KEMALIST PROPOSALS DISCUSSABLE BUT THEY ARE NOT ACCEPTABLE

Extraordinary Council Reaches Decision Regarding Turkish Terms To Be Formally Presented At Mudania Today—Bouillon Confident That Agreement Will Be Reached—Demarcation Of New Neutral Zone And Evacuation Of Thrace Two Of The Most Important Questions To Be Discussed

Constantinople, Oct. 2.—The Kemalists proposals which will be laid formally before the Mudania conference tomorrow are "discussable, but not acceptable." This was the decision of the extraordinary Council which met at the British Embassy this afternoon. It included the Allied High Commissioners, Ambassadors, Generals and Admirals.

M. Franklin Bouillon, the French envoy, through whose efforts with Kemal Pasha the conference was made possible, expressed his confidence that the Allied High Commissioners, Ambassadors, Generals and Admirals, would reach an agreement with Kemal Pasha tomorrow at Mudania. "Kemal will make an even greater effort for peace than he has made for war," he said. "Two of the most important questions to be discussed at the conference will be demarcation of a new neutral zone on the Asiatic side of the Dardanelles and the evacuation of Thrace."

The Allies held that Kemal's demands, as outlined by M. Franklin Bouillon, are of such a nature that the Ankara Assembly would therefore be in a position to reject the offer. Kemal Pasha insists on settlement of all military questions before replying to the Allied proposals. He and four of the Ministers at Smyrna accepted the Allied note in principle, but the attitude of the Ankara Assembly is not known.

The Allies feel that Kemal's demands could have been made with better grace if the Allied note had been fully endorsed by his Government. Kemal's armistice terms make no reference to a neutral zone or neutrality of the Straits, but the opinion of the Allied Council was that the most important question to be discussed tomorrow would be the establishment of a provisional neutral line at Chanak, as suggested by General Harington's latest note to the Turkish Nationalist leader.

It must be remembered that the Mudania conference is military, not political, but the evacuation of Thrace is largely under the latter category and is hardly considered a matter to be decided upon by the Allied Generals alone.

It was decided this evening that the armistice conference was to take place ashore at Mudania, instead of on one of the Allied ships. This decision was reached principally because the Allies were unable to agree even on such a minor question as to which should have the honor of acting as host of the conference. Each apparently feared that the holding of the conference aboard one of the other's ships would give that nation a distinct advantage in that session and in the report of that session which would reach the outside world.

off For Mudania.

Constantinople, Oct. 2.—Hamid Bey, representing the Ankara Government, accompanied by M. Franklin Bouillon, the French envoy, will leave tomorrow morning for Mudania on the cruiser Metz. General Harington, who will represent Italy at the conference, will proceed on the Victor Emmanuel. General Sharpe, for France, on the Jean Bart, and General Harington on the Iron Duke.

The Mudania conference will begin at 1 o'clock tomorrow afternoon. The British naval authorities have ordered the cessation of all marine traffic in the neighborhood of Mudania, and newspaper correspondents are to be excluded from the meetings. Daily communiqués will be issued on the results of the conference and transmitted by wireless to Constantinople.

General Harington's consent to meet Kemal Pasha, instead of Mustafa Kemal Pasha is causing much comment; there is a vast difference in their ranks, General Harington being Commander-in-Chief of the Allied forces, while Kemal is only second in command of the Nationalist army.

Kemal's Pledge.

It is learned that M. Franklin Bouillon has secured Kemal's pledge to suspend military movements during the armistice conference, provided the Allies accept the following conditions:

1. Formal guarantees concerning the evacuation of Thrace.
2. The establishment of Allied garrisons in the larger towns of Thrace.
3. The occupation of Thrace by Turkish Nationalist gendarmes.
4. Transfer of the civil administration of Thrace to Kemal functionaries.
5. Evacuation of Thrace within eight days by the Greek army.
6. Occupation of the western line of the Maritza River by Allied troops.

One of the British proposals, it is reported, will be the establishment of a new neutral zone on the Asiatic side of the Dardanelles. M. Franklin Bouillon had an interview this afternoon with General Harington and also meetings last evening and today with the Allied High Commissioners, to all of whom he gave an account of his negotiations with Kemal Pasha.

The presence of small detachments of Turkish infantry in the neutral zone near Chanak this morning is reported.

Cries of Christians.

"The cries of the Christian refugees of Smyrna for water and food are met by a Turkish lash," said Dr. Esther Lovejoy, of New York, President of the American Women's Hospital, who has just returned here after a week's survey in the stricken city. Dr. Lovejoy declared that the world has not been told the real story of fire and

horror.

"There are still several hundred thousand Christians in Smyrna and the interior, whose lives are in peril, for the time limit of their evacuation has expired," she said.

"Only Providence knows what their fate will be. The crowds on the quay are so great that some of them are pushed into the sea. Women holding their babies aloft in their arms to save them from drowning. Turkish soldiers are systematically robbing the men and wrenching the rings from the women. The wretched sufferers are willing to be robbed if the robbing can purchase life."

"At night the Turkish soldiers commit excesses against the women and girls. Only when searchlights from the ships in the harbor are turned on them, do they desist. In terror of the Turk, the refugees are packed in thousands in the front of the American consulate."

"There are more than 100 mothers who gave birth to babies. Some were delivered while standing. I attended many. Some of the infants died within a few hours from exposure but the mothers clung pitifully to the dead bodies of the little things," she added. Dr. Lovejoy said that a Turkish soldier, mistaking her for a Greek woman, struck her heavily with the butt end of a rifle and left a mark. This soldier was about to strike her again when a United States officer intervened. One of the doctors, asserted Dr. Lovejoy, witnessed a Greek woman cut her throat and then hurl herself into the water and was drowned.

Refugees who were evacuated must pass through a series of gates. Dr. Lovejoy said. She described how, at each gate, the refugees were stripped of all their belongings, including their money and clothing. In some cases the women were forced to undress so that they could not take any fun with them. By the time a woman refugee reached the last gate, her clothes were in tatters.

Dr. Lovejoy described the sanitary conditions in Smyrna as unspeakable. The whole city, she said, was befouled. She thought that the Turkish officers were doubtless unaware of the misbehavior of their soldiers. In many cases the officers showed real compassion for the refugees, she said. She mentioned one instance in which a Turk threw himself

self across the body of a child, in order to save it from being trampled to death.

Turks Evacuate.

London, Oct. 2.—The Turks have evacuated Kara-Bigha, and retired from the neutral zone at this point, says a despatch to the Times today from Constantinople. On the other hand the despatch says, Turkish infantry have appeared within the neutral zone at Bergaz, 18 miles northeast of Chanak, and at Kusuk-Keul, twelve miles south.

M. Franklin Bouillon, says a Reuter despatch from Constantinople, said today that he did not expect a reply to the Allied note from the Turkish Nationalists within five or six days, as Mustafa Kemal Pasha would not arrive in Ankara until this evening.

M. Bouillon added that he was convinced from his conversations with Kemal in Smyrna, that Kemal considers the Allied proposals may serve as the basis for negotiations. He added that the difference between the Allied and the Turkish points of view concerned matters of form rather than of fact.

The Russian note of protest against a blockade of the Dardanelles has caused some surprise in official quarters as the British Government has heard of no blockade and strongly doubts whether there is any justification for the protest. It is considered possible, however, that the Allied commanders, for military considerations, may have adopted measures of a blockade character in the Dardanelles.

Reuter's today says it learns in authoritative quarters in London there is no information that such a blockade had been instituted.

Significant Visit

With the military dispositions to be taken in Thrace the immediate topic of the Mudania Conference tomorrow, the utmost significance comes to the visit of ex-Premier Venizelos of Greece.

It is declared that up to the present M. Venizelos has been unable to obtain any alteration in the promise given by the British, jointly with the other Allies, in their note to Mustafa Kemal that they would favor the return of Thrace, as far as Adrianople, to the Turks. There seems to be some question, however, if this promise will continue indefinitely to hold good.

While there is no time limit set to the terms of the Allied note to Kemal, giving the promise regarding Thrace as a basis for the proposed Peace Conference, it is known that the Kemalists are being urged to hasten acceptance of the terms of that note lest it be withdrawn. It is claimed that Lord Curzon had the utmost difficulty in securing the consent of Premier Lloyd George to the Allied note and it is considered probable in many quarters that if the Greek revolution had already taken place at that time Mr. Lloyd George would not have consented.

The Turkish Nationalists, it is understood here, are to be told tomorrow that if they wrangle too long over the subject of Thrace, it may become impossible for the Allies to force the Greek revolutionists to abandon Thrace; also, that if the Kemalists make too many representations regarding the Greek atrocities in Thrace, they may be reminded that the Greeks are charging that similar alleged atrocities are being committed at the present time in the Smyrna district.

Favorable Factor

What is considered one favorable factor in connection with the Mudania conference lies in the personnel of that conference at least so far as Gen. Harington and Ismet Pasha, the Nationalist representative, are concerned. Gen. Harington is known to be doing his utmost to prevent further delays and difficulties, while Ismet is regarded as one of the most level-headed supporters of Mustafa Kemal.

Ismet Pasha has long had a plan for taking Constantinople, which he regards as a comparatively easy military task. But he has said: "We will get it without fighting, so what is the use? We can wait."

Unless Ismet has ironclad orders to the contrary regarding Thrace, it is regarded here as an easy task to secure his consent to any reasonable arrangement pending the Peace Conference. It is understood he will ask that French troops be allowed to occupy and police and administer Thrace as far as the Maritza by advancing their present Tchatalja lines. The French thus partially resuming the control they exercised during the spring and summer of 1920.

The whole situation is considered here to continue to be fraught with the danger of war, despite the present easing of the tension. There seems no doubt that the Kemalists are holding their troops for action if no peaceful settlement is found possible. In addition there are reports of Greek preparations in Thrace by the revolutionists, and sinister rumors that Turkish and Russian Soviet officers are landing in large numbers in Bulgaria.

..... Curzon's Attitude

Paris, Oct. 2.—Lord Curzon, British Foreign Secretary, has made known to Count de Saint Aulaire, the French Ambassador at London, the attitude which the British will take at the Mudania conference with regard to Thrace. The British General will be instructed to adhere, as far as possible, to the view of the French and Italian Generals respecting the limits to which the Greeks should return to await definitive regulation by the peace treaty. As the question of the provisional ad-

CABINET IS TO MEET TOMORROW

Expects To Have Something From Near East Armistice Conference

(By Canadian Press)

Ottawa, Oct. 2.—A call has been sent out for a meeting of Cabinet on Wednesday afternoon. This will be the first meeting in ten days and it is expected that when the Ministers come together, they will have before them some dealing with the Near East situation. While the members of the Cabinet have not been meeting in Council, they have had before them daily reports on the situation from overseas and have thus been able to keep in constant touch with developments. While the Armistice Conference agreed to between the Allies and the Turks may last for some days, it is expected that some official information from it will be available for the Cabinet by the time it meets on Wednesday afternoon.

IRISH CLASHES ARE REPORTED

Irregular Troops Are Showing More Activity—Heavy Fire On Nationals

Dublin, Oct. 2.—Irregular troops are showing increased activity. Small attacks by them have been reported from various points. They were repulsed at the barracks at Mullingar and Cavan this morning.

In the fighting at Mullingar two Republicans are reported to have been killed. At Cavan more than twenty irregulars made up the attacking party.

The main gate to the barracks was destroyed by the explosion of a mine and then the irregulars opened a heavy fire from three directions on the Nationals. There were no casualties.

An army bulletin estimates the losses to the irregulars in the battle at Killorglin at 80, ten of them killed. The Nationals lost one killed and five wounded.

MARKING TIME ON NEAR EAST SITUATION

(By Canadian Press)

Ottawa, Oct. 2.—The Canadian Government is "marking time" on the Near East situation. No meeting of the Cabinet will be held today and it is understood that no Cabinet meeting will be held tomorrow. The situation is being watched very closely, however, and unfavorable news from the Near East would probably be the signal for an immediate gathering of the ministers. Just now there is an easing up and the tendency to wait the result of the Armistice Conference, which according to despatches will open tomorrow. Naturally, the result of the Conference will be looked for eagerly. It is hoped that the more conciliatory attitude which seems to have been assumed by the Turkish leaders will result in averting hostilities.

ministration of Thrace falls under the jurisdiction of the High Commissioner, this matter will be settled at a later conference of the Commissioners in Constantinople.

The Mudania conference tomorrow will therefore be taken up entirely with military questions, including the evacuation of the neutral zones in Asia Minor at the British Government's suggestion, instead of being dealt with at a separate conference, as originally arranged.

M. Franklin Bouillon is expected to return to Paris at the end of the week and lay before Premier Poincaré a full report of his peace efforts. Official quarters in Paris say he has reported that the chances for a peaceful settlement are bright and has expressed the opinion that the Allies will not find the Turks difficult to deal with at Mudania.

Intervention Urged

Washington, Oct. 2.—The State Department had before it today a cablegram from Dr. James Cannon, Jr., Bishop of the Methodist Episcopal Church South, who is in Europe as a member of the committee investigating conditions in the Near East for United States church and relief organizations. Dr. Cannon urged upon the Washington Government a policy in the Near East involving United States intervention for the protection of Christians there, even if such a course necessitated employment of United States naval forces in Turkish waters.

U.S. Destroyers Start.

Norfolk, Va., Oct. 2.—The 12 United States destroyers ordered to the Near East to "protect American interests" started today on their trans-Atlantic voyage to the Mediterranean. Unless the vessels are ordered elsewhere by radio their first stop will be at Gibraltar. The Atlantic voyage is expected to consume about ten days.

Currie's Tribute.

Montreal, Oct. 3.—A warm tribute was paid to Gen. Harington in charge of British forces at the Dardanelles, by Gen. Sir Arthur Currie today, who said that Gen. Harington was attached to the Canadian Corps for a time during the Great War.

INDEMNITY AND REGISTERED MAIL

Important Changes Met With Approval Of The Dominion Postal Officials

(By Canadian Press)

Ottawa, Oct. 2.—Important changes in regard to registered articles met with the approval of the first conference of Dominion postal officials at this afternoon's sitting. Votes taken favored:

1. Increase in the maximum indemnity for the loss of registered articles. The present maximum is \$250. The new maximum suggested is \$100.
2. Indemnity to include abstraction and damage. In regard to the last vote, indemnity is now paid only if the registered article is totally lost. Should the decision of the conference be adopted, indemnity will be paid if the contents are missing or damaged.

