C. The executive are: Chairman, E. C. Lawn, M.L.A., of Campbell's Bay; vice-chairman, G. A. Howard, of Shawville; secretary, Rev. T. P. Shaver, of Campbell's Bay.

The unit was divided into five sub-divisions, as follows:
Quyon—P. H. McCann, mayor of Quyon. This division comprises Quyon, Onslow North and Onslow South.

Shawville—G. A. Howard and G. G. McDowell, joint supervisors. This division covers Shawville, Clarendon, Bristol and Thorne.

Fort Coulonge—James Ward and Merton Mulligan, joint supervisors. This division comprises Fort Coulonge, Davidson and Waltham.

Chapeau—W. R. McDonald, M.P. supervisor. This division covers Chapeau, Sheenboro and Chichester.

Campbell's Bay—E. C. Lawn. This division comprises Campbell's Bay, Bryson, Calumet Island and Litchfield.

The following were confirmed in their appointments as unit committee: Chairman, Shawville; Rev. A. F. Fokes, of Shawville; speakers, Dr. Simon J. McNally, of Campbell's Bay; teams chairman, Harland C. Rowat, of Shawville.

The former offices occupied by Mr. J. Oscar Laflamme, K. C. at Campbell's Bay, have been secured for the central headquarters.

ENGAGEMENT

McPHERSON-MARTIN
Doctor and Mrs. C. J. McPherson announce the engagement of their daughter, Carneta Emma, to Q. M. S. Heillerey Weldon Martin. The marriage is to take place early in June.

PERSONAL MENTION

Mrs. H. Cole, of Ottawa, was a recent guest of Mrs. A. G. Brough.

Mr. Kenneth McCagg, of LeVack, Ont., is spending a vacation with relatives in Austin section.

Mrs. C. F. C. Powles returned Sunday from visiting relatives at Three Rivers, Que.

Mrs. Andrew McLaughlin, of North Bay, is visiting her sister, Mrs. Samuel Sinclair, in town.

Miss Mabel Chisnell, of Ottawa, spent Mother's Day with her parents, Mr. and Mrs. W. G. Chisnell.

Miss Muriel Horner has returned home after a three months' visit with relatives at South Poreupine.

Pte. Louis Welch, of Cornwall, visited his parents, Mr. and Mrs. Wm. Welch, during the week end.

Mr. Melvin Hodgins, of Cornwall spent the week-end with his parents, Mr. and Mrs. R. G. Hodgins.

Mr. and Mrs. Ernest Towsley and family, of Ottawa, visited their relatives in town for the week-end.

Mrs. E. H. Manley, of Quebec City, spent a few days in town with relatives during the past week.

Dr. R. E. Dagg, of Montreal, spent Monday with his father, Mr. Geo. T. Dagg, and other relatives in town.

Mrs. Geo. Warren and Mrs. Graham Thompson returned Sunday from Pembroke, where they had been visiting relatives.

Mr. and Mrs. Lyndon Graham, of Sullivan Mines, Que., are visiting relatives in Bristol and Campbell's Bay.

Messrs. Harold Fokes, of Pembroke, and Dean Fokes, of Ottawa, spent Sunday with their parents, Rev. A. F. and Mrs. Fokes.

Pte. Donald McDowell, R. C. A. M. C., Ottawa, was a week-end guest at the home of his parents, Mr. and Mrs. Manson McDowell.

Mrs. Hector A. Hodgins, of Ottawa, arrived in town this week to take up residence for the summer months at her home on King Street.

Miss Orma Elliott, R. N., accompanied by Miss Dorothy Willowby and Mr. Stewart MacLean, of Pembroke, spent Sunday at the home of her mother, Mrs. R. H. Elliott.

Leuit Orville McBride, of Petawawa, spent the week-end in town with his wife and family, who have recently taken up residence with her parents, Mr. and Mrs. W. H. Barr.

Dr. Wallace Hodgins, of Montreal and Mrs. Wm. Kirkpatrick and Miss Norah Hodgins, of Ottawa, were week-end visitors at the home of their parents, Mr. and Mrs. John L. Hodgins.

Miss Lorraine Fokes, who will be one of this year's graduates of Ottawa Civic Hospital, is spending a vacation with her parents, Rev. A. F. and Mrs. Fokes, before the graduation exercises, in June.

Mr. and Mrs. F. W. Wanless, of Smith's Falls, and their daughter, Miss Margaret, of the nursing staff of Ottawa Civic Hospital, were Sunday guests at the home of Mrs. Wanless' mother, Mrs. James Wilson.

Mr. and Mrs. Lennon Thomas Honoured

A miscellaneous shower, sponsored by the Clarendon Women's Institute and the friends of the community was held at the home of Mr. and Mrs. Alfred Elliott on Friday evening, in honour of Mr. Lennon Thomas and his bride, the former Miss Alfreda Elliott.

About seventy-five guests attended and Mr. and Mrs. Thomas received many beautiful gifts which were presented by the Misses Lois and Sheila Hodgins and Gwendeth Armstrong, while suitable remarks were made by Mrs. Harold Hodgins.

Mr. and Mrs. Thomson thanked their friends in gracious terms.

Dainty refreshments were served by the ladies present.

The Bristol Busy Bee Institute will hold their regular meeting on Friday evening, May 16th, at 8.15 in the basement of Bristol Memorial Church. Mr. N. A. Drummond will give some interesting slides on Agriculture and a collection will be taken to defray expenses. Everybody Welcome. Refreshments, ten cents.

Save All Your Scrap

The Government has issued an appeal asking Canadians to take part in a huge salvage campaign. Many valuable materials useful to war industries are sent to the dump each year when they should be segregated and the Red Cross and Boy Scouts will see that they are collected. As the annual cleaning of yards and houses is now in progress care should be taken that this necessary war scrap is saved.

Among the varied assortment of old materials needed are all kinds of scrap metal, bones, rags, glass, rubber, waste paper, newspaper and magazines. As far as can be ascertained everything is of value save tin cans. Scrap aluminium-ware and bones are needed for airplane construction. Bottles or scrap glass is also requested, as are rags of all descriptions.

All Fighting Services Suffer Losses in Ship Lost by Enemy Action

Of 122 persons reported missing when a British ship sailing from Canada to the United Kingdom was lost recently, 94 were members of the fighting forces. Military staff clerks formed one largest group, 33 being reported lost. Other branches included were Royal Canadian Navy, 10; Royal Canadian Artillery six; infantry, two; New Brunswick Regiment, 4; Royal Canadian Army Medical Corps, eight; Royal Canadian Army Pay Corps, three; Royal Canadian engineers, three; Manitoba Regiment, two; Royal Canadian Army Service Corps, three; Royal Canadian Ordnance Corps, five; Canadian Provost Corps, one; Royal Air Force, eight; Royal Norwegian Air Force, three.

Farewell Party and Miscellaneous Shower

On Friday evening a farewell party and miscellaneous shower was tendered Miss Hazel Hodgins, at the home of her parents, Mr. and Mrs. Elliott Hodgins, at Yarm.

Over one hundred guests attended including friends from Shawville and the Radford district, and the evening was pleasantly spent in dancing.

Miss Hodgins was the recipient of many useful and beautiful gifts, including a sum of money, these being presented by the Misses Elaine Laugren and Annie Dagg. Miss Hodgins expressed her thanks to her many friends in fitting terms.

Refreshments were served by the ladies present.

Harold Carey Found Dead in His Car

Harold Carey, youngest son of Mrs. Geo. Carey, of Austin section, Clarendon, was found dead in his car on Tuesday morning by his sister, Miss Armanella.

The car was out in a field on their farm and was discovered by Miss Carey when she went for the cows.

An inquest was held by Coroner Dr. L. Renaud, of Campbell's Bay, and it is believed death was caused by carbon monoxide poisoning.

Surviving are the aged mother, Mrs. George Carey; five brothers and four sisters, namely, John, of Minneapolis; William, Weyburn, Sask.; George, of Regina; Linden, of Freemington; Allan and Eric, of Campbell's Bay; Mrs. George Rooney, of Milestone, Sask.; Mrs. J. W. Thomas, of Sudbury; Mrs. Heman Elliott, of Shawville, and Miss Armanella, at home.

The funeral service will be held at the late home on Friday afternoon. Interment at Austin cemetery.

Miss Oselia McMillan Fatally Injured by Automobile in Montreal

Mr. James McMillan, of Bristol, received word Sunday morning that his sister, Miss Oselia McMillan, had died instantly Saturday evening in Montreal when struck by an automobile at the corner of Sherbrooke and Redpath streets. She had been on her way to visit friends in nearby Mount Royal. Exact details of the sad occurrence are not available.

Following an inquest the remains were brought to Bristol by Monday night's C. N. R. train, and the funeral service was held at the home of her brother on Tuesday afternoon by the Rev. C. Armstrong Sales. Interment was made at Norway Bay cemetery.

Left to mourn are two brothers, James, of Bristol; Alex, and one sister, Miss Maye McMillan, of Blackie, Alta.

The late Miss McMillan was the daughter of the late Mr. and Mrs. John McMillan, of Litchfield, where the deceased spent her girlhood. She had been residing in Montreal for over thirty years.

During the past winter she spent several months with her brother, in Bristol, and had returned to the city only a few weeks ago.

Any German drive on the Suez Canal will have to be a land and air campaign, for British warships still control the eastern Mediterranean. Map shows highways and railroads. Nazi troops would probably use for a pincers assault on Suez from positions now held in Greece and Libya.

HAVE YOU HEARD?

The high-speed salesman had joined the Army, gone into action, been wounded. For several days he lay delirious, but eventually he turned the corner. On the first day of his recovery he was surprised to see all the nurses standing around his bed, offering him money. "What's this for?" he asked. "Why for the radio and refrigerator, you sold us while you were unconscious," they chorused.

Teacher: "Robert, what are you going to do when you grow up?"

Robert: "I'm going to be a grandfather and just sit around telling everybody how cold the winters were when I was a boy."

One of John's best friends had died so he called on the widow to express his sympathy.

"John and I were friends," he said. "Isn't there something I could have as a memento of him?" She raised her velvety brown eyes, which a few seconds before had been wet with tears. "How would I do?" she asked.

Brown: If you had \$20 in your pocket right now, how would you feel?

Hawkins: I'd think I had someone else's trousers on.

The prisoner was a very tough-looking customer. He was asked whether he could read or write. "I can write but I cannot read," was the reply.

He was then asked to write his name and after he had scrawled huge letters over the page was asked what it meant. "I dunno," said the man, "I told you I can't read."

The Nazi leaders were playing contract bridge in Hitler's mountain retreat.

"Three diamonds," said Goering.

"No bid," said Goebbels.

"Five diamonds," said von Ribbentrop.

"One club," said Hitler.

"Pass."

"Pass."

"Pass."

Dog Often Has Cause to Bite

Toronto Humane Society Defends Canine Offenders, Unless They're Plain Vicious

Although the Toronto Humane Society kennels frequently have dogs under observation for the city health department, they have never known a genuine case of rabies. "This indicates how little the Toronto public has to fear 'dog days,'" Mrs. E. R. Lamb, an enthusiastic humane society worker, states. For 19 years, Mrs. Lamb has heard complaints lodged with the society. "Most dogs bite only for ignominious reasons, not because they are vicious," she contends.

TRAGED BY CHILDREN

Mrs. Lamb explained that dogs obtained for observation have been guilty of biting some person.

"The animal may be startled; children tease and annoy him, or someone unknowingly treads on his foot or tail. The response is automatic and usually the dog is as sorry as his victim for his momentary loss of self-control," she said.

Begin Building Seven Airports

To Connect Edmonton and Whitehorse in Yukon; Will Aid U. S.

Coincident with the report from Washington that United States has embarked on air base and other defence projects in Alaska to cost more than \$55,000,000, transport department officials in Ottawa late in April were advised work on each of the seven airports connecting Edmonton with Whitehorse in the Yukon has been started.

"Men are on the ground at every site chosen for an airport across northern Canada from Edmonton to near the Alaska border," a department spokesman said. "We are confident all the bases will be completed during the summer."

He said that with the completion of these seven bases, United States planes could cross the border at any point, connect with the trans-Canada air route and use its beams and other facilities to Edmonton where they could swing onto the Edmonton-Whitehorse route also provided with all modern facilities to take them into Alaska.

The Edmonton-Whitehorse route was decided upon following recommendations from the Canada-United States defence commission and the bases are being built by the transport department.

What Science Is Doing

BRAIN FLUID SLOWS HEART
The brain contains a chemical which can slow the heart beat, and lemon peel another that reduces blood pressure. These discoveries were reported last week to the Federation of American Societies for Experimental Biology.

The brain chemical seems to be produced continuously in the head, and presumably in the brain itself. It passes along the blood stream and acts directly on the heart.

