**UNE VIE PLUS MODERNE,
PLUS ACTIVE, PLUS VIGOUREUSE
grâce à ce nouvel exerciseur électrique**

Il serait inutile de continuer à vous tordre, vous pencher, vous courber, vous étirer et dépenser ainsi toute votre énergie, afin de conserver votre élégance, votre vigueur et votre jeunesse. Vous pouvez cesser dès maintenant ces efforts personnels ou ces exercices avec l'aide d'appareils manuels. Le moyen le plus confortable et le plus efficace de vous garder en parfaite condition physique est de vous procurer un EXERCYCLE.

En moins de 5 jours, une personne adulte normale, quels que soient son poids, sa taille et ses habitudes sédentaires, peut réaliser les mêmes mouvements rapides et tonifiants que les experts cyclistes, nageurs, rameurs ou gymnastes. Exactement ! En moins

de 5 jours, vous serez capable de faire des exercices qui vous étonneront et avec une rapidité qui sera pour vous une révélation.

Ecrivez dès maintenant pour recevoir la documentation gratuite concernant EXERCYCLE et vous constaterez comme des milliers de gens l'ont fait avant vous, qu'il n'y a aucun vibreur, aucun bain, massage ou diète d'amaigrissement qui puisse se comparer à l'exercice des principaux muscles du corps. Consacrez vos loisirs à améliorer votre condition physique et vous bénéficierez ainsi des merveilleux bienfaits que seuls peuvent vous apporter les exercices quotidiens.

YOU ARE YOUNGER than you think!

The average healthy man or woman between 35 and 70 is much younger biologically than he or she appears to be physically — Yes! over 5—10—15 years younger! For in this day and age there's probably nothing that can age you more quickly than occupational stasis. Occupational stasis is stagnation of blood circulation and body metabolism resulting from too much sitting, too much driving, or too much standing.

Occupational stasis can raise havoc with your life, if you don't watch out! It can weigh you down with pounds of dangerous, excess fat,

bring about poor or failing health, all sorts of vague aches and pains, loss of strength, pep and energy, poor digestion, faulty elimination, sleeplessness, nervousness, abnormal blood pressure, circulatory and heart troubles. In fact, your doctor will tell you that it is often the cause of other serious ailments afflicting both men and women after 35.

You can overcome the physical and emotional difficulties arising from occupational stasis, and set back the clock 5—10—15 years and more with an EXERCYCLE.