Discussion during the day covered a wide range of topics, mostly dealing with the technical handling of mail. While the routing of mail was under consideration, J. E. Leonard, Postmaster, Montreal, took occasion strongly to criticize the Montreal Post Office building. It was, he said, the worst building for its purpose that could be imagined. Two million dollars had been spent on it, yet a proper building would save \$500,000 a year. The time clock as a substitute for the present attendance book did not receive much favor. Replies received from the larger post offices, it was said, were against time clocks, mainly on two grounds:

1. That with time clocks, clerks in charge of the various offices were unable to go to the time book and see who was or was not there. There was also no record of say a week previous, and
2. Employees in city post offices did not all have the same hours of duty.

To these objections the point was made that they had in view the older form of time clock and not the latest models which could not be beaten. "I have seen the latest time clocks at work and I have seen them beaten," observed one postal official.

No formal vote on the subject was taken, however. The conference continues tomorrow and Wednesday.

The Weather.

Toronto, Oct. 2.—Pressure is lowest tonight in the North Pacific States and highest in Manitoba. The weather has remained fine over the Dominion and continued warm over Ontario to the Maritime Provinces.

Temperatures.

	Min.	Max.

Forecasts.

Lower Lakes and Georgian Bay. Ottawa Valley and Upper St. Lawrence — Light to moderate winds; fine and warm.

Lower St. Lawrence, Gulf and North Shore — Moderately westerly winds; fine, not much change in temperature.

Maritime — Light to moderate winds; fair, not much change in temperature.

Superior — Light to moderate winds; fine, stationary or a little lower temperature.

Manitoba — Fair, not much change in temperature.

Saskatchewan and Alberta — A few scattered showers, but generally fair, not much change in temperature.

FIRST FATALITY

Old Town, Me., Oct. 2.—The hunting season in the Maine Woods opened today and the first human fatality came quickly. Christopher Reed was killed when Fred. Roler fired, mistaking him for a deer.

DECISION TODAY

RE RAIL WAGES?

Chicago, Oct. 2.—A decision on the plea of more than 400,000 maintenance of way employees for increased rates of pay, recently argued before the Railroad Labor Board, by E. F. Grable, President of the organization, is expected tomorrow. This announcement was made at the labor board today. It was generally understood that the majority of the board favors increasing the present minimum of pay which ranges from 23 to 35 cents an hour.

CANADA AND THE NEAR EAST

Part Country Should Play Should Britain Go To War Discussed By Methodists

(By Canadian Press)

Toronto, Oct. 2.—The Methodist general conference launched into a vigorous debate this forenoon on the part Canada was to play should Britain go to war with the Turks. It was interjected into the proceedings when a delegate insisted that owing to the Near East situation being critical, the report of the committee named to draft a resolution should have right of way to present it at once. The resolution expressing the wish that an honorable solution of the question could be peacefully arrived at and devotion to the British Empire, concluded as follows:

"In spite of every honorable effort to discover a peaceful solution, this result cannot be obtained, we beg to assure the British, Canadian, Newfoundland and Bermuda Governments that the Methodist people of the Dominion of Canada and Newfoundland and the Bermudas, as in the late war, will be prepared to make any sacrifices in the interests of Liberty and Justice."

As the debate which sprang up when this was read indicated a long duration, the resolution was finally referred back to the committee until there was more time to discuss it.

At the opening of today's session of the Methodist general conference arrangement was made to have the meeting of the Church Union committee held this afternoon instead of tomorrow in order to get advice from the lawyers who were engaged in drafting the bill which it is proposed to submit to the Federal Parliament to meet the legal requirements if Church Union is consummated. "While the Methodist people in Canada and Newfoundland have given for all purposes the vast amount of \$11,000,000 in one year," said Rev. S. W. Dean, reporting for the finance board, "yet as nearly as we can estimate the title of the Methodist population would have been no less than \$35,000,000." He explained that the chief object of the board is to develop a stewardship, campaign which is to impress upon the people of the Church that all they possess is held for God's use and therefore they should give at least one tenth to his work.

No formal vote on the subject was taken, however. The conference continues tomorrow and Wednesday.

GET BEHIND THE LEAGUE OF NATIONS

By Creating Public Opinion In Canada That Would Zealously Support It

Toronto, Oct. 2.—At mass meetings to-night held under the auspices of the Methodist general conference, great audiences which crowded Massey Hall and Metropolitan Church heard appeals to the Christian forces of Canada to get behind the League of Nations by creating a public opinion in this country that would zealously support the League.

One of the speakers was Sir Robert Borden who in a closely knit and carefully reasoned speech contradicted the assertions that the League has not accomplished anything. He said he believed it had accomplished more towards maintaining peace during the last three years of its existence than had been accomplished in any previous years by all the chancelleries of the world. He warned that should another world war break out it would be more terrible and more destructive than the one just passed and impressed upon his hearers the individual responsibility to work towards peace and good will among the nations.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

3 MORE TRIPS FOR THE FRANCE

Canadian Pacific Empress Will Then Make Around-The-World Cruise

Three more trips from Quebec are scheduled for the Canadian Pacific Empress of France after which the popular 13,500-ton liner will be placed in readiness for the special cruise around the world. She has been chartered again this year by Frank C. Clark, of New York, pioneer of the Mediterranean and round-the-world cruises de luxe.

In 1909 and 1910 the first round-the-world cruises were inaugurated by Frank C. Clark, which were unusually successful. The Empress of France was chartered by him last year, sailing from New York on February 11th, 1922, on a 74-day cruise to the Mediterranean, Palestine and Egypt.

The Empress of France is to sail on January 23rd, 1923, from New York, on a four months cruise de luxe, proceeding to Havana, thence through the Panama Canal with stops at Colon and Panama, after which she arrives at the Island of Cocos, the "Treasure Island" of historical fame where Captain Morgan is supposed to have buried his treasure of one hundred and fifty million dollars. The course then points to San Francisco. Leaving that city on February 11th the voyage continues to Honolulu, followed by two delightful weeks in Japan, including Yokohama, Tokyo, Kama-kura, Osaka, Kyoto, Kobe and Nagasaki with a cruise of over 300 miles through the picturesque panorama of the Inland Sea.

Then comes the varied charms of China, with visits to Hong Kong, Canton, and to Manila and the Philippines. The Empress of France then touches at Batavia, where visits will be made inland; then Singapore with excursions to the Palace of the Sultan of Johore and on to the fascinating city of Rangoon in Burma.

India will be one of the particularly attractive parts of the cruise with stops at Calcutta and Bombay, after which Kandy, Ceylon, will offer optional trips to Darjeeling, Benares, Lucknow, Cawnpore, Agra, Delhi, and other points of equal interest.

Passing through the Red Sea and with stops at Aden and Bombay, after which Kandy, Ceylon, will offer optional trips to Darjeeling, Benares, Lucknow, Cawnpore, Agra, Delhi, and other points of equal interest.

Count Szechenyi Told "Caronia's" Captain Found Ship's Third Class Excellent

A cable from the Cunard Line's Hamburg office says that during Count Laszlo Szechenyi's voyage home on the "Caronia" there were aboard the ship several hundred Hungarians. Captain Diggle's consent to inspect the third class in order to see if his countrymen were comfortable. He asked many of them in their native tongue if they were satisfied and later reported to the ship's captain that not only were the third class passengers well fed, well treated and made as comfortable as could be expected on shipboard, but that the staterooms, bathrooms, and public rooms were spotlessly clean. He said he was really astonished to find such good conditions and had made his tour of inspection because he felt that he might be able to do something for his traveling countrymen. He said his ideas about the third class were vastly improved by his tour of this section of the "Caronia." His country people were all happy and well satisfied. IMMIGRATION LAW IS WORKING WELL

Although Opinion In United States Is Far From Unanimous

(By Canadian Press.) Washington, Oct. 2.—Although opinion in this country is far from unanimous on the subject, the majority opinion in Congress is that the 3 per cent immigration law is working well. Representative Cable of Illinois in a recent speech in the House made an analysis of the law and commended its operation. He pointed out that it had recently been extended for two additional years with amendments. One of these amendments is to penalize steamship companies that bring aliens here in excess of the quota and another provides that instead of one year aliens must reside continuously for five years immediately preceding the time they seek admission from Canada. Newfoundland, Cuba, Mexico and countries of Central and South American or adjacent islands.

An opposite view from that taken by Mr. Cable is held by some who contend that the 3 per cent law is shutting out much labor needed in the United States and the one effect of the restriction practiced by this country is to encourage desirable immigration to Canada and to the nations of Latin America, thus building up those countries into powerful commercial and trade and agricultural competitors of the United States.

Mr. Cable, after commending the law in general terms, saying the quality of immigrants had improved, and workmen protected from competition, said:

"Because of the law we have been able to learn many characteristics of other countries. For example, the people of southern Europe are more anxious to come to the United States than those of northern Europe. This is shown by the records. The people of Greece, Hungary, Italy, Poland, Rumania and such countries exhaust their entire quota and every person who, under the law, was permitted to come, did come to America. On the other hand, the countries of northern Europe were not inclined to permit their nationals to leave for our shores and but a portion of the percentage allotted to such nationals was exhausted. For example, the people of France used but 75.9 per cent; Germany, 25 per cent; Norway, 48.7 per cent; Sweden, 43.8 per cent; and the United Kingdom, 55.2 per cent.

"Another interesting fact was disclosed in the operation of this law. While the nationals of the southern countries of Europe came to the United States, yet, instead of being a net gain, it was a loss in the number of immigrants from these countries for the entire fiscal year, because more nationals emigrated from the United States than entered here from these southern countries. On the other hand, when the English, French, Germans, Irish, Scandinavians, Scotch, Slovaks, and Welsh came to the United States they have the purpose of remaining here, making this their permanent home and the United States the new country of their allegiance, because but few of these nationals return to their own countries."

"The most peculiar result of the operation of the law is that our net gain consists entirely of women and girls. The number of male aliens who departed from this country during the fiscal year just passed exceeded those admitted by almost 12,000, while the number of females who were admitted to this country during the fiscal year ending June 30, 1922, exceeded those who departed by more than 98,000, so that the net gain in the number of aliens for the fiscal year last past, from both quota and non-quota countries is 87,121—all females.

"In addition, the immigration laws have been better administered. The percentage of those annually deported has been less than 2 per cent each year of those who seek admission, while under the administration of the 3 per cent law the percentage of deported has almost doubled. Another fine result of the law is the fact that under restrictive immigration naturalization of foreign born is on the increase."

HOME BREW IN CANADA UNPOPULAR (By Canadian Press.) Washington, Oct. 2.—Prohibition commissioner Haynes says that reports received by him show that empty bottles on which are labels of genuine whisky are being imported from Canada and sold to bootleggers. Inquiry by customs officials elicited the information that the bottles are shipped to a

chain of stores ostensibly for "hot-tling vinegar." The bottles, according to Commissioner Haynes, are of the type of well-known brands but are peddled with home-made concoctions of denatured alcohol or moonshine.

The same conditions exist on the Mexican border. Commissioner Haynes also makes note of the fact that home brew is becoming unpopular in Canada among border residents, according to a statement by the collector of customs and inland revenue at Windsor, who states that several home brew supply stores along the border have closed in the last few weeks.

DOG ADOPTS RACCOONS. Call Creek, B.C., Oct. 2.—A cocker spaniel dog owned by C. Salmon, of this town, has adopted two baby raccoons. She recently lost her pups and when the infant raccoons were brought in she took charge of them with every evidence of delight. The babies took to their new mother with equal fervor. It's a happy family.

QUEBEC, TUESDAY, OCTOBER 3, 1922.

STEAMER ARCTIC RETURNED FROM HER NORTHERN QUEST

Mission Accomplished Two Weeks Ahead Of Scheduled Time—Mounted Police Detachments Left In The Far North—Soft Coal Deposits Found—All Well Aboard Ship

The Canadian Government steamer Arctic which was fitted up last spring and sailed from Quebec on the 15th of July in command of Capt. J. E. Bernier, the veteran navigator of Arctic fame, arrived back at Quebec yesterday afternoon and docked at the King's Wharf at 3.45 o'clock.

The arrival of the Arctic put an end to all sorts of rumors which have been afloat in Quebec for a week past. Both Captain Bernier and the Chief Surveyor of the expedition, Mr. G. D. Craig and the entire personnel of officers and scientists on board looked the picture of health as they were seen on board the staunch little oak built craft on her arrival.

The trip was an unequalled success and we accomplished our mission two months earlier than expected. The two weeks expressed by both Captain Bernier and Mr. Craig. The former said he had no statement to give out for publication until the details and result of the expedition were made known officially to the Minister of the Department of the Interior. Those were the instructions given them by the Department, and as a matter of obedience they were in duty bound to conform to them.

Mr. Craig, who was pointed out by Capt. Bernier, as the man in authority to speak, was the chief hydrographic and topographical surveyor in charge of the expedition, and was accompanied by a number of men on the arrival of the Arctic, as they went aboard. He was courteous and hospitable in his reception but refused to give out any statement as to the object and result of their trip. He would say, however, that the assignment had been well and perfectly accomplished, and that the work was done two weeks quicker than the time allowed. Every man aboard the ship had enjoyed the trip and was in perfect health from the time he started up to the hour of return, and Dr. Livingstone, the Surgeon, who accompanied the expedition, had a very easy time of it. There was only one slight accident on board, when Mr. Reilly, one of the Assistant Surveyors, fell from a scaffolding and hurt his back. It was a trivial accident, however, and Mr. Reilly was soon himself again. They did not bring back any sleds or furs of any kind as the traders had passed through the country before they got there and gathered up all the furs from the Esquimaux. The only incident in regard to furs was in the fact that the crew had shot a polar bear.

Mr. Craig was asked how far north the expedition had proceeded when he replied "10 degrees," but apart from this would not give any information except to mention that the members of the North West Mounted Police, who went north on the steamer Arctic, had been left behind and established in ports, and all the stores landed. He said that they found all the Esquimaux they came into contact with happy and contented, and referring to his experience in the North ice said it was a wonderful sight.

He paid a tribute to Capt. Bernier, saying he was a wonderful navigator, a regular encyclopaedia of information in regard to the Arctic seas, and most humane in his relations with all on board, and ever ready to give out information.

The Arctic, "Arctic," formerly the "Gauss," was built in Germany in 1901 for the German Antarctic Expedition of that year and spent a year and one half in the south. In 1904 she was purchased by the Canadian Government and rechristened the "Arctic" and under the command of Captain Bernier for several years did patrol and customs work for Canada in our northern waters, including Hudson Bay.

