Over 100 Men Have Signified Wish to Join Reserve Army

Recruiting Offices Opened at Huntingdon, Ormstown and Howick—Further Particulars Given on Requirements

A meeting of the various committees dealing with the formation, in the Chateaugay-Huntingdon district, of a Unit of the Canadian Reserve Army, was held Thursday evening, in the Howick High School.

At the meeting were the Committees from Huntingdon, Ormstown and Howick, Major Molson and Capt. Johnstone, of the Huntingdon Training Centre and Capt. G. A. W. Guthrie, representing M. D. No. 4.

The object of the meeting was to hear from Capt. Guthrie just what is involved in being a member of the Reserve Army and just who may join it.

Plan to Draft Married Men In Six Months

Build Strong Mobile Force For Defence Of Canada

Drafting of married men in the lower age-groups for service in the army for defence of Canada, is being planned by the Government immediately after the exhaustion of the man-power pool of single men from 18 to 45, it has been learned.

Purpose of calling out younger married men is two-fold:

(1) To build a strong mobile well-equipped force for the defence of Canada able to repel an attempted invasion on either the west or the east coast. (A home defence force of this type was strongly advocated in Parliament by members from Quebec and other provinces in the course of recent debates on the overseas recruitment issue.)

(2) To provide trained reinforcements of physical condition and endurance able to replace members of volunteer units overseas, in event of heavy battle casualties.

While at present, men married after July 15, 1940, are being marshalled into the service for the duration of the war, those married before that date are exempt from compulsory military service. This situation is regarded as an anomaly by men married within the past two years, who feel that it discriminates against them as compared to those who happened to get to the altar before the Government's 1940 deadline.

While no date has been fixed for the first call on married men as defined by the Government's 1940 legislation, it is expected some time early in 1943, depending on quotas and requirements of the Department of National Defence. No change is contemplated in the present Government policy whereby volunteers only serve in the Royal Canadian Air Force and the Royal Canadian Navy.

A recent proclamation issued by Hon. J. T. Thorson, Minister of National War Services, extended the ages of Canadians subject to compulsory military service from 21 years down to 20, and from 35 to 40.

At that time the Minister felt that while an important reserve might be found in the age-group from 20 to 21, only a moderate num-

ber of men physically fit for active service could be found in the group from 35 to 40. Numbers of the medically unfit increase rapidly after the 35-year mark, physicians discovered.

Two further age-groups remain to be tapped as the struggle for men and the possibility of increased contributions through the support of the trade union movement.

"We talked about the difficulties faced by a democratic party such as ours which seeks to finance itself from small contributions—25 or 50 cents—from individuals and which does not accept large gifts from corporations," said Mr. Brewin.

When employees receive their table of deductions indicating the amount the government expects them to collect from each employee, this deduction will not make allowance for any personal income the employee may be receiving. It will be the responsibility of each individual taxpayer to look after his taxes on personal income apart from the money he receives from his chief employer. The definition of employer will probably be governed by whether or not an individual receives 75 per cent or more of his income from the one employer.

Although the principle of a "table of deductions" to be available for each employer prior to September 1 still holds, detailed study is being given to the whole complex question of income tax deductions from the source.

Miss Kay Murphy Writes on Visit to Huntingdon

In the July issue of "Chateleine," an article relating to a visit to Huntingdon, Que., is to be found, written by Kay Murphy. Miss Murphy is a sister of Miss Nora Murphy, who is employed at the W. E. Lefebvre store, here. The article reads as follows:

"Home in Huntingdon, Que.—On a recent visit I discovered an army of about three thousand men about a mile away from our home. Most of the soldiers I have seen to date in New York were parading to bands, but these Canadian lads were just too darn busy for anything but marching target practice, eating and sleeping. If any of you people reading this have boys at Huntingdon, hurry for you! In this place of barely 1,700 inhabitants, these boys have earned the wholesome respect of everyone. Those that I saw look very healthy and they tell me they are well fed and well housed. Kindly, well-mannered lads, all the kids and the dogs in the neighborhood regard any one in khaki as a friend—and I think that is the highest compliment I can pay the boys!"

Thus Huntingdon is again given headline position in a magazine which has a very wide circulation.

C.C.F. to Hire Paid Quebec Organizer

French-speaking Full-time Worker to Wco Province

The C.C.F. laid plans for an intensive organization campaign in the Province of Quebec at a closed session of its 10th anniversary national convention at Toronto, recently, it was announced by P. A. Brewin, of the Ontario provincial executive committee, acting as spokesman for the meeting.

The closed session decided to employ a full-time French-speaking organizer to carry out the Quebec campaign, Mr. Brewin said, quoting one member as saying during the discussion that "the C.C.F. is the only party which can unite French and English speaking Canada on the basis of a constructive national policy."

Another decision was to employ the services of a national research worker, who would co-operate with the C.C.F. members of the House of Commons in studying post-war economic plans in other parts of the world.

"The party's budget will be 'increased threefold,' said Mr. Brewin, although he said that 'emphasis was again placed on the party's policy not to accept contributions from corporations or any one seeking to benefit from any such contributions.'

Other questions discussed included the future of the Co-operative Commonwealth Youth Movement, the manner in which farmers in Saskatchewan contributed freely out of meagre incomes to assist the party and the possibility of increased contributions through the support of the trade union movement.

"We talked about the difficulties faced by a democratic party such as ours which seeks to finance itself from small contributions—25 or 50 cents—from individuals and which does not accept large gifts from corporations," said Mr. Brewin.

When employees receive their table of deductions indicating the amount the government expects them to collect from each employee, this deduction will not make allowance for any personal income the employee may be receiving. The R.C.A.F. Recruit Passes a Test in One of These

To determine whether a Royal Canadian Air Force recruit is physically able to serve with an aircraft, he passes a test in this air-pressure chamber. The operators outside can increase the pressure inside the cylindrical chamber to reproduce conditions which occur at altitudes up to 15,000 feet or more. The recruit on the inside does not put on an oxygen mask until instructed to do so by telephone from the outside. After the pressure has been lowered and before he dons the mask the operator instructs him to try to write his name or pick up a glass of water. He finds he has lost control of these simple actions. Wearing the mask, he finds his faculties restored. The chamber shown above is at the medical investigation centre, Initial Training School, R.C.A.F., Toronto.

Prize-winners Are Announced At Huntingdon High School

Roberta McDermid Awarded Judge Brown Scholarship—Margery Cooper, Helen Cunningham, Lachlan VanVleet Rank 2nd, 3rd, 4th Respectively

Following up the report in last week's issue of the Gleaner, a more complete synopsis is now given regarding the High School Leaving examinations at the Huntingdon High School. Roberta McDermid, daughter of Mr. and Mrs. S. McDermid, of this town, class leader in previous years, headed Grade XII and was awarded the Judge Brown Scholarship. There were few failures in the graduation class this year, and many of the names that do not appear are of students who were only taking a partial course. The following are the prize-winners:

Class Leaders: 1. Roberta McDermid (Judge Brown Scholarship); 2. Margery Cooper; 3. Helen Cunningham; 4. Lachlan Van Vleet.

Class II: (Alphabetical Order)—65-79%: Margery Cooper, Helen Cunningham, Terrill Manning, Roberta McDermid, Anne Tully, Lachlan Van Vleet.

Class III: Ruth Blatchford, Margaret Brown, Joseph Carr, Gwen Fawcett, Lorraine Patterson, Betty Van Vleet, Jessie Tannahill.

The following students may, after passing one examination, receive their High School Leaving Certificate: Una Fennel, Hazel Irving, Mildred Seward.

Mark of the students in individual subjects are to be found in the Office of the Secretary, Mr. W. K. Phillips. Printed statements of these accompany the Official Certificates.

Scarcity of Metals Bars Illumination of Bandstand

Several Building Permits Granted at Town Council Meeting

At the regular monthly meeting of the Huntingdon Town Council on Monday evening a number of bills were presented and ordered paid, with the exception of those from A. Elliott and F. S. Stroud. A building permit was given to Mr. W. E. Lefebvre to build a house on Chalmers street; a permit, however, was refused to George Thurston, who proposed to build a dwelling off Lake street. Father Pigeon applied for a permit to begin work on the new parochial hall to be built opposite St. Joseph's Church on York street. Mr. A. L. Sellar also asked permission to renovate his newly acquired property on the corner of Bouchette and Hunter streets. Permissions were granted in the two latter cases.

H. Boucher came before the board and complained that people were trespassing on his property when they took refuse to the Town dump. He stated that the Town needed more land, which he was willing to sell. A number of the Aldermen replied that the dump was of sufficient size to serve its purpose as long as the Town needed a dump.

During the time that the speaking was addressing the people, the calves which were to be offered in aid of the British Relief Fund, were being paraded for the buyers to see. Premier Adelard Gobout was present at the sale and made the opening remarks regarding the calves which were being offered. All these calves, six in number, were donated by different prominent breeders for sale in aid of the above relief fund. The Premier explained that the proceeds raised from the sale of these calves would be sent to Queen Elizabeth, to aid the British War Relief Fund. He said it was little enough to do when it was considered all the suffering which the people of Britain were being called upon to bear. He urged those to bid as high as they possibly could, not because of the quality of the calves being offered, but more especially because of the cause the money was for. The calves were of the very best and would add much to the herd of the party who purchased them.

Mr. Douglas Ness then addressed the gathering and gave a few words of welcome to all present. He explained many of the merits of the stock which was for sale and explained that they had gone to much trouble to bring in the finest of the Ayrshire breed for the purpose of this sale. He urged those present to buy now while they had the opportunity, as the time was coming when such animals as those offered would not be able to be bought anywhere. He (Continued on Page 4)

Currency Being Used For Anti-British Slogans

Gananoque, Ont.—It may be only some French-Canadian idea of a funny joke, but a dollar bill which turned up in Gananoque with two slogans, printed in red and blue ink, are anything but funny.

Under the King's picture on the front of the bill appears the legend, "Bas le Roi d'Angleterre." "Down with the King of England" (or the English).

Not satisfied with that one, on the reverse side, written in blue ink, appears along the bottom margin, "Bas le Roi d'Angleterre." "Down with the King of England" (or the English).

The bill is being turned over to the proper authorities.

Warns Labour Of Inflation

Little Forecasts Further Manpower Restrictions

Warning that the manpower situation was "critical and tight" and that further restrictive measures were looming came from Elliott M. Little, Director of National Selective Service, at a meeting of Labour organizations at Ottawa, during the week-end. "We intend to hold meetings to tell you how we shall have to inconvenience you individually," Mr. Little said. "We shall do our best to minimize those measures but we make no promises. There will be more and more restrictive measures as time goes on."

Mr. Little declared that the British Empire and Canada now were facing the most critical year in their history. He emphasized that compulsory savings provided in the budget was not meant to replace the voluntary savings of individual Canadians. These had to go on ever-increasingly if Canada was to approach the policy of "pay-as-you-go" it had adopted.

It was far more important when the long view was taken to tax heavily now and avoid the spiral of inflation, Mr. Little said.

"We are fighting the battle of the small people by imposing heavy taxes because the only alternative is the chaos of inflation," he said.

Policy of the Government was to keep conditions stable now and strive to keep an employment after the war. Mr. Little believed this policy to be in the best interests of labour and all other classes.