NEW SLEEP DRUG

A new sleep-producing drug, oxazolone, which is safe because an overdose is virtually impossible, was announced last week to the Federation of American Societies for Experimental Biology. More than half a pound can be given a 150-pound person without bad effects.

CANCER AGENT EVERYWHERE

Evidence that the mechanism of cancer is dormant in all healthy tissue cells in the form of minute particles about one three-hundred-and-fifty thousandth of an inch in diameter was presented last week. The suspected particles are known as mitochondria.

PLASMA FROM CATTLE BLOOD

Blood plasma, the life fluid urgently needed by bomb-stricken Britain, soon may be obtained from the blood of slaughtered cattle. Dr. Morris Fishbein, editor of the journal of the American Medical Association, declares. Researchers working toward that end have produced promising results, Dr. Fishbein says.

Modern Etiquette

BY ROBERTA LEE

1. What reply should one make when being introduced to a stranger and he says he remembers a previous meeting?
2. Isn't it rude for wedding guests to throw rice at the bride and bridegroom?
3. When a hostess has waited 15 or 20 minutes for a tardy dinner guest, should she telephone to see why he is delayed?
4. When entertaining a group of persons, whose duty is it to see that conversation does not lag?
5. Should a husband or a wife ever criticize the other about personal things, when in the company of others?
6. Should one use a knife or fork to place butter on a potato?

Answers

1. Be tactful enough to say, "How kind of you to remember me," and try to recall the meeting.
2. No. This is an old custom that is still observed, and no one should resent it.
3. No. She is privileged to go ahead and have dinner served.
4. This is the duty of the hostess; but a congenial group is never at a loss for conversational subjects.
5. Never; not even jokingly.
6. The fork should be used.

Trained Coyote

Claims of extraordinary hunting ability are made by Arthur Nelson, of Springfield, Idaho, for his favorite hunting companion—a full-blooded coyote. The animal was taken from a litter of five coyotes. It has been raised like a dog. Nelson says the coyote has no peer at pointing pheasants. His speed also makes the coyote a good rabbit hunter, he said.

SAFES

How Can I?

BY ANNE ASHLEY

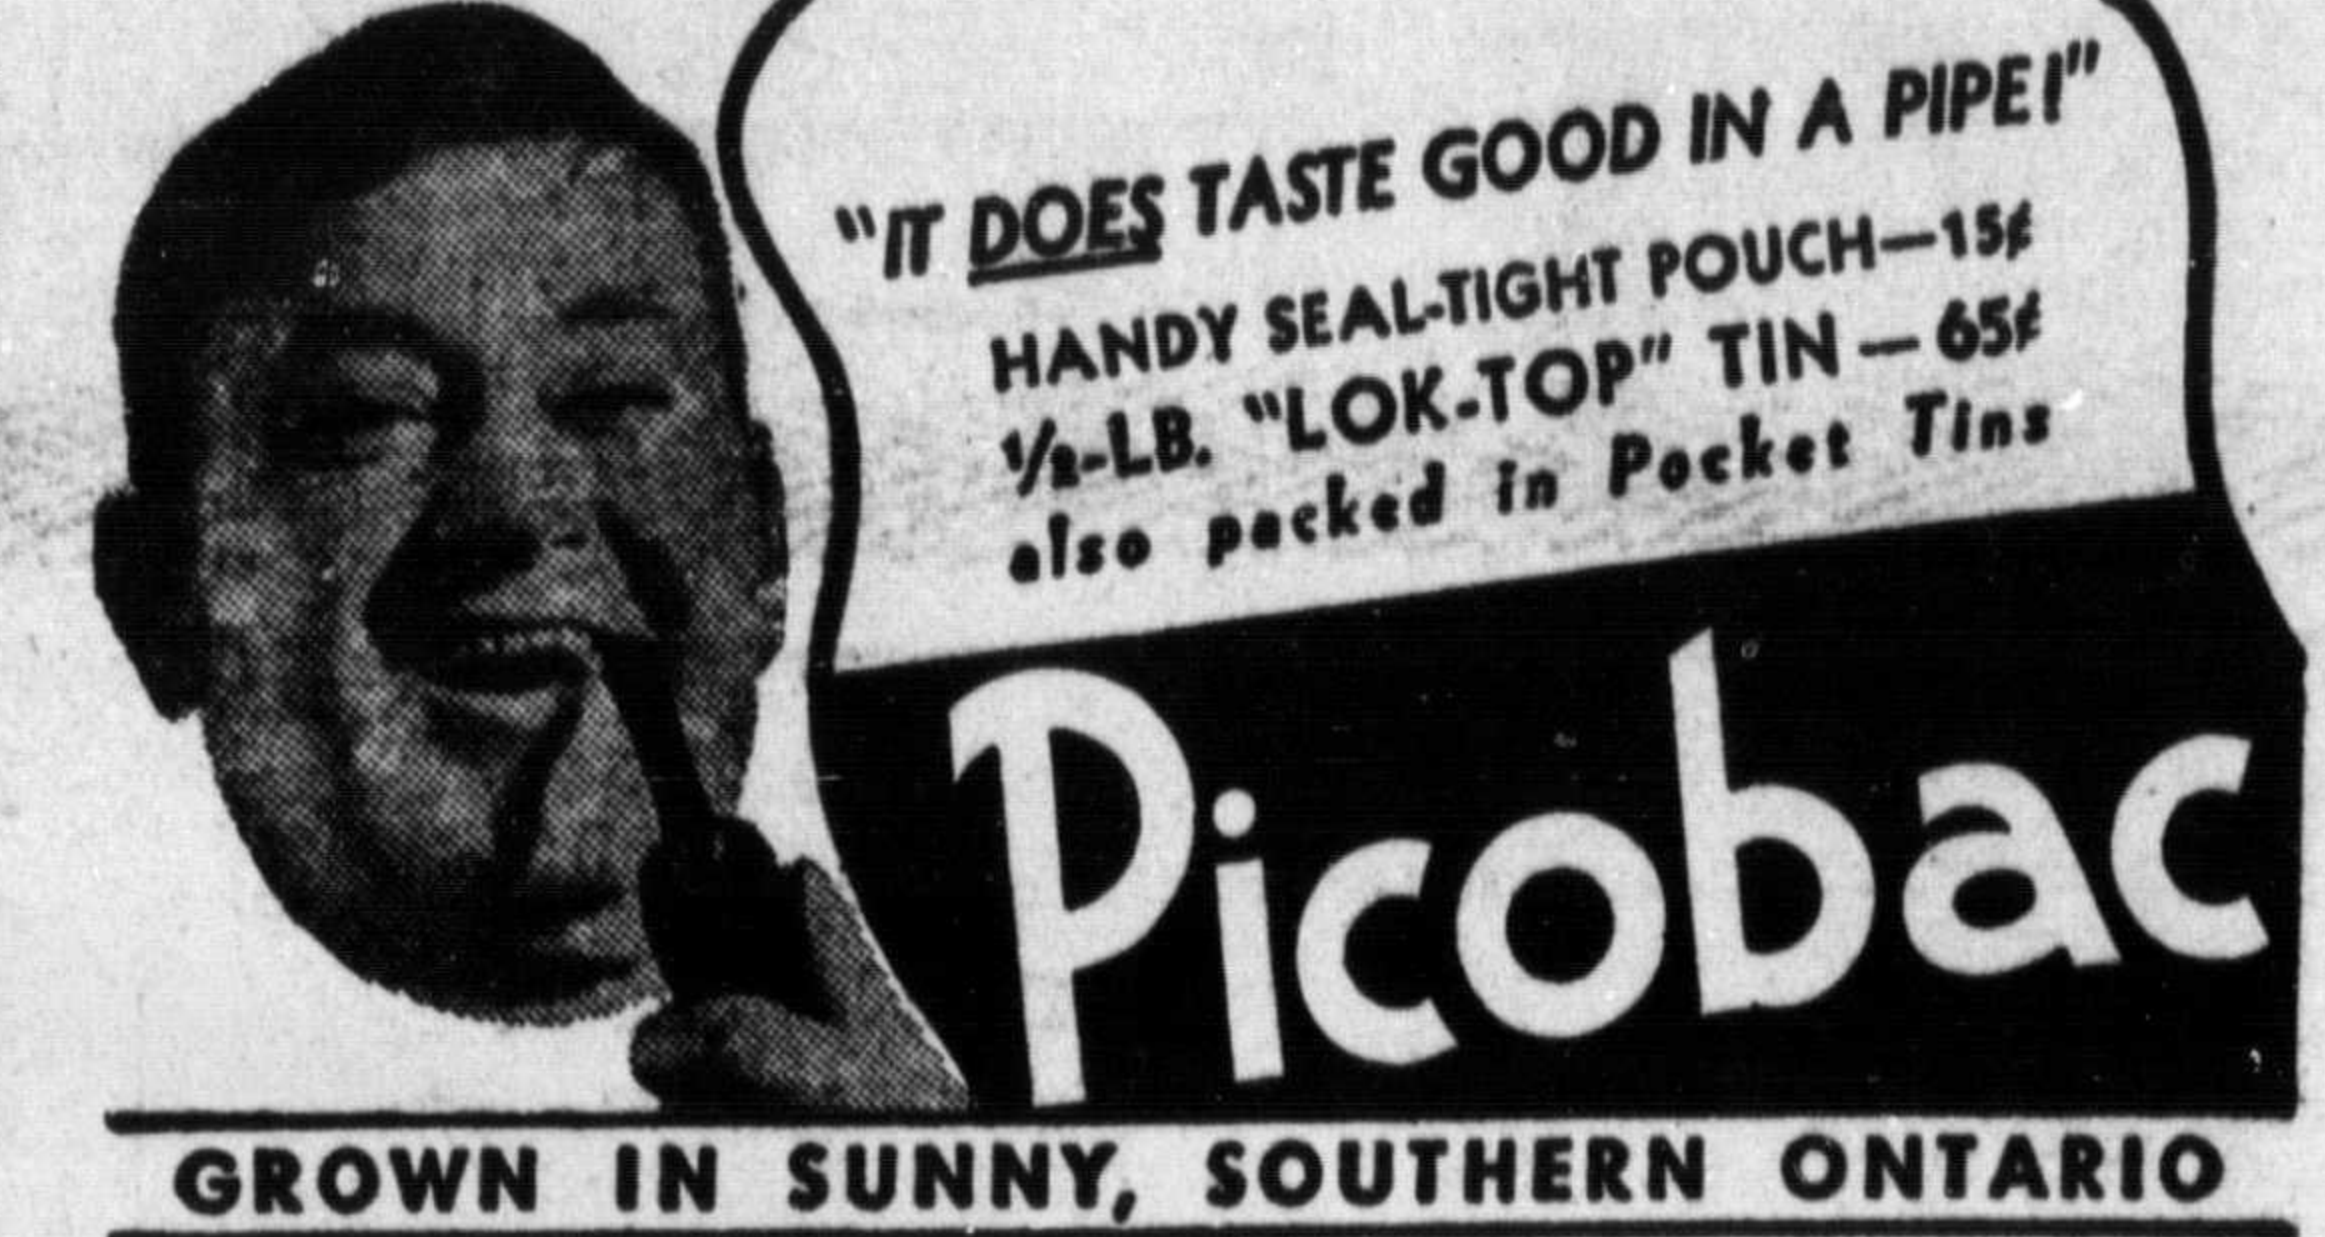

- Q. How can I make my teeth whiter?
- A. Apply a solution of peroxide of hydrogen diluted with one-half water to the teeth.
- Q. How can I cause paint to adhere to new tin?
- A. Rub the surface of the tin first with pumice powder, or sandpaper, and apply shellac. Be sure the tin is free of grease before beginning the work.
- Q. How can I clean white woodwork most effectively?
- A. Heat a pint of milk in a pint of water, and then add one tablespoon of kerosene. Apply and polish immediately with a soft cloth.
- Q. How can I remove shine from serge?
- A. Sponge the serge with hot vinegar before pressing it.
- Q. How can I remove perfume spots from furniture?
- A. Perfume spots on furniture should be smeared with linseed oil, olive oil, or camphorated oil immediately. Mop up, and apply more oil on a woolen cloth.
- Q. How can I keep a kitchen sink free of grease and disagreeable odors?
- A. Try pouring a strong solution of hot water and salt through the sink and drain at least once a week.

Four Main Factors In Dairy Success

Good Farmers Must Combine Them to Develop Worthwhile Business — Efficiency Is Essential

In building up a successful dairy business, states the War Time Production Series bulletin "Success in Dairy Farming," issued by the Agricultural Supplies Board, good farmers pay particular attention to four main factors—rates of production of live stock and crops; efficient use of labour; efficient use of capital including farm implements; and a sufficiently large output without which low operating costs cannot be established.