After this work was temporarily discontinued she did duty as a lightship at the lower Traverse for some years, and with the resumption of normal activities after the years of unrest following the war she was again pressed into the northern service, and sailed from this port in July last, returning to port again this morning.

This year's expedition, it is understood, was organized by the Department of the Interior at Ottawa and apparently covered many activities including Post Office, customs, fisheries and police duties.

The expedition was in charge of Mr. J. D. Craig, D.L.S., of the Northwest Territories Branch of the Department of the Interior with the old veteran navigator, Captain J. E. Bernier in command of the ship. The personnel included also a party of scientists and engineers.

Members of the expedition report a very fine trip northward and through the islands, calls being made at several of these and, on the return trip, at Disko, Greenland. The summer in the north was very short, this year, many of the harbors being from two to three weeks later than usual in opening and winter's advance notices being seen on all sides before the ship started south again.

As might be expected considerable game was seen and various

STREET WIDENING PLAN UP AGAIN

Mayor Samson Makes Public The Correspondence Relative To The Project

His Worship Mayor Samson gave out to the Press last night a sheaf of correspondence connected with the suggestion that the Quebec Government help the City to carry out an urgent improvement in connection with the widening of St. Louis street and Garden street.

One of the documents, which is the most lengthy one, is Mayor Samson's reply to Premier Taschereau in which he reviews the whole situation and gives figures regarding the cost of the improvement which he places at \$105,000, including the acquiring of the Masonic and the Taschereau properties as well as the altering of the plans of the extension to the Court House.

As regards the statement contained in the Premier's reply that the Shehyn property, which the Mayor proposes to give to the Masonic Order in exchange for their Hall, could be bought for \$25,000, the Mayor produces a letter from Mr. J. A. Shehyn affirming that the property had never been offered for less than \$28,000.

Mayor Samson in his letter stated that he noted by the Premier's letter that there was no difference of opinion between them on the principle of the question as the Government seemed disposed to contribute towards the widening of St. Louis street and Garden street at that point, of the cost of the improvement, under the circumstances did not cost too much.

The Mayor then goes on to review the cost of the improvement. The Masonic Hall in exchange for another building with the indemnification of the two tenants, \$60,000. The property of the Taschereau estate, \$18,000. Increase in the cost of the enlargement of the Court House due to the change of plans, \$25,000. Total cost, \$103,000.

The City of Quebec, he states, would buy from the Government the 6,000 feet required for the widening of St. Louis and Garden streets at \$2 a foot, which would amount to \$12,000, and this would leave a balance of \$91,000 to be paid to the Government to pay off the \$91,000.

The Mayor points out that the Premier in his letter spoke of an expenditure of \$225,000. It was a question of facts and figures which would have been verified and could still be verified by Mr. Edouard Tanqueray, Government architect.

Reviewing the whole question the Mayor explains that in January last when he learned that the Government intended to enlarge the Court House he asked the City Engineer to find out what the work had been intended to do. The report which he received stated that the Government intended to build in the yard of the Court House fifteen feet off the street. This would have permitted the widening of the street later on. It was only after the work had been started that he noted that the building was in line with the street. A large number of rate-payers who also noticed that the new building would be in line with the street had seen him in that connection. The Mayor explained that he had called the attention of Hon. Mr. Galipeau to the fact that the extension to the Court House if continued as started would prevent the widening of Garden street. At the request of a large number of interested parties, including the C.P.R. and the Quebec Railway Company, he had taken steps to secure the return of the property to be expropriated and had transmitted the results together with the documents relating thereto to the Mayor. He had succeeded in inducing the Masonic Order to accept the Shehyn property on Grande Allee conditionally that certain improvements be made to the Shehyn property which would bring the total cost of the transaction up to \$55,500.

The Mayor said that the architect and the contractors of the Court House had submitted to him the plan for the additional cost incidental to changing the present plans for the Court House and he had transmitted these figures to the Premier.

He had believed that the Government of the Province of Quebec and of the City of Quebec were equally interested in this matter, and he had done his best to solve the problem.

In conclusion the Mayor states: "If the Government believes it cannot help the City of Quebec to realize this improvement, it will bear the responsibility of having come to this decision."

Amongst the documents which the Mayor sent to the Premier are the following: A letter from Mr. R. Wallace, Vice-President of the Masonic Hall Association, accepting the Shehyn property in exchange for the Masonic Hall on condition that the required changes be made to the Shehyn property; a letter from Hon. H. C. Carroll stating that his son-in-law Mr. Edouard Taschereau, who was absent at the time, would be prepared to sell his share of rights to the property of the Taschereau estate on St. Louis street on a basis of \$18,000, for the whole property; a letter from Messrs. Staveley & Staveley, Architects, to the Quebec Masonic Hall Association, estimating the total cost of the improvements to the Shehyn property at least \$56,000; a letter from Mr. J. A. Shehyn to Mayor Samson stating that the property of the of the Shehyn estate had never been offered for a price lower than \$28,000.

ROSES FOR HON. CHAS. MURPHY

New C.O.D. Postal Service Opened During Conference Of Officials

(By Canadian Press)

Ottawa, Oct. 2.—Some years ago when the parcel post was established under Hon. L. P. Pelletier, as Postmaster General, the first parcel was a basket of flowers sent to Mr. Pelletier with the good wishes of postal officials. Today the new c.o.d. postal service was opened, and at this afternoon sitting of the conference of Dominion postal officials, it was proposed that the occasion might fittingly be marked by sending to Hon. Charles Murphy, Postmaster General, a basket of roses.

The proposal was welcomed with loud acclaim. "The c.o.d. service opened today," humorously suggested one official. "So why not be appropriate and send the roses c.o.d."

More than 500 million letters and post cards, and some 350,000,000 newspapers are carried through the Canadian mails in the course of a year's business, according to figures presented by the Post Office Department to the Conference of Postal officials today. In addition, 50,000,000 parcels and 250,000,000 circulars, etc., are handled. The statement, giving approximate figures for a year's business, showed in the course of twelve months 10,000,000 money orders and 5,000,000 postal notes are issued. There are 12,200 post offices operated and 12,400 mail routes.

The summary of a year's business was given to the postal officials as indicative of the place of the post office in the business life of the Dominion. Translated into dollars, the mail service expenditure for a year was stated to be 15,000,000 and the annual cost of rural delivery service \$2,750,000.

Postage stamp sales in the course of a year, it was pointed out, reach the enormous total of \$28,350,000, while money order transactions total the changing hands of \$270,000,000. Postal note transactions totalled \$25,000,000 and there was an deposit in post office savings banks approximately \$25,000,000.

CHANCES ARE SLIM FOR CHRISTOPHER

Deposed King's Youngest Brother Unlikely To Give Greece American Queen

Athens, Oct. 2.—The Athenians think that there is little chance that Prince Christopher, the youngest brother of the deposed King Constantine, will ascend the throne and bring an American Queen to Greece. Prince Christopher's wife, Anastasia, the former Mrs. William B. Leeds, is not the cause of it. The reason is that too many other members of the dynasty stand before her husband in point of succession.

Prince Christopher has three elder brothers—George, Nicholas and Andrew. Besides, George has a son who, if the Crown should fall upon his father, would be the next in line.

F. O. Lindley, British Minister to Greece, today paid a visit to M. Canollecopoulos, the new Minister of Economics, and told him the signature of the visitors' book at the Royal Palace on Sunday virtually amounted to British recognition of the new Greek King. He added, however, that formal announcement of recognition which would be delayed pending the official declaration of the King's accession, was forthcoming.

The French Minister is still awaiting instructions from Paris with regard to recognition of King George.

Conferred With Curzon. London, Oct. 2.—M. Venizelos conferred with Lord Curzon this evening and interviewed a number of prominent officials during the course of the day. He still declines, however, to make any public statement on the ground that he desires to be completely informed on the situation. He hopes to confer with Premier Poincare at Paris tomorrow.

\$5,000,000 OFFERED QUEEN CITY MAN FOR OIL WELL. Toronto, Oct. 2.—The Toronto Star has the following despatch from Shreveport, La.: It is reported here that an offer of five million dollars, part cash and part oil, has been made to Lloyd Harris, of Toronto, and Bradford, for his oil well, known as the New Discovery, and five thousand acres surrounding it.

According to the report a major organization in American oil made the offer direct to Mr. Harris.

15,000 DAMAGE CAUSED IN BLAZE AT ASBESTOS (By Canadian Press)

Asbestos, Que., Oct. 2.—Damage estimated at over fifteen thousand dollars was caused early today by a fire which destroyed three buildings, namely, the stores of O. Bergeron, H. Vegard, U. J. Brunau and Mrs. Lenard. The fire started in the store of Mr. Bergeron and spread very rapidly. The origin of the fire is unknown.

BABY STILLMAN OUT OF DANGER

Hearing On Acceptance Or Rejection Of Referee's Report Scheduled Tomorrow

(By Canadian Press)

Yonkers, N.Y., Oct. 2.—John F. Brennan, counsel for Mrs. Anne U. Stillman, announced today that a hearing on the acceptance or rejection of the report of referee Daniel J. Gleason in the divorce suit of James A. Stillman, will be held at ten o'clock Wednesday morning before Supreme Court Justice Morchauser at White Plains. The referee last week handed down his report denying Mr. Stillman a divorce and declaring the baby Guy Stillman legitimate.

Baby Out of Danger Three Rivers, Que., Oct. 2.—Baby Guy Stillman, son of the millionaire banker of New York, who recently suffered from an attack of high fever is now out of danger according to information received over the long distance wire from Grande Piles to-night. Dr. Charles Green, of New York who was given a rush call to Grande-Anse where Mrs. Stillman's camp is located, is staying at the camp to hunt.

LAW OFFICIALS SCORED BY JURY Quantities Of Seized Intoxicating Liquors Withdrawn From Storage

Washington, Oct. 2.—Certain unnamed "representatives of the Department of Justice" are declared in a Federal Grand Jury report made public here today to have withdrawn quantities of seized intoxicating liquors from storage during 1920 without due process of law and to have disposed of a part of it by appropriating it for their own use and by giving it to friends and relatives.

The Grand Jury further held that the liquor in question, most of which had been seized at the Washington Union Station and stored in rooms of the Department of Justice building and rented warehouses here, was "disposed of by such officers and employees with the sanction and approval of those in higher authority at that time."

FEW UNEMPLOYED. Ottawa, Oct. 2.—Men registered for employment at the local Unemployment Bureau are down to 287. Last week jobs were found for 200, of whom 140 went to the bush. Their pay ranges from \$26 to \$40 a month with board. Prospects for employment are reported fairly bright this week.

1-32 DISCOUNT FOR FREIGHT DISCOUNT (By Canadian Press) Ottawa, Oct. 2.—Notice is given by the Board of Railway Commissioners that the rate of exchange in connection with the shipment of freight between points in Canada and the United States from Oct. 1 to Oct. 14 inclusive will be one-thirty-second of one percent discount. No surcharge will be collected on international business.

ROCKEFELLER HAS THE LARGEST ASSESSMENT

Increase In Real And Personal Estates Of \$771,000,000 In N.Y.

New York, Oct. 2.—Tentative assessments in this city for 1923 show an increase in the real and personal estates of more than \$771,000,000 over 1922, it was disclosed today when the tax books were opened, bringing the city's total assessments, exclusive of special franchises of corporations up to \$11,262,171,927. The net increase of real estate is more than \$642,000,000 and personal estate more than \$128,000,000. John D. Rockefeller has the largest personal assessment, \$2,000,000. Among those assessed for \$1,000,000 are J. Pierpont Morgan, Dorothy Caruso, widow of the famous tenor; Emily E. Hepburn, James H. Hill, Margaret S. Hill and James N. Hill. The New York Stock Exchange is assessed for \$13,000,000 and the Woolworth building \$12,500,000.

Myrand & Pouliot

LTÉE ST. ROCH

THE NEW NAVY LEAGUE.

The British Navy League, which recently underwent something like a peaceful, if sudden, revolution has announced a new policy in which the following objects are included:

1. To enlist, on Imperial and National grounds, the support of all classes in maintaining the navy at the requisite standard of strength, not only with a view to the safety of our trade and Empire, but also with the object of securing British prestige on every sea and in every port of the world.

2. To convince the general public that expenditure upon the Navy is the national equivalent of the ordinary insurance which no sane person grudges in private affairs, and that, since a sudden development of naval strength is impossible, only continuity of preparation can guarantee National and Imperial security.

3. To bring home to every person in the British Isles the fact that the bulk of the raw material used in manufactures and more than two-thirds of the food they eat is transported across the seas; that the protection of commerce at sea is, therefore, vital to the people of that country and especially to the working classes; that commerce can only be guarded from any possible attack by a Navy, in conjunction with the Air Force, sufficiently strong in all the elements which modern warfare demands.

4. To teach the citizens of the Empire, young and old alike, that "it is the Navy whereas, under the good providence of God, the wealth, safety and strength of the Kingdom chiefly depend," and that the existence of the Empire, with the liberty and prosperity of its peoples, no less depends on the merchant service, which, under the sure shield of the Royal Navy, welds us into one Imperial whole.

5. To maintain training ships to help those boys who desire to take up a career in the Royal Navy and Mercantile Marine, and to organize Sea Cadet Corps not only with a view to keeping alive the sea spirit of our race, but also to enable the boys to become good citizens of the Empire, by learning discipline, duty and self-respect in the spirit of their motto—

"For God, for the King, for the Empire."

6. To administer the Navy League Overseas Relief Fund, which provides for the education and advancement in life of children of all seamen who lost their lives or became permanently incapacitated by reason of the Great War.

7. To form Branches or County Units throughout the Empire to spread the knowledge of the history and tradition of the Sea Services, and generally to further the objects of the League.

In putting forth this new policy of the Navy League, the Executive wish to make it quite clear that the agreements reached at Washington are not in any way questioned, and since His Majesty's Government is pledged to them, it is presumed that they will be adhered to in good faith. But whatever effect the late war and the above agreements may have had on the future of naval armaments, the position of the Empire, so far as its geographical situation and its sea communications are concerned, has in no way changed, since, with the development of the submarine and aerial warfare, the question of getting its food supplies into that country in time of war will be even more difficult than in 1914-18.

