Dominion of Canada 5% Refunding Loan Bonds

Maturing Oct. 15th, 1928

Dominion of Canada 5% Refunding Loan Bonds maturing October 15th will be redeemed at any Branch of The Bank of Nova Scotia

Bonds may be presented on or before October 15th, and payment will be made as instructed by the owner, either in currency, by cheque or by credit to the owner's account.

THE BANK OF NOVA SCOTIA

LOCAL NEWS

A shooting match is to be held in David Angus' grove, Charteris, on Friday afternoon, Nov. 2nd.

The annual Lamb Show and Sale will be held on the Exhibition Grounds, Shawville, on Wednesday, Oct. 24. See ad. on another page.

The Cobden Sun will be issued this week under new management, Mr. Macfarlane having sold out to Mr. A. L. McCready, formerly of the Chatham Daily News.

A Box Social, in aid of St. Alban's Church Guild, will be held on Oct. 29th, at the Community Hall, Starks' Corners. A good program will be provided. Admission 25 cents; Ladies with boxes free.

CHICKEN SUPPER — A chicken supper will be held at the home of Mr. Wm. Wallace, Morehead, Que., on Friday, Oct. 19th, at 5.30 p. m., in aid of St. John's Ladies' Guild. Admission :—35 and 25 cents.

A Sale of Fancy-work and Home-made Cooking will be held in the Orange Hall, Portage du Fort, on Saturday afternoon, Oct. 27, under the auspices of St. George's Ladies' Guild. Home-made candy. A special feature the "Cobweb." Refreshments 25 cents.

District Deputy Visits Pontiac Lodge

Rt. Wor. Bro. H. M. Gall, of Lachute, D.D.G.M., for Ottawa District, paid his official visit to Pontiac Lodge A.F. and A.M., on Wednesday evening last, when the Lodge convened in special session to receive him. The occasion was marked by the attendance of a larger number of Craftsmen than has assembled for some time, including a number from Ottawa and other points. After the business of the session was concluded, lunch was served.

Bristol Bazaar

The Bazaar in aid of the bnilding fund of St. Edward the Confessor's Parish, held on the 2nd, 3rd and 4th insts., was a success, socially and financially. The weather was ideal, the crowd large and generous.

The Acorn Range, donated by Renfrew Machinery Company, was won by J. E. Theviage, of Arnprior, holder of ticket No. 887.

The net proceeds were over $1400.00.

Ottawa Winter Fair

A full classification for all breeds of grade dairy cows has been put in the prize list for the Ottawa Winter Fair. The catalogue is now ready for distribution and contains many changes which should be of interest to farmers.

Farmers with T. B. tested grade females can now show at the Winter Fair and prizes awarded are as generous as in other classes. There is also a full classification for Guernseys and rearrangement in classes for commercial horses.

In the poultry department the entry fee has been cut one-third and the prize list revised.

A horse-shoe pitching contest open to all Eastern Ontario is to be a feature attraction during the afternoon show this year. The dates of the 1928 show are from December 3rd to 7th, with entries closing on November 24th.

PERSONAL MENTION

Mr. and Mrs. R. G. Adams, of Aylmer, spent Sunday with Shawville and Bryson relatives.

Miss Myrtle Eades, of Aylmer, spent the week-end with her parents, Mr. and Mrs. Thos. Eades.

Mr. and Mrs. Gerald Horner and little daughter, of Detroit, Mich., have been visiting their relatives in this district for the past couple of weeks.

Mrs. Samuel McDowell, of Massey, and Mr. and Mrs. John Reid, of British Columbia, arrived last week to visit relatives in town.

Mr. and Mrs. Geo. H. McDowell, and youngest daughter, Doris, motored from Ottawa Saturday evening to spend the week-end with his mother, Mrs. W. G. McDowell.

Principal Mr. G. H. V. Naylor, Ass't Principal, Miss Seivereight and the French Specialist, Miss Brandt, of Shawville High School staff, attended the Teachers' Convention which was held in Montreal last week.

Mr. George Lang, an old Shawville boy, who has been many years in British Columbia, in different locations, sends us a copy of the "B. C. Electric Employee's Magazine," an interesting and beautifully printed publication.

Mrs. W. H. Barnett and Miss Verna McKnight, R. N., who were the guests of their parents, left on Saturday for Ottawa, where the latter will spend a few days before returning to Michigan, where she will continue her work in Hospital.

Mr. W. J. Scobie, proprietor of the Scobie House, Norway Bay, favored THE EQUITY with a call while in town on Saturday. Whilst the holiday season is over at thepopular Summer resort, he is remaining at his hotel for a few weeks to make sundry improvements and repairs which have become necessary. He reports having had a very good season at the hotel this year.

THE EQUITY had a call on Thursday last from Mr. Robt. J. Glenn, formerly a resident of Shawville, and during the past 11 years located in Saskatchewan, West Point being his present address. Mr. and Mrs. Glenn came East on the sad mission of attending the obsequies of her father, Mr. Armour Lett, who died at Kingston on Sept. 30, and was buried at Eganville, where he previously resided.

Mr. Glenn reports that frost did considerable damage to the crops in his section of Saskatchewan, and in consequence there is considerable low grade wheat. The former Minister of Agriculture for Saskatchewan estimates the loss at $75,000,000.

CAMPBELL'S BAY.

The Ladies' Guild of St. George's Church gave a Chicken Supper in the Club Room of the United Church on Saturday, October 6th. So large a number of people patronized the effort that towards the end the ladies began to fear that the demand was going to exceed the supply.

On Sunday, October 7th, the Harvest Festival Services were held at St. George's Anglican Church, Campbell's Bay. The Church was beautifully decorated by willing hands. The Services began with a celebration of the Holy Communion at eight o'clock in the morning. There was a crowded Church at the evening service; the special preacher for the occasion being the Rev. Kenneth N. Brueton, of Otter Lake.

Mr. Bert Cullimore, late of the Strathcona Barber Shop, Ottawa, has purchased the local barbering business of Mr. Archie Spence, who left on Saturday last for Detroit, where Mrs. Spence will follow him in the course of a few weeks, accompanied by her parents, Mr. and Mrs. Cameron, of Portage du Fort.

Bristol Bacon Hog Fair

The Bristol Bacon Hog Fair will be held on Friday, Nov. 2nd. The Dominion Live Stock Branch and the Provincial Department of Agriculture, on the fulfilling of certain regulations, will contribute $100. to encourage production of bacon hogs throughout this district.

It is urged that every prospective exhibitor fit their hogs for market with as much bacon type as possible, and the desired amount of finish and weight.

Programmes of the Fair are now being printed and will be distributed when available. Any further information relative to the Fair at Bristol will be gladly furnished on request to Mr. T. E. McOuat, at Campbells Bay, or G. T. Drummond, of Bristol.

Have your portrait taken on your birthday. We enhance the beauty of our prints by encasing them in ultrafine folders.

Story of Roman Occupation Recalled at Scots Ceremony

Memorial Unveiled on Site of Fort and Camp of Trimontium, Regarded as Largest Permanent Stronghold of Kind in Britain

Edinburgh.—A memorial stone was unveiled recently at Newstead, near Melrose, to mark the site of the Roman fort and camp Trimontium, the largest permanent stronghold of its kind which has been found in Great Britain. The camp was established by Agricola about 80 A.D., and Newstead village is said to be the oldest inhabited village in Scotland. The surrounding country is pastorally beautiful, the Tweed winding past on the north, while to the south are the Eidon Hills.

The memorial-stands in an alcove on the south side of the road between Melrose and Earlston and about a mile and a half east of Melrose. The Earl of Home presided at the opening ceremony and Dr. James Curle superintended the excavations, which were carried out by the Society of Antiquaries between 1905 and 1910, and is the author of that monumental book. "A Roman Frontier Post and Its People."

Trace Outline of Fort

After removing the Union Jack, with which the stone was draped, Dr. Curle said that when they began to dig there in 1905 the fields had been furrowed by the plow for centuries. There was nothing to suggest, even to the trained observer, that the ground had ever been the scene of military occupation, or that there stood there a Roman fort of unusually large dimensions. All they knew of the site was that there lingered about it the tradition of coins and of altars found and of a pit discovered where now the railway runs.

When the digging came to a close in 1910 the site had responded to their somewhat imperfect questioning and had revealed to them not a little of its secret. They were able to trace the outline of the fort, its lines of ditches, its enclosing walls; to plan its central headquarters building, flanked by storehouses, its long line of barracks, the baths which stood outside the walls, and the annexes occupied perhaps by traders, by veterans or by Caledonians held in subjection. They were able in a measure to reconstruct Trimontium, the site to which the soldiers marching from the south were guided by the triple peaks of Eildon.

The plan of a Roman fort was somewhat stereotyped, and not a few sites exhibited parallels to the planning of Newstead, but he thought it could fairly be claimed that no site in Britain had brought them more clearly into touch with the men who formed its garrison, or had suggested more clearly the tragic happenings which more than once brought its occupation to a close.

Tribute to Dr. Curle

The monument which he had had the honor to unveil reproduced, in form at least, the altar which Gaius Arrius Domitianus, the centurion of the Twentieth Legion, dedicated there to Jupiter on these fields some 1800 years ago.

Dr. George Macdonald, in paying a striking tribute to the remarkable work of Dr. Curle, said that through his admirable researches they had been able to recover the outlines of Trimontium's trouble life. About 100 years separated its first foundation from its final abandonment. In the interval it suffered many vicissitudes. When Trimontium was evacuated for the last time it was because the Caledonians had made good their claim to independence. The stone, however, was not a war memorial in the ordinary sense of the term. The events to which it related had long passed into the domain of history. The monument was historical and it was historical in two distinct ways. In the first place the spot it marked played a conspicuous part in the Roman endeavor to subjugate their country. In the second, the exploration of that spot formed a notable landmark in the study of Roman Britain.

A Good Idea of the Florida Storm

FLORIDA SUFFERING GROWS AS DEATH'S TOLL FROM HURRICANE MOUNTS

A schooner that was blown ashore near West Palm Beach by force of the terrific wind. It is estimated that the number of persons who lost their lives in the hurricane is over 700 and the property damage runs into many millions of dollars in Florida alone. Porto Rico and West Indian losses bring the total into the thousands.

Uneasy Lies Head of New King

Plot is Discovered and the New King Zogu is Barricaded in Palace

ELEVEN EXECUTIONS

Vienna, Oct. 1.—King Zogu, recently elected monarch of the Albanians, is closely guarded in his palace at Tirana, while trusted Albanian and Italian police agents are trying to round up plotters against the new regime, say uncensored dispatches which have just leaked over the border of the mountain kingdom.