These four factors are related and must be combined to develop a successful farm business. Full information on the various angles of management are given in the bulletin. It also contains tabulated figures showing a financial summary of the average farm business from which milk was sold for fluid consumption in Ontario, 1937-38, and

A second table of figures giving a comparison of the revenue from different sources (crops, dairy, hogs, and poultry on all farms with the revenue from the two most successful farms on each milk marketing zone of Ontario from which milk was sold for fluid consumption. The bulletin may be obtained free on request from the Publicity and Extension Division, Dominion Department of Agriculture, Ottawa.

World War Map

A World War Map in colour showing all important events up to date clearly marked is being sold by direct mail. The dates of events, population of different countries, also agricultural and mineral areas are shown. This map is very useful in following the war day by day and you would be well advised to order a copy. Simply send 25c to the Colonial Distributors, Limited, 253 Queen St. West, Toronto and your WORLD WAR MAP will be sent to you immediately.

Ancient City Of Salonika

Wars, Quakes and Trade Highlight of Greek Port

Salonika is described by an ancient writer as, "The covered city crouching on the side of a hill and touching the sea with her feet," says Ernest D. McCurry in the Kansas City Star.

"THESSALONICA"
This second city of Greece was of little importance until King Cassandria of the Macedonian line took possession of it, and renamed it "Thessalonica" in honour of his wife, the daughter of Philip, of Macedon and sister of Alexander the Great. It was called "Salonica" by the French, but the Greeks, in the interest of brevity called it "Salonica" which in modern times has been changed to "Salonika."

CITY OF THE AGES
This city on the shore of the Aegean Sea is a veritable city of the ages, and so ancient that the time of its beginning is lost in obscurity.

It was the second stopping place of the Apostle Paul, who in response to a call which had come to him in a night vision, crossed the Aegean Sea and landed in this city. Later from Corinth in 54 A.D., he wrote the first of his many letters to the church which he had founded at Thessalonica.

MODERN SALONIKA

The city of Salonika is a modern Habel, not only of languages, but also of races and religions, customs and now German by occupation, its population is predominantly Turkish, with the Jews ranking second, and the Greeks themselves a poor third.

SUNDAY SCHOOL LESSON

LESSON VI

THE RESPONSIBILITY OF THE HOME REGARDING BEVERAGE ALCOHOL

Deut. 6:4-7; Jer. 35:5-10
GOLDEN TEXT—Train up a child in the way he should go, and even when he is old he will not depart from it. Prov. 22:6.
THE LESSON IN ITS SETTING
 Time—The book of Deuteronomy was written somewhere between 1450 and 1500 B.C. The particular chapter here quoted from the book of Jeremiah was probably composed about 604 B.C.
 Place—The entire book of Deuteronomy is devoted to truth revealed to Israel while she was wandering for forty years in the wilderness.

The One True God

Deut. 6:4. "Hear, O Israel: Jehovah our God is one Jehovah." This declaration asserts that the Lord God of Israel alone is Jehovah the absolute, uncaused God; He who had by His election of them made Himself known to Israel. 5. "And thou shalt love Jehovah thy God with all thy heart, and with all thy soul, and with all thy might." Now, if there be any single attribute in which the moral character of the Supreme attains to unity, that attribute is His love. The characteristic attitude assumed by Jehovah in Old and New Testament revelation, and particularly in the Gospel, is this of a Saviour from every evil. Well, let that be the relationship under which we have learned to welcome, embrace, and confide in God through Jesus Christ; and we shall find that we have welcome, pure and boundless love. Those words of Deuteronomy which our Lord recited to the scribe and which, they say, every Jew was expected to recite to himself morning and evening at his devotions, form a most penetrating commentary on the First Law in the Decalogue; and you see how they tax language to express totality of dedication on our part to this love of God. Every part of every man, and the whole of every part, is to be filled with love.

Teach Unto Your Children

6. "And these words, which I command thee this day, shall be upon thy heart. 7. And thou shalt teach them diligently unto thy children, and shalt talk of them when thou sittest in thy house, and when thou walkest by the way, and when thou liest down, and when thou risest up." Here is a religion which covers the whole day, which belongs to every attitude of man. The entrance of Divine truth into the mind and heart, the formation of habit and the training of character, these are not attained by sudden and isolated efforts, but by regular and unceasing repetition. This is the law of all growth in nature, and of this law God seeks to make use in the kingdom of grace, in dependence upon and subservient to the power of the Holy Spirit.

The Loyal Rechabites

The founder of the fraternity of Rechabites ("Son of Rechab" may mean "son of the chariot" or "disciple of the great prophet") was Jonadab who appears as the ally of Jehu in the overthrow of the house of Ahab. From I Chron. 2:55 it appears that the house of Rechab belonged to the Kenites who had joined the Israelites on their exodus from Egypt, and had settled in their lands, retaining many of the old habits of patriarchal life.