For a clear understanding of the British Empire's special need of sea power, the situation cannot be better expressed than in the words of the Earl of Balfour when addressing his American colleagues at Washington. He asked them to imagine that their Western States were suddenly removed, 10,000 miles away across the seas, and that the very heart of their great Commonwealth was a small and crowded island, dependent on its overseas communications not merely for its trade, but for the very food upon which it subsisted. "Supposing," he said, "it was a familiar thought with you that at no moment in the year were there more than seven weeks' food supply, then you would understand why every citizen of the British Empire, in the Dominions and at home, never can forget that it is by sea communications that we live and that without them we should cease to exist."

As regards watching the development of the Air Force with a view to ensuring the proper co-ordination between naval and air force strength, it might be as well to remind the public that this is no new departure on the part of the League, since on the 16th May, 1913, the National Aerial Defence Association, promoted by the Navy League, was first inaugurated at the Mansion House, with the Lord Mayor of London in the chair.

It will, therefore, be realized that the Navy League even in those days was alive to the possibilities of aerial warfare on our sea communications, and recent developments have only accentuated the necessity of the Navy League living up to its motto—"KEEP WATCH."

GERMANY'S REA LPOSITION.

In view of the extreme difficulty of obtaining really reliable information as to the actual condition of affairs in Germany at the present time, considerable interest attaches to the account given by a correspondent, who is vouchered for as "well-informed," which appears in the September issue of "Lloyd's Bank Monthly." According to this authority, the seeming prosperity of the German country has deceived the rest of the world and it is scarcely realized, even in England, as yet how greatly it has been impoverished during the last eight years.

If figures were available, the correspondent believes that they would show reparations payments to have been made and the population fed since the armistice, to a large extent, at the cost of the speculator in marks and by the financial extinction of the old middle class. For some time the speculative investment in marks has ceased, foreign invested funds have all been hidden or absorbed, no credit can be obtained and there remains only a possible surplus of exports over imports as the measure of Germany's ability to pay "reparations." Notwithstanding Government efforts to restrict imports and to encourage exports (export licenses are normally refused unless the goods are involved in the currency of the buying country at approximately world's market prices) this surplus is up to the present time a minus quantity. In these circumstances it is clear that the situation is ruled by the demand for payments on reparations' account. In regard to these three policies are noted as being in the air:

(a) The policy of granting a moratorium, the definite fixing of the reparations payments at a sum within the range of Germany's ability to pay, and the granting of a loan, part of which would be used as the basis for a new stable currency. Germany would in

this case at least know her liabilities and have some chance of balancing her budget.

(b) The French policy of "sanctions" and "guarantees" involving sooner or later French political control of Rhineland and the Ruhr Valley.

(c) A policy of drift or compromise between (a) and (b).

Policy (a) aims at putting Germany into what should be its normal post-war condition. If the amount to be paid as reparations is fixed at too high a figure, it will be ineffective. Interest and sinking fund on the amount cannot exceed the available surplus of exports over imports.

(b) If at the time sanctions or guarantees are applied, attempts are made to obtain money from Germany, this must mean the overthrow of the Social State as it exists at present.

(c) The present policy of inaction, or a compromise between British and French views, will accelerate the pace of the Central Powers towards disaster.

In these various contingencies, how may one expect banks and other manufacturing and trading concerns to be affected? asks the correspondent. If the most favourable treatment possible is accorded to Germany by the Allies, he continues answering his own question, the paper mark can only be made stable (or be redeemed by a new currency secured by gold values) at something approaching its present low value (or the lowest value it reaches) in gold. This must mean that the figures in the balance sheets of even the biggest German concerns will be reduced to quite unreal proportions, but it will not follow that the firms will be in any way unable to meet their liabilities. Manufacturing firms, for instance, should be in a very strong position; their assets such as buildings, machinery, etc., are usually well written down (if not written off) in their balance sheets, but they have a very important gold value in reality. Where liability for debenture issues with fixed interest exists, this may, owing to the reduced value of the mark, be described as nominal. The reduction to vanishing point of many standing overhead charges is an important fact in Germany's future power of competition in manufacture, etc.

The German bank balance sheets are also unreal, but the correspondent is satisfied that their position is stronger than the paper mark figures translated into gold values, would suggest. He has never had any ground for suspicion that these banks would accept speculative business, least of all where a risk of foreign exchange could enter. In December, 1919, when a report was issued to the effect that every German bank had become insolvent owing to their foreign liabilities undertaken while the mark had a gold parity value, he made enquiries from local bankers, but could obtain no re-assuring answer. He was simply informed that the report was greatly exaggerated. The report, however, probed a very sore spot, and measures are thought then to have been successfully taken to cure the trouble. At the end of last year the Frankfurter Zeitung stated that these liabilities had all been liquidated—a statement which is probably true. His considered opinion is that the German banks are carefully managed, though their methods differ greatly from our own. Their assets are probably to a considerable extent real values, represented by holdings of shares in valuable industrial concerns, and by such things as the acquisition of the Deutsche Petroleum Works by the Deutsche Bank and so on. It is not thought that the banks have liabilities in foreign currencies against mark cover.

One serious fact, which is already showing significant results, is that the capital, reserves and other resources of the German banks and other lenders of capital are proving insufficient to carry on the trade and manufacture of the country. Calls for money are becoming louder and louder, owing to increased demands to pay the high wages, and to carry goods, etc., at the high prices. Great manufacturing concerns are having difficulty in paying their workmen, and there will be trouble in moving the autumn harvest. It is evident that only a smaller proportion of the proceeds of goods exported can be handed by manufacturers and exporters to the Government, and that a larger proportion must be retained to cover working expenses.

Some Things the Public Would Like to Know:

Pertinent Questions On Matters Of General Public Interest Are Invited

Who is the city police officer who recently arrested a young woman in the National Battlefields Park where he had no jurisdiction and failed to deliver her to custody in any police station to which her escort endeavored to trace her?

Would it not be as well for crusades against the drug traffickers, like Charley, to begin at home?

A Verse Or Two

(By Modern Poets)

MEDITATIONS.

Ah, send out that terse ultimatum,
Let the hell-hounds of war off the chain,
I'd rather—far rather—be straining,
Unemployment will drive me insane.
How nice, when a fellow lies wounded,
Propped up in a bed, white as snow,
And a "Big-Wig" is visiting the hospital,
Liquid eyed, he addresses you so:
"My lad, all Canada's behind you,
She'll look after you when you get home,
You've suffered a lot for humanity,
Not the people of Canada alone."
"Any chance of a job in your firm, sir?"
"My man, I'm afraid you're too lame."
No wonder a fellow's downhearted,
And the blood in his veins growing tame.
My God: It's hard luck to get wounded,
But good enough when there was war;
When there's work to be done in the trenches,
And recruiting is much below par.
And it's hard when refused that employment,
In a country of riches and fame,
A country you fought for and suffered,
At a time when you were not too lame.
An "Amp" (Amputation Case) in Victoria Colist.

SAVINGS BANK HAS MADE RAPID PROGRESS

Since Its Establishment Little Over Two Years Ago In Manitoba

Winnipeg, Oct. 2.—Since its establishment a little over two years ago the Provincial Government Savings Bank, with two branches in Winnipeg, has made rapid progress and today there are more than 10,000 depositors with deposits totaling \$4,200,000.

The bank was founded when the provincial government found it necessary to secure funds for rural

credits societies, which the regular chartered banks of the country had refused to finance. On the date of its first anniversary it had deposits amounting to \$2,650,000 while the number of actual accounts was 6,300. Since that time deposits have increased at the rate of approximately 450 a month.

"We have taken care of all advances ever made by the government, have paid for all our equipment and still have a surplus in addition," states E. A. Weir, chairman of the board of trustees. "In addition to paying the 4 percent interest on deposits, it has not cost the citizens of Manitoba, or principally of Winnipeg, a dollar to maintain the office," he states.

"In order to ascertain the particular attractions this bank has for the people of Manitoba, Mr. Weir

has conducted some investigation, with the result that in addition to the higher rate of interest and the longer banking hours, the fact it is entirely a Manitoba institution, with the money being kept in the province for its benefit, has also been a deciding factor.

A SILENT PARTNER.

Two men who were "somewhat in the city" were lunching at their club one day. "Oh," said one, "my partner formerly used always to oppose my views, but now he agrees with me in everything."

"How do you account to it?" asked the other.

"Don't know said the first. 'I'm not sure whether I convince him or only make him tired.'"

ACCIDENT ON THE C.P.R.

Loco-Fireman's Dreadful SCALDS

ROBERTSON ST., FORT WILLIAM.

"WHEN the water gauge of my locomotive burst, the left of my face was scalded terribly. Fortunately I make a practice of always carrying a box of Zam-Buk in my pocket, and when I had got over the first shock of the accident I had the balm freely applied to the injuries.

"Though I was suffering fearful agony at the time, Zam-Buk soon eased the pain and took out all fire and smarting, and enabled me to complete my journey.

"Upon reaching home I obtained another box of Zam-Buk and continued the treatment. In a few days all the new skin was growing in a wonderful way. I don't know anything else to touch Zam-Buk for dealing with cuts, burns, scalds and other small injuries."

(Signed) GEO. H. DUFFUS, (Fireman C.P.R.).

BY-LAW NO. 46a.

Amending By-Law Concerning Boxing Exhibitions, Etc.

Drawn up in the French Language. At a meeting of the City Council of the City of Quebec, held on Friday, 29th September, 1922, the following By-law was read for the first time:

It is hereby ordained and enacted by the Municipal Council of the City of Quebec, and the said Council ordains and enacts as follows:

1. Article 6 of By-law No. 46, passed by this Council, on the 25th April, 1922, is repealed and replaced by the following:

6. The Commission shall not permit for a boxing bout or exhibition boxing bout, unless the issue of said permit be subordinated by the payment, to the city, a right to a license when the admission tickets shall be paid for. The price for the right to a license shall be from \$25.00 to \$100.00 at the Commission's discretion.

Public Notice

is hereby given that in conformity with the disposition of the law, the above By-law shall be read a second time for adoption, on Friday, the 6th day of October, 1922.

By order,
H. J. J. B. CHOUINARD,
City Clerk.

CITY ENGINEER'S OFFICE.

Tenders for the Removal of Garbage

PUBLIC NOTICE is hereby given that sealed tenders endorsed: "Tenders for the removal of garbage" will be received at the office of the undersigned up to Wednesday, the 11th of October, 1922, at 4 p.m., for the removal of garbage in the city of Quebec, the whole in accordance with tender form and specifications prepared to that effect by the City Engineer.

Tenders must be made on the printed blank forms and endorsed in the printed envelopes which will be furnished to intending contractors on application for the same at the City Engineer's office and the Roads Committee will not entertain any tender that is not made on the said blank form and enclosed in the said envelope.

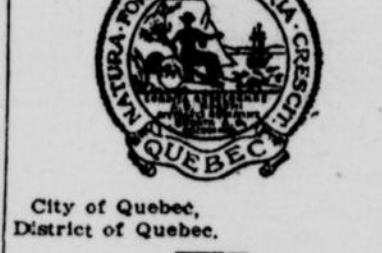

Tenders must be endorsed on the outside of the envelopes with a certificate from the City Treasurer of the necessary deposit as security for the contract.

Each tender shall be subscribed by two responsible parties willing to secure the execution of the contract.

Each tenderer shall deposit in the hands of the City Treasurer an accepted cheque equal to the amounts specified on the tender form for the items on which he tenders; said deposit to be confiscated by any one refusing to sign the contract; returned to non-contractors after contracts will have been signed; and kept back to contractors until all work has been carried out to the entire satisfaction of the city.

The Corporation does not bind itself to accept the lowest or even any tender. Contractor to pay for drawing up deed and supply the City Engineer with a certified copy thereof.

CITY OF QUEBEC CITY HALL

BY-LAW NO. 50.

Concerning the Water Works

Drawn up in the French Language. At a meeting of the City Council of the City of Quebec, held on Friday, the 29th September, 1922, the following By-law was read for the first time:

Whereas to put an end to recourse in damages exercised against the City of Quebec, because it absorbed for water works ends, a considerable part of the St. Charles River water, it is necessary to acquire from the proprietors of immovables fronting on said river and situated between the said water works intake and the bridge for vehicles on the public road close to the Indians' church in the Loretteville village, the rights or servitude of turning aside and direct to the said water works the water which would naturally flow in front of said immovables.

It is ordered and enacted by the said Council and the said Council orders and enacts as follows, to wit:

1. For the City's water works end, it is necessary to turn said water of said St. Charles River which would naturally run in front of lots 1033, 698a and subdivisions of 698a, 698 and its subdivisions, 697 and its subdivisions, 696 and its subdivisions, and 673 and its subdivisions, of the official cadastral plan of the parish of St. Ambroise de la Jeune Lorette.

2. For the ends above mentioned, the City shall acquire amicably or by way of expropriation from the proprietors of said rights and servitudes.

3. The price or amounts to be paid for the acquisition of the rights or servitudes shall be taken from the general funds of the City.

Public Notice

is hereby given that in conformity with the disposition of the law, the above By-law shall be read a second time for adoption, on Friday, the 6th October, 1922.

By order,
H. J. J. B. CHOUINARD,
City Clerk.

BOYS DISCHARGED.

Three intelligent and respectable appearing lads, whose ages averaged 12 years, were brought as prisoners to the Court of Sessions yesterday, followed by their mother. It transpired that a resident of Ste. Anne de Beaupre had the lads apprehended under the Vagrancy Act. But when they were arrested before Hon. Judge Lachance and the story told, His Lordship dismissed their case, and sent the boys home in custody of their mother.

THE SACRED HEART HOSPITAL, POUND DAY

Thursday, the 5th of October, will be Pound Day for the Sacred Heart Hospital under the patronage of the Lady Mayors of Quebec. This good work is supported by public charity.

On behalf of the ladies of the "Help Committee" we beg of all those who can do it to contribute to this day of benevolence.

The Ladies of the Sacred Heart Hospital are as poor as ever, and deserving of consideration.

Here follows the list of places where donations may be sent and deposited:

Lower Town and Upper Town, at City Hall.
Montcalm Ward: At the Zouaves Hall, Berthelot Market, and at the Brothers' School on De Salaberry Avenue.
Belvedere: At Normal School, on Ste. Foy Road.

Dancing at the Apollo Dances, 227 St. John Street, tonight. If you desire a good evening's fun come along.

MANY FOREST FIRES RAGING

In Various Districts Of The Province—Woods Burning For Two Weeks

Mr. G. C. Piche, Superintendent of the Forestry Branch of the Department of Lands and Forests, is a busy and anxious man these days organizing the fire fighting forces of the Forestry Service, to combat the numerous forest fires now raging in various districts of the province. Seen at his office yesterday Mr. Piche said there were fires everywhere.