The dispatches describe the country as being in a state of alarm, which in some places approaches terror. They state that eleven persons were executed yesterday at Durazzo, and that 200 others were arrested there at the command of Zogu himself. The executions are said to have taken place in the market space of the dilapidated sea port, which is only 25 miles west of the capital.

The movement against the throne is reported to be widespread. The fact that it has reached Durazzo is taken as confirmation of this because the entire situation is said to be an outgrowth of an uprising which started a few weeks ago in the mountains of Northern Albania. That uprising had its birth in the murder of one of the most conspicuous of the mountain chieftains, who was found dead in bed. His followers attributed the assassination to men hired by the new king, and they declared a blood feud against the monarch.

REFUSE TO ACCEPT ZOGU

A full regiment was sent into the northern mountains, but reports have it that two divisions of troops have now been mobilized because a majority of the northern Albanians refuse to accept Zogu as king. Most of the northerners are Roman Catholic Christians, while Zogu is a Mohammedan. Thus far nothing has come through to indicate that the Greek Orthodox Christians in Southern Albania have a mind to join their co-religionists of the north, but some observers here are predicting the possibility of rebellious outbreaks in that region also.

Because of the turbulent conditions of the country, it is stated that his coronation probably will be postponed indefinitely.

Gatineau Power Paugan Plant Start Monday

International Paper Subsidiary to Deliver 80,000 H.P. to Ontario Hydro-Electric

One of the continent's largest hydro-electric power plants commenced operations Monday when the Paugan, Quebec, station of the Gatineau Power Co., a subsidiary of International Power Co., started delivery of 80,000 horsepower of electric energy to the Hydro Electric Power Commission of Ontario. A 220,---volt transmission line will carry the power 260 miles, from which point it will be distributed by the commission in the Toronto area to supplement the power now supplied from Niagara Falls.

Opening of the Paugan plant, with an initial installation of 204,000 horse power, marks the completion of the first stage in the development of the power resources of the Gatineau River by the Gatineau Power Company.

There are two other power houses on the river which have been in operation a year, which have a capacity of 232,000 horse power installed and in process of installation, making a total of 436,000 horse power for the three plants.

Has Storage Reservoir

Above them the company has constructed a dam, which creates one of the largest artificial storage reservoirs in the world. The dam backs the river up a distance of thirty miles, submerging nine falls and rapids and creating a maximum head of 140 feet. Including bulkheads, the main dam is 917 feet long and its maximum height is 150 feet. The east suice dam has a length of 570 feet, including bulkheads, and its maximum height is fifty feet.

Twenty-six miles below Paugan is the new Chelsea hydro-electric plant of Gatineau Power Co., and a mile below Chelsea, the Farmers station has been in operation for a year. With the operation of the three developments combined into a single system, Gattineau Power Co. is utilizing to the best advantage the total fall in the Batineau River for a distance of sixty-two miles from its mouth and is developing about two-thirds of the available head on the whole river. All the remaining head which can be developed economically is controlled by the company.

Smuts Discusses Succession Issue

Says Country Would Not Be Safe Without Fleet

Cape Town, South Africa—Speaking to an audience which was predominantly of Dutch origin, Gen. Jan Christian Smuts, leader of the Opposition in the Assembly, was vigorously applauded in a memorable speech on the secession question.

General Smuts at one point in his address declared: "If we were not within the Empire we would have to search for other friends. We would have to go to America or France or some other big country to protect us because we are not safe. One warship could bring us to our knees. But to-day we are not cornered in a kraal, but we are in a friendly circle with a powerful British fleet to help us if any injustice is planned toward us.

"We need not spend millions on a fleet," Gen. Smuts continued, "but can concentrate on projects of develpoment so necessary to a young country. The British Empire is not a bond tying us, but is a helping hand.

"There is a great deal of talk about sovereign independence, but not of independence within the Empire. No mention is made of the fact, according to the report of the Imperial conference, that the Empire is a commonwealth for mutual help and support. In one sense we are free to do as we like. Our independence is there but it is independence within a friendly circle.

"We are friends, helping one another, remaining true to each other in days of danger. If South Africa can be neutral, England can be neutral also ad then the commonwealth is worth nothing. The doctrine of neutrality is not in the interests of South Africa. Other nations will not acknowledge our neurality if we allow the British fleet to leave Simonstown."

Hungary Offering Prizes For the Largest Families

Budapest—A department for large families has been created in pursuance with the Government's scheme of increasing the population.

Gold medals, certificates and gifts of money will be given to the mothers of the largest Hungarian families. Admiral Horthy has accepted the Honorary Chairmanship of the movement.

A prize was awarded to a peasant woman, the mother of twenty-seven children. Lectures on birth control are strictly prohibited and Government emissaries will tour the rural districts lecturing on the benefits of increased births. Hungary expects in this way to make up the loss in population of which she has been deprived under the Treaty of Trianon.

An October brain-twister: What would a modern druggist consider a side-line?

If you would be really happy, live as if there were no laws and no neighbors.

Generosity and Sportmanship

The outcome of the Wrigley Canadian National Exhibition swim was a keen disappointment to Canadians. Lake Ontario took a hand in the contest and defeated every one of the two hundred swimming gladiators who entered the contest.

The $35,00 prize money, according to the rules that governed the contest, was left in the hands of the donors—the Wm. Wrigley, Jr., Company and the Canadian National Exhibition.

These two great organizations gave a demonstration of generosity and sportsmanship rarely seen on this old earth in deciding to divide up the money among the fourteen who swam the furthest and made the best time. Each of them received $2,500.00.

No group of individuals living can please everyone, and naturally both among the contestants and the public many were loud in their protestaions of the manner in which the $35,000 was divided. Apparently they entirely overlooked the fact that every dollar given was a gift, as none of the contestants had completed the swim. We believe, therefore, we are expressing the views of the public generally when we sate the dividing of the purse was a wonderful demonstration of generosity and sportsmanship.

It did not end here, for along came Mr. Allan Ross, of the Wrigley Company, with a further demonstration of generosity and sportsmanship "that will make the world sit up and take notice." Mr. Ross and the Wrigley Company augmented the gifts of four of the contestants by giving them $2,000 each and one of them $1,000. Hats off and three rousing cheers for Mr. Ross and the Wrigley Company!

No wonder Canadians are proud of their country, their citizens, and the business institutions of Canada. "The Labor Leader" joins with Canadians generally in congratulations for this remarkable demonstration of generosity and sportsmanship and challenge any other country to "show us" where they can equal it.—Toronto Labor Leader.

I feel that an overdone of sport is responsible for many of the pale faces and stooping backs I have noticed in London.—Leon Daudet.

The obvious, the self-evident and the commonplace are by their very nature the most apt to be overlooked and forgotten.—H. P. Macmillan.

Rural Britain to Be Preserved From Vandals

Beautiful Landscapes to Be Under Protection of Local Committees

London.—It is proposed to establish a Devon and Cornwall branch of the Council for the Preservation of Rural England, of which Lord Crawford is president, and Prof. Patrick Abercrombie, the Liverpool regional planner, the honorary secretary. Lord Astor, who has for so long been closely associated with the town of Plymouth, is taking an interest in the movement. Already on parts of the coast, as, for example, at Duporth, disorderly development is ruining beautiful landscapes. In some cases ugly hotels have been erected, disfiguring the profile of the coast, where the essential part of the natural charm is its remoteness.

The threatened spoiling of Dartmoor and South Devonshire is, of course, the result of the masses of English people being able to move out so easily and cheaply from the town into the country. But the very ease of the this mass movement increases the value of the natural beauties of the countryside and makes it the more imperative to take action, so as to keep certain areas free from buildings.

Already valuable work on these lines is being carried out by the Thames Valley Branch, of which Lord Astor is chairman, and in East Kent by a committee initiated by the Archbishop of Canterbury.

The first step is always to make a survey of an area and to prepare an outline scheme of development. In this general plan are clearly marked possible new roads and land that should be kept open. The committee for Cornwall and Devon, when it is formed, will also no doubt pay special attention to old bridges, the preservation of the character of old highways and of ancient buildings. Advertisements and petrol filling stations are also to be controlled.

If peace and reason are good things in the international field, it is absurd to pretend that there is not exact parallel in the industrial field. —J. H. Thomas.

From Laborer to Landowner in One Season

Harvesters Pool Savings and Buy Quarter Section Farm in Manitoba—Chums From Durham, England, Work Their Way Up—Family of One and Sweetheart of the Other Will Come to Canada.

Winnipeg, Oct. 1.—Two British harvesters who came to Canada six weeks ago have adopted the Dominion as their home and will remain in Western Canada as farm owners, having bought a section of land with the proceeds earned while working in the harvest fields.

The men are Jack Wilson and Fred Wells, both of Durham, England. They accomplished the jump from harvest hand to farm owner by pooling their money earned while harvesting and buying a quarter section of land from the farmer for whom Wilson had worked. The men had $225 apiece, and the sum needed to procure the land was $450. They immediately gave their wages to the farmer and now Wilson is leaving for England to bring back his family and Wells' sweetheart, and will settle down in Canada to become Canadian citizens.

Another British harvested, Thomas Hamilton, who is returning home after working in the harvest fields of the West, plans to return in the spring to work as a regular farm hand and to ultimately become 'a Western farmer on his own."

"Treat the farmer right and he'll treat you right," declared Hamilton who also stated that he was much surprised when the farmer he worked for drove him thirty miles to a dance."

The Ferguson Government is five years old and, in the words of the Hon. W. N. Sinclair, "it is some husky youngster.",

Because Willie was told by daddy to always take his little sister's part, he ate her share of the candy.

The modern girl leaves nothing to the imagination. Which is a slam at all things artistic. Whither are we drifting?

Commission Will Return to India

Greatest Unanimity Exists Among Members, Says Chairman

London—Sir John Simon, in a speech at a luncheon at the Aldwych Club, referred to the work of his commission which leaves for India for its second visit. The commission was appointed by the British Government to study conditions in India with a view to recommending to what further extent self-rule can be granted. The commission spent three months in India last spring.

Sir John emphasized the immense responsibilities of the British Parliament to the peoples of India. Despite the initial boycott, eight of the nine provinces had decided to co-operate with the commission. The ninth had not yet finally decided its attitude.

The Central Indian committee chosen partly by he Council of States and partly nominated from the Central Legislature of India by the Viceroy, expected to accompany the commission through the provinces on the forthcoming visit, Sir John continued.

The Speaker said about five hundred memoranda have been received by the commission from all sorts of bodies in India and elsewhere, giving their views on the existing Indian constitution.

The greatest unanimity existed within the commission, Sir John emphasized.

