AMERICAN NEWSPAPERS.

FROM the 1st of May, 1850, the undersigned, as AGENT, proposes to furnish every facility to the citizens of Montreal, for securing the STANDARD WEEKLY NEWSPAPERS, that is now given in most of the large towns of the United States, thus saving at least one-half of the present cost of obtaining American Papers in Canada.

It is presumed subscribers to American papers do not generally realise, in many instances, that the Subscription Price is only about one-third of the cost of obtaining them.

For example, a paper published at $1,00 per annum in the States, costs delivered in Montreal, a fraction less than $3,00, including American and Canadian postage. A paper published at $2,00 amounts to $4,00, and in either case where the paper is delivered at the residence of subscribers, an additional penny is required, thereby increasing the expense nearly one dollar.

The Agent proposes, if a sufficient number of Subscribers can be obtained, to any paper of merit published at $2 00 per annum and upwards, to deliver it at the Depot in Montreal, at the publishers' prices, or at the residence of the subscribers, with one half-penny each time to be paid to the distributor.

If sufficient encouragement is given, a good Daily paper will be supplied upon nearly the same advantageous terms.

Orders for the present will be received for the following, which are among the most esteemed and "time honoured" Weekly Newspapers published in the United States, viz:—

THE NEW YORK EVANGELIST, embracing Religious, Domestic, Foreign and Miscellaneous Intelligence. Price, $2,50 per annum.

MORRIS & WILLIS' HOME JOURNAL, of pure Literature and Science and Art. Price, $2,00.

SATURDAY EVENING POST, devoted to Literature, Foreign and Domestic News, Agriculture, Commerce, Science, Art, and Amusement. Price, $2,00.

THE NEW YORK TRIBUNE, at $2,00 per annum.

THE WEEKLY TRIBUNE is printed on a large double medium sheet, making eight pages of six columns each, and contains the choicest matter of the daily issue. The publishers in their prospectus state; they are "resolved that no American journal shall exceed the Tribune in the variety, extent, or accuracy of its Intelligence, while to Literature, Poetry and Art, they devote all the space that can be spared from the topics of the day."

Lists for Subscription are open at the UNITED STATES BOOK AND PERIODICAL DEPOT,
197, Notre Dame Street.

Agent.

COOKING STOVES.

THE Subscriber would call the attention of the public to his large assortment of IMPROVED COOKING STOVES, selected with great care and adapted for summer, as well as Winter use. These Stoves are constructed with a strict regard to economy and convenience. The Ovens are large and bake even, and the Fire-place is made smaller for summer use, and the fire brought nearer to the Boilers, so that but little fuel is required for ordinary purposes.

Purchasers are requested to call and examine the various patterns at the Stove Warehouse of

HARDWARE.

THE Subscribers being disposed to relinquish the RETAIL DEPARTMENT of their business, are prepared to treat with parties, for the sale of the STOCK and GOOD WILL. The present assortment is principally new, and in good condition, and is, in every respect, the best Retail Stock in the city. Their usual importations will be received by the first spring vessels, and such portions of it as were intended for their Retail would be included in the sale. The business has increased rapidly, every year, since its commencement, and notwithstanding the general depression in the Retail Trade, for some time back, the present year forms no exception. The Subscribers have no hesitation in saying, that the Establishment is the most flourishing and extensive one of its kind in Canada, and that it offers inducements to parties desirous of embarking or extending in the RETAIL HARDWARE LINE that are rarely to be met with.

A LEASE of the STORE and such other parts of the PREMISES as would be required, can be obtained from the advertisers, for three years, from the first of May next, and they have no doubt but that a favorable arrangement could be immediately made for a further Lease, if required.

The Subscribers take this opportunity of gratefully acknowledging the patronage of their numerous Retail Customers, and beg to inform them, that as with their assistance, they have been enabled to establish a business which is too good to close, they will carry it on as heretofore, unless they meet with a desirable successor, for whom, or themselves, as the case may be, they beg respectfully to solicit a continuance of the valuable support hitherto extended.

REVIEW.

The Philosophy of Railroads:—By Thos. C. Keefer, Civil Engineers. Published at the request of the Directors of the Montreal and Lachine Railroad.

We have had this very valuable and clever treatise of which the above is the title in our hands, under our eyes, and twitting our conscience for the last three weeks or more, and we confess, compunctively, to having devoted our time and attention far too exclusively of late to questions of ephemeral and transient policy, when contrasted with the subjects of material and permanent interest, which are embraced in the Pamphlet now lying before us. We turn, therefore, with feelings of relief, from Annexation—political annexation, with all its perils and all its facilities,—to another description of annexation, to the virtues and properties of which we cheerfully subscribe—to Annexation by Rail.

We have opposed and ever shall oppose Annexation [illegible] United States of America, not from any distaste to the Americans, nor from any repugnance to their institutions—far from it; we sincerely respect the American people, we admire the American character, we admire their intelligence, their energy, their enterprize. We believe their institutions to be peculiarly adapted to develope the resources and impel the progress of a new country, we would gladly see the principles and elements of those institutions more largely infused into our own, but we wish to see it done under our own flag, by our own Legislature, at our own time.—The Constitution of the United States is but the concentrated essence of all those popular constitutions which during a period of one hundred and fifty years the English plantations in America had derived from England. At the period of the Revolution the American mind had been schooled to self-government by a century and a half of experience and practice. The change was, in reality, no change at all. The United States continued to progress and to exercise the same constitutions which the people and the Monarchs of England had originally conferred on them. In invading the just rights of the people of America in 1775, England did treason to her own institutions. In losing those splendid possessions she might have said, truly, in the beautiful language of Byron, as applied to the dying eagle:—

Keen were her pangs, but keener far to feel
She nurs'ed the pinion that impelled the steel.
While the same feathers which had warned her nest,
Drank the last life drop from her bleeding breast.

But with us in Canada it is widely different.—From the heterogeneous and abnormal character of our population we know that it is both unprepared and unfit for any sudden transition. An abrupt change would be but another word of anarchy. We know that our present system of government, whatever may be its defects, possesses all necessary scope and capacity for improvement, we look with confidence to the Legislature of the country for all such improvements and reforms as may safely shorten the period of a wise probation and adapt us to the full enjoyment of those Anglo-Saxon institutions which ever have and ever will adjust themselves, with wondrous elasticity, to the predilections and requirements of the Anglo-Saxon race, all the world over.

Awaiting despatch, while in progress and in expectation, we invite and welcome every means of improving, of enlightening, of *intellectualizing* our people, and as the first, the most rapid and the most potent of modern civilizers, we hail with eagerness the advent of the rail. The "schoolmaster" whom Brougham some five and twenty years back, sent "abroad" so triumphantly and oracularly, has found at last, and found in the locomotive, a befitting steed. We read lately in the *London Times*, of a project of a Railroad from Calais in France to Mootan in the West of India—from the Straits of Dover to the banks of the Hydaspes—a project which John Bull avers will rival in magnitude and in audacity any project of Brother Jonathan—a project which embraces an *inconsiderable* distance of some 3,3 0 miles, and a *trifling* expenditure of some £35,000,000. In the old steady going times of stage coaches and "Leith smacks" the would have been something, but in these locomotive days *nous avons changé tout cela.* The comments nevertheless of the Times upon this project in a moral point of view, are worthy of that great, but unequal and eccentric journal. It dilates eloquently on the benefits which such a project if completed would confer upon mankind, by promoting inter-communication, intercourse and interchange, by teaching man his dependence upon his brother man, and reducing ultimately all differences of race and country to a mere difference of complexion and costume. And so it will be with annexation by rail. Let us bring the people of Canada and the people of the contiguous States into close and constant contact; let us bring the laws and the institutions of both, and the every-day working of those laws and institutions into juxta-position and hourly comparison, and then, if the people of the United States are as enlightened in the mass as we believe them to be, and as practical in their enlightenment, and if our faith in the perfectibility of our institutions is a true faith, why then—and passing events at Washington fortify the opinion—there is just as good a chance of the Eastern and Northern States annexing themselves to us as there is of our annexing to them. "Si non." It may be said, then, of Canada—

—mutato nomine, de te
Fabula narratur.

The object of Mr. Keefer's pamphlet, is not so much to impress upon the community the value, the importance, nay the necessity of railroads to a country such as ours—young but vigorous—struggling into life, and struggling against difficulties of climate and situation, in the very conquering of which we shall find the assurance of future progress. These are recognised facts now-a-days. What Mr. Keefer teaches is, that in Railroad matters, as in all matters of general concernment, union is force. That we possess the power and the means of combination, and that by judicious combination we can do that, which we move at all, we must do for ourselves, put the great machinery of improvement in motion once on the rails, and we may almost dispense with the locomotive—we must advance, and in advancing, enlist in our service the interests of other people, and of foreign countries, enlarging thereby the circle of combination and augmenting the capital stock of inducements and incentives, of ways and means for perfecting these great channels of communication which, however local in character, are cosmopolitan in application and use; but we will let Mr. Keefer speak for himself:—

"The population, soil, and wealth of Canada are not inferior to Vermont, New Hampshire, Michigan, Georgia, and Ohio. Whatever is or was the condition of the circulating capital in the States mentioned, they have *found a way* to build their roads. This, we believe, has been done through the energy and perseverance of the local proprietors of real estate, who have convinced capitalists that they could have no better security for their investments, than that contingent upon the certain increase of population, wealth, and traffic, in rising countries like our own.

