From the above Official Returns it will be seen that the ÆTNA LIFE INSURANCE COMPANY has again, for another year, transacted a larger new business in Canada than any other Life Insurance Company. And not only so, but the new business done exceeds that of the WHOLE FOURTEEN old country companies all combined. They issued a total of **1,308** policies for **$2,248,837**, while the new business of the ÆTNA alone amounted to..... **1,600** policies for **$2,323,647**.

Persons about to insure may well conclude that the foregoing figures afford the best possible proof of the ÆTNA LIFE INSURANCE COMPANY'S superior advantages. The assurance that no money can be lost or forfeited in the ÆTNA, after TWO, (and on the cheaper plans, THREE) annual payments, induces many to insure and keep insured, in so liberal a Company.

Special and careful attention is directed to the Table on the other side of this leaf, shewing the GAINS FROM INTEREST, and the SAVING IN EXPENSES of the ÆTNA, as compared with other companies whose accounts can be had for the purpose.

THE ÆTNA LIFE INSURANCE COMPANY, compared with other Life Insurance Companies doing business in Canada, in regard to "Expenses of Management," and the "Productiveness of Assets." *(Computed from the Official Returns and Accounts of the Companies named.)*

Which one of all the Companies in Canada, obtains the largest amount of Interest on its Funds, and at the same time, manages its business with the most Economy? Some one Company does this, and the above table shews which one. Assuming that all are equally careful in selection of risks, their ability to afford ADVANTAGES will depend mainly upon the two elements of saving in Expenses and Improvement of the Funds at compound interest.

Column 9 shews how much less the ÆTNA would have saved in 1874, had its Interest and Expenses been on the same scale as the Companies whose names are opposite the amounts. If the ÆTNA had received only 4½ per cent. interest, instead of nearly 8 per cent. in 1874, the difference would have been about $600,000 as shewn in column 4. If its expenses had been 40 per cent. for a single year, its funds would have been about $2,000,000 less than they are.

LIFE INSURANCE AT COST.

The ÆTNA LIFE INSURANCE COMPANY gives to its mutual or participating Members, their Life Insurance at *Cost Price.*

It accomplishes this by *1st*, using Mutual Rates which are much lower than the Mutual rates of other Companies—lower even than most Companies charge for their cheapest "without profit" policies; and *2nd*, making those rates still lighter by annual dividends of the profits accruing upon each policy.

The following table, taken from the printed rates of the different companies, illustrates the *1st* point above mentioned. The figures with * attached are without profits, and all the rest entitle the holder to dividends :—

Annual Premiums for $10,000, Age 40.

THE ÆTNA'S RATE, with profits,	974.30	644.60	487.70	537.70
Annual Saving in the ÆTNA	**107.21**	**62.50**	**38.20**	**77.60**

The CONTRACT PRICE, therefore, in the ÆTNA, is **$1072.10** less for $10,000 payable at the end of ten years than in the average of other Companies, and $38.20 per annum, or a total of $764.00 less for $10,000 payable in 20 years.

That the ÆTNA can afford to give these advantages over other companies in the contract, is proved by the fact that it has always been able to reduce these rates by cash dividends to its policy holders at the close of each year, applied in reduction of the second and subsequent premiums.

Some of the above-mentioned companies also make annual dividends, but it is believed none of a similar age can excel this Company in putting the Cost Price at a low figure. The following table gives the money paid to the companies named during the past four years by Mr. H. A. Foote, of Water st., New York, who took a Policy in each Company for $5000 in the year 1871, on the same age :—

	Ætna Life.	*Massachusetts.*	*North Western.*	*Equitable.*	*Washington.*	*Berkshire.*
Amounts Paid	$520.67	$532.96	$534.50	$539.55	$550.55	$550.93

THE ÆTNA'S premium named in the Policy is $148.55, but instead of being called on to pay 4 times that, viz : $594.20, only $520.67 was called for, so that the dividends were the respectable sum of $73.53 in three years, notwithstanding the original rate, or contract price, is lower than in any of the other companies.

The following is the case of another ÆTNA policy holder in Saratoga, aged 60, insured for $3000, on which four premiums have been paid to each Company :—

	Ætna Life.	*Connecticut General.*	*Equitable of N. Y.*
Amounts paid	$766.16	$907.19	$834.23

The Ætna Life Insurance Company.

Comparison of Year 1874 with 1873.

	Death Claims only	1,276,375 87
	Interest more than paid the Claims by	$184,680 96

And the Cash Assets on which 7, 9, and 10% is obtained have been increased by no less than		$1,975,005 34

Interest received and due in 1873	$1,874,469 02
" " " " " 1874	1,982,021 05
Increase of Interest Income	$107,552 03

Divisible Surplus, above all liabilities, December 31st 1873	$1,012,249 38
" " " " " 1874	1,561,810 40
Increase of Surplus in 1874	$549,561 08

Shewing a gain of over 50% in the Dividend Fund upon the previous year.