"Money is not money unless it's hard to get," Labor Minister Mitchell said, and added that price control and wage stabilization put into effect by the Dominion Government were working "almost on six cylinders."

Mr. Mitchell expressed himself as "fearful of the present situation and wondered if perhaps the democracies were 'living in the twilight of civilization.' Canada had only 12,000,000 on a continent blessed with more of the world's goods than any other."

"If you've got something other fellow wants and you're not prepared to defend it," he proclaimed, "you're on the way out." He felt that out of the present conflict would come great social forces that would help everybody, and expressed belief that by the time organization of Canada was finished the abolition of want would have been obtained.

Dr. W. C. Clark, Deputy Minister of Finance, defined the meaning of inflation, remarking that Germans could not be killed by Canadian dollar bills but by the tanks, shells, planes and ships built with the dollars thrown into the war effort by individual Canadians.

"This generation must bear the cost of war," he said. "Future generations will suffer to some extent but we must bear the real brunt now."

It is one of those anomalies that we regard as though a policy which today appears tough but which, in years to come, will prove infinitely kinder to the people of the country and particularly with small incomes.

SWASTIKA FOR TRAITORS
London.—An appeal to the people of Brussels to indicate traitors by marking a swastika sign on their doors has been made by the secret Brussels federation of Socialist "Young Guard."

Former special advisor to Prime Minister King, Leonard W. Brockington, noted Canadian Lawyer now with the British Ministry of Information, is shown in the above Canadian Army overseas photo with Lt.-Col. A. G. L. McNaughton, General Officer Commanding-in-Chief of the First Canadian Army, centre, and S. M. Bruce, High Commissioner for Australia, on right. The photo was taken at Canadian Military Headquarters in Great Britain.

Sunday's Storm Did Much Damage in Chateaugay Area

Farmers of Huntingdon Vicinity Welcome Badly Needed Moisture During the Past Week

The storms during the past week have brought much relief to pastures and gardens and have been welcome to farmers in the district. Although the rains have held up harvesting operations somewhat, the farmers have been pleased to have this moisture for the parched pasture land. Many farmers during the past few weeks have had to buy feed for their cattle on account of the pastures drying out. Gardeners, too, have welcomed the rains for their vegetables, flowers and lawns, which were suffering much on account of the dry weather.

The storm on Sunday night was probably one of the most severe in the past few weeks. A very high wind accompanied by a rain which was almost a cloudburst, together with a severe electrical display, was almost terrifying. The wind drove the rain against buildings with great force, while rain drenched everything within a very few minutes, the storm lasted for about one hour.

Apparently the storm broke with most fury over Chateaugay, at the mouth of the Chateaugay River, uprooting trees and breaking off large branches of others, blowing debris over the high tension wires. Electric light services were interrupted momentarily by short circuits. Apple orchards, gardens and big trees suffered most in this area. The storm which had been threatening for a short time throughout the entire vicinity of Chateaugay Valley have suffered as a consequence. As far as we can ascertain at time of writing, no particular damage has been reported in the immediate Huntingdon area. The one great benefit in the Huntingdon area is the amount of moisture that has been obtained at a time when it was badly needed.

Tea and Coffee Now on Ration List, 1 oz. Tea; 4 ozs. Coffee

Lettered Coupons on Sugar Ration Card to be Used For Time Being

The ever-tightening pinch of war brought further restrictions to Canadian eating habits with announcement by the Wartime Prices and Trade Board that tea and coffee is coupon-rationed as from Monday of this week.

The order, limiting consumption for each person to one ounce of tea or four ounces of coffee a week, but not both, follows by a month the coupon rationing of sugar on a basis of one-half pound per person per week. Gasoline has been rationed for several months, with the unit varying across the country.

Canadians now get the same amount of sugar but less tea than the people of Britain, where the weekly ration basis per person is two ounces of tea and eight ounces of sugar, against one ounce and eight ounces, respectively, in Canada. Coffee is not rationed for Britons, who are light coffee-drinkers.

The board estimated the ration allotment of tea or coffee for each person would make about 12½ cups a week, but the quantities used by each individual would vary that figure somewhat.

For the next five weeks the ration coupons to be used are the "A-B-C-D-E" coupons on the top of the temporary ration card issued July 1 when coupon rationing of the sugar went into effect. The sugar ration tickets, numbered 1 to 5, are at the bottom of the card.

After September 8, the Board said, there will be permanent coupon ration books.

"The tea and coffee rations are one ounce of tea per person per week or four ounces of coffee per person per week," said a Board statement announcing the extension of coupon rationing to the two beverages.

"Each one of the lettered coupons entitles the ration card holder to one ounce of tea or four ounces of coffee a week but not both."

No Ration For Children
"All five ration coupons may be used immediately."

"Ration cards issued for children under 12 cannot be used for tea and coffee purchases."

The maximum quantity of tea which can be purchased on one ration card up to September 8 is five ounces, or 5-16ths of a pound. Even three ration cards in a family will not permit the purchase of a one-pound package. Twenty ounces of coffee may be purchased on one card—a pound and a quarter.

"The rationing plan is designed to ensure all tea and coffee drinkers getting a fair share and, at the same time, to guard against any failure of supply during the next few months, when it is expected further supplies will be obtained from abroad."

"The limited supplies of tea on hand and restricted prospects of new shipments result from the fact that pre-war Harbor sources of supply in the Netherlands East Indies and Malaya are cut off by enemy occupation, while Ceylon and India, the major sources of supply, are in a theatre of war more than 6,000 hazardous miles from Canada."

Also, there is the fact that the supply problem in the case of tea is more acute than with coffee, which may be obtained from South America over a shorter, but just as hazardous, route."

The alternative would have been to continue at the present rate of supplies, especially of tea, running short," the statement said.

In pre-war days, Canada imported approximately 42,000,000 pounds of tea a year. Ships made the trip from the Orient in an average of six weeks. Now such a voyage takes three to four months. If the

The sun though it passes through dirty places, yet remains as pure as before.

The New World Order

MUCH is heard these days of a new world order. Hitler said that he was going to see that a new world order came into effect: our own government officials have told us that such a thing is to come about; it is preached to us from the pulpits; we read it in magazines, newspapers, etc.; the man on the street talks about a new world order. In every part of the House of Commons speeches are made on what should be done to improve things after the war is won. Post-war plans have been made already, which are to form part of the new world order.

What is a new world order? What will it mean to the common people? What changes will it make to the everyday mode of living? Will it for ever end war, as a method of settling differences between nations? These are some of the things we would like to know. Further, can we have a new world order, or even plan one, until we have won the war?

If we listen to the preacher in the pulpit, we shall have a new world order when we attend church in greater numbers and become more steadfast in our beliefs. If we listen to the speeches made in the Parliaments of the country, we shall have a new world order after the war, as a result of the sacrifices now being made. Newspapers and magazines merely expound what has been said and few make comment which really gives any idea of what a new world order should be. Comparisons are made between Hitler's new world order and that planned for the United Nations, but so far we have not been able to find anything that is definitely based as a foundation for a new world order. The man on the street says that something will have to be done to make a change in the affairs of the world and the general livelihood of the people, but that is as far as he goes.

The only way to really get started on a new world order is to find out what is actually needed to found a new world order. If a man builds a house he usually takes great pains to see that the foundation is properly made to carry the house after he has built it. With that completed, he begins to add the ground floor, first floor and so on until the house is finished. The same thing applies to a new world order. We must get the foundation, or the root of the trouble, once that is found we can start to reconstruct. No one as far as we know, has ever found out what a new world order should constitute, what is required, or how we should go about acquiring it. Haphazard plans are not going to get us anywhere, we must have something concrete.

With changes taking place so rapidly in this war, is it possible to make plans for something to take place in a future we cannot at the moment visualize? Might not many things happen that would warp plans made now, so badly, that they would be useless? There is no doubt that many changes will creep into our mode of living after the war, but these will not be as a result of planning, they will come about as a matter of fact, because we have become accustomed to them. No doubt airplane travel will become more common and probably replace ships for speedier communication between countries; many of the substitutes now being used as war emergencies, will remain with us, and so on.

People are doing things and taking them now, because they feel it is their duty in order to win the war. But will they be willing to have their lives interfered with so that a new world order may come into effect? They will say, we got along all right before, the war is over now, what do we want to be changing around for now? It is quite certain that after this war there should be a greater understanding of peoples and between peoples of all nations. There should be a greater freedom of trade between nations, as the loss of many of our commodities has shown. A more social status will no doubt result after the war, more provision will be made to look after the people of the nation as to health, accommodation, recreation, living conditions and so forth. Business and working conditions should be more evenly divided. A person's ability should be considered before his political or religious following, so that the person who has the ability will be filling the right position. This much has been proven through the scientific tests made in the armed forces today. With the right persons in the right jobs the work of the nation will go on more easily. For some time to come the reconstruction work in the old world will take priority, immediately after the war, so that plans there will be slower in formulating.

The new world will probably begin a new world order much sooner than the old world, we on this side are more easily persuaded into doing things and trying them out, we do not think so much of tradition, we are always looking for something new. We pride ourselves of being in advance of the old world in many ways, we are always looking to advancement for betterment.

If a new world order is to come about then we hope that it will be based on a solid foundation and founded for the good of all and not for the few.

Ships vs Airplanes

PROBABLY the gravest situation in the present war as far as the United Nations are concerned, is the loss of ships. As far as is known 400 ships have been lost in the Western Atlantic since the United States entered the war, the largest number of these was in June, when 104 ships were sunk according to reports. In May, 102 were sunk, these two months were the highest, only 24 are reported for July so far. The report of these losses will give some idea of the gravity of the situation, then to these must be added the ships that have been lost elsewhere. All manner of means have been taken to cut down the amount of space to be used for shipments to the war zone, without cutting down the actual amount of the goods sent. Dried eggs, dried milk, dried vegetables, and lately clippings of newspapers instead of whole newspapers, are being sent to England in order to conserve on space. Everything possible is being tried to overcome this ever present danger to the supply line. Ships are being sunk much faster than they can be built, and added to this, is the growing scarcity of the metal to build ships with. So acute has become the scarcity of the metals, that many shipyards in the United States are now idle, and 10,000 men have been thrown out of employment as a result. The steel now available in the U.S. is only sufficient to keep the established shipyards busy and new yards can not be accommodated.

Such being the case, a proposal has been put forward to employ the facilities of these great shipyards, and the men, in producing the large type of airplanes known as "Box-Cars." These planes, it is said can be built much faster than ships and have a capacity for carrying 100 fully equipped soldiers. 5,000 such planes could land an army of half a million men in England overnight. They could supply that army with 70,000 tons of food and equipment on the next trip. With such a fleet it would be possible to put down a vast army anywhere in the world within a week. It is thought that in less than a year the shipyards could be turning out 5,000 planes a year. No submarine could reach these ships of the air and they can travel at a rate of 300 miles per hour instead of the 7 miles per hour of the sea-going ship.

There is a book published entitled "Victory Through Air Power" which purports to show the advantages of airplanes in winning the war. If such a fleet as outlined above could become a possibility, then it would seem that it was the logical thing to do in order to beat the Nazi U-boat, and bring victory more within reach. In this war speed counts most of all. Anything which speeds up supplies and getting troops from one place to another, is vital.