Hawaii Sets Wolrd's Record For Per Capita Use of Sugar

Canning of Hawaiian pineapple continues to require the greatest proportionate amount of sugar used anywhere in the world, according to the ninth annual edition of Farr & Co.'s manual of sugar companies. With a population of 330,000, Hawaii last year consumed 33,000 tons of sugar, or 200.4 pounds per capita. With a world population of 1,680,090,000, consumption of sugar totalled 24,139,200 tons.

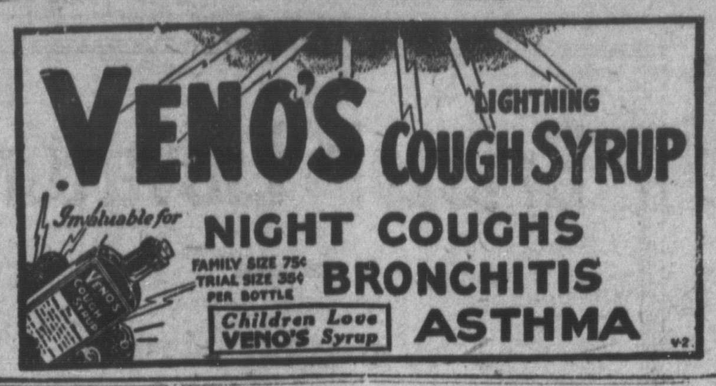
The United States, with its 118,600,000 inhabitants, last year consumed 5,885,500 tons of sugar, the largest amount taken by any one country, an average per capita consumption of 112.21 pounds. China, with a population of 400,000,000, used only 790,000 tons of sugar, a per capita consumption of 4.19 pounds for the year.

Hard work is more fun than hard times.

You must not judge the people by me. I am below the average.—Professor William Lyon Phelps.

Some people turn up their sleeves whenever there is work about; others turn up their noses.

Courtesy is the lubricant that quite often eases the bearings of the ever bearing.



FINANCIAL NEWS

MOND NICKEL.

A despatch from Sudbury states that the Mond Nickel Co.'s smelter at Coniston is at present handling 2,000 tons of ore per day. This exceeds the original estimated capacity by 500 tons. The matte output is said to represent two-and-one-half million pounds of copper and the same amount of nickel each month. This is in addition to appreciable precious metals values.

AMULET AND NORANDA STATEMENTS.

Erratic movements in Amulet and Noranda followed the publication of official statements regarding latest develoments at the mines and immediate plans.

Noranda's report was two-sided. Aggressive expansion plans reflected the confidence of the management in the future of the enterprise, but the indication that narrower and lower grade ore lay below the 1,000-ft. level and the "H" ore body was not so good. It appears characteristic of the Quebec area that ore lenses are alternately rich and lean as they go down.

Amulet report appeared favorable from the two main standpoints. Installations for production will go forward immediately, while developments since the annual report was published from ore viewpoint have been favorable.

RED LAKE STRIKE.

We announce further particulars of a sensational new strike at Red Lake which is said to be the most spectacular of the district. The find consists of a dome of quartz, 700 by 350 feet, which raises approximately 60 feet above the level of the lake. Three distinct veins are contained in this showing and these have been traced for lengths of 700 to 900 feet. Samples of this ore shown in Toronto are the most spectacular since the days of the old Croesus.

MURPHY MINES

The No. 2 shaft at the Murphy property, which is being sunk on the No. 5 vein which was found on the recently acquired claims, is now down 30 feet, on its way to 100 feet. The workings are said to be still in commercial ore and that values are improving. This vein is known to be at least 40 feet wide but its entire width will be determined by a cross-cut at the 100-foot level.

McINTYRE.

The future of McIntyre-Porcupine Mines is alluring according to the staff correspondent of the Wall Street Journal after a visit to Porcupine.

McIntyre Porcupine has the continuation of whatever ore bodies form on the top side of the main intrusion at depth. With a shaft 4,125 feet deep sunk and equipped for developing new ore-areas at depth, and with one of its veins shown to be carrying good ore on the 3,875 foot level, the outlook for McIntyre is excellent and not improbably within another year the property will be building a new mill with larger capacity than the present. On the whole, with much ore left in its older or western ore-area, the outlook at McIntyre is quite encouraging.

McIntyre has kept its development and prospecting of outlying possibilities well ahead of stoping so as to avoid exhaustion of the possibilities of one main ore-area before a new one has been found, and its prospecting begun. A dividend of $2.20 per share is expected this year.

NEW RECORDS AHEAD FOR FORD OF CANADA

Ford, Ont.—August production of Ford Motors Co. of Canada, totaled 13,045 cars, an average of 541 cars a day for the 24 working days of the month. In August, 1927, the Ford plant was not operating, and the other Canadian motor companies turned out a total of 12,526 cars, or less than the Ford total for August this year.

Cars sales in Ontario during June and July give the new Ford 1,000 cars majority over its nearest competitor. "Present schedules indicate we will continue to exceed our former peak production throughout the balance of the year," says W. R. Campbell, vice-president and treasurer.

A danger sign can't talk. But it's not so dumb as the fellow who disregards it.

Badminton players find a drink of hot tea of great benefit after a strenuous game. In leading Badminton clubs of Canada, Red Rose Tea is a great favorite. No other tea offers such brisk, zestful flavor and rich quality. Put up only in bright, clean aluminum packages. 14EW

It May Be *Urgent*

When *your* Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant or babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

DON'T DO THIS!

LEONARD EAR OIL

Improves Hearing, Relieves Head Noises

Nine out of ten cases of DEAFNESS and HEAD NOISES are caused by catarrhal mucus (matter) in the Eustachian Tubes, which connects the nose and the ears. Leonard Ear Oil removes the MUCUS, OPENS UP THE TUBE and THE OTHER AIR PASSAGES OF THE HEAD, and the result is improved Hearing and relief from Head Noises. It is not put in the ears, but is "INSERTED IN THE NOSTRILS" and "RUBBED in BACK OF THE EARS" and special instructions by a noted Ear Specialist in each package for different kinds of Deafness and Head Noises tell you exactly how to take care of your own case. Leonard Ear Oil is not an experiment but has had a very large and constantly growing sale since 1907, and every year it has relieved thousands of people of their Ear Troubles. No matter how long you have been deaf, nor how deaf you are, or what caused your deafness, or how many things you have already tried which have failed to relieve you, Leonard Ear Oil has relieved many such cases as your own. Why not you? The price is $1.25. Leonard Ear Oil is for sale at Druggists, or direct postpaid upon receipt of price.

Hunting Season Promises Much

Nimrods with their minds directed to the North Woods for their annual hunt will find occasion for a display of optimism after learning the latest reports made by guides and outfitters who have gone into the hunting districts they control for the purpose of determining the number and distribution of game it contains. Ontario and Quebec both hold out strong inducements. In the region of Metagama there is an excellent supply of moose, as well as in the hunting grounds near Rideout. Kipawa reports plenty of deer and moose, especially in the Sasseganaga region. Long inland water routes from Angliers, Que., provide unusual opportunities for those interested in calling or still hunting.

Appearances Count

Now Helen is a girl who wonders why men don't like her, and yet who seems to think they should gravitate towards her without any attraction whatever.

I don't mean that men dislike her—I am taking Helen as being representative of many—I just mean that somehow she doesn't get her company sought for for dinners, dances and suchlike frivolous affairs.

But her appearance! Well, Helen might tell you that she wanted a man to love her for herself alone, but these days there has got to be something to attract a man's interest—a nice manner, good looks, smartness—before it is riveted by a praiseworthy character.

It is "too much fag" for Helen to have her hair curled. Yes, she knows she is fat, but she is meant to be that way. It is "too much fag" to have a cold-water rub-down every day, but, she can spare time to simmer for hours each night in a hot bath; it's another "fag" to drink a glass of lemon-water each night before turning out the light, yet she makes a practice always of drinking a glass of hot milk. She can't be bothered to alter such a small item—yet it's a large one—measured in terms of avoirdupois.

One day I took brother Bill to see Helen, and, because Helen knew he was engaged and therefore ineligible, she was most indifferently dressed, and hardly bothered to be polite. And Bill, who had vaguely promised me to "see what he could do," for her in the matter of dance-partners, promptly cried off, and told me he couldn't "inflict that" on any of his pals.

But what can you do? These girls have it firmly fixed in their own minds that somehow, sometime, Fate will send them the man she is reserving for them, and so they delude themselves that appearance doesn't count.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Using Detached Grapes

One of the best ways to utilize detached grapes that are often found loose in the bottom of a grape basket is to serve them as one does olives, radishes and other relishes. They may be set in a bed of chopped ice in a small glass dish or occupy one of the divisions of an assorted relish dish. If the grapes are large and handsome, and of varied colors, this novel way of using them is sure to attract attention and admiration from one's guests who see it for the first time. Such a dish is as suited to the breakfast table as to any other meal, and, though it does not take the place of the regular morning fruit course, it provides an attractive addition to it. At a luncheon or dinner these dishes may occupy the corners of the table, and the contents are picked up casually and eaten as one would salted nuts or olives. The colored glass dishes so much in vogue now are especially lovely for serving grapes in this way, or in small clippings from a large cluster. Pale green grapes in pink or orchid glass make a good combination of color; rich purple grapes in pink or orchid glass make a good combination of color; rich purple grapes are delightful in a dish of light green.

Veterinaries use Minard's Liniment.

WEAK AND NERVOUS

A Condition Always Due to Thin, Watery Blood.

Thin blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following case will interest those who need a tonic for the blood and nerves. Mrs. D. Veno, Union Spuare, N.S., says:—"With a feeling of gratitude I write to tell you what Dr. Williams' Pink Pills did for me. I had become badly run down, and reached the stage when I could not do my housework. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got a few boxes of these and soon there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I hope some other weak, nervous person will be benefitted by my experience."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

She: Jack has acute indigestion.
He: He has a cute sister, too.

An old man was standing on the curb playing a one-string fiddle outside a Ludgate Hill shop. An acquaintance came up. "Watcher doin' down 'ere, Bill? I thought yer worked the West-end?" "Not now I give that to me son-in-law as a weddin' present."

Minard's Liniment for aching joints.

If Commander Byrd takes a lesson from the Nobile Expedition he'll carry his rescue party right along with him when he starts for the South Pole.

OWL LAFFS BY O.W.L. (ON WITH LAUGHTER)

AN ERROR

An Ontario farmer purchased a purebred pig from a raiser of fancy hogs. The pig and bill arrived the same day. Next day the dissatisfied farmer wrote to the hog raiser as follows:

"Dear Sir: Both pig and bill arrived safely. Judging from their comparative size, you made an error in shipping. You should have sent the bill by express and the pig by mail."

First Mother: "Did your boy win many prizes at college?"

Second Mother (proudly): "He was presented with bath towels by forty different hotels."