On the south shore the woods back of St. Julie in the County of Lotbiniere have been in a blaze for a stretch of two miles for the past ten days. A fire is also raging in parts of the Seigneurie of Lotbiniere, and there are fires in the County of Temiscouata. There are also fires in the woods in the township of Watford and Cumberland siding at the back of Shawinigan, and in the Ottawa district, as well as in the districts of Charlevoix and Saguenay.

The drought since the 15th of May last, as we have only had occasional showers of rain since that time," said Mr. Piche, "is responsible for the many fires which are doing a great deal of damage, and causing the Department much concern. The dry trees and the falling leaves as well as the dry ground is a steady menace and the danger of fire much greater now than at any part of the year. Hunters should realize these dangerous conditions," said Mr. Piche, "and govern their actions in the woods accordingly, and should be exceedingly careful about smoking or lighting fires in the woods. In France the forests have been closed to hunting from the beginning of September on account of the drought, and the danger of fire, and unless hunters in the Province of Quebec exercise greater care, it may devolve upon the Quebec government to also close up the forests against hunters. In France the forest fires have become so serious that the damage done is greater this year in comparison with the last twenty years. The authorities in that country have had to mobilize troops to fight the forest fires so great have been their spread and the danger of villages enveloped in flames.

"Rev. Father Mareaux the famous world astronomer in connection with the Observatory at Bruges, France, prophesied the present drought over a dozen years ago. He then foretold from his astronomical observations that the drought would last twelve years, and year by year become more acute, and said the drought would reach its peak in 1922. I have followed the astronomical prognostications of Father Mareaux, and organized our forest fire protection for the present year, in conformity with the great French astronomer's predictions, and have come to realize that he was right.

"In this province of Quebec all our streams and wells are dry, and our forest fires have the greatest difficulty in fighting the fire in the woods. We are however, doing our best, and where there is water to be had in the vicinity of the fires we are using it, and where there is no water our rangers are digging trenches to arrest the flames. It is hard and difficult work, nevertheless we are doing our utmost to save our forests from destruction. I have known our men where they had found water to stretch a line of hose as much as 3000 feet to play it on the flames in the woods.

"No, fires in the woods cannot originate from spontaneous combustion, our plants are too full of dew and they do not explode as in some centres to cause fire. Careless hunters are in the main responsible, who will persist in smoking in the woods, and light fires on chilly mornings to get warmth, others while walking through the woods from which a spark may fly to start a conflagration under present dry conditions. Then there are the boys now going into the woods establishing their camps and careless with their fires. It is on account of these conditions and the frequency of fires in the woods, that the Government has decided to establish its present system, which should be even made more severe by closing up the woods altogether to hunters and others responsible by their carelessness for forest fires.

SPLENDID PICTURE AT THE EMPIRE

"My Wild Irish Rose" Is Drawing Capacity Houses At All Performances

"My Wild Irish Rose," the sweetest flower that grows, according to the old song, is certainly one of the best pictures of the year. It has the atmosphere of Ireland with its brogue, and its shamrocks, its Irish colleens—to say nothing of a fight or two.

The picture opened a week's engagement at the Empire Theatre on Sunday and judging from the attendance at all performances, Sunday as well as yesterday, the film certainly is proving popular with local movie lovers.

The action moves swiftly with here and there a touch of laughter which offsets the tender moments of real drama in which Conn, the shaggy-haired, and Robert Florell make thrilling escapes.

Every member of the cast is a star and, unlike most picture plays, there is no particular role which stands out above the others—each role is different and requires the service of a star in order to interpret it properly.

"Mickey" Daniels, the freckle-faced boy in the world, adds much to the humor of the production. It is a picture that every Irish heart longs to see, and those who have a spot in their being for Irish romance cannot afford to miss it.

FIRE PREVENTION WEEK UNDER WAY

Imposing Street Parade Held Yesterday Afternoon—To Distribute Literature

The Dominion wide Fire Prevention Campaign was inaugurated yesterday. The Quebec Fire Department took part in the work of education against fire by a street parade yesterday afternoon of all the fire apparatus in connection with the various city stations, who mustered at the Central Fire Station at two o'clock in the afternoon and a half hour later, headed by Chief Donnelly drove through the principal thoroughfares of St. Roch's and the Upper Town, the automobiles in the procession tooting their horns and the apparatus driven by horses clanging their bells, to call the attention of the public to the danger of fire through carelessness. All apparatus in the parade carried a note of warning by the poster of education, and now nothing is left but for the public to take heed to the warnings and do their utmost to guard against the danger of fire. The campaign of education will last until the 9th. Instant, during which time the Quebec Fire Department will distribute literature all over the city, including the schools, containing warnings against the possibility of fire.

Don't's

1. Don't overvalue your property when placing insurance.

2. Don't start fires in stoves, furnaces, or fireplaces unless you are sure the flues and chimneys are clean.

3. Don't allow a stovepipe to come in contact with wood. Use cement, tin, or galvanized iron where the pipe goes through.

4. Don't leave your home with a lamp burning or turned down low.

5. Don't wash clothing or other articles in gasoline, benzine, or naphtha, nor allow it to be kept in your house.

6. Don't throw water on flames caused by burning gasoline, benzine, naphtha, or coal oil as it spreads the flames. Smother the fire with a rug or covering of some kind.

7. Don't use any but safety matches; others are dangerous.

8. Don't permit children to play with matches or start bonfires.

RADIO CONCERT THIS EVENING

H.M.S. Pinafore To Be Rendered This Evening Via The Ether

The following programme will be broadcast to-day by the General Electric Co., from their W. G. Y. Station at Schenectady, N.Y.:

NOTED SPEAKER AT CANADIAN CLUB LUNCHEON

A large attendance is expected at the Canadian Club luncheon, which takes place at 12.45 o'clock this afternoon at the Chateau Frontenac, at which the guest of honor will be Mr. Holman Gregory, K.C., M.P., of London, England.

The Canadian Club has been exceptionally fortunate in having Mr. Holman Gregory speak to them at their luncheon. He is member of Parliament for South Derbyshire, and is a noted orator. His impressions, therefore, of this trip should prove most interesting to those who will be privileged to hear him, and consequently, there should be large attendance at the event, which promises to be most successful.

TWO ALARMS.

The firemen were given two runs yesterday, when alarms were rung in from Boxes 146 and 722. The men from No. 3 responded to a call from Box 146, which proved to be a chimney fire, while the alarm from Box 722 was answered by the men from No. 10. This proved to be a false alarm.

Dancing at the Kent House every Wednesday, Friday and Sunday. Sept 27th

M. L. HOUTICQ LECTURED HERE

Delivered Masterful Discourse On Art In France At Laval University

Last night at Laval University before a large and distinguished audience including Premier Taschereau and many other leading citizens, Mr. Louis Houticq, Inspector of Fine Arts and Professor of the History of Art at the Ecole Nationale de Paris, lectured on art in France.

Of this masterful discourse, only a very few thoughts can be given here.

Romanesque architecture is the oldest type of French art. The whole of France is dotted over with Romanesque churches. A Romanesque church is thick-set, massive, low-roofed, built to resist the buffets of time. The sun, the rain and the wind may leave their mark upon it, but they cannot down it. The villages that had clustered around it have crumbled into dust, but the Romanesque church still stands. It oppresses by its massiveness and all too compels one to bend under its weight.

On the other hand the Gothic cathedral which succeeded it, with its soaring lines, carries the eye and heart heavenward. It is the triumph of architectural genius, which robbed stone of its ponderousness and made it soar upward by throwing the weight on outside buttresses.

The learned lecturer went on to describe the various phases through which French art passed until, at the death of Louis XIV, Paris became the centre of art in France, and we may say in the whole world.

But after all on looking back into the past, Romanesque architecture is what appeals most to the heart, it works the staying powers of a nation. In 1914 it was from the turret of the Romanesque church that the alarm rang out which called to arms the peasant who was still harvesting and made him exchange his spade for a rifle. When the invading flood seemed ready to engulf everything, the peasant once more took up his spade and dug down till the flood was arrested.

The peasant is the mainstay of the country in peace as in war. With a few good harvests he can tide over a crisis. He is thick-set and ungainly, like a Romanesque church; his shoulders are stooped and well they may be for they bear the weight of twenty centuries of civilization.

The lecture was presided over by Dr. Arthur Vallee, President of the Comité France-Amérique under the auspices of which the instructive entertainment was held.

CHAUFFEURS HAD ENJOYABLE TIME

Second Annual Banquet Of Quebec Chauffeurs' Club Was Held Last Evening

The second annual banquet of the Quebec Chauffeurs' Club was held at Bertain's Cafe last night under the presidency of Mr. Wm. G. Egan who has fulfilled the office of President since the organization of the Club a little over two years ago.

Some fifty members were in attendance and the usual social spirit which has characterized all former entertainments of the Club again prevailed.

After a sumptuous repast had been partaken of and the wails of the new man attended to, the toast to the King was proposed by the President and was responded to by the members standing and singing God Save the King. The toast to Our Guests was next proposed and this was responded to by Mr. M. O. Harris in a few well chosen words.

Toasts to Our Club, The Press and the Ladies were also proposed and duly honored.

Short speeches were also delivered by Messrs. M. O. Harris, P. C. Talbot, Jos. Mailoux, J. Geffroi, W. Kay, P. Regal, W. Tanguay, and W. J. Bolton the Secretary Treasurer of the Club who made a few remarks on the progress of the Club since its organization.

Songs were also rendered by Messrs. P. C. Talbot, W. Kay and F. Regal while a couple of French comic selections were rendered by Mr. J. Geffroi.

The party broke up at midnight with the singing of God Save the King, another very enjoyable evening having been spent by the officers and members of the Quebec Chauffeurs' Club.

COAL CARTER JAILED FOR STEALING FROM LOAD

A coal carter named Harvey, accused of stealing coal from a load he was engaged to deliver to a city coal dealer's customer, was arraigned before Judge Lachance in the Court of Sessions yesterday, and sentenced to spend 9 hours in goal. Judge Lachance in passing sentence, said he would be lenient in the present case, but if at any other time a coal driver was brought before him charged with the same offence he would make an example by dealing much more severely.

TERM OF APPEAL COURT UNDER WAY

In the Court of King's Bench, Appeal Side, before Hon. Justices Guerin, Flynn, Teller, Howard and Bernier pleas were heard on an appeal from a recent decision of the Superior Court in connection with a writ of habeas corpus over a man named Dechene, held at the request of the Banque Nationale. It was contended, on behalf of the Crown, that there was no ground for a writ of habeas corpus. The case was taken en delibere.

There are some eight appeals on the roll.

CONGESTION IN CITY SCHOOLS

Additional Buildings Are Urgently Needed To Relieve The Existing Situation

Since the re-opening of the schools last month there have been reports of congestion from almost every parish in the City with the result that urgent appeals are being made to the Catholic School Commission for additional accommodation for the children.

At the meeting of the School Commission last night a representative delegation from the parish of Notre Dame du Chemin in Belvedere Ward waited on the members. The delegation was headed by Rev. L. Hudon, S.J., Pastor of the parish and was presented by Ald. J. A. Lesage.

It was pointed out that the parish requires a new school for boys and it was suggested that a building containing 12 class rooms be erected in the rear of the Church adjoining the Brothers' residence to fill the requirements of the parish. In the present school this year there are 400 girls and 270 boys and the accommodation is inadequate.

The commissioners promised to look over the situation and to take the necessary steps to give the service required.

There was also an appeal received from the parish of St. Francois d'Assise.

The chairman was authorized to purchase the Bussieres property on Vauban street for the extension of the St. Jean Baptiste Academy. The property in question may be acquired for \$6,000.

As regards the fire insurance on the property of the Commission, Chairman Picard said that he had given over the securities to the printer and when they were ready he would submit them to the insurance companies having offices in the city and paying a business tax. He had prepared the following questionnaire which he would send out with the schedules:

1.—Can you take all or part of the insurance it requires by the School Commission at the rate of \$1. per \$100?

2.—In the event of the risks being divided what is the maximum amount you can take?

3.—In the event of all the insurance being given out in bulk, what discount or rebate can you allow the School Commission? Have you any other proposals or suggestions to make?

Mr. Picard stated that in the event of the plan working out satisfactorily, he wanted to know who would judge the reliability of the companies tendering for the insurance. He suggested that the policies be submitted to the General Inspector of Insurance of the Province of Quebec and also to the Bank of Montreal which had a special department which was well informed on such matters.

The Commission, he said, could reserve the right to secure information from other sources if need be.

His suggestions were accepted by the Commission.

PRESENTATION TO POPULAR NEWLYWEDS

Mr. And Mrs. Wm. J. Walsh Were Remembered By Their Friends Last Evening

Mr. and Mrs. Wm. J. Walsh, who were married recently and on their return from their wedding trip have taken up their home at No. 5 Artillery street, were given a pleasant surprise last evening when the friends of Mr. Walsh called at his home and presented him with a splendid cabinet of cutlery, as a token of esteem in which he and his bride are held.

Besides this valuable gift Mr. and Mrs. Walsh received a silver tea service and tray from the Quebec City and District Baseball League with which Mr. Walsh has been closely identified for several years, being a former vice-president of that organization. In addition to this Mr. Walsh received a substantial cheque from Mr. A. E. Scott.

Needless to say that the young couple were genuinely surprised at the call which they received last evening, but Mr. Walsh with his usual resourcefulness rose to the occasion, and in a neat speech he expressed to his friends the gratitude felt by himself and his bride for the valuable gift.

SAFETY RULES FOR SAFETY WEEK.

Safety Rules For Open Fires.

1. Don't build bonfires for fun.

2. If you must build outdoor fires, be sure that they are cold before you leave them.

3. Don't see dead trees afire. Sometimes they will burn for days.

4. Before lighting an open fire be sure that it is completely enclosed in a stout wire screen.

5. Keep children from playing too near the fire, screen or no screen.

6. Don't throw large pieces of loose paper upon an open fire.

7. Make absolutely certain that the fire is out before going to bed at night.

8. Don't say, "I guess it's all right."

9. Thaw frozen pipes with hot water, not with flame.

Safety Rules For Cooking and Cleaning.

1. Don't leave the stove while broiling is being done.

2. Don't pour water on burning grease.

Some women are so nice to their husbands that they take off their shoes for them when they come back from the club. Others take the shoes off them when they want to go to the club.