The aircraft industry in the States is giving the idea of the big planes, respectful attention, and the War Production Board also has it under consideration. Numbers of big bombers are flying across the Atlantic regularly, so there is no reason why such a fleet could not be put into action to carry the supplies which are so vital to victory.

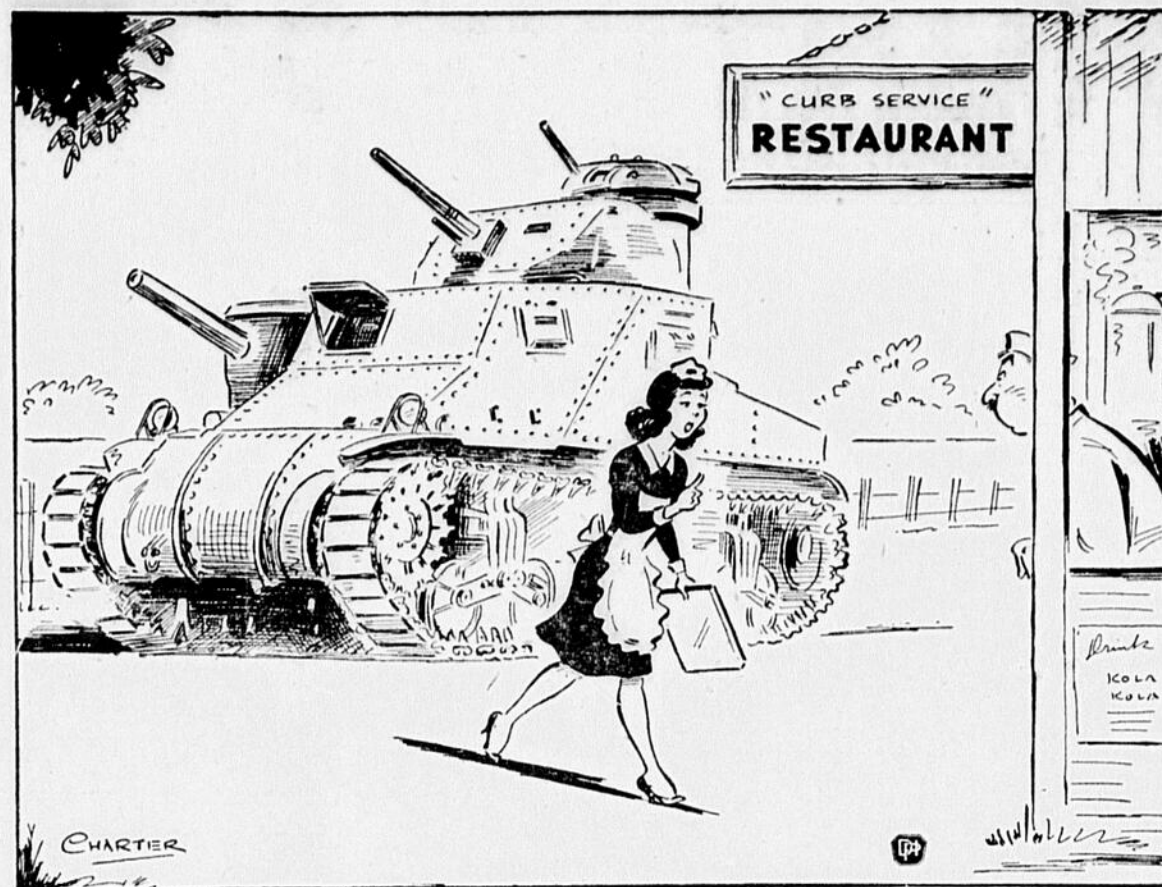

Canada could also take this to heart and see if something could be done along these lines. If such a fleet were possible, it would mean that the Battle of the Atlantic had been won.

The Ayrshire Sale

THE sale at Burnside Farm, Howick, on Saturday, was a very successful one and the outstanding part of it was the sale of the calves in aid of the British War Relief Fund. Seven calves were donated for this purpose by different members of the Ayrshire Breeders' Association and a total of \$735.00 was realized for the fund. Premier Godbout of Quebec, was present, and made the opening remarks with respect to offering these calves for sale. One of the calves offered was donated by the Premier. A similar offering was made at an Ontario sale and in this case nine calves were offered and realized the sum of \$855.00. Taking the fact that there were only seven calves offered at this sale, the sum realized was very good indeed and compared well with the Ontario sale. There were a splendid quality of animals offered and R. R. Ness & Sons are to be congratulated on the way the sale was conducted and the splendid gesture of offering the calves in aid of British relief, at their sale. No expenses of any kind will be deducted from the amount received for these calves, the entire proceeds being handed over to the Fund.

Tea and Coffee

ANNOUNCEMENT was made over the week-end that rationing of tea and coffee would commence on Monday, and as a consequence, such rationing is now in force. The amount of the ration in the case of tea is very small, being only one ounce per person per week; none will be allowed to children under twelve years of age; in the case of coffee, four ounces per week will be allowed under the same provisions. You will not be allowed to have both tea and coffee, but can have either one or the other, according to preference. The reason more coffee is allowed, is because it takes more coffee to make a cup of beverage than it does tea. However, this ration is very stringent and has come rather suddenly, even though we were more or less expecting it. It is just another one of those sacrifices we have to make to win the war. Shipping losses are so high that all possible space must be saved, further, these commodities have to be brought great distances through submarine infested waters which endanger the lives of our seamen as well as the loss of the ships. It may mean a big sacrifice on the part of the people who particularly favour the beverages made from these products, but we feel that it will be cheerfully accepted. We have not been too hard hit in the way of rationing up to the present, but it is evident that the time is coming when we are going to know more and more that a war is on.

 and HUNTINGDON
 COUNTIES

From Manuscripts of
 The Late ROBERT SELLAR

JAMES SADLER—I was born in Roscommon, and was 6 years old when the Rebellion took place. My father had a place rented in Leitrim and after the battle of Vinegar Hill, rode over to see it. He took me behind him. When we came to the camp, we found it all strewn with beef bones and litter of the war. My father had his land off Col. Deniston (or Stennison) who had 7 estates. There were six brothers of us and we were all brought up to be blacksmiths. My mother dying young, the family scattered. One brother went to Van Diemen's land. He was a moulder as was a blacksmith. My brother Thomas came out to Canada in 1815, I think, and worked at Lachine for several years, when he moved up the Chateauguay and bought the lot he was on and this one from Bill Nolan. In 1825, I sailed with my father. He was a moulder as was a blacksmith. My brother Thomas came out to Canada in 1815, I think, and worked at Lachine for several years, when he moved up the Chateauguay and bought the lot he was on and this one from Bill Nolan. In 1825, I sailed with my father. He was a moulder as was a blacksmith. My brother Thomas came out to Canada in 1815, I think, and worked at Lachine for several years, when he moved up the Chateauguay and bought the lot he was on and this one from Bill Nolan. In 1825, I sailed with my father. He was a moulder as was a blacksmith. TASTY DISHES FOR THE OFF-SEASON APPETITE

Lemons, A Fatigue Banisher

Few fail to feel fatigue on hot, humid days. Scientists claim we lose Vitamin C through perspiration—and there you have the answer to "that tired feeling."

Vitamin C is a daily requirement. The more we perspire, the more we need. So remember your lemons when old Sol is doing his worst. A frosty glass of lemonade is rich in Vitamin C and it may be enjoyed at lunch, dinner or between meals.

Do you like variety? Try a combination of apple and lemon juice. Or add two tablespoons of lemon juice to a cup of grape juice. Or add lemon juice to your morning glass of orange juice.

A lemon shake is a nourishing drink. For each glass use the juice and grated peel of one-half lemon. Add two tablespoons sugar syrup, one-half cup water and one egg, well-beaten. Mix thoroughly in a shaker. Pour into glass. You'll enjoy it.

And lemons may be used to give added zest to many a meat dish. Here's a recipe for those who crave "something different":

Stewed Veal With Lemon

1-4 cup butter or other shortening
2 lbs. boneless veal
1 onion
Salt
1 tsp. flour
1-2 lemon

Melt shortening with chopped onion, add veal and brown meat, turning

often to prevent burning. Remove, add flour to butter, stir, add a little cold water, more hot water and put meat cut into pieces back into this gravy. Cover and let stew until tender—1½ hours. Before serving, add juice of ½ lemon to gravy.

Use Eggs In Salads

In warm weather many people have a tendency to eliminate the morning breakfast egg. So why not balance this by enjoying an occasional healthful egg salad for lunch or dinner?

Here are some egg salad suggestions for your approval:

Salad Eggs

6 hard-cooked eggs
1 tsp. butter
1 tsp. cream
1 tsp. mustard
Pinch cayenne
1 tsp. salt
1 tsp. anchovy paste
Lettuce or cress
Garnish of radishes and small onions.

Remove the shells from the cold, hard-cooked eggs and cut a large piece from the top of each. Take out the yolks and mix them to form a paste with butter, cream, mustard, cayenne, salt and anchovy paste. Put this mixture back into the hollows and lay the eggs on a dish of lettuce or cress. Garnish with radishes and small onions.

Daisy Salad

6 hard-cooked eggs
12 lettuce leaves
½ cup mayonnaise

Cut the whites of eggs into rings and mix the yolks with the mayonnaise. On a platter arrange lettuce leaves to form cups. On these cups arrange the egg rings to simulate daisy petals and heap the yolks in the center. Cold string beans, boiled whole, may be used to simulate foliage if desired.

Egg and Peanut Salad with Celery

6 hard-cooked eggs
¼ to ½ cup chopped peanuts or peanut butter
Mayonnaise
Celery curls
Garnish of peanut halves

Cut the eggs in half lengthwise, remove the yolks and combine with chopped peanuts or peanut butter and mayonnaise to moisten. Fill the whites with this mixture. Put two halves of egg on a plate, surround with curls of celery. Put two tablespoons of mayonnaise dressing over each egg and garnish with peanut halves. Lay a halved peanut on each celery curl.

CHILLED FRUIT DESSERT

Magic Blackberry Refrigerator Cake

1-1/3 (15 oz. can) sweetened condensed milk
¼ cup lemon juice
¼ tsp. lemon extract
2 cups fresh blackberries
2 egg whites, stiffly-beaten
24 vanilla wafers.

Blend together sweetened condensed milk, lemon juice and lemon extract. Stir until mixture thickens. Add blackberries. Beat egg whites until stiff and fold into mixture. Line narrow oblong pan with wax paper; cover with filling. Add layer of vanilla wafers, alternating in this way until filling is used; finishing with layer of wafers. Chill in refrigerator 12 hours or longer. To serve, turn out on small platter and carefully remove wax paper. Cut in slices and serve plain or with whipped cream. Serves 8. For blueberry refrigerator cake, use 2 cups blueberries in place of blackberries.

Visits Canadians

Paying tribute to Canada whose people are waging war on the home front as well as overseas, Her Majesty the Queen wears an R.C.A.F. pin and a sparkling maple leaf as she visits Canadian fliers in Britain. She celebrated her 42nd birthday on Tuesday.

Rockburn

Miss C. Parker of Montreal is vacationing with Miss F. Johnston at this point.

Mr. Carl Bockus of Petawawa spent the week-end with Mr. Merrill Rosevear and Mr. Abe Rosevear.