The Hollanders have offered to sell three rare narcissus bulbs to the United States for $700. It really is refreshing to see money go for something besides prize fights and motor-cars—but then the offer has not been accepted.

Mistress: "Let me see! What's your name?"

New Help: "Minnie, mum."

Mistress: "Well, Minimum, if you'll only do the maximum of work, we'll get along nicely."

Life grows harder and harder. Now that poker profits have been ruled to be taxable, a fellow has to be mighty careful how he lies about his winnings.

BETWEEN THE LINES

Of course, you've heard the following joke? Well, then, in that case we'll just leave a blank space, and save time and ink by not publishing it:

The modern kitchenette has every built-in necessity except a cabinet for indigestion tablets.

Riblet: "When can I expect the return of the golf club I loaned you?"

Shasberger: "Always, my boy, always."

Darling: "Mamma, I have a surprise for you."

Mother: "Yes, darling; what is it?"

Darling: "I've swallowed a nail."

THESE SUPERSANE DAYS

I pity so the modern kid
Who don't do what we used to did.
The parents know so doggoned much
Of what they should and shouldn't touch,
The little beggars have no fun
In doin' what we used to done.
Their parents, to a gnat's heel, know
Just what will make them thrive and grow;
They treat their little Jane and Ralphy
Like they was turnips or alfalfy!
They aren't allowed to nose around
To see what knick-knacks might be found
In cooky jar or Kelvinator—
A pretzel or a cold pertator.
But they are nourished a la science
With every new approved appliance.
They have their doses fixed by measure
And do not get to eat for pleasure!
Some quite grow up, for goodness sake,
And never know the belly ache!
Not knowing that, how can they know
Its aftermath's effulgent glow—
The sweetest thing one knows for certain
Is stomach ache that's just hurtin'.

Saving for a rainy day is a dry subject for the spendthrift.

Maybe the old cow crossed the road to get a better view of high-priced feed.

Children should be scenery and not heard.

The Right Word

Dr. Doddridge, the hymn writer, was one day walking, his heart very desolate within him. But, passing a cottage door, he happened at that moment to hear a child reading aloud the text, "As thy days, so shall thy strength be."

The cheering effect on his mind, he says, was indescribable. It was like life from the dead.

Much is often done by a word.

—Ethel Wayne.

"Tall people are more apt to sneer than short ones," says an author. That's because they are big enough to belittle.

Exercise

You need a cool and soothing rub down with Minard's Liniment after any form of exercise.

MINARD'S "KING OF PAIN" LINIMENT

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE EQUITY.

SHAWVILLE, OCT. 18, 1928

P. M. G. VENOIT OVERRULES COMMISSION

Here is a morsel of political partisanship that every one should know about:

Some time ago the postmastership of the town of Simcoe, Ont., became vacant.

A veteran of the Great War named Whittaker, who had lost both legs in the service of his country, was recommended for the position and his case having been looked into by the C. S. Commission, he was adjuged duly qualified by that body for the job, and practically appointed to it. All that remainded was that he would receive official notification when his duties were to commence. But this notificarion never came. Local Liberal wire-pullers got the ear of the political Postmaster General, Mr. Peter Venoit, and he promptly refused to confirm the appointment of the legless veteran Whittaker, and instead awarded the post to a political heeler, thus doing a gross injustice to a deserving claimant, and also over-ruling the decision of the C. S. Commiseion, whose office is to recommend all appointments to the Service.

The Toronto Globe, leading Liberal newspaper of Ontario, considers Venoit's action utterly indefensible and is very outspoken in condemnation of it.

Bristol Public Schools

Bristol, September 27, 1928.

Bristol Pubiic School Commissioners met on the above date.

Present: Chairman Woods and Commissioners Graham and McNeill.

The minutes of last meeting were read and adopted on motion Com'r McNeill.

The auditor's report for 1927-28, also the report of the re-audit for 1926-27 were read and, on motion of Com'r Graham, were adopted.

Motion—Com'r McNeill—That this Board levy a rate of 9 mills on the dollar on all taxable property under the control of this School Board, and 10 cents per month on all children between the ages of 7 and 14 years; also a fee of $2.00 per month on children of taxpayers while attending the Intermediate School, and $4.00 per month for all other children who attend the Intermediate School.—Carried.

Motion—Com'r Graham—That a discount of 5 per cent be allowed on all taxes paid before the 31st December, 1928.—Carried.

Motion—Com'r McNeill—That the following bills be approved and paid:

Geo Keon, paint and oil No. 10,	$15.80
H. I. Smith, telegrams to teachers,	2.25
J. Millar, work & supplies No. 5,	16.84
Montreal Star, ad. for teachers,	3.12
J. Lucas, work on floor and sills School No. 3,	30.00
R. G. Hodgins, lumber, etc., No. 3,	38.56
T. E. McOuat, grant to School Fair,	40.00

Motion—Com'r Graham—That the Sec.-Treasurer order the books required by the teachers of No. 9 School.

Motion—Com'r McNelll—That this Board do now adjourn.

H. I. SMITH,
Sec.-Treas.

Minutes of Council Onslow North

Adjourned session of the Municipal Council of Onslow North, held on the sixth day of October, 1928.

Present: John J. O'Donnell, Mayor, and Councillors Steele, Farrell, Woolsey.

Motion—Crs. Steele-Woolsey—That the minutes of June 5th, 1928, June 30th, 1928 and Sept 4th, 1928, as read be adopted—Carried.

Motion—Crs. Farrell-Woolsey—That James Hart, road foreman, allow C. Dolan $2.00 for labor performed on road in 1928.—Carried.

Motion—Crs. Farrell-Steele—That the following accounts be paid:

James Hart, repairing grader,	$ 2.50
" " services as foreman, September 22, 1928,	30.10
J. A. Cowan, receipt forms,	3.00
D. Leguerier, notary, discharge of bond,	13.00
J. Armitage, road foreman, labor on Mine Road,	7.55

Motion—Crs. Woolsey-Steele—That the Voters' List be taken up for revisal.—Carried.

Motion—Crs. Steele-Farrell—That James McLaughlin's name be struck from No. 1 division, and Gordon Howard and Wm O'Reilly be added thereto, and the Voters' List be homologated as it now reads.—Carried.

Motion—Farrell-Steele—That this Council do now adjourn.—Carried.

ANDREW FARRELL,
See.-Treas.

A thunder storm such as passed over this section last Thursday morning, coming thus late in the year, was regarded as a pretty sure sign fifty years ago that a long, open Fall would ensue. But these days it would not be safe to set much store upon what was the rule in by gone days. But let us hope!

Lunch In an Organ.

A luncheon party of twenty men inside an organ would seem impossible, yet this happened lately in the swell-box of the great organ at the Royal Albert Hall, London, beneath its 13,000 pipes and amid a storm of music.

The guests had gone to be shown some of the intricacies of this wonderful instrument, which is soon to have added to it a solo organ with several thousand new pipes. It will then be the largest concert organ in the world.

Snapping the South Pole.

Photography is to play an important part in the South Polar flight to be made by Commander Byrd. Two special automatic cameras are being constructed, one to take pictures of the sun as an aid to navigation, and the other to record each mile of the flight.

While the flight is in progress the first camera will automatically develop and deliver strips of film. The second camera will be attached to the bottom of the plane and will follow the path to the Pole, recording from a height of 5,000 feet, a strip of the Polar plateau eight miles in width.

BATTLE DRUMS

Origin of Instrument Lost In Mists of Antiquity—Used as Early as 1333—No Longer In Favor.

The drum is a musical instrument of great antiquity. In fact, says the Pathfinder, it is of such ancient origin that its inventor is unknown. However, Bacchus, the Roman god of wine and of the vintage, promoter of civilization, lawgiver and lover of peace, is said to have been the inventor of the old instrument.

It is known that drums of all kinds were popular in the most ancient civilizations. Representations of various types of this instrument have been found on monuments and paintings in Egypt, Assyria, India and Persia. Perhaps the first soldiers to march to the beat of the drums were the janizaries, the renegade Christians in the service of the Turks. At any rate, drums were used in the battle of Halidon Hill in 1333.

Originally drummers were gorgeously bedizened negroes. The last of these is said to have been John Baptist, of the Scots Guards, who did not disappear until about the time of the Crimean War. Even to-day we find traces of the negroes in the leopard skin and the flourishes of the bandmaster's staff and the stick of the man pounding the big drum.

Tympanums, or kettledrums, were in use among the Greeks and Romans and were introduced into western Europe through the Roman civilization. Some writers claim that drums were introduced by the Crusaders, but the instrument was known in England long before the crusades. Drums were not used in the British army, however, until the sixteenth century. Until the reign of Elizabeth the instrument was much larger than it is now and was held horizontally and beaten on one head only. Likewise it is not known at what date the snaredrum made its appearance. An instrument of this type belonging to the ancient Egyptians was found in the excavation at Thebes in 1823. The Spanish conqueror is said to have found drums in South American temples.

Besides being ancient, the history of the drum is honorable. We are told that the snakes of Ireland fled from the Emerald Isle before the drum-beats of St. Patrick. The Puritans of New England used the drum as a church bell. The drum also figured prominently and romantically all through our revolutionary and civil wars. Now, however, the drum has fallen into bad graces in a number of places and its doom is threatened. Although it is hard for us to imagine a military band without a single drum, its days in such bands are likely numbered.

A few years ago the French Government, acting upon the recommendation embodied in a report made by a committee of generals in its army, decided that the drum must go. The report, it is said, asserted that the drum was a serious incumbrance in marching, that rain impaired its usefulness, that its calls were indistinguishable in battle, that it consumed a period of two years to turn out an efficient drummer and that by abandoning the use of the drum many thousands of youths and men would be released for active service. Since then a number of European powers that maintained drum corps have followed the example of the French.

It is interesting to note that the famous drum of the great sea-fighter, Sir Francis Drake, was his constant companion throughout his career. On it he beat the signals on his flagship when he scattered the Spanish Armada. It went with him on the first British ship that ever went around the world, and it sounded taps when, after his death in the West Indies, his body was committed to the waters of the Atlantic Ocean.

5 REASONS WHY THE COMBINED POLICY

Fills the varied Insurance needs of the majority of men with One Policy, by combining the features of Ordinary Life and Endowment in an original and unique way:

1ST.—SMALL PREMIUM DEPOSITS—
I can carry enough life insurance without straining my income.

2ND.—ENDOWMENT AGE 50, 55, or 60—
My comfort and independence in later life are provided for in this policy.

3RD.—CASH DIVIDENDS AND HIGH VALUES—
The cash values are remarkably high.

4TH.—MONTHLY INCOME IF DISABLED—
As well as my premiums being paid for me.

