"If I were asked to give a brief and distinctive definition of the Turkish Bath, I would say: it is that which claims the exclusive, pre-eminent power of physiologically opening the safety valves of the living mechanism; or developing a high activity of the depurating function, of the animal body, and so fulfilling the first grand indication for the cure of all diseases."—*Dr. John Balbairne, London.*

Apart from one of the largest, the most complete and best constructed Bath on this Continent, the Institute affords facilities for the administration of many of the various forms of Hydro-Therapeutic treatment, as well as for the practice of the "Swedish Movement Cure," and of "Massage."