Miss Eleanor Sloan was guest over Sunday of Mrs. W. H. Middlemiss, in Huntingdon.

Mrs. Ernest Rosevear is a patient in the Barrie Memorial Hospital Ormstown.

"Canada's Kitchen" Tests Recipes ...

Good preserves, jams and jellies can be made under the sugar ration. This has been proved in "Canada's Kitchen" which operates in Ottawa, under the direction of Miss Laura Pepper, chief of the Consumer Section, Department of Agriculture. For weeks past, Miss Pepper's staff has been testing fruit recipes and the results have proved very satisfactory. Above are shown Miss Pepper (centre) and Miss Eveline LeBlanc, home economist, tasting the jams and jellies and making notes on their quality. These tested recipes can be obtained by writing to the Publicity and Extensions Divisions, Department of Agriculture, for its bulletin "War-time Jams and Jellies."

DAHLIA'S WHATNOTS

War's Impact on British Education

The Editor of the London Times Educational Supplement is Mr. H. C. Dent. Last month an article from his pen, raising the question of the children's "running wild," appeared in "Bulletins From Britain." All material published in these bulletins is selected by "The British Library of Information," an agency of the British government operating in New York.

Mr. Dent tells us in part: Friday, September 1939, was to have marked an advance in British education; for on that date a new Education Act was to have come into operation, raising the age for compulsory school attendance from fourteen to fifteen. But on that fateful day began the greatest educational retreat Britain has ever known. The day before the country had been told that the evacuation of school children was to start on the morrow.

The transport arrangements were exemplary. As the parties arrived they were swiftly loaded on to waiting trains and borne away to unknown destinations. At one London junction the rate was 8,000 persons an hour. Leeds evacuated 40,000 in seven hours. By Saturday evening nearly half a million had left London. It was all done without hitch or mishap. If we in Canada had to do it, could we do it as well? That very afternoon, Friday, telegrams and school notice boards were announcing the safe arrival of parties of children, often accompanied by mothers.

But now, Mr. Dent goes on to tell us what will cause some of us to say: "There! That's the Englishman for you, every time! Always looking for trouble, kicking and groaning." But still further on, Mr. Dent tells us what must draw from all the admission: "Only give the Englishman a fighting chance and he'll show how grandly gritty he can be."

It will also be noticed that city mothers rebelled against the lack of modern improvements, while country women were dismayed at the absence of sanitary habits in children from the slums.

City-bred mothers found village life dull, cold, and exhausting. City-fled children disliked country diet. Lonely city parents longed for their children and too often brought them back.

The country foster-parents, like ourselves, required adult education and the slum evacuees gave them a lesson. They were horrified when some of their young charges ate with their fingers, scorned washing, never used the bathroom, and were mystified by sheets and pyjamas. The horror was intensified when some of the children were found to have lice or skin disease. The vast majority were as clean, decent, and well-mannered as their hosts, but a lid had been lifted to reveal the worst social conditions in the land. Mr. Dent remarks, "The shock to the middle-class British mind was severe but salutary; and the lesson has not gone unlearned."

Large city schools could not always be billeted as units in rural areas. Some were spread over as much as fifty to a hundred miles; others in a dozen different villages. Small wonder it was if city teachers, already taken aback by obsolete and meagrely-equipped school buildings which they found in many rural districts, were almost in despair.

The most unsettling factor was that the anticipated air-raids did not materialize. The children began to drift home, and soon the situation in the evacuable areas became alarming. Large numbers of school children had never left, 51 per

cent in London, more than 33 per cent in Manchester, and so on. All schools were closed and the authorities hesitated to reopen them, lest it should encourage return. Soon there were complaints that the children were "running wild," and some provision for schooling was demanded. Questions were asked in Parliament. This is frequently done in the Mother of Parliaments, but with us it is thought to be in questionable taste.

On Nov. 1, 1939, it was announced that whenever possible schools in evacuation areas should be re-opened for children remaining there, whose parents wished them to attend. It was not the least complicated of the many situations which the British have faced in these war years with admirable courage and determination. Difficulties were many, progress slow, but in Feb. 1, 1940, the President of the Board of Education announced that compulsory attendance at school was to be enforced, on a half-time basis at least, as soon as accommodation was available and not later than April 1st.

Mr. Dent says that the date of that announcement was the low-water mark in British education during the war. From that time on, in spite of the fall of France, the battle of Britain, and the devastating air-raids of 1940-41—all of which caused further large-scale evacuations—education has steadily improved. Moreover, it has expanded in important directions.

Flies Are Serious Menace to Health

Flies, especially the common house fly, are a menace to health, particularly during the summer and autumn. The part the house fly plays in spreading dangerous diseases such as infantile diarrhoea, typhoid, and tuberculosis is fairly well known. Flies have long been suspected as possible carriers of infantile paralysis (poliomyelitis), say officials of the Division of Entomology, Dominion Department of Agriculture.

In the summer of 1941, scientists working in Connecticut and Alabama demonstrated the presence of the virus of poliomyelitis in mixed collections of blow flies, house flies, and certain other species of flies taken in two localities where cases of infantile paralysis had occurred. This fact adds emphasis to the importance of fly control. Flies breed in garbage, manure, and other animal matter, and thus can be most effectively controlled by properly treating and disposing of such materials.

Measures should be taken to exclude flies from dwellings, and to protect foodstuffs from those that may gain entrance. The flies should be destroyed promptly. Leaflets containing further details on fly control may be obtained by writing to Publicity and Extension Division, Dominion Department of Agriculture, Ottawa.

FLIES CAUSE INFANTILE PARALYSIS

Investigations by medical scientists indicate that fly-infected foods are one of the principal causes of Infantile Paralysis (Poliomyelitis). Every fly allowed to live is a potential menace to human health.

ELEPHANT QUIZ

(Oneta B. Christian)

Do you know that a full-grown elephant's meals for one day often consist of one hundred and fifty pounds of hay, thirty-five heads of lettuce, fifty pounds of corn-stalks or green vegetables, and fifteen loaves of bread? However, carrots and bran are their favorite foods. They have to learn to like peanuts!

Do you know that elephants in captivity often have minor foot operations? Shuffling around in small quarters tends to make the elastic substance on the soles of their feet wear off unevenly. To ease the pain that this condition causes, an animal surgeon cuts away the excess substance.

Do you know that an elephant's tusks are really his incisor teeth which continue to grow throughout the elephant's lifetime? The largest tusks of which there is any record are eleven feet, five and one-half inches long and weigh two hundred and ninety-two pounds.

Do you know that elephants in captivity retain much of their jungle instinct? For example, a herd of elephants will not go to

Supreme in Quality "SALADA" TEA

Two Ways to Test Juices For Pectin

There are two common ways to test fruit juices for pectin content. To one teaspoon of cooked juice, add one teaspoon wood or ethyl alcohol and stir slowly. If the juice is rich in pectin it will form a large amount of gelatinous material. If juice is moderately rich in pectin a few pieces of gelatinous material will form. But if the juice is poor in pectin very small pieces of sediment will be formed.

Another test may be made by mixing two teaspoons sugar, one tablespoon Epsom salts and two tablespoons cooked fruit juice. Stir well and let stand for 20 minutes. If mixture forms into a semi-solid mass the juice contains sufficient pectin.

Do you know that elephants sleep all at one time? They prefer to sleep in shifts. Also, elephants who are housed in tents often become so frightened during rain or thunder storms that they are led out into the open where they seem to enjoy themselves.

Do you know that elephants possess a very keen sense of smell? It is believed that they can detect the presence of a human being several miles away if the wind is blowing from the right direction.

Do you know that the famous elephant "Jumbo" was bought in England and brought to this country at a cost of \$15,000 and his owner cleared in one day the whole purchase price?

SCOTLAND HOUSES GIANT BOMB DUMP

Somewhere in Scotland—Stored in a secret maintenance depot in Scotland—one of many scattered throughout Britain—are thousands of tons of bombs of all descriptions. Manned by Royal Air Force personnel, the vast ammunition dump is so cleverly concealed it cannot be seen even from low-flying aircraft. Under that protection, skilled craftsmen piece bomb parts together for shipment to air stations.

Twenty per cent of all school children have faulty eyesight. Forty per cent of college students have defective vision. Ninety-five per cent of men and women over sixty have imperfect eyesight.

There is little that can be done for the twenty per cent who begin with poor sight, but twenty per cent from ninety-five per cent leaves seventy-five per cent whose defective vision is acquired largely by overstrain through inadequate lighting.

Better light means better sight. Have an adequate number of lamps to chase away the annoying shadows—arrange them for easy reading and proper diffusion. Avoid glare.

EFFECTIVE NOW TEA AND COFFEE are rationed by coupon

The ration is one ounce of tea or four ounces of coffee per person, per week

Coupons A, B, C, D, and E, on the Temporary War Ration Card, now in the hands of the public, are to be used, and are NOW valid for the purchase of tea and coffee.

Each coupon will entitle the purchaser to one ounce of tea or four ounces of coffee - a supply for one week.

If desired, purchasers may use any or all of these five coupons simultaneously, and buy up to 5 weeks supply at one time, on the surrender of the appropriate number of coupons.

Numbered coupons are good only for the purchase of sugar and may not be used to buy tea or coffee. Similarly, lettered coupons may not be used to buy sugar.

COFFEE CONCENTRATES AND SUBSTITUTES CONTAINING COFFEE

One coupon must be surrendered for each quantity of coffee concentrate or substitute containing coffee, sufficient to make 12 cups of beverage.

TEA BAGS REQUIRE COUPONS

When purchasing tea bags, the following coupon values shall be used:
2 coupons for a carton of 18 or 20 tea bags
4 coupons for a carton of 40 or 45 tea bags
8 coupons for a carton of 80 tea bags

CHILDREN UNDER 12 YEARS OF AGE ARE NOT ELIGIBLE TO RECEIVE ANY RATION OF TEA OR COFFEE.

SPECIAL NOTICE TO RETAILERS

On and after August 3rd, retailers must establish their right to purchase new supplies of tea or coffee from their suppliers by turning over to the supplier currently valid ration coupons, equivalent to the poundage of tea or coffee ordered from the supplier

Ottawa, August 3rd, 1942

HUNTINGDON LOCALS

Mr. Ward Anderson, of Montreal, spent the week-end at the home of Mr. and Mrs. R. E. McWhinnie, Prince street, Pte. Arthur Garay, of Victoria, B.C., is a guest at the same home. Cpl. Merle McWhinnie, of Chateaugay Barracks, is spending a two weeks' furlough with friends at Cambeltown, N.B.

Starting on Thursday evening of this week there will be a show at O'Connor Theatre on Thursday evenings as well as the other evenings of the week. The Saturday matinee will start at 2 o'clock instead of 2:30. These changes will necessitate four changes of shows a week instead of three.

Mr. and Mrs. George Bryson and sons, Russell, Lloyd and Murray, of St. Andrew's East, were week-end visitors of her father, Mr. D. G. Macfarlane, and also called on her aunts, the Misses Macfarlane.

Sergeant H. K. Damant, R.C.A.F., left on Friday for Victoria, after spending a three weeks' furlough with his wife and baby daughter, Sharon, at the home of Mr. and Mrs. J. W. McGill.

Mr. and Mrs. S. McDermid recently received a letter from their son, LAC Alan McDermid, saying that he had been transferred from Mont Joli, Que., to an Air Force station at Summerside, P.E.I.