5TH.—DOUBLE BENEFITS—
In case of accidental death the face value of my policy is doubled

DEATHS

The Late Mrs. O. Cuthbertson

Another of the pioneer residents of Bristol, of which there are very few left now, passed away on Sunday, Sept. 23rd, in the person of Elizabeth Reid Anderson, widow of the late Oswald Cuthertson, in her 96th year.

She was born in Bristol, Sept. 14th, 1833. She was a pupil in the first school-house in the Township, situated on what was then known as John Young's hill, where the late Mr. Wm. Ramsay was her teacher, and under his instruction she was taught the Psalms and Paraphrases, which she had never forgotten.

She was united in marriage to the late Oswald Cuthbertson, on Sept. 9th, 1856, by Rev. D. Wardrope, and came to live on the farm where she died.

She was a kind and most devoted mother in her home and to her family.

There remain to mourn the loss of a true mother, five daughters, namely:—Mrs. Charlette Trowse, Arnprior; Mrs. Jos. and Mrs. Wm. G. Campbell, Green Bay, Wis.; Mrs. John Gordon, Elmside, and Miss Bella, at home; also one son, R. J., with whom she resided.

The service was conducted at the house by the Rev. Mr. Smith, assisted by the Rev. Mr. Black, of Ottawa. Interment was made at Norway Bay, a large cortege of friends and neighbors following the remains to their last resting place. The casket was adorned with many beautiful flowers.

The pall-bearers were:—Messrs. H. G. Young, Andrew and J. D. Russell, O. Bertland Cuthbertson, Wm. Cameron and W. D. McCredie, of Ottawa.—Com.

COUNTESS AMONG CANNIBALS

Her Weird "Wedding" to Ruffian of Southern Seas—English Clown Performed the Ceremony.

"And you think that a pretty woman, alone and unarmed, could venture into the remotest corners of the earth and live in the jungle haunts of primitive men without coming to grief?"

The duchess, a leader of Parisian society, chuckled, but the face of the Countess Titayna did not flinch. "I will prove it can be done," she announced. "In a year's time I shall be back here in Paris and let you judge for yourselves. I shall sail from Marseilles as the only woman on a French schooner, and go by way of the Panama Canal to the Pacific. I shall take my chance with the Fiji Islanders, the head-hunters of Sumatra, fanatical jungle men of Cochin China, and the rascals of Polynesia."

That was a year ago. Titayna, as the young Countess du Caylar-Toiras is known, has kept her promise and won her bet, says an article in Tit-Bits.

"My worst experience was aboard a Polynesian convict ship," she said: "The ship was manned by about twenty vicious-looking convicts who were not allowed to set foot on land.

"No sooner were we clear of Papeete than I began to feel anxious. The only decent fellow was the cook, it seemed to me. Vana was thirty, lithe and strong as a panther, and had been sentenced to four years for killing a man who refused to exchange wives with him.

"I played cards with the crew and had all of them subdued except a murderer named Gham, who one night, about 3 a.m., crawled toward me. I gave him a cigarette and tried in vain to get him into conversation. I might as well have tried to caress an angry cobra. I had bought a small automatic at Papeete, but with a sweep of his fist he knocked it from my hand. Then the unexpected happened. From behind a pile of boxes another man jumped up. It was Vana. In a moment the two men were wrestling on the deck — then there was silence. Gham lay dead at my feet.

"'I must save myself by swimming,' he said.

"I knew it was reckless for me to remain on the ship, so I jumped with him, and it was more than an hour before we reached a palm-fringed island.

"'This is the island of Vanavana,' said my guide. 'My ancestors were great in these forests, and I have hidden twenty times as many pearls as you can count on your fingers. They will be yours.'

"Then Vana called a man from one of the huts. We was white, and spoke French with an English accent. Vana told him to marry us according to Western law. He made us hold hands and mumbled something in his funny French.

"'I will bring the pearls now,' said Vana, and when he had gone I handed a purse to the preacher, telling him I must get to Tahiti. 'Come now, be quick,' I added, in English.

"My boy will take you to Tematangi,' he said, and a little later I was in the canoe with a boy.

"'Good-bye, madam,' the strange man said, 'and don't worry. I'm no preacher.'

"'But who are you?'

"I look of sadness passed over his face. "I've been marrying people for sixteen years on this island,' he said. 'I am an Englishman, and used to be a clown in a circus'."

Positive Proof.

A lady is said to have remarked to Lord Chesterfield that the French were more polite than the English. The lord did not agree.

"But," said the lady, "the English themselves admit it."

"That," replied Lord Chesterfield, "is precisely proof of their greater politeness."—Christian Science Monitor.

THE YELLOW SEVEN
THE SILVER HAND

BY EDMUND SNELL.
ILLUSTRATED BY R.W. SATTERFIELD

This unusual series of stories deals with the exploits of "Chinese" Pennington a detective sent by his government to British North Borneo to run to earth The Yellow Seven, a gang of Chinese bandits.

* * * * *

Denis Moorhouse—District Officer at Bukit-Iban—lay at full length in a long cane chair. In a hole in the arm of the chair rested a glass and, a few inches distant from Moorhouse's stockinged feet, reposed a pair of muddy riding-boots. A black chow sat licking its forepaws at the top of the steps, pausing every now and then to raise its head and growl at the slightest sound that wafted upward from the night-shrouded clearing.

Denis Moorhouse—refreshed by a bath of hot water ladled over himself from a preposterous earthenware jar of native manufacture, felt at peace with all men He was a tall, thin, amiable specimen of humanity with fair hair that was wearing thin on the crown. Functioning as a magistrate on the edge of beyond, where ninety-nine out of a hundred men would have warped, become morbid, or drunk themselves into oblivion, this cheery philosopher had succeeded in steering a middle course. Moorhouse—with his black dog at his heels—was as welcome in a Borneo long-house as in the bungalow of the Commissioner of Police.

Under normal conditions, it might not unreasonably be assumed that Moorhouse—reclining in glorious idleness after a strenuous day spent in the sweltering court-house—was dreaming of home or of the white girl whose photograph occupied a sole and prominent position on his dressing-table; but the girl in the ebonized frame was his sister and the district officer had no home other than the one he now occupied. As a matter of fact, he was thinking of the dusky Dyak belle who had danced before the assembled chiefs in the Kampon at the other side of the valley when the rice-harvest was completed; a shapely, alluring female with an independent swing of shoulders and features that would have done credit to a Western beauty. Moorhouse had been present at this dance, showing his white teeth when the young warriors—drunk with samsu—urged their water-buffaloes across the open wastes and mildly applauding the crazy posturing of the women who danced with human heads.

Then, just as he had made up his mind to pay his respects to his hosts and depart, the wonder-woman from the forests had whirled into the firelight. He remembered her afterward as a vision encased in a sarong of shimmering green, with a single bracelet of gold at either wrist, her dark hair secured by a dagger of which both the point and the jeweled hilt were distinctly visible. More miraculous still, her hands were hidden by wonderfully fashioned gauntlets of silver, each wrought to resemble the form of the hand itself. Her dance had culminated in a sort of joyous stampede, she had fallen prostrate before the semi-circle of gaping headmen, then crawled with the lithe, sinuous movements of a snake toward the spot where the Englishman sat. Before he could forestall her, two warm arms had encircled his ankles and lustrous, mocking eyes were fixed upon his face.

"Great Tuan-Hakim, one of these days you may have need of me!"

The words flowed easily from her lips, with the steady conviction of a sorceress—and it was within the bounds of possibility that she put a spell upon Moorhouse, because she was gone, leaving him without a memory of the manner of her going—and a golden bangle resting in the folds of his white tunic. He gathered a little later that her arrival and departure constituted as much a mystery to all as to himself.

In the solitude of his room he had turned that bangle over and over between his sun-tanned fingers, trying to discover some reasonable motive for such a gift.

Accordingly, with due regard to the value of the bracelet and to the fact that white magistrates in black countries are scarcely in the habit of accepting gifts from fascinating dancing girls, Moorhouse had established it pretty clearly in the local mind that the girl was to be found and brought to him, that he might have an opportunity of returning to her the missing property.

The wonder-woman from the forests had twirled into the firelight.

This was a month ago and still no trace had been found of the girl with the silver hands. But, although human memory is inclined to be short-lived and many events were crammed into four short weeks of Moorhouse's existence, that one incident at the padi-harvest kept cropping up when the curtain of night dropped suddenly and the D.O. was free to indulge in his glass of whisky at sun-down, his long chair, his bath and the company of his dog.

As Moorhouse lay inert, waiting for the native boy to announce the arrival of dinner, an orderly in round hat and bare feet pattered up the steps and, saluting respectfully, presented the district officer with a letter that had just arrived by native runner.

"Dear Moorhouse," it ran. "More trouble for you, I'm afraid. The Yellow Seven business has broken out again and three planters have been attacked, one of them fatally. Chai-Hung, leader of the gang—has been traced to your area. Am sending reinforcements. Co-operate with Dawson and do your best to round up. Pennington will be with you almost immediately.—Hewitt."

He rose somewhat wearily to his feet and, crossing to the lamp, read the missive again. Presently he glanced up sharply.

"All right!"

The orderly saluted and disappeared.

The magistrate stubbed his toe against a corner of the book-case, swore softly to himself and shouted for his slippers. While awaiting the advent of the boy, he dug out a photograph of the bandit and surveyed it curiously. He saw a fat Oriental, staring blandly from the portrait through a pair of horn-rimmed spectacles. At the time when the picture was made, Chai-Hung had been the most respected Celesial in the archipelago; today, thanks to the efforts of Chinese Pennington, the robber-chief stood revealed in his true colors.

The boy shuffled in with the slippers, but still Moorhouse did not stir. He was thinking of the Yellow Seven and the resourcefulnes of its notorious leader. Hitherto his district had been mercifully free from the unwelcome attentions of the organization to which almost every Chinaman on the island belonged; but Dawson had had considerable dealings with Chai-Hung, and Moorhouse was asked to co-operate with Dawson.

It was with mixed feelings that he sat down to table and dissected a helping of buffalo-meat. He was in the act of consigning Hewitt, Dawson, Chai-Hung and Pennington to the deuce when the black chow shot, barking, from the kitchen-quarters on to the verandah. The magistrate, gazing through the open doorway, caught a glimpse of a dark form dimly outlined against the blackness.

"Tuan, will you call your dog!"

The voice came from the stairs.

Moorhouse took the lamp from the bracket and, holding it beyond the wooden rail, peered over. Presently he uttered a muffled exclamation and replaced the lamp. He whistled up the dog.

"Come here," he commanded—and the girl obeyed.

"You are the girl who danced in the Kampon.

"Yah, tuan."