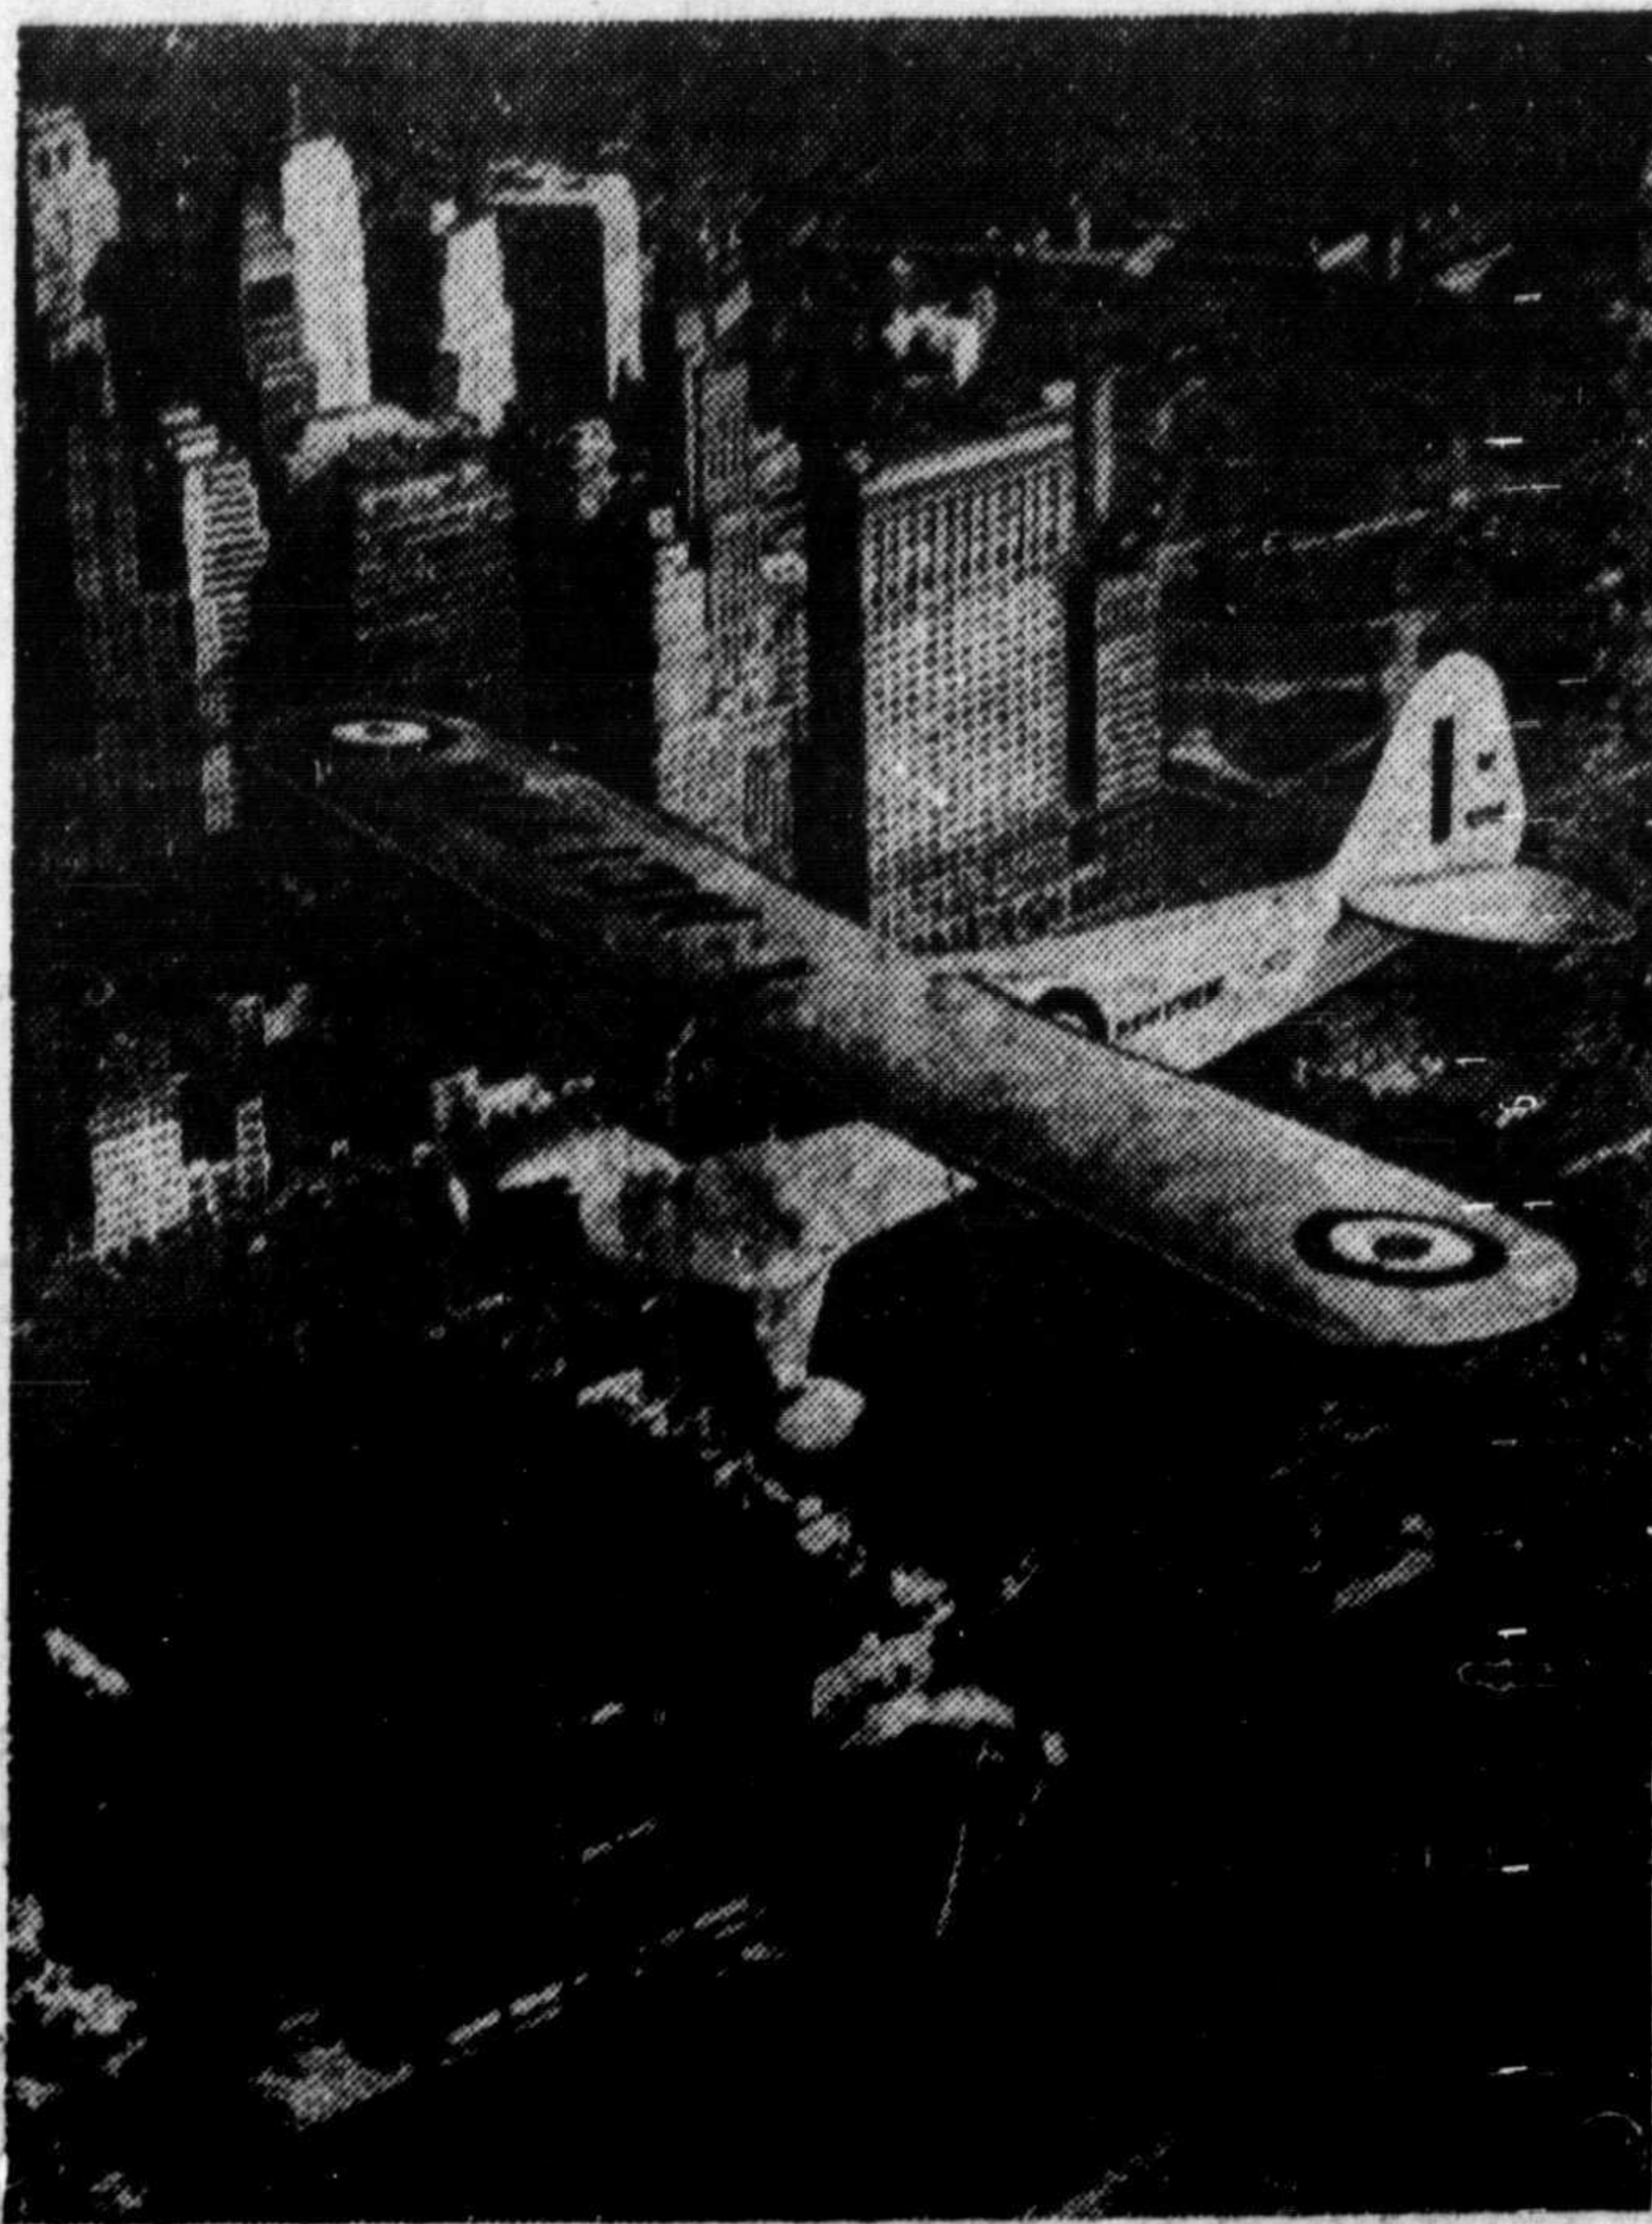

Jeremiah 35:5. "And I set before the sons of the house of the Rechabites bowls full of wine, and cups; and I said unto them, Drink ye wine."

It is not said that Jeremiah deliberately attempted to seduce these Rechabites to lead them into some sin. That is not the point. Either Jeremiah urged these people to break their former vows only that, knowing they would steadfastly refuse to do so, he might have a powerful illustration by which to rebuke the more easily tempted Israelites who were of weaker stuff; or, he may have wanted to persuade these Rechabites to more closely identify themselves with the Israelites living in Jerusalem, and to give up their severe customs which kept them separate from all their nearby neighbors. They are not rebuked for their stand but are really commended.

"We Will Drink No Wine"

6. "But they said, We will drink no wine; for Jonadab the son of Rechab, our father, commanded us, saying, Ye shall drink no wine, neither ye, nor your sons, for ever: 7. neither shall ye build house, nor sow seed, nor plant vineyard, nor have any; but all your days ye shall dwell in tents; that ye may live many days in the land wherein ye sojourn. 8. And we have obeyed the voice of Jonadab the son of Rechab, our father, in all that he charged us, to drink no wine all our days,

R.A.F. "Invasion" of U.S. Begins

To every state in the Union will go a little silver Piper Cub sport plane like this one, shown over the lower tip of Manhattan. Marked with the insignia of the Royal Air Force, the 48 planes are "invading" the U.S. on behalf of the R.A.F. Benevolent Fund of the U.S.A.

we, our wives, our sons, or our daughters; 9. nor to build houses for us to dwell in; neither have we vineyard, nor field, nor seed: 10. but we have dwelt in tents, and have obeyed, and done according to all that Jonadab our father commanded us."

The Force of Example

This lesson has primarily to do with the teaching and practice of temperance in the home. It is strongly suggested that if parents will live wholesome, happy, sincere Christian lives before their children, being exceedingly careful in thought and in act to maintain the practice of constant abstinence from intoxicating beverages, the children themselves will adopt some of these convictions. This we believe is the best way to approach the problem.

Amateur Knitter?

It is often difficult to gather the top of a knitted skirt to fit the waist elastic properly. First measure the elastic firmly round the waist and join ends, then stretch this over a chair back which is the same width as the top of the knitted skirt and seam the knitting to the elastic with matching wool or silk. When removed from the chair the skirt will have even fullness and will stretch to the right hip measurements when it is being pulled on.

First Airman

England's first airman is said to have been James Sadler, of Oxford. He made the first successful ascent in that country in 1874.

RADIO REPORTER

By DAVE ROBBINS

WHAT CANADA'S DOING

Allister Grosart, who has travelled across Canada as the Department of Information's official broadcast observer, will give the first of his impressions of Canada at work on the home front when he speaks from Toronto to listeners of the CBC National Network on Friday, May 9th, at 7:30 p.m. E.D.S.T. Mr. Grosart, a former Toronto newspaperman, has seen everything from patrol operations up the Pacific coast to the voluntary war efforts of Canada's foreign-born citizens. He has just concluded the second leg of his observation trip across Canada with a tour of the Maritime Provinces.

ACCURATE ANALYST

Canada's best news analyst, Dr. E. T. Salmon from the McMaster University staff, rang the bell again on the Balkan campaign. Dr. Salmon worked in the Balkans for a number of years as a King's Messenger for the British Foreign Office, and the war moved into an area which he knew as well as he knows the roads of Ontario. A month before the campaign was under way, he predicted its development along the channels we have watched these last few days. Then one could turn back and remember that Professor Salmon's predictions were working out to be one hundred per cent correct.

You can follow the war with a greater understanding and a greater knowledge of what each move means, by dialing in the authoritative summing up by Canada's best informed observer. He is heard over CKOC each week night but Saturday at 7:15—Sundays at 6:00 p.m.

AROUND THE DIAL

A program with a sentimental touch is presented over the WOR Mutual chain Thursday nights at 8:15, when Walter Scanlon, outstanding concert tenor is heard in Songs of Ireland.

To give you some idea of your Government's urgent need of money to meet the costs of war, the Department of Finance is presenting a series of radio programs entitled "All Star Theatre" Friday evenings at 10:00, that are at once enlightening and entertaining. By dialing in these Friday evening treats you can enjoy a top notch program, and at the same time, learn where your money goes in the cost of war for freedom.

The All Star show brings to the microphone each week a parade of radio, screen, and stage stars from Hollywood, Britain and Canada. This show will thrill you.

Enigmatic Evelyn is catty at times. The other day she remarked: "Some fat girls are waiting for shapes that never come in."

Trivia: Believe it or not, but such tough fellows as Jack Dempsey, Max Baer and Lou Nova all are victims of "Mike Fright" when they go in a radio studio... American news commentator Elmer Davis has gone to England for first-hand look at proceedings... Band leader Artie Shaw has another mad on and will retire for a while... Songstress Dolly Dawn will take over George Hall's orchy.

Gardening...

ARTICLE No. 10

Gardeners are advised to divide their vegetable seeds into at least three parts, sowing a third as soon as the weather permits, a third a little later, and the balance at the very tail-end of the planting season. In this way if frost does cut down the first batch there will be more plants coming on and the season will be lengthened by the last part of the garden sown. Of course there are some exceptions to this general rule. One should not plant outside tender things like tomatoes, peppers, melons, etc., until danger of frost is over.

Sow Grass Early

Grass makes its most rapid growth in the cool weather of Spring and Fall. On this account, lawn work of a new or repair nature should be carried out just as soon as the soil is fit to work.

After digging, the ground should be allowed to settle for a few days at least, and then levelled again. It is advisable to repeat this process several times. The top soil should then be raked fine and on a windless day the grass sown at a liberal rate, once across and once lengthwise. This double sowing insures an even distribution. It is always best to get a good mixture of high quality grass seed blended by expert Canadian seedsmen.

Good Tools Help

Experts advise one thorough digging or spading in the late Fall or Spring, or if the lot is a large one it will be better to get it plowed. Just before either operation, if the ground is poor it is a splendid idea to have some good rotted manure turned under. After this spading or plowing it will only be necessary to cultivate fine with a rake. One thorough cultivation like this once a year should keep the soil in shape and permit one to carry on easily with a small hand cultivator, or Dutch hoe. Either of these inexpensive tools can be operated without bending the back and both will be sufficient to keep the soil stirred and the weeds down during the remainder of the season.

Should Control Rheumatic Fever

Rheumatic Infections Could Be Curbed if Caught Soon Enough—Prevention in Children is the Slogan

The true prevalence of rheumatic infections is unknown because the melody is not, like scarlet fever, diphtheria, typhoid fever and others, reportable.

Rheumatic infection introduces us to heart disease which with the co-incident blood vessel disease leads all others in the list of public killers. Rheumatic fever ranks high among the most severe diseases; it is not so amenable to prevention as syphilis and tuberculosis. So far we lag in our efforts to control this crippling disease.

BEGIN IN SCHOOLS

Our efforts in the control of rheumatism must begin in the schools. Examinations of children in schools has uncovered some appalling facts; 80 per cent of the total organic heart disease of school children has a rheumatic origin. This becomes an important problem when we consider that 3 out of every 100 children are sufferers.

POOR SURROUNDINGS FAVOR DISEASE

Rheumatic conditions seem to be more frequent among persons living in poor hygienic surroundings. The facts indicate that poverty, malnutrition and unhygienic surroundings are the most favourable for the development of rheumatic infections.

Prevention is the slogan in rheumatic fever. The child with growing pains, grippe, tonsillitis and sinus attacks should promptly be put to bed; he should remain in bed until well. Infected tonsils and other foci of infection should be removed. Children should be well fed, clothed and cared for. It will pay handsomely to check the onset and course of rheumatic fever.

Dairying in Greece

Buffaloes, milch cows, ewes, and goats provide the milk supply of Greece. The milk of buffaloes and cows is used mainly for the liquid market, and the milk of ewes and goats for making cheese. There are approximately 220,000 milch cows, 70,000 buffaloes, nearly nine million sheep and over five and a half million goats in Greece. The yield from cows, goats, and ewes closely approaches each other, the supply from buffaloes being eight times less.

THIS CURIOUS WORLD

By William Ferguson

ANSWER: The Galapagos Islands are on the equator, about 2800 miles due south of St. Louis. They are noted for the huge and ancient tortoises found there.

NEXT: What is the only state in the United States in which termites have not been found?

POP—Depleted Account

By J. MILLAR WATT

THE EQUITY

Shawville, May 8th, 1941

THE THINGS THAT MATTER

Canadian House of Commons
May 7th, 1941

Prime Minister Menzies of Australia: "All I want to do is say to myself, as I invite every man in public life all over the British world to say to himself day by day: 'Am I so utterly convinced that I must put everything I have into this task, that I will spare no effort, that I will never spare myself in order to have victory?'"

I need not say to you, but I must say to myself, and repeat it to myself constantly, that nothing else matters except that we should live when this war is over in a free world, in the world in the kind of a world in which we want to live.

What does it matter if we come out into that world bankrupt? What does it matter if we come into that world with lower standards of material living than we have now? What does it matter if in that world the rich are not so rich? What does it matter if in the last resort the business of statesmanship in that new world becomes the business of sharing a new and honorable poverty?

These things do not matter. The only thing that matters to free men is that the policies under which they live shall be the policies that they have themselves devised as the representatives of their own people."

South Onslow Council

May 5th, 1941

A regular meeting of the Municipal Council was held on the above date at the usual place of meeting. Members present: S. W. MacKechnie, mayor and Councillors Fraser, Stanton and Westbrook.

On motion of Crs. Fraser—Stanton the minutes of the last meeting were adopted as read.