Mrs. Gladys Kelley DuPuy and son, George, of Lufkin, Texas, are spending the month of August at their summer home at St. Anicet. Miss Bernice Young, of Malone, N.Y., is a guest at this home.

Mr. and Mrs. L. D. Granton, of N.D.G., and Mr. and Mrs. J. C. Boyd, of Chateaugay Basin, spent the week-end with Mr. and Mrs. Jas. Ferns.

Mrs. Elmer McCracken and daughters, of Toronto, are visiting at the home of her parents, Mr. and Mrs. Thos. Hooker.

Dr. E. C. McCoy, of Vancouver, is spending his vacation at the home of his mother, Mrs. E. C. McCoy.

Mrs. James Flint and daughter, Lois, of Montreal, were week-end visitors of her father, Mr. A. Salter, at the home of Mr. and Mrs. D. Booth.

Mrs. Harry Yale, of Montreal, is spending a two weeks' vacation at the home of Mr. and Mrs. D. Booth, Baseball.

Ormsdown

Miss Grace Campbell, of Montreal, is spending a few days with Mr. and Mrs. T. S. Osmond.

Dr. and Mrs. Stalker and Marian have returned home after holidaying the past month at Fraser's Point.

Ten of our lady bowlers journeyed to Valleyfield on Thursday last to take part in a friendly game. As the day was ideal, the ladies enjoyed their drive over and the refreshments served by the hostesses. They were successful in bringing home one prize for highest score and two consolations.

Mr. and Mrs. Ivan Barrington and family, also Mr. and Mrs. Wm. Greig and little Billy have returned from the summer cottage which they occupied during the month of July.

Mr. and Mrs. Bacon and Miss Dorothy Devine, were week-end visitors of Mr. and Mrs. Wm. Mann. Mr. and Mrs. R. J. Williams, of Port Colborne, are visiting Mr. and Mrs. A. W. Derby for a few days.

Dr. and Mrs. Quinton and family left Saturday for a month's vacation which they will spend at Fraser's Point.

Miss Mae LeMarquand and Miss Alice Perth are spending a holiday at the Bradley House.

Mrs. David Greig has returned home from Moncton, N.B., where she spent the past month visiting her son-in-law and daughter, Mr. and Mrs. Ross Bryson and Iona.

Mr. and Mrs. H. C. Howard, of Montreal, and Mr. Frank Weston, Marjory and Joan Cooper, of Malton, are spending their holidays with Mrs. D. McIntyre.

A severe electrical storm accompanied by a strong whirlwind swept over Ormsdown Sunday evening around 9:30. Several large trees were levelled to the ground, also roofs were taken off houses, telephone poles were broken down and electric wires broken, which put the town in darkness. Fortunately the wind abated in a short time, but a second storm broke over this district and the rain came down in torrents which will do a great deal of good as the ground was very dry.

Sunday guests at the McIntyre home were Mr. and Mrs. Frank Gittins and Mr. and Mrs. James Hendry and Donald, and Mrs. James Hendry, Sr., all of Montreal.

Mrs. Hugh MacAdam, Jr., Irene, Roberta and infant son, have returned to Hemmingford, where they are accompanied by Miss Ruth Kerr.

The Barrie Memorial Hospital wishes to acknowledge the following donations: Beans, cucumbers and berries—Anonymous. Beans—Mrs. Archie McNeil.

* **HAPPY** *
* **BIRTHDAY** *

Aug. 4—Mrs. D. C. MacDonald, Howick, Que. 1862.

WITH R.C.O.C.

Petty Officer Watson Stewart, aged 24, enlisted with the R.C.N.V.R. in January, 1942, and is presently stationed at an Eastern Canadian Port. He is the son of Mr. and Mrs. J. W. Stewart, Valleyfield.

Daniel W. Bryson, son of Mr. and Mrs. George W. Bryson, St. Andrew's East, Que., enlisted with the Black Watch in June, 1940, and went overseas in June, 1941. He is a grandson of Mr. D. G. Macfarlane, of Huntingdon.

Eugene Stabin, R-144858, holds the rank of AC1 in the Royal Canadian Air Force. AC1 Stabin was born at Ste. Barbe, He is well known in this vicinity and is favourably known by many in Valleyfield.

Pte. Herbert Stewart is the son of Mr. and Mrs. John W. Stewart, of New Salisbury, Valleyfield, and formerly of Howick, Que. He enlisted with the R.C.O.C. in December, 1941, and is favourably known by many in Valleyfield.

Thanksgiving May be Later

Several Factors May Determine Date This Year

Discussion is going on at Ottawa about the date of Thanksgiving Day and there are indications it may be later than usual this year.

While the date is determined each year, it has become almost a fixture to have it on the second Monday in October. It used to be practically coincident with the U.S. Thanksgiving, on the last Thursday of November but that was considered too late in Canada—too near Christmas.

Now the representation by some of the farming community is that the second Monday of October is too early, especially if turkeys have any relation to the festival.

A newer influence, entering into the consideration, is that at the usual time of Thanksgiving, a national loan campaign may be on.

Invitational Sale ...

(Continued from page 1)

explained that Lots Numbers 8, 11, 29, 30 and 36 were not eligible to be shipped to the United States and certain other points.

The calves were then started on the auction by Auctioneer Franklin, and the first one known as Lot A was sold to Premier Aclard Godbout, for \$90. The second was sold to Mr. Jones of the United States for \$95.00; the third to Mr. April for \$125.00; the fourth to Mr. Cummings for \$125.00; the fifth to Mr. McIntyre for \$180.00; the sixth to Gilbert McMillan for \$120.00. Thus the amount raised was \$735.00. A small sum to end for the British War Relief Fund.

All the other cattle brought good prices and the sale was very successful. A large number of buyers were present from the States and other points as well as from the immediate vicinity. A Mr. Frank Smith bought Burnside Barr Annette 2nd -229576-, a first prize winner, for \$535.00. Other prices realised were: Deschambault Mavens 31T -229563-, \$300.00; Leitchcroft Scholar's Eve -23011-, \$280.00; Deschambault Saky 11T -226730-, \$350.00; Maroon Vera -232317-, \$305.00; and Macdonald Violet -230765-, \$300. These, to mention a few of the cattle offered, gave some idea of how the sale went.

The sale was very successful and Messrs. R. New and Sons are to be congratulated on the fine offering and the opportunity afforded to those who were buying to get such fine stock for their herds.

The hymns chosen were, "Abide With Me," "Shall We Gather at the River," and "The Old Rugged Cross," and Miss Holbrook sang, "Is There Anybody Here But Us?" as a solo.

The pall-bearers were Thomas and Fred Greenway, and Ernest and Kenneth Sutton. Interment was made in the family lot at Bethel Church.

Coming from a distance there were present, Mr. Edward Lowden and son, Randall, from Windsor, Ont., Mr. Amos Lowden and Mrs. David Patton and son, from Maspeth, Long Island, and Mr. and Mrs. Samuel Lowden from Perry's Mills, N.Y.

The floral tributes were beautiful and included a wreath from Mrs. James Watt, and Messrs. John, Wesley, and Hollis Lowden, a wreath from the grand-children, sprays from Mr. Edward Lowden, Mrs. S. M. Simpson, Mrs. M. H. Sample, Mrs. D. Patton and Mr. Amos Lowden, and the Ford Motor Co., Windsor, and cut flowers from Mr. C. Sutton, Sr.

Mrs. Lowden is survived by five sons, Edward, of Windsor, Ont., John, of Dewittville, Wesley, of Covey Hill, Amos, of Maspeth, L.I., and Hollis, of Huntingdon, two daughters, Mrs. David Patton, of Maspeth, L.I., and Mrs. John Watt (Susan) of Covey Hill; two brothers, George and Edward, and twenty-two grandchildren. She was predeceased by her husband, John, youngest daughter, Mrs. John Jackson, Jr., (Coral), and her brother, the late Mr. Alfred Sutton.

Mrs. Lowden, whose maiden name was Harriet Sutton, was of English descent, being the only daughter of the late George Sutton and his wife, Emily Earle. She was born at Covey Hill. Her husband's death, over 31 years ago, left her with a youthful family of five sons and three daughters and with a farm to manage. For her duty of Christian motherhood she was equipped with that symmetrical type of character which develops head, heart, and hand in due proportion.

For her labors well and faithfully performed, she had the happy gift of turning to literature for pleasure and comfort, or of fashioning things of use and beauty which are now treasured by the children and grandchildren for whom she never could do too much.

Despite the ill health which she bore for years, her habits of industry and helpfulness persisted to the end.

For the old-time step and the glad return, Think of her faring on as dear In the love of there as the love of here.

She is not dead, she is just away.

For the old-time step and the glad return, Think of her faring on as dear In the love of there as the love of here.

She is not dead, she is just away.

Dundee Council

Met on Monday evening. Coun. John Quenneville was absent through illness.

Coun. H. A. Cameron gave notice of motion that at the next regular session of the Council he would introduce By-law No. 208, levying a rate of taxation sufficient to cover municipal maintenance costs for the coming year.

The changes in the Valuation Roll which were noted at the July meeting were homologated without further amendment and ordered published according to law.

Brush cutting on the municipal roads was discussed, but due to the current labor shortage it was decided to defer a decision on the matter until next session.

The Shawinigan W. & P. acct., \$10.10, was ordered paid.

Powerscourt

Mr. Perjul, Miss Rosie Perjul and Mr. Koski, were week-end visitors at the Koski home.

Mr. Lewis of Montreal, is spending a week with his family.

Mrs. Edith McArthur of Huntingdon, was the guest on Sunday of Mrs. Howard Millar.

Mr. and Mrs. Victor Lang of St. Johns, were week-end guests of Mr. and Mrs. Donald Lang.

Godmanchester Council Holds Regular Meeting

At a regular meeting of the Godmanchester Council, on Monday afternoon, Messrs. Peter Myre and John Welburn came before the Board and inquired who the special officer was for the Cowan Creek. They were advised to interview Oliver Bonnevillie. Councillor Biggar and the secretary-treasurer were appointed a committee to measure the fences and ditches along the Plank road opposite the property of Peter Myre on the east side of the above road.

John Gordon was authorized to secure a quantity of wire and pickets on the property of Geo. Boucher that are the property of the council, and to complete the building of the fence adjoining his property on the Plank road.

Notice of motion was given that a by-law be prepared and brought in before the next meeting levying a tax on all dogs within the limits of the Municipality.

A vote of thanks was extended to the Mayor, J. J. Tannahill, for the lunch served to the members of the board at the Huntingdon Hotel.

A letter was read and filed from Mr. Jean Bastien, divisional engineer, road department, Ormstown, dated July 23rd, 1942, in answer to a letter from the secretary-treasurer asking for assistance towards re-flooding the Murray and Gavin bridges.

A letter was read from the secretary-treasurer of the Soldiers' Club, acknowledging \$5 from the Council, which was a payment on the amount offered to the Club.

Notice of motion was given that a by-law be prepared and handed in before the next regular meeting of the Council in September, levying a rate of assessment on all taxable property within the limits of the Township of Godmanchester, in order to defray expenses of administration for next year.

Oliver Bonnevillie was appointed special superintendent to amend the process verbal on the Hall Creek, at the request of R. Billette, and to bring in his amendment or otherwise before the next regular meeting in September.