She held herself very erect and Moorhouse noticed that the sarong of shimmering green had given place to one of terra-cotta. She leant almost insolently against the verandah-rail and surveyed the Englishman calmly. He passed her a cigaret and wondered where she had learnt to light it over the chimney of a lamp.

"What is your name?" he demanded presently.

"I have no name."

Moorhouse moistened his lips.

"Where do you come from?"

"I have no home."

The district officer frowned and the girl laughed—a delightfully disarming laugh that almost made Moorhouse forget the dignity that his office demanded.

"You have come for your bracelet?"

She shook her head and the lines of her handsome face hardened.

"I come not for the bracelet," she told him, "because I am a child of the forests, taking when I wish to take and giving when I desire to give—neither giving back nor taking back. I give to my friends and take from my enemies."

The magistrate's forehead wrinkled.

"Then why have you come to me?" he inquired bluntly.

"The Tuan-Hakim is wise," she murmured, gazing down at the straw sandals that rotected the soles of her feet.

"Admitted!" returned Moorhouse cheerfully. "What then?"

"When I heard the music of the gongs and saw the smoke of the fires rising above the tallest trees, a voice whispered to me to go closer—and I went. Presently, beyond the smoke, I saw the faces of the chiefs. And then I saw the white coat of the Tuan-Hakim. The beating of those brass drums called me and I danced for you, because I said 'this man is he who sits alone in the big house among the coco-palms, who reads the evil that is in men's hearts and knows the right from the wrong—the good from the bad.' You beat your hands together, tuan, and I was content." A dreamy note had come into her voice and it sounded in the D.O.'s ears like the soothing sound of a wood-pigeon from her nest. "There are times, oh white man, when it is good to have a friend. I am your friend," she concluded simply.

(To be continued.)

Radium Thief's Ruse Fails

Chance Telephone Call Upset Plan of Robber

The Paris police are looking for a man who came very near robbing a noted X-ray specialist of a valuable quantity of radium as well as other property. Chance alone prevented the long-prepared and ingenious plan of the thief from succeeding.

Some weeks ago the X-ray physician while motoring to Treport was stopped on a lonely road by a well-dressed stranger who said that his own car had broken down and asked for a lift. Although the other car was not in sight the doctor drove the stranger into Treport, and they are said to have made mutual confidences on th eway and exchanged cards at the end of the journey. In the course of this the stranger learned that the doctor intended to remain at Treport a fortnight.

Two days later the road acquaintance visited the doctor's home in Paris representing himself to be a confidential friend of the doctor who had asked him to bring his radium to Treport with other valuables. The stranger presented his own card which read "Comte de Quessen" together with the doctor's card. The servant in charge was properly impressed and was about to help the "Count" gather together the valuables required, when the telephone bell rang. It was the doctor telephoning from Treport. Naturally the servant mentioned the Comte de Quessen's presence and his mission, but when he turned from the phone the visitor, who had heard his words, had disappeared.

England Goes After Record

A New British Seaplane Will Try For Speed Mark

An attempt will be made soon to break the world's speed record with a new Supermarine-Napier racing seaplane, which has been tuned up in England to take the place of the plane in which Lieutenant Webster was killed when he made the last attempt to break the Italian mark of 306 miles an hour. The new plane, called the S-5, is expected to do better than 320 miles an hour.

In appearance the S-5 is very much like its predecessor, although the fuselage is narrower and the air resistance has been cut down correspondingly. The tiny fuselage and wings are in contrast to the relatively big floats, but their size is necessary because the plane lands at the high speed of ninety miles an hour.

The fuel is carried in the starboard float partially to balance the engine torque and make the machine easier to fly. It is pumped up by an engine-driven pump. The wing surface radiators are said to be much better than anything previously used. They cool without adding any resistance, as they have a flat, instead of corrugated, outer surface.

The fuselage is all metal, the skin taking the stresses. The oil is cooled by passing it along both sides of the fuselage in contact with the skin, through specially constructed oil coolers.

The floats are of duralumin. The wings are of wood and are covered with special laminated wood under the radiators. The fuselage is smaller in cross-sectional area than any fuselage previously designed.

The span of the wing is only twenty-six feet nine inches, with an area of 115 square feet, a wing so small that the wing loading is 27.83 pounds per square foot. The weight of the plane, with its geared engine, is 3,200 pounds. The engine is the Napier racing engine, which is believed to develop about 1,000 horse-power.

They were playing cards in the station waiting-room. One of the players, a stranger, was getting a bad beating. Finally, he saw one of the others give himself three aces from the bottom of the pack. He turned to the man beside him and said: "Did you see that?" "See what?" asked the man. "Why, that fellow dealt himself three aces from the bottom of the pack." "Well, what about it?" asked the man. "It was his deal, wasn't it?"

A misogynist said to a woman: "All this feminism is sheer nonsense. There isn't a woman alive who wouldn't rather be beautiful than intelligent." "That," said the woman, "is because so many men are stupid and so few blind."

NEW BEAUTY for YOUR CLOTHES
By Mae Martin

You can look attractive and stylish on less. Learn how to give new beauty and variety to your dresses and add individuality and charm to things around the home by the quick magic of home tinting and dyeing. Perfect results are possible only with Diamond Dyes. Each package represents the perfection of 50 years of dye-making. They never streak, spot or run. They are real dyes, like those used when the cloth was made.

Diamond Dyes are easy to use. The "know-how" is in the dyes. Fashionable tints appear like magic right over the out-of-style or faded colors. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Is Woman Modern?

Writer Says She Lags Behind in Use of Conveniences Where She Rates Her Labor Low

American women are not taking advantage of the many home conveniences provided for them by modern science, writes Frederick L. Collins in the October "Pictorial Review."

"Edison started the electric industry nearly fifty years ago—and there are less than eighteen million wired homes to-day. Ford gave the motor industry its first big push less than twenty-five years ago—and there are twenty-three million automobiles. This in spite of the fact that it costs more on an average to buy a motor-car than it does to wire a house.

"In short, the home of the future is here—but a good many of us aren't living in it yet.

"But it won't be long now," continues Mr. Collins. "I have recently spent many hours of masculine bewilderment in the home-economics departments of the great service companies. I have seen gas stoves with refrigerating attachments—the heat and the cold, the lion and the lamb, lying down together. I have seen washing-machines which make possible the doing of the family wash—the whole operation from sorting the soiled clothes to hanging out the clean ones—in less than an hour. I have seen an ironing-machine that looks like a medium-sized table, and serves as such when it isn't doing the work which used to break our mothers' backs.

"And I have learned many things I didn't know before, such as:

"That five cents will run a washing-machine two hours.

"That five cents will run an electric fan ten hours.

"That five cents wil run an electric sewing-machine seven hours.

"That five cents will keep refrigerator cold eight hours.

"That five cents will run a vacuum cleaner three hours.

"That electric current is the one thing used in the home which is cheaper now than it was before the war.

"That five cents will light a reading lamp for two long evenings.

"That any woman who sweeps a carpet or beats a rug is doing work that an electric motor can do for one and three-quarter cents an hour.

"That any woman who irons the family wash by hand is doing work that an electric motor can do for two cents an hour.

"That any woman who turns a wringer or scrubs on a wash-board is doing work that an electric motor can do for two and one-half cents an hour.

"That any woman who does anything by hand that an electric motor can do is valuing herself at three cents an hour or less.

"And when I came to assemble in one mental locality all that I had seen and all that I had learned, I was convinced that the scientists were right: that the future of the home lies, not so much in the working out of fantastic schemes of new kinds of living, but in a more nearly complete realization of the possibilities of the present."

ASPIRIN

To break a cold harmlessly *and in a hurry* try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

ISSUE No. 40—'28

Germany Should Have Won

Germany Should Have Won the War—That Opinion Will Probably Surprise You, Coming As It Does From the Ex-Generalissimo of the Allied Armies

By MARSHAL FACH

Germany could have won the war; not only at the beginning, but in the spring of 1918. She could have won if her plans, which were very good, had been carried out with more ability.

To-day, I still wonder how it was possible that Germany, after having prepared so long for the war, failed so lamentably in the execution of her strategic schemes.

I wonder, for instance how it was possible that the German General staff neglected its right wing. I know that General Count Schlieffen, who planned the march against France through Belgium, unceasingly insisted on the decisive part which should have been played by the right wing, which had to beseige Antwerp and to occupy the coast of the British Channel at least up to Boulogne.

But the right wing, extending from Belgium to the North of France in the shape of a fan, had to be continually reinforced, and on his deathbed Count Schlieffen exclaimed: "Provided that the right wing may be strong enough."

Unaccountable Mistake

The German General Staff committed the great and unaccountable mistake of weakening the right wing at the most decisive moment in favor of the link wing situated in Alsace-Lorraine, and in removing from it three divisions to send against the Russians in Eastern Prussia, where the battle between Hindenburg and Rennenkampf had, however, already been won.

The German right wing consequently, remained too weak and too small to extend itself up to the sea. It failed to secure support, and could thus be turned.

That is what happened to the army of Von Kluck when it arrived close to Paris. Some months later the Germans endeavored to repair their error and occupied the coasts, but at Ypres they were defeated.

Ypres was the direct consequence of their initial error. The right wing was too weak.

Von Kluck's Retreat

As to whether the German retreat in the first battle of the Marne was necessary or too hasty, I consider that it was both. From the strategic point of view (on account of the faults that I have mentioned) the German army found itself before Paris in a rather precarious position; for we had turned its right wing, and a gap had formed between the first army (Kluck) and the second army (Bulow).

On the other hand, the Germans could still have recovered, instead of retreating with so much haste. Today, one may clearly see that the intelligence service of our opponents was very defective. Only thus can be explained the part played by Lieutenant-Colonel Hensch, whose pessimistic reports determined the general retreat on the whole German front.

A psychological explanation is given us by the letters of General Moltke, Chief of the Great Staff, to his wife—letters in which the pessimistic nature and the very advanced sickness of the General are clearly revealed.

It can consequently be affirmed that on the Marne the Central Staff of our adversaries completely failed; it proved very inferior to its task.

Ought the Germans to have followed the other scheme—that which advised the defensive on the Western front and an overwhelming offensive against Russia?

A Shorter Line

I have already mentioned that in the spring of 1918 the Germans could still have won. If, they had arrived at Amiens the English Army would have been cut off from the French Army, and even after the offensive of General Mangin on July 18, 1918, the position of the Germans was not desperate.

I confess that, from the military point of view, I do not very well understand why, towards the 20th August, General Ludendorff did not retreat to the line Metz-Meuse-Brussels-Antwerp. My preparations were to attack the "Hindenburg Line," and if the German Army could have retired to the straight, short line mentioned I should have had to recommence everything.