Crs. Young and Clarke took their seats at the board.

Allan Poole appeared at the board complaining of the diversion of a water course.

Motion by Stanton—Fraser that the special superintendent be instructed to visit this water course and report to Council.

Motion by Crs. Young—Westbrook the following bills were ordered paid:—
H. Cochran, road list. \$ 41 75
County rate. 549 97
H. Poole, health office. 4 00
Fred Clark, road list. 71 40
Sawyer Massey, repairs. 5 19
W. J. Fleming. 10 50
Harry Foran, timber. 37 20
James Kilroy, road list. 229 87

Motion by Crs. Clarke—Stanton that lot No. 14a R. 6 be entered as owned by Dr. W. R. Dowd and lot 4c, R. 3 be entered as owned by James Marks, Jr.—Carried.

A request from Paddy O'Hara to have the ditch on the side of the road cleaned to drain the property—Carried.

Motion by Crs. Young Clarke that Basil Stanton and John Hickey inspect this ditch and if possible deepen it.—Carried.

Herry Amm appeared requesting work on side road between lots 22 and 23, R. 4
Motion Crs. Stanton—Fraser that Wm. Draper be requested to spend some of his road labour on this road.—Carried.

Motion by Crs. Fraser—Young that 4 out of our 7 mill rate be expended for road labor—Carried.

A pamphlet re. corn borer control was read to the Council and the last week of May was recommended clean-up week.

On motion of Cr. Young the meeting adjourned.

Jos. A. STEELE
Secretary-Treasurer

Minutes of Council Onslow North

May 5th, 1941

The Municipal Council, Township of North Onslow met on the above date.

Present: Andrew Daley, mayor and Councillors, Young, Vallillee, Armitage, Martineau and Dagg.

Motion by Crs. Armitage—Dagg that the minutes of the last meeting be adopted as read.—Carried.

Motion by Crs. Armitage—Vallillee that upon application of Thos. J. Kearns that he be assessed for the S₁ of lot 15, Range 13 instead of the S₂ of lot 14, Range 11 at the same valuation—Carried.

Motion by Crs. Vallillee—Martineau that upon application of Harvey Steele that the South part of lot 14, Range 8 be assessed to Hiram Alexander instead of John Dougherty at same valuation.—Carried.

Motion by Crs. Young—Dagg that the following accounts be approved and paid:—

Patrick Rose, supplies. \$ 13 37
County rate. 61 25
Donald D. Farrell, cedars. 75 00
Thomas Alexander. 32 00
Adrien Martineau, measuring cedar. 1 00
James H. Dougherty. 2 50

—Carried.
Motion by Crs. Armitage—Vallillee that Ferdinand Philippe, road officer be instructed to remove sand and gravel from bridge on Pache creek on his di-

vision as soon as possible to protect said bridge.—Carried.

Letter of N. A. Drummond presented.

Motion by Crs. Young—Armitage that the Council name the third week for the month of May as the week for cleaning up all left parts of corn and corn stubble on each property where corn is grown.—Carried.

Motion by Crs. Young—Martineau that Paul Philippe, road officer be instructed to get a case of dynamite, fuse and caps to use on his division and have the account sent to this Council for approval.—Carried.

Motion by Crs. Martineau—Vallillee that Magloire Joannise be appointed road officer on the division formerly in charge of the late Godfrey Proulx and that Arthur Pellerin be appointed rural inspector and a member of the board of health for the coming term of office.—Carried.

Motion Crs. Martineau—Vallillee that Patrick Sheehan, road officer be instructed to put covering on bridge at Alex Lappiere's as soon as possible after covering is delivered.—Carried.

Motion Crs. Martineau—Armitage that this Council grant \$50.00 to be expended by Roy Young on Public road north of Joseph Hickey's residence to be expended as soon as possible.—Carried.

Motion Crs. Young—Vallillee that Leo. Davis be granted \$ 6.00 to grade the 7th concession with the truck.—Carried.

Motion by Crs. Vallillee—Martineau that John Dolan be appointed road officer on the division formerly in charge of Frank Curley as he has neglected to file his oath of office.—Carried.

Motion by Crs. Young—Martineau that this council grant \$ 50.00 to be expended by Patrick Sheehan on his division to be expended as soon as possible.—Carried.

Motion by Crs. Dagg—Martineau that the council adjourn until June 22nd, 1941.—Carried.

ANDREW FARRELL,
Sec.-Treas.

Poor Sunglasses Cause

Eye Strain, Astigmatism

Last summer a fad of wearing colored glasses was created by movie stars and other prominent persons who got behind the smoked glasses at first to hide, and then continued to wear them because of the air of mysterious glamour they afforded. The more hideous and streamlined were the blinders, the smarter they were considered, and many girls had different colored ones to match their wardrobes.

Inferior quality sun glasses, made from celluloid, poor blown or pressed glass, will add irregular astigmatism, myopia, hyperopia, or prismatic imbalance to the refractive mechanism. Consequently, they only increase the strain produced by the glare. The best advice to give on this score is: Buy your sun glasses from a reputable source and insist upon good quality, ground and polished protection lenses; and, if necessary, ground with your correct prescription.

Some advice which may save you trouble is that sun glasses are designed for day wear and should not be worn for night driving, as they lower visibility too much. As yet, no glass has been made which will overcome the glare of auto headlights and still be safe.

New Ore Fields

Alaska this year will produce between 50 and 60 tons of tin, and government geologists are reported to have found new fields of the ore in Arctic Alaska, Jack Underwood, manager of the Washington, D. C., bureau of the Seattle Chamber of Commerce, announced recently.

The known fields are being surveyed thoroughly and if the deposits are extensive enough a tin smelter plant may be erected in the Puget sound country. Miners have known of the existence of tin in Alaska for years, but since they were looking for gold, they didn't bother with it. Practically all of Alaska's tin ore is being produced at Tin City, in the Cape Prince of Wales area.

Underwood reports that a big force of government geologists is making a complete survey of Alaska's strategic mineral resources, with the hope of also finding chrome, which now comes from West Africa, and manganese, imported largely from Russia and Brazil.

He declared that some chrome is being mined in the Cook's inlet district and that quicksilver has been discovered in the Kuskokwim river area.

Cut Tetanus Death Rate

A plan of management which has reduced the tetanus death rate to 29 per cent as contrasted with the usual 50 to 70 per cent has been announced by Dr. Wyman L. Vener and Dr. Albert G. Bower of Los Angeles. The death rate was only 19.3 per cent for patients who survived the first 24 hours in the hospital, Dr. Vener said. Each tetanus patient is regarded as a surgical emergency, he declared, and regardless of the mildness of symptoms, immediate action is taken. "The prime object in the management of tetanus is to administer a minimum dose of 200,000 units of antitoxin in a definite period of 24 to 36 hours," he said.

IN MEMORIAM

CONNELLY—In loving memory of a dear sister, Jennie Morrison, beloved wife of R. J. Connelly who passed away May 6th, 1938.

Gone dear sister, gone forever,
How we miss your smiling face;
But you left us to remember,
None on earth can take your place.
A happy home we once enjoyed,
How sweet the memory still;
But death hath left a loneliness,
The world can never fill.
Ever remembered by sisters,
LORENA and FLORENCE

Government Studies Fit Of Children's Clothes

Children, hereafter, will wear clothes that fit them, if the U. S. government has anything to say about it. Until now manufacturers didn't use patterns that were accurate, aside from skimming on materials. As a result the outfits they turned out were either too big or too small for the boys and girls they were supposed to fit.

But Uncle Sam has corrected all this. With the aid of manufacturers, state universities and other agencies, the government recently completed the measurements of more than 100,000 children to find out just what a dress or a pair of pants for a certain age should be in terms of length and breadth.

These officials measured the youngsters from all describable angles and from all this laborious work arrived at a set of standards that should make things easier for fathers and mothers who have to buy children's clothes. The survey was conducted in eight states, with about 12,000 youngsters scaled in each of these states.

The measurements have been filed away in the bureau of economics, a branch of the department of agriculture and are now available to manufacturers who are willing to co-operate with the government in seeing that American children are dressed with the right fitting clothes.

Keys: Individualist's Salvation

Things are happening so rapidly these days that a man has to be mighty careful not to find himself stranded high and dry. Take the case of Dr. Collins LeMaster, dental X-ray specialist and professor at St. Louis university. He has decided to abandon his profession to become a beer-keg salesman.

Private hospital plans are springing up everywhere, he says, and from them it is only a hop to state medicine and a skip to state dentistry. A man of sterling independence, Dr. LeMaster is determined not to find himself on a government payroll.

The fact that the X-ray profession isn't what it used to be may have something to do with his decision. Also, he may be just a bit weary of lecturing about stereoeuroentography. How much easier it is to say: "Mister, want any beer kegs, today?"

But what if everybody takes to drinking beer out of cans?

Beauty of Co-eds Upheld

The male epigram that "four out of five girls are beautiful and the fifth comes to Michigan" is labeled "false, defamatory and libelous" in the 1940 edition of the Michiganensis, the University of Michigan yearbook. The alleged libel received widespread circulation when it was contained in a verse of a song in the last Michigan Opera. The yearbook presents 16 pages of photographs, evidence that the Ann Arbor campus abounds in lovely co-eds and in conclusion issues an edict making any person referring to a Michigan co-ed as a "fifth" liable to prosecution for contempt of the yearbook court.

Salmon Travels Plenty, Always Comes Back Home

While salmon are in the ocean they usually do not go more than 40 or 50 miles away from the mouth of the river by which they entered. This is a general rule, but it does not always hold true.

Salmon have been caught from 200 to 500 miles out to sea! Sooner or later a salmon goes back to fresh water. Most often it returns to the river in which it was hatched. Reaching fresh water, it starts upstream.

The fish eats little if anything in the river. Its body contains a store of fat, and this serves to supply food during the weeks or months it is on the way.

A waterfall in the river may be in the way of the salmon, but it has fine leaping power. It can jump six or seven feet high to get over a waterfall.

Many rivers have cascades, which rise in a river bed, one after another. Reaching a cascade, the salmon may make jump after jump until it reaches the top. Then it goes on with its upstream journey.

When salmon rivers are dammed, the government takes special steps "fish ladders," which are stairways of a sort, may be provided, or the salmon may be taken out of the river in nets and then transported by trucks to a point above the dam.

It is ever so important to help salmon get past the dam. Other wise the next year's hatch would be spoiled, and the salmon industry would suffer a blow.

Journeys of great length are made by some salmon. Those which go up the Yukon river often travel a distance of more than 2,000 miles.

Minutes of Clarendon School Board

May 7th, 1941

Clarendon School Board met on the above date. Present Chairman Hodgins, and Commissioners Walsh, Nurse and Hobbs.

Minutes of the last meeting were read and approved on motion of Comr. Hobbs.

Correspondence was read and discussed.

The following bills were presented for approval:—

R. P. Eades, supplies. \$ 3 20
W. A. Hodgins " 21 87
Harper Rennick " 36
Norman Smith, extra help. 2 00
Mrs. S. Towell, wood to No. 13. 24 20
Geo. Clarke " " 11. 24 48
C. Kobitaille " " 8. 30 00
Seymour Harris " " 12b. 6 00

Motion by Comr. Nurse that these bills be paid.—Carried

Comr. Wilson took his seat at the board.

The secretary presented resignations from several teachers to take effect at the end of June, 1941.

Motion by Comr. Wilson that these resignations be accepted.—Carried

Motion Comr. Hobbs that a discount of 3 per cent be allowed on all school fees which are paid in full before June 15th, 1941.—Carried

Motion by Comr. Walsh that Rev. A. F. Fokes be appointed deputy examiner and Rev. K. C. Bolton assistant examiner for the June examinations. Carried

Motion by Comr. Hobbs to adjourn.

JOHN A. DEAN,
Sec.-Treas.

The PENTHOUSE MURDER . . .

by CALEB JOHNSON

CHAPTER III

"I agree with Doane," said Henderson. "I'm funny that way, but the sight of bloodshed, or even the thought of it, turns me sick at my stomach. You gentlemen, in the police and the District Attorney's office, and practicing criminal law, naturally take it as part of the day's work. I'm going to have another drink before we get back to the business of the evening. Will you join me?"

Only Doane accepted, and the two drank another highball each while the others resumed their seats at the card table and Frazier began to deal.

"Sorry I started anything disagreeable, gentleman," Michaelis apologized again. "Dan, you ought not to talk shop when you're out in company."

"I'll talk nothing but poker from now on," grunted the Inspector. "It's a cold, dark night and I crave excitement."

"The excitement begins right now, Dan," said Max Michaelis. "Table stakes, all jackpots, I believe? Then I'll take the lid off this one."

He shoved a stack of blue chips into the middle of the table and the game was on.