From the above it will be seen that the great wave of extra mortality, which swept across the continent in 1872-73 has subsided, leaving the ÆTNA's gains from mortality, the very large sum of $343,024 61 in the year 1874, as compared with 1873. Total increase of Surplus for the year, **$549,561 08.**

The divisible surplus of **$1,561,810** would have enabled the Company to pay a much larger dividend in 1875 than was finally determined upon. A large surplus being held by the Company will prove of great benefit to continuing policy holders. It will act not only as an additional safeguard, but the additional interest realized upon the surplus becomes a part of the earnings which those policy holders who continue to pay premiums will receive in future dividends.

Newspaper Enterprise.

The Success of the "Montreal Daily Star" — The Introduction of the Great Prestonian Web Feeder Perfecting Press—Its Powers and Capacity and Successful Operation.

(From the "Montreal Gazette" of 18th March, 1875.)

Successful journalism is something so rarely met with in modern times that when a case presents itself to observation, and especially in the city of Montreal, an opportunity should not be thrown away for congratulating the successful journalist. In the present instance we have much pleasure in congratulating the proprietors of the Montreal *Evening Star* upon the successful result of their labour and preseverance.

The *Star* first made its appearance in the afternoon of the 16th January, 1869, under the management of the firm of Marshall & Co., and from the first made its mark as a local newspaper. The difficulties and obstacles in the way of achieving a successful issue of what was then looked on by many as a hazardous undertaking were fully realized by the enterprizing young firm, but with all their foresight emergencies arose, which taxed to the utmost the perseverance, energy and fertility of resource of the members of the firm. The type for the paper at the time of which we speak was in a small room in St. Thérése street, and the paper was printed sometimes on the steam-press of Sénécal & Co., St. Vincent street, at times on an Adams press or a Hoe press belonging to Beauchemin, St. Gabriel street. To make matters more inconvenient the office where orders were taken and at which the paper was sold was located in St. James street in a small building which was situated on the site now occupied by Barron's block. The papers had thus to be carried more than a mile from the press which printed them in order to be given to the newsboys for sale. These and many other difficulties of a still more insurmountable character presented themselves to the firm, but by indomitable energy and perseverance they were met and conquered in detail, until now, after six years of hard work, the firm, which has been changed to Graham & Co., find their efforts crowned with such signal success as rarely falls to the lot of newspaper men in any part of the world, and take their place among the foremost journalists in Canada. They are established firmly on a sound commercial basis, their business has increased in such a degree as to require the introduction of the most improved machinery and the best and most efficient means of printing their papers. The *Star* has subscribers, in lists varying in number from five to fifty, at 1,407 post offices in Ontario, 523 in Quebec, 428 in Nova Scotia, and 445 in New Brunswick, besides a number of scattered post offices in the United States. The circulation of the Daily is in the neighborhood of ten thousand, and that of the Weekly has reached the enormous number of eighteen thousand. By the advance payment which the *Star* has been instrumental in establishing in Canada, the circulation is established on a sound commercial basis, whereby dead-head subscribers are excluded. The daily edition of the *Star* in a continuous sheet measures seven miles in length and that of the weekly nearly fifteen miles. The mail when ready for post of the *Weekly Star* weighs 1 ton 1 cwt. and 90 lbs. For the publication of both weekly and daily, besides the new press, a very fast Taylor double cylinder press and four folding machines are used.

In accordance with an invitation of Messrs. Graham & Co., yesterday afternoon a large number of representatives of the city press assembled at the office of the *Star* to witness the working of the new Prestonian Web-Feeder Perfecting Press lately imported from England for the purpose of supplying the increasing demand of the public for the evening editions of the paper. The press in question is, we believe, the only press which is a self-feeder and at the same time prints directly from the type. Most of the power presses in use, such as the Bullock, Walter and others print from stereotyped plates, and involve a large outlay in the erection of machinery; and worse still, a loss of time in the process of stereotyping, which can ill be spared by a paper which publishes several editions to give the reader the very latest possible news. Hence is apparent the immense advantage of a press which feeds itself, cuts its own paper, and even counts the number of papers printed on its cylinders. The following description of the great press will show the various points in which it excels:—

About half-past four the press was started, and was run at an ordinary rate of speed, printing on both sides, at the rate of about 8,500 perfect papers an hour. The papers were "flied" off one after the other with great regularity; the printing, judged by the most critical newspaper men, being pronounced wonderfully clear, and the impression regular and even in its working. The press runs very smoothly, having none of the jar which is peculiar to the old-fashioned Hoe one cylinder—which was a few years ago looked upon with wonder and admiration. The immense cylinders and cogwheels seem to move with as much regularity and precision as the works of a fine patent lever watch. Taken altogether the press is the finest piece of machinery to be found in Canada, and probably on this continent, and with this and other facilities for carrying on business the *Star* is destined to achieve still greater success. The proprietors are gentlemen who appreciate the fact that they owe their success to the good taste and judgment of the public, and will spare no effort to make their paper a household treasure which can be had for one cent, and which can be read with interest and profit both by father and son in every family in the Dominion. The farmer will find useful information, the artisan will find news to think about, the professional man can, at all times, find the current topics of the day discussed, and the merchant, in the commercial columns, will find his particular branch discussed with unbiased candor and intelligence. In fact, as a local newspaper the *Star* will be the *ne plus ultra* of journalism, and its proprietors have our hearty good wishes on the successful issue of an enterprise which promises a long career of usefulness to Montreal and profit to themselves.