The secretary-treasurer was authorized to write the Public Works Department for assistance in re-flooding the Gavin and Elgin, with the Mayor, Mr. Elgin concurring in this request.

Mr. Billette is satisfied with the present level of Hall Creek and does not want it deepened any more, as it is of sufficient depth to drain his land.

The following bills were ordered paid: Shawinigan Water and Power Co., \$2.55; Romeo Hart, \$30.1; A. Patenaude, \$47.1; Huntingdon Gleaner Inc., \$12.0.

Mr. and Mrs. John Poliquin, daughter Mary and grand-daughter, Maureen Ryan, Mr. and Mrs. Frank Sherry, Mrs. Austin Barrie, Beauharnois, spent a few days at the same home.

Well-known Citizen Passes

The Late William Jas. Goundrey

The death occurred on Friday, July 31st, of William James Goundrey, son of the late Wm. Goundrey, of Dewittville, Que. The deceased was in his 70th year and passed away after a short illness.

Mr. Goundrey was a resident of Huntingdon for the past thirty years, and up to the time of his retirement five years ago, was employed by the Dept. of Immigration as an Immigration Officer in this district.

For the past few years, he had been in failing health, and had been unable to enjoy a well-earned rest. He was well-known and respected and was a member of the Masonic Order. Until recently he took an active part in the activities of the Huntingdon Curling Club. By his death, the community has lost a good and well-known citizen.

The late Mr. Goundrey is survived by his wife, Bertha, and his daughter, Arlene, who has been unable to enjoy a well-earned rest. He was well-known and respected and was a member of the Masonic Order. Until recently he took an active part in the activities of the Huntingdon Curling Club. By his death, the community has lost a good and well-known citizen.

Funeral was held at the Presbyterian Church, Huntingdon, on Sunday, August 2nd. Interment was made in the Protestant Cemetery.

New Erin

Mr. Joseph Feeny and sons, Aloysius and James, of Beauharnois, visited last week with Mr. and Mrs. Frank Sherry, Mrs. Austin Barrie, Beauharnois, spent a few days at the same home.

Mrs. T. W. Furey and Miss Mabel Durin, Huntingdon, were Sunday visitors of Messrs. Richard and Bernard Durin.

Miss Madeline O'Connor has returned home to Montreal after spending a week with her aunt, Mrs. John Stark.

Mr. and Mrs. John Poliquin, daughter Mary and grand-daughter, Maureen Ryan, Mr. and Mrs. Frank Sherry, Mrs. Austin Barrie, Beauharnois, spent a few days at the same home.

Mrs. T. W. Furey and Miss Mabel Durin, Huntingdon, were Sunday visitors of Messrs. Richard and Bernard Durin.

Miss Madeline O'Connor has returned home to Montreal after spending a week with her aunt, Mrs. John Stark.

Tatehurst

Summer guests at the home of Mr. and Mrs. Eddie Hooker are Mrs. Holden, Mrs. Marshall, Mrs. Tough and son Kenneth and Master Russell Deacon, all of Montreal.

Miss Phyllis Honeford is spending a holiday with Mrs. John Honeford at the Grans home. Mr. John Honeford was a recent guest at the same home.

Miss Helen MacDougall, of Montreal, visited last week-end with her parents, Mr. and Mrs. John MacDougall.

Mr. and Mrs. Ernest Williams and family of Montreal were Sunday guests at the Greer home.

Mrs. Robert Gruer, Mr. and Mrs. Alvin Gruer and Donald visited on Sunday with Mr. and Mrs. Carson Wallace, Roxham.

Miss Betty Cavers, R.N., and Mr. William Cavers were recent visitors at their home here.

Master Buddy Williams is spending the summer holiday with Mr. and Mrs. James Greer.

Mr. and Mrs. Preston Hooker and Heather, Miss Joyce DesFrais of Malone, and Master Keith Hooker, of Toronto, motored to Vaudeville on Wednesday.

Mr. and Mrs. Nelson Hooker, Norma and Allison, of Valleyfield, and Mrs. George Hooker spent Saturday with Mr. and Mrs. Wm. Perry, Covey Hill.

Covey Hill

Mr. and Mrs. Ernest Cole, of Lachine, spent a week-end at "The Lilacs."

The committal service for the late Charles Monthet Stewart of Boston, Mass., was conducted on Sunday afternoon at Westley United Church cemetery. Rev. Mr. Beaton had charge, being assisted by Rev. Mr. Burt of Hemmingford. Relatives and friends attended the service. The urn was interred in the family lot where rest the father, mother, and young sister of the deceased.

Rev. Mr. and Mrs. S. Belbin have been visiting friends on the Hill.

Mr. and Mrs. R. C. Whyte and family, also Miss Marion Whyte and Master Bill Finlay attended the marriage of Miss E. Angell to Mr. Glen Whyte in Riverfield Church.

Recent guests at "Cornerstones" were Mr. and Mrs. Frank Gough and Mrs. Stewart, of Montreal, and Mr. and Mrs. Geo. Hooker of Ormstown.

Mr. Edward Lowden, Mrs. James Beulah Lowden, and Mrs. James Wait attended the funeral of Mr. Wm. Radley, who was a cousin of the late Mrs. James Lowden.

Mrs. Frank Gordon, of Methuen, Mass., is a guest of Mr. and Mrs. E. E. Perry, "Greenlea."

Mr. and Mrs. Al. Collins and daughter of Montreal, were guests this week of Mr. and Mrs. W. W. Lowden.

Mr. and Mrs. John Poliquin, daughter Mary and grand-daughter, Maureen Ryan, Mr. and Mrs. Frank Sherry, Mrs. Austin Barrie, Beauharnois, spent a few days at the same home.

Mrs. T. W. Furey and Miss Mabel Durin, Huntingdon, were Sunday visitors of Messrs. Richard and Bernard Durin.

Ormstown Council

Ormstown Council met on Monday, Mayor D. A. Barrington presiding, Councillor Brunet absent.

Moved by Councillor Meikle, seconded by Councillor Greer that the following accounts be paid: Rosario Lefebvre, \$3.60; Polidor Prevost, \$3.60; Shawinigan Water & Power Co., \$94.61; Stamp & Stencil Works, \$8.92; E. A. Benoit, \$3.70; Farmers Telephone Co., \$14; Paul Galpeau, \$96; Donald Primeau, \$6.60; Raoul Shinc, \$1.80; Remi Allen, \$1.50; Adolphe Cherrier, \$8.40; Alex. Riddoch, \$5.60; Polidor Prevost, \$5.10; B. L. McGerrige, \$10; J. R. Campbell, \$26.73; Muller Limited, \$33.34.

A letter from the Medical Superintendent of the Barrie Memorial Hospital was read, complaining of the noise and rowdiness which has recently been occurring on Friday and Saturday nights, and asking that something be done to control the noise nuisance in the village generally and particularly in the hospital zone.

Council decided to enforce by-law against those creating disturbances and infringing the No Parking by-law.

The secretary was ordered to write the Quebec Liquor Commission, complaining of the noise and rowdiness around the Hebert Hotel on Friday and Saturday nights particularly.

The secretary was ordered to have an advertisement placed in the Huntingdon Gleaner, stating that the No Parking by-law would be strictly enforced from Saturday night, August 8th.

The special service held in St. Andrew's Presbyterian Church on Sunday evening was very well attended. The entire service was taken by the members of the Young People's Society. A solo was sung by Miss Geraldine Clayland and the address was given in three parts by the following: Aaron Churchill, Gertrude Orr and Allen Loudon.

Miss Louise Carr, of Montreal, is spending a week at the home of Mr. and Mrs. J. E. McNaughton.

Mr. and Mrs. Sherwood Boyce and two children, of Ogdontown, were Sunday guests of Mr. and Mrs. J. E. McNaughton.

Mr. Arnold McNaughton returned home after spending a week at the Boyce home.

Mrs. W. Keddy and Mrs. Percy Barr were joint hostesses to the Women's Missionary Society, United Church, held in the church hall on Wednesday.

Members and friends spent the afternoon in quilting, etc., and Mrs. Burt took charge of the decorations. At the close the hostesses served supper.

Mr. Gordon Bryce, of Montreal, spent the week-end at the home of Mr. and Mrs. G. A. McKay.

Never Forget Canadians, Says Englishman

"Fighters All, Itching to Get Into Battle"

Tough and Fine, Like Steel, is Estimate of Dominion Lads Aboard H.M.S. King Alfred

The last class of Canadian naval officers-in-the-making has passed through H.M.S. King Alfred, one of the Royal Navy's training centres.

Today, and hence forth, the successors of the scores of Canadian officers who have taken training at King Alfred in England will undergo the same courses in Canada.

In the meantime, Canada's connection with H.M.S. King Alfred will be maintained by those who, since the first days of war, have felt that its hold upon them is strong, whether they left for service in the far-off waters of the Pacific Ocean, or to take command of a small Motor Torpedo Boat in the English Channel. So strong, in fact, that officer after officer, during his short spells of leave, makes certain that he will have time for at least one visit to King Alfred.

Watches Her Graduates And, in return, King Alfred watches the progress of her proteges... delights in their successes, their promotions and their new commands, glories in their distinctions, the Distinguished Service Crosses and the George Medals, the mentions in despatches and the Distinguished Service Orders, which have already come the way of these Canadian officers, records her casualties, the killed in action, the prisoners of war.

She has seen all this war's naval history being made, has King Alfred, and has had her share in the making. More, she has made history herself, for she is the first naval training establishment devoted exclusively to the training of officers in the Volunteer Reserve.

In the early days of the war, when groups of young Canadian volunteers left their own country for training in England, King Alfred was waiting for them. They were untested and untried.

King Alfred moulded them. She placed them beside similar volunteers from Australia and South Africa and New Zealand, mixed them with their confederates from England and Scotland, Wales and Ireland... and made the experiment work!

Record Shows Proof Proof of the success is in the records. Literally in their thousands, during the war-years since the establishment was inaugurated, trained and qualified officers have come from King Alfred. From Canada alone came men who, since they left King Alfred, have seen service in the two Atlantic and the two Pacific, the Mediterranean and the Red Sea, the North Sea and the Persian Gulf.

King Alfred, as she glories in the deeds of those she has sent forth, recalls, too, those early days when her enthusiastic fighting men were learning to be naval officers.

Episodes like that of the young Canadian who, as part of his training, was called upon to take charge of a class in rifle drill. His first attempt left the regular instructors gasping.

"You know, fellows," the Canadian began, "the navy has a 'Slope Arms' and a 'Shoulder Arms.' It doesn't. It's silly, but that's the way it goes."

There is the story of another Canadian who, forgetting the order which would put the squad he was instructing into single file, solved the problem by shouting: "But, you blighters!" The squad responded smartly, but the instructors nearly had apoplexy.

They'll Never Forget "No," said an English officer to the writer, "we'll never forget the Canadians."

"I know that I will never forget

OFFICER-IN TRAINING SPOTS PLANES

Officers in training at H.M.S. King Alfred, a Royal Navy school, perform their share of war duties. This young man is standing his watch as an airplane spotter. Establishment of training facilities in Canada has made it unnecessary to send Canadians to England for instruction, so there are no longer any Royal Canadian Navy men at King Alfred. They remember the boys, though.

the three who went across to Dunkirk when France fell. They went across as a demolition party, and should have been back within a few days. Things were a little hectic then, so they didn't get back on time and I was rather worried about them. One of our fellows got back a bit later and I immediately asked him if he had seen any Canadians.