"There is a greater amount of unemployed capital amongst our agricultural and trading population than is generally supposed; and of fixed capital and absolute wealth, there is more than sufficient both to need and to warrant the construction of all the roads proposed. A very considerable class of the stockholders in New England roads are farmers, with investments from £50 to £500.

Railway stocks, unlike most others, are a species of real estate, immoveably attached to the soil, and have therefore become of late years favorite channels for investments with all classes of capitalists. Banks may fail—commerce may languish or be partially diverted,—manufactures be rendered unprofitable,—even the earth may for a time refuse to many a return for the capital invested in it; but as long as there are *men* there will be a people to sustain a railway; and if universal ruin be inevitable, *they* will be the last public works to succumb to the general prostration.

"With an *assessed* value of about thirty-five millions of dollars—with cultivated lands worth thirty-six millions of dollars, and an annual, crop valued at ten millions of dollars, in Upper Canada alone, with population, production and wealth doubling in about ten years, we offer a security upon the industrial character and the increasing wants of a progressive people, for all judicious commercial investments. We, therefore, believe,—*although we could not borrow a dollar for any other purpose,*—that as the unavoidable customers of a well placed Railway, we have only to secure its receipts to those from we ask assistance—and take those necessary preliminary steps which none but ourselves can take, in order to obtain the capital required to construct our works."

These remarks apply with redoubled force to the District of Montreal, in that part of the Province whilom Lower Canada. In adaptability to Railroad operations it is in fact unrivalled in the world, except perhaps in Holland, where, from the same causes, the costs of railroad construction have only averaged £5,

grist, the increasing trade and intercourse with the Ottawa. Mr. Keefer has remarked that—

"The partial failure of our Portage Railways, particularly the Lachine, have undoubtedly had a prejudicial effect upon the Railway movement in Canada. It is difficult to conceive how or why any other result could be anticipated for a Railroad less than ten miles long situate almost wholly in a valuable suburb, with a turnpike on one side and canal and river on the other, and which with its present length, must be buried one-third of the year in the snow."

We take leave to differ somewhat with Mr. Keefer on the above premises. We cannot subscribe, blindly and without qualification, to the common-place *dictum* that "a short road will never pay." A short road will pay as well as a long one, if it embrace a sufficient amount of travel. A bridge of a mile may cost as much as a railroad of ten, and yet, if all the population of a great city is compelled to pass over it at a certain amount, it will pay. Now the Lachine Railroad, with the right of ferry to Caughnawaga, may not inappropriately, be compared to a bridge over which all the travel coming in and going out of Montreal to the South and to the West must eventually pass. There can be no question, therefore, that, in Mr. Keefers's own words, "with extension, the Lachine Railway will become one of the first railway stocks in Canada." True it is that the expense of bringing it through a valuable suburb, and the price paid for land under arbitration, exceeded all expectation; still, we know that if the railroad was to be built again to-morrow, from physical circumstances, it could not be run upon any other line,—the same proprietors would offer the same obstacles, and we are very sure the land could not be obtained cheaper. *Whoever built the road would have to pay for it,* and until the road was built what would be the advantage of the ferry at Lachine? or where the prospect of extension towards Prescott? In one respect the anticipations of the proprietors of this line were foiled by an accident as unforeseen as it has proved beneficial to the public. They expected a large amount of freight. The autumn the road opened it was found practicable to run the rapids, and the freight passed by them, and has done so since. In expectation of large freight, they prepared extensive buildings for its reception, and large and costly means of conveyance, which have been thus far comparatively unemployed, though on the extension of the road they will become necessary and available. The road itself has been constructed in the most substantial manner, though a considerable section of it consists in piling, the most expensive form of construction, and it has been repeatedly declared, by the most eminent Engineers, to be the best constructed and smoothest piece of road in America. The locomotive, cars, and apparatus, are of English build and importation, and will make up, in durability and wear, for the original outlay. Take it all in all it is the best built and most completely furnished road on this continent.

We say thus much in refutation of the remarks and sneers of men who exult in the temporary disappointment and discomfiture of others, or who remind us of Cowper's rabid dog, which,

To suit its private ends
Went mad and bit the man.

The proprietors of the Montreal and Lachine Railroad are justly confident in the value of their property, and are determined to abide the realization of that value. "Coming events cast their shadows before." We are much mistaken if the period is not fast approaching when the proprietors of this road will exemplify the French proverb—"*Il rit bien qui rit le dernier.*"

We strongly recommend the "Philosophy of Railroads" to general perusal. It is to be procured at Messrs. Armour & Ramsay. Price, 1s 3d. The information contained in the appendix is alone worth four times the sum.

THE MAGISTERIAL DISMISSALS.—The dismissals continue. Not a paper do we take up from any part of the Province; but we find some new act of this kind, either completed or in its incipient stage. Our last Upper Canada exchanges bring us the news that Col. Prince has been interrogated by the Government on the subject of his independence letter, and that he has replied to Mr. Secretary Leslie in a very laconic note, extremly to the point. He avers that he did write that letter; believes every word in it to be true; and hopes that the ideas there developed will, one day, be carried out.

The last *Official Gazette* contains a notice of the dismissal of Mr. Aumond, one of the most energetic lumberers on the Ottawa, from the magistracy; and *L'Avenir* published two epistles from Mr. Dessaulles, of St. Hyacinthe, addressed to Mr. Leslie, on the same subject. The first of these letters replied to Mr. Leslie's inquiry, and stated that the writer was a signer of the Annexation manifesto. The second was written after the publication of the dismissal in the *Gazette*.

Mr. Dessaulles resigns his place as commissioner of small causes, as he has been discharged from the other places.

In the meantime, while these proceedings are going on, as if to show how little any one values these small potatoe offices, Mr. A. Campbell, of Gananocque, has written to Government to beg that his name should be erased from the new commission of the peace; the persons named in it being the most ignorant and characterless in the country. This letter is published in the Kingston *News*, and we see in the same journal, a re-publication of a letter from Dominic Daly, Esq., under the government of Lord Metcalfe. It appears that some persons, partizans of the ministry of the day, had written to complain of a Magistrate, who was their opponent in politics. The complainants desired that their names might be concealed, to which the Secretary wrote in reply, that in all cases where complaints were made against magistrates, the party complained of should be furnished with a copy of the charges and the names of the complainants. He adds, that under these circumstances, no notice will be taken of the complaint until the parties be heard from again, in order that they might consider whether they would proceed, after knowing the opinion of the Government as to the course to be taken.

We have received the first two numbers of a new paper just started at Quebec, called "*La Sentinelle du Peuple—the People's Sentinel.*" It is a neat little quarto-sized sheet,—one half in French and the other in English. As its name implies, it will be devoted more especially to the advocating of the interests of the working classes. In politics, it is moderate and evidently holds that the prolonged connexion with the mother country can, in no respect, advance the interests of those to whom it addresses itself. We wish our new co-laborer every success.

LIGHT.—"A Subscriber" requests to have our "views, on the matters at issue between the City Fathers and the Gas Company, which for some weeks back have condemned our streets to darkness." We would remind our correspondent that we have not been altogether silent on this important matter, but that, in introducing the Report of the Light Committee to the Corporation, we stated our conviction that, *coute qui coute*, light we must have, and that the disagreement between the Corporation and the Gas Company, as to the terms upon which the latter could afford it to us, was but a lame excuse for the darkness in which, after sundown, our city is enshrouded. As the writer has been one of the Directors of the Gas Company from its commencement up to a short time ago, when his other avocations forced him to resign his seat at the Board; and as he has, consequently, been a party to all the transactions between the Company and the Corporation, it would, evidently, be unbecoming in him to assume the place of a judge, between the contending parties; and we have, therefore, while publishing the Report of the Light Committee and the Manager of the Gas Company, Mr. Falconer's, reply to it, abstained from giving our own opinion. The following article is from the *Pilot* of Saturday last. We fully concur in the sensible and temperate remarks of our contemporary. Gas, we think with him, the citizens of Montreal expect their Corporation will supply them with—more especially as, even at £4 10s—a lamp—the price demanded by the Gas Company—they will pay less for it than, we believe, any city on the continent. We had intended, in connexion with this subject, to have offered a few suggestions on other Corporation matters—cleansing the streets, &c., and the claims which ought to have a preference upon the city Exchequer, before any sums should be voted, excepting for what is absolutely necessary to the health of the city,—but we find we shall not have space to do so to-day. We shall return to the subject and in the meantime will only correct an error into which a correspondent of ours lately fell. We find there is no longer any specific road tax levied upon the citizens; and that he, therefore, was mistaken in supposing that funds levied for the express purpose of keeping our streets in order, were devoted to any other purpose. The following are the *Pilot's* remarks:—

We must have gas. It is too late in the day to talk of going back to oil. The city fathers must bestir themselves and enlighten our darkness. If their predecessors were not sufficiently shrewd in making a bargain, it cannot be helped now; they must get out of the difficulty the best way they can—but we *must* have gas.

Public Companies are not unfrequently losing concerns. Competition is so keen now-a-days, that for the sake of doing business parties are tempted to make proposals at rates below a fair remuneration, in the hope that by some means, not then even dimly discernible, the loss may be made up, or that a lucky change of affairs may enable them to secure better arrangements. This is not a desirable state of things. As the workman should have fair wages for his work, so the merchant should get a fair profit on his goods, and the Company a fair dividend on their investments. The Gas Company say that they cannot provide gas at a lower price than £4 per lamp without repairs, and £4 10s. with them; and that whereas two years and a-half ago they offered to take £3 and £3 10s., that offer was not accepted, nor the letter containing it answered—besides which, they have now ascertained that the last mentioned prices are not remunerative. These are the facts of the case.

