**ST. HYACINTHE, C. E.**—A City situated on the Yamaska River, in the County of St. Hyacinthe, and the *chef lieu* of the new District of St. Hyacinthe, which comprises the County of that name and the Counties of Bagot and Rouville. It is one of the most flourishing places in Lower Canada, and is rapidly progressing. The local business is considerable, and the market is second only to those of Montreal as regards the variety, quality, and value of the articles brought in. The Grand Trunk Railway passes through the City, and places it at 1½ hour's time from Montreal, 10 hours from Portland, and 3½ hours from Quebec. St. Hyacinthe possesses many public establishments of great importance. The College is a fine cut-stone building over 700 feet long, and is surmounted by a cupola, from the top of which there is an extensive view: the course of studies is about the same as that in the best Jesuits' Colleges in France; and the institution possesses an excellent library, physical and astronomical apparatus, chemical laboratory, &c. The grounds around the College are very fine. The Bishop's Palace is a handsome brick structure, 150 feet long. The City Hall and Market, a superior brick building 200 feet long, is deserving of notice; and also the Court House, of stone, now about to be replaced by a more extensive edifice. Les Dames de la Congrégation annually instruct about 100 young ladies; and the Hotel Dieu, or Hospital, under the management of the Sisters of Charity, provides for the sick and destitute. St. Hyacinthe contains a fine stone and brick grist mill, the property of the Hon. L. A. Dessaulles and S. Monk, Esq.; a saw mill, with turning and planing machines, the property of Messrs. Nagle; carding mills, foundries, an organ-building establishment, tanneries, and many extensive manufactories of various kinds. The communication with the south side of the river is maintained by means of three bridges, besides a railway bridge. The City contains 5 French and 2 English schools. Distant from Montreal 30 miles, from Portland 262 miles, and from Quebec 137 miles. Daily mails. Population about 5000.

**THREE RIVERS, C. E.**—The third City in the Eastern section of the Province, and Capital of the District of Three Rivers. It is situated on the North shore of the St. Lawrence, at the debouchure of the River St. Maurice, in the Seignioriy of Ste. Marguerite and County of St. Maurice, and is equidistant (90 miles) from the Cities of Montreal and Quebec. The law courts for the District are held here, presided over by a resident judge. Three Rivers is the seat of a Roman Catholic bishop; and the Cathedral, recently erected, is one of the finest edifices in British North America. The improvement of the River St. Maurice by the Government, in 1853, has given additional impetus and life to Three Rivers; about \$200,000 having been expended in erecting booms and slides on the river, which has already attracted the investment of more than \$1,000,000 in lumber operations. The source of supply of lumber furnished by the St. Maurice and its tributaries extends over a territory of about 50,000 miles. The St. Maurice Lumber Company, chiefly composed of Americans, have erected extensive steam saw mills and machine shops, at the mouth of the St. Maurice, at which they manufacture a large amount of lumber, chiefly for the American market. The "Grès Mills," the property of G. Baptist, Esq., situated nineteen miles up the St. Maurice, also turn out large quantities of lumber yearly. There are numerous other saw mills of minor note; this place being the depot whence the whole is shipped, to Quebec, England, the West Indies, and the United States. Three Rivers has been a Port of Entry for some years past, and goods are bonded here if necessary. The steamers from Montreal and Quebec touch at Three Rivers nightly; the time of travel averaging about five hours. The usual cabin fare is \$1.25. A steamer plies semi-weekly between Three Rivers and Montreal; and another, semi-weekly, between Three Rivers and Quebec. Extensive iron works are in constant operation in the vicinity of the City. The chief are the works known as the Radnor, St. Maurice, and Islet. Large quantities of excellent railway wheels have been recently cast at the Radnor works for the Grand Trunk Railway; and the castings of the St. Maurice are justly celebrated throughout the Province. Brickmaking is also extensively carried on in the vicinity; and the place affords every facility for shipbuilding. A bank, under the Free Banking Act, is in course of organization; and the Banks of Montreal, Upper Canada, and Quebec, have agencies here. There are four efficient fire companies and a company of volunteer rifles; and a company of volunteer artillery in course of organization. There is a Mechanics Institute, a reading room, and several first-class educational establishments. The causes that have hitherto militated against the development of the numerous resources of the District,—namely, the lack of railway communication, and the extent of impracticable navigation of the St. Maurice in rear of the City,—the Government has taken measures to remove: the recent enactments for the relief of the Grand Trunk Railway provides for a branch road connecting Three Rivers with Arthabaska; thus opening a direct communication with five New England States, all requiring lumber, and Three Rivers being the nearest and cheapest market whence they could obtain it: as also another Act of last session provides for the construction of a branch from Three Rivers to the Grand Piles on the St. Maurice, whence the river is navigable seventy miles further. This road will be a great boon to lumbermen, and facilitate the settlement of the country. The famous Falls of Shawenegan, second only to those of Niagara, are twenty-four miles from Three Rivers, and those of the Grand Mere thirteen miles further up the St. Maurice. Mail daily. Population about 7000.