"Well," he answered, "I saw three fellows whooping it up the main street of Calais, would that be them?"

"Of course it was," continued the English officer, "so I felt quite happy to know they were all right."

"I had," he answered, "I saw three fellows whooping it up the main street of Calais, would that be them?"

"Of course it was," continued the English officer, "so I felt quite happy to know they were all right."

"I had," he answered, "I saw three fellows whooping it up the main street of Calais, would that be them?"

"I had," he answered, "I saw three fellows whooping it up the main street of Calais, would that be them?"

WEEK AT OTTAWA

(Continued from page 2)

the Hong Kong debate brought out a situation which is comforting to government leaders. It indicated that the schism in the ranks shown in the debate on the mobilization bill was confined to the question on conscription and that otherwise the party ranks were unbroken. With one exception the Quebec Liberals in the house voted with the government, showing as the prime minister put it that the government still held the confidence of the House of Commons.

Improvements In Housing Situation

The government is making renewed efforts to improve the housing situation which has become so acute in many parts of Canada. It has been decided to assist, through the national housing scheme, in financing the construction of small permanent houses in congested areas. The home improvement plan is also being revived to increase the available amount of housing by converting large houses into two or three family apartments. Work of this kind of course presents difficulties as there is the growing shortage of materials used in building which are needed for war production. Alleviation of the housing situation comes also from another agency, the war-time housing scheme which looks after accommodation for workmen in war production centres. A plan has been worked out whereby this agency will aid municipalities in providing accommodation for the families of soldiers serving abroad and for others also needing houses. In fact, the municipalities will supply the lots and the war-time housing company will do the building under agreed conditions.

Among the reports from committees of the house tabled in the latter part of the session, the one on radio broadcasting is causing some concern to a very considerable part of the Canadian public. The report not only criticizes the Board of Governors of the CBC but also to some extent the general manager, Gladstone Murray. It is felt by many here in Ottawa that perhaps a little too much was made of alleged looseness in Major Murray's expense accounts while his great contributions to Canadian Broadcasting were not given due prominence. Major Murray, it is freely acknowledged here, is the genius of Canadian broadcasting. He was a Canadian Rhodes scholar, a veteran of the last war with a fine record, and he brought to the CBC an invaluable experience which he received as an executive of the BBC in London. It is felt here that while the hands of the accounting department may be strengthened in any way it may be considered necessary, the CBC and Canada cannot afford to lose the services of its outstanding radio man particularly in time of war, in which the radio plays such a vital part.

Bottles Badly Needed

Owing to labor shortage, bottles are now badly needed, so badly that the War-time Prices and Trade Board has issued an order making it an offence willfully to destroy any bottles fit for use. Salvage agencies are also in the market for all kinds of broken glass, including bottle window and plate glass which can be ground up and re-manufactured. Search house, garage and other buildings for unused bottles and get them to your nearest salvage disposal agency.

FUN IN CRATERS

Bournemouth, England.—Craters left by German bombs in Bournemouth's central pleasure gardens are being converted into toy-bath and paddling ponds for children.

Opinions of Others

(Continued from page 2)

Where will we find those raw materials, now that the steam roller of Japan has taken from us most of our sources of rubber, of tin, and much of our resources of oil and tungsten and bauxite, that precious source of aluminum?

We are faced today with an economic counterblockade. It has been imposed in part by enemy action, in part by the expanding demands of war. If we are to meet it, we must forget, for the time at least, our high standard of living. We cannot continue our old wasteful ways and have victory too.

We need 50,000,000 pounds of rubber this year. Where are we going to find it? Synthetic rubber won't be available this year, and our ordinary source of supply is closed to us. We have left only our swiftness of disappearing reserves, and that great potential source, the odds and ends of scrap rubber that are found in every home. Here is your chance to help.

There is a need not only for rubber but for every kind of metal. We need 2,000,000 tons of scrap iron and steel alone for making tanks, guns, ships, and other war materials. Three quarters of a million tons of iron and steel are rusting away uselessly on Canadian farms. As much as in Canadian attics and cellars and garages. Get it moving while there is still time, for time is limited.

Steam Cooking Feature Of Cafe Car Kitchen

Steam-Line Cooks Spuds

Mother performs culinary marvels with the kitchen range but could she have one of the new steam cookers such as are installed in new Cafe Cars of the Canadian National Railways, there would be ample potatoes for all and sundry at meal time, no matter how many unexpected guests arrived. These cookers are a wartime development for the quick cooking of vegetables, meats and puddings.

Probably a majority of travellers think of steam merely as the propelling power in the locomotive, but it has other railway uses. In winter months it heats passenger equipment and now has been harnessed for the kitchen, particularly in these cafe cars and in the commissary kitchen cars which form an essential part of troop trains moving long distances over the National System. Large kettles for tea, coffee, oatmeal and soup use team of the train line, more of it goes to the sink to sterilize dishes, and now large cookers utilize steam for a variety of purposes, providing properly cooked vegetables and other foods, and leaving the top of the range clear for other cooking.

Feminine visitors privileged to see the secrets of the Cafe Car kitchen have expressed keen interest in the step and labor saving layout by which handily placed cupboards and bins bring supplies to within arm's length. If a towel is wanted, just reach and get it without moving a pace. The dish needed is at hand, too, while the refrigerators are close to bench and range. The convenient sinks—there are two, one for each end of the kitchen—gained praise for the plentiful supply of hot and rinsing water, steam for sterilizing and taps so placed as to greatly minimize risk of breakage. Another gadget greatly appreciated is the stainless steel holder into which cups are placed awaiting call, meanwhile warming the chinaware so that it goes to the table at temperature just right for the morning coffee and the luncheon cup of tea.

St. Sacramento Council

At a regular meeting of the Municipal Council of St. Sacramento, held on Monday at 1.30 p.m., the following Councillors present: Cousins, MacFarlane, Bergevin, Angel and Bryson, under the presidency of Mayor Alfred Decent, when the following resolutions were adopted.

Coun. Bryson gave notice that at the next general meeting of this Council, to be held Tuesday, the 8th day of Sept., at 1.30 p.m., he will move the adoption of a by-law to levy on the valuation roll now in force in this Municipality, sufficient monies to pay the County Council rate and to pay running expenses for the current year.

WHERE YOUR SALVAGE GOES

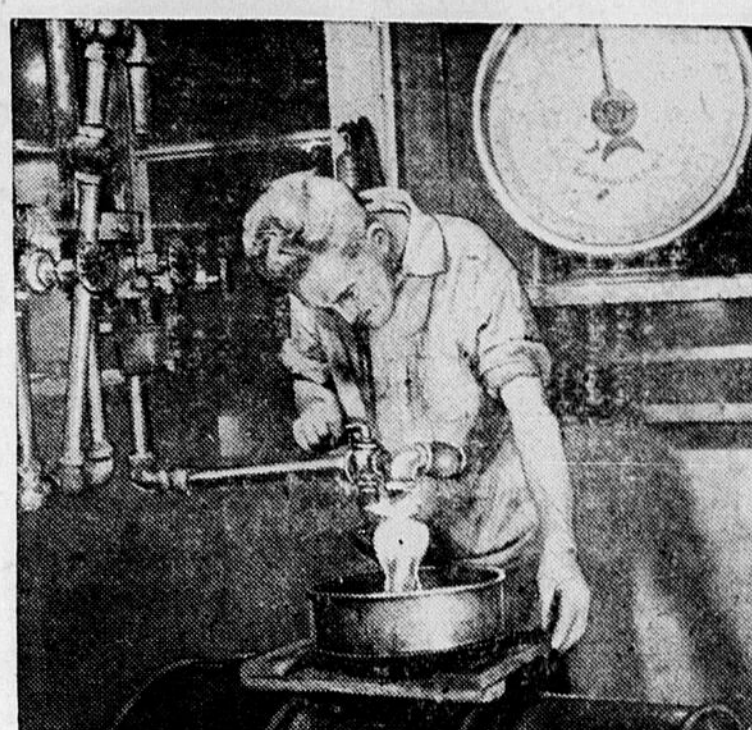

No. 6 Bones and Fats

Sparky, a bone-saver from way back, sets an example for the housewife. Vegetable oil imports are partly cut off. To ensure sufficient quantities of fats and greases for war use, every home in Canada should save bones, drippings.

This is concentrated glue made from bones which the home owner has placed in a paper bag and set out separately for the garbage collector. Drippings are put in old cans. Glue has a multitude of uses throughout war production.

Ten pounds of processed household fats and bones produce nine pounds of soap and one pound of glycerine. This is high-grade glycerine being poured into a barrel. It will be shipped to an explosive plant to make nitro-glycerine.

Behind the roar of our coastal defence guns is the grim power of cordite, which like practically all propellants contains nitro-glycerine. Every pound of nitro-glycerine requires a half-pound of glycerine from fats and bones.

Along the Air Waves

BY ETHEL RYAN

Actual reporting of the news in Canada is another service being prepared for CBC listeners.

For the purpose of a scene-to-scene account of events at home, the CBC announces "Canadian Round-Up," a weekly feature that will originate in the news rooms of the various regional centres. The first programme of "Canadian Round-Up" will be heard over the CBC National Network Monday, August 10 at 10:15 p.m., directly following the National News Summary, and will continue weekly thereafter. The programme will consist of three five-minute "pick-ups," one from Vancouver with Peter Stursberg reporting, one from Toronto with Matt Smith doing the word picture and one from Halifax with V. F. Segee on the sending end.

The idea of the whole series is to bring in the points of news interest after the fashion of the European round-ups with which listeners on this side have become familiar since the outbreak of the war. Montreal, Winnipeg and Ottawa will provide the news items on Monday, August 17, and the points of pick-up will move back and forth between the centres mentioned in the course of the next few weeks.

petroleum. In "Science in the News," arranged and presented by Dyson Carter from the CBC Winnipeg studios, the story of petroleum will be told on CBC Friday, August 14 at 10:45 p.m.

SWEETHEART

The Aldrich Family, with cast unchanged, returns to the CBC Network on Thursday, August 13, at 8:30 p.m., after a five-week vacation. Author Goldsmith parked Henry (Ezra Stone) on a farm for safe-keeping on July 2 and collapsed in a comfortable hammock himself for a well-earned rest. Now Henry returns to his family and to blonde Mary Shipp who plays the part of Henry's current best girl friend.

MONICA IN THE NORTH

Monica Mogan must have had an ancestor with Champlain, Cartier or Cabot. She is an adventurer at heart and every vacation is a busman's holiday. This summer has been typical; she has been up North looking for news and stories with which to entertain her audience. The premiere will be on Tuesday, August 11, when Miss Mogan will tell about the industrial development she viewed in the mining camps and pulp areas around Timmins, Kirkland Lake and Noranda district. The time: 4:35 p.m. on CBC's National Network.

At the Movies ...

There are a few melodramas a season that demand to be seen. Here is one of them. For this film version of Steve Fisher's novel "I Wake Up Screaming" is a brilliantly handled and sharply played piece of mystery drama, which, for sustained suspense and dramatic intensity assures it a place with the elite in this field.