Perhaps the verdict of public opinion would be that there have been faults on both sides. It may be so. There can be no mistake, however, as to the expression of the public voice. It is heard in all parts of the city—in the broad streets as well as in the narrow passages. Every body exclaims, *we must have gas*. Our city fathers will listen, and redress the grievance.

One word to the Gas Company. Give us a good article, and give it us *uniformly*—not the splendour of an illumination one hour, and the darkness of a London November fog the next. Last Sunday evening, for instance, for nearly half-an hour, there was scarcely any light at all. The Churches wore the appearance of a funereal gloom. Though we sat close by one of the burners, we could not see to read, and the clergyman was unable to proceed with the service till candles were taken into the pulpit. This must have arisen from some neglect or mismanagement. We had occasion to refer to inconveniences of this kind some time ago. Care will be taken, we hope, to prevent any further complaint.

At the request of several of our friends, who take an interest in the "rise and progress" of railroads in Canada, we have copied from the columns of a contemporary, "Stoker's" interesting letter upon the subject—it will be found in our first page. We need scarcely say that we differ entirely from "Stoker" in his political speculations, but we have no objections that our readers should have an opportunity of judging of them for themselves. It will be seen that he falls into the common error of begging *the* question, and taking it for granted that our independence and admission into the American Union, would be injurious to the Mother Country. We, on the contrary, believe that that "consummation so devoutly to be wished for," would be mutually beneficial to all parties concerned; and, until it is consummated, we have little hopes of seeing "Stoker's" well-conceived plans carried into effect.

It is with deep regret we announce the death of William Hall, Esq., for so many years Collector of Her Majesty's Customs at this port. Mr. Hall had, we understand, for some time back been ailing, and for ten days or a fortnight had been confined to his house, but his numerous friends had no cause for apprehending the fatal termination of his disease, which took place on Sunday morning. We feel it to be almost unnecessary for us to say that Mr. Hall, who was so well known and so universally respected in our community, while in private life he was a kind and affectionate father, a true and firm friend, as a public officer was indefatigable in his attention to his duties, and obliging and considerate in his intercourse of all those with whom they brought him in co[illegible]. It will be a difficult thing, indeed, to supply his place with a gentleman fit and competent in all respects to succeed him; but, unless our precious system of making political partizanship the alpha and omega of competency to serve the public, the course is clear, and justice and the public interest, in our opinion, alike dictate that the promotion should be conferred upon the late Mr. Hall's old friend and colleague, Mr. Hamilton, who has for so many years emulated the industry and courtesy of his principal, and whose long experience in the department, affords the public a perfectly reliable guarantee for his competency to succeed him. The readers of the *Herald*—especially those in the public service—will, we doubt not, bear in mind that we have on all occasions advocated the policy as well as the justice, of promotions in the public departments being given *in* the departments, and unless incompetency in the juniors, or some other special reason would render it injurious to the public—and in this instance, we are satisfied no such objection can possibly be advanced.

Our readers will see by an advertisement in another column, that the winter line of travel in connection with the Vermont Central Railway, is at an end for the season. We learn that Mr. Jos. Daley has proceeded to Boston, with a view of completing some travelling arrangements for the summer months, and we are quite sure that the expedition and commodiousness of this line has been sufficiently appreciated to induce our fellow citizens to expect from his management the best possible plans for the future.

"Doth the *wild* ass bray when he has grass"? The question is put by the sorely-tried patriarch, who dwelt in the land of Uz; and proves that Job was intimately acquainted with the habits of the domestic donkey. He knew well that a pampered *cuddy* is never tired of hearing his own musical voice, and that the better he is fed the noisier he becomes; and, therefore, although we are told he possessed no less than five hundred *she asses*, it would appear he would not give stable-room to a single neddy. The natures of men and of asses remain unchanged since the days of the patriarchs; and of this truth we have a striking example in Saturday's *Transcript*. There we have the "Original Grey", Eeh-haw, Eeh-haw, Eeh-hawing away, in the most discordant and ear-splitting fashion, —and this is, evidently, the result of the Government pastures—the rich timothy and clover of that "refuge for the destitute", the Board of Works: for, be it known to all men, it is thence that the *Albion's* correspondent derives the sleekness of his skin and the strength of his lungs—he is, in fact, the prophet Chabot's "Alborak", the beast, or rather "beastie", on which he rode, when he saw the vision of the "six groggeries and the Police Station", mentioned by us on Thursday last. So long as the "Original Grey" brayed from behind the tawny hide of the *Albion*, doubts of his identity might fairly exist—notwithstanding the unapproachable "originality" of his abortive roar—but now that he has donned the "calf-skin" of the *Transcript*, the trick is gross as a mountain, open, palpable, and can deceive no one.

Tita.—My Oberon! what visions I have seen!
Methought I was enamour'd of an ass.
Obe.—There lies your love.
Tita.— How came these things to pass?
O, how mine eyes do loath his visage now!

PROFESSOR WEBSTER.—We so fully and cordially agree with the sentiments of the Editor of the *Quebec Mercury*, as contained in the following article, that we prefer giving them to our readers, in his well-chosen and forcible language, to ourselves writing anything upon the sad and humiliating subject. Alas, for human nature! when such a character as Dr. Webster is universally admitted to have been, by all who knew him,—an affectionate husband and father—a man of a naturally kind and loving disposition, with a mind elevated and enlightened by a life spent in the service of science—when such a man falls, when not even a doubt of his guilt can be permitted to cast its shadow between us and its enormity, —we ask ourselves, what man can feel secure?

The trial of Professor Webster, at Boston, on indictment for the murder, in November last, of Dr. Parkman, which having commenced on 19th ultimo, has ended, on the 1st instant, in his conviction. Sentence of death has, accordingly, been pronounced on the unhappy man. The telegraphic reports that have reached us, say, that an impression generally had prevailed, that the Professor would not be convicted, and that many think that the Court had an undue leaning in favor of the prosecution, and that the accused had been hardly dealt with. The whole matter constitutes a *cause celebre*, and it is not surprising that so great an interest should have arisen with respect to it, not merely on the spot, but throughout the whole North American Continent, approaching almost to excitement. At this distance from the scene, we, probably, can judge of it better, certainly with more coolness, than those on the spot, whose excitement may warp the judgment of the spectators. The evidence, like that which only can be adduced in most murders, is, it is true, but circumstantial, but of a character, taking all the circumstances that have been brought out, and clearly proved, so convincing it seems to us, as not to leave a doubt, nor the shadow of it, that Dr. Parkman came to his death by the hands of Professor Webster, and by his hands alone. The awful secret, from the moment of the Professor's arrest, seems to have been overpowering and more than he could bear, and the consciousness of his guilt was betrayed in every word and action of the manslayer, at whom the finger of Providence pointed, and the eyes of all were at once directed. We feel, as every humane heart ought, for the unhappy man, who, in a moment of transport, and, as we believe, without permeditation, slew his friend, and, then, to conceal his guilt, increased it an hundred fold by the subsequent revolting proceedings he took for that purpose, in cutting up mutilating and burning parts of the remains, throwing others into the privy, and stowing away the thorax or chest, enclosing a thigh, the whole enveloped in tan barn, into an old tea-chest. What anxious, wretched moments must he not have passed at the solitary and horrible employment?—but still more do we sympathise with his guiltless wife, children and relatives, whom his error has precipitated into an abyss of misery and shame, from which they cannot recover, and compared to which death absolutely must be comfortable.

It is said that a young medical student has declared since the trial, that he actually saw Professor Webster standing over the dead body of Dr. Parkman, and took an oath not to reveal the awful fact, but that conscience has proved stronger than the unlawful and impious oath. However, this may be, the character for ability and learning which distinguish the courts of New England—the patience and solemnity with which, during a long trial occupying fourteen days, the proceedings have been conducted by the judges, men evidently of a high intellectual and moral order, and above all the universal morality, great good sense, and remarkable discernment, which characterize the people of Massachusetts, and of course a Massachusetts jury on the trial of a fellow being for his life, are so many pledges, whatever differences of opinion there may be as to the technical or legal sufficiency of the evidences upon which the conviction has taken place, that there can be no doubt whatever of the guilt of Professor Webster, and that no injustice is done by the verdict which a jury of his country, after a long and patient, and as we believe, most impartial hearing, have rendered against him.

If there be a doubt of the Professor's guilt, or the possibility of it, it is more than probable that the benefit of the doubt, such we believe to be the humanity and justice of our neighbours, will be afforded him. But however this may be, we feel also assured, that if it be consistent with the sense of duty entertained by the government and authorities of the State of Massachusetts to the people thereof to dispense with the barbarous punishment of strangling to death a fellow being in attonement of his crime, as if the perpetration of a legal, solemn and public homicide could atone for the secret and illegal deed, and commute the awful penalty with its horrific accompaniments rather demoralizing, as we deem them in their effects, than otherwise upon the masses, into imprisonment for life, or perpetual exile, it will be more in accordance with the enlightened spirit and feeling of mankind in this age of progress and improvement in civilization, than the rigid enforcement of the maxim "blood for blood", and be hailed accordingly by christians and civilized men of all denominations throughout the whole world.