MAGIC BAKING POWDER

CANADIAN MADE

CANADA'S PERFECT BAKING POWDER

We recommend the use of Magic Baking Powder because we know that its ingredients are of the highest quality. It is guaranteed to be the best and purest baking powder possible to produce.

DECHENE FACES CHARGE OF ALLEGED EMBEZZLEMENT
David Dechene, a former employee of the Banque Nationale in connection with the St. Roch's branch of this bank, was arrested and appeared before Hon. Judge Lachance yesterday, on three charges of alleged embezzlement. The preliminary investigation was filed for the 6th instant. In the meantime the accused was released on bail. The accused was arrested on a complaint lodged by the bank some time ago, when the case was carried to the Court of Appeals on a writ of Habeas Corpus on the ground that owing to a technical error in the warrant, when the appeal was upheld by the higher Court. The arrest of the accused yesterday is a sequel to the case, and the warrant alleges the charges.

FOREIGN MAILS.
Foreign mails which will be despatched on the 6th, will be placed on board SS. Empress of Britain, instead of SS. Montrose.

How Fruit and Produce sales are increased by Long Distance

Some quotations from recent reports:

"Of 48 cars of fruit for immediate sale, two-thirds were sold by Long Distance."

"8% of our calls are from customers 'Collect,' our Company paying the charges."

"We use Long Distance frequently at night by arrangement with correspondents."

"Sold most of our canning 'pack' by Long Distance."

"Whenever I have a surplus of produce I use your classified directory to get in touch by Long Distance with new customers."

"We use code system for calling customers when consignments arrive."

We can tell you how to apply Long Distance to almost any business

L. BELCOURT,
Manager.

All Reserved Seats Have Been Sold For World's Series

CROWDS START TO WANDER INTO NEW YORK CITY TO SEE WORLD SERIES GAMES

Yankee Pitching Staff Of Bush, Shawkey, Hoyt And Mays Rated As Superior To McGraw's Moundsmen—Requests For Seat Reservations Much Larger Than Last Year

New York, Oct. 2.—Promise to-night of fair weather for the opening day of the world's series Wednesday was a boon to the thousands eagerly awaiting the first game of the second all-New York classic.

Box office indications pointed to a record-breaking demand for seats and officials of both clubs voiced the belief that last year's first game attendance of 39,293 would be greatly exceeded. The Giants and Yankees practiced together this afternoon at the Polo Grounds. Managers McGraw and Huggins expressed themselves as highly satisfied with the condition of their players.

The belief gained ground that the giant mound staff, the team's vulnerable spot, is likely to upset pre-series calculations.

Huggins was quoted as saying Joe Bush, premier American League twirler, would be his choice for the opener, while it was indicated that McGraw is grooming his southpaw Artie Nehf for the initial test.

Eligible Players.

Eligible players for the world's series beginning Wednesday were announced today as follows:

New York Nationals—Pitchers: Nehf, J. Barnes, McQuillan, Scott, V. Barnes, Jonnard, Ryan, Hill and Blume. Catchers: Snyder, Earl Smith and Gaston. Infielders: Kelly, Frisch, Bancroft, Groh, Rawlings, Maguire and McPhee. Outfielders: Emil Meusel, Stengel, Young, Cunningham, Robertson and King. Manager: John J. McGraw. Coaches: Hughie Jennings and Cossey Doolan.

New York Americans—Pitchers: Bush, Mays, Shawkey, Hoyt, Jones, O'Doul and Murray. Catchers: Schang, Hofmann and Devormer. Infielders: Pipp, Ward, Scott, Dugan, Baker and McNally. Outfielders: Ruth, Bob Meusel, Witt, McMillan, Elmer Smith and Skinner. Manager: Miller J. Huggins. Coaches: Charley O'Leary and Frank Roth.

All Reserved Seats Sold.

Ed. Darrow, business director of the New York Yankees, announced tonight that every reserved seat for the world's series games had been sold.

Fans should remember in this connection, however, that the entire upper grand stand and bleachers are not reserved, representing more than thirty-two thousand seats which will be placed on sale on the day of each game.

New York, Oct. 2.—A fast freight train stopped in Newark, N.J., at dusk today and from one of its cars poured a lengthy, sunburned youth known down in a far, hot corner of Texas as "Long Jim" Baker, war burier of a semi-professional team named after a grocer for advertising purposes.

Jim came to New York on a tube train and found a cheap hotel.

"Who's goin' to pitch the first game?" he asked.

"Joe Bush for the Yanks and Little Artie Nehf, the left handed Giant," answered an individual whose face was buried in a sporting page.

"Waal," drawled Jim, "I been expectin' for some time that some of these here days I'd be a pitcher in a world series game myself, so I tho't I'd come up to see what they're like, get used to the crowds of folks and all that stuff. Ain't never seen one afore!"

At about the same time Jim left his freight and for some hours previously during the day, fast passenger trains were arriving at their New York terminals bringing crowds of minor and major league players, managers and officials and newspapermen and a fair sized bunch of fans.

It probably is true that the national interest is no great when the series has for its principals two teams of the same city, but a baseball fan is like a little boy when his sister's beau is calling. He can't forego the burning desire to take a peek.

And, too, a funny thing about the world series is why they call it that. The contesting teams always are American teams and one could hardly conceive of interest in the series being manifest in the Orient, or in the Far North countries of Europe. Yet among the writers who will report the games for newspapers from other countries are a squad from England, two from Japan, one from France, one from Russia, one from Cuba, a couple from Brazil and the Argentine, a half score from Canada and one from Sweden. The latter probably was attracted by the Giants latest pitching acquisition, one Mr. Cveengros. Cveengros, however, is not a world series eligible.

Press reservations have been made by men representing every large city in the United States and Canada.

Many are from the Pacific coast, while the minor league cities, at least the larger of them, have sent writers along with the fans. Business managers of both the clubs have announced that the requests for seat reservations are much larger than last year, when the Yanks and the Giants were the principals.

Seating Capacity 40,000.

It is possible to seat about 40,000 persons in the Polo Grounds, where the games will be played. Each team will alternate in being "the home team" with the Giants enjoying the comforts of the home bench on the first day.

Whatever may be the interest out beyond the Hudson in this series between the Manhattan teams, there are enough fans among the six million folks of Greater New York to keep up a lively gutter-specter of speculative chatter on the life and ands and whats and whys of the chances of the teams.

CANADIENS WOULD HAVE JOE MALONE

Deal May Send Joe To Montreal, Noble To Hamilton And Lalonde To Toronto

Hamilton, Oct. 2.—The Canadian hockey team want Joe Malone of the Hamilton Tigers. This may result in a big three-cornered swap involving Hamilton, Montreal and Toronto.

At yesterday's meeting of the N.H.L. here, the proposed deal was discussed and Dandurand went back to Montreal prepared to put it up to the other owners of his club. If they are agreeable it will go through. Percy Thompson, Manager of the Hamilton Club, does not like to part with Malone, unless he can get a strong successor. If the deal is not spiked, Noble will come to Hamilton, Malone will go to Montreal, and Lalonde will be wearing the green and white livery of St. Patrick's.

The N.H.L. season will open as usual about December 17.

The annual meeting of the organization will be held in Montreal on the first Saturday of November.

Sporting Notes.

Floyd Johnston, San Francisco heavyweight and Bob Martin, A. E. F. champion, have been matched to box fifteen rounds at Madison Square Garden next Friday night.

Harry Greb had been picked tentatively as Martin's opponent but the New York State Athletic Commission ruled that the United States light-heavyweight champion cannot box in New York State until he meets Johnny Wilson, of Boston for the middleweight title.

Battling Siki, conqueror of Georges Carpentier and light-heavyweight champion of the world, is scheduled to fight in Rotterdam next Friday with Breitenstrater, heavy-weight champion of Germany.

Baseball has not been brought to a close in this city as yet. Sunday C. B. local champions, will play the Verdun nine, an independent outfit, at the Quebec Baseball Park. The Verdun team is composed of former City League players who deserted league company to play independent ball and is capable of giving C. B. a stiff struggle.

The opening game of the World's Series will be played tomorrow with the Giants as the home team. Joe Bush is looked upon as the possible choice of Manager Huggins to do mound duty for the Yankees, while Artie Nehf will likely be sent in to serve the benders for McGraw's club.

WILL EMPIRE THE WORLD'S SERIES GAMES

New York, Oct. 2.—W. J. Klem and W. McCormick for the National League and C. B. Owens and George Hildegrath for the American League were announced today as the umpires for the World's Series by Commissioner K. M. Landis.

PANCHO VILLA SUFFERING FROM CHICKENPOX

Philadelphia, Oct. 2.—Physicians today barred Pancho Villa, the new American flyweight champion, from his scheduled bout tonight with Battling Murray, declaring that the champion is suffering from chickenpox.

KOLEHMAINEN SET NEW WORLD'S RECORD

Helsingfors, Finland, Oct. 2.—Hannes Kolehmainen, the Finnish runner, broke the world's record today for thirty kilometers, doing the distance in one hour, 47 minutes, 13.3 seconds. The previous record was held by A. Stenroos, also of Finland, who finished in one hour, 48 minutes, 6.2 seconds in 1915.

"Babe Ruth, notwithstanding the fact that he was kept out of the game for more than a month for being temperamental and antagonistic to the much revered umpire, and gave way to Rogers Hornsby of the Cardinals for home run honors, is expected to be somewhat of a terror to the Giant hurlers."

"Ya? just wait till Baby Ruth steps up to that plate with that old stick of his" warned a Park Row newsboy who believes in the Yanks. "He'll make 'em look sick, he will. Believe me, old hoss, I'm a stick-up for him!"

The "Big Four" Yankee pitching staff, Bush, Shawkey, Hoyt and Mays are rated by the experts to be much better than McGraw's moundsmen, Nehf, Jess and Virgil Barnes. Jack Scott, McQuillan and Ryan, Bush won 26 games for the Yankee this season, and Shawkey and Hoyt both won a good majority of their games. Carl Mays, the underhand-throwing star of the 1921 season has had an off year.

Jess Barnes and Scott have been the best of the Giants, while Ryan has shown excellent form and may get a chance against the Americans. Yet the Giants won their pennant without a great deal of trouble, while the Yanks finished with but the slim margin of one game.

SEMI-FINAL FOR CHARITY SHIELD

Will Be Played Between Empress Of Britain Teams This Afternoon

The semi-final in the Charity Shield competition will be played at the Exhibition Grounds this afternoon, when two teams from the same ship, the Empress of Britain, will meet to decide which eleven will clash with the Wayagamack outfit in the final contest for the trophy on the next trip of the Empress.

Both these teams are sure to put up a gallant scrap, and one of the best contests ever witnessed on the local grounds may be expected. The Empress of Britain will most probably rely on the same team that did yeoman duty for them last Saturday against the France, while their rivals, the Empress Amateurs, will trot out the same team that defeated the Shamrocks in the first round after the league match.

The game will start at three o'clock and Capt. Frank Warner will handle the whistle.

The Empress team played two matches in the first round, meeting the Veterans on both occasions. The result of the first meeting was a 1-1 draw, but the Sailors were more fortunate when the two elevens clashed for the replay, emerging victors by a count of 5-2.

The Empress Amateurs played their first match in the competition, on Saturday, and defeated the Shamrocks 3-1 after an exciting game.

What the outcome of this afternoon's game will be is arousing keen interest among the crew of the Britain, and a big crowd will be on hand to witness the contest, and cheer their favorites on.

SPEEDY TIME ON GRAND CIRCUIT

Some Of Most Spectacular Racing In Half Century Witnessed At Leamington

Leamington, Ky., Oct. 2.—Some of the most spectacular racing in its fifty years of history was witnessed at the opening day of the Golden Jubilee meeting of the Kentucky Trotting Horse Breeders' Association this afternoon. The feature event, the Walnut Hill Cup, went to Sanford Small's four-year-old colt, The Great Volo, the three heats being the fastest ever trotted in the event, and the third heat equalling the record for the event set by Ane Guy in 1915.

Peter The Brewer, in a hot stretch drive, landed the first heat from Czar Worthy in impressive style, but Cox changed his tactics with The Great Volo in the second and third heats, coming from behind in well-timed drives and landing the brother to Peter Volo and Volo in 1915.

Frank H. Ellis' filly Jane Revere of his own breeding with the local trainer Ben White as pilot, won the 31st renewal of the two-year-old division of the Kentucky Futurity.

Her second heat in 2:06 1/4 is the best of the season for a two-year-old trotter. Jane Revere is the daughter of Volga that won the event in 1915. Volga's time on that occasion was 2:07 1/4, equalling the then world's record for two-year-old trotting fillies.

W. B. Dickerman's Finvarra was rather an easy winner in the 2:15 trot which opened the meeting.

MEADOWBROOK COULD NOT OVERCOME HANDICAP

Westbury, N.Y., Oct. 2.—The Meadowbrook "Big Four," United States premier polo combination, was unable to overcome a handicap of eight goals conceded to the Flamings today and lost 16 to 11 in a "tuning-up" match for the International contest, Wednesday and Saturday between the "Big Four" and the Argentine Federation four, holders of the British and American open championships.

CANADA'S FIRE LOSSES IN LAST TEN YEARS

Over Three Thousand Lives Lost And \$250,000,000 Of Property Destroyed

Ottawa, Oct. 2.—Over three thousand lives lost and insurable property in excess of \$250,000,000 destroyed is Canada's fire loss for the past ten years. This is the announcement contained in the Governor-General's proclamation designating October 2nd to 8th as fire prevention week. For the year 1921 alone the loss amounts to 350 lives and property to the extent of \$45,000,000. The proclamation states this has been unparalleled and draws attention to the enormous and inevitably increase from year to year.

All schools, factories and theatres have been circulated with pamphlets, enumerating the above facts, common causes of fires and precautions that should be taken to prevent them.

FAILS HEIR TO FORTUNE.

Hamilton, Oct. 2.—Mrs. J. B. Griffith, wife of J. B. Griffith, purchasing agent for the Dominion Power and Transmission Co. here, has fallen heir to \$1,500,000 through the death of her half-brother, who was president of a Detroit departmental store. Her son Bruce has received a farm valued at over \$50,000 from the estate.