This strategic retreat might have prolonged the war by one year—and in critical times many unexpected things can happen in the course of a year.

On the other hand, I understand that Ludendorff could not persuade himself to order this strategic retreat, but it would have meant the confession of an evident inferiority and the abandonment of very important war materials which could not have been easily replaced.

I will even go so far as to say that in November, 1918, Germany could have resisted behind the Rhine. If the German people had had a Gambetta the war would have been prolanged—and who knows?

I believe that a people which does not want to be vanquished need not be. Of course, in November, 1918, Germany had no further chance of success, but if her army had resisted behind the Rhine many things would have been changed.

I speak, of course, from an entirely military point of view. On the other hand, I know that Germany, abandoned by her Allies and cut off from the rest of the world, had not enough food to maintain herself, and that the German people, who had suffered severely, called loudly for peace, immediate peace.

There we must let matters remain. These retrospective considerations of history do not serve much purpose, although they may often be very interesting. But what would have happened if . . .?—Montreal Standard.

The First Moose Trophy

Bringing out with them the first moose shot in Quebec the 1928 hunting season, Mr. of Miami, Florida, reached que, Que., at the conclusion of Vermillion River section with out- The moose secured by Mr. Hock inches and while far from being the serve, was a splendid trophy and was the day on which the hunting opened. what was probably since the opening of and Mrs. Oscar Hock, Montreal from La Tu- a successful hunt in the fitter Armand Tremblay. had an antler spread of 74 largest secured in the preshot in the early morning of

Apron Strings

"My Dear," said Sybil to me when we were discussing life-in-general, "I distinctly foresee the shipwreck of Jeannie's marriage—she flourishes the apron-strings too much!"

When fluffy little Jeannie got engaged to "Big Ben" Travers there had been quite a sensation. Frankly—we were all of us in love with Ben; but we all of us imagined he'd marry somebody statuesque and, frightfully nice—"accomplished," too, as grandmamma might have said! Then suddenly he fell very much in love with Jeannie.

I think the whole business rather turned Jeannie's head; you see, she had just been one of our set, dancing and playing games all together, and then suddenly she became a Real Romance and Big Ben Travers' fiancee.

There is no accounting for the people who fall in love with each other; but you can nearly always account for those who fall out of love!

Keeping Him on a String

It was dreadful, truly. Though at first Ben did not see how dreadful. It was "Ben this"—and "Ben that" (you know how maddening that can be), and then she began to make Ben fetch and carry; she "cut" her dances with him; she flirted round and let him trapse after her, and, and great booby that he was, he followed—so very much did he love her.

But all this was only the prelude to the more serious business of apron-strings. After they were married Jeannie set to work to make a real "married man" of "Big Ben." Nearly every night she fetched him from the office; he felt rather a fool but couldn't bear to hurt her feelings by telling her not to do it too often—she 'phoned him any and every old time; sometimes just to tell him not to forget to call at the fishmongers, or to command him to hurry home as Mum and Dad and Betty and Billy and Bonny were all coming in to dance.

Then, when he did arrive, she'd call out as he came in: "Do hurry, Ben, and change!—Billie's sleeping in your dressing-room so change in the bedroom, and oh! Ben, mind you put on the socks I've put you out, and Ben! do take off your muddy shoes downstairs. . . ."

Maddening!

Well, you can imagine how maddening that sort of thing gets when it's practised in public and private, day in and day out. And when "Little Ben" came, matters only became intensified.

And now? Well, people just ask Ben out without Jeannie whenever they can, and both Ben and Jeannie are puzzled and resentful.

"Anyhow, what could Ben have done?" asked Sybil.

"It's a great pity that he couldn't put her over his knee and spank her hard. . . ." I believe I replied—for, didn't I say in the beginning that we were all a little fond of "Big Ben"?

Hunters Are Too Old Says Canadian Guide

Take it from one who knows them, an experienced hunting guide, the sporting fellows are a bit ancient.

"Curly" Phillips is one of the best-known guides in the Jasper National Park district. He is an experienced hunter of big horn sheep. In an article on the Alberta Big Horns in the current issue of "Forest and Stream" he reveals some entertaining knowledge of human nature.

"The average sportsman is too old," is the guide's verdict. "That's the trouble. Office men wait until they are sixty before they take time off to go on a hunt. That's at the bottom of nine-tenths of the trouble on the trail. They come out here from the city and expect to jump right into the open air life without noticing it. They aren't in trim and it tells on them. They lose their heads and their tempers; can't adjust themselves; run into disappointments; blame it all on the guide and the country and go home fed up. The young husky fellows who should be out after game are busier than blazes making things go at home. They haven't time for hunting until they get to be sixty or so and then—well, it's almost too late.

"But the majority of men, even the oldest, are pretty good. I remember one chap; he was well over fifty but he was long and lanky and he sure could hike, and I have had a lot of fellows like him, who couldn't go as they used to but who went as far as they could, liked it and never kicked."

Two attorneys, one decidedly glum of countenance, met on the street. "Well, how's business?" the first asked of the dismal one. "Rotten," the pessimist replied. "I just chased an ambulance 12 miles and found a lawyer in it."

Bathing in Polluted Waters

Waters commonly used for bathing in the vicinity of large cities are frequently so polluted that they constitute a danger to health. This is certainly the case in New York, according to Dr. Louis I. Harris, health commissioner of that city, who, in an interview printed in the New York American, declares that some of its encircling bays are so polluted that they present a genuine menace. He adds that it would not be far-fetched to say that death lurks in every mouthful of their waters swallowed by bathers. We read:

"In a conference recently between Dr. Harris and Dr. Charles F. Pabst, it was developed that in addition to the many internal diseases which the filthy waters carried, there were many serious and painful skin diseases against which the public should be warned. Dr. Pabst, an authority on this phase of the menace, is a city physician and chief attending dermatologist of the Greenpoint Hospital.

"Following their talk it was said that physicians and surgeons would not be astonished to see an epidemic of furuncles or boils, abscesses, and other inflammatory diseases of the skin and blood stream. It was said that these are quite likely to be contracted by bathers in the condemned waters, where the subject has slight cuts or abrasions.

"These abrasions, it was shown, need not be pronounced, but might merely be the result of chafing by a woollen bathing suit in order to give the bacilli a point of entry.

"Eye specialists have pointed out, too, that these waters present the constant peril of pink-eye and all forms of conjunctivitus, some of which could conceivably result in permanent injury to the eye, or even total blindness.

"Perhaps the most prevalent aftermath of bathing in water containing sewage, it was said at the Health epartment, is that of middle-ear infection, often leading to mastoditis, albscesses, ear-drum infections, and often deafness, especially where the eustachian tubes become involved.

"Respiratory diseases also play their part in the lives of bathers who ignore the Health Department warnings. At the department it was said that 'colds,' which bathers imagin they contract from staying around too long in swimming suits, really are contracted from the organisms in the filthy waters.

"Many cases of pneumonia have been traced directly to this source, as have cases of tonsilitis, bronchitis, pharingitis, and all of the common and throat ills.

"Swallowing these waters, it was declared, might easily lead to disturbances of the di; stional tract, not from the water itself, but from the dangerous bacilli they contain and might easily be a predisposing factor of appendicitis."

Commercial Street

Along the curving brightness of the bay,
The hurried little street runs like a song;
Way-up-along, around, and down-along,
It takes its lilting, winding vivid way
Between small shops and smaller houses, gay
With zinnias, petunias, hollyhocks,
Hooked rugs, ships' models, figure-heads, old clocks
And modernistic paintings of to-day.

Art students, tourists, townsfolk, fishermen,
Elbow each other; motors warily
Dodge horse-drawn carts; great buses, thundering
From distant towns, keep walkers wondering.
A daring and delightful thing to be
A stroller here—one always comes again!

—Roselle Mercier Montgomery.

We may concede any man a right without doing any man a wrong; but we can favor no one without injuring some one.—Colton.

Round-the-World Radio Goes Flying

As Knowledge Grows Radio Waves Become More Confusing—Signals Keep Moving

Where is Stopping Point?

Not once, but two and one-half times do modern short radio waves circle the globe, according to a study made by Dr. A. Hoyt Taylor, superintendent of the Bellevue Naval Research Laboratory. An informative interview with Dr. Taylor is reported in the radio section of the New York Sun by S. R. Winters. The strength of high frequency signals, says Dr. Winters, is suggested by their ability to encompass the earth thus, with a 'kick' sufficient to be a disturbing factor in reception. At the Bellevue Laboratory the phenomenon of "echo" signals is the subject of a special investigation. We read:

"Signals that race around the world in reverse direction from the transmitting station to the receiving set, or encircle the globe more than once, threaten to become a disruptive influence in short-wave traffic. Messages are garbled, and the only remedy thus far suggested is the use of directional receiving antennae.

"Dr. A. Hoyt Taylor, Superintendent of Radio at the Bellevue Laboratory, compares the effect of 'echo' signals to the results of two operators sending the same message, one being slightly lagged in keying. Echo signals are pronounced in the 20,000-kilocycle band, but this disturbing factor has been observed on various frequencies between 8,700 and 28,000 kilocycles. Dr. Taylor considers the possible disastrous effect of echo signals of such significance as to invite nation-wide study. He diagnoses the condition, and tells of the results in the following interview:

"'It is amazing that these echo signals, which have been photographically recorded after having passed approximately two and one-half times around the world, are of sufficient intensity to cause very serious interferences.

"'Echo signals once around the world have been observed on various frequencies, but are usually restricted on the lower frequencies to a very limited time of day and time of year. In the band between 12,000 and 22,000 they may be observed over a large number of hours of the day and over a wider interval in the year. The predominant period for observation of echo signals is in the spring or fall, and the best periods of the day are in the morning or late afternoon hours. They require that the great circle route over which they travel shall be more or less in a daylight or twilight zone. Signals which go more than once around the world are still very frequently of at least one-third to one-half the intensity of the direct signal, but are commonly obesrved over lessed time periods, and are restricted more to the bands around 20,000 kilocycles.

"'When the signal goes more than once around the world it is generally observed as coming from the same direction as the direct signal. The time differences do not correspond to a ground wave, but they correspond to the circumference of the Heaviside layer, which is somewhat larger than the circumference of the earth. When more than one echo is observed the time difference between the first and second echo is apparently almost always 0.137 second.

"'No method other than estimates by ear have been used so far by this laboratory for the accurate timing of these signals, but the time intervals are such as to throw the dots and dashes of a message into complete jumble.