SACRILEGE.—We deeply regret to learn that St. James's Church, St. Johns, C.E., under the charge of the Rev. Charles Bancroft, rector, was, on Saturday evening last, entered by some evil-disposed persons through a window, who removed a monument therein erected by the officers of the 82nd Regt. in memory of Mr. Perry, of the same regiment, and carried it into the grave yard and there destroyed and broke it in pieces. A reward of £50 will be offered by the members of the church for the discovery of the offenders.

It is rumoured that Mr. Chabot has—in the most spirited manner—resigned his seat for Quebec; very much to the chagrin and mortification of his conservative supporters at the late election. We cordially wish them "better luck the next time".

COUNTY OF SHERBROOKE.—A public dinner was lately given, at Melbourne in this County, to Mr. Cleveland, the unsuccessful candidate at the late election. The dinner was given at Hardy's Hotel, and, we learn from a friend who was present, did infinite credit to the good taste, skill and liberality of the host and hostess, Mr. and Mrs. Hardy.—The company consisted of upwards of fifty of Mr. Cleveland's supporters. The chair was filled by Dr. W. H. Fowler of Melbourne, on whose right hand sat the guest of the evening. Among the company were Lt.-Col. MacKenzie, of Danville, the Revds. Dr. Falloon, and Mr. Macfarlane, Edouard Journeaux, Thos. Tait, David Sloan, Thomas Christie, Esqrs., of Melbourne, J. R. White, Esq., of Shipton, acting as croupier. The "defeated", we are happy to hear,—congratulating each other upon its only being, in their opinion, "a little one"—enjoyed themselves amazingly—the greatest harmony and good feeling prevailing, and "The Queen" and other loyal toasts being given and responded to with the utmost enthusiasm.

We understand that a movement is now taking place on the part of the friends of the late John Wilson, the Scottish vocalist, to erect a monumental tablet to his memory in the new Cemetery, at Quebec, where his remains are interred. Small Committees have been formed in London, Edinburgh, Glasgow, and the larger British cities, in [illegible] York, Montreal, Quebec, Kingston, &c. [illegible] consists of Sir Ja[illegible] Edward Alexander, A.D.C., Messrs. A. D. Parker, Hew Ramsay, R. U. Innes and J. McLean. The highest subscription asked for is ten shillings, and of course smaller sums are thankfully received. Considering the high estimation in which the late Mr. Wilson was held, both in his public capacity as a vocalist and in his private relations, as a warm-hearted, right-thinking and right-principled man. We trust that a sufficient fund will be collected among the large circle of his admirers and acquaintances to erect a handsome tablet to his memory, to be placed in the picturesque spot, near Quebec, where his remains are interred.

We thank "Fair Play",—whose letter we publish to-day—for his "private and confidential" of the 6th instant. His reasons for not, in the first instance, communicating his name, we have no fault to find with, excepting that they are not quite conclusive to our mind. No doubt, had we consulted others "in the trade", we should have had "Fair Play's" statements regarding the losses arising from the insufficient tares allowed upon sugars, fully confirmed. We are better satisfied, however, in having our own correspondent's authority, upon which we can put implicit reliance. In connexion with his published letter, we feel satisfied, "Fair Play" will find no fault with our giving the following extract from his private note. He says:—"As a proof, allow me to add an extract from the letter of a correspondent in C. W.—'Your invoice I find correct, but I find a loss in the tare of the hhd of sugar sent, of 54 lbs.—I trust, if the Board of Trade have any authority, you will not fail to have the tares of sugar rectified'".

"Fair play" also directs our attention to the deficiency in the tares allowed in this port, upon many other articles as well as sugar.—Among them he instances teas—upon which, he says, it is well known the purchaser in England, is, besides full and ample tare, allowed 1 lb. per box additional; whereas here he is rarely allowed even the full [illegible] tare.

We trust that our correspondent's remonstrance, and these few remarks of ours, will not escape the notice of the gentlemen composing the Board of Trade, and that some steps will be adopted to rectify the evils complained of.

The following letter is published in the *Kingston Argus*. It affords a curious commentary upon the conduct of the Chabot Ministry, in concealing the names of Mr. Dixon of London's accusers, and then dismissing him from the commission of the Peace, upon their accusations; the truth of which Mr. Dixon expressly denied—and this, upon the plea, that such was the constitutional practice under "Responsible Government"—namely, that the accused should never know who his accusers are, and that a denial of the truth of the charges brought against him, by the concealed ministerial informers, shall be considered as a confession of guilt! Truly, the "invariable practice" of Lord Metcalfe—whom the *Chabots* stigmatized as a tyrant and despot—contrasts somewhat curiously with that of his rebel-rewarding, loyalty-exasperating, militia-disbanding successor.

It should be borne in mind, that the complainants were supporters, while the party complained against was an opponent of the Ministry of the day.

SECRETARY'S OFFICE,
Montreal, March 5, 1844.

SIR,—I am commanded by the Governor General to inform you, that his Excellency has had under consideration your letter, enclosing a complaint against ——— ———, Esq., J. P., from certain persons in ———, in which you suggest, that should a copy be required, it would be, perhaps advisable to grant the copy without the names being attached.

"In reply, I am to acquaint you that in *every case* where a complaint is preferred against a Magistrate or other Public Officer, it is the *invariable practice*, when the matter is one of which His Excellency considers it necessary to take notice at all, to furnish the party complained of, *with a full copy of the complaint, with the names attached*, in order that such officer may be made aware both of what he is accused, and of the names of his accusers; *and His Excellency considers that this is only justice*, and that a contrary practice would have the effect of encouraging persons to make false and malicious accusations, of which they dared not assume the responsibility.

"In the present instance, His Excellency sees no reason to depart from this salutary practice; but, in the meantime, His Excellency will forbear making any communication with Mr. —— on the subject; and will take no steps in the matter, until you have an opportunity of expressing your wishes, either that the complaint with the signatures shall be communicated to Mr. —— — or withdrawn altogether.

"I have the honor to be,
"Sir,
"Your obedient servant,
(Signed,) "D. DALY,
Secretary.

MONTREAL SWIMMING CLUB.—A meeting of the members of this Club was held in the room over the Mercantile Library Association on Friday evening last, when a statement of its affairs were submitted and approved. The meeting proceeded to the election of officers for the ensuing year, when the following gentlemen were elected:—

Thos. Workman, Esq., President.
E. D. David, Esq., Vice-President.
H. Pratt, Esq., Secretary.
H. A. Wickstead, Esq., Treasurer.
Trustees: Thos. Workman, W. Mair and Jas. Moir Ferres, Esqrs.
Directors: Wm. Mair, Jr., W. Kinloch, H. F. J. Jackson, E. Wright, Henry Lyman, W. S. Stewart, Esqrs.

Arrangements were made to have the bath placed in an eligible situation on the opening of the navigation, and the Club has, in a very liberal manner, agreed to admit the public at $4 each for the season.

FREE NAVIGATION OF THE ST. LAWRENCE.—We are glad to learn that blank licenses have been sent, by the Provincial Government, to the Collector of Customs at Quebec, for the use of foreign vessels arriving at that port, the authority of which they will be enabled to proceed, without detention, to Montreal, whether with cargo or in ballast. This will, practically, give Montreal all the advantage of a Free Port.

THE BRITISH AMERICAN JOURNAL OF MEDICAL SCIENCE.—We observe by the March number of this ably conducted periodical, which has now been five years in circulation, that, with it, concludes the present series; and that the appearance of a new series is contingent upon the establishment of the proposed "Medical and Surgical Association." We should hope that, under no circumstances, will the publication of the *Journal* be given up. Not only to the professional, but to the scientific and general reader it has been a most welcome and valuable contribution to our somewhat scanty list of "native productions," and it would be a disgrace to our community were it suffered to sink for want of support.

DEPLORABLE ACCIDENT.—Four labourers by name—François Lafontaine, Theodore Chorette, Gédéon Bergeron and Firmin Leblanc—employed by Mr. Laberge of this city, contractor, in excavating the site for the erection of a mill for the Hon. Mr. Viger, at Isle Bizard, were, we learn, on Saturday morning last, suddenly overwhelmed by a portion of rock which became detached from the bank, under which they were working. It was fully an hour and a half before the unfortunate men could be removed, and in three of them life was found to be extinct. Leblanc's legs are fractured in three places, but hopes are entertained of his recovery—they were all married men.

CORRESPONDENCE.

TARES ON SUGARS, &c.

To the Editor of the MONTREAL HERALD.

SIR,—In the Report of the Board of Trade published in your paper of this morning, I perceive reference is made to the concession obtained from the Custom House Department in Tares of Muscovado Sugars. It appears that the Tares considered by the "Board" to be *just*, (when the invoice tare is not specified) and which are now allowed by the Custom House on all raw sugars, are—

12 per cent on packages over 1000 lbs.
14 per cent on packages from 500 lbs. to 1000 lbs.
and actual tare on packages under 500 lbs.

Now, I would ask the "Honorable Board", how does it happen that this concession from the Custom House Department has not been recommended by the "Board" to be extended to the purchaser of sugars in this market? The tares by which sugars continue to be sold being—

10 per cent on packages over 1,400 lbs.
11 per cent on packages from 1000 lbs to 1400 lbs.
12 per cent on all packages under 1000 lbs.