"Poker isn't a game of cards; it's a game of human nature," was one of Dan Flaherty's aphorisms. After a few hands had been played he could tell more about the character of the others at the table than an ordinary man would learn by months of intimate association. With the poker technique of Martin Frazier, Archie Doane and Max Michaelis he was already sufficiently familiar to estimate almost to a two-spot the probable contents of their hands, by their expressions and manner when making their bets. Michaelis' friend, Williams, and the host of the evening, Elmer Henderson, were strangers, and the veteran detective gave his closest scrutiny to them.

The Players

Williams, he speedily decided, was a long-chance player, a victim of insatiable curiosity who cared little whether he won or lost so long as he got action for his money. Henderson, however, puzzled him.

Twice, when Flaherty was certain the other was bluffing and bet heavily upon that belief, Henderson fooled him by showing the winning hand. Yet more than once, when the Inspector had folded a good hand of his own, convinced that the inventor held higher cards, the other had laughingly shown a worthless hand as he raked in the pot.

Dan Flaherty's respect for the slender young inventor mounted rapidly as the game went on.

Archie Doane, however, was not playing in his usual form. It was clear to Dan Flaherty that something was worrying the actor. It was not hard to guess that his thoughts were upon Lydia Lane and the possibility that the rendezvous which had kept Stephen Fitzgerald from joining the party in Henderson's bungalow had some connection with her absence from her own apartment. Doane was playing mechanically, without enthusiasm, seldom backing his hand and then, as often as not, laying down what would have been winning cards. His customary brilliant and courageous style of play was noticeably absent, and Flaherty was not surprised when, after an hour and a half, he announced that he had had enough.

"Don't let me break up the game, gentlemen," he said. "There still will be five of you. I'm not up to it to-night, that's all."

He settled for the several hundred dollars worth of chips which he had lost, took a final drink and said good night.

Henderson escorted Doane to the elevator.

"Worried About His Girl" Archie worried about his girl," said Flaherty, as soon as the two were out of earshot. "He isn't any too sure of her."

"My guess is that Henderson's a bit touched in the same quarter," suggested Frazier. "He was pretty quick to come to her defense, when I made that bad break a while ago."

"I'm not on," said Max Michaelis. "Who's the dame?"

"I forgot you weren't here," Frazier apologized. "I made a fool break about Lydia Lane and both Henderson and Archie snapped me up. If Henderson isn't sweet on her, then I'm a bad guesser. But Archie announced that he's going to marry her."

"Lydia Lane, eh?" echoed Max Michaelis. "Well, there are plenty of 'em in the pictures with worse reputations than hers. I don't know much about her as a matter of fact, except that she's a good looker and never has been mixed up in a public scandal. Archie ought to know what he's about."

"But Henderson seems to be as good a sport in love as he is at cards," he continued. "If you're right, that is, about his having had aspirations in the fair Lydia's direction. A game little chap, I should say. Sensitive and high strung, but certainly under splendid self-control."

"He's a great poker player, all right," grunted Dan Flaherty. "He sure plays 'em hard to figure," Michaelis agreed. "He's had me fooled a dozen times."

Henderson rejoined them and the game was resumed, with the stacks of chips in front of the host of the evening steadily increasing.

"My lucky night, I guess," he said, after he had raked in another big pot, half an hour or so after Archie Doane's departure. "It's eleven o'clock, and that's drinking time. Deal me out this hand, please. I told my man he could go down to play pinocle with the night watchman in the basement, and I'll have to find the whiskey myself."

(Continued next week)

Good Legs Due To the Muscles

Calf-to-Ankle Line Must Have Definite Taper

Some fat ladies have frail legs, others possess legs that are not so frail. And some very slim girls have a well turned calf and ankle. All of this would seem to show it's not weight nearly so much as musculature, writes Alice Wade Robinson, beauty editor.

Of course, weight may be a general problem. An overweight with disproportionately large legs needs to diet to lower her weight. If her leg muscles are flabby, special exercise will bring about a marked improvement. The thin girl with underdeveloped legs must have more calories to gain on, plus exercise to round out the leg contours. To lose weight, overweight with thin legs needs a similar set of exercises along with her diet.

Thick bones can't be changed, but well-toned muscle is shapely and it tends to give you shapelier contours, including that tapered line from calf to ankle on which legs are judged.

Perfect measurements differ according to structure. For instance, the slight girl may have perfect legs measuring from 11½ to 12½ inches at the calf, and from 7½ inches to 8 at the ankle. A more solidly built girl may have legs equally good but measuring from 12½ inches to 14 at the calf, and from 8 inches to 8½ at the ankle.

Mother

All that I love is linked to you,
All that I am or have or do,
The background of my life was spread

By your wise hands. My baby head

I see, as pictured mem'ry now
Against your breast. I see your brow

Above its tasks, our hands your eyes

All through the years, 'neath alien skies

You went with me and kept me strong,

You gave me strength when things went wrong.

You spoke, from memoried years, and kept

Your child yours still. Your blessed text

Of life you gave me — wordless creed—

Love, mother-love, for all my need.

—Rena Chandler.

FLATTERING LINES For Larger Figures

By Louise Lennox

With softer, more feminine styles taking their rightful place in fashion this Spring, you'll want to include this dress in your wardrobe. Designed with the more mature figure in mind, this charming frock has soft detail in the bodice and sleeves. The heart-shaped neckline and gored skirt make you look slimmer and younger because they are flattering to a larger figure. A flower print in soft colors that harmonize with your coat and new accessories is a wise choice for all season wear.

Style No. 2877 is designed for sizes 14, 16, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 3½ yards of 39-inch fabric. Send twenty cents (20c) (coin is preferred) for pattern to Louise Lennox, Room 421, 73 West Adelaide St., Toronto. Write plainly your name, address and style number. Be sure to state size you wish.

* Two Nabisco Shredded Wheat with a cupful of Milk and Fresh Fruit. Start the day right with this delicious, nourishing whole wheat breakfast. At all food stores, ask for it by the full name "Nabisco Shredded Wheat."

THE CANADIAN SHREDDED WHEAT COMPANY, LTD., Niagara Falls, Can.

MADE IN CANADA - OF CANADIAN WHEAT

Pigeons Are Popular Food in England

Pigeon pie—luxury dish of past centuries—is coming back into fashion.

London pet dealers are selling hundreds of pigeons to housewives to help out their rations.

The cockney street pigeon and wood pigeons make good dishes boiled or baked. The pigeons are sold at 9d. to 1s. each.

"I could sell hundreds of pigeons in a week," said Mr. G. E. Palmer, of Parkway, London.

"They are very tender if cooked like rabbit."

Women To Work At 1941 C.N.E. For War Victims

Six Large Workrooms Being Set Up in Women's Building Will Prepare Bales of Supplies For Sufferers in Fourteen Bombed Cities of Britain

This year, the women of Canada are playing an increasingly important part in national life. Not only in their essential work in the home but also in the war effort, in industry and in social services, the Canadian women are

taking more and more responsibility. The heads of the C.N.E. feel that there is no better place to show tangible evidence of this work than at the 1941 Exhibition.

Six large workrooms are being set up in the Women's Building—will hum for fourteen days with work for the men of the Army, Navy and Air Force. And on each one of the fourteen days boxes will be prepared and packed to be sent to succour air-raid victims in the fourteen worst-bombed cities of Britain. Demonstration work from the War Emergency Classes will be staged daily. A special competition in quilts for air-raid shelter use will be one feature of war work.

So much water is discharged by the Amazon River, of South America, that the saltiness of the Pacific Ocean is weakened up to a distance of 150 miles from the coast of Brazil.

Table Talks By SADIE B. CHAMBERS

SPRING QUICK DISHES

Now is the season when housewives are giving a good deal of thought to time-saving dishes and always too having economy in mind. Housecleaning is the order or disorder of the day; then everyone likes to spend as much time as possible in the garden. Try this menu, one of the attractive features of it is that one oven will take care of all:

Noodle-Ham Casserole All Bran Muffins Apple Strudel

The Noodle-Ham Casserole and Apple Strudel may be prepared for baking and the muffin batter mixed and placed in the muffin-pans. The dishes should be covered closely with paper or lids and the muffin pans wrapped in waxed paper to exclude the air, then stored in the refrigerator and kept at room temperature until ready to bake. All will bake in a moderately hot oven in less than thirty minutes. Set the table, toss together a simple salad and presto—dinner is served.

Noodle-Ham Casserole
½ lb. fine noodles or macaroni
2 quarts water
1 teaspoon salt
2 tablespoons butter
1 tablespoon flour
2 cups stock
½ teaspoon salt
½ teaspoon pepper
½ lb. cooked ham
¾ cup Rice Krispies
1 tablespoon melted butter
Dash paprika

Cook noodles in boiling water to which salt has been added. Drain. Melt butter in saucepan. Add flour and stock which may be made by dissolving 2 bouillon cubes in 2 cups boiling water. Stir until thickened. Add salt and pepper. Dice ham and mix with noodles. Add thickened stock. Pour into casserole. Crush Rice Krispies over top. Sprinkle with melted butter. Add paprika. Bake in moderately hot oven 20 minutes.

Yields—6 servings.

All-Bran Muffins
2 tablespoons shortening
¾ cup sugar
1 egg
1 cup All-Bran
¾ cup milk
1 cup flour
½ teaspoon salt
2½ teaspoons Calumet Baking Powder

Method: Blend shortening and sugar—Add egg and beat well. Add All-Bran and milk; let soak until most of moisture is taken up. Sift flour with salt and bak-

ing powder; add to first mixture and stir only until flour disappears. Fill greased muffin pans two-thirds full and bake in moderate oven about 30 minutes.

N.B.: If sour or buttermilk is used instead of sweet milk use ¼ teaspoon soda and 1 teaspoon baking powder.

Apple Strudel
Line a buttered baking dish with Kellogg's Corn Flakes. Cover with layer of very thinly sliced cooking apples. Sprinkle with light brown sugar, a little cinnamon and dot with pieces of butter. Fill to top with alternative layers, finishing with Corn Flakes. Cover dish closely; bake in a moderate oven until apples are soft. Serve with cream.

Miss Chambers welcomes personal letters from interested readers. She is pleased to receive suggestions on topics for her column, and is even ready to listen to your "pet peeves." Requests for recipes or special menus are in order. Address your letters to "Miss Sadie B. Chambers, 73 West Adelaide Street, Toronto." Send stamped, self-addressed envelope if you wish a reply.

POSTUM

Harmonious Color Scheme

Bedroom Decoration Should Be Planned For Restful Atmosphere

Regardless of whether it is to be simple or luxurious, every bedroom should strive to create an atmosphere of peace and quiet. Soft harmonious colors best serve this end.

Rooms in which white predominate are in wide favor today, and soft shades of white are frequently used for bedroom walls and ceilings when they are offset with appropriate bits of color.

Most bedrooms have enough windows to provide cross ventilation, but if this condition does not exist, the addition of transoms over doors and enlargement of windows may be desirable. Addition of such features as built-in bookcases, reading lights at beds, and full-length mirrors entail no large expense but add much to the comfort and appeal of the room.

Saving Ontario's Natural Resources

G. C. Toner
Ontario Federation of Anglers and Hunters
(No. 41)
TWO KINGDOMS

Carolus Linnaeus, the ex-theologian, who was the author of the modern scheme of classification of all plants and animals, lived and did most of his work in the early part of the eighteenth century. The book in which he outlined his plan and named the animals and plants according to this plan he called "Systema Naturae" and was revised by him many times. We have agreed that our system shall be founded on the tenth edition of this book and any names proposed before that time shall be null and void.

All biologists and naturalists must be familiar with the Systema Naturae for it is the backbone of their scientific work. It is written in Latin but fortunately for many of us it has been translated into English. However, often times the naturalist must consult the original when publishing scientific studies. My Latin is weak and I have torn my hair many times trying to get the exact meaning of the great naturalist's words. So the moral for my young readers is to study Latin as ardently as they study the plants and animals.

Plants and Animals

It is a pity that the same term is used by the scientist for all living creatures except plants as is used in common language for the four-footed hairy animals that suckle their young. The scientist divides all animate creatures into either the plant or animal kingdoms. The plant kingdom includes the bacteria, the blue scum on the water, the fungi and the biggest of trees. The animal kingdom includes the microscopic creatures of the water, the sponges, the lobsters and crabs, the insects, the fishes, the frogs and snakes, the birds and the mammals. It is the mammals that the ordinary folk call animals but my readers can readily see the distinction I have outlined. Animals, to the scientific mind, include all living creatures that are not plants; mammals is the term used for the animals we know in everyday life.

"THE HERITAGE OF HATCHER IDE"

By Booth Tarkington

This new novel from the pen of Booth Tarkington stands with the greatest of his work. In it the famous author of "Penrod," "Seventeen," "Alice Adams," deals sympathetically, humorously with the problems of present-day youth.