"'It has recently been determined during a period when any copy at all received on a vertical antenna was absolutely impossible, that perfect copy without echo could be obtained on a directional long, low signal wire antenna. In other words, the highly directional antenna pointed toward the transmitter is not bothered by echoes of the first type, which have gone around the world in the reverse direction. It is only bothered by echoes of the second type, which have gone around the world once plus the distance from the transmitter to receiver in the same sense as the direct signal. Since these later type of echoes naturally require rather special conditions in order not to strike a region where the Heaviside layer is too high for these frequencies, they are not anywhere near as bothersome in interrupting reception, and may, for the present, at least, be neglected, except in so far as they refer to the operation of beam stations, where it is understood they still constitute a somewhat serious menace, owing to the very great signal strength of these stations.'"

Painted Ceilings

A new idea which may or may not be a success is that of having your ceilings painted or distempered the same color as your walls. With cream colored, yellow, or ivory walls the effect is certainly charming, though with some colors it is apt not only to be oppressive, but to give the room a smaller, box-like appearance.

"Now, Hiram, the new waitress is a college girl." "What of it, naw?" "So don't keep asking her to pass th[illegible] ain't school."

Dinner for Five

Beef loaf
Creamed onions
Baked sweet potatoes
Fruit salad Hot Rolls
Devil's food cake
Ice cream

Beef Loaf

Put through the food-chopper 2 pounds of fresh pork, and 1 slice of onion. Add 1 cupful of bread crumbs and a well-beaten egg, also a dash of pepper and 1 teaspoonful of salt. Mix well together and form into a loaf. Lay on a greased baking dish and bake in a hot oven. Leave uncovered the first 10 minutes, or until the loaf is nicely seared, to keep the juices in. Simmer together for 10 minutes; 1 quart of canned tomatoes, ½ of a bal leaf, a bruised sprig of parsley, 1 tablespoonful of minced sweet pepper and a stalk of celery cut into small pieces. Strain and pour the liquid over the loaf, then reduce the heat and bake in a moderate oven, basting frequently until the mea is done. To the liquor in the pan add enough water to make 1 cupful. If gravy is desired, and thicken with flour paste as usual.

Fruit Salad

Cut into dice: 2 bananas, 3 slices of pineapple and the pulp from 2 oranges; add 1 cupful of grapes halved and seeded, a dozen each of dates and marshmallows cut into small pieces, and ½ of a cupful of blanched almonds. Whip in enough fruit salad dressing to give the salad the right consistency and serve ice cold on lettuce leaves or in apple cups.

Fruit Salad Dressing

Beat the yolks of two eggs and add slowly the juice from 2 lemons, then ½ of a cupful of maple syrup. Mix together well: 1 teaspoonful each of cornstarch and sugar, and a pinch of salt. Pour the liquid slowly into the dry ingredients, stirring slowly all the while, and cook over boiling water until the mixture is thick. When the dressing is cold, add 1 cupful of whipped cream.

Devil's Food Cake

Cream 1 cupful of sugar with 1 cupful of shortening, add the yolks of 2 eggs and 1 cupful of sour buttermilk in which 1 teaspoonful of soda has been dissolved, and ½ cupful of water. Sift together three times: 2 cupfuls of sifted flour, 2 tablespoonfuls of cocoa and 1 teaspoonful of baking powder. Dredge 1 cupful of raisins with part of the flour. Stir the liquid mixture slowly into the rest of the flour, add the raisins, 1 teaspoonful of vanilla and last, the stiffly beaten whites of the 2 eggs. Bake in a moderate oven about 25 minutes if in layers; 45 minutes if in a loaf.

An icing especially good with this cake is made by peeling and crushing a ripe peach and mixing with it about 1 cupful of sifted powdered sugar, or sufficient to make the frosting spread well.

To Save Time

Prepare in the morning the beef loaf and the sauce to be used with it, and leave them in the refrigerator. Potatoes may also be made ready for baking and the onions cooked. Make the cake and the salad dressing.

An hour and a quarter before serving time, start baking the meat loaf. Half an hour later put the potatoes in the oven and put the salad together Set the latter in the refrigerator to remain until the last thing before serving the meal. Set the table and order the ice cream. Fifteen minutes before serving time put the rolls into the oven to reheat. With the opening of the bag, twisted to retain the moisture, he rolls will taste as if freshly baked. Cream the onions and set them on top of the oven to keep hot. When meat and potatoes are done, the dinner is ready to be served.

Taxis and Telephones

A girl from a little village in a remote country district took a situation as a housemaid in a big city. In her first letter home she wrote:

"There are many wonderful things here, Mother. None of the cabs has horses, and often I have seen the lady of the house talking to herself through a candlestick in the hall."

Differences of culture do not necessarily connote a relationship of superiority and inferiority.—Dr. Sao-Ke Alfred Sze.

MARRIED

BEDARD—MCGUIRE

On October 2nd, St. Patrick's Church, Ottawa, was the scene of a very pretty wedding when Veronica Mary, eldest daughter of Mr. and Mrs. William McGuire, was married to Norman John, son of Mr. and Mrs. A. Bedard, of Ottawa.

Rev. Father Brennan officiated while Miss Gladys Jones sang the Ave Maria. The bride was given in marriage by her father and was attired in a dress of powder blue canton crepe trimmed with silver grey, blue velvet hat and silver grey shoes and stockings and carried a shower bouquet of pink roses and lily-of-the-valley. The bridesmaid, Miss Madeleine McGuire, the sister of the bride, wore a dress of rose blush crepe and carried a bouquet of pink carnations.

Mr. Arthur Bedard, brother of the groom, was best man.

Following the ceremony, the wedding breakfast was held at the home of the bride's parents, after which the happy couple set out on a trip to Niagara Falls and Buffalo. On their return they will reside on Holmwood Avenue. The bride wore a travelling dress of cocoa shade.

BROWN—KELLY

At St. George's Church, Campbell's Bay, on Tuesday, October 2nd, 1928, the marriage took place of Evelyn Mary Kelly, daughter of Mr. and Mrs. Jeremiah Kelly, of Vinton, and Francis Willard Brown, elder son of Mr. and Mrs. William Henry Brown, of Campbell's Bay. The ceremony took place at eight o'clock in the morning and the Rev. John W. Dobson officiated.

The bride was attended by Miss Mildred Hazel Brown, sister of the groom; Mr. Clarence George Smith, of Campbells Bay, acting as best man.

At about nine-fifeen a wedding breakfast was served at the home of the bridegroom, shortly after which, tne happy couple, with the best wishes of numerous friends throughout the Ottawa Valley, set off on a motor trip through Ontario.—COM.

NORTH BRISTOL

Oct. 12—Miss Mary Major is a patient in the Water Street Hospital, having been operated on for appendicitis. All reports she is doing well.

Mr. Joe Stanton and his mother motored to Arnprior on Sunday to attend the funeral of Miss M. Murphy.

Mrs. P. McKee has returned home after visiting friends in Ladysmith.

Mr. Frank Murdock had the misfortune of getting his hand badly injured while working at a threshing mill.

Threshing is in full force around here now. Some of the farmers have not all their grain in account of the wet weather.

The potato crop in this district is reported to be a poor one on account of rot; also very few in the hill.

Good Will

We strive at all times to improve our service and equipment, that we may serve you quietly and efficiently. We hope in this way to merit your ever increasing good will.

ANNUAL LAMB SHOW AND SALE

Exhibition Grounds, Shawville

Wednesday, October 24.

The annual Lamb Show and Sale will be held at Shawville Exhibition grounds on Wednesday, October 24th.

At this show prizes are given for the best pen of ten lambs, and for the best pen of five lambs as well as for individual classes.

At the close of the Show the lambs are either sold by auction or shipped to market.

Lamb-raisers should take advantage of this method of marketing their lamb flock and at the same time win their share of the prize money offered by the Dominion Live Stock Branch and the Provincial Department of Agriculture.

For a prize list or other information apply to

T. E. MCOUAT,
Campbell's Bay, Que.

Thursday of last week Victor McKee got his hand severely injured in an automobile accident. He was taken to the Civic Hospital where they found that all the cords of his thumb were severed. Dr. Brown attended to the injury which required eight stitches. He returned on Tuesday but is still under the care of Dr. Powles. How he escaped not being killed is a mystery as the automobile went over a high bridge falling about eighteen feet and turning turtle.

Mr. and Mrs John McCauley motored to Elmhurst Farm on Sunday to visit Mr. and Mrs. Clarence Hodgins.

As the Weather Man did not predict "Fair Weather" will ring off.—AUTUMN LEAVES.

An Egg Mystery.

An Old Country woman who bought an imported egg found on breaking it open that it was full of sand and small pieces of paper printed in a foreign language. When she bought the egg the shell seemed quite intact.

CREAM WANTED!

Recently we merged our interests wtih BORDEN FARM PRODUCTS of Montreal, so as to assure a better market. We sell our BUTTER DIRECT TO THE CONSUMER FROM OUR 100 WAGONS IN OTTAWA AND 100 WAGONS IN MONTREAL, cutting delivery costs to a minimum, thereby enabling us to pay highest prices to our CREAM SHIPPERS.

Ship Cream to OTTAWA DAIRY,

BRITAIN'S DEEPEST LOCH.

Loch Morar, Northeast of Arisaig, Is Deepest Loch In British Isles.

Northeast of Arisaig, in the country ever associated with the landing and departure of Prince Charlie—in a region that, till the opening of the Mallaig Railway, was among the most sequestered in Scotland—lies Loch Morar. It is the deepest lake not only in Scotland, but in the British Isles.

For a long time the distinction of being the deepest loch was accorded to Loch Ness, and it was not till 1879 that it was shown that Loch Morar was over 1,000 feet in depth, compared with the 751 feet of Loch Ness.

Other surveys of the loch revealed varying depths over 1,000 feet, till in 1902 the maximum depth, taken by wire rope, was ascertained to be 17 feet over the 1,000. Next to Loch Morar, the deepest Scottish lochs are, in order, Ness, Lomond, Lochy, Ericht, and Tay.

To appreciate fully the great depression filled by the waters of Loch Morar, it is necessary to point out that west of Morar, in the sea, there is no depth approaching 1,000 feet, the nearest being one "pot" of over 800 feet between Rum and Skye. There is no depth like it in the North Sea. To get a depth of 1,000 feet it is necessary to sail beyond Ireland and St. Kilda right out into the Atlantic.

Are Subject to Confiscation.

Canada has passed a ruling that all automobiles, brought into the country with a touring permit, are subject to confiscation if caught being used for any commercial purpose.

Australia Purchases 'Planes.

The Federal Government of Australia has ordered 34 Moth airplanes for the Australian Air Force. Twenty of these are to be built in Britain, as well as all the engines. The others will be constructed in Australia.

Babies will prize their photographs in years to come. The absence of just such a portrait in your own collection should emphasize the importance of having children photographed more frequently, and have your own picture taken also that it may bring joy to others.