It is a trite but very homely proverb, that "what is sauce for the goose is sauce for the gander"; and if it is not right to pay duties on sugars under the latter tariff, it surely cannot be fair to continue defrauding the purchaser by *selling* to him under it. That even the former tariff is insufficient to cover the tares, I can state from actual experience, that the loss on a single tierce has been over 70 lbs. It is quite common to find a loss of 40 lbs. to 50 lbs.; and very rarely is the loss under 20 lbs. per tierce. On packages under 500 lbs., I have known 20 lbs. loss in tare. Loss in tare of sugars has always been experienced. There are other articles on which heavy losses in tares are sustained. I will only mention cavendish tobacco, on which the tare is 30 lbs. to 32 lbs—while invariably the boxes weigh from 36 lbs. to 40 lbs. Purchasers here have long submitted to "*shaving*" in tares; but I feel assured they will submit no longer. Let full tares be given on all goods, and soon it will be found that sterling honesty and integrity in these matters will be found to be the wisest policy. In the report of the Board of Trade, mention is made of a new tariff as to storage, &c., being about to be submitted; and I hope the Board will make an alteration in the tariff of tares, and especially in tares of sugars, so as at the very least to come up to the present Custom House standard. Better, far better, to make the required changes willingly, than soon to have to make them under compulsion.

FAIR PLAY.

Montreal, April 4, 1850.

LOWER CANADA.

The Rory O'More.—As many of our subscibers are interested in the Rory O'More's passengers, for California, we are authorised to state, that Mr. Stevenson received a telegraphic despatch last night, stating that vessel arrived at Valparaso, 14th February last—all well—an incredibly short passage round Cape Horn.—*Quebec Mercury.*

Accident.—While Mr. Dunbar Ross and a few other gentlemen were crossing the river (from Pointe Levi,) on Thursday last, the canoe was upset and all on board thrown into the river, but fortunately they all managed to scramble on the ice, and no lives were lost. A very strong wind which was blowing throughout the day caused the ice to be jammed, and the boats found much difficulty in traversing.—*Ib.*

We observe by the Limerick *Examiner* of 6th ult., that Capt., Vaughan of this city has been publicly entertained at a dinner in Limerick, of which city he is a native. The chair was occupied by Capt. Randall, the Harbour Master, and there were many notables and respectables of the place at the table. Capt. V. had been absent from the place of his nativity 27 years.—*Chronicle.*

St. Johns New Brunswick.—We learn from the *Courier*, of the 23rd instant, that His Excellency the Lieutenant Governor has given his assent to the Revenue-bill, and the Bill for regulating inter-colonial trade. With the provisions of the latter, we hope shortly to be made acquainted.—*Ib.*

The weather continues very fine but cool, owing to the prevailing north-easterly wind. A great quantity of ice has been passing for the two last days, and still continues, which some say is from the Lake St. Peter, the river being open above Three Rivers. If so, it is unusually early, and the navigation between this port and Montreal we may therefore expect will be clear in the course of the ensuing week.—*Ib.*

We have received from Montreal, the *Avenir*, of the 30th ultimo—a "*Journal Republicain, publie dans les interets populaires*"—in its new shape, as published in that city. The old establishment, including, we believe, press and types, was, some weeks ago, destroyed accidentally by fire, but, the proprietors, with great industry, have replaced the loss, and the paper now reappears, from the ashes of its predecessor, with redoubled advantage. In politics it is rather too liberal for us, advocating, if we are not mistaken, "Annexation," and, in this respect, we cannot wish it success; but, we, nevertheless, admit that it is conducted with much talent, and that as a French paper it is, at least in our humble estimation, the first in the country. There is nothing pharisaical nor sycophantic in its character—no "soft sawdering" of the arch-quacks, Lafontaine, Baldwin, Hincks & *Confreres*, nor attempts to bolster up or palliate their misdeeds, but whose tyrannical and base conduct, on the contrary, it openly and honestly impeaches, as disgraceful and injurious to the Government they serve. Its editorials are in sentiment and style of the most elevated character, and its typography in keeping with these, indeed we may say excellent. It is the property of an Association, the editorial part being superintended by a committee altogether opposed to the pack of political chisellers, sharpers, pickpockets, thieves, and petty tyrants, nicknaming themselves "the strong government," and in so far, as the committee are leagued to dissolve the banditti and bring the ringleaders to condign justice, our good wishes attend them. —*Quebec Mercury.*

LOWER PROVINCES.

The sleighing was good at Halifax on the 30th.

There is a speck of rebellion at Prince Edward Island, the Legislature of which has passed a vote of want of confidence, and refused to grant the supplies until the mother country gives them responsible government.—*Boston Atlas.*

Nova Scotia.—The Hon. Mr. Morton's resolution, proposing an elective Legislative Council in Nova Scotia, which we publish on the 16th instant, has been debated by that body, and resolutions moved in amendment by the Hon. Mr. McCully, the last of which declares it to be inexpedient at present to apply to Her Majesty to remodel the Legislative Council, were carried by a vote of eleven to nine, which is stated to have been a strictly party division.

On Tuesday, the Hon. Mr. Howe's proposition relative to a Railroad from Halifax to Windsor was discussed, and resulted in the House pledging the Province to the amount of one-half the whole sum required to construct the road, on consideration that the other half be derived from other sources.

An amendment has been made to the Halifax Incorporation Bill, making the Mayor elective by the whole body of the citizens, instead of by the Members of the Council.

Prince Edward Island.—On the 19th instant, the President of the Legislative Council announced at the Council Board, that he and the other members of the executive Council had tendered their resignations to his Excellency the Lieutenant Governor. No important matter, it is stated, with the exception of Responsible Government, had as yet been brought before the Legislative Council.

The Address of the House of Assembly, in reply to the Governor's Speech at the opening of the Legislature, expressed a want of confidence in the Executive Council, and the House subsequently passed the following resolution, by a vote of 18 to 2:—

"Resolved, that it be recommended to the House to appoint a Committee to draw up an address to Her Majesty, stating the grounds on which the House has been obliged to pass a vote of want of confidence in the Executive Council of this Colony, and that, as a necessary consequence, they are under the necessity of refusing the supplies until the Government of this island shall be remodelled so as to enjoy the confidence of the people, and that the monies which shall in future be taken from the people, shall be expended judiciously and for their benefit; or, in other words, until the people of this Colony obtain what is usually termed Responsible Government."

On Tuesday the Butchers' Stalls in the Public Markets were leased at auction for one year by Mr. Hanford. Those in the Market House in the Market Square, which last year rented for £222 5s 6d, were this year disposed of for £69 7s 8d!—*St. John's Courier.*

The Halifax *Sun*, in a lengthy editorial, observes:—"We are neither over sanguine nor yet are we given to indulgence in the gloomy forbodings of despondency. But, in all sober earnestness we state our settled conviction that unless some fresh impetus be given, and that right soon to our stagnating energies as a commercial community, this city must soon be on the brink of Bankruptcy."

UPPER CANADA.

The Great Financier again.—When a person undertakes to praise himself, he should take care to do so only on good grounds at least, for, be the cause never so good, he is sure to be suspected. In reference to the new schedule of canal tolls, the official editor, in the Globe of 21st inst., took occasion to praise himself for what he had done, and attributed the "improvements," as he called them, to "the advantage to be derived from having at the head of our financial affairs, a person thoroughly acquainted with our trade, able to grapple with its details, and earnest in promoting and facilitating its progress in every way." We took occasion, in a former number of the Colonist, after the appearance of the extraordinary and self-laudatory article in the Globe, to which we have reference, to call the attention of the official editor and great financier, to the inconveniences imposed on the trade by certain regulations which were adopted in reference to outward bound vessels, but he has not, as yet, taken any notice on the subject. He is probably considering it, along with the Road acts, and we expect soon to be favoured with some explanation from him on these subjects. In the meantime, we have to direct his attention to another very important part of his Canal Toll Tariff, of which he has, most likely, already heard something definite from others. In the "self laudatory" to which we have referred, the official Editor takes credit to himself, for having adopted a lower scale of Tolls, for coarse grains, than for fine, and he tries to curry favour with the Oswego forwarders on that account; but those gentlemen are not "so green" as the "great financier" took them to be, and they soon discovered, to their great annoyance, that the Tolls on Wheat and Indian Corn have been considerably increased, to the great detriment of the Welland Canal and Oswego trade. Instead of the old Toll on Wheat, of 1d. per bushel, by the Welland Canal, and on Indian Corn of ½d. per bushel, the new rates are, 3s. 1½d., currency, per ton on Wheat, and 1s. 10½d. per ton on Indian Corn; being just an advance on the old rates of $12,50, or £3 2s 6d. currency, on a cargo of 6000 bushels wheat, and an increase of $17, or £4 5s. currency on a similar cargo of Indian corn,—the ton in both cases being 2000 lbs nett. This difference is quite sufficient to send the whole of that trade by the Erie Canal particularly the Indian corn,—the difference being about ¾ of a cent more per bushel than the toll on the Erie Canal.

There happen to be several Oswego gentlemen in town, and instead of their considering that "the Oswego forwarders will undoubtedly be much benefited by this change, and the quantity passing through the Welland Canal to that port be greatly increased," as the official Editor has it, they consider that the change will have the effect of sending the produce through the Erie Canal from Buffalo, instead of through the Welland to Oswego. Their estimate of the individual "at the head of our financial affairs," is not such as to lead them to suppose that he is "a person thoroughly acquainted with our trade, able to grapple with its details, and earnest in promoting and facilitating its progress in every way," although he has the modesty to claim for himself such a good character. They therefore waited in a body, on Saturday, not on this "great financier," but on their old Canal acquaintance, the Hon. W. H. Merritt, President of the Council, and remonstrated against the late change in such strong terms, as will lead to a speedy recall of the new Tariff of Canal Tolls. So much for the great financier for to-day. He will hear from us again shortly, unless he is forced to "vacate" sooner than he expects. He has subsisted long enough on deception and humbug. It will not be endured much longer.—*Toronto Colonist.*

SECRETARY'S OFFICE,
Toronto, 30th March, 1850.