Hatcher Ide, the story's hero, is a flesh-and-blood young man whose task it is to make a living in this day and age, to orient himself in the problems of love and the general complexities of existence. He lives in a once-prosperous mid-western town which might be any American town after the 1929 depression wave broke. His father's business is on the rocks; his father's friends keep up a bold front on scanty incomes; the world Hatcher knew as a child is a different world now, none too cordial to young men fresh from college.

The book provides an amazing picture of the times as well as telling us the story of how Hatcher goes out to meet life and love.

"The Heritage of Hatcher Ide" . . . by Booth Tarkington . . . Toronto: McClelland & Stewart, Publishers . . . \$2.50.

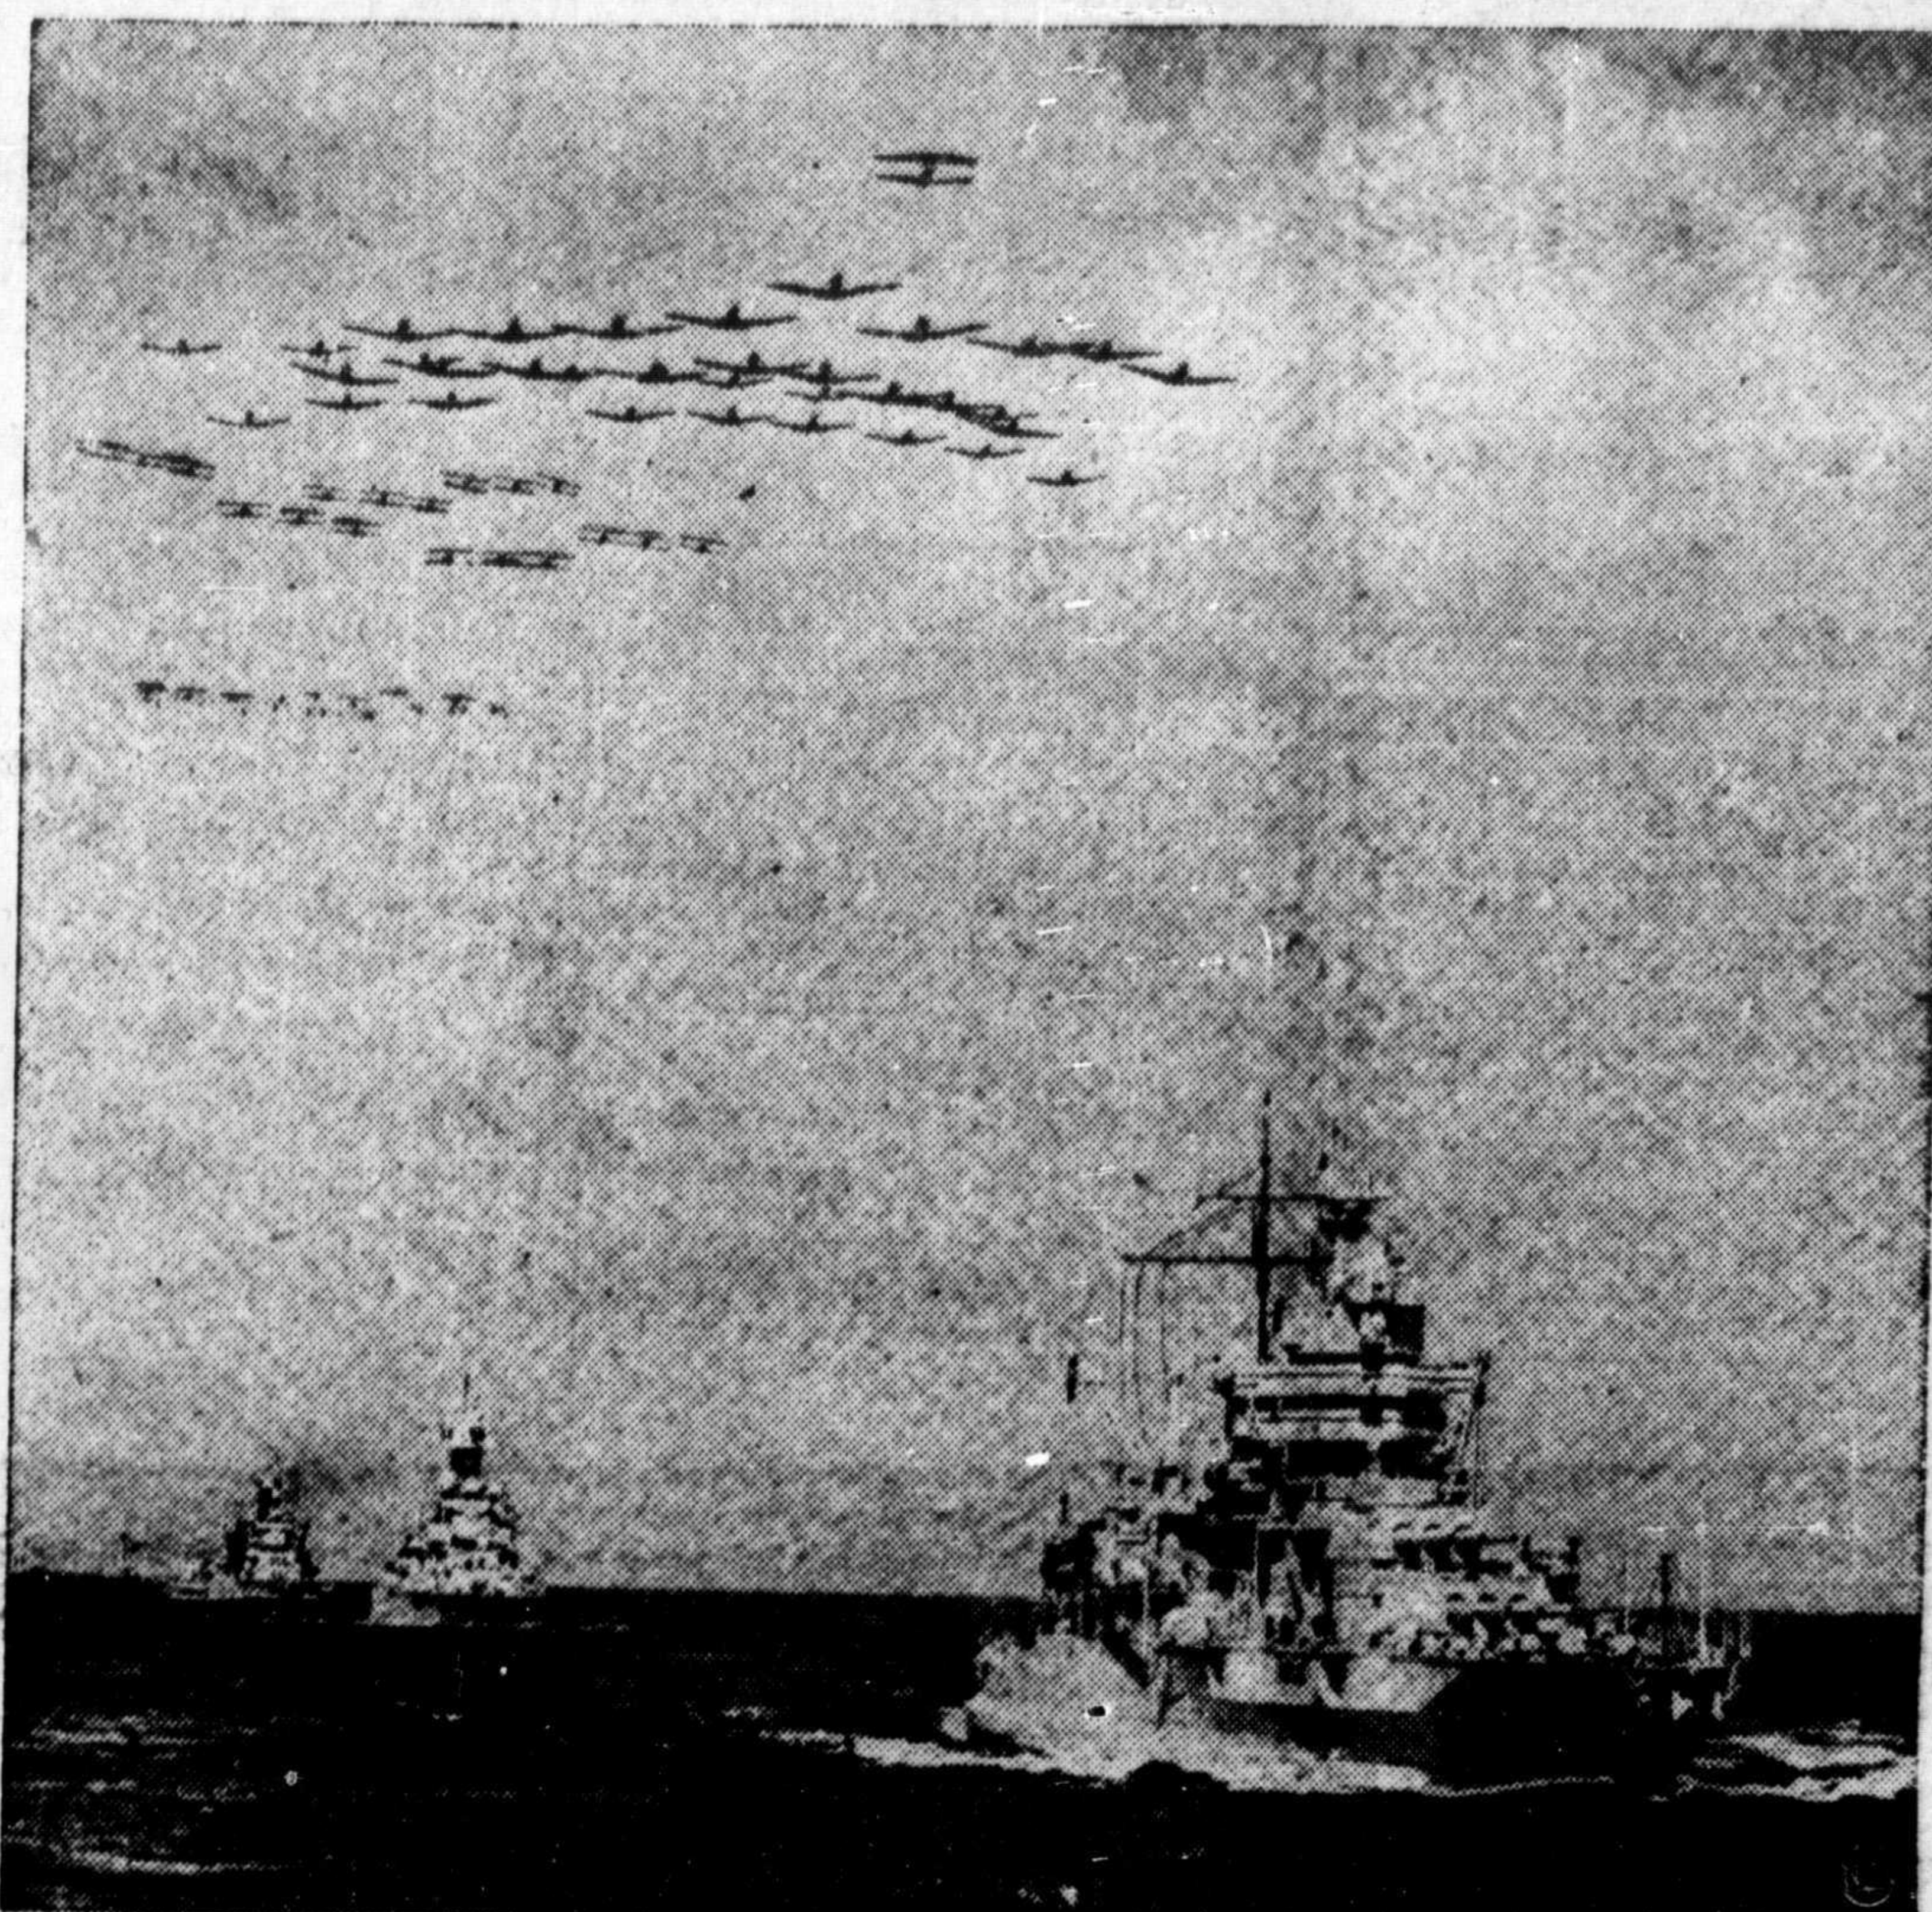

Poison Ivy Preventive Revealed by Doctor

In New Orleans last week for a dermatologists' convention, Dr. Bedford Shelmire had this tip to offer poison ivy sufferers: "Boil ivy leaves in ether, evaporate the ether and dilute the residue with corn oil. Make up capsules from this and swallow them over a period of months, gradually increasing the doses until you are taking 10 drops a day. It takes with most people, immunizing them."

Health of Animals

There are 22 railway points in the Dominion at which, according to regulations, all empty stock cars arriving or passing through are cleansed and disinfected under the supervision of the Health of Animals Division, Dominion Department of Agriculture, unless the cars have already been cleansed since last used for stock. During the year ended March, 1940, 68,468 cars and 8,618 trucks were so treated.