ROUEN A WINNER AT KENILWORTH

Captured Fourth Race Over Mile And A Furlong Route Yesterday

Windsor, Ont., Oct. 2.—Kenilworth results:—

First race, claiming, three-year-olds and up, seven furlongs—Cleron, 108, Ambrose, \$5.45, \$2.50, \$2.50, won; Lucky Girl, 108, Harbourn, \$5.10, \$2.95, second; Bill's Luck, 108, Meiner, \$2.50, third. Time, 1:28 2-5. Tricks, Angelo and Tamper also ran.

Second race, claiming, four-year-olds and up, 5 1/2 furlongs—Sagamore, 105, Abel, \$4.80, \$4.15, \$2.70, won; Amyrian Queen, 102, Weiner, \$4.80, \$3.10, second; Some Baby, 107, Organ, \$3.65, third. Time, 1:06 1-5. P. Moody, Efficient, Gallipoot, Stanina and Arctic King also ran.

Third race, two-year-olds, 5 1/2 furlongs—Fair Lavina, 105, Organ, \$15.80, \$6.55, \$4. won; Fitzrue, 108, Ambrose, \$4.50, \$2.95, second; Flying Jacques, 108, McTaggart, \$2.00, third. Time, 1:07 4-5. Little Andy, Shue, The Ulster, Zing, High Heels, Reformer, Game Scrapper, Illusionist and Buddugie also ran.

Fourth race, claiming, four-year-olds and up, 5 1/2 furlongs—Lancelot, 105, Ambrose, \$5.35, \$3.95, \$2.75, won; War Tank, 107, Harbourn, \$4.40, \$2.50, second; Thorny Way, 103, Rensett, \$2.40, third. Time, 1:06 3-5. Miss Caltha, Commodore, Beckna and Plymouth Rock also ran.

Fifth race, claiming, three-year-olds and up, mile and a sixteenth—King's Court, 102, Ambrose, \$7.30, \$3.30, \$2.60, won; Dellahm, 113, McTaggart, \$3.40, \$2.60, second; Troubler, 107, Weiner, \$3.30, third. Time, 1:48 2-5. Flea, Asrael, Chandler and Sweet Bouquet also ran.

Seventh race, purse \$300, for three-year-olds and up, six furlongs—Miss Holland, 112, Gibson, \$4.40, \$3.90, \$2.60, won; Jamina, 112, Ball, \$4.85, \$2.80, second; Sevilian, 117, Simmons, \$2.75, third. Time, 1:17 4-5. W. M. Baker, Aunt Deda, Semper Stalwart and War Fox also ran.

LADIES' GOLF CLUB COMPETITIONS

There was quite a large number of members of the Quebec Ladies' Golf Club turned up yesterday to compete for the Boulton Plate and the Silver and Bronze Medals, all three of which were handicap medal play, and some very good cards were turned in.

The Boulton Plate was won by Miss Billie Watson, while Mrs. Foy won the Silver Medal competition, and Miss Muriel Gallagher that for the Bronze Medal.

Today the Club Championship, Consolation Finals will be played.

King of Cigarettes

Supreme quality and proven excellence. The flavor is delightfully mild yet soundly satisfying.

World Series Base-Ball Player Boards

Will be Distributed to Quebec City Fans

By
The Quebec Chronicle
Through the Courtesy of
THE GENERAL ELECTRIC CO., SCHENECTADY, N. Y.

These boards are intended primarily for the use of owners of Radio Receiving Sets, who wish to follow the big series play by play, as each play actually occurs. But will also afford interest and amusement to fans following the games from newspaper reports, enabling them to better visualize the exciting contests and to study each move at their leisure.

COUPON

GOOD FOR ONE RADIO BASEBALL PLAYING BOARD, PRESENTED BY

The Quebec Chronicle

THROUGH THE COURTESY OF
THE GENERAL ELECTRIC CO., SCHENECTADY, N. Y.

Only a comparatively limited supply of these boards, which are well printed on light card board, is available, but will be distributed, while they last, to any person presenting a copy of the coupon to be found in this announcement at the Chronicle Office, 9 Buade St., to-day. Cut the Coupon out and secure your Player Board.

MAYFLOWER WILL NOT COMPETE

Owners Of Schooner Formally Withdrew Entry For International Event

Boston, Oct. 2.—The Mayflower Association, owners of the schooner Mayflower, debarred by the Canadian trustees of the International Fishermen's Trophy as a contestant in this year's Cup series to be raced off Gloucester this month, today formally withdrew the Mayflower's entry for the international event, but asked the right to have her compete in the elimination trials.

In a message to Wm. J. MacInnis, Chairman of the American Fishermen's Race Committee, Gloucester, J. Henry Hunt, Chairman of the Mayflower Association said: "We withdraw the entry of the schooner Mayflower as a contestant for the International Fishermen's Cup, but to determine whether she is a real contribution to the models of our fishing fleet and to satisfy public interest we request the priv-

Sharp Advance In Prices Took Place Yesterday At N.Y.

GAINS SPREAD OVER MOST OF LIST—CHIEFLY OILS, EQUIPMENTS AND STEELS

Professional Shorts Hastened To Cover—Excellent Gains Also Made By Specialties—Mexican Petroleum Exhibit—Marked Reversal Of Form—Standard Oil Of California Up.

New York, Oct. 2.—A sharp advance in prices took place in today's stock market on receipt of news that the British and Turkish Commanders in the Near East had agreed to meet at a truce conference tomorrow.

Professional short interests who had sold stocks freely last week on the disquieting foreign despatches, hastened to cover and their demands, coupled with those of traders who had kept out of the market until the war clouds apparently had passed, resulted in most active issues registering gains of from 1 to nearly four points.

The advances were spread over most of the list, but the largest gains were recorded in the steels, equipments and the oils. Some excellent gains also were made by specialties, particularly Otis Elevator, which was up 7; American Linsud, up 2 1/4; Electric Storage Battery, up 3 1/2, and Wells Fargo Express up 3 3/4.

Bethlehem B. Lackawanna and Midvale each were pushed up more than two points, some of the buying being attributed to unconfirmed reports that the Midvale Company might be taken into the Bethlehem-Lackawanna combination. United States Steel common moved up 1 3/4 and Republic 1 5/8. Strength of equipments was based on additional large orders from the high railway systems, the orders now on the books of the Baldwin, American Locomotive and Pullman Companies being reported as more than three times as large as those on January 1. These three stocks registered gains of from 1 3/4 to 2 1/4 in today's trading.

Mexican Petroleum, which was under pressure last week exhibited a marked reversal of form today, showing a net gain of 3 1/4 points. Reports that the Mexican Government had ruled against the State of Vera Cruz imposing a state tax on petroleum production was a favorable influence. Standard Oil of California moved up 2 3/8 and Standard Oil of N.J., despite announcement of a cut of two cents a gallon for gasoline in the Carolinas by the New Jersey Co. Railroad stocks appeared to have shaken off the dampening influence of poor August earnings statements, C.P.R. heading the list with gain of 2 3/8 points. Several others moved up a point or more.

Sugar shares made a good response to the advance in prices for the refined product. American climbing 5 5/8 with smaller gains being noted in Cuban-American and Cuba Cane.

The Jewish holiday accounted in part for the lighter volume of business, total sales aggregating 735,000 shares.

Cash money opened at 3 3/4 per cent and advanced to 5, where it held until closing.

The firmness was attributed to withdrawals for first of the month requirements. The time money and commercial paper markets were quiet with virtually no change in rates. Foreign exchange rates strengthened in tone in response to the more favorable near Eastern news, demand Sterling showing a gain of nearly 1 1/2 cents. German exchange was heavy, marks being quoted at 5 1/2 cents a hundred against 5 and 6 1/2 on Saturday. Canadian Exchange was quoted at a premium of 3-64, the highest in recent years.

Bond prices made a brisk advance in today's market on the strength of more favorable developments in the Near East, most of the demand however coming from speculative interests. Argentine 5s led the foreign group with a two point gain. Advances of 1 to 1 1/4, however, were made by Belgian 7 1/2-2s, Paris Lyon-Mediterranean 5s, United Kingdom 5 1/2-2s of 1937, Norway 5s, Queensland 6s, Denmark 6s, Cascho-Slovakian 8s and Volvria 8s. Brazil 8 1/2-2 certificates fell back 3 1/2 points, apparently in response to the withdrawal of syndicate support.

Speculative industrial liens outshone the second grade railroad mortgage for the first time in several weeks. Cerro de Pasco 8s were the individual feature with a gain of 2 1/2 points, and were hard pressed by Kayser 7s, Consolidated Coal of Maryland 5s, Invinible Oil 8s, and Cuba Cane 8s, all of which moved up 1 1/2 to 2 points.

The rise in the railroad group was led by Chicago Great Western 4s, which improved 1 1/2 points. Atchafalpa Convertible 4s, of 1930 dropped two points.

Liberty issues were slightly higher. Total sales, par value, were \$3,552,000.

Egg Market

Ottawa, Oct. 2.—Very little change noted in the egg situation at different consuming centre in Canada. Best grades are inclined to advance. Ontario country markets very firm and higher, shippers paying \$10 to \$12 to producers and stores making sales of graded eggs at 40c f.o.b. free, and candied current receipts at 34c f.o.b. cases returned. The export demand for eggs is improving. Sales have been made of storage eggs at 40c f.o.b. Montreal, also at 19 shillings and 19 shillings per peck and a sale is reported at 20 shillings c.i.f.

Toronto firm specialties jobbing 44c to 47c, extras 42c to 43c; firms 35c to 37c; seconds 30c. Montreal firm specialties 42c to 45c, extras 37c to 40c, firms 32c.

Cash registers are probably not of much use in Russia. The quick method is to use a hay baler. Colorado Springs Telegraph.

Closing Letters By Local Brokers

(By Assoc. Gourdeau & Co.)

New York, Oct. 2.—A decided improvement in stock market prices was shown in today's session. This was attributed to the better news from abroad. However, although of this betterment short covering was chiefly responsible and buying for the long account was reported to be comparatively meagre. At no time did trading assume marked activity. The advance in quoted values being accomplished in a gradual manner. The tone of the market similar throughout and prices at the close were about the best of the day. Briefly, a cautious attitude seems to be pretty generally adhered to pending definite developments from the Near East.

Stocks, sales 767,300; bonds \$8,000,000.

(By L. G. Beaubien & Co.)

New York, Oct. 2.—Particular issues, such as Midvale Steel, U. S. Steel and many of the specialties have given a very good account of themselves throughout the afternoon. The tone has continued firm but business is on a very moderate scale with most of the transfers in one hundred share lots.

Call money advanced to 5 percent this afternoon but the market paid scant attention to this advance. The news as a whole has been very colorful this afternoon and with the natural small attendance in the financial district today the bulk of the trading has originated in commission houses and has not been professional. It is reported that American Republic Iron and Steel Company will repurchase Brier Hill in accomplishing some new financing, by bond issue, in the near future. The report was not confirmed.

Daily Gossip On Leading Stocks

Money on call on the New York Stock Exchange ranged between 4 and 5 percent for this week, compared with a range of six and 3 1/2 last week.

Time money continued quiet. Funds were lent in small volume at 4 1/4 percent for three to six months maturities. There was a small inquiry from brokers for money at 4 1/2 percent for sixty days. The renewal rate was 4 3/4 percent. In an active market for commercial paper the rate for prime names continues at 4 1/2 percent. A few exceptional names still command the lower rate, but the higher rate is now the market.

Logan & Bryan.—The market is expected to continue irregular, but with buying showing improvement on all reactions in standard stocks. The floating supply of these issues is concentrating in strong hands, according to latest developments. All things considered, we do not see anything at the moment to warrant purchases of stocks.

Further liquidation in Brazilian Traction shares on Saturday had no other explanation than the continued weakness in the milreis, with the resultant fears as to the security of the dividend on Brazilian stock. The movement of milreis recently has been a rather mysterious one. There is strikingly little liaison between Canada and Brazil in view of the interest, financial and otherwise, which Canadians have in the great South American republic, and the only explanation that has been forthcoming has been that the Bank of Brazil had ceased its pegging of the rate at 13 or better. It has been noticeable that the weakness movements of the Brazilian rate have come at times when sterling was showing a reactionary tendency. The more favorable turn of events in the Near East may be expected to have a constructive effect upon sterling and this may in turn strengthen the milreis. The commercial situation in Brazil, which, after all, should be the prime factor in determining the value of the milreis, seems to be headed the right way, so a comparatively quick return of the milreis to recent higher levels would not be surprising.

Sugar Market

New York, Oct. 2.—The early raw sugar market was firmer and prices were 1 1/16 higher to the basis of 3 1/4c for Cubas cost and freight equal to 5.02 for centrifugal. There were sales of 61,000 bags of Cubas prompt shipment.

Raw sugar futures were firmer on trade and commission house buying prompted by the higher ruling of the spot market and a better inquiry for refined sugar. Prices at midday were 9 to 10 points net higher. Refined sugar was firmer and unchanged to 15 points higher with fine granulated quoted at 6 1/2 to 6 40. A better inquiry was reported. Refined futures nominal.

Reduce Your Fat Without Dieting

Years ago the formula for fat reduction was "diet" or "exercise." Today it is "Marmola Prescription Tablets." Friends tell friends—there's no other. They still reduce steadily and easily without going through long sieges of tireless exercise and starvation diet. Marmola Tablets are sold by all druggists the world over at one dollar a case, or if you prefer you can order direct from the Marmola Company, 4612 Woodward Ave., Detroit, Mich.

SHARP RALLY IN MONTREAL MARKET WHICH WIPED OUT LOSSES THROUGHOUT LIST

Advance Generally Coincided With Opening Sale—Issues Held Initial Gains Or Improved Upon Them—In Particular Papers Showed Strength—Brazilian Most Active Stock Of Day—Spanish River Second

Montreal, Oct. 2.—On the turn for the better in Near East news there was a sharp rally in the local market today which wiped out from one to five points of recent losses throughout the list.

The advance was in most cases coincident with the opening sale and issues held their initial gains for the most part and in many cases improved upon them. In particular the papers showed the strongest tendency while Brazilian which has been under heavy pressure recently was the most active stock of the day and made a substantial gain, closing at 41 3/4, up 2 1/4 points. Spanish River was the second most active stock.

It opened at 31 and sold up to 33 1/4 for a gain of five points. The preferred was third in activity, opening 1 1/4 points up at 102, where it closed. Toronto Railway sprang into unusual activity and scored the greatest gain of the day, closing at a new high of 89 for a net advance of seven points. B.C. Fishing also touched new high ground, being up 1-2 to 20 1-2.