His Excellency the Governor General has been pleased to make the following appointments, viz:

Dr. William Hope,
John O'Hare, Esquire,
Revd. William Greig,
Asa Yeomans and
James Whiteford, Esquires, to be Associate Members of the Board of Trustees for Superintending the Grammar Schools in the County of Hastings.

Walkden Mawdesley, of the Township of Thorold, to be a Notary Public in that part of the Province formerly Upper Canada.

His Excellency the Governor General has been pleased to remove Joseph Aumond, Esquire (he, although always a liberal, having been a stench loyalist in 1837.8, but having signed the annexation address in 1849) from the Commission of the Peace for the County of Carleton.

UNITED STATES.

News from Europe.—Ocean Steam Navigation.—In the course of a month or six weeks, we shall have a semi-weekly steam communication with Europe. The following steamers will run as regular packets:—

Collins' Line.	*Cunard Line.*
Atlantic,	Asia,
Pacific,	Africa,
Arctic,	America,
Baltic,	Caledonia,
Adriatic.	Cambria,
Glasgow Line.	Europa,
City of Glasgow.	Hibernia,
Hamburg Line.	Niagara,
Helena Sloman.	Canada.
Bremen Line.	*Havre Line.*
Washington.	Franklin.
Hermann.	——

Here are twenty splendid steamers to connect America, with Europe; almost Enough to bridge the Atlantic.

The weekly trips of the Cunard steamers will begin on Saturday next from Liverpool, and on the 1st of May from New York and Boston. The Collins steamers will commence their semi-monthly trips on the 27th instant, and their weekly trips about the 1st of June. The Franklin will begin her trips to Havre next month, and her mate will be ready in the fall. The Bremen line now leave Southampton and New York once a month. The City of Glasgow will leave Glasgow on the 16th instant for New York, and thereafter leave each port in alternate months. The Helena Sloman is to leave Hamburg on the 10th instant, and her trips will be bi-monthly.

According to this arrangement, we shall, in about a month hence, receive news every three days from Europe. It is expected that, in a few weeks, the New York branch of the Cunarders will run direct to this port. Then we shall obtain our advices from the other side of the Atlantic *viz* Halifax but twice a month. News from Europe by that route, in that event, will be an expensive article. Three days foreign intelligence, compressed into a few hundred words, as it necessarily will be, will then cost two dollars per word.—*N. Y. Herald.*

GORHAM V. THE BISHOP OF EXETER.—Judgment in this case was pronounced March 8. by the Master of the Rolls, Lord Langdale. The court was of opinion that the doctrine of baptismal regeneration had been so taught and laid down in the formularies of the Church of England as to enable persons holding different views on the subject to officiate as ministers. The judgment of the court below was accordingly reversed, on the ground that the respondent, the Bishop of Exeter, had not shown sufficient cause for refusal to induct Mr. Gorham to the living to which he had been appointed. The judgment of the court was concurred in by all the judges who were present during the argument, with the exception of Vice-Chancellor Knight Bruce.

FURTHER FOREIGN NEWS
BY THE
STEAMSHIP "EUROPA."

By Telegraph from Halifax to Portland, and thence by Railroad to Boston.

In the House of Commons, on Tuesday night, the stability of the Ministry was strongly menaced. Mr. Hutt had given notice of a motion, that the House address the Crown to direct that negotiations may be forthwith entered into, for the purpose of releasing this country from all treaty engagements with foreign States, for maintaining armed vessels on the coast of Africa, to suppress the traffic in slaves, and the morning previous to the debate on this motion, Lord John Russell called a meeting of the friends and supporters of Government, 160 of whom attended his lordship, as also did Lord Palmerston; distinctly informing them that should this motion be carried, he should resign his office. The result of the division at night, was, that the motion was lost by a majority of 78.

The London Times designates the support of the African squadron as a deplorable humbug, and says the country must take this matter into its serious consideration. A large proportion of our fleet, a forth it is said, is employed in the interminable fool's errand in the Tropics, without the least benefit whatever, but a great deal of harm. A million a year is a low estimate of the expense.

There are pretty evident signs of an approaching dissolution of Parliament. The bill for the abolition of the Lord Lieutenancy of Ireland is to be presented to Parliament after Easter.

We learn from Ireland, that cultivation is going on more rapidly than was anticipated, and that a great breadth of potatoes have been sown. Emigration from the southern counties of Ireland is rapidly increasing. The operations of the encumbered estates bill are now beginning to have their beneficial effects.—The first estate sold under the new commission was bought by a tenant farmer. The society for the improvement of the cultivation of Flax in Ireland are making strenuous efforts to introduce that crop into the southern and western provinces.

Lord Gough, who has been honored and feted everywhere, since he has returned from India, proposes returning to his country seat.

GREECE.

On the 1st of March, three hours after the departure of the French steamer for Marseilles, the English Consul at Athens issued the following circular:—

"I am instructed by Her Majesty's Minister Plenipotentiary to the King of Greece, to inform you that Her Majesty's government having good hopes of obtaining a satisfactory settlement of their demands on the Greek government, through the good offices of the French Republic, having given orders to Vice-Admiral Sir William Parker to suspend, for a reasonably limited period of time, the coercive actions of Her Majesty's squadron; but nevertheless to retain any Greek vessel actually in his possession, or pledges in deposit, until a final arrangement shall have been made. Orders have consequently been given by Vice-Admiral Parker, for the present free ingress and egress of all vessels actually in possession of Her Majesty's squadron.

This circular caused great satisfactien in Athens.

The trade appears to have immediately resumed its usual course. The correspondent of the Times stated that on the 2nd instant, M. Thouvenel wrote to Mr. Wyse, proposing that Sir William Parker should give up the Greek ships into his possession, and that he, the representative of the French Republic, would guarantee the payment of the claims of Her Majesty's Government on Greece.

Mr. Wyse replied that he regretted being unable to comply with M. Thouvenel's proposition—that the instructions which he had received from Lord Palmerston did not permit him to accept of such an offer.

FRANCE.

The elections have closed without any disturbances whatever. The official declaration of the members returned from Paris, took place on Friday morning, when the three Socialist candidates, Carnot, Vidal and Flotte, were declared duly elected. The numbers polled were as follows:—Carnot, 132,797: Vidal, 128,439; De Flotte, 126,982. M. Deflotte, the lowest of the successful candidates, has a majority of 1,339 over M. Foye, the highest candidate of the unsuccessful list. Very few persons were present at the ceremony, and little excitement was manifested. The *Patrie*, which is looked upon as a semi-official paper, intimated that the government will adopt prompt and effective means, by which the ultra democratic party shall be restrained.

The Moniteur also announces the appointment of M. Ferdinand Barrot, as Envoy extraordinary and Minister Plenipotentiary at Turin, on a special mission in place M. Lucien Murat.

The retail trade of Paris has suffered a severe check, in consequence of the agitation accompanying the elections. The accounts from the departments are more favourable—the manufacturers in the principal towns being fully occupied.

Their is some difference between the Minister of Finance and his colleagues as to the amount of caution money to be deposited by the Press. Some of the Conservative journals are denouncing the shop keepers who voted for the democratic candidates at the recent elections, and calling upon the public to withdraw from them their custom and never to enter their shops.

Letters from Strasburgh mention that an association is immediately to be formed there for the propagation of anti-socialist doctrines among the peasants.

The news from Paris on Tuesday and Wednesday was of a more tranquil character than for some days past, and all appearance of an emeute is at an end. Six Representatives of the Mountain have proposed an amendment to the Budget for the reduction of 1,500,000 francs in the allowance to the Parochial Clergy.

Paris, Thursday.—In the Chamber the Minister of Justice brought forward his repressive measure against the Press. He proposes to raise the caution money from 20,000 to 50,000 francs for daily papers published in Paris, and to 12,000 francs for those published in the Provinces. He also proposed to establish a stamp of three centimes on Paris journals, and two centimes on those published in the departments. He concluded by declining the discussion urged. It was opposed, but ultimately carried: the minister of Justice then presented his bill demanding that the law for the suppression of clubs should continue in force during next year and be applicable to electoral meetings—calculated to compromise the public security. He likewise demanded urgency in the matter, which was granted. The election of Flotte is declared valid. The agitation in the South for a revision of the Constitution is increasing. The majority in favor of a stamp duty on the transfer of Government Stocks, and the proposed restrictive measures for the press, has caused a fall in the funds. Fives opened at 91,30 and closed at 90,85.

GERMANY.

At the opening of the Chamber on the 15th, the King of Wurtemburg declared an Unitarian state of Germany will be nothing but a chimera, and said that if attempted to be carried out it would lead to the separation and dissolution of Germany itself. The speech was greatly cheered, and produced a favourable effect upon the people. A letter from Berlin, dated the 16th, says:—"We learn from an authentic source, that the mission of Count Berinygsen to Vienna, has failed completely". Hanover has taken the decided resolution to place herself in the face of the rivalries of Prussia and Austria, and to act a passive part amid the internal complications of Germany. It is reported that a Congress of German Sovereigns will be held in April at Dresden, to take counsel on German matters. The Emperor of Austria, and the Kings of Bavaria, Hanover and Saxony will be present,

PRUSSIA.