A detective who "believes in justice" at all costs, "Big Ed" deliberately allows the murderer of a glamorized waitress his freedom, while "Big Ed" tries to obtain sufficient evidence to pin the murder rap on the sports promoter responsible for the glamorizing. Cregar stalks his victim as any bird of prey—sinister and uncompromising. Mature is the sports promoter and the "Big Ed" is the electric chair where he nearly sits. Carole Landis is the waitress who becomes the glamour girl through the manipulations of the promoter "because that is his business," and Betty Grable is the sister who loves and is loved by the promoter.

Employing the flashback method for a good deal of the picture, thus keeping Miss Landis in the picture past the murder stage, the elements of romance, mystery, suspense and an ending as unpredictable as the number of people in the audience have been woven into a dramatic pattern of fascinating melodrama. Showing at O'Connor Theatre, Huntington, Sunday and Monday, August 9 and 10.

Brooklet

Lawn Social Held

A very successful lawn social, under the auspices of Rennie's United Church, was held at the Gamble home on Tuesday evening, July 28th. The night being ideal for a lawn social, a large crowd was present, who enjoyed the splendid supper served by the ladies of the congregation. The Wilson-Milne orchestra played during the evening. About \$110 was realised from the supper.

Mr. and Mrs. M. Clark visited relatives and friends at Cobalt, Ont., over the week-end.

Mr. Mr. Albert Dickson and daughter, Mrs. Charles Morley, of Verdun, are guests at the home of Mr. and Mrs. N. J. Wilson.

Mr. and Mrs. M. Clark and son Donald and Mrs. Chester Wilson and two children, Lawrence and Mabel, of Ormstown, were guests on Saturday afternoon of Mr. and Mrs. N. J. Wilson.

Mr. and Mrs. Smith and son Edwin, of New York City, are guests at the home of Mr. and Mrs. Leslie Arthur.

Miss Lucille Arthur of Montreal, and Miss Helen Arthur of Macdonald College, spent the week-end with their parents.

Mr. and Mrs. W. J. Maithier spent a day recently at the home of Mr. and Mrs. J. J. Fraser, at Dundee.

Farming Season at its Height, Accidents May Happen

Precautions Listed May Prevent Accidents if Acted Upon

The farming season being now at its height, and more inexperienced help, including women and children, being used because of labour shortage, the following list of recommendations to farm owners and operators has been issued by the Province of Quebec Safety League for the promotion of safety.

When using hand cranks to start motor-operated machines, be sure that spark is retarded and that transmission gears are put in neutral, then grasp securely with hand, with the thumb extended lengthwise and PULL UP.

Tractor operators should avoid driving up excessively steep grades and on side hills, because of the possibility of overturning the machines. If the front end of tractor starts to rise off the ground, release the load and avoid tipping over backward.

Points of operation and exposed moving parts of threshing machines, ensilage cutters, circular saws and other belt-driven machines should be thoroughly guarded. Enclose belts and prevent persons from coming in contact with them. Shifting belts should be performed only by experienced persons, and, if possible, when the power is shut off. Never kick a moving belt off a pulley.

When connecting machines to tractors keep feet away from under drawbars and tractors should not be started until men are in the clear.

Avoid obstructions and depressions in the ground; if not possible, approach them cautiously in order that riders of tractor-drawn and horse-drawn machines may not be thrown from their seats.

Loading and unloading of trucks and wagons should be supervised by an experienced man; skids or ramps provided when needed, together with suitable ropes and tackles.

A man should never step into the reel of a grain binder while the machine is in gear to unclog the knives or make an adjustment; if the

tractor or horses were to start unexpectedly, his legs could be cut. Corn pickers, huskers and shredders are very dangerous, never reach into these machines to unclog them, especially with ragged gloves. Stop machines, throw out of gear before unclogging, oiling or adjusting.

Farmers should not allow children to play about machines or to ride on them.

Bulls are not to be trusted; de-horning eliminates a source of danger and the nose ring is necessary and proper, and a strong staff linked on the ring will assure full control of the animal.

Experienced caretakers should look after wild steers, cows with new-born calves, and sows with sucking pigs; avoid annoying and disturbing them.

Children and inexperienced persons should be kept away from vicious horses and mules. When about to go into a stall, first speak to the animal to avoid startling him. Generally speaking, draft horses should always be hitched securely when left unattended, and at other times should be in charge of competent and careful drivers.

Highway accidents will be prevented if traffic rules are observed; if speed is controlled according to conditions; if equipment is checked and repaired and if drivers are skilled, careful and attentive at the wheel.

Farm equipment should be frequently inspected, promptly repaired and kept in good condition.

Falls of persons are due to defective ladders, stairs, and scaffolds; the use of boxes, barrels, and other unsafe supporting devices; stairways cluttered with tools and other objects, and without railings; unprotected trap-door openings, holes in floors, and cellar hatchways; icy steps and walks; climbing about on roofs and trees without taking suitable precautions; and disregarding the law of gravity in many other ways. Be safety-minded always.

Trout River

Mrs. Ernest Dear and little son, Dickie, visited at the home of Mr. and Mrs. Dear, before leaving for Hamilton, Ont., where Pie, Ernest Dear has been transferred.

Mr. and Mrs. Ray Richardson, of Dixie, spent Sunday at the home of Mrs. Mary Anderson.

Mr. and Mrs. Russell Watt, Donald and Doreen, of St. Lambert, spent a week's holidays at the home of Mr. and Mrs. G. P. Elder.

Mr. and Mrs. Miller and daughter Sally, of Verdun, and Corporal Lockhart, of Hamilton, Ont., are spending a holiday with Mr. and

Mrs. G. D. Elder.

Grace and Joan Jolly of Verdun, were called home, their grandfather having passed away, both girls returned to Ellerslie Farm, on Saturday.

Mr. and Mrs. Arthur Dear and two daughters, of Burke and Mrs. Graham, mother of Mrs. Dear, were supper guests of Mr. and Mrs. H. Dear.

Miss Mildred Lunan of Montreal is spending some time with Mr. and Mrs. Watson Tannahill and family. Recent visitors at the house of Mr. G. D. Elder were Rev. and Mrs. Moores, Mr. James Brins, also Mr. and Mrs. Sid Seward and daughter Bessie.

An 18-Ton Fighting Machine For the United Nations

No. Junior, these big bells are not being used on tanks. The bells are being assembled for passenger locomotives in the same factory where Canada's Valentine tanks are produced in mass quantities. The Valentine, an infantry tank, is now in service on the Russian front where Soviet military experts have described the Canadian tank as highly effective. It is an 18-ton machine, powered with diesel-motor. A giant mechanical ferret, it is capable of burrowing its way through a brick building and travelling at 20 miles per hour over difficult terrain. The body is armour-plated, riveted and welded, and the rotary turret may be operated either by hand or electrical controls.

World-Wide Gleanings of Interest

Brief News Items of General Character

WHY SCOTSMEN GET MORE FUEL

London.—Fuel Minister Gwynn George, explaining why the proposed fuel ration is higher in Scotland and the north than in the South of England, turned to weather records for his answer. He said Britain's east coast was the coldest part of Britain in winter but the rawness of the air in the north and the humidity in the west must also be taken into account. With that members of the Commons had to be satisfied. Nazi writings.

SALVAGE IN TONS

London.—Salvage of Britain's towns and cities during six months up to the end of April included 600,000 tons of scrap metal, 20,276 tons of bones, 38,495 tons of rags and 317,973 tons of kitchen waste.

HIS WILL DEPENDS ON BREAD PRICES

Belfast, Northern Ireland.—The price of bread governed conditions of the will of Flying Officer Arthur Peter Holmes, who died on war service. He bequeathed certain property to his wife and the residue was to be placed in trust for her. But if the price of a four-pound loaf of bread reached more than 50 cents, she was to receive the entire estate. Since the start of the war the price of a four-pound loaf has been "pegged" at 15 cents.

GIVE OLD FOR NEW

Wellington, N.Z.—New Zealanders now have to give up old electric lamp bulbs before they can buy new ones.

IF INVASION COMES

London.—Voluntary organizers have been selected in towns and villages in Britain to direct control and distribution of food in the event the areas are isolated by invading forces.

REFUSED AWARDS

Glasgow.—The Royal National Lifeboat Institution sent rewards worth \$18.50 to each of three fishermen who rescued airmen off the coast of Scotland but back came

HELP WANTED

Stenographers—fully qualified especially in English stenography. Recent graduates of good schools considered. For Manufacturing Company in Beauharnois. Apply by letter giving full details to K. C. Coleman, Beauharnois. No personal interviews except by invitation. No employees of firms engaged in defense work need apply.

HEALTH NOTES

TORONTO.—The Health League of Canada directs public attention to a bulletin issued by the local Health Department which should become familiar to everyone who is going from city to country for holidays.

The bulletin warns of the dangers of infection from impure water and milk, and supplies necessary practical details as to protective measures.

The public is reminded that unpasteurized milk may carry germs that cause typhoid, scarlet fever, tuberculosis, diphtheria or other infectious disease. Impure water may cause typhoid fever, and health authorities warn that no water supply can be considered safe unless it is treated. Moreover, there is a real cost to vacationists to render their water and milk supply safe when they are out in the country. The process by which germ-free milk and water can be had merely requires a little work and continuous thoughtfulness.

To sterilize water: Mix up a stock solution of chlorine by rubbing a thin cream a teaspoonful of chloride of lime with a little water in a cup, then fill the cup with water. Then dilute this solution with three cups of water. This stock solution, if kept in a tightly stoppered bottle, will retain its strength for a week. Use a teaspoonful of this solution to two gallons of drinking water, and it should be thoroughly mixed and allowed to stand for at least ten minutes before using. If these directions are followed, badly polluted water can be sterilized within ten minutes.

To pasteurize milk: Heat in a double boiler until it reaches 145 degrees Fahrenheit. Then set the boiler on the back of the stove for 30 minutes, after which cool the milk quickly and place it in the ice box. If there is no thermometer handy, the bottle or boilerful of milk should be placed in a pail or saucuppan of water which is filled so that the water outside is about as high as the milk inside. Heat the milk until the water boils, then remove from the fire, pour out about a third of the hot water and refill the saucuppan or pail with cold water to the former level. Keep the milk in this for at least 30 minutes and then remove to cool. The public is reminded that pasteurization does not affect either the taste or the

food value of the milk, and that after pasteurization the milk should be treated the same as raw milk to prevent it becoming sour. Mothers who are taking infants out to the country should of course be particularly watchful of these details.

The Beaver

Mrs. A. Demers is visiting friends in Valleyfield, this week. Mr. and Mrs. Ronald Dick and Miss Jean Dain, Montreal, were week-end guests of Mr. and Mrs. A. F. McLennan.

Mrs. Boyer, Montreal, is a guest of Mr. and Mrs. John Quenneville.

Miss Elizabeth Shorey, Cornwall, spent the past week with her friend, Mrs. A. B. Cameron. Miss Vivian Demers, Massena, N.Y., is the guest of Miss Jeanette Demers.

Recent guests at the home of Mr. and Mrs. Ernest Watterson were Mr. McDonald, Montreal, Mrs. William Shorey, Miss Wilma Shorey, Cornwall, Ont., and Miss Ruthie Holmes, Chatham, Ont.