Loyal was the lowest feature of the day being off 5 1/2 points to 43. Ontario Steel was off 1 3/4 to 40; Ottawa Power was down a point at 81, while all other issues were fractional.

Trading in listed bonds showed a perceptible picking up with three new high. Ogilvie "C" was the strong feature, being up 2 1/4 points to 102 1/4; Wayagamack 5s, were up 3/4 to 81 3/4 and Winnipeg Electric 5s, gained 1 3/8 to 31.

Total sales listed 16,323; bonds 295,100.

Perfection at Last—

The Range You've Longed For

WHEN Westinghouse engineers designed this range they thought of every cooking convenience a woman could wish for—and the result was the perfect range, the range so simple even a child can operate.

Mechanically this range is superior to any other. The oven lining is porcelain enamel; every single part is removable, which means it can be kept permanently sweet, spotless and rustless. The fuses are mounted on the front of the range and can easily be changed. Every heating unit plugs in and can be detached by hand.

The Westinghouse Range has so many exclusive features, you'll want to see it demonstrated before you buy. Ask the dealer to tell you about it, or write us for booklet.

Has Never Felt Better In All His Life

Thousands of frail, nervous people and convalescents everywhere have testified to the remarkable power of Tanlac in bringing back their health, strength and working efficiency. It seems to quickly invigorate the constitution and is a powerful foe of weakness. J. T. Maleport, 1178 Dorien St., Montreal, says:

"For over a year, stomach trouble, dizzy spells, pains in the back, nervousness and inability to sleep caused me all sorts of suffering. I followed a friend's advice and took Tanlac. Now I never have an ache or pain of any kind and I feel just like a man made over." There is not a single portion of the body that is not benefited by the helpful action of Tanlac. It enables the stomach to turn the food into healthy blood, bone and muscle, purifies the system and builds you back to normal weight. Get a bottle today at any good druggist.

Great Improvement in Canadian National Rys. Fast Train Service QUEBEC-MONTREAL

The Canadian National Railways offer an exceptional train service between Quebec and Montreal. Hours of departure of both day and night trains are most suitable to the traveling public. "The Montreal" leaves Quebec Palais Station at 1:20 p.m. daily and arrives Montreal (Bonaventure Stn.) at 6:20 p.m. "The Mount Royal" leaves Quebec at 11:45 p.m. daily and arrives Montreal at 6:55 a.m. Returning "The Quebec" leaves Bonaventure Stn., Montreal, at 4:45 p.m. daily, arriving Quebec at 8:45 p.m. "The Citadel" leaves Bonaventure Stn., Montreal at 11:30 p.m. daily and arrives Quebec at 6:55 a.m. These trains operate over the Quebec ledge and are furnished with the most modern equipment, parlor cars, cafe-parlor-cars, first and second class coaches on day trains and standard sleeping cars with drawing-rooms and compartments on night trains.

For further information on additional train services between Quebec and Montreal, for reservations, tickets, etc., apply to City Ticket Office, 10 St. Ann Street, Quebec, Tel. 530, to Palais Station, Tel. 2125 or to any Agent of the Canadian National Railways.

Correspondence.

Room 34—Molson Bldg., 14 St. John St., Montreal.

Editor, The Quebec Chronicle, Quebec, P.Q.

Sir:—Let it be thought that in expressing the views I did contained in the letter published in your issue of the 26th, I was alone in so speaking. I beg to quote from the September 16th issue of the "Spectator" of London, England. As you are doubtless aware, the "Spectator" is regarded as the foremost weekly periodical in the British Empire. It is at the same time, all that is best and thoroughly British, and no weekly is more desirous of promoting the welfare of the Empire, than it. Its editor, staff and contributors are men of a very high order of culture, and the views they express are as a rule, judicial and timely.

Under the heading of "Topics of the Day," and the sub-caption, "The unending crisis," the editor in his leading article, referring to Lloyd George whom I strongly criticized in my letter, says: "There is not a more pitiable figure in life than that of a man who has magnificent intentions but who somehow always manages to make a mess of things. The cause of disaster is generally a want of common sense or of tact. We have frequently had this type of person in mind whom we have surveyed the extraordinary succession of disappointments, disillusionments and disasters, which are the outcome of Mr. Lloyd George's policy at home and abroad."

It continues: "And yet there is a very distinct difference between the type we have described and Mr. Lloyd George, for Mr. Lloyd George does not earn ridicule. He earns abuse; and he excites terror in those serious-minded Englishmen who are deeply concerned for the honour and welfare of their country, and who tremble when they watch him plunging in action or running wild in talk. He turns every fresh political business into loss or discredit, and we think the time has come for the nation to make up its mind that the interests of the country will never be safe in his hands."

The Prime Minister of Great Britain is so extremely volatile; so much a creature of impulse; so confident of his own judgment, that he very seldom reasons calmly, as one should with his responsibility and powers, but jumps to conclusions with a singular recklessness of (with all due respect to the fair sex) characteristic feminine mind. He is gifted or cursed with so the vivid imagination, that it affects his emotional being so strongly, that reason plays but a minor part in all that he plans and does.

Of all the Prime Ministers that Great Britain has had, none possessed his eloquence nor his adventurous mentality. Whenever he manages to get himself into a hole, and suffers the usual criticism, he prepares a very eloquent and moving speech, goes into a hostile House of Commons, and captures by the sheer force of his magnetism and oratory. These qualifications and qualities are not doubt splendid assets to the political stump speaker, but they are a very serious liability in the case of one to whom is entrusted the destinies of an Empire.

In a further reference in the same article to Mr. George, the editor states: "By far the most visible mess in these recent days is in the Near East. It was Mr. Lloyd George who encouraged the Greeks to undertake and continue a fantastic enterprise in Asia Minor. The whole history of modern Greece might have warned him that the Greeks had not the stability for a military occupation which would require not a violent and short-lived burst of exultation but those 'hold fast' qualities which are as serviceable as they are rare. The fact is that Lloyd George went ahead with his Philhellenic plans in Asia Minor without having any sort of guarantee that he had won compliance from the French and the Italians. He behaved as if he has done in the case of all his unsatisfactory Conference—acted without achieving any preliminary understanding. Only last month in the House of Commons he was praising the military capabilities of the Greeks and telling us with what remarkable efficiency they were occupying parts of Asia Minor and with what ease they could march to Constantinople if they had a mind to do it. Now the whole structure of his policy has collapsed like a house of cards."

No more serious or just accusation showing how tactless Lloyd George is, was ever made by any responsible newspaper than what has been quoted. From being a "Little Englander," he has become a raging Imperialist seeking not of the consequences of his acts declarations. He has hypnotized his more staid colleagues and, therefore, really with himself constitutes the supreme ruler of the Empire. He is evidently under the impression that the Dominions are instruments, that he can use to carry out his own wild and thoughtless policies. He evidently has somewhat of a

For Quality

contempt for the intelligence and political apprehension of the people in colonies and the Dominions. He may tell us that any action contemplated or taken, is to uphold prestige and rescue Christian peoples from Turkish oppression, but whatever he might say in this regard from students of politics and particularly those who have watched his career, in the British political arena.

In acting as he has, he has been playing with fire, but if he thinks for one moment that he will be permitted to have the flame extend to the Dominions, he is very badly advised.

To permit Lloyd George and his colleagues to embark upon any military enterprise, which they see fit to undertake, on the plea of maintaining British prestige and power, would be showing such a want of common sense, that would mark us out as absolutely devoid of intelligence.

As a matter of fact and recent history, the people in the British Dominions are far more British, than even Lloyd George. They are just as anxious to have the British Empire maintained in all its integrity and grandeur. They are no longer the child at the apron strings of the mother. They are able to think for themselves, and will not be influenced by Lloyd George's oratory or tactics. It will serve no purpose to criticize those who take exception to Lloyd George and the policy of his Government to say, that they are not patriotic or anxious to preserve the British Empire. They have made great sacrifices for the Empire, but will not tolerate any dictation whether it be direct or by insinuation from Lloyd George or his associates.

The East is seething with an awful unrest, and altogether due to the terrible blunders of Lloyd George and the British Cabinet. The success of the Turks has added fuel to the flame. Those who are subject to the mandatory control of Britain, refuse to any longer be coerced into such a policy of control, and it is quite likely, does Lloyd George think that Canada will send troops to have the mandates, which he has accepted, maintained?

The political fortunes of Lloyd George have run out. I have not the slightest hesitation in saying, that if he continues very much longer as Prime Minister of Great Britain, that he will wreck the Empire. As the writer of the editorial, quoted, says in the concluding paragraph:

"It is weak, timid and lethargic for the nation to speak of Mr. Lloyd George as indispensable. So long as such an opinion prevails we certainly shall not seek the end of our troubles. We shall go on in a state of unflinching crisis at home and abroad."

The attitude Canadians may take in refusing to be hurriedly forced into taking action, will be governed entirely by their appreciation of conditions and understanding of Lloyd George, as discussed by the writer quoted.

BERNARD ROSE.

IS POOR YEAR FOR THE FARMER

Maine Potato Growers Hard Hit By Heavy June Rains—Prices Disappointing

Wakefield, Mass., Oct. 2.—Crop yields and prices received this season have been somewhat disappointing to farmers of New England, according to a bulletin issued today by the local branch of the United States Department of Agriculture.

The heavy, damaging rains in June hurt Maine potatoes, Connecticut valley onions and tobacco. The bulletin states, "Lack of rain later restricted Aroostook potatoes further while continued wet weather did further damage to onions as well as to hay and grain. However, grains, especially oats in Aroostook and some other places, and hay generally, gave excellent yields. Fruit crops in Massachusetts are much better than last year, somewhat better in the other states except Maine. The general abundance of United States crops has caused prices to trend downward but the upward swing of general business should help to offset this drift to some extent through greater buying power in consuming centers."

ENGLISH EMIGRANTS ARE INTERESTED IN AUSTRALIA

Melbourne, Sept. 7.—(By Mail)—Australia as a land of opportunity for the immigrant from England is catching the imagination of the English people, according to a letter received here from the Australian High Commissioner in London, Sir Joseph Cook.

Sir Joseph declared recently in a speech that one immigrant from England came to Australia with nine pence in his pocket and now is in charge of the Australian Immigration Service in London. He was referring to Jack Barnes, who is also owner of 15,000 acres of wheat lands in the Commonwealth. In the week following the speech the High Commissioner's office received 24,000 requests for information on how to get to Australia under the immigration provisions.

One would almost think that those who wish to keep Uncle Sam's territory dry would not have to go outside the three-mile limit to find sufficient work.

You can blind a man by throwing dust in his eyes, especially if it is gold dust. — Duluth Herald.

Third Generation is Using Syrup Pepsin

No other Laxative can replace Dr. Caldwell's Laxative Syrup Pepsin in the confidence of those who use it

There are thousands of healthy, robust young men and women who have never in all their lives taken any other laxative for constipation than Dr. Caldwell's Laxative Syrup Pepsin. Their parents were given it by their parents; the grandparents are using it today. It is the one laxative ideally suited to all the family, safe for the little ones, effective in grownups, so compounded that elderly people, who are constantly forced to take a laxative because the intestinal muscles are weakening, find increased dosage unnecessary. This wonderful constipation remedy has been used continuously for 30 years, and over 10 million bottles are now sold annually, the largest selling family laxative in the world! The cost averages but a cent a dose. Every druggist sells it, and under a guarantee to do as claimed or your money will be refunded.

Millions of carefully conducted homes are never without a bottle of

Dr. Caldwell's Laxative Syrup Pepsin. Mr. Henry Ricker, Chippewa, Ont., says it is the best medicine they have ever used, and Mrs. M. Martin of Massey, Ont., uses it herself and recommends it to her friends. There is scarcely a day that someone in a family does not need it for constipation, flatulency, auto-intoxication, biliousness, intestinal poisoning, headaches, colic and cramps, and to break up fevers and colds.

Dr. Caldwell's Laxative Syrup Pepsin is a scientifically-balanced compound of Egyptian senna with pepsin and pleasant-tasting aromatics. The formula is on the package. As the popularity of this natural vegetable laxative increases, the public discards the harsher physics like calomel, coal-tar in candy form, salt waters and powders. Dr. Caldwell's Laxative Syrup Pepsin empties the bowels more cleanly and without any danger.

ANY FAMILY MAY TRY IT FREE

Thousands of parents are asking themselves, "Where can I find a trustworthy laxative that anyone in the family can use when constipated?" I urge you to try my Laxative Syrup Pepsin. I will gladly send a liberal free sample bottle, sufficient for an adequate test. Write me where to send it. Address Dr. W. B. Caldwell, 32 Caldwell Building, Toronto, Ont. Do it now!

Killed By Bull.

On Tuesday last Mr. Francois L'Abbe, of St. Francois, Island of Orleans, started to bring a bull to the boat in order to have him shipped to Quebec, and in order to better do so tied him behind his cart.

On the way the animal broke the cord, jumped over the cart and attacked his owner, injuring him so severely that he died the following day.

An Approaching Marriage.

On Tuesday next Dr. J. T. Dussault, of Levis, will lead to the altar, Miss Marguerite C. Gibson, daughter of James Gibson, of Hadlaw Cove.

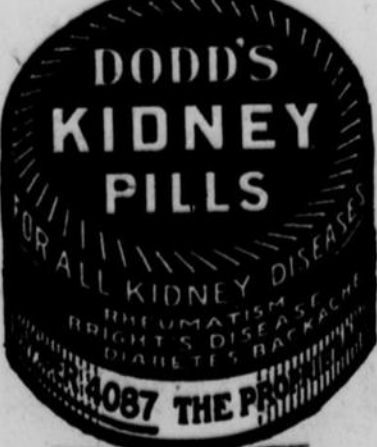

Electric Railway Works.

The Electric Railway has now completed the connection through St. John's Gate and is linking St. John Street within in a splendid manner. Only the best of road metal is being used and the indications are that the street will both look better and be better than ever before.

RUBBER-SEED OIL.

An oil similar to linseed oil is extracted from the seed of rubber trees and the residue used as fodder. A mill has been set up in Malaya and small consignments have been sold in Europe at good prices. Under present conditions on the rubber plantations, seed for this purpose is easily secured. — Scientific American.

TAKE DR. SYRUP PEPSIN CALDWELL'S LAXATIVE The family remedy

One would almost think that those who wish to keep Uncle Sam's territory dry would not have to go outside the three-mile limit to find sufficient work.

You can blind a man by throwing dust in his eyes, especially if it is gold dust. — Duluth Herald.