Advices from Berlin inform us that the negotiations between the Courts of Austria and Prussia for the definitive constitution of a central government for Germany, have entirely failed.

The Paris correspondent of the Morning Chronicle says that the French government has received advices from Switzerland, from which it appears that Prussia has abandoned all claims upon Neufchatel, stating explicitly, that she abandons her claims only because she considers the sacrifice one which she is bound to make for the preservation of the peace of Europe.

ITALY.

The Paris Universe has the following:—

Cardinal Antezelli has made known to M. de Rayneval, that the Holy Father had resolved to leave for Rome in the beginning of April, and that that resolution was about to be communicated officially to the Diplomatic corps. The Constitutionel of the 9th inst., states that the British Government has presented a notice to the Tuscan Cabinet, demanding compensation for the losses sustained by the British residents in Leghorn, during the bombardment of that city by the Austrian troops. At Leghorn they are apprehensive of a visit from the British fleet.

Advices from Naples state that the municipality of Naples presented to the King a petition, signed by 20,000 persons, praying that the Constitution might be abolished by law, as it was *de facto*.

AUSTRIA AND HUNGARY.

Five columns of the Pesth Zeitung are filled with the sentences passed, by courts-martial, upon the persons who have been compromised in the late Hungarian revolution. All the sentences of death have been commuted to terms of imprisonment in irons, in the fortifications, for periods of twelve and sixteen years. The Austrian government has repealed Baron Haynau's tax on the Hungarian Jews, and even promised to indemnify those who have already paid the assessment.

An inundation of the Danube has caused immense injury in Hungary, especially at Comorn, Raab, and the Kasper district. Fifteen thousand persons have taken refuge at Raab, in the greatest destitution.

DENMARK AND THE DUCHIES.

Advices from Berlin state that Gen. Rauch has returned from his mission in the Duchies of Schleswig Holstein—that he has failed in his object, and that the hope of an understanding is further off than ever. The Baltic Gazette states that Denmark will only agree to a prolongation of the armistice on the following conditions, viz:—Dissolution of the army of Schleswig Holestein, or its great reduction; dissolution of the National Assembly; a new electorial system and the occupaton of Rendsburgh by Danish, and Swedish troops; and she will only conclude a peace on the basis of a reunion of the Duchies to Denmark. There is an apprehension that England will imperiously dictate the conditions of peace, if its conciliatory efforts prove unavailing.

SWITZERLAND.

The *Suisse* of Berne says,—The Federal Council have decided in according a subsidy of from 20 to 100 Swiss livres to the Refugees gravely compromised who should select asylum out of Switzerland. The most necessitous are to be transferred gratis to the frontier.

RUSSIA.

Accounts from every port in the Empire speak of the remarkable state of the wheather—the alternations of thaw and frost, have been quite unusual; and severe as the winters of Russia generally are, the cold has been more intense this year than in the memory of man. It is stated from St. Petersburg, that an ukase has been issued, according to which the Russian and Austrian governments engage reciprocally to surrender the Jews who have passed from one country into the other.

CHINA.

The weather for January has been unusually cold and wet. Canton and Shanghai markets are satisfactory. Sale of imports have been large, at improved prices generally.

INDIA AND CHINA.

The overland mail from Bombay to 16th, Calcutta to 7th February, and Hong Kong to 30th January, arrived in England on 22d March.—The political news possesses no interest. The whole of India was perfectly tranquil—at Bombay business was still flat. The imports of Cotton Piece Goods and metals have been on an extensive scale, while the orders for the interior have not increased—buyers there fore looked for lower prices, but holders were firm, and indisposed to submit to the reduction—the consequence is that a very limited business is reported by this opportunity. Cotton was very scarce and freights were exceedingly dull at £3 to Liverpool, but that quotation was nominal. Money was scarce, and the accommodation very limited.

At Calcutta the import market was quiet. There have been no large arrivals of British manufactured goods to increase the stocks, nor any great demand from the interior to diminish the supplies, which were only on moderate scales—hence prices were fairly maintained both for cloth and yarn. The export market was characterized by a more lively feeling. Indigo was in brisk demand at improved prices—money was plentiful and reasonable for all legitimate purposes—Exchange 1s 11¼d for six months sight bills.

The China letters report an improved demand for shirting and yarns, in consequence of the short stock and the moderate quantities reported by late arrivals. Tea and silks both maintained full prices and were scarce—Exchange 4s 4½d per dollar.

The America arrived at Liverpool on the 19th. The Europa, Capt. Leitch, has about 90 passengers. It is not thought advisable to send their names. She sailed with a N E wind at 6.

The Herman sailed from Southampton on the 20th, with full freight list and 80 passengers. The packet ships Plymouth Rock, Ivanhoe and Constitution, arrived on the 15th.

ADVERTISEMENTS
OF THE MILITARY DEPARTMENTS.
(*From the Ministerial Journals.*)

Tenders, addressed to the respective Officers of H. M. Ordnance, at Montreal, will be received until the 9th April, for the Grazing on Isle Ronde, and Isle aux Cochons, at Sorel, from the 1st May to the 30th October next.

The Commissary General will receive Tenders at Montreal, until the 11th April, for Bills at Thirty Days' Sight on Her Majesty's Treasury, the proceeds to be paid into the Commissariat Chest at Toronto, Kingston, Montreal and Quebec, in Mexican or United States Dollars.

MONTREAL RAILROAD.—The receipts for the month of January, were

For passengers.....	$5055 86
" freight.....	4828 55
Total.....	$9884 41

The receipts for February, were

For passengers.....	$4966 11
" freight.....	6414 84
Total.....	11,380 95

The *freight* for the present month has been unusually large. Twenty-six long freight cars departed in one train on Thursday morning. These cars are capable of containing nearly thrice the quantity of merchandize that the cars used on the Western Railroad carry. And not less than 20 cars have run over the road in any one freight train for a week.—*Portland Advertiser.*

THE LUMBER TRADE.—It appears from the best information that can be had on the subject, that the quantity of timber manufactured this year on the various lumbering establishments on the Ottawa and St. Lawrence Rivers will amount to something like twenty-three millions of feet. It is estimated that there are eighteen millions of White Pine, three millions of Red Pine, and about one and a half millions of Elm and other kinds together. But being aware that this estimate has been arrived at by taking the quantity on the ice, and that it does not include some that farmers are taking out, and which even yet is not on the ice, we think the total amount may be put at 23 millions at least. A great proportion of the White Pine made this year is of a very inferior quality; and, with the exception of Red Pine, which is generally of good quality, the same may be said of the other kinds. At present the water is low in the Rivers, and the snow is wasting so gradually by sunshine, that if we do not have heavy rains the water will not be high enough in the small streams to bring the Timber out. Should this be the case, it is impossible to say how much it would lessen the market supply, but it would in most cases keep a good article out of the market.—*Bytown Packet.*

An immense quantity of British manufactures, of every description, has been shipped from England to California, and as the shippers expect to realize large profits, every item of news received there from San Francisco is perused with the greatest attention. The accounts of the quantity of gold dust that is constantly sent from California are just beginning to startle the leading bullionists of London.

TORONTO MARKET—April 1.

In consequence of this day being Easter Monday and being partly observed as a holliday, our markets were very scantily supplied, and prices remain unchanged. Millers' extra superfine, by retail in bags, 19s a 20s per 196 lbs. Farmers' fine, by retail in bags, 17s a 17s 6d per 196 lbs. Fall Wheat 4s a 4s 4½d per bushel of 60 lbs. Spring Wheat 3s 3d a 3s 8d per bushel of 60 lbs. Rye 2s per 60 lbs. Barley 1s 9d a 2s per bush of 48 lbs. Oats 1s 3d a 1s 4d per bushel of 34 lbs. Pease 2s a 3s per bushel of 60 lbs; the latter price being only paid for the marrow fat pea. Indian Corn 2s a 2s 6d per bushel of 60 lbs. Grass Seed 8s a 8s 9d per bush of 48 lbs. Clover Seed 20s a 22s per bushel. Hay 45s a 55s per ton. Straw 20s a 25s per ton. Butter, fresh, 7½d a 9d per lb. Cheese 4d a 5d per lb. Pork, fresh, 25s a 27s per 100 lbs. Bacon 32s 6d per 100 lbs. MONTREAL AND BUFFALO LINE.

April 8—8, A.M.

QUEBEC.—Weather rather cloudy—Wind East—light—Thermometer 39°, Barometer 29.50—Pretty sharp frost last night. Our harbor has been literally blocked up for several days past with ice, which has been kept in it, by the strong easterly wind. This morning it is pretty clear and the farmers from St. Nicholas and St. Antoine have come to market with their produce in Bateaux.

THREE RIVERS.—Cloudy appearance of rain.

MONTREAL.—Cloudy morning—Wind light from the West—Thermometer 42 above, Barometer 29,65 and falling.

CORNWALL.—Fine and warm.

BROCKVILLE.—Cloudy—Cold raw West Wind.

KINGSTON.—Cloudy—Wind West.

OSHAWA—Wind N. W.

TORONTO—Cold—Clouding up for a storm.

6, P. M.

FROM THE EXTRA OF THE QUEBEC GAZETTE.—A widow by the name of Spence, keeping a sailor's lodging house at Diamond Harbour, hung herself yesterday, while her family was at church. She was of intemperate habits, and had had a serious quarrel with her daughters in the morning. She took the opportunity while they were at church to put an end to her existence.

NEW YORK, April 7.—The Hermann arrived here yesterday, with 70 passengers and a valuable cargo of French, German, and Swiss goods.