U.S. FLEET STEAMS NEARER TO BATTLE OF ATLANTIC

As American warships assume their peril-fraught roles of "interested bystanders" in the Battle of the Atlantic, the projected two-ocean U.S. Navy is estimated at Washington to be four years away from completion.

Nevertheless naval authorities are pleased by the way in which the shipyards are cutting construction time. Workmen in the U.S. Navy yards as well as in yards owned by private concerns are driving steadily ahead as fast as the material is delivered.

A good sample is the 1650-ton destroyer Edison, now in commission. This vessel was constructed in 10 months. Some years ago the regular period of construction was 31 months. This now has been slashed until the average is 15 months.

The two most welcome additions to the navy of course are the battleships North Carolina and Washington, the first completed since 1921. They both are 35,000-ton vessels. Their main armament is 16-inch guns, mounted in three turrets, three per turret. They also carry a heavy battery of anti-aircraft and secondary broadside guns. They are propelled by turbines developing 115,000 horsepower from oil-fired boilers and giving a speed of 27 knots. Each is equipped to carry three planes.

THE WAR WEEK—Commentary on Current Events

HIGHEST TAXES LEVIED IN CANADIAN HISTORY

"We must be prepared for an extension of fighting over wide areas . . . Canada is determined to spare neither her resources nor her manpower . . ."
—Prime Minister Mackenzie King.

Never before in their history have Canadians been called upon to make such a tremendous contribution to the national coffers as that demanded by Finance Minister Ilsley in his Budget address last week before the House of Commons. Out of every dollar earned this year by Canadian men and women, 45 cents will go out of their pockets by way of taxes or loan to finance the war. If provincial and municipal levies are also taken into account, 55 cents out of every dollar will be needed.

Hardest On Income

Now and increased taxes designed to increase Canada's tax revenue in 1941-42 to the all-time high of \$1,400,000,000 included: A new national gasoline tax, upping the price 3c a gallon; increase in tax on automobiles valued up to \$900, from 20 to 25 per cent; motion-picture shows, beer, wine, playing cards, carbonic acid gas used in "pop," cigaret paper tubes, cigaret lighters, all pay new or increased levies; a 10 per cent tax on all railway, bus or airplane tickets costing over 50 cents; tax on cosmetics, toilet goods, rose from 10 to 25 per cent. But nothing in the Budget hit the average Canadian as hard as did the increases in the defence tax and the income taxes—personal income tax rates were upped to 15 per cent on the first \$1,000 of taxable income, from the present rates of 6 and 8 per cent.

In Britain's Dark Hour

This Biggest Budget, brought down at the end of a month when the fortunes of Great Britain had fallen to one of the lowest points in her proud record, made history by including provision, for the first time, of direct aid to Britain. From \$800,000,000 to \$900,000,000 was asked, to assist in financing Bri-

tish purchases in Canada this year.

Mr. Ilsley's record-breaker followed by one day Prime Minister King's statement to the reconvened House in which he declared that Canada would spare neither her resources nor her manpower in the forthcoming battle. During the week, too, more than 5,000 of the four-month 21-year-old trainees were conscripted into the Canadian army and preparations were made to draft many more young men this summer.

Belt Across Atlantic

But it was largely to the United States that Great Britain looked in her hour of direst need. And last week the President, to aid Britain by cutting losses of Lease-Lend materials shipped overseas (rumors said 40 per cent of them were being sunk), took action which brought the American nation "only one step from war." He established the equivalent of a convoy system in the North Atlantic. As far as the coastal waters of Iceland (a belligerent zone) the U. S. navy began sending warships, patrol bombers and in all probability carrier-based aircraft, to play a vital role in the "Battle of the Atlantic." The potential effectiveness of this whole far-flung surface and air patrol in dealing with Nazi submarines and raiders was seen as tremendous. "Red Fleet," organ of the Soviet navy declared that the extended U. S. naval patrol in the Atlantic would enable the United States and Britain to "establish a solid belt from Canada to Britain, thoroughly protected from the air."

Words of Cheer

Speaking more hopefully of the outcome of the Battle of the Balkans than many of his contemporaries, Major George Fielding Elliot, U.S. military expert said: "The facts are that the Balkan war has been a net gain for Britain as long as Suez and Alexandria are not lost; that precious time has been gained, that Germany has been compelled to use up resources of

another and go at Suez without touching Turkey. One London source spoke of the coming engagement as the "Battle of Egypt" and told the United Press its outcome might decide whether Japan and Spain would enter the war as active Axis allies. British preparations for the test included appointment of Viscount Gort as commander-in-chief at Gibraltar and implied announcement that a second Mediterranean mine field, 600,000 miles square, had been laid to protect the Dardanelles and Suez. Reports from Vichy hinted of an approaching showdown, with Hitler forcing the Turks to grant him military right of way to the Persian Gulf of Suez.

Behind the Turks

Recent developments in the Near East have led to the assumption that the Turks, when the Hitler-squeeze finally comes, will be guided by the wishes of the Soviet Union. Associated Press correspondent Dewitt Mackenzie last week wrote that Turkey was believed ready to defy the German demands if she got the high-sign from the Kremlin. That this encouragement from Russia might very well be forthcoming was seen in reports of increasing tension between Germany and the Soviet Union—12,000 German troops, equipped with tanks and artillery arrived in Finland, Russia's nearest northern neighbor; and the Soviet Union took steps to regulate strictly all shipment of goods to Germany, clamping a ban on passage of any war material through the Soviet Union from east to west, or vice versa.

VOICE OF THE PRESS

WHAT DOESN'T APPEAR

Most of the people who claim the home town paper doesn't print all the news should be glad it doesn't.

—Hanover Post

RUSH JOBS NOT WANTED

We do not believe it is wise to rush medical students through university, through their courses, whether for the army or not, for there is nothing more potentially dangerous than a poorly-trained medical man.

—Niagara Falls Review

Bee Hive Golden Syrup

Sweeten Cereal, Puddings and Fresh Fruit.

WOMEN ON JURIES

It seems strange that so simple a matter as women serving on juries should have proven so difficult for the legislature to reach a decision upon. While the men hesitate, large numbers of women continue in forthright manner to shoulder home and public responsibilities, admirably performing tasks which require the exercise of knowledge, judgment, skill, precision and tact. Many have replaced men in industry, commerce, professions, etc., who have thus been released for military service. Many women are doing work which it was thought only men could do. Thousands of women are earning a livelihood for themselves and supporting dependents and while doing this are also running their homes, bringing up children, and in addition some are active in public affairs.

—Toronto Star

Forty rabbits will eat as much fodder as a dairy cow; only four rabbits are required to out-eat a sheep.

Mother's Day

TO MOST of us, our first inspirations to face life squarely, to find and give the best, have come through the teachings and example of a good Mother.

It is our Mother who by her unwearied devotion to her children has instilled into our minds the virtues of a full and unselfish life.

All too often as we get older and have to face the responsibilities of life alone, we overlook the debt we owe Mother. We do not altogether forget. But somehow, there are so many demands on us, we just take Mother for granted. We know Mother's love never grows cold. It is there for us to command.

Sunday is Mother's Day! Let us do something this Sunday to show Mother we think a lot of her. You will never be able to pay back all you owe her. But some little tangible token of your affection will feed the soul . . . your own as well as your Mother's!

QUEUES OF HOUSEWIVES FORM BEFORE LONDON FOOD STORES

The faces of these London housewives reflect the increasing shortage of foodstuffs in the British Isles due to the ever-tightening German counter-blockade. Eggs from Canada, along with other provisions are doled out on a ration basis.

REG'LAR FELLERS—The Mechanical Lady

By GENE BYRNES

Tree Planting Day

On Friday of last week, during the forenoon, the number who took part in tree planting on the Shawville Fair grounds was rather limited, but by arrangement Mr. Alf. Armstrong had almost 100 small trees, mostly evergreens in readiness for loading when Mr. G. A. Howard's truck and driver, accompanied by Vice-President Lorne Armstrong, arrived there to convey them to the Fair Grounds. There was not sufficient labor to place all that day, some being left over to Saturday. However something has been done. May the trees and the labor gang increase in size by 1942

Presentation

On Wednesday, April 30, a few friends gathered at the home of Mr. and Mrs. G. Smith, Morehead, in honor of Mr. and Mrs. Irvin Robinson, who will take up residence at Westmeath for the summer months.

On behalf of the neighbours, Mrs. Ezra Grant, read a suitable address, and an Alladin lamp was presented by Miss Muriel Smith, as tangible proof of the esteem in which Mr. and Mrs. Robinson are held.

Mr. and Mrs. Robinson replied to the address and thanked their friends for the lovely gift.

St. Andrew's W. M. S.

The regular meeting of the W. M. S. of St. Andrew's United Church, Bristol, was held on Wednesday, May 7th, with the president, Mrs. W. J. Murray, presiding.

The regular routine of business completed, plans were made for the Mission Band rally which is to be held in Saint Andrew's on May 17th with Mrs. Steel, the district representative present. On the evening of May 23rd the Society is looking forward to having Miss Adair of South Ferosa. Mrs. Murray read the report of the sad and untimely death of our prayer partner, this year, Miss Armstrong of New Brunswick, who had been accidentally killed in a motor accident.

Starks Corners Women's Institute

The regular meeting of Starks Corners Women's Institute was held at the home of Mrs. M. R. McGuire on Thursday evening, May 8th. The meeting was opened by the president, Mrs. McGuire.

Nine members and several visitors were present. The roll call was "a pleasing arrangement of flowers in a bouquet." An exchange of seeds, bulbs was made.

Mr. N. A. Drummond, agronomist, gave an interesting talk on "the use of commercial fertilizer in the farm garden and how to get rid of garden pests."

Tea was served by the hostess assisted by Mrs. J. D. Brown and Mrs. Kenneth Pirie.

Mr. and Mrs. Sydney Draper Honoured

A very pleasant evening was spent at the home of Mrs. Garretty on Thursday, May 8th, when a miscellaneous shower was held in honour of Mr. and Mrs. Sydney Draper.

The many lovely gifts were presented by Misses Jean Stephens and Muriel Cundell while Miss Lois Garretty read the following address:-

Dear Mr. and Mrs. Draper,

On this occasion we extend to you our most sincere sympathy concerning the loss of your home and contents and ask you to please accept these gifts as a token of our friendship for you.

Your Friends and Neighbours

Mr. Draper thanked those present for their kindness and consideration after which refreshments were served.

Wild White Clover

In showing how Canadian wild white clover can be utilized to assist in meeting the present requirements for pasture mixtures, the Agricultural Supplies Board has issued a comprehensive bulletin of the War-Time Production Series dealing with the subject. White clover is essentially a pasture plant. No other legume is so widely used in pasture mixtures throughout the countries of the temperate zone or so well suited for grazing purposes. In Canada it grows wild and under cultivated conditions throughout Ontario, Quebec and the Maritime Provinces, persisting in some areas for decades.

While many countries have developed white clover seed production to a point where domestic requirements can be supplied and even exported in considerable quantities, Canada has depended largely on imports to supply her needs. This imported seed has consisted mainly of common white clover from European countries and lesser quantities of wild white clover from Great Britain and New Zealand. Preliminary tests with Canadian white clover indicate that it merits a good deal more attention than it has received in the past. The harvesting of seed from permanent pastures in Eastern Canada while helping to meet present requirements would encourage a more general use in permanent mixtures. The bulletin which is entitled White Clover in Canada, shows how this can be done. It can be obtained free from the Publicity and Extension Division, Dominion Department of Agriculture, Ottawa.

CANADA CALLS

Canada has reason to count her blessings in these days of trial.

Canada is three thousand miles away from the sound of guns which are devastating Europe.

The broad Atlantic Ocean rolls between us and the ruthless savagery of the German Armies.

The strongest fleets in the world—British, American and Canadian—patrol the sea between us and the enemy.

We have a great friendly nation, probably the richest and most powerful in the world, at our side.

CANADA CAN AFFORD HER SACRIFICES

This war is a mechanized war.

We have the nickel . . . copper . . . lead . . . zinc and other metals the war industries need. We have access to the iron. We can make the steel.

We have the organized industries to fabricate these metals and make the trucks, and tanks, and guns, and planes, and the ships.

We have skilled workers and the plants for mass production. Canada has the wheat and the food supplies.

Let us count our blessings, and tighten our belts.

Canada is rich—one of the richest countries per head of population in the world. Let us lend our strength to the utmost of our power. Our national future depends upon Victory.

We must win to live.

THERE WILL BE FURTHER CALLS

There have been many calls upon the people of this country for money since Canada entered the war at the side of Great Britain.

There will be further calls.

Let us face the future unafraid.

Canada can carry the load.

But every Canadian must shoulder his and her share.

This is the most critical hour in our history. Let the future historians say of Canada, as they will say of our Mother Country: "This was their finest hour."

Get under your load...and LIFT