A letter received here by the British Consul, dated Forting, Snell, Michigan, 16th, says that the northern coast of America, at this season, has been explored by Commodore Moore of the brig Plover, from Behring Straits to Wainwright's Inlet, thence to the mouth of Mackenzie River by Dr Ray, considerably east of the Coppermines; but nothing has been seen or heard of Sir J. Franklin and party.

Baltimore, April 7.—Sadlier & Son's Jewellery Store in Baltimore Street was last night robbed of $6,000 worth of goods.

New York, April 8.—Mr. Barclay, the British Consul for this city, has received two letters enclosing despatches to be forwarded to England. The first is from Dr. Ray, as follows:—

"McKenzie River, Sept. 26, 1849.—30 miles below Fort Simpson.—Sir,—It is the desire of Sir J. Richardson, who commanded the recent overland searching expedition —— I enclose to your address the accompanying despatches with the humble request that it may be forwarded to England without loss of time.

"I may mention that it contains a short account of my summer's visit to the arctic sea, via Copper mine River, which has proved quite unsuccessful. The great quantities of ice preventing us from getting to Wellington's Landing Island.

"I am, &c.,

(Signed,)

"JOHN RAY."

At Belleville, on the 11th ultimo, by the Rev. W. Gregg, A. M., William H. Ponton, Esq., to Mary, sister of the Hon. John Ross.

DIED.

At Chatham, C. W., on the 18th March, aged 30 years, Maria Flowers, wife of Mr. Hugh Morrison. During her illness she resigned herself wholly into the hands of Almighty God, in whom she had put her trust, having been a consistent member of the French Baptist Mission Church of Grande Ligne, District of Montreal, for years before her marriage.

At Tonbridge Wells, on the 8th ultimo, Lieut. General Elias Walker Durnford, Colonel Commandant Corps of Royal Engineers, aged 75, formerly commanding Royal Engineers in Canada.

Potash Kettles.

FOR SALE, by the Subscribers, deliverable on the first opening of the navigation between this place and Three Rivers, which will probably be about the 15th instant,

Three Hundred St. Maurice Warranted Potash Kettles,

Assorted all weights, from 3½ to 11 cwt. These KETTLES, as announced by previous advertisements, are made altogether from St Maurice Ore, smelted only with charcoal, which renders them quite superior to any other make. They are, moreover, made in the most approved manner, being thin on the edges and upper part of the sides, and extra thick in the bottoms.

The Subscribers continue their practice of undertaking to EXCHANGE every KETTLE that may Fly, Crack, or Leak, at any time during the first three months after it is put into use; and they are enabled to state that, out of upwards of 300 sold in this neighbourhood during the past Winter, only one has been returned, the defect being merely a sand hole, which caused it to leak. With this exception, they have not heard a complaint.

Purchasers at a distance are reminded that SCOTCH KETTLES (of which there are none now in Market,) cannot in all probability be delivered here before the end of May or beginning of June—too late for Spring work.

They have also on hand—

750 Flat Bottomed COOLERS, 23 x 14 inch.
2000 Common Shape do assorted, all sizes.
500 American pattern BOILERS and CALDRONS, assorted, 35, 40, 50 and 60 gallons.

GIROUX'S
BOARDING HOUSE.
Change of Residence.

MR. J. R. GIROUX respectfully informs the the public, that he has just REMOVED to a NEW RESIDENCE and that he has now established his BOARDING HOUSE in the spacious building heretofore and for a long time occupied as Swords' Hotel,

No. 16, ST. VINCENT STREET,

Opposite the Book Store of Messrs. Fabre & Co.,

And well known for its central position and the numerous advantages, which it offers as well to constant residents as to travellers.

In returning his sincere thanks to his numerous patrons for the liberal encouragement they have afforded him, Mr. GIROUX flatters himself that he will be able to accommodate them still better than heretofore, and invites them to visit his new Establishment, which he has spared no expense to render worthy of support. The numerous

CHAMBERS AND PARLOURS

which the house contains have been furnished in a manner calculated to render them agreeable and comfortable.

The Boarders will receive the greatest attention on the part of all belonging to the establishment, and the

TABLE

will always be served with a variety of dishes, such as cannot fail to satisfy those who may visit him.

Besides its central situation this Establishment possesses great advantages for travellers who arrive with private carriages

THE SPACIOUS YARD

attached to the house renders the place especially adapted for this purpose.

Great care will be taken of the Horses, and the

STABLES

are in a condition which leaves nothing to desire with regard to convenience and comfort.

This House presents all the advantages which can be looked for in a first-class Hotel, and in addition a degree of

QUIET

which cannot be expected in those establishments; but which is so agreeable and necessary to the man of business.

Mr. GIROUX having been long engaged in commercial transactions offers his services to those who may have Commissions to fulfil. He will attend with punctuality to all orders, and from long habit will be able to accomplish this charge so as to satisfy those who may employ him.

PLANTAGENET WATER.

MONTREAL, February 12, 1850.

SIR,—It is now nearly ten months since I commenced using the Plantagenet Waters in my practice: and I have now to state, that the high expectations I then formed of them, from the publication of Hunt's Analysis, have been fully confirmed by my experience of their beneficial effects.

I have found them a most agreeable and efficacious antacid laxative, and their continued use seems to answer the purposes of a tonic, by improving the digestive powers, and increasing the appetite.

I remain, Sir,
Your obedient servant,
GEORGE W. CAMPBELL, M.D.,
Lecturer of Surgery, McGill College, Montreal.

To Mr. Larocque.

DR. WISTAR'S
Balsam of Wild Cherry.

MORE HOME TESTIMONY.

No. 48 Union Street, Boston, April 18, 1846.

Mr. Seth W. Fowle—Sir: A sense of gratitude to you, and of duty to the public, prompts me to make the following statement, which, if of any service to you, is entirely at your disposal. It may have the effect to induce some other sufferers to make a trial of your invaluable medicine, which I can truly say, has literally snatched me from the grave to which I was fast hastening. Last July I was attacked by a sudden cold, which resulted in a very severe cough, with violent pains in the side and chest. From that time I began to waste away, notwithstanding I was under the treatment of skilful physicians. They prescribed for me in vain. I became so much reduced that my friends frankly told me that I must die, and that I was liable to do so at any hour. At this crisis, I heard of *Wistar's Balsam of Wild Cherry*, by way of a neighbor, whose life had been saved by it, and immediately sent for a bottle. The effect produced was indeed wonderful. My physician, one of the most respectable in Boston, who had previously told me that a cure was hopeless, came in, and I informed him what I had taken, and told him the good effects I had experienced. He examined the Balsam, and told me to continue the use of it; since which time I have continued to improve daily; and the same physician who had given me up entirely, told me a few days since, that I might yet live many years. I feel that I am now recovered, and gaining strength every day.

MARY ROWE.

We can cheerfully testify to the truth of the above statement, Mrs. Rowe having been an inmate of our family for some months past.

Machine Belting, Steam Packing and Hose.

THE Subscribers having been recently appointed by the "Boston Belting Company" their AGENTS, for the sale of their VULCANISED RUBBER FABRICS in Canada, beg to offer the same to Steam Boat Proprietors, Machinists, &c. The superiority of the STEAM PACKING, BELTING and HOSE of the Company's make, over any other material for above porposes, being so well known it is unnecessary to say anything in their favour. Certificates signed by extensive consumers attesting their superiority can be seen on application to the Agents.

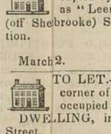
THE VEGETABLE PULMONARY BALSAM



IS the Most Highly Approved and Popular Standard Medicine now in General Use for COUGHS, COLDS AND CONSUMPTIONS, *Asthma, Pleurisy, Phthisic, Spitting of Blood, Hooping Cough, Bronchitis*, and all Pulmonary Affections and Disease of the Lungs and Chest.

It is thus spoken of by eminent Physicians.—One says—"For the above complaints it is superior to any other preparation used." Another—"It has been used with *wonderful* success, and has a superiority over every kind of medicine used." Another—"I can with *confidence* recommend it." Another—"It has been used with complete success, and I am *satisfied* that it is a *valuable* medicine." Another—"It is a *safe, convenient*, and very *efficacious* medicine." Another—"It has never, to my knowledge, disappointed the reasonable expectations of those who have used it." Another—"It is equal if not superior to any other medicine within my knowledge."

Extract from a letter dated Dayton, Ill., April 13, 1849:—"It was first introduced into my family by a celebrated Physician, some ten years ago, and such was the benefit my wife derived from it that we have not been without it in our house since. I have also recommended it to at least fifty different persons since, for Affections of the Lungs, and I do not know of a *single* case in which it did not give *immediate* relief, and some were cured after being given up by their Physicians."

BEWARE OF COUNTERFEITS AND IMITATIONS, such as CARTER'S COMPOUND PULMONARY BALSAM, AMERICAN PULMONARY BALSAM, and others, in part bearing the name! Enquire for the article by its whole name, the "VEGETABLE PULMONARY BALSAM," and see that it has the written signature of WM. JOHN CUTLER upon a yellow label, on the blue wrappers. Each bottle and seal is stamped "Vegetable Pulmonary Balsam."

Prepared by REED & CUTLER, Importers and Wholesale Dealers in Medicines, Paints, Chemical, and Dye Stuffs, 33 India Street, Boston, and sold by the Druggists, Apothecaries, and Country Merchants generally. For particulars and recommendations see a Pamphlet accompanying each bottle. Price 50 cents.
